the foregoing by no means comprises the most important of Bishop Whipple's life work. When he began his episcopate in 1859 there was not a mile of railway in Minnesota. His journeys comprised from 3,000 to 4,000 miles each year on foot, by canoe and by wagon, and his famous blooded horse Bashaw, was almost as well known in the State as the Bishop himself. There were about 20,000 Indians in his diocese, which extended over 81,000 square miles. He was a well-known figure in Washington, where he often went to intercede for the wronged red men; sometimes he was accompanied by the chiefs of tribes. As long ago as 1871 he was offered by the Archbishop of Canterbury the bishopric of the Hawaiian islands. This honour he declined in the interests of his diocesan schools and his Indians. At the request of the Archbishop of Canterbury he preached the opening sermon of the Lambeth conference in Lambeth Palace, London, in 1888, and in 1889 he preached the sermon at the centenary of the Protestant Episcopal Church of America in New York city.

The San Francisco *Chronicle* reports that a movement is on foot for the settlement of the valleys of southern Alaska on an extensive scale with immigrants from the north of Europe. The Pacific coast steamship companies and other transportation organizations are interested in the project. It is planned to send photographers and agricultural experts to the territory to gather suitable material for the use of immigration agents. The Yukon, Tanana and Copper valleys contain extensive areas susceptible of being cultivated by grain and vegetable crops. There is a serious misconception abroad concerning the fertility of Alaska's soil and its adaptability to raise products capable of sustaining human life. It is based chiefly on the brevity of the territorial summer, the severity of its winters in the interior and on the latitude. These are, however, misleading in many respects. Experience has proved the adaptability of soil and climate to mature agricultural productions of great value for the support of life in man and beast. Besides, the land is full of game, and the rivers, bays and estuaries along the seaboard are teeming with food fishes of the highest value. Alaska has supported all along a considerable native population. These aborigines have lived, as the red men of the central plains of the continent formerly lived, by the fruits of the chase. Wherever civilized man has gone he has demonstrated his capacity to utilize natural conditions and resources, which the aboriginal tribes neither considered nor understood, so as to support a comparatively dense permanent population, where only nomads formerly roamed. It will be so in Alaska. The capacity of the soil for agricultural development will, besides, be aided immeasurably by the utilization of other resources. The enormous mineral wealth of the territory is sure to attract to it a large permanent population which will furnish a market for agricultural products. The time will undoubtedly come when the opening up of the inexhaustible deposits of base metals and the coal measures of the territory will create an endless chain of industries to give employment there to tens of thousands of people.

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

Commenting on the Annual Missionary Conference of the American Board Mission held in Kobe in July last, the *Tokyo Maishu Shinshi* says in effect:—What deserves special attention is the resolution passed in favour of asking the Board to send six more male and four more female missionaries. The reason alleged for this is that the Conference considered that the stations occupied by the missionaries now in the field need strengthening. But is this step advisable? Is it not far preferable to rely more on native help? Is it not a recognised fact in all missions that the most successful work is carried on by native pastors and evangelists? Therefore we doubt very much the wisdom of the step taken by the Conference. In the extensive evangelistic work with which the

opening of the New Century has been celebrated very few foreigners have taken any part, and yet the movement has been very successful. Among all the missionaries in Japan at the present time the men who can speak the Japanese language sufficiently well to make an effective speech in Japanese are very few. For urgent evangelistic or pastoral work, what then is the use of new arrivals? It takes years for them to be ready to commence effective work. It seems to us that already there are quite enough foreign Protestant missionaries in the field. Last year's report showed that the number was 757. It is true that among these there are only 276 men. But when we see the Greek Church accomplishing about half the amount of work done by Protestants with only 4 foreign missionaries, we assert without hesitation that, instead of increasing the number of foreign workers, they might profitably be reduced by 10 per cent. We do not say this out of any anti-foreign spirit, but give it as our honest opinion, considering the permanent interests of the Church of Christ in this country.

The *Fukui Shimpō* in an interesting article entitled *Hito no Kankwa* (感化) to *oshiye no Kankwa* draws a comparison between the effects of personal influence as a reforming agent and the effects of doctrine in the same capacity. While it lasts, says this organ, there is nothing so powerful as personal influence in religion, but since it is in all cases short-lived it has to be supplemented by doctrinal teaching. This latter, however, lacks life and in many cases fails to attract interest. Personal influence has its limits. Though it may impress a man in favour of certain religious teaching, it cannot change a number of mistaken notions that are entertained by people who have gone astray. There is one thing that all those who attempt to teach others should bear in mind, and that is the extent to which good and evil is mixed in the hearts of even the most wicked men. It is quite essential in order to influence men, that strong sympathy should be felt for them. They labour under numerous misfortunes, some of which they did not bring on themselves. At the present time in Japan there is no want of powerful personalities, but there is a dearth of men who in addition to the influence they exercise by personal character are, like the late Mr. Fukuzawa, recognised and respected as teachers. As yet Mr. Fukuzawa has no successor. There is a wide-spread desire for teaching, as is shown by the wonderful sale which the old man's "Hundred Essays" have had (they have now reached the 26th edition) as compared with his autobiography, which, as a literary production, is in every way superior to the Essays. What Christianity needs is just that element of success which Mr. Fukuzawa possessed in such an eminent degree—the combination of a powerful personality with certain fixed doctrines. It is by this means alone that doctrines live. Thus it was that Christianity was first given to the world and thus it must be perpetuated in every country on whose dark corners it has shed its light.

The *Fukui Shimpō* publishes an account of the teaching of the Shintō Kurozumi Kyō. The system of doctrine held by this sect is entirely monotheistic in character. According to the account of Mr. Tsukakoshi Teishun, quoted by the *Fukui Shimpō*, the sect embodies its teaching in four principles which are thus briefly stated: (1) *Seisei Shugan* (生々主眼) "Let it be your chief object to seek new life." (2) *Rika Shugan* "Let it be your chief object to get rid of self." (3) Cultivate the heart. (4) Develop the spirit of energy. Under the first heading we are told that the devout soul should seek re-birth every day and should pray to God with all the devotion of the newly born. *Maitsa, maitsa umarekawatta kokoromochi de ogameyo*. Under the second heading we are informed that desires must be suppressed and self-conceit opposed, that a man must regard himself as a fool when approaching the Divine Being. He should bow to necessity quietly and allow nothing that happens in the world to cause him much anxiety. Under the third heading the devotee is exhorted to set

about mental culture with great resolution and to let nothing daunt him. Under the fourth heading the immense importance of spirit in all that is undertaken is enlarged on. There is mention of several distinctive Buddhist doctrines, which inclines one to think that the Kurozumi Kyō is not so exclusively Shintō as Mr. Tsukakoshi seems to represent it to be.

* * *

The *Tokyo Maishu Shinshi* thus sums up the results and characteristics of the evangelistic mission held in Tokyo during May and June. (1) Union among Christians was greatly furthered. (2) Heretofore the work of evangelising has been left to special agents and ordinary church members have taken no part in it. But one characteristic of the late movement was the part taken in preaching and speaking by ordinary laymen. (3) The choice of preachers and subjects received special attention, with excellent results. Hitherto it had been customary to have several speakers following each other and each treating a different subject. But in the recent services there was only one preacher or speaker. And as regards subjects, no such broad topics as "Religion and the State," "Civilisation and Christianity," or "Christian Ethics" were chosen. The preaching of Christ and the cross was strictly adhered to. (4) Immediate repentance and instant resolution were insisted on. Hitherto the church has been content to sow without reaping. But both were accomplished during the late mission. (5) The spirit of prayer prevailed everywhere; a characteristic that in past years has been markedly absent.

Side by side with this unqualified optimism we find a letter which points out the great defects and dangers attending the movement. It was a big excitement, says the correspondent of the *Tokyo Maishu Shinshi*, and people who ordinarily do next to nothing for Christianity moved with the crowd and appeared to be doing a great deal. But the question that thoughtful Christians ask is, how long will the effects of the work done last? Steadfast Christians are not to be obtained by what is called a revival movement. Months of quiet, patient teaching are required for the training of real Christians. To the writer it appears that much of the work done was like pouring water into a sieve. The bubbling of emotion is not to be mistaken for real belief in Christianity. It is *will* rather than *feeling* that is wanted by our people. It will be interesting to see by what the work done is to be followed. Will there be any attempt to bring to maturity what only exists in bud? To go and seek wandering sheep is not enough. They must be shepherd after being found and be fed on the richest of pastures or they will be no credit to the finders.

The alleged great revival effected by the mission alluded to above is discussed by the *Taiyo* in the following strain. There are certain Christians who seem to be supremely satisfied with the result of the evangelistic efforts put forth in May and June. There were street-preaching and hymn-singing along the tramroad, and what not. Those engaged in this work affirm that in the Kyōbashi district alone several hundred converts were made. A little close scrutiny into the work done leaves the impression that it has little in it that is lasting. There was nothing new whatever about the preaching. The doctrines which so many doubt, such as the Divinity of Christ and the Trinity, were proclaimed afresh, and no attempt was made to expound the new convictions held by enlightened Christians. It is hardly conceivable that persons of any intelligence whatever will continue to remain connected with teachers who do nothing but proclaim exploded theories. The mission may be regarded as an attempt to revive interest in what is called orthodoxy. Whatever belief the conductors of this mission have succeeded in producing has done violence to the intelligence with which men and women are endowed, and hence the day must come when the persons who now profess faith in Christianity on account of what was said to them by the preachers will find out that they have been acting in the dark; that they have no adequate conception of what real Christianity is. Faith that is allied to ignorance

and dependent on it for its very existence cannot last long. So it will be found that the house erected has been built on sand. It will fall to pieces and the place it has occupied know it no more (*Kore made no shinkō wa suna no uye no iye, tachinachi barabara ni kuzurete, mata moto no ōri sabishiki arisama to naran.*) We very much regret that the organisers and promoters of this mission should be thinking more of the numbers that have professed belief than of the quality of the faith they possess.

The Buddhist movement promoted by the Tōa Bukkyōkai, which at the beginning looked so promising, culminated in a fiasco after much the same fashion as the Christian agitation. There was a good deal of very indifferent preaching to the old men and women who have one foot in the grave and sensational demonstrations of mendicant friars headed by Rakan and such like old men. It is not by these methods that real religion is to be furthered.

The *Rikugō Zasshi*, we observe, writes in the same strain on the results of the Christian revival meetings held in the spring.

* * *
The *Taiyō* informs us that there has been quite a commotion among the Otaniha Buddhists on account of certain statements found in an historical work in use in the Gifu-ken Primary Schools representing the trouble caused by the Hongwanji Buddhists in the Genki and Tenshō periods. It is alleged in the text-book referred to that the harm done by these Buddhists at that time was enormous (*Hongwanji ga tenka ni doku too nagashitaru koto ō nari*).^{*} Since the Shin sect is very popular in Gifu the use of the text-book in question caused great umbrage among the priests and the Mombushō was applied to to suppress it. But seeing that, in the opinion of competent judges, the statement which has caused offence only represents the situation of affairs in the days when the Buddhists held that the Chief-Abbot should wield secular as well as spiritual power, the Mombushō has as yet done nothing. The *Taiyō* exhorts the Department to stand firm and condemn the action of the Gifu priests. It says that they should have passed the thing over in silence, knowing as they must that the history given is true to facts. But if their attention was called to it, they should have explained that the priests of Nobunaga's days were labouring under a misapprehension in thinking that the Chief-Abbot should be supreme both in spiritual and secular affairs. . . . Such incidents are likely to increase the disfavour with which religion is regarded in the educational world, concludes the *Taiyō*.

* * *
"The Religious Belief of Criminals" is the title of a note in the *Taiyō*, of which the following is the purport:—Full statistics on the relation of religion to crime are hard to obtain even in Europe and America, and naturally this is still more the case here. The *Seishin-kai* (Mind) has been turning its attention to this subject. Some little time ago Mr. Suzuki Hidetaro published in that magazine an article full of statistics designed to show that the religious superstitions of various criminals had largely conduced to crime, and arguing that it was hopeless to expect religion to act as a preventative. The editor of the *Seishin-kai* opposed this view and maintained that the worse the crime the more need was there for religion and advocated the employment of prison chaplains, &c. Subsequent to this a writer signing himself "Fukagawa Inshi" contended that the fact that in many instances superstition had been the immediate cause of crime showed that more general instruction was needed to break the fetters of superstition. He therefore advocated the teaching of morality in a general way in prisons, instead of relying on religious teachers only. But he went further and affirmed that no teaching whatever can be of any use as long as the mind is diseased and warped. With a heart bent on crime the

criminal is indifferent to religion and morality alike. The first thing to be done is to implant a new resolve in the mind, to convince those who have gone astray that they have erred and that there is a way back to a life of honesty and happiness.

* * *
Under the title of "Christian Ideas on the lower Animals" the *Rikugō Zasshi* lectures certain Christian pastors who are found occasionally with guns on their shoulders in pursuit of game. For Christian pastors to find pleasure in taking the lives of harmless birds is, according to the writer we are quoting, a crying evil. The spirit of Christianity is full of kind feeling towards all living things, and wanton destruction of animals or birds is contrary to this spirit. The *Taiyō* highly applauds this view, but adds cynically, it is hardly to be wondered at that Christians are found killing birds for pleasure when they think nothing of slaying hundreds of Chinese men and women, because they think that they belong to an inferior race of men. They always have plausible excuses for what they do. "The Chinese are heathens and Orientals, and so may be killed without regret" say they. "Birds and animals are given by God for our food, and so may be slain at will." With the Buddhists the taking of animal life is strictly forbidden, and so they are not to be seen shooting, but their feeling for animals is not more refined than that of many Christians. They will stand by and see a starved horse struggling under a cruel burden without shedding a tear. The cause of humanity not being properly represented or furthered by either Buddhists or Christians, Government has come to the rescue, and the Department of Agriculture and Commerce is now drafting rules against cruelty to dumb animals. "Ah! you professors of the doctrine of gentleness and love, it has come to a pretty pass when Government officers are compelled to do the work you have neglected to perform!" They may attempt it, but can not do it effectually, says the *Taiyō*. Hence professors of religion must turn their attention to this subject with increased devotion.

* * *
Writing on the attempt to establish a Mormon mission in this country and the comments of the Press thereon, the *Rikugō Zasshi* says that the resolute manner in which newspapers and magazines have protested against giving special religious sanction to polygamy is a very hopeful sign. Although it is true that in the past concubinage has been almost universally practised in Japan, there is no doubt that at the present time there is a very strong feeling against it among influential people, and consequently Mormonism is regarded with aversion. But apart from the question of polygamy, the *Rikugō* thinks that it will be a subject for deep regret if the Mormon vagaries are added to the long list of superstitions already prevailing in this country. Of all the sects that profess Christianity in any way it seems to the *Rikugō* to be the least worthy of respect or patronage. The legends and the pretended Divine revelation on which it founds its claims for credence are childish and hardly merit serious criticism. The sect in many respects resembles the Tenrikyō-ha here. But while we say this, continues the *Rikugō*, we must confess that few of us Japanese know what is the real teaching of the modern Mormon missionary. It is not to be supposed that he would come here simply to preach polygamy* and propagate superstition. It is quite impossible for the authorities to decide on any action till they have taken steps to ascertain what are the leading tenets of the sect. And as regards the public, why are not measures adopted to elicit from the Mormon missionaries themselves same statement of their views and doctrines? Why not hold a large meeting for this purpose in the Kanda Seinen Kaikan? asks the *Rikugō*.

* * *
Writing in the *Rikugō Zasshi* on the funeral rites observed by the Unitarians, Mr. J. Saji says

* Mr. Grant has explicitly denied in the correspondence columns of this paper that polygamy is taught by his church.—(WRITER OF SUMMARY.)

that in almost all countries burial ceremonies are connected with religion and performed by priests or ministers, and that it would be considered a serious defect in any religion not to devise some fixed method of performing funeral obsequies. There are some, says Mr. Saji, who go so far as to say that no creed is entitled to the name religion if it does not concern itself with funeral rites, but this is going too far. The article continues in the following manner:—There is far too little liberty allowed in the matter of conducting funerals. Rites are performed over the bodies of the dead that would be entirely disapproved of by the persons in whose honour they are performed, could they express an opinion on the subject. It is a very peculiar way of showing respect to the dead to insist on the performance of ceremonies over a man's body of which he disapproved while alive, and yet this is done in hundreds of instances under what may be called religious despotism. Why should people be buried in one way? and why should it be necessary to entrust the conduct of the rites to a fixed class of officiators? Religious opinion differs, and it is quite untrue to say that a man has no religion because he turns his back on the popular creeds. Surely the principle to be observed in burial rites is the showing of respect for the dead by acting as far as possible in accordance with his or her wishes. So the greatest liberty in the matter of ceremony is allowed by the Unitarians. The object of people's assembling around the grave of one whom they have known is to bid farewell to his spirit, so Unitarians in deciding on what ceremonies are suited to the occasion take into consideration the sentiments of the deceased, the feeling of the surviving family, the social status of the family, and the like. And so the programme followed at funerals differs considerably to suit the occasion. Sometimes farewell addresses are read before the coffin, sometimes speeches are made to the survivors. Sometimes an account of the good works performed by the deceased is given or there is reading of a portion of scripture. Sometimes the service may be conducted by a special minister, at other times it is entrusted to a friend of the deceased. And as regards the manner of dealing with the corpse before being laid in the coffin and the placing of articles of which the deceased was fond in the coffin, and similar practices, such as burying children with toys in each hand,* and the like, such things are quite harmless and should not be interfered with by anybody. We are entirely opposed to the imposition by any religious sect of stereotyped ways of bidding farewell to the dead. Anything that smacks of artificiality, anything that is forced, that appears hollow,—mere forms that lack significance,—surely these are out of place when men are standing around the graves of their loved ones. But where full liberty in regard to ceremony is not allowed, such incongruities as those now mentioned are unavoidable.

* * *
The *Taiyō* traces the connection between the Imperialism of the chief European Powers and that of America with the religious Imperialism of Rome. It maintains that the Roman Catholic Church welcomes the aggressive spirit which prevails, and that she utilizes it for the extension of her own power. She regards the victories of Christian armies as victories won for the church. The *Taiyō* draws special attention to the rapid strides Roman Catholicism is making in the United States and dwells on the skilful manner in which the thirst for empire, now so prevalent in that country, is turned to account by the vigilant Roman priesthood. There may be something in what the *Taiyō* writes on this subject, but the language used seems to us exaggerated.

* * *
The doings and views of the conductors of the mission alluded to in a former part of this Summary have been made, the subject of a sharp contest in the columns of the two leading Christian newspapers, the *Fukūin Shimpō* and the *Tōkyō Maishū Shinshi*. The *Fukūin Shimpō* contends that there was great dissension among the

* This is done occasionally in Japan.—(WRITER OF SUMMARY.)

* This is a true statement. In Nobunaga's and Hideyoshi's time the priests were constantly found in arms against the secular power and they encouraged faction, sedition, and the like, in every way possible.—(WRITER OF SUMMARY.)

missioners as to the kind of preaching that was desirable. In the Kyôhachi district, for instance, those who had openly expounded evangelical principles were thrust aside. In other districts considerable disunion manifested itself. . . . The *Fukuin Shimpô* says that it is important to settle whether the movement known as the Taikyô Dendô is to be regarded as exclusively connected with the *Fukuin Dômeikai* (Evangelical Alliance). Though it may have been suggested by the Alliance, the actual work was carried on by a whole crowd of volunteers, who had no real connection with the Alliance. Notwithstanding the fact that the Alliance seems disposed to claim all the credit of organising the movement, facts show that the members of the Alliance figured rather as guests than hosts. If, for argument's sake, however, we grant that the Evangelical Alliance organised and superintended the movement, then several ugly questions have to be answered continues the organ we quote. If the Alliance controlled affairs, why has a set been made against Mr. Ebina Danjô and the rationalistic German Christians by a certain section of Christians? What is called the Evangelical Alliance evidently consists of a very mixed set of Christians. The doctrines of the Alliance have become very vague (*Fukuin Dômeikai sou aimai naru shûkai nari*). In the late movement men who deny the divinity of Christ were co-workers with those Evangelicals who shout "come to Christ." That men with such irreconcilable views should have been assembled under one flag is somewhat grotesque. Then the choice of Mr. Ebina Danjô as a preacher by the Alliance was certainly a very remarkable proceeding. He went to the provinces and proclaimed his own well known tenets.* In Tôkyô there was considerable opposition to his being employed. The Evangelical Alliance made a great mess of the arrangements. And this was to be expected; for the society was not originally organised with any such object as the planning for and the superintending of evangelistic work. The primary object of the Evangelical Alliance is to bring Christians together and to promote cordiality among them. It is not organised to exercise the necessary control over a set of evangelists engaged in extensive mission work. We believe in the Divinity of Christ and in the reality of Christ's death as an atonement for our sins and we wish to see these tenets made the centre of the doctrines preached as the Gospel of Christ, but the Evangelical Alliance, if it is responsible for all that was preached during the late mission, insisted on no such special views being proclaimed. Their trumpet gave no certain sound.

The *Tôkyô Maishû Shinshi* in No. 943 replies to the above arguments. It contends that the movement was certainly organised and superintended by the Evangelical Alliance and maintains that this Association as now organized in Japan is quite equal to fulfilling the function it undertook in the spring. It denies that there was any serious difference of opinion as to the doctrines to be preached, and asserts that the ordinary orthodox views on Christ's nature and work alone were authorised by the leaders of the movement. As regards the Evangelical Alliance, it began its work here about 12 years ago. At first it aimed at nothing but acting as a medium of bringing Christians into closer friendship with each other. Its organisation in Japan is different from what it is in Western countries. In the West it is formed by the enrolment of members, here by the enrolment of churches. But about four years ago the Japanese Evangelical Alliance underwent a great change. Permanent officers were appointed and arrangements were made whereby the Alliance prepared itself to undertake evangelistic work. That its doctrinal standpoint is undecided the *Tôkyô Maishû Shinshi* denies. It certainly does not welcome men of rationalistic or broad church tendencies at present, though some years ago it did so in Japan. The Unitarians do not now belong to it. It is true that certain German Church Christians of broad tendencies do belong to it. Though it is said that some of the Lutheran Christians in this country deny the Divinity of Christ and have ceased

to believe in other orthodox doctrines, this does not apply to all the Japanese members of the German mission known as the Fukyu Fukuin-kai. It is no doubt necessary that the Evangelical Alliance should reconsider its attitude to members of this German church and to other bodies in Japan. But we are not in favour of applying a strict doctrinal and dogmatic test. The chief question to be settled is whether persons have real faith or not. As regards the late mission, it was started and carried through by the Evangelical Alliance, says the *Tôkyô Maishû Shinshi*. There was union everywhere and all who engaged in it felt they were brothers. This inquiry into the merits of the workers, instituted by the *Fukuin Shimpô* is to be regretted.

In No. 326 of the *Fukuin Shimpô* is published a letter from the Rev. T. T. Alexander on the subject in dispute between the two papers, in which Mr. Alexander says that the *Fukuin Shimpô* is right in asserting that the Evangelical Alliance is not a suitable body to take charge of an Evangelistic mission and that he has no recollection of this Association's engaging in any such work in other countries. There is no doubt, continues Mr. Alexander, that there is some uncertainty as to the principles of the association. Even the term "evangelical principles" may bear many meanings. Misunderstandings and friction in work performed in connection with such an organisation are unavoidable, and hence it would be preferable to entrust the conduct of a mission such as was carried on in the spring to a representative Committee consisting of members of all the principal churches. There is no doubt that the movement is worthy of encouragement and that it should be extended to the whole of Japan. Hitherto Japanese Christianity has lacked a certain spirit of aggressiveness. The world is not to be conquered by the adoption of a reserved and retiring attitude. The war must be carried into the enemy's camp, and all Christians should unite in furthering efforts to reach the thousands to whom the real teaching of Christianity is quite strange. If there are men or sects that proclaim doctrines that are radically at variance with the fundamental truths of the Gospel they should not be allowed to take part in evangelistic work. But if men believe in Christ as the Saviour of the world, their assistance should be welcomed, no matter to what church they belong or what their theological creed may be.

LAW REPORTS.

In the Yokohama Chiho Saibansho on Saturday morning, before Judge Kano, judgment was given in the civil case brought by Mr. F. N. Upton against Messrs. H. Ahrens & Co. The first judgment, given by default, was sustained and plaintiff ordered to pay the expenses of the suit.

Judgment was given on Saturday in the suit brought by Mr. Arai Kildoye against Messrs. H. Ahrens & Co. The claim of plaintiff was rejected and with regard to costs plaintiff was held responsible for one-tenth and defendants for the remainder.

Judgment was to have been given on Monday at the Yokohama Chiho Saibansho in the suit brought by Messrs. Carl Rohde & Co. against Mr. Ogaki Naotaro and Mr. Yama Tatsuzo, but, owing to the absence of the judge, it was reserved till the 9th instant at 9 a.m.

Judgment was to have been given on Tuesday in the Yokohama Chiho Saibansho in the suit brought by Mr. E. F. Polsien against Mr. Alimacher, but it was postponed to suit the convenience of the Court.

In the Yokohama Chiho Saibansho, before Judge Kano, the hearing was resumed on Tuesday of the suit brought by Mrs. E. Hall against Dr. C. H. H. Hall. Mr. Akiyama appeared for the plaintiff and Mr. Masujima for the defendant. The Court expressed the view that plaintiff and defendant should effect a reconciliation between themselves, and the Court Interpreter, Mr. Kohayashi Beika, and Counsel for the parties were asked to try to bring about such a reconciliation.

At the Yokohama Chiho Saibansho on Thursday judgment was given in the suit brought by Herr E. F. Alimacher against Herr Polsien, first engineer of the steamer *Tenshin Maru*. It was adjudged that defendant should reimburse yen 75 to plaintiff, other claims of the latter being rejected. One third of the expenses of the Court are to be borne by defendant and the rest by plaintiff.

In the Yokohama Chiho Saibansho on Wednesday, before Judge Yasuda, the hearing was begun of a suit by Mr. Yazawa living at Ichhome, Sumiyoshicho, for compensation for damage against the Russo-Chinese Bank. The case refers to the fact that plaintiff had entrusted Middleton & Smith who became bankrupt some time ago, with 2,199 tea boxes which with other goods were sold by the defendants. The case was adjourned.

The hearing of the action brought by Mr. J. Lyons of 18, Akashimachi, Kobe, against Tsuruta Jinzaburo, residing at 27 Sakamachi, Sanhome, Kobe, was resumed before Judge Komuro in the Kobe Ku Saibansho on Tuesday. The action was in respect to a claim for yen 73.05 for landing certain goods brought by the *Afridi*. After hearing counsel the court reserved judgment till Oct. 15th.

In the Yokohama Chiho Saibansho on Wednesday before Judge Yasuda, judgment was given in the case brought by Messrs. Carl Rohde & Co. against Messrs. Ogaki Naotari and Yamada Tatsuzo. It was decided anent the claims of plaintiffs, that Swedish steel to the amount of 800 casks which had been transferred by defendant Ogaki to defendant Yamada should be returned to the former defendant and that the expenses of the Court should be borne by defendants.

Nakamura Shinzaburo, living at Masago-cho Nichome, Yokohama, and employed by Messrs. Singleton, Benda & Co., was arrested by the Isezakicho police on the 7th inst. on a charge of having stolen yen 1,694 belonging to the company.

LITERARY NOTES.

Among books recently issued by Messrs. Longman, Green and Co., is "Modern Bridge" by *Slam*, "Bridge," known in Turkey as "Brutch," may best be described as a variation of Dummy Whist, although more resembling the Russian "Vint," perhaps, than any other game. It has been played in South-Eastern Europe, in its present form, ever since the early sixties, and from there travelled, firstly to France, and secondly to America, before being introduced into England by Lord Brougham some seven years ago. Its popularity was soon assured, and it has without doubt, already established itself as a successful rival of its more sedate predecessor—hist. The reason of this is not difficult to find; for, while affording quite as much scope for the skill of the accomplished player as whist, Bridge is, to use a modern colloquialism, much the more sporting game of the two. The expression "sporting," however, must, the Author says, "by no means be understood to convey the idea that Bridge is a gambling game. As a matter of fact, it is even less so than whist, where the chance of holding honours scores so much more heavily." "Taking Bridge as a whole, it will," the Author thinks, "be found quite as scientific as whist, while offering far more variety." The book first gives a description of the game, including the rules for scoring and the etiquette that should be observed, &c. A complete system of instruction follows, also some useful hints for beginners, and the Laws of Bridge, as approved by the Portland and Turf Clubs. Messrs. Kelly and Walsh have the book on sale locally.

When Mr. J. B. Frazer brought out his second edition of "The Golden Bough," there were not wanting many who declared that Mr. Andrew Lang would not be long in writing a book to refute many of his hypothesis. Messrs. Longman, Green, and Co., announce the issue of such a

* This probably refers to the views Mr. Ebina holds in reference to the possibility of combining Shintô and Christianity.—(WRITER OF SUMMARY).

work under the little of "Magic and Religion." Mr. Lang in his preface says:—

"Recent years have brought rich additions to the materials for the study of early religion, ritual, magic and myth. In proportion to the abundance of information has been the growth of theory and hypothesis. The first essay in this collection, 'Science and Superstition,' points out the danger of allowing the arbitrary and hasty reasonings of superstitions to lead captive our science. As, like others, I have not long since advanced a provisional theory of my own, the second and third essays are designed to strengthen my position. The theory is that perhaps the earliest traceable form of religion was relatively high, and that it was inevitably lowered in tone during the process of social evolution. Obviously this opinion may be attacked from two sides. It may be said that the loftier religious ideas of the lowest savages are borrowed from Christianity or Islam. This I understand to be the theory of Mr. E. B. Taylor. My reply to his hypothesis, so far as it has been published by him, will be found in the second essay, 'The Theory of Loan-Gods.' Secondly, my position may be attacked by disabling the evidence for the existence of the higher elements in the religion of low savages. Mr. Frazer, in the second edition of his 'Golden Bough,' has advanced an hypothesis of the origin of religion, wherein the evidence for the higher factors is not taken into account. I hope, therefore, that it is not premature to state that evidence, or some of it, which I do in the third essay, 'Magic and Religion.' Fourth comes a long criticism of Mr. Frazer's many hypotheses, which are combined into his theory of the origin, or partial origin, of the belief in the divine character of Christ. Fifthly, I examine, in 'The Ghostly Priest,' Mr. Frazer's theory of the Golden Bough of Virgil as connected with the fugitive slave who was 'King of the Wood' near Aricia. I offer a conjecture as to the origin of his curious position, which seems to me simpler, and not less probable, than Mr. Frazer's hypothesis that this outcast 'lived and died as an incarnation of the supreme Aryan god, whose life was in the mistletoe or golden bough.' But my conjecture is only a guess at a problem which, I think, we have not the means of solving. There follow an essay, 'South African Religion,' and another on the old puzzle of the 'Cup and Ring' marks on rocks and cists and other objects all over the world. Next I consider the subject of 'Taboos,' with especial reference to the theory of Mr. F. B. Jevons. An essay follows on the singular rite of the Fire Walk, with the alleged immunity of the performers. This curious topic I have treated before, but now add fresh evidence."

Among new books shortly to be expected from London is "the recollections of Sir Edward Blount, 1815-1901." Jotted down and arranged by Stuart J. Keid. With Portraits." Sir Edward's reminiscences open with the return of Lord Anglesey, after the Battle of Waterloo, and practically end with the death of Queen Victoria. He describes his life as a schoolboy at St. Mary's College, Oscott, until Dr. Walsh and Monsignor Weedall, his life as a Foreign Office clerk, and as an attaché in Rome and Paris in the reigns of George IV. and William IV., and his subsequent career in the French capital as an English banker and as a pioneer of railways in France. The book throws vivid side-lights on the reign of Louis Philippe and the Revolution of 1848, the early days of the Second Empire, the Mexican War, and the Siege of Paris. Sir Edward Blount was Her Majesty's Consul during the closing dramatic weeks of the investment of Paris, and the letters which he despatched by balloon to his wife are freely quoted, and give a realistic picture of the privations of the beleaguered city when the advance of the German Army cut off all communication with the outer world. The book also contains many interesting details about political and social celebrities, railway progress in France, Club Life, &c.

An article in the *Fortnightly Review*, by Mr. W. Roberts, on "Book Collecting as an Investment," recalls some of the remarkable vicissitudes of price which have overtaken some libraries, and the extraordinary rise in value of others. Richard Heber's collection of books, which were stored abroad and in England in eight houses, cost £80,000 and realised only £57,000, whilst Prince L. L. Napoleon's philological collection, which cost £40,000, was finally disposed of quite recently to a Chicago library for £6,000. The Roxburghe, Beekford, and Spencer libraries, on the other hand, realised more than double the money paid for them. But the prince of lucky

buyers was the late Earl of Ashburnham, who purchased three works for 450 guineas, which subsequently realised £5,500. For the merely speculative book-collector Mr. Roberts has no pity; he is almost certain to lose, and deserves his fate.

The rumour that Mr. George Moore is cutting down both *Evelyn Innes* and *Sister Teresa* in order to get them into one volume is at once interesting and suggestive, remarks "The Bookworm" of the *Academy*. Let us hope it is true. How grateful we should have been if Richardson had left behind him a condensed edition of *Clarissa Harlowe*! The question arises whether every novelist who has written an abnormally long story should not be compelled by statute to issue it also in a sort of Liebig's Extract. Then the public could take its choice. Some people like lengthy novels; they cannot have too much of them; others can do with very much less. Why not appeal simultaneously to the two different, and perhaps equally large, classes? There would be this further advantage—that posterity would have it in its power to decide which of the two editions it would preserve. One can hardly doubt which edition that would be. Why, for instance, should we not have a version of Mr. Hall Caine's *Eternal City*, in which there should be nothing but the bare story of Roma and David and the Baron and the Pope, all, or nearly all, of the padding about Rome and Roman society being excised? There are a few great works from which one would not like a word withdrawn; but they are few indeed.

In the *New York Saturday Review* Mr. T. C. Evans has an article dealing with his personal reminiscences of Thackeray, whom the writer first met in America, when the *English Humourists* lectures were being delivered. He looked, says Mr. Evans,

like a gentleman laid out by Nature on broad and generous lines; his head was large, and thrown slightly backward from his broad, erect shoulders; he had a fresh, clean-shaven look; his face was rather pale, but with a trace of colour. His hair was a trifle greyish; a British whisker, also greyish, ran down in front of each ear to his collar: his spectacles were large and insistent, and his nose more depressed than that of Michael Angelo after the mallet blow of Torrigiano. His gait and movement were free and swinging, his dress was of notable neatness and gentility, and his glance seemed to annex and appropriate everything it fell on.

Dr. Skeat, in his recently issued *Notes on English Etymology*, tells the following good story:—Yanky was a surname more than two centuries ago. Dampier mentions a Captain Yanky; and *apropos* of Yankee, a friend tells me of an Oxford scholar, who went angling out West with an expensive fishing rig, including a luxurious artificial bait. Said a native to him:—"I'm amazed, stranger, to see you slinging a dollar bug at the end of a ten-dollar pole, when you might yank 'em out with a wum and a stick."

We are glad to see that Mr. Barry Pain has republished his "De Omnibus" papers in book-form. As the *Academy* remarks, these monologues treat of nearly all the subjects which interest the man in the street. Still happier was the addition of the Conductor. For the 'bus conductor is a special product of London, born, like the 'bus driver and the cabman, of the necessity—and therefore the brother to the invention of swift retort following on immediate perception. The Conductor puts it thus, speaking of his friend 'Ankin the driver. 'Ankin is a "sowshal reformer" and a power at meetings:

"It ain't like thet on a bus. Whot yer cawnt see in 'awf a second ain't with syin' at all. It mye be all very fine, an' narrely expressed, and so on, but it don't git 'tane. 'Ankin staws ter answer back, but before 'e's gert inter 'is stride, so ter speak, the bus 'as gone on, and the other chap sings out, "Call for it tennorner," or "Write it art, an' post it," or some sich words as them."

The 'bus conductor, a man trained to immediate inference and speedy action, is also a man who several times a day cuts, as it were, through the heart of London, and, if he be intelligent, ought

to know something of "de omnibus." Furthermore, the conductor is likely before many more years have sped to join the watch-man, the link-boy, and the dodo in their extinction.

Mr. Lang's "The Mystery of Mary Stuart" will be published by Messrs. Longman in the autumn. This book is an investigation into the character of Queen Mary, and especially as to her relations with the Earl of Bothwell and the other murderers of her husband, Lord Darnley. The author has enjoyed the advantage of using authentic materials hitherto unknown to historians, namely, a number of the MSS. employed by Mary's enemies in getting up their case against her.

An interesting article on Nathaniel Parker Willis, by George Paston, appears in the September *Cornhill*. Some of Willis's literary gossip in his "Pencilings by the Way" was well worth reviving. James Smith was curious about Bulwer Lytton's literary methods, and once asked the novelist whether he kept an amanuensis. "No," said Bulwer breezily, "I scribble it all out myself, and send it to press in a most ungentlemanlike hand, half-print, half-hieroglyphics, with all its imperfections on its head, and correct in the proof—very much to the dissatisfaction of the publisher, who sends me in a bill of £16 6s. 4d. for extra corrections. Then I am free to confess I don't know grammar. Lady Blessington, do you know grammar? There never was such a thing heard of before Lindley Murray. I wonder what they did for grammar before his day! Oh, the delicious blunders one sees when they are irretrievable! And the best of it is the critics never get hold of them. Thank heaven for second editions that one may scratch out one's blots and go down clean and gentleman-like to posterity."

Mr. Frederick Harrison, who is among the numerous men of letters who practised at the Bar before they turned to literature, explains, in his interesting article on George Eliot, in *Harper's Magazine*, why the author of "Adam Bede" was so successful in avoiding the legal pitfalls into which so many novelists fall. She was accustomed to consult Mr. Harrison when a legal problem arose in the course of the development of a plot. It became necessary for her in writing "Felix Holt" to learn something of the law of entail and the statute of limitations, and she continued her "dim and perilous way through law books amid agonies of doubt," until Mr. Harrison came to her rescue, and provided her with a proper legal basis for the story. "Daniel Deronda" was another novel in which the legal hand of Mr. Harrison played a part. On neither occasion, however, did he give his advice on his own responsibility. He consulted Lord Herschell, then a junior on the Northern Circuit, as to the legal problem in "Felix Holt," and he had the assistance of Lord Bowen, then a barrister of comparatively little experience, in satisfying the novelist's legal requirements in "Daniel Deronda." George Eliot is not the only novelist who has made a point of consulting a legal friend whenever a knotty problem of law has arisen in the course of a story. Dickens, for instance, was accustomed to send to Talford, or some other of his numerous friends at the Bar, the sheets of every novel in which legal matters were introduced. This is a precaution which a large number of living novelists find it unnecessary to adopt, for the simple reason that they themselves are lawyers. Mr. Anthony Hope, Mr. Stanley Weyman, Mr. Rider Haggard, and Mr. W. E. Norris are all members of the Bar.

Mr. Thomas Robertson, C.V.O., the newly-appointed Administrator of the Railways in India, began life as a railway porter at a small station on the Highland Railway. Twelve years ago, when superintendent of the line at Inverness, he was appointed general manager of the Great Northern Railway of Ireland. Two years ago Mr. Robertson became chairman of the Irish Board of Works, a post he relinquished a short time ago with the intention of settling down at Crief.

LADIES INTERNATIONAL READING ROOM.

SECRETARY'S REPORT.

The fifth annual general meeting of the Ladies International Reading Room was held at the Public Hall on Tuesday, Oct. 8th, 1901. The Reports of the President, Treasurer, Book Committee and Honorary Secretary were read and adopted and new officers elected. The directors have held meetings each month during the year. There are now 106 members at 10 yen, 28 at seven yen and 62 at five yen, besides a number of monthly subscribers.

There have been 5,663 visitors to the Reading Room during the year, 2,684 Books and 4,912 Magazines were circulated. Forty-three magazines were subscribed for during the year, of which thirteen were duplicates; they included 24 American, 18 English, and 1 German.

PRESIDENT'S REPORT.

In rendering the Report to the fifth annual meeting to the subscribers of the Ladies International Reading Room it is with pleasure that we can put before them a most satisfactory statement of the past year's work, not only as to the number of books that the library now contains, but also of the increased membership. The proposition of a year ago, that was voted upon and carried, that gentlemen should be admitted as honorary members, also that of including the younger members of the community, has met with success and to the gentlemen who have so generously presented the Reading Room with books and magazines the Committee tender their sincere thanks, and for the generous gifts of money and furniture presented by one of the Committee, also to another member of the Committee who so untiringly recatalogued the library. I feel that all who frequent the Reading Room can but be grateful for the change as it greatly facilitates the getting of books without the usual tiresome delay that so often unavoidably occurred. Owing to an unusual outlay for magazines and periodicals it became necessary to devise some means for raising a fund sufficient for the running expenses of the year and in February last the Committee were most kindly assisted by the local talent of Yokohama in giving a Musical and Dramatic Entertainment and by the Community at large by their enthusiastic and generous attendance, the sum realized being sufficient for the emergency that was demanded, although unfortunately not enough to enable the Book Committee to make any outlay in purchasing new editions.

The Report of the Honorary Secretary and Honorary Treasurer go to show the increasing appreciation of the Reading Room, which we hope may continue to grow in popularity and that we may be able to add many new names to our list of subscribers.

LADIES INTERNATIONAL READING ROOM.

President:—Mrs. Eldridge; Vice-President: Mrs. Bonar; Treasurer: Mrs. Lowder; Chairman of Book Committee: Mrs. Merriman; Secretary: Mrs. Sale.

Directors:—Miss Abenheim, Mrs. Baker, Mrs. Bathgate, Mrs. Bellows, Mrs. Cowen, Mrs. Dearing, Mrs. James Martin, and Miss Moss.

BOOK COMMITTEE'S REPORT.

The Committee reports that during the past year all the books of the L. I. R. R. have been labelled and that a card catalogue of all volumes, exclusive of bound magazines, has been placed in the Reading Room.

Owing to the generosity of a few friends and subscribers sixty-one additional books have been placed on the shelves, making a total of 1600 volumes now in the possession of the Association. As there were several copies of some of the popular novels, after the demand for the books was satisfied, duplicate copies were sold to subscribers. The profits from this sale will sometime be used for the purchase of new books.

The Committee on behalf of the subscribers wish to acknowledge its grateful appreciation of all gifts of current literature and hope that in the near future it will be possible to circulate the best of the new books soon after their publication.

The financial report hitherto presented by this

Committee has by action of the Directors been incorporated in the statement of the Treasurer.

Respectfully submitted,

(Signed.) CLARA M. O'LEARY,
Chairman of Book Committee.

TREASURER'S REPORT.

STATEMENT OF ACCOUNTS FROM OCTOBER 1ST, 1900
TO SEPTEMBER 30TH, 1901.

CASH.		Yen.
To Subscriptions	742.70

E. & O. E.

Yokohama, 30th September, 1901.

JULIA M. LOWDER,
Hon. Treasurer, L.I.R.R.

NEWS OF THE WEEK.

The Tokyo wrestler Narutowa died at Kokura on the 4th inst.

Six gamblers were arrested by the Kotobukicho police on the night of the 8th inst. in a boarding house at Miyosichio, Yokohama.

Mr. Nakada Tetsu, member of the Chiba Prefectural Assembly, was arrested on the 8th inst. charged on suspicion with blackmailing.

Four blue-jackets belonging to H.M.S. *Goliath* while overstaying their leave in Yokohama, were arrested by the Kagacho police on the 7th inst.

Marquis Saigo and Count Itagaki arrived at Otsu, Shiga Prefecture, on Oct. 2nd on their way to Kyushu. Both delivered speeches on social reform.

A despatch from Lord Kitchener, dated at Pretoria on Sept. 12th, announced that C. Kruger, son of the former president of the Transvaal, and Capt. Ferreira had surrendered.

Kaneko Heizayemon, living at Nogemachi Nichome, Yokohama, committed suicide by throwing himself before a train near Yokohama station on the evening of the 2nd inst.

A rumour is going round in service circles at Portsmouth that Admiral Sir Edward Seymour, who has just returned from China, will relieve Lord Walter Kerr at the Admiralty.

A woman named Ozaka Toshio, employed in a restaurant known as Chiyoshi, Yokohama, was

arrested and handed over to the police on the 3rd inst. charged with robbing Shige, in whose house she lodged.

A big copper *koro* (5 *kamme*) belonging to a temple known as Myohoji, at Horinouchi, Toyotamagori, Tokyo, was stolen a few days ago. The temple keeper reported the matter to the police.

A carpenter named Takakubo Ryugoro, living at Miharu-cho, Yokohama, was arrested by the police on the 8th inst. charged with beating and cutting off the hair of his former wife, Kaneko Saku.

Yamaguchi Kyo, of Kagoshima, employed by a military contractor at Arakicho, Yotsuya, Tokyo, stole yen 330 belonging to his employer on the 8th inst. He left a letter stating that he was going to America.

Inouye Take, living at Tamagawamura, Kanagawa Prefecture, and employed in a silk factory at Hachoji, committed suicide by throwing himself before a train at Yuimura, near Hachoji, on the evening of the 7th inst.

A *soshi* actor named Suzuki Renjiro of Fukushima Prefecture, was arrested by the police on the 8th inst. charged with having stolen a gold watch, bicycle, and several other articles from various boarding houses in Tokyo.

By the capsizing of a boat on which sixty coolies and four or five women had embarked at Yokohama to go on board the *Kobe Maru* on Friday morning, a woman named Miki, 53 years of age, living at No. 4 Itchome, Wakaba-cho, was drowned.

Two coolies named Sakaguchi (40) and Kawakami (38) were arrested on Sunday by the Yokosuka police and sentenced to ten days' confinement on a charge of having assaulted an Austrian named Antony living at No. 106, Yamashitacho, Yokohama.

A well-known English scholar, Mr. Shibata Masakichi, of Nagasaki, died on the 8th inst., at the age of 61 years. He commenced the compilation of an English dictionary in 1881 and finished it last year. The work is now being printed.

During the storm on the 7th and 8th inst. great damage was done to rice fields, railways, roads, bridges and embankment, etc., in Fukuoka Prefecture. At Shimo Shiroy-mura, Chikugami-gori, five houses were washed away, and four men and five women drowned in the flood.

About sixty farmers created a disturbance at Nishi Tamaoki-gori, Yamaguchi Prefecture, on the 8th inst. and burned down a new village office. Twelve of the ringleaders were arrested the following morning. The cause of the trouble is said to have been the removal of the village office.

Wednesday was the 27th day of the 8th month, according to Chinese reckoning, and the birthday of Confucius. Every Chinaman's house in, around, and outside China Town, Yokohama, accordingly hung out all its choicest lanterns and its biggest flags in honour of the renowned Sage: while all the little lads and lassies of the children of Han were decked out in their finest clothes to view the two triumphal evergreen arches that were erected in the principal streets. As the shades of evening fell the place wore a gala appearance with the crowds of Chinese all on holiday thoughts intent. A banquet was given in the evening which was largely attended.

A largely attended meeting of British subjects was held on Thursday evening in Kobe to consider a proposal to give a British Ball there on the occasion of King Edward's Birthday. Mr. J. C. Hall, British Consul, took the chair by request. It was decided unanimously that a British Ball should be given and it was further decided to elect a Committee of nine, representing the three sections of the British nation. Mr. J. C. Hall, was unanimously elected President. The following Committeemen were elected *en bloc*:—Messrs. John Hall, J. Marshall, R. Home Cook, T. W. Hellyer, F. J. Abbott, G. H. Why-

mark, A. De Ath and A. M. Hansell. The Ball is to take place on the 8th and to continue to the 9th. The meeting sang "God Save the King" at the close.

On Wednesday morning, said the *Nagasaki Press* of Oct. 5th, Governor Arakawa granted permission to the Mitsu Bishi Dockyard and Engine Works to reclaim the foreshore, extending to over 4,938 *tsubo*, between the Tategami dockyard and the Akunoura engine works. The reclamation has been undertaken in connection with the construction of a large new dockyard for the Mitsu Bishi Company adjacent to the reclaimed foreshore. The reclamation work will be commenced as soon as possible, so as to expedite the construction of the dock, which is to be completed by August, 1904.

The British Society for the Study of Inebriety some time ago appointed a committee, composed of five physicians, two surgeons, a professor of bacteriology, an army surgeon and five general medical practitioners to report upon the relation of the appetite for alcoholic drinks to heredity. After eighteen months of painstaking investigation the committee declare that inebriety is impossible of transmission from parent to child. It is not denied, however, that the inebriate's children do not have an even chance in the world, but the distinction is made that they are not more prone to drunkenness than other children aside from their youthful environment. On the other hand, the report does not deny that drunken parents who become thus mentally and physically weak are liable to have children who are degenerate—weak in body and feeble in mind—who tend to become paupers, criminals, epileptics and drunkards. In other words, while an alcoholic craving may not be transmitted, the general effects of the drunkard upon his family, says the *Sanitarian*, remain as clear and as sorry a fact as ever.

The monument which has been erected on the Kobe Recreation ground to the memory of the late Mr. A. C. Sim was unveiled on the afternoon of Oct. 3rd by the Governor of the Ken, Mr. Hattori. The monument, which is of granite from the quarries in the Rokkoso range, is, says the *Kobe Herald*, a handsome obelisk resting on a base about 2 feet in height, the whole being surrounded by a low iron railing set in granite. The inscriptions on the monument cover the four sides of the base. The Japanese inscription is on the face. On the other three sides the following inscriptions appear in English:—

IN
REMEMBRANCE OF PUBLIC WORK
PERFORMED BY
ALEXANDER CAMERON SIM,
A
NATIVE OF ABERLOUR, SCOTLAND,
BORN, AUG. 28TH, 1840.
DIED, NOV. 28TH, 1900.
ERECTED BY FRIENDS IN
KOBÉ
YOKOHAMA AND NAGASAKI
BOTH FOREIGN AND JAPANESE
DURING A RESIDENCE OF THIRTY YEARS
IN KOBÉ
ALEXANDER CAMERON SIM WAS FOREMOST
IN ASSISTING ALL SCHEMES FOR PUBLIC
BENEFIT AND ADVANTAGE.

There was a large attendance of both foreigners and Japanese on the occasion.

The monument was handed over to the Japanese authorities by Mr. J. Carey Hall and Mr. Tsubono, Mayor, in accepting the charge delivered an appreciative speech.

Lord Stanley of Alderley has been giving some unique presents to his Anglesey tenants. To a number of bachelors not yet confirmed in their celibacy he has presented a piece of silk, with the injunction to hand it over to those whom they intend to marry. Bachelors who are considered hopeless have received consolation gifts, while one lady tenant has been presented with a handsome piece of silk because "she managed to catch one of the old bachelors."

CORRESPONDENCE.

ANGLO-JAPANESE READERS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In your review of Book I. of my "Anglo-Japanese Readers" you call my attention to what you deem two inaccuracies. The second of these is a printer's error, the word Yoshiaki being left out after Shōgun and only discovered by me when too late to make the correction. But in reference to the expression "sole function of the State," I think you are hyper-critical. The whole passage reads thus: "In olden times what is called the vendetta was approved by society generally, and hence the conduct of these boys was applauded. But now the law and society alike condemn such practices. The punishment of crime is the sole function of the State, and in civilised countries nobody is allowed to take the law into his own hands." Now it seems to me quite plain that the adjective "sole" here is used in the sense of "exclusive." And that the meaning is that it is the function of the state, and not the function of any private individual, or individuals, to punish crime. To argue as I infer that you do, that "sole function" must mean that the state has no other function than to punish crime is neither warranted by the context nor by the sense in which the word, "sole" is frequently used. One of the dictionary definitions of "sole" is being or acting without another. Here the State exercises a function that is not shared by any other party. When we say that to sell coal in a certain place is "the sole right of Mr. Smith," we don't mean that Mr. Smith has no other rights, but that he exercises this one right exclusively. "Sole right" and "sole property" in this sense are terms in constant use. But if to you, sir, the expression seems ambiguous after reconsideration, as it is most undesirable to have anything ambiguous in a school-text book, I shall certainly alter it in the next edition. I should like to hear what meaning other readers would attach to such an expression in its context. I ought perhaps to mention that a misunderstanding of the meaning of the term "sole function of the State" is rendered impossible by the explanation of the phrase on p. 20, as "the duty of the State only." In another tale the expression "sole control of the affairs of the district" occurs in which "sole" is used in precisely the same sense. Thanking you for calling my attention to these points, I am, yours, etc., WALTER DENING.

Sendai, Oct. 4th, 1901.

The truth is that the words "sole," "only" and "alone" are often used in a manner that violates the strict rules of construction. It is quite true, as Mr. Denning points out, that such a phrase as "to sell second-hand in a certain place is the sole right of Mr. Smith" is constantly used, but we can not for a moment regard it as strictly correct. To say that anything is "the sole right of a person" or "the sole function of the State" means that the person has no other right nor the State any other function. Our point is that when there is one form of speech which can be clearly interpreted without reference to its context and another form which must be incorrectly interpreted unless corrected by its context, the former ought to be unhesitatingly employed and the latter rejected.—*Ed. J. M.*

SIR THOMAS LIPTON.

In the very nick of time, just when popular interest in the America Cup contest has reached a culminating point, a book has been published which has an intimate connection with that great sporting event. This is "Sir Thomas Lipton and the America Cup," by Charles T. Bateman (Oliphant, Anderson, & Frier, one shilling). The little biography is brightly and vigorously written, and brought as nearly up to date as possible. It has more than a dozen good photographs, including those of Sir Thomas Lipton's father and mother, and several of *Shamrock II*. It tells succinctly and interestingly the story of Sir Thomas' early life, his business career, his public work and philanthropies, and of course, the doings of the two *Shamrocks*. There is a useful appendix, giving details of all the previous Cup competitions.

The story of Thomas Lipton's life has been told before, but it is eventful and striking enough to bear repetition. After a sojourn in America as a youth, which sharpened him considerably, he returned to Glasgow. And now it became a question as to his future. The fact that his parents owned a small provision business practically decided him to enter that trade on his own account in another part of the city. Thus it was that in 1876, when twenty-six years old, he rented a modest little place in Stobcross Street, Glasgow, under some tenement buildings.

It is interesting to remark here that this little shop—not in High Street, Glasgow, as so many biographers have stated—proved the foundation of the business bought twenty-two years after by a company for two and a half millions.

WORKING EARLY AND LATE.

Surely no man worked harder or more intelligently than did Thomas Lipton in his new sphere! In some manner, almost unexplainable, he managed to discharge the combined duties of salesman, window-

dresser, clerk, and when occasion required light porter as well. As assistant was a luxury not to be thought of, and to him alone fell the duty of keeping the place clean and cheerfully attending to the wants of customers. Many a Friday night he slept under the counter, to economise time and to be on the spot at break of day for the heavy business of the Saturday.

The young shopman has been described at this time as an energetic, obliging tradesman who always kept his premises smart, and with a pleasant, genial manner encouraged customers to patronise him. He early learned, too, the efficacy of bold and original advertising. He made a feature of cartoons exhibited in the window, and to-day these are remembered by Glasgow men for their striking and suggestive advertisement.

Lipton's advertising methods generally differed from those of competitors, which were bound to succeed from their very daring character. He once arranged for one of his managers to make a balloon ascent with a well-known aeronaut and throw from the car 10,000 telegraphic messages addressed to Lipton's Central Market, Jamaica Street, Glasgow. Prizes were offered, ranging in amounts from twenty guineas to ten pounds of tea, to the first twenty who arrived with the advertisements. On the day appointed thousands watched the ascent, and anxiously looked for the competition leaflets to drop from the clouds. Those who secured them excitedly ran off to Jamaica Street in the hope of securing a prize, and much interest resulted as the competitors reached there in eager haste from all parts of the city.

We have necessarily somewhat forestalled events. That little business in Stobcross Street prospered splendidly. Its proprietor made it pay sufficiently to enable him reinvest his capital and open another establishment on similar lines in a better district in High Street, Glasgow. Again success attended his efforts, and again he was able to launch out further in other parts of Scotland. Then he attacked Ireland with similar results, coming later on to England.

In fact, "Veni, vidi, vici" fully sums up Sir Thomas Lipton's successful commercial career.

For some years the business was principally confined to provisions, and its success in this direction has been attributed by the principal to a special cure for hams which he possessed, and which led to an enormous sale. In 1889 he was induced to go into the tea trade by hearing of the very large profits to be made in it. "My first purchase," he says, "was 20,000 chests. I took care to advertise this fact well. I sent through Glasgow a procession of fifty drays, with two and four horses in each, accompanied by a brass band and a band of pipers. Everybody in Glasgow was thus brought to know that I had this article to sell. My tea went like wildfire, and its large success has continued ever since."

Speaking of the tea-trade development reminds one of an amusing episode which it is stated happened in 1895 when Mr. Lipton was bound for Ceylon on an East Indian steamer. It is said that while in the Red Sea the boat was disabled, and it became necessary to throw overboard a part of her cargo. Lipton, who was an interested spectator of the operations for lightening the ship, suddenly conceived a brilliant idea. He secured a paint brush, a pot of black paint, and a stencil, and then, to the astonishment of captain and passengers, cheerfully labelled each box and bale—"Use Lipton's Teas."

Throwing them overboard they naturally floated ashore, and for miles the natives saw that enterprising injunction.

SAVING THE MINUTES.

Mr. Lipton's devotion to business was proverbial in Glasgow. He never attended the theatre or places of amusement, and seldom accepted social invitations. Even when well established and living in the suburbs of Glasgow, he would arrive every morning at half-past eight, and keep busy at work right on throughout the day until a quarter to eleven. Summer and winter found him "toiling, rejoicing." At eleven o'clock the last train from the Central Station left for his home. He never allowed too much time in which to catch it. On one occasion the cabman seemed very slow. "I urged him on," said Sir Thomas to me when relating the incident, "but to no avail. The minutes were flying, and I decided to fly too. Jumping out of the conveyance unknown to the driver, I entered a passing car and was just in time for my train. Cobby jogged on to the station and patiently waited at least five minutes for me to alight! In great bewilderment he at length got off his box to discover that the cab was empty."

WORLD-WIDE EXPANSION.

When the number of his stores multiplied Mr. Lipton found it necessary to abolish the middleman. At first he himself bought his butter, bacon, and eggs in Ireland, and later on made arrangements to purchase other goods direct. The same principle induced him to obtain several thousand acres in Ceylon for the purposes not only of tea plantations, but coffee and cocoa as well. When later he found that Ireland could not supply his enormous requirements for

bacon, he journeyed to Chicago, where he started a packing house on his own account. It is a well-equipped and capacious establishment, one of the sights of Chicago, and considered to be its proprietor's largest enterprise. In parenthesis it may be added that the packing house is not a branch belonging to the company. Here 3000 pigs are killed in a day, and by means of railway refrigerator cars the meat is carried in good condition east as well as west over the great continent of America.

GUIDING PRINCIPLES.

Two main principles have guided Sir Thomas Lipton in his business relationships. The first, never to take a partner; and the second, always to decline a loan. In the early days at Glasgow he had numerous offers of partnership, but these he persistently refused to entertain. He believed strongly in a "one-man show." It was constantly stated in responsible journals, with an appearance of authority, that Mr. Lipton, the redoubtable Parliamentary orator, remained in the concern a sleeping partner. The Irish associations of Sir Thomas naturally lent credence to the rumour. But it had no foundation whatever. Sir Thomas has always kept "boss." In fact, it may be questioned whether his stupendous energy, striking originality, and marvellous powers of organisation could be yoked to the business qualities of another.

The second principle, whilst determining him against a loan, has also stimulated his refusal to sign a bill or such-like "promise to pay." His action in this respect has sometime led to amusing if awkward consequences.

The head of Liptons is not a talker in the widely accepted sense of the term, so that the following remarks uttered at the annual dinner to his staff are especially worthy of consideration. Probably they embody his own principles and experience:—

"I should like to say a few words to the young men. The first is, beware of strong drink. Remember corkscrews have sunk more people than corks-jacks will ever save.

"The second is civility. Treat rich and poor like. The poor man's 20s. is as good as the rich man's £1. The workman's wife with her market basket on her arm is entitled to as much respect as the lady who comes in her carriage.

"And as an illustration of the benefit of humility I will tell you the following story of Benjamin Franklin, who, when Ambassador for the United States at the French Court, speaking to a young man, said:—

"The last time I saw your father he received me in his study. As I was leaving he showed me a short way out of the house through a narrow passage crossed by a beam overhead. He suddenly cried, 'Stoop! stoop!' I did not understand what he meant until I felt my head thump against the beam. He was a man who never failed to give good advice. 'You are going,' he said, 'and have to go through the world. Stoop as you go through it, and you will miss many hard thumps.'

"Thirdly, I would recommend punctuality, which is said to be the soul of business. It is said of Charles Lamb, who at one time held a Government appointment, and who was proverbial for coming in late, that one morning, being later than usual, his superior found fault. Lamb offered this excuse:— 'If I do come late in the morning I try to make up for it by leaving early in the afternoon.' This was a good joke, but hardly the style of business to gain promotion. If you stick to business, business will stick to you."

SHOOTING.

The following is the result of the autumn meeting of the Yokohama Shooting Club, held at Futamidai, Tsurumi, on Sunday last:—

Class.		Marks.	Medal.
1	Mr. M. Negishi	42	Gold.
2	Mr. K. Uchiyama	40	"
1	Mr. S. Watanabe	30	"
2	Mr. R. Suzuki	27	Silver.
3	Mr. McGowan	25	"
1	Mr. Y. Watanabe	31	Gold.

2	Mr. S. Yano	12	Silver.
3	Mr. N. Nakajima	11	"

THE BROWN MAN.

"Asia and Europe" is a title of a series of essays published by Mr. Meredith Townsend, the object of which is defined by the author as "to make Asia stand out clearer to English eyes." They are the fruit of many years spent in patient study, from divers points of view, of the large subject with which they deal; nor do we know of any book, with the possible exception of Sir Alfred Lyall's *Asiatic Studies*, which states so clearly, or attempts so resolutely to solve the vast problems to which the clash of East and West in Asia gives rise. Mr. Townsend's survey, remarks the *Academy*, is by no means confined to India, but naturally it is the English empire in India, the forces which make for and against it, the probability of its greater or less permanence, that form the centre of his speculation. His conclusion is an elaborate paraphrase and justification of the quotation which he takes from Matthew Arnold:

The East bowed low before the blast,
In patient, deep disdain;
She let the legions thunder past,
Then plunged in thought again.

Mr. Townsend believes that English domination in India will be a transitory thing, as the earlier domination of Alexander has been before it—that it will pass away with its glories and its triumphs, and become but a drop in the bucket of the ancient memories of the East.

All the papers are directed to one end, a description of those inherent differences between Europe and Asia which forbid one continent permanently to conquer the other. The struggle between Europe and Asia is the binding thread of history; the trade between Europe and Asia is the foundation of commerce; the thought of Asia is the basis of all European religions; but the fusion of the continents has never occurred, and in the author's best judgment will never occur.

He qualifies his own view as pessimism and being under an intellectual compulsion to reconcile his pessimism with theology, does it subtly:

It is said that Christ gave an order to His disciples to teach all nations. That is true; and I for one believe the order to be binding, and that the Christian Church which sends out no missionaries is a dead Church; but where in the record has Christ promised to those missionaries universal success? Is it not at least possible that the missionaries carry in their hands the offer of eternal life, which a few accept, while the rest "perish everlastingly?"—that is, die like the flowers or the dumb creatures of God. This much at least is certain, that for eighteen hundred years it has been no part of the policy of Heaven—I write with reverence, though I use non-religious terminology—to convert Asiatics *en masse*, and there is no proof that this absence of Divine assistance to the teachers may not continue for an equal period in the future.

Mr. Townsend supports his main position by careful analysis in detail of the many differences between Eastern and Western psychology. He studies the appeal of Mahomedanism, so much more potent than that of Christianity, to the Hindu mind, the basis of the English Empire less on militarism than on the *monale* of the Civil Service, and the decay of native civilisation—"Indian art, Indian culture, Indian military skill," which that empire brings with it. To the inevitable question as to the ultimate reason for the irreconcilability of East and West, he has several answers to give. He attributes something to the bad manners of Englishmen, who talk and laugh too much, and are impatient at the loss of time, a thing to which the Asiatic does not attach a value. It should be, he thinks, a law of "inexorable etiquette" to treat every native with "a grave but distant courtesy, not unlike that of the native himself in his best mood." Something also to the fatuity which tries to press the accidentals of Western civilisation with its essentials, and to convince the native that it is better to spend his money on superfluous clothes for himself or superfluous furniture for his house, than on superfluous silver ornaments for his wife's arms and ankles. But these are comparatively superficial points, and in the long run Mr. Townsend falls back upon a somewhat mystical attitude, and maintains the existence of a "dull, unconquerable, unmitigable distaste of Asiatics for white men," of an "inherent antipathy, which is not hatred, but can at any moment blaze up into it."

We have preferred to expound Mr. Townsend's doctrine rather than to refute or to confirm it. But we are conscious that, in spite of the extreme candour and plausibility with which he puts it, there is, after all, a good deal to be said here and there on the other side. Is the notion of a rigid and permanent barrier between East and West, Asiatic and European, quite consistent with the conclusions of modern ethnology? On the face of it, it would be curious if such a barrier were to coincide exactly with the somewhat artificial delimitation of continents. And the ethnologists trace for us at least two great racial stocks whose distribution is common to both Europe and Asia. The

"Mediterranean" man seems to have developed a uniform civilisation on every shore of the great inland sea. And the Aryan, whether he began in this continent or that, at any rate streamed southwards, indifferently, below the Alps, the Balkans, and the Himalayas. To a certain extent a formal inconsistency may be traced even in Mr. Townsend's own language. He tells us:—

The chasm between the brown man and the white man is unfathomable, has existed in all ages, and exists still everywhere. No white man marries a brown wife, no brown man marries a white wife, without an inner sense of having been false to some unintelligible but irresistible command.

Yet four pages earlier one reads:

The brown man of every shade who now monopolises Asia . . . is probably a half-caste, the result of a long series of early crossings between the dark and unimprovable aborigines, of whom a few relics still survive, and the white man.

This is probably not true of China, but it is of India, and it is inconsistent with the view that the respective endogamy of the brown and the white man "has existed in all ages." There is an "antipathy," of course, but is it really ultimate or "inherent." Does it differ in kind (it does, of course, in degree from the antipathy between Germans and Frenchmen, Irishmen and Saxon, Cornishmen and Devonian? These antipathies, too, exist but they are not incompatible with a common civilisation or necessarily with a common government (Mr. Townsend is probably not a Home Ruler), and we take them to depend upon habit and locality rather than upon race.

It is to be observed, again, that Mr. Townsend generalises immensely. And it is as difficult to generalise safely about India as Charles James Fox (was it?) found it to draw up an indictment against the French nation. After all, India is a geographical expression, covering an immense diversity of peoples. Mr. Townsend has devoted great pains and study to his problem, but he sees it, we gather, mainly from the point of view of the educated Brahmin. There are other points of view—that of Mr. Crooke with his knowledge of the wide diversity of custom amongst the tribes of the North-West; that of the late Sir Robert Burton, with his knowledge of brothel and bazaar. And we doubt whether theories based upon the tendencies of Hinduism as developed by Brahmin philosophies are quite universally applicable to the heterogeneous masses, on whom philosophical tenets sit lightly and whose effective religion is some type or other of earth-worship closely akin to that of the primitive European peasant.

Whether you agree wholly with *Asia and Europe* or not, it is a fine book. Few publicists write upon Mr. Townsend's plane, with the same constant determination to see things as they are, and to handle ideas without prejudice or partisanship. And few share his accomplishment in the art of expression, of setting forth an idea completely, and without superfluity, in the course of a few incisive paragraphs. One recognises here an essential feature of that *Speculator*, with which Mr. Townsend has been for so many years what a journalist less careful of his English would call "identified," and for which many of those papers were originally written. The passages already quoted afford more than one example of this admirable literary quality, which gives so unusual a distinction and charm to Mr. Townsend's writing. Let us add another, which puts in a nutshell a truth not always realised about Mahomedanism. The phase of this faith with which we are familiar in Europe is degenerating, but in India Mahomedanism is nothing if not progressive:

Europeans habitually forget that every Mussulman is more or less of a missionary—that is, he intensely desires to secure converts from non-Mussulman peoples. Such converts not only increase his own chance of heaven, but they swell his own faction, his own army, his own means of conquering, governing, and taxing the remainder of mankind. All the emotions which impel a Christian to proselytise are in a Mussulman strengthened by all the motives which impel a political leader and all the motives which sway a recruiting sergeant, until proselytism has become a passion, which, wherever success seems practicable, and especially success on a large scale, develops in the quietest Mussulman a fury of ardour which induces him to break down every obstacle, his own strongest prejudices included, rather than stand for an instant in a neophyte's way. He welcomes him as a son, and whatever his own lineage, and whether the convert be Negro or Chinaman, or Indian, or even European, he will without hesitation or scruple give him his own child in marriage, and admit him fully, frankly, and finally into the most exclusive society in the world.

Two of Mr. Townsend's essays, although quite fitting into the unity of the volume, for whose leading ideas they afford concrete illustrations, are rather biographical than speculative in their character. One is a summary of Mr. Muir's life of the "Great Arabian,"

THE LOSS OF THE "COBRA."

The torpedo-boat-destroyer *Cobra*, said a London despatch of Sept. 19th, has foundered in the North Sea as the result of an explosion. The ship was en route from the yard of her builders, the Armstrongs of Newcastle, to Portsmouth. It is reported that all were lost with the exception of about a dozen persons.

The *Cobra* had seventy-nine souls on board. For sixty-seven no hope is held out, but torpedo-boats and cruisers have gone at full speed to the scene of the disaster, which is the most serious the British navy has suffered since the sinking of the *Victoria*. Lieutenant Bosworth Smith, the *Cobra's* commander, stood upon the bridge with his arms folded as impassive as if on parade, and went down with the vessel. Five boats were launched after the *Cobra* struck, but some of them were swamped in the heavy sea which was running at the time.

The first intimation of the disaster was the arrival of a fishing boat at Yarmouth with six bodies which she had picked up in the vicinity of the spot where the *Cobra* was last seen. According to the fishermen the *Cobra* was sighted by the lightship off Downing Sands yesterday, enveloped in steam, and she shortly afterward disappeared. The men on the lightship supposed the *Cobra* had sailed away, until the evening, when they observed bodies floating in the water and signalled to the fishing boat to investigate the disaster.

A dispatch from Middlesboro says twelve survivors of the crew of the *Cobra* were landed there this morning and confirmed the report that all the others were drowned. The British Admiralty has received information that the explosion occurred after the *Cobra* struck a rock and that she sank immediately.

The *Cobra* was a turbine-engined vessel. She had just left the yard of her constructors and was undergoing a boiler test.

About one year ago the *Cobra* beat the record of the *Viper* and won the title of the fastest vessel in the world. The record of the *Viper*, which was recently wrecked, was forty-three miles an hour, while the *Cobra* in an unofficial trial over the same course as that sailed by the *Viper*, at the mouth of the Tyne, made thirty-seven and seven-tenths knots, or forty-three and five-tenths miles. The *Cobra* was an exact duplicate of the *Viper*.

PASSENGERS.

ARRIVED.

Per American steamer *City of Peking*, from Hongkong via ports:—Baron L. C. Dithakar and servant, Mrs. Dithakar, infant and servant, Mr. L. R. Leimer, Mr. Chan, and Mr. Aum, in cabin. For San Francisco:—Mr. A. S. Howe, Mrs. J. A. McMullen, Mr. S. B. Redlick, Mr. J. S. Hermann, Mr. J. S. Frissell, Mr. A. S. Newburg, Mr. Bowler, Jr., Mrs. A. P. Bowler, Mr. A. P. Bowler, Mr. Rufus Williams, Miss Lee Gum, and Mr. T. Isakson, in cabin.

Per American steamer *Tacoma*, from Tacoma, Wash.:—Mr. J. H. Cutcliffe Goodban, in cabin; Miss Ah Cui, intermediate. For Kobe:—Miss L. Mayo, and Miss J. M. Ward, in cabin. For Shanghai:—Mrs. Charles Stuart Barff, Rev. J. L. Whiting, Mrs. J. N. Cattrell, Miss L. Cattrell, and Master N. Cattrell, in cabin. For Hongkong:—Miss E. A. Churchill, Mr. L. E. Dittwey, Mr. Oscar Batt, Mr. Geo. Taylor, Mrs. J. Ross, Master J. Ross, Mr. E. Goggin, Rev. H. P. Armstrong, Mrs. Armstrong, Dr. H. W. Laugheim, and Mrs. Laugheim, in cabin; 38 Chinese, in steerage.

Per British steamer *Latpoora*, from Madras via ports:—Dr. Muir, Mrs. Muir, Major T. C. Prince, Corporal C. D. Lamson, Mr. J. H. Gillan, and Mrs. Redfern, baby and boy in cabin.

Per Japanese steamer *Hakuai Maru*, from Shanghai via ports:—Com. T. Shudo, Mr. K. Shiga, Mr. T. Takeda, Miss S. Iguchi, Mrs. and Master Loryon and infant, Mr. and Mrs. G. Wilke, Mrs. S. Wilke, Mr. Lefroy, and 6 Chinese, in cabin; Mr. and Mrs. Tsui Yan-hin and infant, Mr. T. Takiguchi, Mr. Wong Chang Wa, and 21 Chinese, in second class; 26 Japanese, and 19 Chinese in steerage.

Per British steamer *Doric*, from San Francisco via Honolulu:—Dr. R. M. Appert, Miss M. Carr, Mr. M. Engert, Miss M. F. Chapman, Miss Annie Morgan, Mrs. W. G. Fitch, Mrs. E. Mason, Miss A. S. NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, OCTOBER 19TH, 1901.

BIRTH.

On the 16th inst., at No. 46-B, Bluff, the wife of L. SUZOR, of a Daughter.

MARRIAGE.

On October 12th. at Roman Catholic Church, Yokohama, by the Rev. Father Pettier and afterwards at H.E.M. Consulate, CARLOS A. PEREIRA to WILHELMINA SCHMIDT CORREA, widow of the late A. J. Correa, of Yokohama. No Cards. Hongkong and Shanghai papers please copy.

DEATH.

At No. 31, Bluff, Yokohama, on October 16th, ADELINA MARY ELIZABETH, eldest daughter of H. Vincent, Esq.

SUMMARY OF NEWS.

THE opening of the new Yodobashi, Tokyo, will take place on the 15th inst.

THE Jizodo Stock Exchange of Niigata was dissolved a few days ago.

STRIKES of cotton operatives are reported from eastern parts of the U.S. The most serious is

one affecting 30,000 operatives at Fall River, near Boston.

THE Venezuelans have been completely routed in battle at Goajira.

MAJOR-GENERAL Fukushima arrived at Formosa, via Hongkong, a few days ago.

PRINCE Tokugawa Iyasato left Tokyo for Formosa on the evening of the 15th inst.

THE Hongkong Jockey Club will in future hold two meetings each year, besides gymkhanas.

THE manoeuvres of the Eleventh Division having ended, the troops returned to Tokushima on the 16th inst.

AN eruption of Asamayama occurred on the 13th inst., and a quantity of ashes fell at Mayebashi.

THE festival of Nichiren, who died in 1280, was celebrated at the Honmonji temple, Ikegami, on Saturday.

ANOTHER Carlist rising is anticipated in Spain, owing to the agitation now prevailing in the Pyrenean provinces.

SIXTY men, forty women, and eleven children, all Japanese, left Yokohama for Hawaii by the *Gaelic* on the 12th inst.

A PICNIC meeting of one thousand four hundred students of the Ishikawa Primary School, was held near the Race Course on the morning of the 16th instant.

WATANABE SANOSUKE (62), living at Nakamura-machi, Yokohama, was arrested by the Police on the 11th inst. charged with being connected with a lottery.

MR. MINOWA SABURO (of the Merchants party) and Mr. Ikeda Katsubei (of the Land-owners party) have been elected members of the Kanagawa Prefectural Assembly.

A CHINESE girl aged 13, living with her father, a cook, at No. 121, Yamashitacho, Yokohama, committed suicide by hanging herself on the night of the 14th inst.

It is understood, from private information received, that Mr. H. I. Cho, Acting Agent P. & O. Company, has received the permanent appointment as Agent at Singapore.

TWO armed burglars entered a house occupied by Nakayama Kinjiro, at Kawagoyemachi, Saitama Prefecture, early on the 16th inst. They stole 100 yen and several articles.

THE *Jiji Shimpō* has received a telegram from Hakodate dated the 15th instant stating that the Japanese ship *Uwajima Maru* foundered near Fukaura on the 13th instant.

A YOUNG man and a woman committed suicide by lying under a train near Ueno station on the morning of the 13th inst. The bodies have not yet been identified.

A TRAIN of goods-cars on the Kiushiu Railway was derailed at Futsukaichi Station, on the 14th inst. The engine and ten cars were damaged, and the loss is estimated at over yen 9,000.

KOMATSU KINSUKE, on the staff of the One Hundred and Tenth National Bank, of Bakan, was arrested by the police on the 17th inst. on a charge of having stolen yen 10,750 by means of a forged certificate in November last.

A THIEF entered the house occupied by Lieut.-General Kurogi at Minamimachi, Aoyama, Tokyo, early on the morning of the 15th inst. and stole a silver *koro* which was presented to the General by the Emperor at the time of the Silver Wedding.

A LONDON telegram in the *Osaka Mainichi* says that two British torpedo-destroyers collided off Sheerness on the 5th of October. There are 32 crippled destroyers undergoing repairs in British dockyards at the present time.

SAITO TOKICHI, an engineer living at Misujimachi, Asakusa, Tokyo, while watching a fire from a tower early on the morning of the 14th inst., fell down by accident and was killed. The Metropolitan police officers presented 85 yen towards the funeral expenses and relief of his family. The police firemen subscribed 100 yen.

MANABE MASUZO, a rich farmer's son, living at Tateyama-mura, Karita-gori, Miyagi Prefecture, having stolen 5,700 yen belonging to his father on the 10th inst. went to Tokyo accompanied by a woman. The Shitaya Police arrested them near Ueno station, on the 13th inst., after the young man had already spent over 3,000 yen.

A BURGLAR named Uratani Inosuke, living at Urago-mura, Miuragori, Kanagawa Prefecture, was arrested by the Yokosuka police early on the morning of the 13th inst. He entered a house occupied by Fujiokaya, Yokosuka, armed with a sword and stole 20 yen and several articles.

A WOMAN named Iwazaki Kan, living at Akashicho, Tsukiji, Tokyo, formerly employed as maid-servant in a house at Onoyecho Nichome, Yokohama, was arrested by the Isezakicho police in Tokyo, on the 12th inst. charged with having stolen 30 yen from a chest of drawers in her employer's house on the 20th ultimo.

A QUARREL occurred between the principal and teachers at the Second Middle School of Tochigi Prefecture, the other day. All the students sided with the teachers, against the principal. Forty students were expelled from the school.

NAKAGAWA KAKUHEI, living at Mitsumata-mura, Fukushima Prefecture, committed suicide along with his wife Shima, and a young daughter a few days ago. They jumped into the Yoshino river, Shima carrying her daughter tied upon her back. The three bodies floated the following morning. Poverty was the reason for the crime.

News has been received in Tokyo from the north that the Japanese steamer *Izumigawa Maru*, 131 tons, belonging to Mr. Oi Umejiro, Hakodate, was wrecked off Yakumo, Iburi province, Hokkaido, on the afternoon of the 9th inst. No lives were lost.

AN Italian military officer was arrested at Nagasaki on the 11th inst. and charged with taking photographs within prohibited limits. He was fined 30 yen and his photographic outfit confiscated. He only arrived from North China by the *Sendai Maru* that morning.

A SPECIAL train on the Sanuki Railway was capsized through the error of a pointsman at Udatsu station, on the afternoon of the 10th inst. A great festival was being held at the Kotohira Shrine that day and passengers crowded all the trains. Only two persons, however, were slightly injured.

CHINA.

Saturday, Oct. 12.

It is thought probable that the Finance Department will send a special envoy to negotiate with China the terms of the new tariff arrangements, and that he will be accompanied by an expert whose special duty will be the conversion of the duties from *ad valorem* to specific. According to this rumour, Mr. Uchida, the new Japanese Representative in Peking, will not have any direct connexion with the negotiations. That is the plan pursued by Great Britain.

Monday, Oct. 14.

Various rumours arrive with reference to the progress of the Court to Peking. We are told that the retinue of their Majesties suffered badly from hunger, owing to insufficient preparations *en route*, and that the local officials were reprimanded, which is doubtless a highly important piece of intelligence. Then follows a story on the old lines; namely, that although the Emperor intends to return to Peking, the Empress Dowager will remain at Kai-fong until the spring. But of all the tales hitherto circulated, that is the most difficult to believe. For if the Empress Dowager allows the Emperor to assume administrative control in the capital, she herself remaining in a far-distant city, it will be tantamount to her abdication of political power. Possibly she may entertain some such intention, but the world will scarcely believe in her sincerity until the evidence of an accomplished fact is forthcoming.

Her Majesty is further said to have become disgusted with the dissipated habits of the Prince Imperial and to have resolved upon removing him in favour of some one else. What a field for conjecture the future of China presents!

Latest rumours continue to allege that the Empress Dowager will remain at Kai-fong while the Emperor proceeds to Peking. Wang Wen-shao is said to have telegraphed in that sense to Prince Ching and Viceroy Li. It appears to us that this intelligence, if it be confirmed, is very significant. The administrative power can not be exercised in two places simultaneously. Its seat must be either in Peking or in Kai-fong. Does the Empress Dowager intend to efface herself and allow the Emperor to have a free hand, or will His Majesty be a mere figure-head, Kai-fong being the real centre of authority? If the former be the programme, then certainly the possibility of the dawn of an era of genuine liberality may not be altogether remote. But if the Empress intends to retain control while suffering the Emperor to reside in Peking, an era of intrigues and disturbances may be anticipated. It is futile, however, to speculate on the consequences of anything so momentous until the statement is confirmed. One thing may be said, however; namely, that by remaining at Kai-fong the Empress Dowager would identify herself with the reactionaries. Unwise and even suicidal as such a policy must prove, it is not inconceivable that a division of the Court has been judged the most facile method of placating the Foreign Powers without seriously offending the Chinese conservatives. Of course the arrangement would not work, but sometimes practical expediency has to be sacrificed to diplomacy and national sentiment.

The *Jiji Shinpo* says that an agreement has been concluded between his Excellency Sheng and Mr. Hoshikura, a well known

capitalist of Yamato, by which the latter obtains an important mining concession in Anhui. The enterprise is to be on joint account and the capital is stated to be five million *yen*. The foreign public has not hitherto heard anything of Mr. Hoshikura. He is known in Japan as a large land-owner, and we were not aware that he entertained any idea of over-sea enterprise. If combinations of this kind can be effected, they may prove the most effectual means of developing China's resources.

The great Viceroy Liu has failed to obtain leave for the purpose of recruiting his health. This intelligence is somewhat belated as the application is said to have been withdrawn on the 2nd instant. It is added that Liu is by no means convalescent, his feet being still swollen and his debility considerable.

Wednesday, Oct. 16.

The Peking correspondent of the *Asahi* telegraphs that negotiations are now proceeding between Russia and China for the conclusion of an agreement about Manchuria. It is believed, he adds, that as Li Hung-chang has sole charge of the empire's foreign affairs during Prince Ching's absence—the Prince has gone to Kai-fong to meet the Imperial party—the negotiations are likely to proceed rapidly in the sense desired by Russia.

It is said that 400 Chinese students are about to come to Japan. They are called "students," but many of them are already office-holders whose business will be to study methods of discharging the functions with which they are entrusted. Several others are to enter the Normal Schools and be trained as teachers.

Thursday, Oct. 17.

It is expected that the Imperial Chinese Court will reach Kai-fong about the 10th of November. Prince Ching is said to be urging their Majesties to hasten, inasmuch as the state of affairs in north China demands their immediate presence, which view is maintained by Li Hung-chang also. Our readers doubtless understand that the route taken by the Court on its return journey is different from that taken by it when flying from Peking. In the latter case it followed the high road leading south-west *via* Pao-ting, Ching-ting, Tai-yuen and Fu-chau—in fact, the direct route between Peking and Hsian. But on its return journey the Court has struck due east along the Yellow River and will reach Kai-fong *via* Honan. It will probably continue to follow the River line until it strikes the Grand Canal, when it will head due north for Peking. Kai-fong may be said to be at the parting of the ways, since it is a little to the eastward of that city that the Yellow River begins to trend northward.

The telegrams recently received with regard to anti-missionary outrages by the Triads in Hongkong, are now seen to refer to the destruction of the Basel Mission station at Piang-thong near Hsing-ning in the north-east of Kwang-tung Province. The outrage occurred on the night of September 29-30th and the German missionaries who were in charge of the station escaped safely to Kia-ying-chow.

Friday, Oct. 18.

It is observed that the distance between Hsian and Kai-fong is 1,240 Chinese *li*, or 413 English miles. The Court set out from Hsian on the 6th of October and is expected to reach Kai-fong on the 27th of November, a very leisurely rate of progress, being just

10 miles a day. From Kai-fong to Peking is 1,580 *li* or 527 miles, so that, even supposing the journey to be continued at once and the rate of travel to be maintained throughout, Peking could not be reached until the 19th or 20th of January. But it is extremely improbable that the Court will show much diligence in prosecuting its journey through Central China in mid-winter, and, indeed, if the Empress Dowager had entertained any intention of pushing on at once beyond Kai-fong, she would not have ordered a palace to be prepared there.

Another point which touches this question is that Prince Ching is to set out for Kai-fong on the 27th instant. He will require at least 35 days to reach Kai-fong, so that his arrival there will be about the 2nd of December. If the Court is to meet him in Kai-fong, it must arrest its journey there.

Kai-fong is the Capital of Honan. It is the very centre of China, and may justly be called one of the most important places in the empire.

KOREA.

Saturday, Oct. 12.

There is a rumour that the Korean Government has decided, though no official announcement has yet been made, to pardon the persons suspected of complicity in the murder of the late Queen. Most of these persons are now refugees in Japan, chief among them being Mr. Pak Yong-ik. What proof exists against them we do not know, but if there is any valid evidence we trust that this disposition to clemency will be checked at the outset. It is our established conviction that the singular sentiment now animating civilized countries with regard to the protection of political assassins will one day be considered a disgrace to human intelligence. Be that as it may, however, the murder of the Queen of Korea was one of the most brutal acts recorded in history, and the ends of justice would be altogether subserved to political emotion if any special indulgence were extended to her assassins for the sake of the country where they have found refuge. The real point, we imagine, is that only the vaguest suspicions exist against several of them, and that if they fled from their country, it was because they knew that in the excitement of the time and owing to the savage criminal procedure of Korea, all hope of being justly judged must be abandoned. Such of them as have thus been the victims of circumstances entirely beyond their own control, may reasonably plead that their exile has been long enough.

Speaking of Korea, we may note the fact that for once there is an absence of sensational rumours from that country. There is, indeed, the best reason to believe that all the stories recently circulated about French and Russian intrigue in the peninsula were either wholly baseless or founded on almost intangible incidents. The sole question really brought upon the *tapis* has been that of the Soul-Fusan Railway's gauge, and it can not be called strange or suspicious that the advisability of having an uniform gauge for the whole system of lines in the empire should present itself to some minds. No means appear to be within reach for locating the factory whence so many rumours emanate, attributing to Russia in particular a degree of pragmatic activity that would argue ill for the sagacity of her diplomatists in the Far East. Some newsmongers evidently exist who, either for the sake of sensations or in order to increase their countrymen's

distrust of Russia, depict her constantly in the light of a mischievous busybody. Which ever end they may have in view, they unfortunately enjoy opportunities that enable them to attain it in some degree at any rate.

Monday, Oct. 14.

It is stated that in deference to the wishes of the Japanese Representative, the Korean Minister for Foreign Affairs was about to intimate that the veto on the export of rice would be removed so far as the province of Ham-yong-do was concerned, when his colleagues in the Cabinet protested *en masse*, urging that the veto should remain in force until next year. The Minister of Foreign Affairs then submitted his resignation, but it was not accepted. The exclusion of Ham-yong-do from the operation of the veto would be of very little practical value, as all the districts where there is a shortage of crop look to that province for supplies. The Minister of Foreign Affairs seems to be between two fires, for he is pressed on one side by Japan and on the other by his official colleagues, who allege that the sentiment of the nation is against sanctioning the export of grain. If such be indeed the sentiment of the Koreans they must differ considerably from ordinary mortals. As a rule men like to be allowed to manage their affairs in accordance with the dictates of their own interests. If they find their account in selling the produce of their farms to exporters instead of placing it on the home markets, they naturally prefer to have the right of option, and it is to the advantage of the country in general that they should have it. To talk of a famine in Korea while the price of grain remains so low that its export brings profit, must seem unreasonable to any thinking man.

Three of the ringleaders in the recent Quelpart riots are said to have been condemned to death by the criminal court in Seoul. The procedure in this matter has been slow.

Wednesday, Oct. 16.

There appears to be a curious state of affairs in Korea. The Authorities are reported as professing to think that the Japanese Representative's remonstrances against the grain veto referred to Ham-yong-do only. But Ham-yong-do is not a rice-producing district; beans are its great staple. Hence its special exclusion from the rice-export interdict is a measure of no real value. The Minister of Foreign Affairs is said to be trying to save his face with Japan by means of the Ham-yong-do sop, and his colleagues are opposing even that concession. In the meanwhile deputations come from the provinces praying for remission of the taxes on the ground that the crops are a failure. These deputations would be serious obstacles to the success of Japan's demand, were they *bonâ fide* affairs. But it is alleged that they are prompted by local officials, who find their account in the maintenance of a veto which they themselves can easily elude to their great profit, and that the talk of crop failure is at best a gross exaggeration. Mr. Hayashi has a hard nut to crack, but he appears to be going at the work with much *vim*.

Friday, Oct. 18.

A telegram from Seoul to the *Asahi* briefly announces that the ceremony of raising Lady Om to the position of empress was performed in the palace on the 15th instant. There have been so many false rumours about this event that the public will not be disposed to place implicit credit in the state-

ment now telegraphed, especially as it was preceded by an equally confident assertion that all intention of making Om empress had been abandoned.

It is alleged that the Korean Government has decided not to take any final step with regard to the grain interdict until the result of this year's harvest is definitely known. Thereafter it will be settled whether to revoke the veto or continue it in operation until next autumn.

RUSSIA AND MANCHURIA.

The Japanese newspapers all refer to the Manchurian question and allege that Russia is now busily negotiating with China for an agreement with regard to the future of the big territory. They say that the terms of the agreement are:—

(1) That Russia shall hand over the Newchwang Railway to China, the latter, however, pledging herself not to allow the line to be used for British military purposes.

(2) That two years after the restoration of peace and good order a part of the Russian troops shall be withdrawn from Manchuria, and that three years subsequently the whole shall be withdrawn.

(3) That China shall grant to Russia exclusive privileges of railway building and mining in Manchuria.

These conditions are scarcely credible. As to the Newchwang Railway, the matter is already under discussion between England and Russia, and it is not likely that the latter Power would make it an independent subject of negotiation with China. We may mention that according to another report this condition takes the form of a declaration that the line shall be handed over to England, but obviously such an arrangement would not be admitted into an agreement between Russia and China. With regard, again, to the veto upon England's use of the railway for military purposes, it is quite obvious that such discrimination against Great Britain could not be seriously proposed by Russia: it would amount almost to an act of war. Here, too, there is another version, namely, that the road shall be made with British capital and that it shall be guarded by Chinese troops. But it is not for Russia to dictate what uses British capital shall be applied to or shall not be applied to, and there is little likelihood that she has made any proposition of the kind. A similar criticism applies to the alleged provision that Russia is to have the exclusive privilege of building railways and carrying on mining operations in Manchuria. The treaties secure to all the Powers equal rights within Chinese territories. Germany has attempted to evade that arrangement in Shantung, and has not replied to Great Britain's protest on the subject. But the protest stands, and it does not follow that because the Berlin Government has endeavoured to set the treaties at naught in one section of China, the St. Petersburg Government is to be allowed to follow suit. Japan also has a say, and a very large say, in this matter. If any State has substantial rights in Manchuria, Japan is that State. It is not likely that she will allow her rights and interests to be quietly ignored. We repeat, however, that until indubitable information is obtained as to the contents of the proposed convention, it will be wise to suspend judgment.

This intelligence has roused the National Union to renewed action. They have held a

meeting and decided to agitate strongly against the alleged convention.

The *Asahi Shimbun's* Peking correspondent wires that among the conditions is one securing to Russian officers the command of all Chinese troops in Manchuria, and that the arrangement as to the withdrawal of the Russian troops is more explicit than the above, since it provides that one-half of the troops are to be withdrawn two years subsequently to the restoration of peace and good order, and the remainder three years thereafter. But of course this latter agreement would not be worth the paper on which it is written. So long as Russia retains the discretionary power of determining whether peace and good order have been actually restored, and so long as their non-restoration constitutes a title for her to retain possession of Manchuria, peace and good order are not more likely to be restored than Manchuria itself is. Russia will always be competent to contrive convenient disturbances of tranquillity. She will cling to Manchuria as tenaciously as England clings to Egypt, and if there is no ready-made Soudan to furnish constant justification for her remaining there, she can easily manufacture a Soudan.

THE SEIYU-KAI AND THE GOVERNMENT.

At a meeting of the Tokyo Branch of the *Seiyu-kai*, held in the Kinki-kan on the 12th instant, Mr. Ozaki Yukio, parliamentary leader of the Party, made a remarkable speech, clearly indicating a resolve to oppose the present Cabinet. He spoke in four characters; first as a private individual; secondly, as a member of a party; thirdly, as leader of the *Seiyu-kai* in the Lower House; and fourthly as a member of the *Seiyu-kai's* General Committee. In his capacity of private individual, he was neither hostile nor friendly to the Cabinet, but altogether neutral. As a member of a political party, he strongly opposed a Ministry which openly disavowed all connexion with political parties. It was party government that he and his fellow thinkers had laboured to achieve for twenty years, and they could not possibly identify themselves with a Cabinet that openly repudiated that principle. Speaking as the Party's leader in the Lower House, he could only say that he would be guided by the wishes of the majority. Being neither a hero nor a fool, he could not pretend to be competent to set himself in opposition to the views of the greatest number. Finally, as a member of the General Committee, he could not close his eyes to the fact that whereas the Lower House had the right to be first consulted about the Budget, and whereas the *Seiyu-kai* possessed a majority in that House, the Cabinet had taken the Peers into its confidence about next year's budget and had not said a word to the *Seiyu-kai*. It was impossible to regard that as proper treatment. The leader of the Party, Marquis Ito, had desired them to treat the Cabinet in an amicable spirit, but it was essential that the Cabinet, in turn, should show a similar spirit towards the Party. Reciprocity was necessary in such matters. The Cabinet did not give any indication of an amicable spirit when it made the House of Peers its sole confidante in a matter which eminently concerned the Lower Chamber, and when it caused to be printed and circulated a book denouncing the whole system of party government. They might be content not to insist for the moment that every cabinet should have a party basis, but they must at least insist that it should show itself not to have a clan basis.

The party was bound not to see its flag dishonoured. Inscribed on that flag was a large relaxation of the rules with reference to the appointment of officials. To some extent the principles of relaxation had been embodied in legislation and recognised by former cabinets, but it was altogether ignored by the present Cabinet. The *Seiyu-kai* could not tamely suffer that.

Mr. Ozaki's reference to the rules for the appointment of officials may be obscure to some of our readers. We may therefore explain that although the political parties had from the first adopted for one of their mottoes the necessity of reducing the establishment of officials, they ultimately insisted that, in order to find places in the administration for party men, the rules as to qualifications should be relaxed; and failing to carry that point, they agreed to the creation of special offices—that of *Chokunin* Councillor, in other words, that of Parliamentary Secretary, which could be filled by persons not satisfying the legal qualifications. This question provoked much dispute between the Ministry and the Parties, but was ultimately arranged on the above basis. Subsequently the Yamagata Cabinet abolished this new office of *Chokunin* Councillor, and the Ito Cabinet had not time to re-create it, even supposing that there was any intention of doing so. Mr. Ozaki, however, evidently thinks that the present Cabinet should have sought to propitiate the parties by some measure of the kind, instead of standing severely aloof from them. At all events it is obvious that the days of peace and quiet are drawing to a close, and that the country is once more to be plunged into the vortex of political squabbles. If any Japanese imagines that foreign capital will come here during these troublous times, he is mistaken.

Mr. Ozaki Yukio, parliamentary leader of the *Seiyu-kai*, does not show a very friendly mood to the present Cabinet, judging from utterances attributed to him by the *Kokumin Shinbun*. He is unable to see that a mere increase of official salaries can be called administrative reform, nor does he believe that the increase can be effected without either adding to the budgetary expenditures or reducing the official establishment, which latter performance he considers to be beyond the capabilities of a Cabinet depending solely on official support. His own view of administrative reform is that the longer the time devoted to elaborating a programme, the more difficult does it become to carry it out. Marquis Ito's great reform of 1885, was planned in the course of one or two months and put into immediate execution, which is the only possible method, in Mr. Ozaki's opinion. As to finance, he is not opposed to the sale of bonds abroad if the thing can be accomplished on good terms. But he deems it extravagant to say that 50 millions can not be easily obtained if the negotiations are skilfully managed. On the whole we judge from his utterances that he shares Viscount Watanabe's views as to the advisability of postponing the prosecution of the *post bellum* undertakings, and that he thinks it premature to ask for an appropriation on account of the Kure steel factory.

It was stated that the Prime Minister had intimated to Mr. Kataoka, President of the House of Representatives, a desire to consult with leading members of the House on the subject of next year's budget, but that Mr. Kataoka had failed to communicate this intimation to his fellow-members, which failure was responsible for the umbrage taken

by Mr. Ozaki Yukio and others. The *Nichi Nichi Shinbun* denies the correctness of this story. What Viscount Katsura did, it says, was to tell Mr. Kataoka that he, the Viscount, intended to take an opportunity of consulting the Representatives. As, however, he did not name any date, nor impart an explicit character to his communication, Mr. Kataoka saw no occasion to convey it to the General Committees of the *Seiyu-kai* and of the Progressists, especially as it was obvious that Viscount Katsura would be unlikely to carry out his intention before the beginning of November, when many members of the Lower House will be in Tokyo. The present expectation is that an opportunity will be taken to consult the members as soon as they assemble in the capital, but whether they will regard such action as an *ex-post-facto* courtesy remains to be seen.

THE TEA-POT STORM.

Saturday, Oct. 12.

Truly it begins to be evident that some Japanese have an exceedingly defective idea of proportion. Newspapers like the *Yomiuri Shinbun* actually take up the question of the Russian political pamphlet which recently emanated from the press of the Home Department, and write about it as though the safe suspension of the firmament depended on this pettiest of affairs. It is certainly inadvisable that such literature should reach the public through official hands, and a secretary of the Department has been reprimanded for his share in the matter. But when that is said, what remains? Why should not the Japanese read whatever there is to be observed about representative institutions? Why should not the abuses of the system be considered as well as its uses? Even the *Asahi Shinbun* devotes a leading article to the question, and would apparently have the public decide that parliamentary government is too tender a plant to be subjected to any rough blasts of heretical doctrine. How small and unmanly is such talk. We, as onlookers, can assure the *Asahi Shinbun* that representative government has not appreciated in the political markets of the world because of the example its practice has furnished in Japan. If the Japanese people imagine that they possess it in its best form and that they can safely close their eyes to the deformities it is likely to develop should its growth be left uncontrolled, their happy ignorance is dangerous. We would have them read everything written on the subject by clever authors, Russian or otherwise, so that they may cultivate a judgment more robust than that now displayed by storm-in-a-teapot journalists.

Monday, Oct. 14.

It is scarcely credible, but nevertheless true, that political circles seem to be growing more and more agitated about the brochure that emanated from the translation bureau of the Home Department. Mr. Motoda Hajime, a well-known member of the Diet, is quoted as denouncing the thing in unqualified terms, and in other directions a similarly exaggerated view seems to obtain. Yet the men that criticise and condemn this action are precisely those that have always been most conspicuous advocates of freedom of speech and pen. If the representative system of government is subject to grave abuses, as it unquestionably is, why should they not be exposed? Is it not a duty to expose them and would it not be a wrong to conceal them? The sole question is, did the Home Depart-

ment adopt exceptional measures to circulate this brochure. If it did, some one is to blame. If it did not, if it merely translated and published the brochure, as it has frequently translated and published other brochures which it judged likely to prove beneficial to the public, what on earth is all the noise about? Apparently the agitators hold that if an official publishing bureau translates and issues literature opposed to their political views it must necessarily be in sympathy with that literature, whereas if it translates and issues literature which they approve—as has often been done by the bureau of the Home Department—it must be supposed to do so against the grain. The whole thing is comically illogical. The *Nichi Nichi Shinbun*, while defending the Home Department in a certain measure, appears to think that it was a mere waste of time to translate such a pamphlet. With that view we do not sympathise for a moment. An essay by a Russian statesman on the evils of the parliamentary system should be full of interest. We ourselves believe in representative institutions, but we do not think that their operation in Japan's case has tended to illustrate their uses rather than to expose their abuses, and *pace* Mr. Motoda Hajime, for whose opinions as a rule we have much respect, we would advocate the translation and publication of all books, pamphlets or brochures calculated to disturb the serene satisfaction with which Japanese party politicians seem to regard their own performances.

FUNERAL OF MR. NAKAMIGAWA.

The funeral of Mr. Nakamigawa was attended by an immense concourse of friends, almost the whole business world of Tokyo being numerously represented. All the pupils of the Keio-Gijuku, to the number of six or seven hundred, assembled. The older lads carried carbines and the column was headed by a band of buglers. It would be impossible within any reasonable limits of space to catalogue the names of the principal persons present, from Admiral Viscount Ito and Marquis Iachisuka to the office boys of the great Bank over whose affairs the deceased had presided with such ability. There were no flowers, the family having expressed a very decided wish in that sense. At Aoyama the ceremony was conducted according to Buddhist rites, and in spite of the great crowd of people the excellence of the arrangements prevented all inconvenience. It may be added that the cortege left the residence of the deceased precisely at the appointed hour, and that many hundreds of those attending abandoned their vehicles at that place and proceeded to the cemetery on foot as a mark of respect for Mr. Nakamigawa's memory.

MR. TEI ON CHINA.

Mr. Tei, Secretary of the Japanese Legations in Peking, has just returned to Japan. Interviewed by a representative of the *Chiuo Shinbun*, he said that there are now two distinctly marked parties in China, namely, the gradual progressists, whose leaders in Peking are Li Hung-chang and Prince Ching, and in the provinces Viceroy Chang and Liu, and the conservatives, who include in their ranks many officials and many men of means. It is hard to predict where the victory will lie, but if the progressists are to carry the day, a thorough reconstruction of the local governments will be necessary.

Concerning Acha, the Hierarch of Lamaism, who was recently received with such

ecolat in Japan, Mr. Tei speaks rather contemptuously. He says that a Lama, when about to die, makes declaration of the year, the day, the hour and the district where he will be reincarnated. When that time comes the priests of Lamaism make inquiry for a baby whose birth satisfies the required conditions as to time and place. Naturally there are several such babes, and it thus becomes necessary to choose among them by lot. Thus Acha's title to distinction rests on the unique fact that he happened to be the baby indicated by lot. He is a man of no erudition, nor is there any reason why he should be honoured.

THE MORMON QUESTION.

Among many letters that have reached us about the Mormon mission to Japan, one just received suggests that some of our recent remarks may have been misleading, and then goes on to say:—

"It may be true that as you say they have given assurance that they will not teach in violation of the law and that they have given up polygamy as a result of the action of the U.S. government, but the fact that they still believe that they are right in that practice will I feel sure influence their teaching in Japan if they are permitted to work here. I received a call from two of their Missionaries, Mr. Grant was not of the number, but they were two of the four who are here. In a long conversation one of them assured me that while he had never lived in the relation of polygamy having had but one wife, yet it was the one thing in his life that he regretted most of all that he had not lived in such relations when it was permitted by the laws of the land. They also assured me that in response to my questions, that if at any time the church of the Latter Day Saints should become strong enough to secure the repeal of that law they should then rejoice and at once resume the relations of polygamy. They simply felt that the Government had forbidden it now and so their duty to keep it up was not binding, but that the responsibility was borne by the Government of forbidding a just and holy rite. They should obey the Government and so they gave up the practice for the present but they look forward to the day when they shall be in the ascendancy and will be able to resume the practice. Now I appeal to you if holding such views as the above, and they accord with most that I have learned from other sources of their position in this matter, can they be expected to do other than teach polygamy in Japan if they teach here at all. They will everywhere be asked about their belief in the matter. It is not a matter that they can pass over in silence. That is the one feature of their teaching that people wish to know about. Will they not naturally, as they did with me, say that they are not going to teach it and yet spend most of their time in showing that the practice is right and that they are martyrs for right—a position that will be even more insidious before the Japanese than if they were to teach the doctrine openly. I offer these facts for your consideration with the hope that you may be led to say less about Mr. Grant's denial which I believe in point of fact means little though it may be literally true. I do not accuse him of falsehood by any means. I can see little difference however between the teaching of polygamy and the explanation of the Mormon belief in a doctrine that they still hold to be right but that they are forbidden from practising."

From the point of view of this correspondent it becomes a difficult question for the authorities to determine what course they should adopt towards the Mormons. It appeared to us that if the latter definitely excluded from their propaganda the teaching of plural marriages, the Government would scarcely be warranted in refusing their application to preach in Japan. But it would seem that such assurance is not sufficient, and that the Authorities will fail in their duty unless they at least exact from the Mormon missionaries a public declaration not merely that polygamy has been excluded from their list of doctrines in deference to the law, but also that they have ceased to believe in it as a right and proper doctrine, and that they will on no account attempt to inculcate it. We entirely agree with our correspondent, and with other correspondents who have taken

a similar line, that to have laid aside this doctrine as a necessary concession to the letter of the law, while still retaining a belief in it, is a moral condition which ought to disqualify the Mormons for permission to preach in Japan. If they believe in polygamy, it is impossible that they should refrain from seeking to inculcate their belief, whether in public or in private, and if they believe in polygamy while pretending to have expunged it from their creed in order to secure legal sanction for their preaching, they are guilty of another kind of sin, in itself sufficient to disqualify them as teachers of any system of decent morality whatever. It amounts to this, then, that before being granted a permit to propagate their faith in Japan, they should be required to make public abjuration of the doctrine of polygamy as a damnable immorality, utterly subversive of social order and destructive of domestic happiness.

THE AUSTRALIAN COMMONWEALTH.

It is most unfortunate for Australia that the votes of her Legislature should be controlled by the labouring class. The result will be to seriously check the country's development. England's cardinal trouble at present is that the labour unions have so hampered the manufacturing industry as to place it at a serious disadvantage in competition with other countries. In a comparatively new land like Australia cheap labour should be provided by every possible means, and no avenue should be closed to its ingress. But the ignorant labourer is too short-sighted to appreciate that view of the question. He thinks only of his own immediate earnings, and the consequence is legislation fatal to the interests of the commonwealth. A bill now awaiting discussion by parliament illustrates this unpatriotic selfishness. It proposes to interdict the immigration of any person unable to write fifty words dictated by a customs officer; that is to say, any person unacquainted with the English language. The plain purpose of this vote is to exclude Chinese and Japanese subjects, as well as all persons not of English origin. If the Colony, warned by the experience of the United States of America, legislated for the exclusion of nationals proverbial for their large contributions to the criminal classes, these restrictions would assume another aspect. But the thing is done solely in the interests of labour, and from that point of view it is not only narrow minded but suicidal. We doubt whether racial prejudice is primarily responsible, but unquestionably some of the blame must be attributed to that most uncivilized sentiment.

There is one aspect of this question which seems to escape general notice. In China and Japan the foreign resident, while admitting that the nominal cost of labour is low, maintains that the balance is redressed by the greatly superior efficiency of European and American labour. "A Japanese," these critics say, "will work for a shilling a day, whereas an Englishman must have half-a-crown at least, but then the Englishman will accomplish three times as much as the Japanese, so that the former is cheaper in the long run." Evidently that is not the experience of Australians or Americans. If they found the white labourer so much more efficient, they would not think it necessary to legislate against the ingress of the brown.

We have heard in Japan expressions of surprise that the Parliament of the Australian Commonwealth can be induced to legislate

in the narrowly protective sense of the labour bill recently passed. The explanation is that the Labour Party returns eight members out of thirty-six composing the Senate and sixteen out of the seventy-five composing the House of Representatives. These numbers do not appear large, but in truth they put the Labour Party into the position held by the Centre in the German Reichstag; in other words, the Party wields the balance of power and can make its own terms with the Ministry. *The Times* points out that the provision with regard to writing 50 words from dictation would exclude most English labourers and servant maids, and that a girl going out as a cook would be turned back unless she could spell, whatever her culinary attainments might be. The great question is, however, what attitude Queensland will assume towards the bill. The comment of *The Times* is very pertinent:—

A very large capital is sunk in sugar plantations and other Queensland industries, which are worked by many thousands of coloured labourers; and, moreover, it seems to be certain that the vast agricultural regions in the northern part of the colony, between the Tropic of Capricorn and lat. 12°, can be cultivated only by coloured labour. The question then arises whether this immense region, with all its possibilities of production and all the capital that has been sunk in it till now, is to be abandoned in order to please the urban artisan of the Southern States of the Commonwealth. We shall be very much surprised if the powerful colony of Queensland is not prepared with an emphatic answer to this question. If Mr. Barton, or his rival, Mr. Reid, who claims to be the author of the cry "a white Australia," persists in pushing this matter to extremities, Queensland's loyalty to the new-born Commonwealth will be subjected to a severe strain.

Concerning the same question in British Columbia, *The Times* says:—

In British Columbia the attitude of the provincial Legislature towards Chinese and Japanese immigration has for some time past been a source of embarrassment to the Dominion Government. We published some ten days ago a long letter from Mr. David Falconer, the editor of a British Columbian contemporary, painting in the blackest colours the results which he foresees from "the Mongolian invasion of Canada." He admits, indeed, that the strongest of the objections entertained to Chinese immigration do not apply to the Japanese, but he nevertheless pleads with the same heat for the exclusion of both races. Another correspondent, whose letter we published on Saturday, controverts many of Mr. Falconer's arguments, and we doubt whether well-informed opinion in British Columbia is at all unanimous on the subject. But, if it were so, we should still urge our Canadian fellow-countrymen to give a more patient hearing to the "Imperial considerations," of which Sir Wilfrid Laurier has spoken in connexion with this question, than Mr. Falconer seems inclined to do.

With regard to the Japanese, especially, it should be borne in mind, in Australia as well as in Canada, that Japan is now freely admitted, and has fully vindicated her right to be admitted, into the comity of civilized nations. She has thrown the whole of her territory open to foreigners who wish to travel, or reside, or trade there, and it would be a serious matter to attempt to curtail off-hand in any part of the British Empire the rights to which her subjects are entitled by reciprocity. The vigorous protest entered a few days ago by the Japanese Government against the contumelious treatment to which some Japanese subjects were subjected by the United States authorities in Hawaii shows that Japan is determined to uphold those rights without fear or favour, and, as our Tokyo Correspondent informs us, it has already borne fruit at Washington. Apart, moreover, from the serious damage which the hasty action of the colonies might do in this respect to our Imperial relations with Japan, they would do well to remember that Japan is in a position to exercise reprisals against them, and possibly to inflict upon them loss which would far outweigh the benefits they hope to reap from a restriction of Japanese immigration. We are surprised that this aspect of the question should be ignored by a Canadian writing from Victoria, B.C., who has under his eyes, in the splendid fleet of the Empress Line constantly passing to and fro between Canada and Japan, the evidence of the great trade which has sprung up during the last decade between the two countries, and which is annually increasing, to the benefit of both. The case against Chinese immigration must necessarily stand

on a somewhat different footing so long as China refuses to open her own territory to foreigners as freely as Japan does, and continues to hold aloof as far as possible from all contact with the outer world.

LOSS OF THE "TSURUHIKO MARU."

The loss is reported of the steamship *Tsuruhiko Maru*, formerly the *Chittagong*, a vessel of 2,013 tons belonging to Messrs. Okura and Company. She seems to have been caught in the gale of the 7th instant when en route from Kobe to Hongkong, and being driven to the Goto Islands, went ashore there. Out of a crew of 50 persons only one is thus far known to have been saved. The Okura Company have sent a vessel from Kobe and another from Nagasaki to search for the steamer and succour the survivors, and the Naval Department has despatched two torpedo-destroyers on the same mission. The *Tsuruhiko Maru* was purchased by the Okura Company last March, and is said to have cost two hundred thousand yen altogether. She was insured for yen 44,000 in the Tokyo Marine and Imperial Marine Companies, each company having an equal share. She was engaged carrying coal.

Another account is to the effect that the vessel was purchased through Messrs. Doddwell & Co., at a cost of about yen 110,000; that she was insured with the Imperial Marine and Transport Insurance Co. for yen 180,000 of which half was reinsured in local marine insurance companies, that she went ashore at 4.30 a.m. on the 11th and that her hull immediately broke in two.

The *Tsuruhiko Maru*, whose wreck was announced in our last, had taken on board a cargo of coal on the 6th instant, and put to sea. The only survivor, so far as at present known, is a sailor who says that he was just about to get into his bunk when the ship received a great shock. Hastening on deck he found that she had struck a rock and was parting amidships. Thereafter he lost consciousness, and when he recovered he found himself lying on the shore of one of the Goto Islands, where he had been cast up by the waves.

The torpedo-destroyer *Murakumo* found the place where the vessel sank, but could not discover any traces of the crew or see any bodies.

It appears that the special railway carriage which was to have been used on the occasion of the ceremonies in connexion with the consecration of the shrine to Prince Kitashirakawa was on board the ill-fated vessel.

In spite of the confident assertions made by Japanese newspapers on the 15th instant, it appears that no trace whatever has been found of the *Tsuruhiko Maru*. Four vessels—the torpedo-destroyers *Murakumo* and *Manazuru* and the torpedo-boats Nos. 21 and 25—searched every part of the coasts of the Goto Islands during the 13th and 14th inst., and their report is that not the smallest sign of the vessel or of any part of her cargo, could be seen. It seems that in addition to coal the ship had a quantity of railway sleepers on board, and some of these ought to have been washed ashore. But nothing of the kind is visible. The commander of the *Murakumo* telegraphs that all hope must now be abandoned. Evidently if one man had not happened to be cast up by the sea in an almost miraculous manner, the *Tsuruhiko* would have to be placed in the same category with the *Uchibi* and the *Tsukishima Maru*. The survivor says that after he came on deck and saw that the ship was

breaking in two, he lost consciousness, and knew nothing until he found himself lying on the beach the following morning. How he escaped drowning is a marvel, and if he had shared the fate of his 49 comrades who, together with the vessel and everything belonging to her, have disappeared, the case would be as mysterious as that of either the *Uchibi* or the *Tsukishima Maru*. It is easy to conceive, therefore, that the two latter vessels may have fared exactly as the *Tsuruhiko* did, though it remains for experts to explain how all traces can be lost under such circumstances.

THE "RYOUN MARU."

The master of the *Ryoun Maru*, a Japanese barque which has just returned from the north, complains that a fine of 1,400 roubles was unjustly levied from him by the Russian local authorities in Kamchatka. He had left Hakodate, he says, on the 9th of August under contract to carry away a load of salt-fish from some place which is not named, but which appears to have been on the Kamchatkan coast. Arriving at his destination, he permitted some of his men to land, and as they were watching the inhabitants' operations of cutting up and salting fish, they were arrested on suspicion, and the master was informed that unless he paid a fine of 100 roubles for each member of his crew, his ship would be seized. Having no money with him, he had to leave his papers as security, and to redeem them on reaching Hakodate. It is a strange story. One is disposed to think that if the *Ryoun Maru* was on a bona fide mission to ship cargo which had been contracted and paid for, she should have been able to establish the fact.

JAPANESE AND ITALIAN SOLDIERS.

Trouble is reported to have occurred at the iron swinging bridge in Tientsin. Two Japanese soldiers were guarding the bridge with strict orders not to allow passage after nightfall to any one unprovided with a permit, whatever excuse might be offered. A boat came up the river during the night in charge of 5 or 6 Italian soldiers. They asked to have the bridge swung, but as they could not show any permit, the Japanese refused. The Italians insisted that, being on military duty, they must be suffered to pass, and a vehement altercation ensued. Finally the Italians used their rifles, apparently for purposes of intimidation, and the Japanese, on their side, drawing their bayonets, stabbed one of the Italians, whereupon the others jumped into the river and the boat drifted down with the current. The matter was under investigation at the date of latest advices. We give the version published by the *Asahi's* Tientsin correspondent, noting that as the event happened on the 20th of September, it must have been settled ere now.

THE LATE PRINCE KITASHIRAKAWA.

The ceremony of consecrating the shrine erected in Formosa to the memory of the late Prince Kitashirakawa is to be conducted with exceptional pomp. Mr. Miyachi Genpei will proceed to the island to conduct the ceremony, and the relict of the Prince, accompanied by three representatives of the Tokugawa family, will set out for Kelung on the 20th instant. The fact that the Tokugawa family takes a prominent part is in consequence of Prince Shirakawa having been the lord abbot of the Uyeno Monaste-

ry, in which capacity he shared the vicissitudes of the Yedo *Shoguns*. The Emperor sends a mirror emblematic of the spirit of the deceased Prince, and another mirror to indicate the presence of three of his divine ancestors. These sacred emblems will be despatched by special conveyances. The party will proceed by the *Asama* leaving Yokohama on the 20th, and on the arrival of the war-ship at Kelung she will be joined there by the other vessels of the Japanese squadron in Formosan waters. The *Asama* will have the first naval band—thirty men—carried by a ship not flying an Admiral's pennant. She will also have a band of Court musicians, six in number, for the purposes of the ceremonial.

THE BANK DISPUTE.

The decision of the Osaka Court in the case of the dispute between the Russo-Chinese and the 130th Bank is evidently regarded with much satisfaction in Japanese business circles. Nothing, indeed, is more worthy of note in connection with this incident than the unanimity of the condemnation evoked in every quarter, journalistic, official and commercial, by the action of the 130th Bank. It is stated in well-informed circles that even the Minister of State for Finance employed his good offices to induce Mr. Matsumoto, President of the 130th Bank, to abandon his opposition. But Mr. Matsumoto held—and in this seems to be the whole excuse for his action—that the affair had not been strictly above board. The Russo-Chinese Bank's office is in Kobe. The 130th Bank's head office is in Osaka. The latter's branch office which endorsed the note is in Kyoto. Why was the Osaka head-office passed over and application made to its branch in Kyoto, and why was the transaction concluded without previous reference from the Kyoto branch to the head-office? These are said to have been the questions that troubled Mr. Matsumoto, and there are some critics who contend that, under the circumstances, it was right for him to dispute the note, at any rate so far as to obtain a legal decision with regard to the responsibility of principals for the acts of agents. We can not share that view for a moment. If there was any irregularity in the negotiation of the note, the fault lay with the manager of the 130th Bank's Kyoto branch, and so long as he acted in the public capacity of the Bank's representative all obligations incurred by him in the Bank's name must be implemented by the Bank. All that can be said now, we think, is that by accepting the decision of a Court of First Instance and neglecting to employ his right of appeal, Mr. Matsumoto shows the sincerity of his original objection and his appreciation of the remonstrances addressed to him by his business colleagues and by the Finance Minister. It has also been very gratifying to observe the trend of Japanese public opinion in the case, for the plain inference is that commercial credit possesses among the Japanese a value not generally supposed by foreigners. No impartial person can deny that the foreign resident merchant has had much reason to complain of the want of integrity shown by his Japanese client, but to argue from that experience that the commercial conscience is not developed in Japan and that the value of credit is not understood, betrays great ignorance of the history of this people. During fully two hundred years under Tokugawa rule the whole of Japan's domestic commerce may be said to have rested on a basis of credit, and

the system of trusts was successfully practised on a most extensive scale. It is impossible to read the story of those times without recognising that the disagreeable experiences of the foreigner in this country are due rather to the fact that he is a foreigner than to any inherent lack of integrity on the part of the Japanese.

It appears to us that a word of thanks is due to the Minister of State for Finance for employing his influence to effect a settlement of the dispute between the Russo-Chinese Bank and the 130th Bank. Rumour further says that His Excellency is addressing much attention to the subject of inconvenience felt by foreigners in observing the provisions of the civil and commercial laws, as well as those relating to taxation and local administration, in consequence of want of familiarity not only with the laws themselves but also with the customs of the country. Mr. Sone is understood to recognise the great importance of bringing about the closest possible connexion between foreigners and Japanese in the interests of the country's commercial prosperity, and it is alleged that he advocates the advisability of even modifying such rules of procedure as seem to interfere with that result.

We read in the *Chingai Shogyo* that another bank dispute has arisen in Tokyo. This time the party which seems to be behaving in a discreditable manner is the Boso Railway Company. Omitting details, the broad fact is that the Boso Railway borrowed a hundred thousand yen from the Mitsu Bishi Bank. The Bank would not lend without security and the Company proposed to offer as security a debt contracted by it to the 132nd Bank. The Mitsu Bishi naturally refused that security, but agreed that it would furnish the money if the 132nd Bank drew a note for the amount and if the Railway Company endorsed it, the debentures in the hands of the 132nd Bank being deposited with the Mitsu Bishi. When the time of payment arrived, the Mitsu Bishi naturally applied to the Company, which had actually received the money. But the Company had recourse to the legal subterfuge that until the Mitsu Bishi Bank had exhausted its remedies against the drawer of the note, namely, the 132nd Bank, it had no right to prefer a demand against the endorser. The case is now in the law courts, and the *Chiuo* denounces the conduct of the Boso Railway in very strong terms.

AN OPINION ABOUT ENGLAND IN THE FAR EAST.

Mr. Oishi Masami now shares with Mr. Inugai Ki the leadership of the Progressist Party. He has the great advantage of knowing his own mind and he has also the temerity to say what he thinks in unequivocal language. An epitome of his latest views is published by the *Niroku Shimpō*. Mr. Oishi has always been a staunch advocate of an Anglo-Japanese alliance, and his views as to that matter have not undergone any change. Having carefully examined his expressions of opinion, we gather that one of his chief motives in recommending such an alliance is that he looks forward to England's becoming Japan's purse-holder as France is Russia's. He thinks, in short, that Japan wants foreign capital, that she offers splendid opportunities for its investment, and that if England stood in the position of capitalist, political bonds of a strong character would be at once drawn round the

two countries. Looking at the matter from England's point of view, he holds that her policy of isolation has been a mistake. Its palpable result in the Far East has been to expel her from the commanding situation she once occupied and to transfer large portions of her influence to France, Russia and Germany, which countries may be regarded as a triple alliance for purposes of Oriental politics and for the crushing of Great Britain. She has been driven from the Yellow River regions; in Canton the French are encroaching upon her sphere; in the Yangtze she is no longer paramount, and even from Shanghai she is now being ousted. Soon nothing would remain to her if things continued in their present groove, and her retirement from Australia, India and Canada could scarcely be averted. England derives her greatness from her colonies and possessions abroad. Did she lose them, her place among the nations would be very different to what it is. A serviceable ally is her need, and Japan is such an ally. Mr. Oishi thinks that many opportunities of cementing an alliance have been lost in the past, but that they still offer. The question is, however, can England be induced to take that view. He speaks as though the difficulty were on Japan's side only. We apprehend that it is on England. Great Britain does not at present see any danger of a serious conflict between herself and European Powers in the Far East. She is still so strong that whenever she chooses to plant her foot firmly, no other Power is likely to defy her. Would she, under these circumstances, agree to become a partner in Japanese risks? We fear that the time has not yet come.

DELAYS OF THE LAW.

In the *Fiji Shimpō* we find an interesting article with respect to legal delays. Our contemporary has compiled tables showing the fate of suits connected with commercial affairs. In Japan a suit relating to a mercantile promissory note must be heard within 24 hours, but an ordinary commercial case need not come before the court for 20 days. The record for the first six months of the current year gives the following figures:—

Cases decided within 10 days	16
" " 20 days	41
" " one month	123
" " two months	131
" " three months	37
" " six months	53
" " one year	14
" " two years	16
Cases that occupied more than two years ...	3

Total 434

These figures are not very striking. But the *Fiji* adds another list which is more suggestive:—

Month.	Old cases.	New cases.	Total.	Decided.	Undecided.
January...	171	73	244	56	188
February...	188	70	258	61	197
March...	197	98	295	60	235
April.....	235	93	328	83	245
May.....	245	79	324	101	223
June.....	223	38	261	73	188

The general result is that only 4 per cent. of the suits brought in the courts are settled within 10 days and the remaining 96 per cent. take any time from over 10 days to 2½ years, the average duration being 3½ months per case. It must be remembered that the above cases relate without exception to commercial notes; in other words, they are all cases that must come up for first hearing, according to law, within 24 hours from the time of being entered. If such be the record with regard to cases thus specially provided for, it is easy to conceive how things fare

with ordinary civil suits. This means that enormous losses are inflicted on merchants. The rate of interest allowed by a law court is much smaller than that ruling in the open market, and the plaintiff in a suit has to pay the difference throughout the whole period pending a decision, to say nothing of the interruption of a transaction for all that time, and of the possibility of a dishonest defendant's making away with his available property in the interval. This last danger may be averted, in theory, by obtaining an injunction to restrain, but that is a troublesome and costly process. The *Fiji* recommends that a special tribunal should be organized for the trial of commercial cases.

THE KOW-TOW QUESTION.

It is still impossible to speak with certainty as to the cause of the difficulties that occurred in Berlin with reference to Prince Chun's mission. One of our conjectures at the time, as our readers perhaps remember, was that since the mission of apology was among the conditions imposed by the Peace Protocol, the Kaiser objected to receiving the Envoy pending the signature of the Protocol. That view is borne out by a paragraph in the *Neueste Nachrichten* on Aug. 30th, which said that the differences of opinion between the German and the Chinese Governments with reference to the ceremonies to be observed at the reception of the penitential mission, and the form of the apology to be made by Prince Chun to the German Emperor, were not the only cause of the interruption of Prince Chun's journey to Potsdam, the German Government having refused to receive Prince Chun before the signature of the Peace Protocol. On the other hand, it was asserted in Peking that the delay in the promulgation of the edicts necessary to complete the Protocol was due to the difficulty created by the Berlin Court with reference to the ceremonial to be observed at the reception of Prince Chun. The *Times'* Peking correspondent, telegraphing under date of Sept. 1st, said:—"The Chinese version, as communicated to the Legation at Peking, declares that the German Emperor insisted that Prince Chun should perform the kowtow before him, and, when this was refused, required the Chinese suite to kowtow. For 100 years past all Envoys at Peking have peremptorily refused to perform this barbaric ceremony of subjection. Thirty-eight years ago the dispute was finally settled." This is borne out by the Berlin correspondent of the same journal, who telegraphed on Sept. 1st:—

Prince Chun still remains at Basel, and shows no sign of any intention to leave his comfortable quarters at the Hôtel des Trois Rois in order to perform his act of humiliation before the German Emperor. In some quarters it is stated that the Prince will probably decide to-morrow whether he will come to Potsdam or not, but according to telegrams from Basel it seems as if the interruption of the mission was likely to be protracted. According to the *Lokalanzeiger*, the Chinese now declare that they would rather die than accept the conditions which the German Government seeks to impose upon them. To perform the kowtow before a foreign Sovereign would, they say, be tantamount to recognizing him as the suzerain of the Chinese Emperor. It is further reported that the Berlin Government insists upon a change in the form of the verbal apology to be tendered by Prince Chun. The formula which the Prince wished to employ was:—"The Chinese Government regrets the death of Baron von Ketteler." The Berlin authorities demand that, instead of this, he shall say:—"The Chinese Government begs to be forgiven for the murder of the German Minister, Baron von Ketteler."

In well-informed quarters here no excessive importance is attached to the episode, and no doubt is entertained that sooner or later Prince Chun will find himself compelled to give way and to fulfil his mission of atonement. The delay is, however, very ex-

asperating. The general public appears to regard the whole incident from its humorous side. The ordinary Berlin *bourgeois* loves a good joke, especially at the expense of his own Government. A comment frequently heard is "What an excellent subject for a comic opera."

We were charged with showing anti-German bias because we attached credence to Reuter's twice repeated explicit announcements on the subject, but truly it does seem a little extravagant to contend that impartiality can be shown only by refusing to believe anything to Germany's disadvantage even though the news comes through ordinarily credible channels. If the Kaiser did not require Prince Chun to kowtow, Europe certainly understood that he did.

OFFICIAL AND PRIVATE.

The *Jiji Shimpō* has an interesting article on confusion between official and private functions, which confusion it regards as one of the misfortunes of the era. Our contemporary's argument is a little too general in its terms to produce much effect, but there is no ambiguity about one of the positions it takes, namely, that the members of the Legislature have abused their power, and have lent their offices to promote private enterprises, while officialdom, on its side, has timidly succumbed to the pressure thus brought to bear on it. We believe that our contemporary has furnished a true indication. In the early days of the Diet the public had to listen to a great outcry against what was called *Jōjitsu Seifu*, or the government of favoritism. Where are the men now that raised their voices so vehemently and so eloquently in those times? It is one of the strangest features of Japanese parliamentary history that whereas the opening sessions of the Diet seemed to forecast an assembly of voluble and even violent oratory, the present characteristics of the Lower House are silent discharge of business and evident distaste for elocution. Oratory appears to have gone entirely out of fashion. But many of the orators have greatly bettered their worldly circumstances. How has it happened? May we not be pardoned if we conclude that they obeyed the doctrine enunciated by the late Mr. Hoshi Toru, namely, that a position in parliament is like a position in business, and that the one may be turned to profitable uses no less than the other provided that nothing detrimental to public interests is promoted. Thus they have found something more profitable than declamation.

VISCOUNT KATSURA AND THE HOUSE OF REPRESENTATIVES.

The *Jiji Shimpō* alleges that simultaneously with his offer to explain the facts of next year's budget to members of the House of Peers, the Prime Minister conveyed to Mr. Kataoka, President of the House of Representatives, an intimation that he would be happy to perform the same office for that branch of the Legislature. Mr. Kataoka however, seems to have failed to transmit the message. It is suggested that his failure was due to the absence of most of the members of the Lower House from Tokyo at the moment, but that appears a very unsatisfactory explanation. Neither can we understand how Mr. Kataoka, if he possessed the knowledge that such an invitation had been given, should have allowed himself to remain silent while an agitation was being fanned by the leaders of his party against the Cabinet for failure to give the invitation.

SOUTH AFRICA.

The Vienna correspondent of *The Times* sends the following to that journal, under date of August 30th:—To-day a leading Vienna newspaper reproduces a statement emanating from The Hague to the effect that Count Lamsdorff has assured Dr. Leyds that the Tsar will receive ex-President Kruger in audience during his stay at Compiègne. It is by this sort of intelligence, together with the so-called original reports from South Africa representing the position of the British Army as desperate, that the Boer Press Bureau manages to keep up a senseless agitation, and a state of public feeling which is not without effect upon responsible journals. In view of this systematic fabrication of puerile inventions for the purpose of misleading public opinion, the Vienna news sheet *Informations* thinks it desirable to give the following terse summary of the real facts.

"All South Africa is occupied by the British Army. There is not a town of 2,000 inhabitants which is not garrisoned or has not an English detachment in the vicinity. The entire railway system is in English hands, and regular traffic is maintained. English administration has been established throughout the whole of the Transvaal and Orange River Colony. Some of the Rand mines are again being worked. There are Boer commandos, numbering from two or three men up to 500, and amounting in all to 10,000 or 12,000. These attack British outposts, and occasionally capture supplies, &c., in the Transvaal and the Orange River and Cape Colonies. But that is simply a form of brigandage, such as prevailed in Naples for nearly two years after its annexation to Italy. It neither expelled the Italians, however, nor restored the Bourbons. Its only result was to cause a great deal of bloodshed and heavy extra taxation. The position in South Africa is precisely the same. The Boer guerrilla bands may continue their resistance and further devastate the country, but it is absolutely impossible for them to expel the English."

RAILWAYS.

Progress is being made with the construction of State railways. The Tateoka-Oishida section of the Oshiu road, a distance of 8 miles, will be opened on the 20th instant, and the Takenosui-Nojiro section, a distance of 18 miles, on the 1st of November. With regard to the Nojiro-Akita section, the major part of the line will be finished before the snows set in, and it will be opened for traffic next April, according to present expectations. We may explain for the convenience of our readers, that the lines here referred to are part of a road branching from the Nippon Railway Company's trunk line to Awomori. The branch sets out from Fukushima, and proceeding north and west reaches the north-western coast at Akita and Nojiro. From the latter place it turns inland, and rejoins the main road at Awomori. Work is going on from both directions, southward from Awomori and northward from Fukushima, and the distance between Akita and Oichida which now remains to be finished is about 150 miles.

The celebrated Shinonoi road, which presents such engineering difficulties, is proceeding satisfactorily. The Shinonoi-Matsumoto section will probably be opened next May, but there are no predictions as to the time when this road will be completed to Nagoya.

MARQUIS ITO.

There have been rumours that Marquis Ito was somewhat seriously ill in Chicago. The statement was actually telegraphed from London, but we did not reproduce it because no news having reached Japan direct, it was impossible to credit such a rumour. An explanation is now furnished. It appears that a story got abroad to the effect that Marquis Ito had proceeded to America for the purpose of negotiating a sale of bonds. Hence, from the moment of his arrival in Chicago his hotel was besieged by brokers, and in order to escape their importunities he found it necessary to plead illness. This was telegraphed to New York, thence to London and thence to Japan. Mr. Takahira, the Japanese Representative in Washington, who joined Marquis Ito in Chicago, apprehending that some such rumour might reach Tokyo and cause uneasiness, has telegraphed to explain that the illness of the Marquis was diplomatic.

ANNUAL REPORT OF THE CENTRAL SANITARY BUREAU.

The Central Sanitary Bureau has succeeded in publishing its Report for the year 1896. That is a feat. We had almost forgotten that such a bureau existed and it is pleasant to be reminded of its vitality by this evidence. The book bears marks of not having undergone revision at the hands of any Englishman or American prior to publication. Its language is occasionally striking, as when it tells the public that "the prevalence of small pox brought out a coercive vaccination throughout the country," or that "samples applied for examination at the Hygienic Laboratory this year amounted to 1619 cases in all." However, it must be confessed that as a purely Japanese specimen of English composition, the Report is decidedly creditable. Most of the statistics it gives are quite stale, but some are novel. It is only when such reports reach us that we recall the ravages sometimes committed by diseases like typhoid and dysentery in Japan. The number of typhoid cases in 1896 was 42,505, for the whole empire, and of these 9,174 proved fatal, being a death rate of 21.58 per cent. As for dysentery, it attacked 85,876 persons and killed 22,356 of them, or 26 out of every hundred. But the most deadly of all diseases was diphtheria. Out of 8,613 cases 3,296 ended fatally, or 38 in every hundred. Terrible as this rate was, it showed a marked improvement compared with the figure for 1895, when 49 died out of every hundred attacked. This improvement is ascribed to treatment with *serum*, and the inference is confirmed by the Tokyo record where out of 1,151 cases only 270, or 23 per cent., ended fatally. Things are incomparably better now. The averages of the ten-year period ended in 1896 were as follow:—

Dysentery.....	16.54 cases p. 10,000 of the population.
Typhoid	9.45 do do do
Small-pox	3.62 do do do
Cholera	2.86 do do do
Diphtheria	1.06 do do do
Typhus-fever.....	0.15 do do do

The number of diplomas given to medical practitioners during the year was 829, bringing the total of practising physicians in the empire to 39,214, or one to every 1,036 persons on the average. In Tokyo there was one doctor to 340 citizens, but the Riukiu Islands had to be content with one to 4,761 persons, and Awomori prefecture had only one in every 2,358 of its population.

JAPANESE POLICEMEN AND TAX-PAYERS.

In a sympathetic and generally correct article with reference to Japan as seen by a visitor two years after the abolition of Consular Jurisdiction, the *Hongkong Daily Press* writes:—

Perhaps the most striking feature in the Japanese system, to a stranger at least, is the ubiquity of the policeman; and it might naturally be supposed that the country is police-ridden. Such, however, on more intimate knowledge proves hardly to be the case. The policeman in fact in Japan serves many other purposes than keeping the peace. He is indeed the collector of statistics in general, an occupation dearly treasured at all times by the Japanese. One of the most noticeable customs to the early voyagers was the system of reporting every particular adopted by the Japanese officials who came on board, always attended by their secretaries and notaries; and at the present day this role has passed to the policeman, who is bound for the edification of his superiors to recall every incident, however trivial, that occurs within his knowledge from day to day. It is little to be wondered at then that according to the most recent account—that for 1898—the number of police in the empire should have amounted to no less than 34,000, or one to every 1,360 of the population. Notwithstanding the ubiquity of the policeman he does not appear to interfere in any objectionable way with the private concerns of the people, who, except that they now and then sigh for the old days when taxation was almost absent, are allowed to carry on business with the slightest of interference and are not meddled with in their opinions, provided they do not contravene the laws. The policeman on the contrary seems to be generally looked up to with respect, and certainly inspires no ill will. Beyond requiring the name, address and nationality of every foreign traveller at each stopping place, the policeman is now very little in evidence with the tourist, who may besides always look to him for advice or assistance should he ever require it.

We certainly should not have selected the ubiquity of the policeman as a specially noticeable feature in Japan, but the experiences of casual visitors are sometimes uncommon. We should like, however, to know what our contemporary means when it speaks of "the people sighing for the days when taxation was almost absent." If the reference is to the foreign residents, it is undoubtedly correct, for many a man laments the fine times when a payment of 5 *yen* annually to his Consul relieved him of all further demand for taxes. But if the reference is to the people of Japan, as the language seems to indicate, then the *Hongkong* journal is mistaken, for the Japanese people are not nearly so heavily taxed now as they were under Tokugawa rule.

THE AMUR SOCIETY.

The *Kokuryo-kai* (Amur Society) seems to be attaining considerable dimensions. It has now six hundred members, and at a largely attended meeting on the 13th instant, its members listened to some interesting speeches and appointed a council chosen from among 50 nominees. This Amur Society recently made itself somewhat notorious by publishing a brochure which set forth the relative positions of Japan and Russia in the Far East, and predicted success for Japan in the event of war, which contingency the writers of the brochure were not reticent in advocating. The Authorities deemed it necessary to interdict the circulation of the book, but it need scarcely be remarked that the popularity of the Society was not seriously impaired by that incident. The members are now following more circumspect lines, however. They devote themselves to investigating the condition of Manchuria and to publishing information likely to prove useful to persons visiting that region for trade or other purposes, as well as to encourage such visits.

THE STEEL PLATE FACTORY.

The Government is evidently determined to push its project for the erection of a steel plate factory at Kure. Last year the Lower House of the Diet refused to make the desired appropriation—6,340,043 *yen*—for this purpose, but it will be again asked to do so this year, and instead of spreading the work over four years, as was originally projected, the present intention is to finish it in three. On the other hand it is alleged that owing to economies in the Naval Department and profitable transactions of exchange, a large part of the required amount can be furnished without making any call on the Treasury.

This project has been strongly denounced by experts, chiefly on the ground that it can not pay, since whatever scheme of ship-building Japan may have in view, she can not possibly expect to require such a quantity of materials as would give employment to a steel plate factory. But it is not to be supposed that a Power growing as Japan is growing not in resources only but also in ambition, should remain contented to rely on Europe or America for its supplies of ship-building material. Japan must make herself independent, and we shall not be at all surprised to see her, one of these fine days, building steel vessels for China as well as for herself. At any rate, this is not merely a question of dollars and cents. Other things have to be taken into consideration.

During an experience of five-and-thirty years we can not recall any enterprise started by Japan that was not accompanied by predictions of failure from foreign critics. The mood of the average European and American towards all her efforts is pessimistic. But that is quite natural. Europe and America occupy the position of experts; Japan stands in that of a tyro. The expert invariably regards the tyro's essays with supercilious incredulity. Japan has to go right ahead, pursuing her goal steadily through good report and evil report. She will get there.

GERMAN NOTES.

The Marten case is becoming quite famous. German public opinion is evidently convinced that an injustice has been done and is determined that it shall be remedied. One of the points to which special importance was attached by the prosecution was that the accused had been unable to establish his plea of an alibi for a period of 7 minutes. A committee of German watchmakers now points out that it is no uncommon thing for two cheap or ill regulated watches to differ by as much as 15 minutes, and that to base a charge involving a man's life on statements relating to such a brief interval as 7 minutes is dangerous.

Another point which evokes much comment is the following excerpt from the speech of the prosecuting counsel:—"In cases where the criminal has been discovered the severity of the law must take its course. But the punishment for murder is death, and we all shrink from the death penalty. We are reluctant to inflict more than the minimum penalty where there is no direct proof of guilt. I therefore ask you to find a verdict not of murder but of manslaughter." Dr. Staub, editor of the *Deutsche Juristenzeitung*, calls it incredible that a public prosecutor should have spoken in such a way, and expresses astonishment that the official in

question has not taken steps against the newspapers which put such words in his mouth.

The *Novoe Vremya* continues to descant on the enormous advantages which would accrue to Germany and Turkey from the projected German Baghdad Railway. "It would enable Germany to colonize Asia Minor in a manner which would lead to the production of wheat on a scale that would result in a dangerous competition with Russian wheat in the European markets. It would facilitate Turkish military concentration either against Russian or against tribal revolts, increase the religious and moral prestige of the Khalif among the Mahomedans of Central Asia, and might, in spite of the mutual hostility of the Shiites and Sunnites, aid in a *rapprochement* between Turkey and Persia.

Russia, the journal continues, is now menaced by railways on two sides. While the Germans aim at strengthening the military position by connecting Constantinople with the Persian Gulf, the British, on the other side, are already preparing to build a railway from Quetta through Baluchistan to Seistan, and there is further ground to believe that they will not be long in connecting Eastern Persia with Western India. There will then be a new base for operations against Russian troops in Central Asia, besides the capture of markets in which the Russians will no longer be able to hold their own. "All that is wanted to complete the picture," the *Novoe Vremya* concludes, "is a line from Seistan to Basra, but there at least we are still masters of the situation, and our influence over Persian affairs will remain beyond question as long as the Germans do not begin to put in an appearance on the Persian Gulf by railway."

NOTES ON CURRENT EVENTS.

A third batch of honours in connexion with the Chili campaign is gazetted. The principal names are those of Colonel Akizawa of the Cavalry, Colonel Takenaka, Major-General Watanabe, Colonel Nagata, Colonel Ohara, and Colonel Awaya, of the Infantry, all of whom receive the Third Class of the Golden Kite with allowances of 700 *yen* annually. Lieut.-Colonel Aoki of the Artillery, who distinguished himself in connexion with the civil Government of Tientsin, is similarly honoured. Ensign Inouye, who performed the gallant action of re-lighting the fuse at the blowing up of the Tientsin gate, receives the Fifth Class of the Golden Kite and a yearly pension of 300 *yen*.

There is evidently some agitation in political parties. Both the Progressists and the *Seiyun-kai* are said to be agreed in thinking that the Ministry has slighted the Lower House in consulting the Peers only about the Budget. Mr. Ozaki Yukio's view is alleged to be that if the document was to be shown, it should have been shown first to the Representatives, whereas Mr. Oishi Masami, who seems to be assuming the leadership of the Progressists, thinks that it ought not to have been shown to either House until the time of debating it had arrived. At any rate each Party finds the Ministry wrong and will attack it. So say the alarmists.

A telegram to the *Asahi* says that the 24th of September was the last day for sending in applications for compensation

in connexion with the sanitary measures taken by the Hawaiian Government. The total number of applicants was 6,748, and their demands aggregated 3,167,132 gold dollars. Of the latter sum only six hundred thousand dollars were demanded by Japanese subjects, and it is thought that many of the other applications are fraudulent. The case is said to be proceeding with unexpected promptitude, and the Japanese claims will probably be settled by the end of November.

A banquet was given at the Imperial German Legation on Saturday evening, by a *réunion*, in honour of the eightieth birthday of the celebrated Dr. Rudolf Virchow. About thirty people sat down to dinner, among them being Their Excellencies Dr. Kikuchi, Minister of State for Education, Viscount Aoki, the President of the Imperial University, and several of the most eminent figures in the world of Japanese science. The Minister of Germany proposed the health of the great physiologist. His Excellency spoke in his usual quiet style, choosing his words with much felicity and paying a high tribute to the eminent German savant whom all nations regard with admiration and respect. At half-past nine Dr. E. Baelz delivered an address on the subject of Dr. Virchow. This was the feature of the evening. As we shall publish it in full, we confine ourselves here to saying that it was of deep interest and that at the conclusion the renowned and popular lecturer was greeted with most hearty applause. The party broke up at half-past eleven after a delightful evening.

We have received a specimen page of a new journal which is about to be published in Yokohama. It is called the *Yokohama Express* and it professes to be "devoted to the interest of shipping, commerce and industry." In the Japanese text we find it stated that there are three English journals published in Yokohama, but that, being in the hands of Englishmen, they are of no benefit to the Japanese. We presume, therefore, that the *Express* is to be in the hands of Japanese. Certainly there must be something in the air of Yokohama that promotes a mania for journalistic enterprise. Already the settlement is quite overburdened, having no less than six newspapers all of which appear with the same advertisements and pretty much the same news. Now we are to have a seventh. One would imagine that newspaper editing and newspaper managing were the easiest operations in the world. Any tyro thinks that he has all the qualifications for such work.

We learn that Mr. Luang Chamnong, who recently arrived in Tokyo to serve at the Legation of Siam, is not a Student Interpreter, as stated by us, but a Secretary Interpreter.

A shipping disaster attended with considerable loss of life is reported from the north. On the 9th instant, the *Ruimon Maru*, a small coasting steamer of 235 tons, ran on a rock at Omagasaki off the Awomori coast. Of the crew, numbering twenty-two in all, fourteen were drowned, and out of nine passengers only one escaped.

The officers in command of the torpedo-destroyers *Niji* and *Akebono* have fared badly at the hands of court martials. The *Niji* went ashore on the Shantung coast last year and became a total wreck, and the *Akebono* collided with the *Chihaya* last June, sustaining considerable damage. Commander Arakawa of the *Niji* was tried by

court martial at Sasebo and condemned to remain in arrest for three months, and Commander Kozumi of the *Akebono* who was tried at Yokosuka, received a sentence of 15 days' confinement.

The inhabitants of Nagai-mura in Yamagata prefecture, exasperated about some question of the site of the local office, proceeded on the 7th instant to the newly erected office, and having drenched it with kerosene, set it on fire. Thirty of the 120 persons engaged in the escapade were arrested, not without blows and wounds.

We are glad to announce that Count Okuma has recovered and was able to pay a visit of thanks at the Palace on the 15th instant.

The discontented shareholders of the Nippon Yusen Kaisha, whose main object is to procure the distribution of the Company's reserve funds among the shareholders, are said to be again agitating. They have put up a considerable sum in order to ventilate their views before the pending semi-annual meeting of the Company, and they are also endeavouring to have Mr. Kishimoto Tatsuo elected to the Board of Directors in succession to the late Mr. Nakamigawa.

Several journals have been of late telling their readers that the Cabinet had resolved to refrain from restoring the Capital Funds upon which large drafts were made for the purposes of the Chili campaign. These Funds ought to be restored out of the Chinese Indemnity, as additional taxation was imposed by the Diet last Session to meet the outlays on account of the Chili campaign. But the newspapers referred to above have attributed to the Cabinet the intention of applying the Indemnity to the purpose of carrying out the *post-bellum* undertakings, and leaving the capital Funds unrestored. It is now denied on good authority that any such intention exists. The Chinese Indemnity will be employed, first, to repay funds borrowed from the Bank of Japan, and secondly to restore the capital Funds, after which, should there be any surplus, it will be devoted to the *post-bellum* undertakings. The expenditures on account of the North-China campaign are found to have been less than was estimated, and the taxes imposed to meet them will probably show, by and by, a surplus that may be applied to other purposes.

It is alleged that Mr. Yoshida Masahide, former head of the Telephone Bureau in the Home Department, has just returned to Japan, having effected an arrangement with Mr. Sheng for the laying of telephones in China. Mr. Yoshida went to China to promote this enterprise in 1899, but was not successful. His efforts are now said to have been more fortunate. Apparently the agreement is that China shall furnish the funds and Japan the experts and materials. As to the places to be connected by telephone, no final decision seems to have been yet arrived at, but there is talk of Peking, Hankow and Canton. Mr. Yoshida seems to be working alone. He has not attempted to form a company.

BOER WOMEN AND BRITISH WOMEN.

Since much has been said against the British Military Authorities and the British Government for putting Boer women and Boer children into refuge camps, and since it has even been alleged that the women

and children were not given enough to eat so that their sufferings might compel the Boers to surrender, it is interesting to find that the British women in South Africa are complaining bitterly of the superior treatment which Boer women and children receive. The Duke of Montrose took up the cause of the British women last July, and he has now sent to *The Times* a letter speaking of communications received by him from South Africa in confirmation of his views. We quote a part of the letter:—

The first communication I received was a comparison of a visit to two camps, which appeared in the *Daily Despatch* of East London, and which I have reason to believe is substantially accurate. I append an extract; comment is superfluous:—

I have visited the Boer exiles' camp, and found 350 women and children in the various buildings, and very healthy.

The building consists of three erections, containing 50 rooms, besides hospital, dining room, kitchen, storeroom, wash-room, &c.

The hospital contains ten beds. Two patients in hospital, one young girl convalescent and an old woman, who came down in October last, ailing.

The exiles state they are well treated and quite satisfied with their lot. The food is given to them as to boarders; rations are not served, and as much food is given as asked for, and no stint whatsoever.

Day school is carried on daily in the dining room; 60 scholars.

There was no complaint of want of clothes, and I did not notice any barefooted or untidy child.

Even the washing places are under a shed, and every convenience provided for washing.

I am writing this to show that the British Government are doing everything in their power to help the exiles, and to show that although these exiles' relatives and friends are still in the field yet the powers are merciful and kind to these exiles, showing them no enmity, for which they feel grateful.

I have also been the recipient of the following letter, which I quote *in extenso*, as it places before us the unfortunate position of the loyal women in a clear and unexaggerated form:—

"Bellair, Durban, Natal, Aug. 1, 1901.

"We, four British refugees, driven from our homes, separated from our husbands, who are fighting and working for their country, and suffering the loss of most of our possessions, take the liberty of writing to thank heartily your Grace for having brought our pitiful case to the fore; and we feel glad that one person of influence has thought fit to put us on equal terms with the Boer women and children, who are kept in comparative luxury by our people, while we live as best we can, and know that the remainder of our lives will be passed in poverty through no fault of our own.

"We deeply deplore this unhappy war, while the Boer women do all in their power to encourage and prolong it.

"We are, your Grace, most gratefully your obedient servants,

"H. HONEY.

"M. E. BAKER.

"M. EMERSON.

"E. LITTLE."

I have many other letters speaking to the comparative comfort of the Boer refugee camps; but I think I have sufficiently trespassed on your space to show that I was amply justified in protesting against what one of my correspondents aptly terms "sentimental twaddle" at the expense of loyal men and women and the dependants of our gallant Army.

GERMAN OPINION OF ENGLAND.

THE German press continues to vilipend England in a manner that has ceased to have the faintest semblance of reason and must be attributed to sheer hatred. A correspondent of *The Times* says:—

I have before me a number of the recent issues of German "comic" papers which simply illustrate in a popular manner the rabid hatred of England steadily cultivated by the "serious" Press. It can hardly be contended that cartoons which represent British soldiers bayoneting Boer babies, and indulging in every form of brutal licence, or doggerel in which the German Parnassus has been ransacked for sanguinary epithets to fit the crimes of British generals, or scurrilous paragraphs vilifying King Edward with a brazen-faced indifference to the German laws of *lèse-majesté*, are inspired by a lofty moral sense of the injustice of the war.

But now at length writers in England have taken a line for which we have long looked. They have begun to search German records in order to discover what the methods of the Germans themselves have been in war. The search has resulted in some interesting discoveries, to the re-publication of which we propose to devote a little space. In the first place, according to Dr. Busch's diary, BISMARCK, as early as October 2nd, 1870, laid down the following principles:—

The more Frenchmen suffered from the war the greater would be the number of those who would long for peace, whatever our conditions might be. "And their treacherous franc-tireurs," he continued, "who now stand in blouses with their hands in their pockets, and in the next moment when our soldiers have passed by take their rifles out of the ditch and fire at them. It will come to this, that we will shoot down every male inhabitant."

A few days afterwards, the following memorandum was prepared by BISMARCK's orders:—

For purposes of successful defence private property may be destroyed without previously arranging the terms of compensation, houses may be burned and trees cut down, an entrance may be forced into private residences, street traffic may be stopped, and every other means of transport, such as ships, carts, &c., can be either seized or destroyed without the previous permission of the owner, that rule applying to our own as well as to the enemy's country. The removal of persons who afford the enemy either moral or material support, or who merely give rise to suspicion that they do so, comes under the same category of laws which apply to countries in a state of war.

Dr. Busch further relates that on October 14th:—

The Chancellor referred to various horrors that had again been committed recently by bands of guerillas. He quoted the proverb, "Wie es in den Wald schallt, so schallt es wieder heraus" (the wood re-echoes what is shouted into it), and said that to show any consideration to these treacherous franc-tireurs was a "culpable laziness in killing." "It is treason to our country." "Our people are very good marksmen, but bad executioners. Every village in which an act of treachery has been committed should be burnt to the ground, and all the male inhabitants hanged."

Then we have BISMARCK's idea as to the right manner of dealing with the property of non-combatants who had fled before the approach of the German forces:—

Mention was made of the decree of the Minister of War or of the commandant of the town, ordering that particulars should be published of

all valuables found in houses deserted by their owners, and that if not reclaimed within a certain time they were to be confiscated for the benefit of the war chest. The Minister said that he considered this decree to be perfectly justified, adding:—"As a matter of fact such houses should be burned to the ground, only that punishment would also fall in part on the sensible people who have remained behind; and so unfortunately it is out of the question."

The next extract that we shall make refers to railway trains. The Germans made the destruction of railways a capital crime, and here is Dr. Busch's vindication of that policy as dictated by BISMARCK:—

Finally, as to the hostages who were obliged to accompany the railway trains, they were taken not to serve as a hindrance to French heroism, but as a precaution against treacherous crime. The railway does not convey merely soldiers, arms, ammunition, and other war material, against which it may be allowable to use violent measures; it also conveys great numbers of wounded, doctors, hospital attendants, and other perfectly harmless persons. Is a peasant or a franc-tireur to be allowed to endanger hundreds of those lives by removing a rail or laying a stone upon the line? Let the French see that the security of the railway trains is no longer threatened and the journeys made by those hostages will be merely outings, or our people may even be able to forego such precautionary measures.

Now we invite our readers to peruse in the context of the above the following account of the latest Boer enterprise against a train in the Transvaal:—

The train, which was a mixed one carrying passengers and supplies, was proceeding from Pretoria to Pietersburg with an escort of 45 men of the West Riding Regiment. It had just entered a deep cutting close to Hammans Kraal, some miles north of Waterval, when it was derailed by the explosion of a mine under the armoured truck in the centre of the train. The Boers, believed to be under the command of Jack Hinton, and about 100 strong, were lying in wait on both sides of the cutting, and the signal to fire the mine was apparently given by a Kaffir. The effect of the explosion was to throw the escort out of the armoured truck, whereupon the Boers opened a fierce fire. A few men who managed to retain their rifles replied, but the narrow cutting gave the enemy such an advantage that in a few minutes all was over. In the meantime the passenger coaches, in which were officers and civilians, men and women, were riddled with bullets. The officers made their way as quickly as possible to the armoured guard's van in the rear, which afforded comparatively little cover as the sides of the cutting near to it were loopholed.

Colonel Vandeleur, the senior officer in the train, who was apparently somewhat later than the other officers, first thought of the safety of the women and children, and went to their compartment to warn them to lie down flat. As he was returning to direct the operations he was shot in the chest while on the platform between the carriages, and death was practically instantaneous. The Boers swarmed on to the train, looted the money and clothing of the passengers, and took some bread. Some armed themselves with the Lee-Metfords of the escort, but curiously enough took little ammunition.

About this time occurred what unfortunately must be regarded as a brutal murder. Jacoba Page, the maid of two German women refugees returning to Pietersburg with their children, appears to have left the compartment to appeal to the Boers not to shoot, as there were women in the carriage. She met a young Boer in the corridor, who recognized her as coming from a place called Woodbush, and he immediately shot her. It is stated that the man also threatened to shoot the women in the carriage, but the latter seized his rifle and held it until the other Boers arrived on the scene, when the man abandoned his intention.

Of course the Boers *en masse* are not to be

held liable for the savagery of individuals among them, but they are most undoubtedly to be held liable for wrecking and firing on a train carrying women and children. If a German General were commanding, his recourse against such doings would be to send a number of Boer prisoners in every train. We are not sure that KITCHENER would not be acting wisely did he take the same course. And were a German General in command, he would execute the Boers that wrecked the train if he could find them.

It may be urged with regard to the above extracts that they represent the views of BISMARCK only, and that he was proverbially a man of blood and iron. By a curious coincidence evidence inadvertently disposing of any such objection is furnished by a German who sends to *The Times* the following copies of proclamations issued by the Germans in 1870 and 1871:—

I.
"Avis."

"Les habitants de Pontoise sont prévenus de se rendre, en cas d'alerte, le plus vite possible dans leur maisons, de ne pas rester dans les rues, et d'éclairer les fenêtres pendant la nuit. Ceux qui n'obéiront pas à cet ordre seront punis selon les lois de la guerre, et ceux qui seront pris portant les armes ou auront été vus tirer sur les soldats, seront fusillés, et les maisons d'où l'on aura tiré seront brûlées. VON AUER, Commandant, "Pontoise, le 6 décembre, 1870."

II.

"Proclamation."

"Les chemins de fer servant aux troupes allemandes ne doivent pas être endommagés. "Tout individu qui endommagera ces voies de communication sera puni de la peine de mort. "Les communes auxquelles les coupables appartiendront, ainsi que celles dont le territoire aura servi à l'action incriminée, seront passibles, dans chaque cas, d'une amende égale au montant annuel de leur impôt foncier."

"Les maires sont engagés à établir des gardes pour conserver les chemins de fer sur leur territoire, afin d'épargner ces peines sévères à leur communes."

"BARON VON DER TANN, Le Commandant en chef, "Général d'infanterie."

"Orléans, le 30 octobre 1871."

III.

"Avis."

"Je fais savoir aux habitants du pays que toutes les personnes qui, n'étant pas militaires, seront saisies portant les armes contre les troupes allemandes, ou commettant d'autres actes d'hostilité ou de la trahison, seront irrévocablement mises à mort."

"On ne considérera comme militaires que ceux qui porteront l'uniforme ou qui seront reconnaissables à portée de fusil par des signes distinctifs inséparables de leurs habits. VON WITTICH, Le Général en chef."

"Orléans, le 27 octobre 1870."

IV.

"Décret."

"Le gouverneur-général du nord de la France arrête au sujet de la presse périodique ce qui suit:—

3. Il est défendu de publier des écrits d'une tendance hostile à l'armée allemande ou des critiques contre les mesures des autorités allemandes. "En cas de contravention, la continuation du journal sera prohibée, et le rédacteur, aussi bien que l'éditeur, sera mis à l'amende ou puni d'emprisonnement."

"VON FABRICK, Le Gouverneur-général."

"Versailles, le 18 janvier 1871."

V.
"Publication."

"Dans la nuit du 6 au 7 courant, on a tiré des montagnes environnantes à plusieurs reprises des coups de fusil contre des troupes de réquisition entrées à Belval. Carles Miroy, curé de Cuchery, âgé de 43 ans, à la paroisse duquel appartient Belval et qui avait caché et distribué aux habitants des armes, a été arrêté comme instigateur de ces actes hostiles, et, en vertu d'un arrêt du conseil de guerre, fusillé aujourd'hui matin à Reims, pour crime de trahison envers les troupes allemandes.

"VON ROSENBERG GRUSZCZYNSKI, Le Gouverneur général, Lieutenant-général.
"Reims, le 12 février 1871."

By way of summing up these various quotations, we reproduce what *The Times* says on the subject:—

"The Germans have exceeded all other nations, not even excluding the French as represented by the most rabid Nationalists, in the grossness and the licence of their attacks. The character of these attacks, which are made in a country where the Press laws, and forms of pressure quite as effective as the Press laws, are unsparingly enforced wherever the authorities so desire, utterly precludes the view that they are inspired by a passion for justice, or by any passion except that of hatred to the British name. The dishonesty of the charges with which the German Press, obsequiously followed by its Austrian satellites, loads us is shown in an instructive shape by a comparison of the conduct of the French war by Germany in 1870-71 and of the conduct of the Boer war by ourselves. Ample materials for such a study are supplied in the series of German proclamations given textually by Herr Hornung and in the extracts from Dr. Büsch's well-known diary collected by our correspondent "Memor." They show that there is scarcely an act of severity exercised by our generals to-day for which precedents are not to be found in the conduct of the Germans, and that Bismarck's only complaint was that the harshest of these measures was not harsh or general enough. The Germans, in fact, went much further than we have ever done; for they refused to recognize as belligerents all who were out of uniform, while we have accorded all along belligerent rights not merely to Boers out of uniform, but to the foreign adventurers who aided them and to Boers who had assumed our uniform and treacherously approached us in that disguise. The destruction of railways or roads was a capital crime in the German code; so were "acts of hostility or treason" and "treachery towards the German troops," for which the parish priest of Belval was shot. His crime was the encouragement of hostile acts and the concealment and distribution of arms amongst his neighbours. He deserved his fate; but what a torrent of righteous wrath would foam from the German Press, were we to shoot a Dutch Reformed minister for a similar offence!

FRENCH NOTES.

The French socialists made themselves tolerably conspicuous on the occasion of the Tsar's visit to France. They denounced the Franco-Russian alliance as "scandalous" especially at a time when "His Majesty's Cossacks have trampled on, charged, and massacred in the streets of the chief Russian cities peaceful and unarmed crowds; when thousands of victims are suffering in the fortresses of the empire; and when long lines of martyrs—proletarians and students, men, women, and children—are conducted under the lash to the galleys whence there is no return." France does not appear to have paid any attention to these ebullitions. But they are in marked contrast with any recognised standard of good manners, for the Tsar was the guest of the French nation and should have been treated as such by all Frenchmen.

M. Déroulede made himself rather ridiculous in connexion with the Imperial visit. He declared that so long as M. Loubet walked at the side of the Tsar, France's guest, all attacks upon him, M. Loubet, should be silenced as being ungracious in the presence of a foreigner. Naturally the critics of this rather fantastic exile asked whether he believes that attacks upon the President of the French Government can ever be made *à l'insu* of the foreigner.

Apparently the only Russian journals that admitted a discordant note into their discussion of the Tsar's visit to France were the *Novoe Vremya* and the *Sviet*. They referred to the renewed gravitation of some of the Balkan States towards Russia, and to the interest that the French are beginning to display in the Southern Slavs; and they deduced a hope that the Franco-Russian alliance would be strengthened by the adhesion of an union of the Southern Slavs, thus opposing a more solid rampart to "the insatiable hunger of Pan-Germanism" and to the "German seizure of the whole world.

Although the telegraph persistently represented the difference between France and Turkey as mainly one of pounds, shillings and pence, a very different view of it seems to have been taken in Europe. It was regarded as the result of a "Boxer" ebullition on the part of the Sultan and his Ministers, who are said to have conceived a new policy of Ottoman nationalism, having for its basis the rejection of European civilization as corrupting Ottoman ideals. This policy is believed to date from the successes gained by the Turkish arms against Greece, and it recently took the form first, of requiring that French religious orders on Ottoman territory should pay a tax of five per cent. on real estate; secondly, of re-establishing in Jerusalem the 5 per cent. Customs tax on French monks, and thirdly, of forbidding religious orders to settle on Ottoman territory without applying for authorization. It is true that these measures can scarcely be denounced with good grace by France, who has just enacted the Associations Law; but the point is that Turkey has no such legislative competence, being tied by the capitulations. The Porte's refusal to cancel these rules was a principal reason of M. Constans' withdrawal from Constantinople.

THE TOHOKU DAIKAI.

The meeting of the northern section of the *Seiyun-kai* is to be held in Sendai at the end of November. This was the meeting which Marquis Ito had promised to attend. His failure to do so, at first on account of illness and secondly in consequence of his voyage to the West, gave much offence.

THE SALE OF BONDS IN NEW YORK.

The *Fiji Shampo* denies that the Treasury's attempt to place fifty million yen worth of bonds in New York has failed. It also denies that Marquis Ito and Mr. Tsuzuki Keiroku were entrusted with any commission relating to this matter. The negotiations are actually in progress and no insuperable difficulty has presented itself. But the moment is not favourable for launching such a transaction, and some delay is inevitable. The forecast is, however, that by the close of this month market conditions will be more suitable, and an American syndicate will probably agree to purchase the bonds at that time.

SOUTH AFRICAN CONSTABULARY.

We have seen a copy of a letter sent to his relatives in Japan by a trooper in the South African Constabulary, which seems to show that that force does not possess very general attractions. He says:

"I wish I could have got into something else than the S. A. C. Take for example some of the colonial forces in Cape Colony. If I had only known they were looking all over for men there, it would have been better for me to have worked my way over and enlisted in Cape Town for 6 months, as they are doing, or for as long as the war lasts. I could then have got some idea as to whether I liked the army or not, and it would have cost me nothing to have got out, and I would probably have seen more active service than I will here. However it is no use crying over spilt milk, is it? I shall know better next time, experience always costs something. Of course this S. A. C. is too new a corps to be anything yet. Its personnel is over 10,000 men, and the fact that it is a Mounted Police Corps makes it difficult to organize while the war lasts. There was some dispute between Kitchener and B-P, as to whether we were to take the field or not. Kitchener refused to let us have any supplies unless we took the field, and he in the meantime took all our stuff for his own troops. The consequence is we are now in the field and have been for three months. At present we have only 43 horses for the 100 men that comprise our troop; 23 of them are unfit for duty, and are on the sick list, so that we are compelled to take it in turn to patrol the country, and act in conjunction with any column there may be within reach, both as mounted men and infantry. So far I have done far more walking than riding. The horses that are supposed to be fit for duty are wretched things, and there is absolutely no pleasure in riding them. Old Charlie would be a prince among horses here, and I often wish I had him, for a steadier horse it would be hard to find.

"Taking it all through, I can't say this suits me at all. So far as I can see, a fellow will never rise through his own merits at all. From what I can see, to get on one must do all the grafting he can. To give you some idea of how things have been going on, I may give you an example. They have appointed all the first class troopers in this troop without either testing their shooting qualities or their riding, in fact, some of them are the most ignorant and common men it is possible to find, with absolutely nothing, as far as I can see, to recommend them.

ORIENTAL HOTEL, KOBE.

The report for presentation to the shareholders at the tenth annual ordinary general meeting of the Oriental Hotel, Kobe, to be held on Friday, 25th October, reads as follows:—

The total earnings in Working Account during the year amount to yen 163,660.58, showing a gross profit of yen 50,076.98.

It will be observed on reference to the Accounts, that there remains a net profit for the year amounting to yen 15,614.24.

An interim dividend of 5 per cent. on Ordinary Shares was distributed to Shareholders on 25th March, 1901, absorbing yen 3,700, thus leaving a balance of profit available on the year's working of yen 11,914.24.

From this amount the Directors recommend a further payment of 7 per cent. on Ordinary Shares, making 12 per cent. for the year, and a payment of yen 37 per share on Founders' Shares, absorbing together yen 8,140, and that the balance of yen 3,774.24 be carried to the credit of Reserve Account, bringing this to yen 25,535.18.

The Company's property has been maintained in an efficient way and several important improvements have been made in the main building including the construction of a spacious and well lighted Reading Room connecting with the Public and Private Dining Rooms.

The Directors regret to advise the shareholders that, owing to the obstruction and opposition placed in the way of building a branch Hotel at Kyoto, and to the apparently strong feeling existing there against the proposed enterprise, they have reluctantly abandoned the scheme, and they will ask the shareholders to pass the necessary resolutions to admit of a reduction in the capital.

The Hongkong Fire Brigade turned out sixty-one times in 1900. There were 51 fires and 74 incipient fires during the year.

THE INTERPORT FESTIVAL.

FIRST BASEBALL MATCH.

The Interport games began in Yokohama on Friday afternoon (October 11th, 1901) in brilliant autumn weather, the heat of the sun being tempered by a gentle southerly breeze. The Kobe baseball players arrived by train in the forenoon none the worse for their long ride and ranged up on the field with a punctuality that put Yokohama to the blush. The beautiful weather attracted a large attendance of ladies and gentlemen, blue-jackets and marines from His Majesty's ships and the U.S.S. *Yorktown*, and many Japanese, who were not long in discovering the mottoes which the ingenuity of Mr. C. M. Duff had enabled the groundmen to decorate the Pavilion and Scorer's Box. Over the stairs leading to the upper room was displayed the following greeting, "Hail! welcome to good old Kobe." Next in order, in the first bay, was hung "Right happy may we be," and at the corresponding projection at the other side of the building, "And happy meet again." Right across the front of the Pavilion proper was hung, "To the Kobe Teams Yokohama extends its heartiest welcome," a sentiment that was echoed time and time again during the afternoon as one after another the Kobe men entered the playing field. At the bar, a touch of scholarship was introduced, the decorator displaying his Latinity and eke sly wit—"Sua cuique voluptas." The scorers' box flaunted gay with the ancient, time-honoured motto of English devotees of field-sports, "May the pleasures of sportsmen never know an end;" while immediately below the desk where busy scribes will be located during the next few days, was the cheery apothegm couched in appropriate Latin, "Labor Omnia Vincit." Of course bunting was flown from every point. As a centre piece above the clock floated the national flags of Great Britain and the U. S. of North America with the sun of Japan in the middle. The ensign of the K. C. C. adorned the top of the Club flagstaff, with the Y. C. and A. C.'s piece of blue-and-white bunting beneath. Two American ensigns adorned the ladies' tent and English and other flags were draped elsewhere. Altogether, with the bright dresses of the ladies, and the uniforms of the sailors, the spectacle presented was bright and pleasing in the extreme.

The game, starting half an hour late, was over by a quarter past four, Yokohama winning by one run. It was one of the best interport matches ever played either in Kobe or Yokohama, both teams fielding smartly and working well together. The play was thus full of incident and very fast. Mr. W. S. Stone and Mr. Watanabe were umpires, Mr. E. Mendelson being the scorer.

THE GAME.

Kobe winning the toss sent the home side to bat at 2.30 p.m., McChesney facing the pitching of Stevens, with Shaw as catcher. After a no-ball and spoiling a couple, McChesney was put out at first, Briggs smartly returning from second. Hellyer got down to first on balls, and Thompson brought him round to third. With the next delivery Thompson stole to second. Swan, playing a short ball, went out at first, but Hellyer got home, the first run of the match. Edwards then placed the ball into pitcher's hand and the side retired, Thompson being left at third.

Yokohama 1
Kobe 0

Dyer started in by pitching some difficult curves which Chalfant managed to spoil, and then he took his base on balls, stealing the second. Meanwhile Gillingham fanned several fouls, and at last got down to first on a grounder which would have put Chalfant out at second had the umpire not saved his life. Then Braess succumbed at first and Briggs sacrificing at first brought home Chalfant and Gillingham, the field being rattled. Hancock reached first but got no further, Thorn smartly catching Stevens behind the plate.

Yokohama 1
Kobe 2

Thorn began the second innings but failed to make his first. McGowan with a hit to centre field got down to first and Dyer brought him round to third. A delivery later he got home, Cowan making a fine hit to right field. McChesney then brought in Dyer and Cowan to third, himself reaching second. A base on balls fell to Hellyer, then a short hit by Thompson forced Cowan off at the plate. Further disaster soon befel the home-side, for a well stopped ball by Braess, which Swan sent to third base, put McChesney out between second and third, and the side retired.

Yokohama 3
Kobe 2

Bissell getting a base given him by the pitcher stole the second; and Shaw with a two base hit to centre field brought him home. Murray, with a cricketer's cut to the right field, made his first and earned second. Then Chalfant was retired at first, and Edwards, smartly holding a fly off Gillingham, put out the batter, and by double-play, Murray, and the side retired; Shaw being left at third.

Yokohama 3
Kobe 3

Edwards began by being caught in centre field, but Thorn, the incoming bat, made a two-bagger to the right field, and he was followed to first by McGowan, who was given a life by the first baseman. Dyer putting up a fly which Briggs held at second, retired. A moment later Briggs put out Cowan, the fielding being magnificent. Thorn was left at third.

Yokohama 3
Kobe 3

Braess was the first man to be struck out, on going in for Kobe. Briggs, by an error of the field, made his first, but was forced off second, and Hancock trying to steal to the same base was smartly put out by Thorn. A blank innings.

Yokohama 3
Kobe 3

McChesney, after making his first, was put out at second, but Hellyer was safe. Then a strike by Thompson brought home Hellyer, and the batter made his second on an overthrow. After this Swan succumbed at second, and Braess caught Edwards—a rattling good performance—putting out the side.

Yokohama 4
Kobe 3

By an error on the part of McChesney, Stevens made his first, only to be put out at second from a strike by Bissell. A base on balls was given to Shaw, bringing Murray to the bat. Before he moved Shaw stole to second and Bissell reached third, notwithstanding the celerity of the fielders' returns. A hit by Murray brought home Bissell and Shaw to third, a misjudgment of Edwards in throwing the ball to the plate instead of to first contributing materially to this result. A fine hit by Chalfant brought Murray and Shaw home, the fielders being completely beaten. Gillingham went out at first and Braess being held by Thorn the visitors retired.

Yokohama 4
Kobe 6

Thorn, opening the fifth for Yokohama, failed to reach first, but McGowan had better luck, only to be put out by Briggs at second. This brought Dyer to bat and he had his first base presented to him, and an error by first baseman enabled him to reach second with the help of a fairly long slide. Cowan being put out on first, the side retired.

Yokohama 4
Kobe 6

Briggs put up a fly first ball, which Edwards almost succeeded in getting, notwithstanding that it fell behind the telegraph. Two deliveries later he made a two-bagger between centre and left field. Hancock failed to make first and Stevens went out on strikes, as also did Bissell, leaving Briggs at third.

Yokohama 4
Kobe 6

The sixth innings began with McChesney at bat. After sending out several foul balls he put up a fly which pitcher failed to hold, and then stole down to second. Hellyer making first brought McChesney to third, and Swan went to bat. He brought in McChesney and Hellyer and got down to first himself with a hit past short stop. On Swan going down to first, Thompson was forced off second. A hit by Edwards brought Swan home; then Thorn, making a two-base hit, enabled Edwards to cross the plate. After this a brilliant catch by Gillingham in centre field put out McGowan. Thorn managed to reach third on the next delivery, but Dyer being forced off at first, he was left there.

Yokohama 8
Kobe 6

The last of the sixth was short. Shaw went under at first, and Murray was also forced off, Edwards sending the ball smartly down to McGowan. Then, although Chalfant managed to make his first, Gillingham was thrown out by a capital return of Edwards, and the visitors retired without scoring.

Yokohama 8
Kobe 6

Cowan did not reach first, but McChesney with a safe hit to centre managed it all right, only to be forced off second by Braess. Hellyer made his first, got his second, but travelled no further, Thompson, the next to bat, failing to make first.

Yokohama 8
Kobe 6

Braess sent up a difficult fly which McGowan sprang up and held; Briggs, after missing two strikes, succumbed at first, and Hancock went under at the plate, being struck out.

Yokohama 8
Kobe 6

An artful little bunt carried Swan easily down to first, much to the amusement of the crowd. Then Edwards was dismissed on an in-field fly, a man being on first base; and Swan trying to steal to second base was put out, while Thorn being held by Bissell, the innings finished in short order.

Yokohama 8
Kobe 6

Stevens began with tipping a ball into catcher's mask, and then succumbed at first, while Bissell was struck out. Shaw, who followed, failed to reach first and the side went in to field again.

Yokohama 8
Kobe 6

The ninth innings began exactly at 4 o'clock, McGowan going in to bat. He sent up three balls and one down the line before finally succumbing to a smart return by Braess. Dyer hit a ball straight down to first and Cowan followed suit.

Yokohama 8
Kobe 6

Murray made his first easily, his second through an over throw, and the third by a passed ball. Chalfant received a base on balls and was followed at the bat by Gillingham, who was held by pitcher close to the plate. A splendid hit to centre field by Braess brought in Murray and Chalfant to third, Thompson by smart play preventing anything more being made off the hit. Excitement was naturally rising fast, and it was intensified when Briggs hit out a ball into the right field. It was so smartly fielded that although the batter made his base, Chalfant was nearly forced off in attempting to get home, Edwards and Thorn almost succeeding in dismissing him. He reached the base safely and the ball was transferred to Hellyer, who running up behind Braess, caught him napping and put him out at second. The point was appealed, and Mr. Stone, who did not see what was happening, gave the runner "safe," but upon further evidence being forthcoming, he allowed him to decide, and Braess, with true sportsmanlike feeling, retired. Hancock went in to bat but was put out before reaching first, so the game concluded in victory for the home team by one run.

Kobe	2	1	0	3	0	0	0	0	1—7

YOKOHAMA WINS THE BASEBALL RUBBER.

After the splendid game of Friday, the play on Saturday morning was very disappointing, for although Yokohama won by a splendid margin, the match was altogether too hollow and one-sided to please anybody. The morning opened mistily, but by the time play began the sun was pouring down upon the ground with distressing fervency; then before noon-day the clouds gathered again and the match concluded with a grey, overcast sky overhead. There was again a very large attendance, the ladies' tent being crowded.

Yokohama started in with piling up a score of 4 runs and followed this in this second innings with 5: this lead was never pulled down by the visitors, who played very loosely compared with their performance on the preceding day. Briggs, the Kobe Captain, was a tower of strength, his work at second base being the best exhibition of baseball we have seen on local grounds, but of course he could not be everywhere. Steevens, the visitors' youthful pitcher, also deserves a word of praise for his uniform good pitching, and it was not his fault that Yokohama scored so many runs. Shaw, as catcher, was active, and all things considered one cannot help thinking that if circumstances had allowed the Kobe battery a little more practise together the game would have resulted in smaller scores. As will be seen by a glance at the list of players, two changes were made in the Yokohama team, Blake and Merriman replacing Cowan and Edwards. The umpires were Messrs. W. S. Stone and Horiuchi, and their decisions were never challenged. Mr. E. Mendelson again took over the duties of scorer.

THE GAME.

Kobe went to bat at 10.20 o'clock, Chalfant facing the pitching of Swan. He got down to first on a base hit to the right field; and a wild throw by the pitcher took him to second. Gillingham, the next to bat, was put out at first, and McGowan quickly returning to Blake, Chalfant almost lost his position at third. Braess brought Chalfant home with a fine hit to the right field. Then Briggs put up a fly which Hellyer held at second and Hancock being caught by pitcher, the side retired with one run to their credit.

Kobe.....	1
Yokohama	0

McChesney began with a two-bagger to the right field, which Murray fielded smartly, and two deliveries later, Swan brought him home. Thompson then put up a difficult fly which was declined and he got down to first. Blake going in to bat brought Swan in with a hit to the deep left field, Thompson moving round to second. Yokohama lost their first player when Thorn went out on strikes, and a moment later, Blake was smartly forced off second by Briggs from a short hit by Hellyer. A hit by McGowan, which trundled right past the third base but was left severely alone by Braess, who was under the impression that the ball was foul, brought home Thompson and Hellyer—an expensive error for Kobe. Dyer went to bat and made first on a grounder, McGowan moving to second. Then Merriman was held by Bissell at first base, and the side went out.

Kobe.....	1
Yokohama	4

Steevens, after making his first rather easily, was thrown out in trying to steal to second, and Bissell came in to bat. He sent a grounder into the right field—to the imminent peril of the umpire who happened to be stooping at the moment and only just managed to roll over in time—and the batter made his first, only to be put out by Merriman at second a moment later. Shaw made first and then Murray was held by Hellyer at short stop, so the side retired without scoring.

McChesney, in the next innings, went out on first and then Thompson following the tactics which were so successful the previous day, made a bunt along the top line which took him easily to first. He made his second on pitcher's overthrow, and a moment later came home on a hit by Swan which Chalfant failed to field at short stop. A hit to the left field by Blake enabled him to get to first and Thompson to second, and Thorn brought Swan home, Briggs just failing to reach the fly as it passed over second base. Blake next moved to third, but Thorn was forced off at second, just after McGowan went to bat. A wild throw by Shaw down to first proved abortive, and Blake and Hellyer got home—another costly error. Then Dyer brought McGowan home only to be put off at second himself. Five runs had been scored this innings.

Kobe.....	1
Yokohama	9

Kobe, on going in, saw Chalfant smartly stopped by pitcher, and the striker did not attempt to run to first. Gillingham made a base, and Braess took him to third. Then a sacrifice hit by Briggs brought in Gillingham, and Braess moved round to third. Hancock, however, went out at first and the side retired with Braess being left at third.

The end of the third innings was very short. Merriman succumbed at first and McChesney followed suit, while Thompson was brilliantly held by Hancock in the left field.

If Yokohama had short grace, Kobe fared no better in his next essay, for Steevens failed to reach first and Bissell had similar luck, while Shaw succumbed to strikes—the shortest innings of the day.

Thompson, the incoming bat, received his base from the pitcher on no-balls, but a short hit by Blake, well fielded by Chalfant, put him out at second. Thorn got down to first only to see Blake forced off at second by Briggs, and a moment later the same player put out the last batter, for Briggs was in excellent form and his three successes following in such rapid sequence evoked rounds of applause.

Murray opened by sending a fly into the centre field which Thompson did his best to reach, but failing, the batter made first base. Then Chalfant tipped a ball over his shoulder which Thorn smartly held at the plate. With Gillingham at the bat, Murray stole a base; a passed ball took him to third and Gillingham brought him home with a two-bagger. Braess, with a three-base hit which Dyer could not stop brought in Gillingham, and a moment later Briggs enabled Braess to romp over the home-plate, Yokohama's fielding being very loose and uncertain. Then Hancock went out on strikes, and Steevens, by a smart return on the part of Blake, succumbed at first.

Kobe.....	5
Yokohama	9

McGowan made first, and then a funny thing happened. Dyer put up a fly which pitcher dropped, but McGowan remaining at first, the ball was sent to second base and the batter was put out having no place to run to. Soon after Merriman brought McGowan home with a pretty hit to the left field. Briggs next forced Merriman off at second base, McChesney moving down to first. The next to bat, Swan, was badly missed a few moments later by Chalfant and he took the base. The next thing of interest was when Thompson brought home McChesney and Swan with a left field grounder, which beat the field entirely. Blake got down to first, but Thorn being held by Braess off a foul fly, the side retired.

Kobe.....	5
Yokohama	12

Bissell went out on strikes at the beginning of the sixth innings, but Shaw made first easily with a hit over the head of the second baseman. Murray reaching first, Shaw was given "safe" at second, but a smart piece of play by pitcher, Blake and Merriman put out Shaw at third and Murray at second, and Kobe retired, Chalfant being left at first.

Hellyer made first, but McGowan, who followed on, went out between first and second. Then Dyer with a sacrifice brought home Hellyer, and Merriman went to bat. The veteran made a safe base hit, and this was followed by a three-bagger to the deep centre field by McChesney, which brought Merriman home. A wild throw by Chalfant allowed McChesney to get in and brought Swan to second. On Thompson going to bat Swan took the opportunity of stealing to third. He got no further for Thompson failed to reach first and the side was out.

Kobe.....	5
Yokohama	15

The seventh innings began with Chalfant playing a ball into the right field, and he reached first. Gillingham put up a fly which Hellyer held, and the fielder sending the ball down to first put out Chalfant. Again the applause rang out. McChesney smartly stopped a hot strike by Braess and prevented the batter from making more than one base, and then Briggs, hitting the ball down to his feet, was touched out by Thorn, thus retiring the side.

Blake made first with a safe hit and received his second from an overthrow. Thorn put up a fly, which pitcher failed to hold, but a ball sent down by Hellyer enabled Briggs to force the youngster off at second. McGowan, by a sacrifice at first, brought in Blake, and Dyer sent Hellyer in with a fine hit to the left field. Briggs, however, was not to be denied and he again forced a man off at second, Dyer going under in the sequel of smart play.

Kobe.....	5
Yokohama	17

In the next innings, Hancock, Steevens, and Bissell all failed to reach first and Kobe again went out to field.

McChesney, being missed by Bissell, made first, stole to second and reached third on a passed ball, Swan eventually bringing him home with a hit to the centre field. Swan being put out between second and third, off a short hit by Thompson, Blake went to bat. He reached first and Thompson to the delight of the spectators slid down to second. A hit by Thorn earned a base: then a fly by Hellyer was missed by Briggs and Thompson got home. McGowan brought in Blake and Thorn, the hit sending the ball far into the centre field. Hellyer was the next man home, but Dyer went out at first, and Merriman put up a fly which Braess held close to the telegraph. The score had risen considerably.

Kobe.....	5
Yokohama	22

Kobe went in for their last innings at five minutes past twelve, Shaw being at the bat. He sent a grounder past short stop and made a base. Murray took him to third and a wild throw by Merriman to Blake took Shaw home. Then Chalfant was held by Merriman and this player, throwing to Hellyer, Murray was forced off at second—a smart piece of double play. The end came quickly, for although Gillingham reached second, Braess was held by Hellyer, and the side retired. Yokohama did not play out the innings, the game concluding at 12.15 p.m., with the score as below:—

THE BASEBALL RECORD.

Following is the baseball record since 1896:—

1896.....	Won by Kobe at Kobe.
1897.....	" Yokohama at Yokohama.
1898.....	" Yokohama at Kobe.
1899.....	" Yokohama at Yokohama.
1900.....	" Kobe at Kobe.
1901.....	" Yokohama at Yokohama.

THE TIFFIN.

Tiffin was partaken of in the Pavilion and a large company sat down under the Presidency of Mr. J. P. Mollison. Full justice was done to an excellent bill of fare provided by the Maples Hotel. Mr. Mollison, in a few appropriate words, welcomed the Kobe players and wished the baseball men better luck next time. Mr. Justus Briggs,

Captain of the Kobe baseball nine, replied. He expressed regret that his men had not been able to pull off the match. They had been fairly confident of winning, but pride had had a fall. On the other hand, he warned Yokohama against being too sure of winning the cricket match, as Kobe intended to have a good try for victory.

THE AFTERNOON MATCH.

In the afternoon a baseball match took place between a combined team of Yokohama and Kobe players and a nine from the Yokohama Commercial School, and the contest drew a large crowd of all nationalities to the ground. The game proved very exciting at times and it was anyone's affair until the last innings when the foreigners finding the Japanese were rattled romped away with them and secured a lead of seven runs. Of course the interport players were very exhausted from their morning's exertions and besides had never played together before, so all the more credit is due to them for their performance. Following is the score and list of players:—

Mr. J. Briggs was umpire; Mr. H. W. Kilby scorer.

A band was in attendance, as usual, and after the match played a stirring selection of airs, during which the ladies took tea in the Pavilion, Mrs. D. H. Blake and Mrs. W. L. Merriman again presiding at the tea tables with a fair bevy of dainty dames and damsels to assist them in the pleasing task of dispensing the Club's hospitality.

THE SMOKING CONCERT.

On Saturday evening a "Smoking Concert in honour of our Kobe visitors" was held in the Public Hall under the genial presidency of Mr. J. P. Mollison. There was a very large attendance and with such an excellent programme to discuss as that arranged by Mr. E. W. Maitland and Mr. G. G. Brady it was only natural that the tide of fun soon rose hilariously high. The artist who decorated the title page is to be congratulated on his really humorous designs, though the representative of Kobe was a little more antique in appearance than we are accustomed to associate with visitors from the southern port. The fine band of H.M.S. *Barfleur* proved a great attraction and their selections were loudly applauded. Owing to the Naval dancers not being able to carry out two of their promises, Mr. Saunders, of H.M.S. *Barfleur*, volunteered a piccolo solo and his notable performance was rewarded by an encore. But touching encores generally, it must be owned that they became a bit of a nuisance on Saturday. Every man upon the bill being in the best of form did his very utmost in the particular items for which he was responsible, with the result that the audience clamoured for more, and in most cases they got what they so insistently demanded. But this led to a great prolongation of the programme, so that it was long past midnight ere the concert was over. Among the most original, quaint and humorous performances of the evening was a Nigger solo by Mr. C. H. Rose (the incognito was soon seen through) in which the assistance of a fine gramophone was invoked with considerable effect. The character songs of Mr. Brady and Mr. Aslet were most mirth-provoking, while the wit of Mr. Barry Pain, as excellently interpreted by Mr. H. J. Sharp, tickled the risible feelings of everybody. Mr. N. G. Maitland's songs, Mr. Cornabe's song and dance, and Mr. Somerton's contribution were also in excellent taste and of course the singers received full mead of thanks. The violin solo

by Mr. Fehling, in the first part, was an item which we would not have missed. Programme:—

PART I.

1. Selection—"The Belle of New York"....A. Kerker. The Band of H.M.S. *Barfleur*.
2. Song—"Oh Promise Me".....R. de Koven. Mr. N. G. Maitland.
3. Piccolo Solo—Mr. Saunders.
4. Recitation—"The Shop Devil".....Barry Pain. Mr. H. J. Sharp.
5. Song—"Little Dolly Daydream"....Leslie Stuart. Mr. Cornabe, R.N.
6. Comic Song—"Fancy I'm Off the Earth"....Ford. Mr. C. Aslet.
7. Violin Solo—"Cavatina".....Raff. Mr. O. Fehling.
8. Comic Song—"Touching that little affair"....Robey. Mr. G. G. Brady.

PART II.

1. Selection—"San Toy".....Sidney Jones. The Band of H.M.S. *Barfleur*.
2. Nigger Solo—Piccolo "Baseball Polka." Mr. C. H. Rose.
3. Song—"The Admiral's Broom".....F. Bevan. Mr. S. H. Somerton.
4. Shadowgraphy. Corporal Midland, R.M.L.I.
5. Song—"Jack's the Boy".....Sidney Jones. Mr. N. G. Maitland.
6. Comic Song—"Bobbing up and down like this" Mr. G. G. Brady. Rudd.
7. March—"The Band of H.M.S. *Barfleur*.

Accompanists—Messrs. A. Mason and A. J. Pumfrett.

CRICKET MATCH.

Monday opened unpromisingly with mist and showers but as the morning drew on these cleared away, leaving in their place a boisterous southerly wind and a damp, oppressive, unseasonable heat that made every one feel uncomfortable. Under the circumstances the bowlers had it all their own way to start with and Kobe, going in first, saw some of their best men dismissed for very low scores. But the tail of the team developed unexpected energy and so 116 runs were knocked up before the side retired after just two hours of play. Yokohama then went in and had made 55 before the adjournment; with the Kilby brothers looking well set. But the delightful uncertainty of the game was soon illustrated, for the very first ball after tiffin saw H. W. Kilby dismissed. Then demoralization set in and one after the other the reputed stayers in the home eleven were sent back to the shelter of the Pavilion, the whole side retiring for 80.

The elevens and other members of the two clubs tiffined in the pavilion. Mr. J. Collaco provided a capital cold collation and the tables were tastefully decorated. Mr. J. P. Mollison, President of the Y. C. & A. C., proposed the health of the Kobe team. He wished to say a word of welcome to their good friend Mr. Murray and the Kobe team. They had come a long way in the interests of sport and cricket, and Yokohama was heartily glad to see them. He hoped, speaking honestly, that Yokohama would give them a jolly good licking, but he promised them a fair field and no favour and might the best team win (applause). He intimated that he intended to offer a bat for the highest individual score on either side. He called upon the Y. C. & A. C. to drink Kobe's health. The toast having been duly honoured, and "They are jolly good fellows," sung, Mr. Murray briefly replied thanking Mr. Mollison for proposing his health and that of the team. They had started badly, but it should not be forgotten that they had yet a long way to go.

THE GAME.

Kobe won the toss, and went to bat at ten minutes past ten, W. D. S. Edwards and C. H. Lightfoot facing the bowling of F. E. White, at the Pavilion end and Fradgley at the Settlement, Duff being wicket-keeper. Edwards cut White's fifth ball for a single in the first over, but Fradgley's opening essay proved eventless, a maiden going on to the score sheet. Then White sent down a maiden over, the batsmen playing carefully on the uncertain wicket. With the second ball of the next over Fradgley, with a fair pitch, found Edwards' off and middle stumps, and Braess went in to bat—1-1-1. The new-comer began

with cutting Fradgley to point, and on the fielder overthrowing he broke his duck by stealing a single. In White's third over Braess made his second single off the fifth delivery. He next punished Fradgley for 4 to the fence, and hit him for 2, two balls later, the fifth of the over. Lightfoot began his score with a hit to leg for 4, off White, and then made a single with a neat cut. Braess next hit out and got White away to leg with a boundary drive for 4, with the last ball. Off Fradgley's last ball Lightfoot was smartly caught by Lammert in the short slips—18-2-5. With Gillingham going in to partner Braess, a change in bowlers was made, Lammert relieving White. His fourth ball found Braess' wicket—18-3-12. It was exactly five-and-twenty minutes to eleven when Hancock, the Old Cliftonian, went in to bat. He sent Lammert away for 1 with the sixth ball of the over, the fielding being rather loose, and at twenty minutes to eleven, scoring another single, off Fradgley, 20 was hoisted. A couple was made by Hancock in Lammert's over through wild throwing in, and he followed this with two singles before the over closed. Gillingham eventually broke his duck by putting Fradgley away to leg for 2. Hancock cut Lammert for 1 with the second ball of the over, but nothing further resulted. On change of over Hancock made a couple off Fradgley to mid on, and Lammert's first ball next over, was hit by Gillingham for a single, enabling 30 to go up. E. B. S. Edwards then relieved Fradgley at the trundling, and Gillingham drove his sixth ball for 2. At the change of over Hancock got Lammert away to the off for 3, and then Gillingham punished him for a couple, off the last delivery. After another single by Hancock, Gillingham was clean bowled by the fourth ball from Edwards—38-4-7. Murray, the Kobe Captain, then partnered Hancock, and played out the over. A single was made off Lammert, by Hancock, off the first of the over, and then Murray broke his duck with a couple, which he followed with a single off the last ball, and 40 went up. Runs came slowly on the wet wicket, the first hour's play producing only 44. A change in bowlers at last effected a separation, for upon H. W. Kilby relieving Lammert he, with the last ball of his second over, dismissed Hancock, clean-bowled—44-5-16. The retiring batsman had played a nice game throughout. Buckley joined Murray, only to quickly lose his partner, the Kobe Captain putting up Edwards' fifth ball, which Crawford held at mid-on—46-6-4. Stephens, on going in, opened with a single off Kilby, and Buckley soon followed this with one. In the next over Stephens cut Edwards for a couple and 50 was hoisted. By singles the score slowly mounted, Kobe missing some chances of run-getting by an excessive display of carefulness. At last Buckley hit Kilby to the fence for 4, and 60 was reached. At 65 Fradgley relieved Edwards, and E. W. Maitland took over the bowling from Kilby. Stephens made a couple off Fradgley during the over and Buckley made one off Maitland's first delivery; another single was made by Buckley, off the same bowler, and then Edwards caught him at cover point—69-7-15. Abbott went out to bat at five-and-twenty minutes to twelve, partnering Stephens. After a maiden over by Fradgley, Abbott opened his score by cutting Maitland for 2, off the fifth delivery of the over. Another maiden was sent down by Fradgley. With the last of Maitland's over, Abbott drove him for 2 to the long field. At 73 Fradgley went off, being relieved by Lammert. His first ball cost a single; then Abbott sent him to the Pavilion for 4, only to be dismissed by a yorker next ball—78-8-8. Thompson filled the vacancy and cut a single first ball: then Stephens made a single and 80 was hoisted. The sixth ball cost Lammert 2, Thompson getting him away to leg. Maitland went off, White taking over the leather, and Stephens made a single off his first delivery. Thompson also got him away next ball and, Stephens following suit, seven runs were made ere the over closed. Runs came freely in the next over too, four byes also contributing to swell the score, but at 96, White caught and bowled Stephens—96-9-14. Warren was the last man to go in, at 2 minutes to 12. He began with a single off White, and in the next over made 1 off Lammert. At noon, the

score stood at 98. Warren sending White's first delivery to the fence the century was hoisted, amid loud applause at two minutes past twelve. Thompson next punished the bowler with a drive to the off for 4, and followed this strike with a single. In the next over, Lammert was cut by Thompson for two, and with the last ball he made a single. E. W. Maitland going on to bowl was put away by Thompson for one, and Warren, next ball, made three off him. The tail of the team was proving more expensive for the home eleven than any other portion of the team, until Thompson put up a ball from Maitland, which Clarke held at mid off, the innings thus concluding at 12.10 p.m. for 116; Thompson retiring with the top score for his side, 17, and Warren carrying out his bat for 10. Score:—

* And one no ball.

At twenty-five minutes past twelve, Yokohama went in to bat, sending out P. B. Clarke and E. W. Kilby, to face the bowling of G. C. Murray, at the Pavilion end, and A. J. Buckley at the Settlement, Hancock being behind the wickets. Murray began by sending down a maiden over, and Buckley followed suit. With the first ball of the third over Clarke got Murray away for 2, but with the third ball, Clarke retired l.b.w.—2-1-2. H. W. Kilby now joined his brother, and E. W. Kilby broke his duck by getting Buckley's first ball to leg for one. A 3-bye was sent down with the opening delivery of the next, and H. W. Kilby made a boundary off Murray. The brothers had by this time apparently taken the measure of the bowling, and 10 was soon reached. A boundary by E. W. Kilby, off Murray, raised the score to 17, and the next moment a run was stolen at the expense of the field. A maiden over by Buckley, was followed by a bye from Murray, after which H. W. Kilby snicked Buckley for 2 and 20 went up on the telegraph. Another 2 was made by the same batsman off the last ball of the over. E. W. Kilby scored a single off Murray's fifth ball, and then a change was made in the bowlers, Braess relieving Buckley at the Settlement end. He was punished by E. W. Kilby for 4, third ball, and three deliveries later H. W. Kilby snicked him round to leg for 2. Thirty was hoisted. A miss in the field enabled E. W. Kilby to get a single off Murray next over. Then Abbott gave H. W. Kilby a life, dropping a hot one at point, and with the next two deliveries the batsman made a couple and a single. The brothers continued to pile up the runs, principally by twos and singles, and 40 went up, thirty-nine runs having been made in 30 minutes. A drive to the on for 3 was made by E. W. Kilby off Braess, just at one o'clock, and the half century was reached. Another boundary being made by E. W. Kilby, the score rose to 55, and an adjournment was then made for tiffin, E. W. Kilby having 28 runs to his credit and H. W. Kilby 18. The brothers were playing first class cricket.

Play was resumed at 8 minutes past 2. W. D. S. Edwards went on to bowl at the Settlement end, and his first delivery found H. W. Kilby's middle stump—55-2-19. E. W. Maitland, now partnered Kilby, and a leg-bye was signalled first ball; Kilby made a single off Edwards ere the over closed. He made another off Murray's fifth

delivery, and Maitland a similar number off the last ball of the over. The last delivery from Edwards proved a bye, and 60 went up. Maitland made a single off Murray, and Kilby followed with one next ball, giving a difficult chance. The fifth ball of the over was sent by Maitland to leg for 4. A single by Kilby, off Edwards, was the one point scored in the next over. The fourth ball of the following over, from Murray, proved fatal to E. W. Kilby, for running out to meet it, he was smartly stumped by Hancock—67-3-31. Crawford filled the vacancy, and was missed at the wicket before opening his score. Maitland made a single off Edwards in the next over, and then he put Murray away to leg for 2. A maiden was sent down by Edwards and in the next over Maitland cut Murray for 2. At last Crawford managed to break his duck, snicking Edwards for one with the fifth ball of the innings. It was 25 minutes to 3. Murray in the next over, sent down a leg-bye, which cost a couple, and for a while matters moved monotonously, maiden overs being sent down by both bowlers, until at last Maitland was stumped by Hancock off the fourth ball of Murray's over—76-4-11. White now partnered Crawford and was bowled by Murray with the last ball of the over before breaking his duck—76-5-0. E. B. S. Edwards was the incoming bat, and he saw Crawford dismissed by W. D. S. Edwards with the last ball of the over, the stumps all flying. This disaster befel in the sequel of six maiden overs which were marked by the loss of three wickets—76-6-1. C. M. Duff was now partnered with E. B. S. Edwards; he played out Murray's over and then the first ball from W. D. S. Edwards found his brother's stumps—77-7-1. At 3 minutes to 3, F. E. Wilkinson went in to bat, and another maiden was added to the score. In Murray's twentieth over, Duff succumbed, being clean bowled—77-8-0. The vacancy was filled by Fradgley, who opened by cutting Murray's fourth delivery for 2. After another maiden over by Edwards a leg bye sent down by Murray allowed 80 to be telegraphed. Then a run of maiden overs started in, until at last Murray's dismissed Wilkinson before he had added anything to the score—80-9-0. The last man to go in was Lammert, at a quarter past three. The new comer, beginning with a determination to slog, was stumped by Hancock, second ball, off Murray and the side retired at 3.18 p.m. with the score at 80, the innings having lasted one hour and forty-five minutes. Score:—

BOWLING ANALYSIS.

	b.	r.	m.	w.
G. C. Murray	139	38	9	7
A. J. Buckley	30	7	2	0
W. Braess	24	18	0	0
W. D. S. Edwards	78	4	9	3

The second innings began at 5 minutes past 4 o'clock, Kobe sending out Thompson and Lightfoot, who were opposed to F. E. White and E. G. Fradgley. Lightfoot opened with a single off White's fifth delivery, and Thompson cut Fradgley for a couple, after which the bowler sent down a leg-bye at a cost of one run. A lucky tip enabled Lightfoot to score a single off Fradgley's last delivery. The first from White was hit for one by the same batsman, and then Thompson scored a single. After a maiden by Fradgley, Lightfoot made a single off White, and in the following over two off Fradgley, from the last delivery. Then Thompson was caught by Fradgley, off White—9-1-1. The vacant place was taken by Braess. Scoring was very slow for awhile, the batsmen not managing to get through the field at all. At half-past four 10 went up, by

the help of a bye. Then Fradgley sent down a wide, and his next ball struck Braess badly on the right wrist. Two balls later Braess sent him to the fence for 4, a neat revenge. Edwards relieved Fradgley, and White's fourth maiden in succession went upon the score sheet. A beautiful cut by Braess sent Edwards to the fence for 4, and 20 was hoisted; the succeeding delivery Braess drove right over the bowler's head, making another boundary. Lightfoot got the next chance, sending White to long-leg for 2: then singles were made by both bats. At 28, Lammert went on to bowl at the Pavilion end, and Lightfoot got his fourth ball away for one, Braess cutting him round to leg for 4 with the next delivery. In the next over Braess made 3 off Edwards, and he got Lammert away for a single, while the last ball of the over was cut by Lightfoot for one. After a wide from Maitland, Lightfoot put up a ball from this bowler and was held by Fradgley—he had been at the wicket an hour all but seven minutes—40-2-12. It wanted a minute to five o'clock when W. D. S. Edwards went into bat. He began with a single off Maitland's fifth ball. And in the next over he made 3 off Lammert, one being stolen at the expense of the field. Then Braess got Lammert's third ball away for 1, and Edwards made another off his fifth. At 46, stumps were drawn for the day. Kobe is thus 82 ahead with eight wickets to fall. Score:—

SECOND DAY'S CRICKET.

Tuesday proved a very different day, climatically speaking, to Monday, while from a sporting point of view things could not have been more pleasant. Kobe had a lead of 82 overnight, and eventually succeeded in knocking up a score of 291 in the sequel of four hours play at the wickets. At tiffin time the prospect looked dark for Yokohama, Hancock being well set, while the fielding of the home eleven was very poor. But a change came over the game after the adjournment and a quarter of an hour sufficed to dispose of the remainder of the visiting team. Then Yokohama went in for their second innings and lost four wickets—unfortunately two of these were given out l.b.w.—and hopes fell to zero. But when Crawford and Maitland came together a fine stand was made, and at the close of play they were still at the wicket with scores of 14, and 26 respectively; the total runs for Yokohama standing at 97, with four wickets down. This leaves the home side 231 to get to win.

During the afternoon a band was in attendance and the Pavilion was crowded both above and below. Mrs. J. P. Mollison again presided at the tea-tables, dispensing the hospitality of the Club with gracious ease.

THE GAME.

Play began on the second day at ten minutes past ten. Kobe was then leading by 82 runs, with eight wickets to fall, with W. Braess (23) and W. D. S. Edwards (5) at the bat. A nasty glare was coming from out of a bank of heavy, grey clouds, but the indications were that the weather would clear as the day wore on. This hope was eventually realised. The temperature was decidedly lower, only the lightest of breezes stirring, and altogether general conditions were more favourable than when the

game began on Monday morning. Fradgley began bowling to W. D. S. Edwards from the Settlement end, and his fourth ball was pulled round to leg for 3. The fifth delivery found Braess' stumps—49-3-23. Gillingham joined Edwards and broke his duck first ball, and 50 went up. White's opening delivery was cut by Gillingham for 1, and the last of the over was sent by Edwards to square leg for a single. The fourth ball from Fradgley was hit by Gillingham for 3, and the last he snicked for a single. On change of over, Gillingham got White away to leg for two, and Edward made a single next balls: the rest of the over produced nothing, Duff being in good form behind the wickets. After a leg-bye had been signalled in Fradgley's over, 60 went up, the clock marking 26 minutes past ten.

Gillingham scored a couple off White's first delivery, and sent him to leg for one next ball; then Edwards cut him for one, and Gillingham made a single off the last of the over. Gillingham hit Fradgley for 4 soon after, the only stroke of the over. Harry Kilby now relieved White with the leather and Edwards made two off his first delivery, sending the ball to leg. He made another two next ball, and two with the next, while the fourth delivery produced a single. Edwards drove Fradgley's first ball down the field for 3, and Gillingham put the third away to leg for 1, but the rest of the over was treated with great discretion and nothing more was made. A single being made by Gillingham off Harry Kilby, 80 was hoisted. The fifth delivery by Kilby was driven by Edwards to the scorer's box for 3 and a change in bowlers took place, P. B. Clarke relieving Fradgley. Edwards snicked his second ball for 1, and Gillingham got him away to leg for a similar figure next ball. The fourth delivery Edwards put away for 2, and Gillingham made a couple off the last of the over, enabling 90 to be telegraphed. Lammert replaced Kilby at the Pavilion end and his first ball was sent to leg by Edwards. With the last of the over, Gillingham drove the bowler for a couple, the leather being smartly fielded by E. W. Kilby. A single was made off Clarke by Edwards, and a couple by Gillingham, from the last delivery. Edwards put Lammert away to leg for one, first ball, and then a bye was scored. Gillingham sent Clarke's second ball to square leg for 2 and the century was hoisted. Soon after Duff missed a chance of stumping Edwards, and with the last ball of the over this batsman made a single off Clarke. The fifth ball sent down by Lammert produced a bye, and then E. B. S. Edwards made a sensational stop at square-leg, fielding a hot stroke by Gillingham. With Clarke's fifth ball, a separation was effected, Edwards putting up the ball, which Fradgley, running in from long-on, held—105-4-33. The catch deserved the applause which greeted it. Hancock partnered Gillingham and sent Lammert away, second ball, for one. Clarke's over proved expensive, both men scoring off him to the extent of seven runs, including one boundary by Hancock. In the next over, Clarke missed Hancock, and the error proved more than a trifle costly. At the change, E. B. S. Edwards went on to bowl at the Settlement end. Hancock cut his first ball for 4, but nothing more was made off him that over. At ten minutes past eleven, 110 went up, indicating a much faster rate of scoring than was seen on the opening day. After a maiden over from Lammert, Gillingham hit Edwards for a single and soon 120 went up. The next over produced a single a-piece by Gillingham and Hancock. A 3 by Hancock, off Edwards, was followed by a couple by Gillingham, a nice cut; and this by a single by Hancock. The last ball of the over was cut for 2. Then E. W. Kilby went on to bowl in place of Lammert, the score standing at 130. His first delivery was driven by Gillingham to the Pavilion for 4, the second was cut for 4 to the fence; and the third cost 1. Another change in bowlers was effected at 140, White going on at the Settlement end. His first ball cost one; then Hancock made a boundary off him, following this with a single off the third delivery. Hancock cut E. W. Kilby for 3 next over. With White's fifth ball, Hancock punished

him for 2, and 150 went up. Both batsmen were now well set and the score mounted every over. At 154, Fradgley went on to bowl again, and sent down a maiden. Then with the first ball of the next over, E. W. Kilby clean bowled Gillingham—154-5-45. The retiring batsman had piled up his runs in a little over an hour. Murray joined Hancock and played out the over. Hancock punished Fradgley for 4 with the fifth of the following over, and then with the first from Kilby, Murray sent the leather to leg and with a single broke his duck. At six minutes to 12, 160 went up. Murray now began to score seriously, making two 2's in succession, and a single, off Kilby. Hancock cut a single off the same over. At noon 170 was hoisted. Runs were now coming freely, Murray and Hancock both refusing nothing within reason, so 180 went up at five minutes past 12. Then Maitland took over the trundling, relieving Fradgley, and his first ball was punished for 4 by Hancock, and two singles were made ere the over closed. At 187, Lammert returned to the bowling, and his second delivery was lifted right over the fence by Hancock for 6. He made a single off the fifth ball with a neat cut. Hancock snicked Maitland's first, and Murray made 2 off him; after which Clarke missed Murray badly at long on, off the fifth ball of the over. More runs came, and at a quarter past twelve 200 was telegraphed. Hancock and Murray hitting out freely, soon carried the score along to 210, though Murray was missed by White when he had made 21. By twos, principally, the score mounted, and at 12.25, 220 went on the board. Then E. B. S. Edwards relieved Maitland with the leather, and his second ball was sent away by Hancock for 3. Murray snicked him for 1, and Hancock cut him, next ball, also for 1; while the last ball of the over cost a single. Kilby was next sent to the Pavilion by Murray for 4, and 230 was telegraphed. A ball later Murray spooned a hot one which Kilby tried to field at mid-off, but the Kobe Captain's lease was running short, for with the third ball of Edward's over, he was caught by Crawford at mid-off—233-6-37. At half-past 12, Buckley partnered Hancock. He opened by sending Kilby to leg for one. Then Hancock started in run-getting again, and 240 was signalled. H. W. Kilby now relieved his brother at the trundling and Buckley got him away first ball. Buckley made 2 off Edwards' next over, and hitting out squarely, 250 was reached at a quarter to one o'clock. Free hitting by both men allowed 260 to go up three minutes later, and then Fradgley went on to bowl at the Pavilion end. His first ball disturbed Buckley's balls—260-7-10. F. J. Abbott partnered Hancock (who had now a score of 89) and played out the over. At five minutes to one, Clarke went on to bowl again from the Settlement end, and Hancock cut his second for 1. Abbott began his score next ball with a neat cut for 1. Hancock made a single, and then Abbott was missed by Clarke off the last of the over. A boundary, by Hancock, off Fradgley, took the Cliftonian's score to 95; then next ball he made another 4 to the fence, but was beaten by the last delivery. An adjournment at this point was made for tiffin, Hancock being loudly applauded on his return to the Pavilion.

Play was resumed at 2.15, Kobe then having 271 to their credit. The clouds by this time had nearly all cleared from the sky, and the sun was pouring down upon the pitch, still the temperature remained at a much lower level than on the previous day. Abbott began with a couple off Clarke. Then Hancock reached his century with a neat cut off the last of the over. Fradgley sent down a bye. In the next over Hancock made 4 off Fradgley, and then a 3 bye went down on the score sheet and 280 on the board. By half past 2, the score had been raised to 290: Hancock made another single and then with the second ball of Fradgley's over, was dismissed clean bowled—291-8-107. Warren joined Abbott, and with the second ball sent down to him retired—291-9-0. Stephens, being absent hurt, the innings concluded at 2.35 p.m., Abbott carrying out his bat for 8. This left Yokohama with 328 to win.

Yokohama went in for their second innings at ten minutes to three, sending out F. E. Wilkinson and E. W. Kilby, who faced the bowling of G. C. Murray (Pavilion) and W. D. S. Edwards (Settlement), with Hancock behind the wickets. A maiden over from Murray began proceedings, and he was followed in similar fashion by Edwards. With the first ball of Murray's second over Kilby broke his duck, cutting him to leg. Then Wilkinson snicked him for a single. Kilby next got a single off the last of the over, the ball being thrown in very loosely. With the second ball of Edwards over, E. W. Kilby was given out l.b.w.—3-1-2. H. W. Kilby filled the vacancy and drove Edwards to the fence for 4 with the first ball sent down to him. The last ball of Edwards' over was cut by Kilby for 2. After a single by Wilkinson, 10 was hoisted, at six minutes past 3. The second ball of the following over Kilby cut for 2. Then Wilkinson got Murray away to long leg for 2, and followed it with a single off the last of the over. Edwards' next over was a maiden, and Murray sent down a bye third ball. Wilkinson was missed by Buckley in the slips, next ball, but with the following delivery he made a boundary, allowing 20 to be hoisted at 3.15 p.m. Runs came quickly and with another boundary by Kilby, off Murray, 30 went up, at 3.18. After this things quieted down a bit, until Kilby managed to cut Murray away for 2. The last of Edwards' over Wilkinson sent to leg for 4. In Murray's over one bye was made, and after this Buckley relieved Edwards at the Settlement end. Kilby snicked him for a single, and then Wilkinson was missed in the slips by Abbott. After a single by Kilby, Wilkinson put Murray away to leg for 2, and 40 went up, the clock marking 3.31 p.m. A boundary by Kilby, off Murray, was the next stroke of importance. At 46, Wilkinson was given out l.b.w., to Buckley—46-2-15. P. B. Clarke partnered Kilby; and began with a boundary hit to the fence, 50 going up. The last ball of Murray's over found Clarke's stumps—51-3-4. E. W. Maitland went out to bat at 23 minutes to 4 o'clock. He broke his duck by snicking Murray for a single. With the opening delivery from Buckley he made a boundary to the fence for 4, and repeated the stroke next ball—60 was hoisted. After a bye, Maitland got Murray away for a couple, and with the help of a single and a couple by Maitland, the score was raised to 65 by 4 o'clock. Lightfoot now relieved Hancock at wicket-keeping, the latter going on to bowl, and Maitland made one off his first delivery. His third ball saw Kilby run out, off a short hit by Maitland, Braess throwing in very smartly—67-4-31. Crawford now partnered Maitland, and the stand of the match began. A cut by Maitland, off Buckley produced a couple: then Crawford broke his duck by cutting Hancock for 1. In the next over Crawford made a couple off Buckley. The light was already beginning to fail, and a chill breeze was blowing over the ground. At 73, W. D. S. Edwards went on to bowl again and trundled a maiden. Then Crawford made a single off Hancock, and

Maitland snicked the fifth of the over for 1. Three maiden overs went down on the sheet, and then Crawford got Hancock away for 1, the only run in 15 minutes. Off Edwards fifth delivery, Crawford was given a chance by Lightfoot, who was playing a long way off the wicket, and runs continued to come infrequently, the batsmen playing to keep up their wickets. At half-past four the score stood at 78, so Braess went on to trundle from the Settlement. He opened with a maiden over. At 25 minutes to 5, the majority of the Kobe fielders put on their jerseys to ward off the cold that was steadily settling down upon the ground. At last Maitland got Hancock away to leg for 2 and 80 went up. At twenty minutes to 5, Buckley relieved Hancock at the Pavilion end and Maitland made a boundary off him. Both batsmen resolutely pursued their policy of keeping up the wickets and runs were few and far between, but at eight minutes to 5, 90 was reached. Then Maitland hit a 3 to leg off Buckley. A maiden over from Braess, was followed by a leg-bye off Buckley. A single by Crawford was made off Braess next over, and he next made a couple off Buckley, bringing the score to 97, at which figure stumps were drawn for the day, leaving Yokohama with 231 runs still to the bad; score:—

THE INTERPORT DINNER.

The Interport dinner was held on Tuesday evening, the President and members of the Y.U.C. placing their handsome dining-room at the disposal of the Y. C. and A. C. Ninety-six persons sat down, with Mr. J. P. Mollison, President of the Y. C. and A. C., in the chair. He was supported by Mr. G. C. Murray, Mr. W. F. Mitchell, Dr. Wheeler, Capt. Tillard, R.N., Mr. A. M. Chalmers, British Consul, Mr. E. Flint Kilby, etc.; while at the other tables presided Messrs. Blake and White; Dyer and Fradgley. An excellent repast was provided and its perfect service reflected great credit on the Steward, Mr. T. Herlihy. The Band of H.M.S. *Goliath* was stationed in the vestibule and during dinner played an excellent selection of music.

The toast of the Rulers of our respective countries having been duly honoured, the Chairman rose and said:—It is now my privilege to propose the health of our Kobe visitors, and in doing so I would like to assure them and to assure you all gentlemen, of the great pleasure it gives me to find myself once more in the chair at an Interport dinner. These interport contests are becoming quite historical, but I am glad to find that age does not deaden the interest in them; on the contrary that it seems to increase more and more year by year. I was not fortunate enough to take part in the First Interport Cricket Match, but I will remember the occasion, away back in the early eighties—1884, I think. A team of what might almost be called nondescripts—certainly a very scratch team—went down from Yokohama to Kobe, in several instances more on a pleasure trip almost than with any serious thoughts of cricket. To show that it was a sort of picnic, and comic at that, I have only to tell you that they appeared on the Kobe ground in uniform—not in the usual cricketers' flannels, but as clowns; and it is on record that one of the team, a jolly light-hearted Irishman, on being dismissed by the Kobe bowlers, turned a Catherine-wheel on the way from the wicket to the Pavilion, much to the amusement of the on-lookers. They were a jolly lot of fellows, and not the least jolly was their Captain, the present Mayor of Rokusan, my old friend Arthur Groom, who was then a Yokohama resident.

Most of them, alas,—have joined the majority,—but I am glad to think that some are still here to the fore, and that one from each eleven has taken an active part in the match now going on, in the persons of Mr. Duff for Yokohama and hearty Mr. Stephens for Kobe. I need hardly tell you, gentlemen, that Yokohama got badly beaten at cricket, but she had a mighty good time and moreover had the satisfaction of inaugurating the series of Interport contests that have gone on ever since, as I have said, with increasing interest, to the undoubted advancement of sport and to the promotion of good feeling and good fellowship between Kobe and Yokohama. Although the interest is keener and rightly so nowadays in the games themselves than it was perhaps in 1884, I hope our friends from Kobe still continue to extract a little pleasure combined with the more serious business of sport, from their visits to Yokohama, and if they can assure us honestly that on this occasion they have had a really good time, I am sure that whatever the result of the cricket match we shall all be more than satisfied. Without further words, gentlemen, I would now ask you to join me in drinking all health, happiness, and good fortune to our Kobe visitors. I shall ask Mr. Murray to respond for Kobe, and may say that I purposely left all mention of the play out of my remarks, knowing that it would be dealt with more competently by the respective Captains.

Mr. Murray prefaced his reply by presenting to Mr. D. H. Blake, on behalf of Mr. Justus Briggs, Captain of the Kobe baseball team, the Kobe baseball flag. It was a very pretty flag, he said, and had already begun to gather associations; the only fault he could personally find with it was that there were more Y.'s than K.'s on it: but this no doubt would be rectified in the course of the next few years. (Laughter and cheers.) Speaking for Mr. Briggs, he had been requested to say that the baseball game had been well and fairly played and Kobe returned with the pleasantest of recollections. Turning to the cricket match, it was still too early to talk about it, but he would like to express his appreciation of the display made by the Kilby boys. They had played very good cricket, indeed ("Hear, hear"), and it had been a great pleasure to Kobe to watch them. The Yokohama Captain had remarked to him a little while since that were it not for the Interport matches cricket would die altogether in Japan. He thought the remedy was the introduction of fresh blood as well as the keeping up of the interest of the oldsters. Thus he was glad to welcome Hancock to Japan, and at the same time he was delighted to see such veterans as Stephens, Edwards, and others in the teams. He returned thanks on behalf of the K.C.C. for the hospitality extended to them in such hearty fashion, and before sitting down called upon the Kobe teams to rise and drink the health of the Y. C. and A. C.

The toast was given with musical honours.

Mr. Blake, in replying on behalf of the baseball players, said that though not present at the close of the match on Friday, he had heard from spectators what had occurred and he could assure those who were not acquainted with the rules of the game, that nothing of an unsportsmanlike character occurred. Everything had been played in accordance with their rules. Kobe put up a very good game in the first match, and indeed got a little too close to Yokohama for comfort at one time, and he hoped that next year when Yokohama visited Kobe a similar good game would be seen.

Mr. White, replying for the cricketers, referred to the excellent display made by Hancock. His batting had been a treat to watch—(hear, hear)—and no one appreciated it more than did the Yokohama fielders. They had still a long way to go in the present match, but he would like to hint to the Kobe visitors that the balance of the home team had yet to be disposed of.—(Laughter and cheers.)

Mr. Bugbird, in a very neat and humorous speech, perhaps the wittiest of the evening, proposed the Umpires and Scorers, to which Messrs. Hansell and Bathgate made brief replies. Mr. Stuart proposed the Press, and Mr. A. Bellamy Brown responded. The health of the President of the Y.U.C. was proposed from the

Chair, Mr. Mollison remarking that the innovation of dining at the Y.U.C. was most delightful. Mr. Mitchell replied. To Mr. C. H. Thorn fell the toast of the Ladies. Then Mr. White proposed the health of the popular president of the Y. C. and A. C., which was greeted with musical honours.

Mr. Mollison, in reply, recalled the early beginnings of cricket in Yokohama, over 30 years ago, when a pitch of about 60 yards square was started on the swamp, and the outfielding had to be done among scrub and wilderness generally. The Chairman then proposed the health of the Naval guests. Captain Tillard, of H.M.S. *Dido*, responded and said he recollected playing in Yokohama 35 years ago. There were but few of the faces of those days to be seen in Yokohama now, but he was glad to renew acquaintance with such old cricketers as Mr. Dodds, Dr. Wheeler and their President.

During the evening songs were sung by Messrs. N. G. Maitland, G. G. Brady, H. S. Somerton, W. A. Cornabe, C. F. Stephens, J. P. Mollison, and others, a most enjoyable time being spent.

A WIN FOR KOBE.

Kobe has at last beaten Yokohama on its own ground at cricket, and by the handsome margin of 137 runs. When the game was adjourned on Tuesday afternoon Yokohama had made 97 runs for 4 wickets, and Crawford and Maitland had kept up their wickets in the failing light for over an hour. Resuming on Wednesday, Crawford retired without increasing his score (14), but Maitland took his (26) to 33 before being dismissed, after an innings of perfect cricket. The next three bats made but a short stay and then Fradgley and Lammert came together and made a stand that will make the game of 1901 memorable. They fairly collared the bowling and kept defeat away for the space of three-quarters of an hour, taking the score from 127 to 190. Fradgley carried out his bat again—twice in the course of the match. The bowling of Murray, as a glance at the analysis will show, was very deadly: indeed, we have seldom seen him in better form. In all points of the game Kobe was decidedly the superior of the home eleven, and it is therefore a case in which the best team has won fairly on its merits.

THE GAME.

Wednesday morning was dull and overcast, with a lower temperature and an uncertain, shifty light. The play was resumed at ten minutes past ten, Maitland (26) and Crawford (14) returning to the wickets to continue their overnight's play. Buckley began bowling to Maitland from the Settlement end, and trundled a maiden; then Murray's fifth delivery found Crawford's off stump—97-5-34. White went out at 10.16, partnering Maitland, and played out the over. After a maiden from Buckley, White broke his duck with a single off Murray, but after this a succession of maiden overs set in and to spectators the game became monotonous. At length Maitland made a single off Murray, and White followed by putting the leather neatly through the slips for 1. Maitland made one off Buckley's first ball, and with the last ball of the over, White was missed at the wicket by Hancock. Maitland next cut Murray for a single. At half-past ten the score stood at 103. Maitland, sending Murray to short leg, was missed by Spence (substitute) and the error cost a couple of runs. Another bit of blocking set in and then White managed to cut Buckley for 4 and 110 was hoisted. A ball from Murray broke badly, shortly after this, striking Maitland on the side and the game had to be interrupted for a few minutes, but with the last delivery of the over, Maitland managed to get a run, sending the leather to long-leg. A maiden over by Buckley followed, and then at 18 minutes to 11, Maitland was clean-bowled by Murray—112-6-33. The retiring bat had played excellent cricket all through and on his return to the Pavilion was loudly cheered. E. B. S. Edwards now went in to bat and took the last ball of Murray's over. White cut Buckley for a single off the opening delivery, and in the next over

White lifted Murray and was almost held by Hancock. White cut Murray's next ball for a single, and then Edwards broke his duck by getting Murray away to leg for 2. In the next over White made a single off Buckley. At five minutes to eleven 120 was reached. With the third ball of Murray's over, White was dismissed, the ball breaking in from the off—121-7-14. Duff filled the vacancy, and soon after Edwards got Buckley away to the Pavilion for 4. Yokohama was now exactly 200 runs behind, and things were looking blacker than ever when Edwards was given out l.b.w.—127-8-6. Fradgley partnered Duff, and lost him immediately, Edwards holding him at cover-point off Murray's second delivery—127-9-0. Lammert was the last man to go in, at 6 minutes past 11, and then the best partnership of the whole match set in. Fradgley sent Buckley's first ball away for 3 and 130 was hoisted, and then Murray was punished by him for 4, the leather being sent to square leg. Lammert skied Murray's last ball, which Braess missed at long-off, and a single was scored. By singles the score slowly mounted and at 11.18 o'clock 140 was telegraphed. Fradgley sent Murray to the fence for 4 with the fifth of the over, and Edwards went on to bowl, replacing Buckley. Fradgley hit his first away for one, and the last ball of the over Lammert sent to leg for 4, and 150 was sent up. Fradgley, with the last ball from Murray, made a 3 to the off. The tail of the team was thus proving even better than its best friends expected and at half past eleven 160 was reached. A boundary by Lammert, off Edwards' last delivery, was the next incident. Murray went off, Braess taking over the trundling from him. Fradgley cut him for a single first ball; then he sent down a bye, while the third was put away for 1 by Fradgley, and the fourth by Lammert for an equal number. After another couple by Lammert, off Edwards, 170 went up on the board, the partnership so far having produced 43 runs. Fradgley drove Braess for 3 in his next over, and he cut Edwards for a single. A change in bowlers was made, Buckley going on in place of Braess at the Pavilion end, and Fradgley made a boundary off his second delivery, following it with a single. Then Lammert made a couple off the fifth of the over, and 180 went up. The last of the over was cut by Fradgley for 1. A life was given Lammert next over, Hancock missing at the wicket, and two balls later he made a couple off Edwards. The partners continued to earn runs, and at a quarter to twelve they had made 61 between them. A single by Lammert off Buckley, enabled 190 to be hoisted, but with the first ball from Edwards, Lammert was held at point by Warren—190-10-26. The game thus concluded at eight minutes to 12, with Kobe 137 runs to the good.

PRESENTING THE COLOURS.

After a suitable interval the teams sat down to tiffin, and at the close, Mr. Mollison referred to the pleasant holiday which had been spent. He expressed a hope that Yokohama might retrieve the defeat next year.

Mr. F. E. White, Captain of the cricket eleven,

then presented the Yokohama flag to Mr. G. C. Murray. In doing so he said that he thought both Clubs had had a pleasant time. Yokohama would have enjoyed it more if they had sent Kobe back with "their tails between their legs," but still it would not do to begrudge them their victory, which had been fairly earned. Yokohama had been beaten at all points of the game, and this would be a very good thing if it had the result of making them brace up and redeem their defeat. The Yokohama team contained some old crocks who ought to be weeded out of the team, if somebody could be found to take their place. As for the Kobe captain, he—(the speaker)—had never seen him bowl better; Hancock's batting was too much for Yokohama, and the same with Kobe's fielding. He congratulated Mr. Murray on being the first Kobe captain who had taken the flag from Yokohama on Yokohama ground, while he—(Mr. White)—was the first Yokohama interport captain who had lost it on his own ground. He proposed the health of the Kobe team.

The toast was duly honoured, and then Mr. Murray said he could assure his Yokohama friends that Kobe quite appreciated the pleasure of receiving the flag, especially since it had so often been taken from them, and they would take back with them not only grateful recollections of the manner in which they had been treated here, but the flag as well. He called upon Kobe to drink the health of Yokohama.

Kobe responded and then Mr. Abbott proposed a vote of thanks to Mr. F. H. Bugbird, the Hon. Secretary of the Y. C. & A. C. for the trouble he had taken in attending to the comfort of the visiting eleven. Mr. Bugbird briefly replied.

Mr. J. P. Mollison presented the President's bat to Hancock, the compiler of the highest score in the match, during the afternoon, accompanying the gift with a graceful speech, to which the Old Cliftonian briefly replied.

THE FIRST INTERPORT MATCH ON RECORD.

In connection with the Yokohama Cricket and Baseball Festival it will no doubt interest the younger players in the respective teams to know that two players in the Second Interport Cricket Match ever played in the Far East are now resident in Japan—Captain F. Brinkley and Mr. James P. Mollison, President of the Y.C. & A.C. Captain Brinkley played for Hongkong, and Mr. Mollison for Shanghai, at Shanghai in May, 1867—34 years ago—and reference to the scores given below, show that both did good service for their respective sides. Appended are the scores (as recorded in the *North-China Daily News*) of the two matches between Hongkong and Shanghai, played in May, 1867—the first on the 13th, 15th, and 16th, and the second on the 18th. Both were won by Shanghai. In February, 1866, a Shanghai team visited Hongkong, and lost by 264 runs, but the full score is not on record here.

FIRST MATCH, 1867.

Shanghai won by 92 runs. Hongkong apparently played only ten men.

A BASEBALL MATCH.

To fill up the afternoon, the Yokohama cricketers challenged the Kobe players to a game of baseball and a most amusing contest resulted, Yokohama winning hands down. Kobe went to bat, and Braess got down to first easily; he stole to second and saw Hancock go out on first, Crawford smartly fielding. Braess went to third on a passed ball and Wilkinson had a base presented to him by the pitcher, after which Chesai put up a fly which Lammert held and then Wilkinson was forced off at second and the side retired without scoring.

Yokohama opened well, Clarke sending out a fly to the right field which earned him two bases; then Kilby got down to first, while on passed balls Clarke got home and Kilby to third. A moment after Kilby ran in and after this Swan went over the plate on a home-run hit by Edwards. Crawford brought in White and got round to third himself with a hit to left field. Maitland made his base after fanning several fouls, and on passed balls moved round to third, which he almost lost, however, by moving

off too soon. Stuart brought him home, and then Lammert went out at first. The whole side had now been in to bat and Clarke going in again brought in Stuart, while a moment later he ran in himself off a hit by Kilby. Swan put up a fly which Hancock held, after which Kilby got in again, scoring the tenth run. Edwards made 3 bases, but failed to get home owing to White being caught by pitcher.

Warren, after having a base presented, was forced off at second, and Hancock succumbed at the same place, while Thompson retired on strikes.

Kobe now changed pitchers, Braess going on. Crawford's fly was held by Warren at third, and Maitland failed to reach first, but Stuart had a base on balls. Lammert, after some fine strikes at foul balls, got down to second; then Stuart got home, and Clarke brought in Lammert; Kilby sent Clarke home. Swan, in the sequel of some funny contortions by the field, was forced out at second and the side retired, the score being now 13 to nil.

Spence went out at first; jumping the base instead of touching it; Hansell retired on strikes, and Braess was held by Lammert in the deep field.

Edwards was held by Chesai at the plate; White placed a fly in Wilkinson's hands, but Crawford got down to first safely, and Maitland made his on balls. Stuart brought Crawford home, and Maitland to third. Then Stuart being forced off at second the side retired.

Gillingham made second easily and third on a passed ball; but Wilkinson retired on strikes. Then Gillingham got in, scoring Kobe's first run. Chesai, after making first, was forced off at second by Maitland, and Warren retired on strikes.

Kobe now tried Chesai at pitching. Clarke and Kilby failed to reach first, but Lammert got home. Swan was the next in, and was followed by Edwards. Then White went out on strikes and the side retired.

Thompson was the first to retire for Kobe, Spence went out on strikes, and Hansell failed to reach first.

Crawford went out on first, while Maitland and Stuart were both caught by Hancock, so the side went out without scoring.

Kobe began the sixth by seeing Braess put out at home; then Gillingham made a run on a passed ball—the second for his side; and Wilkinson made the third run, Chesai the fourth.

Kilby made a home-run and brought in Lammert; then Swan and Edwards got home, followed by White and Crawford. Maitland was forced off at third, but Stuart got home. Clarke retiring on strikes the side went up.

In the last innings for Kobe Spence got home, and was followed by Hansell and Gillingham. Score:—

YOKOHAMA YACHT CLUB.

A special meeting of the Yokohama Yacht Club was held on Friday afternoon. About thirty members were present, Mr. G. H. Seidmore, Commodore of the Club, being in the chair.

The CHAIRMAN read the requisition dated Sept. 30th calling the meeting to consider the justifiability of the Committee refusing to grant a certificate to Mr. C. B. Clausen for his yacht *Wettinge*, on grounds made clear in the correspondence which we publish below.

Mr. CLAUSEN being called on by the Chairman to state his case asked Mr. E. Beart to do so, and the latter, while declaring that he held no brief for Mr. Clausen, agreed to give his assistance in elucidating the matter. He asserted at the outset that it must be assumed the Committee were actuated

by the very best motives. Yet from an unprejudiced view of the matter there seemed to be no reason for their action. So far as the rules were concerned any member was at liberty to build any kind of boat that he wished. He recalled that "freaks" had been built, and now it was for the Committee to show under what rule they refused *Wettinge* this rating. There had been talk of *Wettinge's* construction, but he thought they should refrain from speaking of a "tank" instead of as it was in this instance a casing. They might indeed as well call a side-locker a "tank." The man to his mind who did not have a pump to clear that casing of water would have been a fool. If the boat had the same casing and the same tank two years ago he could not see how they could speak of "discovering" either "tank" or pump. The boat had had an official certificate for two years and no one objected. Now that the Committee refused to let him go into a higher rating they would like to know the Committee's reasons.

Mr. BOYSS on behalf of the Racing Committee referred to rule 20 prohibiting the increasing or decreasing of ballast. The Committee contended that by means of the hollow keel ballast may be increased without the owner's knowledge. *Wettinge's* water-line had shown varying lengths at different times, and if her construction were sanctioned it would establish a precedent which would not tend to racing with a fair field and no favour.

Mr. ELLIOTT read correspondence conducted by the former Committee with Mr. Clausen, correspondence which we cannot reproduce. In reply to Mr. Beart the Chairman said the certificate was granted in July, 1899, as a 17-rater.

Mr. BEART thought it was ridiculous for the Committee, having granted a certificate, to "discover" the things now mentioned. He contended that the Committee could not prevent an owner ballasting his boat by means of a hollow keel. He thought any objection should have been taken at an earlier stage while *Wettinge* was a 17-rater.

Considerable discussion arose as to the hollow keel and as to the pump, Mr. Clausen eventually bringing out the pump with a jug and a pail and illustrating the feeble action of the water ejector.

Mr. KESWICK said this special build of boat was liable to abuse,—they did not say it had been abused; and, further, possible alteration of the water line was beyond the control of the owner.

Mr. BEART wanted to know what rule had been broken by Mr. Clausen since his previous certificate was issued.

More discussion ensued and eventually Mr. Beart suggested that the matter should be put to the meeting: "Are the Committee justified in refusing a certificate to the yacht *Wettinge* under the existing rules?"

In the sequel, after some conversation, Mr. Beart proposed and Mr. H. McArthur seconded the motion as given above.

Thirty-nine members were present, of whom 28 voted that the Committee were justified and 11 that they were not justified. This closed the proceedings.

—, Esq., Yokohama, Yacht Club.

DEAR SIR,—Referring to the notice posted at the Yokohama Amateur Rowing Club, of an Extraordinary General Meeting of the Yokohama Yacht Club to be held at the Oriental Hotel at 5.30 p.m., on the 11th instant, I shall be much obliged if you will kindly pursue the subjoined copies of correspondence, from which you will see that the Yacht Club Committee have refused to grant a new certificate of rating for my yacht *Wettinge* owing to some features of her construction. I claim that those features are perfectly legitimate under the Rules of the Club; and I may add that I have never used them for other than legitimate purposes.

It appears to me that the Committee are labouring under some misapprehension, as is implied by their alleged "discovery" of a fact which has been well-known all along, and about which there has never been any secrecy whatever; and there remains now no alternative but to hold an Extraordinary General Meeting of the Club to remove that misapprehension.

In view of the fact that I was one of the original promoters of the Yokohama Sailing Club, and that since its inception some fifteen years ago I have been a constant supporter of the sport of yachting in Yokohama, I venture to ask the favour of your kind consideration of this matter, and express a hope that you

will be able to spare a few minutes to attend the meeting in the interest of "a fair field and no favour."
I am, Yours faithfully,
C. B. CLAUSEN.
Yokohama, October 5th, 1901.

C. B. CLAUSEN, Esq.,
Present. September 6th, 1901.

DEAR SIR.—In reply to your request to enter your boat *Wettinge* in to-morrow's race for 21 Raters and to have her measured, I am instructed to write to you, that owing to the official measurer, in company with a Committee-man, having discovered a tank in the keel of *Wettinge* and a special pump for it, the Racing Committee refuse to grant a certificate of Rating.

The matter will be laid before the General Committee, should you so desire.

Yours truly,
By Order of the Racing Committee.
RICHARD BOYES.

Yokohama, September 5th, 1901.

R. BOYES, Esq.,
Racing Committee, Yokohama Yacht Club.
In reply to your letter in which you state that the Committee have discovered a Tank (?) in the keel of *Wettinge*, I have made no alteration to the keel of the boat since she was first granted a certificate of rating; however, I have no objection to her being measured with the so-called tank filled with water, therefore I shall be obliged by your accepting my entry for to-morrow's race.

Yours truly,
(Signed) C. B. CLAUSEN.

C. B. CLAUSEN, Esq.,
Present. Yokohama, September 7th, 1901.

In reply to your letter dated 5th instant and received by me this a.m., I beg to say, that the Racing Committee refuses to grant a certificate of rating, as stated in my letter of yesterday, for the reason that your boat *Wettinge* has a tank, a hollow keel, accessible from the inside of the boat through a hole, and a pump.

Yours truly,
RICHARD BOYES,
For Racing Committee.

Yokohama, September 9th, 1901.

R. BOYES, Esq.,
Racing Committee, Yokohama Yacht Club.
DEAR SIR.—In reply to your letter of 7th instant, I beg to point out to you that I am a member of the Yokohama Yacht Club—my yacht *Wettinge* has been on the Club lists for the past two years, and I shall be obliged by your granting me a certificate of rating.

If the Racing Committee do not feel competent to grant a certificate I shall be obliged by your putting the matter before the General Committee without delay.

Yours faithfully,
(Signed) C. B. CLAUSEN.

C. B. CLAUSEN, Esq.,
Present. September, 11th, 1901.

DEAR SIR.—I am directed by the General Committee of this Club to say that the action of the Official Measurer and the Racing Committee in refusing a certificate to your yacht *Wettinge*, as communicated to you on September 5th, 6th and 7th, is fully approved.

I am, Yours respectfully,
L. MOTTU,
Secretary.

THE COMMITTEE.
Yokohama, September 13th, 1901.

YOKOHAMA YACHT CLUB.
DEAR SIR.—I am in receipt of your favor of 11th instant in which you endorse the action of the Racing Committee in refusing a new Certificate to my yacht *Wettinge* on the grounds that she is provided with a Tank (so-called) and pump. As there is nothing in the Yacht Club rules prohibiting the use of such construction in a yacht, I am not prepared to admit the right of the Committee to refuse a new certificate solely on the account.

Presuming this matter must now be carried to an Extraordinary General Meeting of the Club, will you please inform me if the reasons stated in the Racing Committee's letter of 6th September are the sole reasons for refusing a certificate.

Should you have any other reasons not given in the above mentioned letter, I should be obliged by your stating them explicitly now, so that they may be duly set forth in the notice of the Extraordinary General Meeting in accordance with rules 7 and 8.

Awaiting the favor of your reply.

Yours faithfully,
(Signed) C. B. CLAUSEN.

C. B. CLAUSEN, Esq.,
Present. September 14th, 1901.
SIR.—In reply to your letter of September 13th, 1901, I am directed to say that the General Committee of this Club sees no necessity to enlarge its letter of September 11th, 1901, to you.
Yours truly,
L. MOTTU, Honorary Secretary.

THE RETURN OF SIR CLAUDE MACDONALD.

MEETING OF BRITISH RESIDENTS.

A meeting of British residents called for the purpose of electing a Chairman and Committee for the presentation of an address of welcome to Sir Claude MacDonald, K.C.B., G.C.M., His Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary to the Court of Japan, was held on Monday afternoon in the former British Court-room of Yokohama, kindly lent for the occasion by Mr. A. M. Chalmers, British Acting Consul.

There was a fair attendance, about twenty gentlemen being present, the cricket match probably being responsible for the absence of many.

On the motion of Mr. W. F. Mitchell, seconded by Mr. A. C. Hutton Potts, Mr. J. F. Lowder took the chair.

The CHAIRMAN said he had not anticipated being called to the chair, but he was sure they were all of one mind. The object of the meeting was to do honour to the Minister, to welcome his return to Japan. They had not yet really had an opportunity of expressing to Sir Claude MacDonald their admiration of his noble and gallant defence of the Legation at Peking, or to welcome him here, because when he last arrived in Japan, he came by train and went straight to Tokyo. As this would be the first occasion of his landing at Yokohama the Chairman thought it would be well to take the opportunity of giving him that address which they should have presenting to him had circumstances permitted when he first came to this country. It would be for the present meeting to appoint a Committee to draw up the address.

Mr. MITCHELL thought it would be a graceful act on the part of the British community to welcome their Minister on his return to this country. As the Chairman had just said, Sir Claude was one of the heroes of the siege of Peking, and during his visit home His Majesty the King was pleased to confer upon him a special distinction in honour of his services in the defence of the Legation. He (Mr. Mitchell) thought they all felt that they would like very much to show Sir Claude that they appreciated the desire which he expressed when in Japan before—that he might come into close contact with his nationals, with the residents of Yokohama, and one means of doing so was to meet him when he arrived here on the next "Empress" steamer, due on Monday, and present him with an address of welcome.—(Applause). He proposed that a committee should be appointed to draw up that address, and that they should be six in number, of which he nominated the following: Messrs. J. F. Lowder, J. P. Mollison, R. D. Robison, Jas. Walter, and Jas. Dodds.

Mr. DODDS thought the name of Mr. Mitchell should be included (applause).

The CHAIRMAN, however, suggested that the Committee should consist of those who had taken on themselves the responsibility of calling this meeting. They were all representative men, and unless there was any reason why the number of the Committee should be reduced to six, he did not think they could get a more representative Committee. It would be satisfactory to himself and perhaps more complimentary to Sir Claude if the Committee were made to consist of the callers of the meeting.

Mr. MITCHELL was quite willing to alter his proposal to embrace the gentlemen who had called the meeting. His reason for proposing a smaller Committee was that the time was short, and it would be easier to work with a Committee of six than with one of 14. Whatever was to be done would have to be done quickly.

The CHAIRMAN thought the alteration would meet with the wishes of the Community.

Mr. JAS. WALTER seconded Mr. Mitchell's proposal as altered, and the Chairman put it to the meeting that the Committee to draw up the address of welcome to Sir Claude MacDonald on his arrival, on behalf of the British residents in Yokohama, should be those whose names appeared on the notice calling the meeting:—Messrs. J. W. Crowe, Jas. Dodds, A. J. Easton, J. D. Hutchison, D. Jackson, F. S. James, E. M. Janion, H. W. Keswick, J. F. Lowder, W. F. Mitchell, J. P. Mollison, R. D. Robison, Jas. Walter and A. G. Morey Weale.

The proposal was adopted unanimously. This concluded the public business, and there being eleven present out of the fourteen forming the Committee, a meeting of the latter was at once held.

We are requested by the Reception Committee to state that all British subjects desirous of welcoming Sir Claude and Lady MacDonald on their return to Japan are invited to meet at the pier an hour after the *Empress of India* shall have reached her moorings, unless she should arrive on Sunday, or early on Monday morning, in either of which events the hour is fixed for 10 a.m. on Monday. The address to be presented to Sir Claude MacDonald on behalf of the British residents of Yokohama may be seen at Messrs. Kelly & Walsh's from noon on Friday to noon on Saturday.

THE ITALIAN CONCERT.

The small company of artistes consisting of Mr. and Miss Gentile, pianists, and Miss Mastropasqua, soprano, arrived in Yokohama a week or two ago with none of the flourish of trumpets often accorded to professional entertainers of very much inferior merit, and the excellence of Friday evening's concert came therefore as a surprise to those music-lovers of Yokohama who had not some personal knowledge of the real merits of the trio. This, and the fact that really classical music only appeals to a section of the Yokohama foreign community, may well account for the moderate attendance at the Public Hall on the occasion. The audience, however, though not large, was thoroughly appreciative and fully realised the fact at the close of the performance that they had enjoyed a musical treat much out of the common. The first item on the programme was the *Invitation à la Valse* by C. Weber, for four hands, played on two pianos by Mr. and Miss Gentile. From the beginning both artistes, particularly Mr. Gentile, showed their thorough mastery of technique and artistic expression and the performance was received with unstinted applause and the presentation of a beautiful floral offering to the lady performer. The second item was a solo for soprano from Gounod's *Faust*, by Miss Mastropasqua. This lady is fortunate in possessing a pure soprano voice of high range, her upper notes being particularly clear and sweet. The fair singer at the conclusion of the solo received an unequivocal recall and in response sang a short air by Rotoli, *He Sognato*. The third item consisted of (a) Beethoven's *Allegro Concerto* in C, and (b) *Cadenza to Beethoven's Concerto*, by Moschelles, arranged for two pianos. In this number again, Mr. and Miss Gentile, the latter taking the orchestral part, won enthusiastic applause, the spirited instrumentalization in the *allegro* number being especially appreciated. One point which could not fail to appeal to the ears of the musical members of the audience was the marvellous accuracy of time kept by the performers, and this in spite of the fact that Mr. Gentile played without any music score before him. The first part concluded with a Concert in D by Beethoven, (a) *Large*, and (b) *Rondo*. This was again warmly applauded, and deservedly so, the *Rondo*, in particular, being one of the most exquisite *morceaux* of the evening.

The second part opened with a piano solo by Miss Gentile, Liszt's Hungarian Rhapsodie No. 12, which was executed with an artistic skill and finish which displayed the thorough training of the musician. Miss Mastropasqua follow-

ed with a solo from A. Thomas' *Hamlet*, which afforded the singer a better opportunity of showing the fine quality of her voice than the previous number had done, and elicited another encore. In response she sang *F. Sano il consiglio*, by Grieg, a sweet little *chanson*, but all too short for the desire of the audience. The accompaniments to these and the former solos were played by Mr. Gentile. The final item of the concert consisted of three movements, (a) Allegro, (b) Andante, and (c) Presto, of Mendelssohn's on two pianos, by Mr. and Miss Gentile, the former taking the solos and Miss Gentile the orchestral parts. Both artistes played with spirit and accuracy and at the conclusion received quite an ovation. We trust to be soon favoured by these talented artistes with another musical treat, when we have no doubt a fuller welcome will be extended to them by the community.

"THE PRINCESS OF WEI-HAI-WOO."

The performance of the nautical Extravaganza, "The Princess of Wei-hai-woo" by the Amateur Dramatic Company of H. M. S. *Barfleur*, at the Public Hall proved a decided success. The Hall was well filled and the audience enthusiastically appreciative. The piece, composed by Messrs. George Eames and A. C. Murray of the *Barfleur* was performed in Yokohama about a year ago and the plot of the play, if it can be so called, is well known to our readers. But there were some points in Wednesday night's performance that may call for some further remark. Mr. Murray's singing, in the solos and duets that fell to his lot, showed a distant improvement on his previous achievements and in the last solo in particular he made a great hit. "His Chum," Mr. Geo. Eames, showed wonderful versatility as a comedian. But the honour of the night, we think, must go to Mr. G. Blundell, who as a Salvation Lassie, or Captain in the Army, not only looked the part, but sang the songs allotted to him with an accuracy of note and clearness of voice, particularly in the upper registers which would have done justice to many a real soprano. The staging and the dresses were particularly good; the choruses, with one or two exceptions, went well and the Band was all that could be desired. The programme was as follows:

LAW CASES.

In the Yokohama Chiho Saibansho before Judge Kano on Saturday, judgment was given for plaintiff in the suit instituted by Mr. Tom Thomas, of No. 58, Yamashitacho, Yokohama, against Ting Shon-kang, No. 160, Yokohama, plaintiff claiming payment of yen 8,000 and yen 4,000 on two promissory notes issued to him by defendant. The latter was ordered to pay to plaintiff the two amounts with interest thereon, and the costs of the suit were charged to defendant.

In the Yokohama Ku Saibansho before Judge Imai on Saturday, Murota Shintaro, of Motomachi Shichome, Yokohama, sued J. B. Harmond, No. 108, Yamashitacho, Yokohama. Plaintiff claimed payment of yen 83.10, being the price of household furniture supplied. He stated that on the 30th May last he sold to defendant household furniture valued as above, the price to be paid in three yen 27.70 monthly instalments. Plaintiff, however, had been unable to obtain any payment, and so took the matter to court. Defendant contended that payment was to be made at the end of six months and asserted that four articles had not been delivered. The case was adjourned.

The Mito Local Court sentenced Mr. Otsu Junichiro, M.P., on the 10th inst. to one month and 20 days major imprisonment and a fine of 20 yen for libelling Mr. Suzuki Seibi.

In the Mito Chiho Saibansho judgment was given against Fukaya Shizo, editor of the *Ibaraki Shimpō* and Nakayama Tomokichi, publisher of the same journal, on the 10th inst. Fukaya was sentenced to one month and 20 days' major imprisonment and a fine of 20 yen on the charge of libelling an official.

CORRESPONDENCE.

THE ATTITUDE OF MEN OF SCIENCE TO RELIGION.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In your issue of the 2nd inst. appears a letter from Bishop Fyson supplemented by a long quotation from a communication received from Professor Stokes of Cambridge on the question of the attitude of men of science to religion. Believing as I do that the Japanese whose souls Bishop Fyson is so anxious to save are quite right in thinking that the majority of highly educated men in Europe and America have most certainly given up all belief in what is known as orthodox Christianity, I purpose placing before the reading public in as brief a space as possible the other side of the question Bishop Fyson has seen fit to bring up afresh. Bishop Fyson is evidently one of those who think that the position of orthodox Christianity will be greatly improved if it can be shown that such intellectual giants as Professor Stokes still hold on to the old creed. In the first place Professor Stokes does not hold on to the old creed by any means. He is a heretic, condemned to perdition by a clause in the Athanasian Creed which Bishop Fyson, if I mistake not, is obliged to read to his congregations on certain occasions. But for argument's sake let us suppose that the Professor's Christianity would pass muster with the church authorities who claim the right to say in the name of the church who are to be saved and who not, yet Bishop Fyson has no right whatever to make use of Professor Stokes' eminence as a mathematician or scientist in support of the orthodox Christian creed. When a scientific man declares himself to be a believer in the orthodox faith, he does not thereby show that he thinks the Christian religion as formulated in the Apostles' Creed is reconcilable with the well established deductions of science. It is assumed by such controversialists as Bishop Fyson that the religious and scientific opinions of scientific men are not self-contradictory. It is assumed that such men think as earnestly and persistently about religion as they do about science. For these assumptions there is no evidence whatever. An analysis of the thought of scientific men, such as can be made by any one intimately acquainted with their writings on different subjects, shows beyond all manner of doubt that nine out of every ten of them have never attempted to reconcile their scientific and their religious views. Such men fail to see that they are under any obligation to undertake such a task. The demand made on the mental powers of scientific men by the daily investigations which they are conducting is sufficiently pressing to unfit all but a few intellectual giants among them for severe thought on subjects outside their special sphere of research. They are content to accept on the authority of specialists metaphysical and religious theories and doctrines which by no process of logic known to man can be reconciled with the conclusions which they and their fellow-thinkers in the scientific world have reached. "Why," say they, "should we trouble or perplex ourselves about religion? Its rites and ceremonies are soothing to our jaded spirits. Its associations are at once poetical and æsthetic. Prominent among its advocates are men whom learning, refinement and gentlemanly instincts render charming members of society. Why offend them? If the teaching of religion does not instruct or benefit us, it seems to exercise an elevating influence over our wives and children. The world seems the better for the existence of such an institution as the Church. This of itself is enough for us." Whether the vast structure known as orthodox Christianity has a rock of truth for its foundation, or whether it only escapes the doom which its innate weakness and downright illogicalness would seem to predict for it is simply owing to the influence of that overpoweringly strong instinct of human nature, conservatism, an instinct that makes men cling to what they have long known and used, despite its imperfections rather than undertake the formidable task of collecting material and drafting plans for the erection of a more substantial building—this is a question the majority of scientific men never feel called upon to ask themselves. It is evidently very difficult for clergymen like Bishop Fyson, with whom the one absorbing topic of life is religion, to realise that the vast majority of thinking men give very little serious attention to the subject. It does not interest them. Religious discussion is considered by most people to be useless. Hence it is one of the rules of polished society to banish religion as a topic of conversation, and any man or woman who breaks the rule is considered lacking in politeness.

Now to come to Professor Stokes, of whose testimony Bishop Fyson is anxious to make so much. He does not accept Bishop Fyson's Christianity. He denies the immortality of the soul in the sense that the church has taught it. He rejects the church doctrine of the eternity of punishment. A creed which

Bishop Fyson accepts declares that "Whosoever will be saved: before all things it is necessary that he hold the Catholic faith," that is, he must accept dogmas on trust however outrageous they may appear to him to be. The creed goes on to say that one part of this catholic faith is to the effect that "those who have done evil go into everlasting fire." This article Professor Stokes refuses to accept and hence can't be saved in the orthodox fashion, though some hint that he might be allowed to enter heaven by a back door. So here we have a learned Bishop quoting the testimony of a man whose belief is condemned by one of the recognised authorities of the church to which the Bishop belongs. But there is more behind. The Church Missionary Society, to which Bishop Fyson also belongs, some years ago dismissed a missionary from their service because he claimed the right to believe and preach the conditional immortality in which Professor Stokes believes. A nice bundle of inconsistencies this! Such as one often meets with in the theological world! A Church Missionary bishop endeavouring to make capital out of the testimony of a man whose belief the Society to which the Bishop belongs has not the inclination or the courage to sanction! When I say all this, let it not be thought that I consider that Professor Stokes is worthy of being quoted as a man thoroughly versed in theology, metaphysics or philosophy. Among all the intellectual men with whom it has been my privilege to converse at any length I seldom have met anyone who was so shallow on all these subjects as the great Cambridge mathematician. And this accounts for his having championed a thoroughly untenable position, that of the belief in conditional immortality. It is true that he did so in company with Professors Adams, T. G. Bonney, T. G. Tait and Dr. Archibald Geikie. But the difficulties attached to the doctrine of conditional immortality are so enormous that we can hardly suppose that in the majority of the cases now cited this special view did more than afford a temporary resting-place to minds destined to reach a higher plane of philosophic thought and belief. It is scarcely conceivable that the advocates of this view can ever have clearly defined to themselves the consequences it involves. To say that men are saved from extinction only by believing in the doctrine of the atonement, as explained by Church authorities, is to assert that all the moral magnates of antiquity—such men as Socrates, Marcus Aurelius, Confucius, Shaka Muni and Mahomet—and all the good men of modern times like Mill, Huxley, Tyndall, Leslie Stephen and Frederick Harrison, who with the greatest sincerity and seriousness reject the doctrine or live and die in entire ignorance of its nature are, as a punishment or the result of fate, doomed to annihilation. So here we have the case of a man who is undoubtedly one of the greatest mathematicians of Europe adopting and advocating a thoroughly illogical position in theology. There is a great deal to be said against the orthodox belief that all souls are immortal but it is better capable of defence than Professor Stokes' theory. What is now known as the orthodox doctrine was first elaborated by the Pythagoreans, adopted and remodelled by the Greeks received with modifications by the Christian Church and subsequently so amalgamated with Biblical teaching as to appear to all but the discerning few to be based on what is known as the Christian revelation. This teaches that the souls of all men are inherently immortal. Adopting half of the Pythagorean and Greek doctrine on the immortality of the soul, the Christian Church asserts that immortal souls are either begotten, created, or supplied at birth. Few people have the curiosity to inquire into the process of endowment. But such an inquiry is essential when we are testing the logical basis of belief. Two theories are possible. One is that souls are supernaturally supplied to the bodies that stand in need of them. The idea being that a large stock is always held in readiness for emergencies—a kind of contingent fund of immortal souls—; the other that the immortal soul awaits the beck and call of the parents of children, that is, that all children in whatever manner begotten inherit immortality. The latter theory despite the monstrosity of its consequences, is, strange to say, held by most Christians. It was this theory, combined with other philosophical considerations, that led that logical divine of the seventeenth century, Bishop Butler, to maintain that immortality is not to be denied to animals—a doctrine that has delighted many a huntsman, who has enjoyed in prospect the pleasure of meeting his favourite hounds in another world. Well, this orthodox doctrine Professor Stokes rejects as unproven, falls back on what is considered by the majority of thinkers on this subject to be a still more untenable position. What, after all, is the testimony of such a man worth? As a mathematician he is great, but as a theologian and a philosopher he has shown himself to be shallow, illogical, and sentimental. A place in his heart made him wish to save some of the perishing multitudes, but he would not go to the length of universalism and say all will be saved last, nor as far as the agnostic and free-thinker

say the whole theory of immortal souls and their destiny is imaginary and is to be placed side by side with the hundred other fictions with which men have diverted themselves in a wearisome world till they have got to think them realities.

The quotation Bishop Fyson gives us from the Professor's letter contains some astounding statements. The idea, indeed, of Huxley's name being quoted as approving for one moment of orthodox Christianity, when he spent his whole life in fighting against it. He denied in the most open manner all the cardinal doctrines of the Church. Neither was he a theist in the ordinary sense of that term. And yet Professor Stokes implies that he did not reject Christianity. This is the slipshod way in which a great mathematician deals with facts when dabbling in theology. "Let the shoemaker keep to his last." Such misrepresentation of his religious views is enough to make the great agnostic turn in his grave. Professor Stokes' inaccuracy in defining Huxley's position invalidates all that he has to say about the religious belief of the other scientific men alluded to. Unfortunately, for many years past Professor Stokes has displayed all the inherent weaknesses and unfairness of a Christian apologist, who resembles nothing so much as an ordinary barrister whose duty it is to state all that can be said on one side and nothing on the other. This is my excuse for troubling you with this long epistle. Of late your columns have abounded with one-sided statements on religious subjects, and it is only fair that occasionally public attention should be called to the existence both in the East and the West of thousands upon thousands of educated agnostics, Church-goers and non-Church-goers, who regard Huxley and men of his type as in every respect the very highest specimens of humanity that the world has produced and who sigh over the persistency with which men like Bishop Fyson cling to exploded theories.

Bishop Fyson misrepresents facts and produces an erroneous impression by his letter, and this is my reason for taking up so much of your valuable space in replying to him.

I am, yours, etc.,
October 4th, 1901.

AGNOSTIC.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—A little time ago I saw reproduced in your columns a letter received by Bishop Fyson from Sir G. G. Stokes, Lucasian Professor of Mathematics in the University of Cambridge, dealing with the religious convictions of eminent men. He named Faraday, Cayley, Adams, Clark Maxwell, Huxley, and Kitchen Parker, as amongst those with whom he had been on terms of sufficiently intimate friendship to justify him in expressing an opinion as to the views they entertained on religion.

I, on the other hand, have not had the privilege of even the slightest personal acquaintance with any of the gentlemen named and with the exception of Huxley know little about them even by repute.

With Huxley, however, I do venture to claim, what I call, "a good acquaintance through his writings," and I am a staunch supporter of his theological views; indeed, if any one thought it worth while to enquire of me what views I hold on religion, I might well reply: "If you know Huxley's views on that subject, then you know mine."

Now, as I consider Sir G. G. Stokes' statement concerning Huxley an absolutely and entire error, one, I should feel much obliged if you would afford me the opportunity of correcting it through the medium of your columns.

Sir G. G. Stokes, speaking of Huxley, says:—"He was undoubtedly a theist, but his attitude as to Christianity I should rather suppose to have been that of an Agnostic, neither accepting nor rejecting, but waiting for further light."

In reply to the above I shall quote Huxley's writings for the purpose of showing:—

a. That he was not a Theist, neither was he an Atheist, but an Agnostic.

b. That from a theological point of view he was much more an Atheist than an Agnostic.

c. Nevertheless he was probably as thoroughly religious and as admirable a specimen of an honourable Christian gentleman as could be found throughout the length or breadth of the British Empire.

First as to the statement that Huxley was a theist. On page 162, Vol. II., of the "Life of Huxley" (by his son L. Huxley) is a letter written by Huxley in Feb., 1887, to a French gentleman from which I extract the following:—

"If I may make another criticism, it is that to my mind Atheism is on purely philosophical grounds untenable. That there is no evidence of the existence of such a being as the God of the theologians is true enough; but strictly scientific reasoning can take us no further."

"Where we know nothing we can neither affirm nothing with propriety."

I presume none of your readers will dispute that he who affirms the existence of a God is a

"Theist," and he who denies the existence of a God is an "Atheist," but Huxley declares we can do neither with propriety, *i.e.*, a man cannot with propriety say he is a Theist or an Atheist and consequently, as Huxley would have been the last man to say himself what he had condemned another for saying, I consider I have proved from Huxley's own words that he was neither Theist nor Atheist.

On pages 319 and 320, Vol. I., is an instructive and amusing account of how Huxley came to invent and adopt the term Agnostic, but I should be occupying too much of your space did I transcribe it, and as I cannot see my way to condense the story in a satisfactory manner to the dimensions of a short extract, your readers must take it on trust, as one of my justifications for saying that Huxley was an Agnostic.

As regards Huxley's creed from the Theologian's point of view, I am perfectly aware that there is a difference between saying, "It is true there is no evidence of the existence of the God of the Theologians"; and saying, "The God of the Theologians has no existence." Nevertheless I cannot help feeling that from the Theologian's point of view Huxley would much more generally be called an Atheist than an Agnostic, and Huxley's own words, I am about to quote show that he had much the same feeling himself.

On page 221, Vol. I., Huxley writing to his friend Kingsley, says:—

"I know right well that 99 out of 100 of my fellows would call me Atheist, infidel, and all the other usual hard names. As our laws stand if the lowest thief steals my coat, my evidence (my opinions being known) would not be received against him."

And again on page 241, writing to the same address, Huxley says.

"But this is what the Christian world calls Atheism and because all my toil and pains does not enable me to see my way to any other conclusions than this, a Christian judge would (if he knew it) refuse to take my evidence in a Court of Justice against that of a Christian ticket-of-leave man."

As for my 3rd point, I would remark that it is quite possible for a man to accept with respect and approval, the ethics of a religion and act strictly up to the same in his daily life without pledging himself to believe the stories of supernatural events associated with that religion.

Perhaps the following from Huxley, to his friend Kingsley, page 239, Vol. I., is the best available "concise statement" of his difference with Theology:—

"Whether astronomy and geology can or cannot be made to agree with the statements as to the matters of fact laid down in Genesis, whether the Gospels are historically true or not—are matters of comparatively small moment in the face of the impassable gulf between the anthropomorphism (however refined) of theology and the passionless impersonality of the unknown and unknowable which science shows, everywhere, underlying the thin veil of phenomena."

In conclusion I would say that those who choose to read "The Life of Huxley" above referred to, will find an overwhelming amount of evidence in support of each of my assertions as to Huxley's attitude towards the Christian Religion.

Thanking you in advance for your favour, I beg to sign myself,

A DISCIPLE OF HUXLEY.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—It might possibly save a great deal of controversy over what is Christian or what is not, and of what is atheistic—if we went back to the meaning of the words, and went for this to the original language, and if for this purpose, we asked a Greek or one who knew this language from childhood. From a Greek we might learn that the word Christian sounds exactly like the word "noble" or "good" or perhaps still better *kind-hearted and honest* (chrestos); the early Christians were known thus as "the kind-hearted and honest folk." The Greek will also tell you that the gospel narrative is a simply written account, in very colloquial Greek about a god: "Kind-hearted or Anointed" who came and healed and taught the people and then was set upon, died and revived and went up again into the skies. His teaching, in this story, has revolutionised the world. That is the Greek's idea of this wonderful book.

The word "atheist" means simply, in original meaning, "one without light," that is one who is unenlightened. Such an one, of course, is not a good teacher. A teacher should be enlightened. "Theos" is Light, and means originally light. I think such simple considerations might in themselves obviate much misapprehension and lead to greater kindness between people of divergent views.

Yours truly,
Oct. 15th, 1901.

S.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The columns of a newspaper are not well suited for theological discussion especially on subjects

as confessedly difficult as the Athanasian Creed, and I shall not attempt it, but the long letters of "Agnostic" and of "A Disciple of Huxley" seem to demand some notice. Possibly the latter, whose letter contains nothing irreverent or scornful, may not quite have enjoyed the company in which he has found himself.

Of course, Professor Huxley was an Agnostic, almost the founder of Agnostics so-called; and his agnosticism was the "honest doubt" of a genuine lover of and searcher after truth, which commands the respect of thoughtful men, Christian or other. This accounts for his close and lifelong friendship with such typical Christians, men of wide learning and culture, as Gladstone and Tennyson, as Charles Kingsley and Dean Church of St. Paul's Cathedral. Neither Huxley nor any of these would have honoured with close friendship a man whom he did not believe to be sincere to the very bottom of his heart.

Professor Huxley was, as his "Disciple" has pointed out, *truly* Agnostic, neither Atheist nor Theist in a definite sense, for he considered the evidence to be too inconclusive to allow of a confident decision either way; but I incline to think that his "Disciple" is wrong in supposing that his bent was in his later years towards the negative side. What had held him back during the working years of his life seems to have been largely that as a busy man he thought time rather thrown away upon subjects on which he could not (as in physical science) reach conclusive results—a mistake surely, for on a large proportion of those subjects by which human action must be guided and through which human character is formed, the scientific kind of certainty which he looked for is unattainable. Be that as it may, no sooner had Professor Huxley resigned his public duties because of his increasing age, than he began to write in magazines on subjects closely bordering at least on Theology. He did not write of course as an "orthodox theologian" or even as a "Christian," nor at all as an Atheist; but he showed a deep interest in these subjects, and acknowledged that they were the greatest subjects and the most important, if only the truth could be got at in regard to them.

Such an attitude implies a reverent manner of thinking about "God." It is wholly different from the scorn in which "Agnostic" indulges, and is on a wholly different level, intellectual and moral. Huxley was an Agnostic as he professed to be, that is he knew that he did not know, and avoided dogmatism accordingly. He would surely never have been so illogical as to assert positively with your correspondent that "the whole theory of immortal souls and their destiny is imaginary."

Huxley became a sort of Theologian in his old age—a poor one of course, for a shoemaker should keep to his last, but anything was interesting that he wrote, and those articles, as showing what had been beneath the surface in his thoughts all the time so that they came to the surface as soon as he had leisure for them, were peculiarly interesting as coming from him. His way of thinking on such subjects was too exclusively that which had served him so well in some other departments of study. There was perhaps in him, in consequence of the triumphant progress of some branches of physical science in his hands, slight disposition to the frame of mind more witily than justly ascribed to Professor Jowett by a Balliol caricaturist:

"I am the Master of the College.
What I know not is not knowledge."

The impatience of, if not contempt for methods of investigation and proof other than his own, somewhat disabled him in matters of Theology and religious thought, for as "observation and experiment" are not the methods adequate to make a man a good poet, so also they will not reveal to a man those things which being spiritual must be "spiritually discerned."

W. A.

BETTING AT CRICKET.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—As a lover of sport I write to protest against the gambling mania that is evidently making its way into local trials of strength and skill. Since when, Sir, has a healthy game of Cricket failed to produce sufficient excitement that it has become necessary to bet upon a batsman making a certain score, or a team leaving the field victorious? A man needs all he possesses of nervous energy to go into a match, and his success will, in a large measure, depend upon his nervous condition as well as his muscular fitness, and accuracy of eye, to make a stand against a change of bowlers and other unknown contingencies of which the best player is not without a certain amount of dread. This being so I hold that a man cannot do his best at the wicket if he knows that his failure to score a certain figure may cripple his friend, monetarily, for months. Apart from the morals of the question.

I am sure it would be a benefit to players, and to young men especially, if some action could be taken

by Clubs to prevent the degeneracy of true-old, fashioned sport.

Thanking you in anticipation for the favour of inserting this,
I beg to remain, yours faithfully,

F. PARROTT.

9, Bluff, Yokohama, Oct. 16th, 1901.

THE MORMONS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Some time ago Mr. Heber J. Grant stated in your columns that the Mormon Church does not encourage and teach polygamy.

In repudiation of this statement, permit me to give a few condensed extracts from "Anti-Mormon Leaflets," published by the "League for Social Service."

Two years ago, at a convention of Mormon young people's societies, one of their twelve apostles stated that "belief in polygamy is as much a part of the Mormon faith to-day as it ever was," and that the young people "could not deny this part of the Mormon belief without at the same time denying the prophet Joseph Smith." At another young people's conference, a few months later, another apostle, a notorious polygamist, is reported in the papers as saying in his address that he felt "to sustain the principles of the Gospel even to the extent of taking more wives if necessary."

The well known polygamist, B. H. Roberts, advocates and defends the rightfulness of polygamy. An elaborate article of nearly eleven pages closes with these words: "And the fact of God's approval of plural marriage in ancient times, is a complete defence of the righteousness of the marriage system introduced by revelation through the prophet Joseph Smith."

If Mormon missionaries instead of disseminating their mischievous doctrines, sugar-coated with Christian phraseology, were honest enough to tell the real truth about Mormon doctrines and practices, they would not make a single convert among decent and intelligent people; but having been trained in the school of deception from their earliest infancy, they come into the homes of unsuspecting people to lead them into the same false ways in which they have been reared. It is perfectly consistent for them to practice all sorts of cunning and deception, as their god and their prophets and their teachers have set them abundant examples in these lines from the beginning.

The position of the Mormon officials, in regard to polygamy, is two-faced and deceiving. In 1850, when Apostle John Taylor was holding a discussion with some Protestant ministers at Boulogne in France, and was denying that there was any polygamy in the church, he himself was living with six wives. It seems next to impossible for them to make an honest and truthful statement on the subject to the outside world. There is almost sure to be some evasion, or equivocation, or deception about it. For example, when they deny that polygamy is practised in Utah, they are simply hiding behind a deceiving technicality. For by polygamy people in general understand living with two or more wives, which is the right meaning. But in Utah there is a peculiar legal technicality which makes the offence of polygamy to consist in marrying an additional wife or wives. So although a man may be living with half a dozen wives, yet if he has not married an additional wife since President Woodruff's manifesto in 1890, recommending the suspension of plural marriage, these Mormon prevaricators say he is not practicing polygamy.

That this manifesto was not a repudiation of the doctrine of plural or celestial marriage, witness the language of President of the Church, W. Woodruff, September 24, 1890:—"My advice to the Latter-day Saints is to refrain from contracting any marriage forbidden by the law of the land."

This doctrine of polygamy is both sacred and fundamental to the Mormon Church, notwithstanding Mr. Grant's statement to the contrary. The Mormon Church believes that Jesus Christ was a polygamist. The Mormon Church teaches that God is a polygamist; the natural father of all intelligent beings in heaven, earth and hell; that angels, men and devils are his off-spring by procreation, or natural generation; and that Adam is the father of Christ's human nature, as Brigham Young was father of his children.

The following quotations from Mormon works are taken word for word:

1. "All those who have this law," (plural or celestial marriage) "revealed unto them must obey the same." . . . "And if ye abide not in that covenant," (plural or celestial marriage) "then are ye damned; for no one can reject this covenant, and be permitted to enter into my glory."—Doctrine and Covenants, Sec. 132.
2. "If plural marriage be unlawful, then is the whole plan of salvation, through the house of Israel, a failure, and the entire fabric of Christianity without foundation."—Comp. p. 125.
3. "Those who denounce patriarchal marriage will have to stay without and never walk the golden streets."—Bible and Polygamy p. 158.

4. "God did approve of a plurality of wives as practiced by his ancient servants. . . . And that which he approves. . . must be not only not bad but positively good, pure and holy."—Improvement Era, May, 98.

5. "He" (Adam) "is our Father and our God, and the only God with whom we have to do. . . . When the Virgin Mary conceived the child Jesus, the Father had begotten him in his own likeness. He was not begotten by the Holy Ghost. And who is the Father? He is the first of the human family."—Journal of Discourses, Vol. I, p. 50, sermon by Brigham Young.

6. "If none but Gods* will be permitted to multiply immortal children, it follows that each God must have one or more wives." . . . "The Evangelists do not particularly speak of the marriage of Jesus." . . . "One thing is certain, that there were several holy women that greatly loved Jesus—such as Mary, and Martha, her sister, and Mary Magdalene; and Jesus greatly loved them and associated with them much." . . . "If all the acts of Jesus were written, we, no doubt, should learn that these beloved women were his wives."—The Seer, Vol. I, pp. 158, 159.

7. "If at a marriage of Cana of Galilee, Jesus was the bridegroom and took unto him Mary, Martha, and the other Mary, whom Jesus loved, it shocks not our nerves." . . . We say it was Jesus Christ who was married, whereby he could see his seed before he was crucified. I shall say here that before the Saviour died he looked upon his own natural children as we look upon ours. When Mary came to the sepulchre she saw two angels and they said unto her, 'Woman, why weepest thou?' She said unto them, 'Because they have taken away my Lord or husband.'—Apostle Orson Hyde, president of the Twelve Apostles.

8. "And again, as pertaining to the law of the priesthood: if a man espouse a virgin, and desire to espouse another, . . . if he have ten virgins given unto him by this law, he cannot commit adultery, for they belong to him, and they are given unto him, therefore he is justified."—Pearl of Great Price, pp. 123, 126.

If Mr. Grant and his associates here disavow polygamy they have rejected one of the corner-stones of the Mormon faith. "They shall be damned, saith the Lord God." (Doctrine and Covenants). Consequently they can not be missionaries of the "Church of Jesus Christ of Latter-day Saints" (Mormon Church), and must so state in their application to the Prefectural Authorities of Kanagawa. If they, on the other hand, apply as representatives of the Mormon Church, their statements as to non-teaching of polygamy are contrary to facts, and it is to be hoped that not only technicalities but the merits of the case may cause a final rejection.

Respectfully yours J. R. BIRKELUND, M.D.
Tokyo, Oct. 8, 1901.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—It is a source of great pleasure to many citizens of the U.S. that you have so ably exposed the Mormons in your influential paper. When more than 1,300 Mormons had been sentenced to imprisonment and fine the celebrated manifesto of Sept. 24th, 1900, was issued, and even so able a judge in Utah as Charles S. Zane said a year later, "I do not believe plural marriages have been sanctioned by the officers of the Mormon Church since that manifesto." But the people of the U.S. were fooled, and Utah was admitted as a State, and Mormon Missionaries with two wives each are sent out into the world to propagate their doctrines. What these doctrines are must be gathered from their published works. I send you some extracts which are vouched for by Presbyterians, Congregationalists, and Baptists in Utah. They are marked in the enclosed tract. I leave it to your judgment whether such shocking statements are worth reproducing at this time.

October, 11th, 1901.

D.

1. "God himself was once as we are now, and is an exalted Man, and sits enthroned in yonder heavens. That is the great secret."—Journal of Discourses, Vol. VI, p. 3, First Column, Sermon by Joseph Smith.

2. "It is the first principle of the gospel to know . . . that he was once a man like us; yea, that God himself, the Father of us all, dwelt on earth, the same as Jesus Christ himself did."—Same, 2d Column: 1. "He" [Adam] "is our Father and our God, and the only God with whom we have to do. . . . When the Virgin Mary conceived the child Jesus, the Father had begotten him in his own likeness. He was not begotten by the Holy Ghost. And who is the Father? He is the first of the human family."—Journal of Discourses, Vol. I, p. 50, Sermon by Brigham Young.

* The Mormon Church is Polytheistic. It teaches a plurality of Gods; and that these became Gods, having been men, they became Gods by practicing plural or celestial marriage, and the other Mormon principles.

2. ". . . And also with Michael, or Adam, the Father of all, the Ancient of Days."—Pearl of Great Price, p. 60.

3. "Adam fell, but his fall became a matter of necessity after the woman had transgressed. . . . In the language of the Prophet Lehi, 'Adam fell that men might be. . . . No wonder Father Adam fell, and accompanied the woman, sharing in all the miseries of the curse, that he might be the father of an innumerable race of beings who would be capable of becoming Gods.'—Millennial Star, Vol. XI, p. 501.

Ninth—The Mormon church believes in Polygamy. The doctrine is to them both sacred and fundamental. They believe and teach that Jesus Christ was a polygamist. The manifesto of September 24, 1890, was not a repudiation of the doctrine of plural or celestial marriage, and did not claim to be such. It was, as all honest Mormons freely confess, only a suspension of the practice for the time being. They hold the principle to be as eternal as God himself.

1. "If none but Gods will be permitted to multiply immortal children, it follows that each God must have one or more wives." . . . "The Evangelists do not particularly speak of the marriage of Jesus." . . . "One thing is certain, that there were several holy women that greatly loved Jesus—such as Mary, and Martha, her sister, and Mary Magdalene; and Jesus greatly loved them, and associated with them much." . . . "If all the acts of Jesus were written, we, no doubt, should learn that these beloved women were his wives."—The Seer, Vol. I, pp. 158, 159.

"SOLE."

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Professor Denning is right and the grammatical editor of the Mail is wrong. The Constitution of the U.S. reads:—"The Senate shall have the sole power to try all impeachments." Put in the intransitive form it would read as Prof. Denning's sentence: "To try all impeachments is the sole power of the Senate." There is no obscurity in this for a lawyer; and in this manner the word is evidently used in the sentence criticized. It is strange to hear the editor repeat that, "To say that anything 'is the sole right of a person' or 'the sole function of the State' means that the person has no other right nor the State any other function."

It should have been remembered that as a law term "sole" most always mean "exclusive" and never only. There is another meaning of this term in law, viz., "unmarried, single."

Very truly, E. SNODGRASS.
October 12th, 1901.

YACHTING.

The 39-raters race arranged for Saturday afternoon resulted in favour of *Mary*, which got home at 5h. 25m., *Spray* which came in at 5.40.3; having an allowance of 6m. 30s. which made her second. The usual two record points went to the winner, and one to the second boat. The race was on the whole quite disappointing, the wind being very light.

The cruisers started for a ten mile competition for the Lady Member's Cup and a second prize, and here again the result was unfortunate only one boat coming home, namely *Asagao*, and as the donor of the first prize is interested in the craft and refused to accept the win, the race had to be resailed.

The 21-raters contest was hardly less satisfactory. *Edna* took first prize and 2 record point *Abunai* second and one point, *Tixen*, the only other craft that started, being a very bad third.

FIRES.

Fire broke out in a rice shop occupied by Amagasa Tominojo, at Hanazakicho, Yokohama early on the morning of the 11th inst. but flames were got under at once by persons of the neighbourhood. The proprietor was arrested by the Tole police immediately on suspicion of setting fire to the house himself. It is stated that the shop was opened in February last and the proprietor insured it heavily.

Fire broke out in a bath house of the Sakai barracks, Chiba Prefecture, on the afternoon of the 13th inst. One barracks and bath house was destroyed. On that day many of the officers and soldiers were absent at the manoeuvres, many persons in the neighbourhood assisted in extinguishing the flames.

NORTH CHINA INSURANCE COMPANY, LTD.

Following is the report prepared for presentation to the tenth ordinary general meeting of shareholders of this company to be held at No. 10, the Bund, Shanghai, on Tuesday, the 22nd October:—The Directors beg to submit, for the information of Shareholders, the annexed duly audited statement of the Company's accounts to the 30th June, 1901.

1900.—An interim dividend of 5 per cent., amounting to Tael 45,454.55, was declared on the 1st May last, and after deducting this from the Balance of the Working Account, there remains a sum of Tael 256,191.94, which the Directors recommend should be appropriated in the following manner:—

A Final Dividend of 5 per cent. on Paid-up Capital,

A Bonus of 10 per cent. upon Contributory Premiums,

Tael 100,000 to be placed to the Credit of the Reserve Fund, raising the Reserve to Tael 360,000,

And the Balance to be retained to meet further liabilities.

1901.—The Balance of Working Account to the 30th June amounts to Tls. 216,802.60.

NEWS OF THE WEEK.

The *Kobe Herald*, translating a telegram received by the *Osaka Mainichi* from London, says there are 15,000 miners idle at Liege.

Tanaka Kota, living at Kannan-mura, Tagatagori, Shizuoka Prefecture, a secretary to the village office of Ohira-mura, Suinto-ori, stole some ten yen official money on the 9th inst. and absconded. He spent the money at Mishima and Odawara, and then confessed the matter at the Toke police station on the afternoon of the 13th inst.

A new organ is to be erected at the expense of the Chinese Government in the chapel at St. Augustine's College, Canterbury. It is intended as a memorial of the Rev. Sydney M. W. Brooks, formerly a student at St. Augustine's, who was the first victim of the Boxers, being murdered in Shantung at the end of 1899.

Detailed information of the wreck of the steamer *Amizu Maru* has now reached Tokyo. It appears that she left Mitsu-ishi, Hidaka Province, Hokkaido, on the afternoon of Oct. 8th bound for Hakodate, and that on the following day her engines became disabled in stormy weather and she went ashore on a sand bank off Yakumo-mura. Fourteen of her crew and fourteen passengers were saved. The vessel is a total loss.

Two police-constables named Kawauchi Sanji and Ikeda Iwanatsu, of the Shiba police station, while walking in private clothes on the morning the 16th inst. saw a man leave a house with a cash box under his arm. This was at Yenokizakamachi. Kawauchi at once followed him, when the man threw the box into the street and took out a big knife, cutting both men badly. They were sent to the Jikei Hospital at once, but are not expected to recover.

A terrible disaster occurred in a pawn shop at Yamanashi early on the morning of the 13th inst. Sugimoto Genichiro, living at Tomihama-mura, Kita Tsurugori, Yamanashi Prefecture, was in partnership with his parent from long ago. Quarrels occurred over the distribution of profits, and eventually Sugimoto attempted to kill his parents while they were asleep. For this purpose he procured some dynamite which he put under the house. He then blew up the place, smashing to pieces. The man has been arrested.

The overhauling to which the various royal palaces in Great Britain are being subjected, by order of King Edward, is said to be leading to extraordinary discoveries. Garrets and cellars closed for over a century are being cleared and thrown open. Recently a magnificent portrait of Queen Caroline, by Lawrence, was found along with some other paintings in a garret at Windsor

Castle, and now an old fourgon, or velvet-lined van of great size, filled with splendid silver and silver-gilt plate, has been found in a stable at St. James Palace which has not been used for 150 years. The silver in question belonged to Queen Anne and was used by her when giving grand dinner parties at Kew, Hampton Court and other suburban Palaces to which the van was dispatched from St. James'. The silver was black and undoubtedly had remained in the van since the time of the death of Queen Anne.

The *Kobe Herald* translates the following London telegrams from the *Osaka Mainichi*:—The British field hospitals are mobilising at Peshawur as a precautionary measure.—The Naval Court of Enquiry into the loss of the torpedo-boat destroyer *Cobra* resulted in a finding that the centre of the vessel was over-weighted.—Another torpedo destroyer has buckled.—The Venezuelans lack commissariat arrangements and are ravaging the country. The bulk of the forces remain in Goajira peninsula.—The new Australian tariff excludes New Zealand trade. Reprisals are threatened by the New Zealand government.—There has been a disastrous fire at Cape Town. The damage amounts to a quarter of a million sterling.

The Rev. W. A. Cornaby writes to a home paper:—It is not sufficiently realised in England that since 1644 there has been neither Chinese Emperor nor Central Chinese Government in China. The key to half the situation lies in the fact that the Manchu-Tartars hold China under conditions similar to those which might be imagined did Finland govern Russia—thus being nervous both of Chinese reform and Western influence. And of the governing class of Manchu nobles, the name that residents in China are watching most is that of Yung Lu. It was the miscarriage of his arrest for treason in 1898, and his working on the fears of the Empress-Dowager, which is understood to have brought about the *coup d'état* of that year. The first suggestion of a general massacre of Western folk seems to have been his, for a copy of a letter of his to that effect was secured as early as the Spring of 1900. He is now one of the "three tigers," so named by the Chinese, who control the Manchu Court. It is understood in China that while the Empress-Dowager, Prince Tuan, Tung Fu-hsiang, and others have been his catpaws, this foe-in-chief of Chinese and the Western interests has his eye upon the Throne, as once he had.

NOTES FROM CHINA AND THE SOUTH.

A recent statement gives the Chinese infant mortality of Hongkong as 928 per thousand as against that of 748.6 for Calcutta.

The rainfall in Hongkong last year was 73.73 inches, as compared with 72.7 in 1899. The wettest month was June, and the driest September.

One hundred new jinrikishas, the first instalment of a lot of 300 ordered in Japan, have arrived in Hongkong and licenses were issued for forty of them on Oct. 4th.

Sir James Mackay, who with Mr. H. Cockburn and Mr. C. J. Dudgeon, will sit as a Commission at Shanghai on the subject of tariff revision, was to start for China about Oct. 10th.

The Governor of Hongkong has approved of the employment of six additional rat-catchers on the same terms as the four already employed, and that a Portuguese foreman be engaged to supervise their work at a salary of \$50 per month.

George A. Raymond was hanged on Oct. 27th at Manila for robbery, rape and murder. He enlisted in the U.S. Army at Manila, having deserted from the British Army at Singapore. He went to Pampanga and tried to raise a gang of outlaws.

The *China Mail* stated on Oct. 7th that the rebels in the Hsing-ning district had destroyed another Basel Mission station. It seemed that the rebels were slowly making progress towards

Kia-ying-chow, and on their way burned the outstation of Shakma, a town where they met and defeated a body of militia. The native preacher in charge of the station escaped. The rising was said to smack of the Boxer movement of last year; and the local authorities did not seem to have taken adequate measures to cope with it.

A London telegram, dated 20th September, said:—Major Manifold, R.A.M.C., two engineers and a small escort of Gurkhas, equipped for nine months, have left Peking, and, it is understood, are proceeding to India, exploring *via* Szechuan and Yunnan, and possibly Tibet.

The Chinese have increased enormously in the Federated Malay States of late, but there is still a vast disparity between the sexes; so great in fact that, in the total figures for the States, there are 491,313 males, of all races, to only 185,825 females. In the last decade the natives of India have increased from 20,177 to 52,501.

The marriage took place at Foochow on Saturday, the 21st ult., of Miss Laura Moorehead, eldest daughter of Mr. Theodore Moorehead, of the Imperial Maritime Customs at Foochow, with Mr. W. H. Wallace, Acting Agent of the Hongkong and Shanghai Bank, son of the late Alexander Wallace, Esq., M.D., of Colchester.

The Governor of Hongkong has approved of a notice being translated into Chinese and disseminated broadcast all over the colony and posted in prominent positions wherever the Chinese congregate, as follows:—"As without doubt consumption is spread by means of the sputum, people are advised not to spit, especially in public places where men most congregate."

The Secretary of the Maha Bodhi Society writes from Calcutta to a friend in Singapore as follows:—"The wonderful discoveries made in Central America of Buddhist temples have shed a ray of glory on the past Buddhist missionary activity of the Chinese. Five Chinese missionaries, a thousand years before Columbus discovered America, visited Central America, and preached Buddhism. The Spaniards under Cortez and Pizarro, a thousand years later, went and destroyed the country."

At the Census taken in January, 1901, there were 5,501 officers and men with 2,139 camp followers resident in the Colony of Hongkong, making a total of 7,640. The Colony contributed \$591,789.78 (17½ per cent. of its revenue) in aid of Military Expenditure in Hongkong, besides \$24,800.00 for Defence Works, making a total of \$616,589.78. There was no expenditure towards Barracks Service during the year. The total establishment of the Volunteer Corps was 336 of all ranks as against 350 in 1899. The expenditure on this Corps, which is borne entirely by the Colony, was \$39,096.33 for the year. The European Police, 153 in number, and the Indian Police 366 in number, are a Constabulary Force, being armed with Martini-Enfield carbines.

The death took place in Hongkong on Oct. 4th of John Garner, who left the Volunteer Headquarters about ten o'clock the same evening the worse for liquor, and was evidently making his way to the Racquet Court where he was lately in the habit of sleeping. The road, which belongs to the Military, is quite unguarded by any rail or wall, and it is supposed that Garner stumbled over the bridge in the darkness. When found, he was quite dead, having sustained a fracture of the skull. Garner, who was quite destitute, was formerly a sergeant in the King's Royal Rifles. He got his discharge in Hongkong, and afterwards joined the Naval Yard Police, where he attained the rank of sergeant. He was last employed by the Land Investment Company, but had been out of employment for some time.

Fire broke out in a theatre known as the Shin-chiza at Yokkaichi on the night of the 9th inst. and seven houses were destroyed.

TRADE OF KOBE DISTRICT FOR 1900.

BY MR. CONSUL HALL, H.B.M.'S SERVICE.

The trade of this Consular district in the year 1900 was remarkable for the contrast between its promising opening and its disappointing close. In spite of the expansion in imports the year's business, with the exception of the first quarter, was dull and unprofitable. Two causes mainly contributed to this result. First came the tightness in the money market, experienced acutely about the end of March; and then the political complication in North China, which reached its dramatic crisis and checked business about the end of May. As regards imports, the godowns of the foreign merchants at the end of the year were glutted with goods ordered, but of which, on various pretexts, such as inferiority to samples, &c., the Japanese buyers refused to take delivery.

Imports.—Yet these drawbacks notwithstanding the imports of Kobe and Osaka in 1900, were the largest on record, exceeding by more than £500,000 those of the exceptional year, 1898, the last year of the old 5 per cent. tariff, when the abnormal inrush of goods to escape the heavy new duties inflated the Customs returns, and a noteworthy fact is that no part of the increase is due to the largest of the staples of import, raw cotton, which in 1900 amounted in value to £5,288,000, nearly £250,000 less than in the preceding year. The shares contributed by the sources of supply were as follows:—Chinese, 297,000 bales; American, 252,000 bales; India, 207,000 bales; Egyptian, 6,000 bales; total, 762,000 bales.

Last year the import of cotton piece-goods was more than double that of 1899, both in quantity and value. Yet in spite of this increase in the figures, the past year must be characterised as a very unsatisfactory one from an importer's point of view. Dealers at the beginning of the year ordered with more than their customary freedom, from a persuasion that prices were safe and not likely to recede in the near future. When the gravity of the troubles in China, however, became fully known, the outlook at once underwent a marked change.

It was scarcely to be expected that the high level of prices obtaining for metals of nearly all kinds during 1899 could be permanently kept up, but it lasted for the first quarter of 1900, and the figures for the whole year's import show an increase over 1899 of 33 per cent., the largest increment being in bar and rod iron, of which £236,000 worth was taken, being more than double that of the previous year.

Kerosene.—A large rise took place in the import of kerosene—namely, from less than 20,000,000 gallons, value £330,000, in 1899, to well over 24,000,000 gallons, value £566,000, in 1900, being an increase in quantity of over 23 per cent., and in value of over 71 per cent. Actual deliveries to buyers show an increase in quantity of 7 per cent. The expansion has taken place entirely in the best of the American brands, the "Atlantic," all other brands having declined. Owing to the cheapness of the Echigo oil the demand for it is steadily increasing.

Sugar.—The great feature of the year's trade in sugar is the swift and vigorous rise of Austro-Hungarian beet sugar into the position of a formidable rival of the German article. In 1899 not quite 6,400 tons, about two-fifths of the German figures, were imported, but in 1900 more than quadruple—namely, 26,000 tons, or eleven-twelfths of the German article, came in and the movement in favour of the Austro-Hungarian is still going on.

Exports.—As already noted, the exports from Kobe show a falling-off of over 7 per cent., but as those of Osaka increased by over 35 per cent., the total decrease last year in the two ports was somewhat under 3 per cent. of the export trade. The check in the export trade of cotton yarn was caused by the military outburst in North China, and yarn, the leading staple, felt first and worst the disastrous effect of the disturbance. Judging from the normal rate of increase, it seems clear that the Boxer disturbance and its prolonged consequences cost this port the loss of about half a year's income from a single staple, amounting, on a moderate computation, to £1,250,000.

Copper and Matches.—The competition between copper and matches for the second place in the list of exports resulted last year again in favour of the metal, but matches came third easily. In 1900 nearly 19,000,000 gross, value £376,000, were sent out, as against over 19,000,000 gross, value £389,000, in 1899. There has been a tendency of late to increase the number of sticks in a box up to 120, owing, no doubt, to a desire to make the laying down cost cheaper, as freight and handling charges are, as a rule, calculated at so much per case. Another noticeable feature in the manufacture of this article is the increasing introduction of machinery to take the place of hand labour, which is steadily getting dearer.

Matting.—The export in 1900 of this cool and artistic floor-covering was £330,000, as against £377,000 in 1899, a decrease of over 12 per cent.

Yet the total amount of orders for 1900 was at least 20 per cent. in excess of the previous year. This fact made competition more keen, and induced the makers to manufacture grades which were rejected by the Matting Guild inspection as unfit for export. The decrease is further accounted for by the fact that there was an abnormal demand for Japanese mats for home consumption.

Osaka's Foreign Trade.—A notable feature of the year's commercial developments is the expansion of Osaka as a port of foreign trade. Its position as the manufacturing centre of Japan and of the coasting trade reserved for native shipping is a long-established fact, but as a port for trade with foreign countries direct its importance has hitherto been so small that its imports and exports have always been incorporated with those of Kobe in the Consular Trade Reports. But a change in this respect will be necessary before long; for owing, no doubt, to the great scheme of harbour improvement now in progress the foreign trade of Osaka has entered on a new phase, especially as regards the expansion of exports. A scrutiny of the trade returns for the last decade shows that during the seven years 1891-97 the annual average value of Osaka's foreign commerce was less than £600,000, the imports being more than quadruple the exports, whilst in 1898 for the first time the exports nearly balanced the imports, and have approached more nearly to equality in each of the two succeeding years. As yet, the range of Osaka's foreign commerce is confined to the neighbouring seaboard of Eastern Asia, but when the new harbour improvement works shall have been completed, some seven years hence, the merchants of the city entertain anticipations of its entering into serious competition with Kobe for a good share of the trade with Europe and America.

Distribution of Trade.—Of the total imports of the port of Kobe, exceeding £14,000,000, £5,250,000, or over 37 per cent., came in under the British flag; next came the United States, with £3,830,000, or over 27 per cent.; then China with £1,250,000 or 12 per cent. Of the remaining quarter of the imports, Germany, with £1,250,000 sterling, furnished more than a third, or nearly 9 per cent. of the whole, and France, with less than £500,000 sterling, over 3 per cent.

The exports are roughly distributed in the following proportions:—About 45 per cent. go to countries under the British flag, about 30 per cent. to China, and about 18 per cent. to the United States, leaving 7 per cent. for other countries. Of the British exports less than 8 per cent. go to the United Kingdom, some 30 per cent. going in the first instance at all events to Hongkong, the distributing centre for South China, and at the same time an entrepot for an unknown fraction of goods for ulterior destinations.

No account is taken of the nascent foreign trade of Osaka, and as it seems to be on the threshold of a new departure, it may be as well to note that both for imports and for exports Korea is its best customer, furnishing more than half its imports, and taking fully three-fourths of its exports, the rest being drawn from and scattered over Eastern Asia from Vladivostok to the Philippines.

Shipping.—In 1900 the number of merchant vessels entered was 1,477, and 2,866,812 tons, as against 1,378 ships, 2,545,173 tons in 1899. The British tonnage increased by 61,000 tons, less than 6 per cent.; the Japanese tonnage increased by 188,000 tons, over 23 per cent.; the German tonnage increased by 200,000 tons, or 118 per cent. This notable expansion in the shipping of Germany is due to the inauguration in the spring of last year of the fine new line of mail steamers of the Norddeutscher Lloyd, which have become the favourites for passengers of all nationalities travelling between Europe and the Far East. This new departure raised German shipping to the third place in the list, the primary being held as of old by the British with 460 ships, 1,180,000 tons; the second place by Japan with 745 ships, 988,000 tons; Germany following with 119 ships, 370,000 tons.

TRADE OF NAGASAKI FOR 1900.

BY MR. ACTING-CONSUL FORSTER.

Foreign trade in 1900 amounted to £2,234,827, consisting of imports, £1,530,916, and exports, £693,911. While the value of the total trade in 1900 shows an increase of £463,142 over that of the preceding year, it increased only to the extent of £178,809, as compared with the average total trade for the past five years, the exports and imports showing an increase over the average for the same period of £74,117 and £104,092 respectively.

The value of the foreign trade at four other ports, Moji, Karatsu, Kuchinotsu and Hakata, included within the Consular district of Nagasaki, amounted in 1900 to £1,478,160, consisting of imports, £428,329, and exports, £1,049,831, showing an increase in imports of £338,800, a decrease in exports of £16,161, and an increase in the total trade of £312,639.

Coal.—There is an increase in the import of coal

to the extent of 53,419 tons and £122,687 in value. Of the total import of coal, amounting to £183,682, the whole came from English and Welsh mines with the exception of a small portion valued at £27,000 from the United States. The latter coal, known as Pocahontas, would not appear to have met with the favourable reception anticipated in last year's report. Owing to the complications in China and other political causes, the trade in English coal was most lucrative to holders of stocks; the competition amongst the foreign navies to obtain it enabling sales to be made at highly remunerative prices.

The import of Machinery shows an increase of £14,824 over that in 1899. The United States continue to be the only competitors in this article of import; the shares of the former of the total for 1900 being £25,499, and of the latter 15,648. Germany was represented to the extent of some £850 only.

Kerosene.—The import of kerosene oil shows an advance in 1900 as compared with 1899 of 4,529,858 gallons in quantity and £147,187 in value. The kerosene trade is entirely in the hands of two companies, one American and the other British. The supplies of the former are drawn from the United States, those of the latter principally from the wells in Borneo. The oil from Borneo is imported in bulk and put into cases and cans locally, that from the United States is imported in cases of two cans. The latter brand continues to be the favourite, the deliveries during 1900 being as follows in cases of 10 gallons: American, 849,990 cases; bulk, 161,828 cases.

Sugar.—The fact that there are no refineries in Kiushiu has necessitated the importation of a higher grade of sugar into Nagasaki than into Kobe or Yokohama. The principal portion of the trade is in the hands of the Hongkong refineries, which supply a sugar refined from the best qualities of Java and Philippine Island cane. Beet sugar from Germany and Austria-Hungary is also imported.

Moji.—The value of the import trade of the port of Moji in 1900 amounted to £344,503, an increase of over £280,000 on that of the previous year. The increase was common to almost every article of import, it being most marked, however, in machinery, metals, materials of bridges and buildings, raw cotton and railway carriages. The last section of the trunk line connecting Kobe with Shimonoeki was under construction, and it was consequently more convenient to land the material at Moji than carry it on to Kobe, whence it would have been necessary to bring it back along the line to the places where it was required. Another cause of the increased import of machinery may be traced to the numerous coal mines in the northern portion of the island of Kiushiu, all of which have direct railway communication with the port of Moji.

Exports.—The exports from Nagasaki, with the exception of that of coal, call for little notice. Products of fisheries show a decrease as compared with last year of £16,265. An item of £12,883 appears under the heading of Portland cement. This article is produced in large quantities in the various factories in the southern island; the whole of the export goes to China and Korea. Manufactured articles such as paper, textiles, lacquered ware and porcelain show little change on last year's figures.

Export of Coal.—The export in the aggregate shows an increase of £19,194 in value and 31,770 tons in quantity, as compared with the preceding year. The superior convenience of Moji as a coaling port for ships other than mail steamers, is undoubtedly gradually affecting the coal export of Nagasaki. Large vessels can obtain cargoes of coal at the former port, which lies on the direct route from Kobe and Yokohama to Shanghai, Hongkong, and the Straits Settlements, the principal markets for Japanese coal at cheaper rates than in Nagasaki. The total export of coal from the port of Moji during the year under review amounted to 949,638 tons, valued at £501,033, in increase of 117,412 tons on the figures for 1899. From the two remaining ports within this Consular district Kuchinotsu and Karatsu 692,490 tons of coal, valued at £443,207 were exported during the past year.

Shipping.—The aggregate tonnage of the merchant shipping under all flags entered both in the port of Nagasaki and in all the five ports comprised within the Consular district in 1900 shows a considerable advance on that of the preceding year, the most marked increase being in vessels under the Japanese flag. Russian shipping has always been a prominent feature at Nagasaki, and it, as in 1899, ranks next, both in numbers and tonnage, to that under the British flag. Sixty-one steamers of the Russian Volunteer Fleet of 202,311 tons visited the port on their outward and homeward voyages. Fifty-eight steamers of 76,876 tons belonging to the Chinese Eastern Railway Company entered the port in 1900. The fleet of the latter company consists of ten vessels, the *Haikar*, of 3,514 tons, the *Harbin*, of 2,303 tons, the others ranging from 1,800 to 150 tons. A regular service is maintained under mail contract with the Russian Government between Vladivostok

and Port Arthur *via* Nagasaki; the other lines being from Shanghai to Vladivostok *via* Chefoo, Port Arthur, Nagasaki and Korean ports; and from Vladivostok to Nicolaiefsk *via* Saghalien ports. During the past year, two vessels, the *Roorea* and the *Zein*, each of 445 tons, were built in Shanghai specially for the latter trade. The *raison d'être* of the company is to act as a feeder to the Trans-Siberian Railway. The principal office in the East is at Port Arthur, the headquarters of the company being at St. Petersburg. The enterprise is heavily subsidised by the Russian Government, and may, indeed, be looked on as a Government undertaking to facilitate the transport of goods to and from the railway.

Shipbuilding.—The only industry at Nagasaki is that of shipbuilding, the Mitsu-Bishi Dockyard and Engine Works constituting a large factor in the present prosperity of the place by the number of vessels it attracts for the purpose of docking and repairs. The supply of its requirements is also a large item in the import trade of the port. No expense is spared by its enlightened proprietors to bring it up to the highest standard of efficiency, and the work turned out in the local shipbuilding yard compares favourably even with that of the Clyde. During the past year new shops, blacksmiths', joiners', and machine hammers ranging from 7 tons to $\frac{1}{2}$ cwt. With the view of educating young hands for the machine shop, a technical training school has been built with accommodation for 250 boys.

Harbour Works.—Good progress has been made during the past year in the filling in of the upper end of the harbour in connection with the harbour improvement scheme, and it is hoped that by the end of the current year three-fourths of the total area to be filled in will be completed. Of the necessary dredging operations one-half is already finished. During 1900 a sum of £191,193 was expended on the works, the estimate for the current year being only £56,000. The materials for the manufacture of concrete to be used in the facing of the embankments is obtained from France, the United Kingdom and the United States supplying the bridge and other ironwork.

General Remarks.—From the foregoing report, it will be seen that the importance of Nagasaki as a shipping port is beyond question, affording as it does a perfectly safe anchorage, an unlimited coal supply, and docking and repairing facilities of the highest class. The present prosperity of the place is entirely due to the visits of the floating population on board vessels of war and mail steamers, and more especially during the past year to the calls of the military transports of various nations. Whether the desire frequently expressed locally that Nagasaki should be made a free port, reference to which subject was made in last year's report, will be realised must be left to be seen, but in any case it must be conceded that its geographical position, its insignificant value of exports, with the exception of that of coal for ships' use, and the fact that its present prosperity is entirely due to the shipping visiting the port, constitute strong arguments in favour of the scheme.

TRADE OF HAKODATE FOR 1900.

By MR. CONSUL PLAYFAIR.

The total value of the foreign trade of Hakodate during the year 1900 was £518,945, showing an increase over the figures for 1899 of £126,706. The increase is apparent in value though not always in quantity in every article of import and export, with the two exceptions of dried fish and timber and planks; the latter article, indeed, disappears from the export table. The cause, of course, is the war in China, which country, under ordinary circumstances, takes the greater part of the dried fish and timber. Straw ropes and bags for packing purposes appear for the first time in the export table.

The Harbour Improvement Works are now complete. Dredging is still carried on in the harbour. The patent slip, capable of taking vessels up to 1,200 tons, is now finished. Work on the dry dock is being prosecuted vigorously, but it is hardly likely to be finished this year.

Fisheries.—The cod fishing in Saghalien was very successful last year. Japanese enterprise is most conspicuous, though the Russians, in whose name the permits are issued, reap a financial harvest by leasing their permits to Japanese schooners. The men employed in these fisheries are mostly from Hakodate. For some time past the Russians have been jealous of the fishing privileges along the Siberian Coast granted to Japanese subjects, as they are desirous of preserving them for their own nationals. Another reason for the dislike to Japanese is the unsatisfactory methods pursued by them, which are said to be causing damage to the fisheries, and to the salmon fishery in particular. Last year enormous quantities of fish were specially prepared for use by foreigners, in the hope that the armies in North China would consume them. This expectation

was not realised and some exporters lost heavily in consequence.

Gold.—The washing for gold dust is being energetically carried on, and there is reason to believe that the utilisation of proper machinery will render it possible to work the gold mines of Hokkaido with fair profit. Two foreign firms and a Japanese capitalist of Yokohama are reported to have decided on inviting experts from California. I learn from two foreign miners who spent the greater part of last year at the mines in Esashi province, that the output for the year will probably be somewhat less than in 1899, owing to stricter supervision. The gold is all surface-gold obtained by washing. Labour is good and plentiful, and modern appliances are being adopted.

Petroleum.—Up till last summer but little interest was taken by the public in the oil production of Hokkaido, but since then a great deal has been heard of the kerosene wealth of this district, and it is even stated the prospects are not inferior to those of Echigo. The places where oil is said to exist are numerous. At Nukimi-Mura on Soya Strait—in the extreme North—oil wells were discovered long ago, and have been worked by hand for some years. The oil, in fact, overflows into the sea, and in stormy weather boats take refuge at Nukimi-Mura, as the sea is rendered smooth by the oil. Oil also exists at Nigori-Kawa, near Hakodate; at Kayama-gori, near Shiribeshi; at Itaitetsu, on a tributary of the Urin River (output 800 gallons per day); at Katami-Mura and Tsukisama-Mura (Imperial property); near Sapporo; and near Abashiri, where the wells are considered rich. The International Oil Company, whose shareholders are mostly foreigners, is reported to have lately secured leases for borings for oil in 140 different places. Messrs. Okura and other well-known Japanese capitalists were contemplating exploitation of the oilfields of Hokkaido, but have been forestalled by the foreign company, a matter much commented on by the native Press. The leases applied for are for districts scattered over seven provinces.

Beer.—The Sapporo Brewery last year produced some 640,000 gallons, nearly three times the output of the previous year. The quantity forwarded to the interior of the country is estimated at 160,000 dozen. The beer is of a light kind, and is not meant for export to distant countries. To obviate the necessity of purchasing imported bottles, glassworks have been started. Last year the brewery company planted German barley and brewed it. The result was good, and the German seed appears to be suited by the climate, so that its cultivation is to be encouraged.

General.—A Japanese merchant is about to open a nail factory at Otaru. Horse-breeding shows little progress, but an army remount department is being established near Kushiro, for which thoroughbred stock is to be imported from America. None of the Australian mares imported recently into Yokohama—primarily for racing purposes—have as yet been sold to this neighbourhood for breeding from. Railway communication in this island is developing very slowly. The Tanko Tetsudo Kaisha, or mining and railway company, propose to double their present capital of 12,000,000 yen (say £1,200,000), and it is reported that their rules are to be altered to allow of foreigners holding shares. They have also matured a plan to make Muroan a principal port for the export of their coal. This enterprising company are also reported to have started a factory at Otaru for refining salt on a large scale, employing for the working such coal as is unfit for the market. The dividend for the second half-year was 12 per cent, the gross receipts from railway traffic alone having been nearly £184,000, an increase of over £20,000, as compared with the previous year. The net profit on coal for the second half-year was about £40,000, sales amounting to 310,000 tons. The sales for the first half of 1901 are estimated at 400,000 tons, and as prices have risen considerably, enormous profits are anticipated.

INTERNATIONAL ATHLETICS.

A New York telegram of Sept. 25th says the athletes of Yale and Harvard met representatives of Oxford and Cambridge universities on that date at Berkeley Oval in track and field events, and, as was expected, the American collegians proved to be too much for the visitors, the Americans winning six out of the nine events on the programme. Points were counted for wins only, so that the Harvard and Yale men defeated their English opponents by a score of 6 points to 3.

A better condition of affairs weatherwise could not have been desired. Between the American universities honours were equally divided, Harvard and Yale each winning three events. The Oxford representatives failed to gain a point for the visiting team, the light blue of Cambridge being in front in all three of the contests which were won by the Englishmen.

The greatest race and closest contest of the day was the 120-yard hurdle race. Garnier of Oxford and Converse of Harvard had the issue between themselves from the crack of the pistol. Up to the

eight hurdle they were abreast, several yards in front of Allcock of Cambridge and Clapp of Yale. Going over the last hurdle Converse gained a couple of inches, and as he threw his hands up at the tape the Harvard man was barely six inches in front of Garnier, the time being 15 $\frac{1}{2}$ secs. Clapp's showing was a disappointment to many, who believed that the Yale hurdler would have been a contestant at the tape, but he finished a couple of feet behind Allcock, who ran third, nearly three yards behind the winner.

Hargrave of Yale made a superhuman effort toward the finish of the 100-yard dash, which he won in 10 $\frac{1}{2}$ secs. Haight of Harvard led for nearly fifty yards, when he was passed by Hind of Cambridge. Hargrave was equal to the occasion, and with a wonderful spurt assumed the lead and won out by about a yard.

In the half-mile run Workman of Cambridge tried to break the record of 1m. 55 $\frac{1}{2}$ secs., established by C. H. Kilpatrick six years ago but failed. Workman won handily, with Cleave of Oxford second in 1m. 55 $\frac{1}{2}$ secs.

Rust of Harvard won the quarter-mile run in 50 secs., with Boardman of Yale, his closest attendant, the Englishman being unable to get on even terms with the leaders at any time.

In the mile run Cawthra, Cockshot and Gregson, all of Cambridge, made the running, and held the lead between them into the last lap. Knowles of Harvard then made his effort, but the best he could do was to pass Cawthra, who immediately dropped back, Clark of Harvard running in fourth place. They ran in this order into the stretch, with Cockshot twenty-five yards ahead. So far as the American runners were concerned, they never had a ghost of a show, as Cockshot won easily, while Gregson, his clubmate, finished five yards in front of Knowles, who made a plucky effort.

In the two-mile run, Workman and MacNaughton of Cambridge and Dawson of Oxford cut out the running, with Mills and Swan of Harvard and Teel of Yale running as named. There was no change in these positions during the first mile. In the second mile, MacNaughton and Teel were put of it. Workman ran well within himself, and at all stages of the race looked to be a sure winner. He won out by at least forty yards, Mills and Swan fighting it out for second honours, with Dawson fourth, three yards back.

In the field events the Americans had it all their own way. May of Oxford caused a good deal of surprise by his exhibition with the hammer. His first throw was 119 inches, gaining second place to W. A. Boal of Harvard, who won the throw with 136 feet and 5 inches. G. Stillman of Yale was unable to appear and his place was taken by Richard Sheldon of Yale, but he retired after making an ineffectual attempt. Henderson of Oxford finished third with 111 feet and 4 $\frac{1}{2}$ inches.

Spraker of Yale carried off the honors in the running broad jump. In the high jump Kernan of Harvard tied Spraker at 6 feet and half an inch. The bar was then raised one inch and Spraker cleared it. Kernan failing to get over. G. H. Smith of Cambridge dropped out of the contest after clearing 5 feet 11 $\frac{1}{2}$ inches. Henderson of Oxford, who also took part in the running broad jump and hammer throwing contest, was fourth with a jump of 5 feet 9 inches.

Spraker won the running broad jump with a jump of 22 feet 4 inches, Kistine of Harvard being second with 21 feet 4 inches. Henderson cleared 19 feet 9 inches and Cornish of Oxford, who wrenched his knee shortly after he arrived in this country, made an attempt, but his leg twisted under him and he had to retire.

The British team, which was accompanied by Mr. Lee Knowles, M.P., consisted of the following:—Cantabs: J. Churchill and R. W. Barclay, Trinity; H. W. Workman, Pembroke; F. G. Cockshot, Trinity; F. W. Gregson, Christ's; J. J. Cawthra, Clare; A. E. Hind, Trinity Hall; H. P. W. MacNaughton, King's; E. Allcock, Trinity Hall, and G. Howard-Smith, Trinity, and the following Oxonians: L. J. Cornish, Lincoln; E. A. Dawson, Worcester; G. R. Garnier, Oriel; G. B. Bulkely, Keble; E. E. B. May, Oriel; J. R. Cleave, Braesenose; and W. E. B. Henderson, Trinity.

TELEGRAMS.

(REUTER'S SERVICE TO THE "JAPAN MAIL.")

LORD ROBERTS ON SOUTH AFRICAN AFFAIRS.

Shanghai, Oct. 10.

Lord Roberts, speaking at Liverpool, said Lord Kitchener, who possessed the implicit confidence of all, never made a single demand for men, for horses, or for stores which was not immediately met.

This would continue to be done. He asked the nation to show that patience exhibited in December, 1900.

Martial law has been proclaimed in Cape Town and other parts of Cape Colony. Brigadier-General Kitchener engaged Botha on Oct. 6th. The enemy retired northwards, Kitchener continuing to keep in touch with him.

BOTHA'S OPERATIONS.

Shanghai, Oct. 11.

The *Times* correspondent at Dundee says it appears probable that Botha has escaped from that quarter.

THE "AMERICA" CUP.

The New York Yacht Club has refused to allow the *Shamrock* to compete for the Cup again in 1901 (?) the deed of trust prohibiting.

THE CASE OF AFGHANISTAN.

The accession of Sardar Habibulla Khan, G.C.M.G., has been finally accepted by his brothers and by the Sirdars at Kabul.

BOTHA.

A later telegram from Lord Kitchener says that Botha has crossed the Tivdaan and by this means escaped northward.

CHARGES AGAINST THE GOVERNMENT.

A letter from Mr. St. J. Brodrick, Secretary for War, to Colonel Howard Vincent, who is just starting for the Cape, refutes the charges of apathy brought against the Government. He says that 200,000 men and 450 guns are now in South Africa and that 100,000 men are in England, so that there can be no doubt of having 10,000 landed monthly. The Government, he added, will not flinch from asking the country to make any sacrifice necessary to bring the conflict to a speedy close.

POLICY OF BRITISH GOVERNMENT.

Shanghai, Oct. 12.

Speaking at Oldham, Lancashire, Sir Michael Hicks Beach, Chancellor of the Exchequer, said that the financial means supplied by Parliament were not exhausted, nor did he anticipate the summoning of an autumn session. He also stated that the British Government had acted in complete concert with the Cape Government, in extending martial law in the colony, as there was reason to believe that ammunition was being smuggled through the colonial ports. He further added that it was the intention of the Government to propose an alteration in the procedure of the House of Commons, with the object of checking Irish obstruction.

THE AMERICA CUP RACE.

1901 in the telegram published on Saturday (about the *Shamrock's* eligibility) should read 1902.

SOUTH AFRICA.

Shanghai, Oct. 13.

Lord Kitchener has confirmed the sentence of death on Lotter.

A CAPTURED MISSIONARY.

There is growing excitement, especially in America, concerning the safety of Miss Stone, an American missionary, captured by bandits in Bulgaria. The Americans are offering a ransom of £25,000.

BOER LEADERS CAPTURED.

A later telegram says that a company of the 10th Hussars captured Scheepers and Lotter, who was executed.

BOTHA'S MOVEMENTS.

Botha, marching hurriedly to the western border of Swaziland, in a difficult country, abandoned the whole of his wheeled transport.

THE FRENCH BUDGET.

Shanghai, Oct. 14.

The French Budget shows a deficit of fifty million francs.

DEATH SENTENCE CONFIRMED.

Lord Kitchener has confirmed the death sentence on Schoemann and Lotters, and also of a lieutenant, son of a wealthy farmer.

BOTHA HEMMED IN.

Shanghai, Oct. 15.

The West Australians have captured several of Botha's wagons.

Botha's force is gradually being hemmed in. It is split up into small groups and must either dash through the British lines and recross the Bavian river or enter Swaziland.

The latter course will be dangerous owing to the hostility of the natives.

KOWEIT.

The *Daily Telegraph* says that Great Britain has informed the Porte that she has no intention of occupying Koweit, but that she will not allow its cession to any other power.

SOUTH AFRICA.

Shanghai, Oct. 15.

A British column has occupied Tietreties. Scheepers was found in a farm house alone and seriously ill. Schoemann has been shot. Sentence of death passed upon Wolfaardt and another of Lotter's officers has been confirmed.

An attempt to re-enlist returned Yeomen has failed.

The authorities are now forming additional corps of Mounted Infantry. Thirty-four Boers were killed or wounded and 236 taken prisoner since the 7th October. Heavy rains are impeding the operations in Natal. Delarey and Kemp have retired towards Lindley-poor.

THE CHINESE TARIFF.

Shanghai, Oct. 17.

The Foreign Office has announced that Sir Alfred Bateman Alford, late chairman of the Shanghai Chamber of Commerce, has been engaged for some time revising the Chinese Customs tariff in accordance with the Protocol. Sir James MacKay and Mr. Anderson, of Shanghai, have been cooperating.

SOUTH AFRICA.

Wolfaardt has been shot. Botha's main body is still in the neighbourhood of Pongolabosch.

THE LOSS OF THE "COBRA."

The Court martial with regard to the loss of the *Cobra* has found that the accident was attributable to structural weakness solely.

NEW SUBMARINE BOAT.

A new submarine torpedo-boat has been tried at Barrow for three hours upon a gridiron, not in the water, for the purpose of testing the breathing capacity of the crew. All the apertures were closed, and the test was very satisfactory. She will begin her sea trials shortly.

(RECEIVED AT THE LEGATION OF FRANCE.)

AFGHANISTAN.

Saigon, Oct. 11.

A telegram from Kabul says Habibullah, son of the late Amir, has been proclaimed Amir. Everything is calm.

Later.

A state of siege has been proclaimed at the Cape. The English troops are pursuing Botha on the frontiers of Zululand.

PEST AT NAPLES.

Saigon, Oct. 14.

Some cases of pest have occurred at Naples among the coolies.

DISORDERLY TURKISH SOLDIERS.

Saigon, October 15.

The Vice-Consul of France at Monastir was attacked by Turkish soldiers. The guilty persons were immediately arrested and the military commandant offered excuses to the Vice-Consul.

THE HEALTH OF SENEGAL.

Later.

The sanitary condition of Senegal has improved.

FRENCH TROOPS RETURNING.

The *Fridan* has left Tientsin on Oct. 8th for Haiphong, having on board two companies of the 8th Regiment of Colonial Infantry and the staff of the 16th Regiment of Artillery.

(RECEIVED AT THE FOREIGN DEPARTMENT IN TOKYO.)

AUSTRALIAN AFFAIRS.

Sydney, Oct. 10.

From the 9th of October the Australian commonwealth puts into temporary operation the new tariff, imposing a specific duty of 8/4 per 100lbs. on hulled rice and 6/- upon unhulled rice, and an *ad valorem* duty of 15 per cent. upon silk manufactured articles and 25 per cent. upon refined camphor and miscellaneous goods. (Received from the Japanese Consul in Sydney).

(RECEIVED IN TOKYO.)

THE CHINESE COURT.

The order for Prince Ching to proceed to Kai-fong reached him on the 5th instant, and he was required to set out within three weeks, Viceroy Li assuming the duties of Foreign Minister during his absence. The Prince has not yet left Peking.

(FROM THE "N.-C. DAILY NEWS.")

HSIAN.

Hsian, Oct. 6.

The Court left Hsian for Kai-fong to-day, in the following order:—Emperor, Empress Dowager, Empress, Imperial Concubine, Heir-Apparent, and the members of the Grand Council. Great preparations have been made for the reception of Her Majesty *en route*, which will be attended with heavy expenses, and every effort is being made to make it a brilliant success.

(FROM THE "OSTASIATISCHE LLOYD.")

NEWS FROM EUROPE.

Berlin, October 2.

The German Government offered to the Chinese to return the astronomical instruments taken from Peking. China declined to accept the offer in consideration of the difficulties of the re-shipment.

Berlin, Oct. 5.

H.M. the Emperor has been attacked with a rather serious rheumatic affection.

NEWS FROM THE SOUTH.

The Governor-General at Canton has sent sufficient troops against the rebels, who have destroyed the German Missionary Station of Hsinning, in the district of Swatow. The Regulars and the Militia sent by the local authorities had already relieved the prefectural town besieged by the rebels. The rebel bands have been dispersed. The local officials received strict orders to protect the missionaries, all of whom are now safe.

NEWS FROM THE NORTH.

Peking, Oct. 8.

The Chinese Government has called attention to the fact that Peking has not been opened to foreign trade, and has therefore requested the representatives of the Foreign Powers to give orders to the many foreign merchants who have established stores outside of the Legation-Quarter during the time of the occupation, to re-transfer their business at once to the treaty-ports.

Pig Iron, No. 3	2.00 to 2.15
Hoop Iron (¾ to 1½ inch)	5.50 to 6.00

KEROSENE.

The Kerosene market is weak.

American	\$2.73
Russian	2.40
Langkat	2.35

SUGAR.

The market is strong for Hongkong refined.

Brown Takao	Y. 5.90 to 6.55
Brown Manila	6.35 to 7.30
Brown Daitong	4.80 to 5.00
Brown Canton	5.00 to 7.40
White Java and Penang	7.60 to 9.10
White Refined	9.50 to 10.95

EXPORTS.

RAW SILK.

The decline has continued; exchange falling at the same time, and quotations are as below. There has not been so much doing this week and rejections of previous purchases have been numerous. Advices from consuming markets are by no means brilliant, and everything tends to a lower range of prices in the near future.

QUOTATIONS.

Filatures—Extra, Fine	Y. 960 to 970
Filatures—Extra, Coarse	940 to 950
Filatures—No. 1, Fine	930 to 940

SORE HANDS

Red, Rough Hands, Itching

Burning Palms and Painful

Finger Ends

ONE NIGHT TREATMENT

Soak the hands on retiring in a strong, hot, creamy lather of CUTICURA SOAP. Dry, and anoint freely with CUTICURA, the great skin cure and purest of emollients. Wear, during the night, old, loose kid gloves, with the finger ends cut off and air holes cut in the palms. For red, rough, chapped hands, dry, fissured, itching, feverish palms, with shapeless nails and painful finger ends, this treatment is simply wonderful.

Millions of Women Use Cuticura Soap

Exclusively, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crabs, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, in the form of baths for annoying irritations, inflammations, and chafings, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative antiseptic purposes which readily suggest themselves to women, and especially mothers, and for all the purposes of the toilet, bath, and nursery. No amount of persuasion can induce those who have once used it to use any other, especially for preserving and purifying the skin, scalp, and hair of infants and children. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the BEST skin and complexion soap, the BEST toilet and BEST baby soap in the world.

Complete External and Internal Treatment for Every Humour. Consisting of CUTICURA SOAP, to cleanse the skin of crabs and scales and soften the thickened cuticle, CUTICURA Ointment, to instantly allay itching and irritation and soothe and heal, and CUTICURA RESOLVENT, to cool and cleanse the blood. Anti-Depot: H. Towns & Co., Sydney, N. S. W. So. African Depot: LEANOR LEE, Cape Town.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, OCTOBER 26TH, 1901.

DEATH.

At No. 5, Spanish Place, Manchester Square, London, on the 21st inst., ESTHER MORRIS, wife of George M. Woolsey, Esq., formerly of Yokohama.

SUMMARY OF NEWS.

BARON DATE, while hunting in Ibaraki on the 15th inst., made a bag of sixty snipe.

THE Kanagawa Kencho have issued 500 shooting licences to foreigners and Japanese.

THE body of an old man was found in the water near Fukushima-cho, Yokohama, on the 16th inst.

OKAJIMA MUMESABURO the only survivor of the wrecked steamer *Tsuruhiko Maru* arrived at

Nagasaki on the 22nd inst. and left at once for Kobe.

TRAFFIC between Tateoka and Oishida on the southern line of O-U Railway was opened on the 21st inst.

PRINCESSES FUMI and Yasu visited the Hama Detached Palace on the 20th inst. and indulged in fishing.

THE young Prince Imperial left Tokyo for Marquis Nabeshima's villa at Oiso on the 23rd instant.

THE Sanyo Railway Company has decided to present yen 10,000 to the family of the late Mr. Nakamigawa.

TWO trains were in collision at Oji station on the afternoon of the 17th inst. and four passengers were slightly injured.

OTA YOSHITARO, secretary of the Mino District, Shimane Prefecture, committed suicide at his house on the 12th inst.

MR. CHINDA SUTEMI, Japanese Minister to Russia, left St. Petersburg on the 15th inst., and Marseilles on the 20th inst.

LIEUT. FUNADO NIN, of the Engineers, Seventh Division, committed suicide by shooting himself on the morning of the 11th inst. The cause is unknown.

THE trouble between the principal and the students of the Tochigi Middle School is finished and all the students returned to the school on the 22nd inst.

DR. KIKUCHI DAIROKU, Minister for Education, arrived at Kobe on the morning of the 20th inst. and left for Kagoshima by the *Akashi Maru* the same evening.

FIVE sergeants and three men belonging to the Fifth Division, Hiroshima, were arrested by gendarmes on the 19th inst., and charged with blackmailing.

SEVERAL hundred soldiers belonging to the Seventh Division created a riot in the brothels at Ishikari, Hokkaido, on the 14th inst. Some arrests were made.

THE first snow of the year fell at Azuma-yama, Fukushima; and on Asama-yama, on the 22nd inst. The first frost occurred at Mito and Matsumoto the same morning.

MARQUIS TOKUGAWA, Count Hisamatsu, Mr. Omori, Director of the General Office, Home Department, and Mr. Morita, arrived at Taipei, Formosa, on the 22nd inst.

A COLLISION occurred between the Nippon Yusen Kaisha steamer *Kaga Maru* and the German steamer *Elbe* at Seattle on the 15th inst. The *Kaga* was detained two days for repairs.

A FINE arts exhibition has been opened at Uyeno Park, and will continue till November 15th. Among the exhibits are many notable pictures including some by Mr. Hashimoto Gaho.

A MAN named Kurozawa Chuyemon and his wife Ichi, living at Mayewatari-mura, Nakagori, Ibaraki Prefecture, were murdered on the night of the 18th inst. The murderer has not yet been caught.

MR. NAKARASHI, President of the Osaka Shosen Kaisha, left Kobe for China on the 26th inst. His business is the inspection of travel to

and between Shanghai and the Yangtse. The Company will open a branch office at Shanghai at the beginning of next month, and begin voyages in January of next year.

SAKAGUCHI KUMAKICHI, living with a widow named Suzuki Yoshi, at Sanko-machi, Shirokane, Shiba, Tokyo, was arrested by the Shiba police on the evening of the 18th inst. charged with cutting two police-constables the previous night.

THE Nippon Yusen Kaisha steamer *Kosai Maru*, which arrived at Yokohama from Shanghai on the evening of the 18th instant, while coming in to berth at the pier, came in violent contact with the structure and smashed some 120 feet of its upper works.

MARQUIS SAIGO and Count Itagaki arrived at Nagoya on the afternoon of the 20th inst. from Nara. H.E. Mr. Oki, Governor of the Prefecture, and over 150 persons received them. They attended a lecture meeting at the Misono theatre the same night.

THE N. P. steamer *Victoria* (Capt. Panton) has been having a thorough overhaul in Hongkong, her hull as well as machinery being attended to by the staff of the Hongkong docks. She left the Colony on the 15th, and we expect to hear of her making a record run across the Pacific. She leaves Yokohama on the 27th inst.

MR. KITAMI TOICHIRO, District Chief of Nishi Kubiki, Niigata Prefecture, while inspecting his district, with a village chief and others, were mobbed on the 16th inst. by about two hundred farmers and roughly handled. Mr. Kitami was injured about the head. When information reached the police station several police inspectors and constables proceeded to the scene and four of the ring-leaders were arrested.

DETAILED news received in Tokyo from the north reports that the Japanese sailing ship *Ucagima Maru*, belonging to Mr. Chikuzen Zenjiro, of Hakodate, laden with 1,320 piculs of rice which left Niigata for Fukaura early on the morning of the 14th inst., foundered 20 miles off Fukaura, Tsugaru-gori, Aomori Prefecture. Seven of her crew were drowned. The master was rescued by the Iwanai Steamship Company's steamer *Hijikawa Maru* and arrived at Hakodate the same evening.

KOBAYASHI FUKUTARO, employed in a barber's shop at Wakamatsu-cho, Yokosuka, attempted to murder a young girl named Sasaki Tome, on the morning of the 21st inst., by cutting her throat with a razor. The girl ran out of the house calling for assistance, but was followed by Kobayashi who again cut her on the shoulder. He then returned to the house and attempted to commit suicide by cutting his throat. The girl is under medical treatment at home and is expected to recover, but the man who was sent to the Shonan Hospital, is not expected to live.

A MAN named Otake Hatsutaro, a dealer in woven goods, belonging to Fukushima Prefecture, sustained severe, probably fatal, injuries by throwing himself from a train as it left Uyeno on the morning of October 22nd. It appears that having arranged to return home that day he sent all his purchases to the station and duly started on the proper train when a fellow-passenger informed him that the train was bound for Takasaki and that during his absence his goods would probably be all stolen. In desperation he threw himself from the carriage. He was given medical treatment but is not expected to recover.

DOMESTIC POLITICS.

Monday, Oct. 21.

That there is a certain amount of dissatisfaction in political circles can not be denied, but when one attempts to define exactly what the sources of trouble are, the task becomes difficult. Only two tangible facts present themselves, and both are so exceedingly trivial that it is scarcely possible to regard them as serious causes of dissension between the Cabinet and the political parties. One can imagine a class of school girls harbouring deep umbrage because the faculty of the school has taken prior counsel with another class, but one can not imagine a great political party of the House of Representatives arraying itself against the Government merely because the latter has given priority to a section of the Peers for the purposes of a conference. If there was to be any conference, one House had to precede the other, and the Peers would have been equally justified in crying out had the Representatives been first taken into the Cabinet's confidence. Such quarrels are inexplicably childish.

Besides, there has been a complete change of issue. Originally the parliamentary leader of the *Seiyu-kai* complained that priority had been given to the Peers. Now, according to a statement made by him in the columns of the *Chuo Shimbun*, he considers that the Cabinet did wrong in consulting either House, and that the Budget ought not to be made a subject of discussion, private or public, before it is laid on the table of the Diet. That is the view originally enunciated by Mr. Oishi Masami, who, as we have already stated, seems to be now taking the lead of the Progressists. But is it the view hitherto adopted by the political parties themselves? Did not the Liberals, when they supported the Cabinet, take care to be well informed of the latter's financial intentions before the moment for parliamentary discussion arrived, and were not the Committee of the *Seiyu-kai* in possession of ample information about last session's Budget long before the session commenced? If the principle is now to be laid down that until the moment of submitting the Budget to the Houses, the political parties shall be denied all knowledge of it, the political parties themselves will be the first to rebel against their own rule, we suspect. The fact is that this is merely a stick to beat the dog. Originally nothing was heard from the *Seiyu-kai* as to the impropriety of the Cabinet's consulting with either House: their complaint was based solely on the question of priority. Now they have apparently laid aside the latter contention and joined the Progressists in denouncing the general principle without any reference to priority. One may be pardoned for doubting the sincerity of such procedure.

The parties ought to remember that they both happen to be "outs" at present. If either of them were in power, would it be content that its committee should be kept in complete ignorance of the Government's financial programme until the parliamentary time for discussing it arrived? The public has not been taught to expect such self-effacement from any party committee hitherto organized.

As to the second ground of dissatisfaction, the translation and issue of a Russian brochure condemning representative institutions, it is too trivial to deserve a paragraph. Any politician seriously taking up such a question must expect to become an object of public ridicule.

The upshot of the matter, so far as we can see, is that the parties want to fight, and where there's a will there's usually a way. We fail to perceive any evidences of the *zen-i* which Marquis Ito, on the eve of his departure, enjoined his followers to display in their dealings with the Government.

Tuesday, Oct. 22.

It is now alleged that the section of the *Seiyu-kai* called the *Jikisan-ha*—that is to say, the immediate followers of Marquis Ito—have arrayed themselves on the side of the Cabinet's enemies. This section of the big party is headed by Baron Suyematsu, Mr. Hara Kei and Baron Kaneko. The last gentleman's name does not appear, it is true, among the agitators, but it must be assumed that he is a consenting party. As to the counts upon which the *Jikisan-ha* proposes to arraign the Cabinet, they are said to be:—

First, that the measures of administrative and financial reform contemplated by the Ministry are altogether too limited.

Secondly, that in connexion with the question of altering the Sobu-Railway extension from an overhead line to a level road, improper collusion existed between the Railway Directors and members of the Cabinet.

Thirdly, that in causing a brochure to be translated and published attacking the system of representative institutions, the Home Department identified the Ministry with opposition to party cabinets.

Fourthly, that in giving high judicial positions to persons who had taken a leading part in fomenting the strike of judges and public procurators, the Ministry flouted its predecessors.

Fifthly, that the Cabinet's failure to sell bonds abroad is due to mismanagement.

Sixthly, that the Government's failure to deal properly with officers guilty of looting in the Chili campaign is calculated to injure military discipline and to impair the country's reputation.

This last question, that of looting, has not hitherto been much noticed by the public, but it now threatens to assume very large dimensions. The *Kenkin-kai* section of the House of Peers seem to have been the first to take it up, and the talk has been gradually growing in volume until it has become big enough to interest political parties. Many officers are said to have been implicated, and there are rumours of hundreds of rolls of precious silks and brocades that found their way to Japan in military baggage. One eminent General whose debts were the talk of the town before he sailed for Chili, cleared off all his liabilities on his return, and the public not seeing how the feat was accomplished, suspects something wrong, as is the public's wont. Even in the War Department there is said to be some commotion, but of course the difficulty of taking up such matters officially would be almost insuperable. The only effect we can foresee, if the Japanese authorities and Japanese politicians make a fuss about the question, is that the world will take them at their word, and write them down the biggest looters of all, though probably they were among the smallest, if not the very smallest. New canons of conduct have to be enacted about this problem of looting. If the Imperial German Government calmly and openly proceeds to carry off a set of valuable astronomical instruments from the wall of Peking because an opportunity offered to do so, why should a private individual be held guilty of a heinous crime if he takes a roll of silk from a deserted

store when an opportunity offers? Governments can not set the example of thieving and then punish their subjects for following it. The Japanese Government itself did not hesitate to pass into its treasury the proceeds of certain large operations of looting specie and grain. What is the salient difference between that and looting silks or porcelains? It looks as though the Japanese, by factitious agitation, were again about to invite an undeservedly hostile verdict. They have succeeded in circulating very false impressions about their financial and economical situation. The political parties, by employing the questions of taxation and finance as weapons for harrassing the Cabinet, led the world to believe that the people were groaning under fiscal burdens and that the Treasury's affairs were in lamentable disorder. The country is suffering now for that most unpatriotic and short-sighted agitation. No one, we think, can entertain any doubt that had the old system of government continued in operation, or, at any rate, had the political parties abstained from formulating, for purposes of selfish ambition, charges which had no foundation of fact, the Empire's credit would now stand very high in Europe and America, and instead of shaking their heads over her condition, people would be wondering how Japan had accomplished so much with such small resources. Apparently the looting question too is now to be similarly dragged into the arena of politics, and of course the European looters will be charmed to agree with any condemnatory conduct that the Japanese may choose to pass upon themselves, inasmuch as attention will thus be fully diverted towards this country. No one in Europe or America is troubling himself any longer about the matter. We recommend the Japanese to "sit tight," and to endeavour to remember that when they emerged from the shadow of isolation into the sunlight of international comity, it became essential that appearances should be consulted with a little more care than had previously been bestowed on them. There are fewer holes and corners now-a-days wherein to wash dirty linen.

It will be observed that among the *Jikisan-ha*'s accusations there is one condemning the Cabinet for placing itself in apparent opposition to the system of party cabinets. This is a very remarkable country, it must be confessed, in the matter of politics. When the *Seiyu-kai* was formed, the plank in its platform which astonished onlookers was that party cabinets were emphatically eschewed. People wondered not a little. Here we have Liberals, they said, Liberals whose banner has borne the legend of party cabinet ever since the name "Liberals" was assumed, here we have these self-same Liberals calmly abandoning the cause for which they fought so long and enrolling themselves as the backbone of an association that denied the expediency of parliamentary mandates. It is of course fresh in our readers' recollection that the late Mr. Hoshi Toru put his finger to his nose, metaphorically speaking, when the new platform was announced. He told his followers, almost in so many words, not to trouble themselves about this apparent *volte-face*: it was merely an academical platitude, to be treated with contemptuous indulgence. Apparently he was right. For now we have Marquis Ito's own lieutenants attacking the Ministry for allowing a small official of the Home Department to involve them vicariously in the heinous offence of seeking to discredit party cabinets. Marquis

Ito himself, as leader of the *Seiyun-kai*, endorsed that doctrine. What is to be said except that Japan is a country where the unexpected happens with extraordinary pertinacity?

It is of course alleged that the Progressists are beginning to incline towards the Cabinet. The hostility shown towards the latter by the *Seiyun-kai* would probably be enough to give the Progressists an impetus in the opposite direction, for they would doubtless prefer to join hands with the Cabinet rather than to range themselves on the side of their perennial enemies. In truth the position of the Progressists is very peculiar. Unless they contemplate final amalgamation with the *Seiyun-kai*, in other words, final effacement, they can gain nothing whatever by joining the latter in an attack on the Cabinet. Supposing the Katsura Ministry driven out of office by means of a coalition between the Progressists and the *Seiyun-kai*, what must inevitably follow would be, not a coalition Cabinet including Count Okuma, Mr. Inukai Ki and Mr. Oishi Masami, but an Ito Cabinet, amply supported by the *Seiyun-kai* and quite indifferent about the attitude of the Progressists. Naturally the Progressists have no desire to bring about that result. Except as a kind of large practical joke, they can not wish to fight for the sake of putting the *Seiyun-kai* in the seat of victory. Their one chance of recovering the influential position they once enjoyed seems to be an alliance with the Katsura Cabinet—supposing that it can be induced to ally itself with them. The Government would still be in a minority in the House of Representatives, but there would then be some excuse for appealing to the country, and the Progressists might emerge from the elections with renewed vitality.

Wednesday, Oct. 23.

Mr. Kataoka Kenkichi, President of the House of Representatives, justly points out that all the agitation about the Cabinet's having consulted the House of Peers as to next year's Budget and ignored the House of Representatives, loses sight of the vital fact that a delegation of the six sections of the Peers applied to the Prime Minister for an interview, and that the initiative did not come from the Government in any sense. Thereafter when Mr. Kataoka was calling on the Premier with reference to a matter of railways, the latter intimated to him casually that if the House of Representatives adopted the route taken by the Peers, they too might obtain similar information. Evidently Mr. Kataoka regards the agitation as quite factitious.

It need scarcely be said that certain journals allege the existence of a split in the ranks of the *Seiyun-kai*, the *Jikisan-hu* being hostile to the *Tosa-hu*. That is an item of news which might have been expected, and which would be more interesting were it less hackneyed.

THE CONDITIONS OF THE MANCHURIAN AGREEMENT.

Saturday, Oct. 19.

It would appear from news received in Tokyo that the terms of the proposed Manchurian agreement are approximately those published by the *Asahi Shimbun* on Thursday; namely:—(1) That Russia is to enjoy the exclusive title to all mining and railway privileges in Manchuria; (2) that all the Chinese troops in Manchuria are to be placed under Russian command; (3) that

two years after peace and good order have been restored, Russia will withdraw one half of her forces, and three years after that date, the remainder; and (4) that the Shanhaikwan-Newchwang Railway shall be restored to China on condition that it is never used for the conveyance of British troops.

We find it scarcely credible, in spite of this confirmation, that Russia has proposed such terms, unless it be assumed that she has deliberately resolved to insult England. The proviso with regard to the conveyance of British troops would be almost tantamount to a declaration of war against England. Russia has not the most infinitesimally small right to dictate any terms whatever about the Shanhaikwan-Newchwang Railway, or to retain possession of the line for an hour. We may confidently assume that she recognises these things, and since it has never been her wont to disregard diplomatic amenities, we may also assume that this military veto is a canard. It is just possible that Russia has asked not to have the line placed under guard of British troops, though even if she contemplated the imposition of such a veto, she would have been careful to couch it in general terms, and not to indicate British troops only.

As to the provision about mining and railway privileges, China alone will get into trouble. The other Powers will not take Russia by the neck in order to make her disgorge any tidbits that she may have obtained from China in violation of the latter's treaty engagements. Their recourse will be against China, to whom they will say that if she deliberately consents to create within her territories a sphere of exclusive influence for Russia, she must be equally generous to them also. Then, indeed, Germany will get a free hand in Shantung, England in the Yangtze Valley and France in Yunnan. But where will Japan come in? It looks as though the scramble were about to commence.

Tokyo newspapers are agreed that although the alleged terms of the new Russo-Chinese agreement are much vaguer than were the terms of the last proposed agreement, the result is the same, namely, to provide for the permanent occupation of Manchuria by Russia. All are agreed that if the real conditions be anything like those rumoured, Japan's rights and interests are seriously imperilled. As to Great Britain's probable action, there seems to be some doubt. It is questioned whether she really intends to adopt a strong policy with regard to Manchuria. Those that express misgivings on this point support their argument by reference to England's doings at Ching-wan peninsula, near Shanhaikwan. They say that her activity there and the extensive preparations she is making far exceed anything Russia is doing at Port Arthur, and that with Wei-hai-wei and Ching-wan in her possession, she will command the Gulf of Pechili, and can afford to leave Russia a free hand in Manchuria. Others deny the correctness of that view and attribute it to ignorance of England's true policy. It is not her custom, say these latter folks, to "show the point of her spear" until the critical moment arrives, but there is very little likelihood that she will abandon any rights or privileges which the treaties confer on her in Manchuria. It is noted by our Tokyo contemporaries that an unique opportunity now offers for Russia to make some satisfactory arrangement with

China, since Li Hung-chang, whose pro-Russian proclivities are proverbial, is supreme in Peking, and neither in the Russian nor in the Chinese capital is there a Japanese Representative. As might have been expected the *Nippon* writes most resolutely, but all the leading journals of Tokyo show a very firm attitude, and are evidently restrained from strong speaking chiefly by their uncertainty as to the real terms of the proposed agreement.

Monday, Oct. 21.

It is justly observed by the *Asahi Shimbun* that although the terms of the new Manchurian Agreement are much fewer and briefer than the terms of the previously proposed agreements, the privileges demanded by Russia in the latest edition of her designs are far more important than anything she asked for previously. Thus whereas in the last Agreement she would have been content to restrain China from granting any railway or mining concessions to any nationals without Russia's consent, she now requires that all railway and mining concessions shall be definitely ceded to herself. That is obviously a much more sweeping demand than anything previously formulated. It is also a demand which enables her to dispense with one of the principal provisions of the last Agreement, namely, that she should be permitted to extend her system of railways to the Great Wall. She will not want permission of that kind if she gets the new Agreement, for having the sole right of building railways in Manchuria, she can construct them wherever she pleases within that vast territory. Then again as to the question of Chinese troops in Manchuria. The former Agreement provided that China might post regular troops in Manchuria but that their number was to be determined after consultation with Russia. That limitation is removed in the new Agreement. China will be able to post as many troops there as she pleases, but they will have to be placed under Russian command. In short, Russia will set herself to organize a native army in Manchuria such that she can not only defy all attempts to dislodge her, but also will be able to launch against China herself an irresistible force should occasion arise to take such a step. Finally, the plausible provision that one half of the Russian troops are to be withdrawn two years after peace and good order are restored, means nothing at all, since Russia retains discretionary power to determine the moment when good order and peace may be considered to have been re-established.

As a matter of fact, never since the commencement of foreign intercourse with China has there been an interval of two years, still less of three, during which it could be affirmed that peace and good order had reigned throughout the Chinese empire. The Russians have shown in Central Asia that they can restore peace and good order fast enough if they please, but they have also shown elsewhere that they can produce disturbed conditions without exposing their hand. According to ordinary human standards they are not to be blamed for trying to make such an agreement as should secure them against all inconvenient contingencies, and leave them free to treat Manchuria as they please in the end. But the world also may be pardoned if it appraises their methods accurately.

The latest intelligence on this subject is contained in a telegram published by the *Asahi Shimbun*. It quotes Li Hung-chang as saying that Russia has actually proposed a four-article agreement with regard to Manchuria, but that a considerable time will pro-

bably be required for discussing it. It further quotes Prince Ching as saying that there is probably no truth as yet in the rumour which alleges that Viceroy Liu and Chang have already presented a memorial opposing the agreement. Finally, the *Asahi's* correspondent himself says that Chinese officials are strongly disposed to approve the proposed terms inasmuch as they embody a distinct statement of time for the withdrawal of Russia's forces.

The leading Tokyo journals continue to condemn the alleged Agreement in unequivocal terms. The *Kokumin Shinbun* is most reluctant to believe that Russia has advanced any such proposals, since they would amount to nothing less than the permanent occupation of Manchuria, and would therefore be in direct contradiction of the solemn declarations previously made by the Russian Government. It is impossible, the *Kokumin* adds, that any Power which gave its adhesion to the Anglo-German Agreement can consent to such an arrangement. The *Hochi Shinbun* finds no difference whatever, or at any rate no difference for the better, between this new Agreement and the Agreement that was rejected recently in consequence of remonstrances by England and Japan. This country has not changed its policy about a vital question in a few short months. The proposed compact must be opposed uncompromisingly. From China's point of view also the Agreement would be suicidal, for all the other Powers would demand similar concessions from her in the districts which they regard as their own spheres of influence. The *Nichi Nichi Shinbun* thinks that unfortunately for Japan very false ideas of her policy have gained currency. She is supposed to have designs upon a part of China's territory and to be determined to swallow Korea. That belief has influenced the attitude of Russia. But whatever private individuals may allege about Russia's intentions, the purpose of the Russian Government is to give up Manchuria finally, and it is taking all its measures accordingly. As for Japan, her policy is fixed and unalterable. She is determined to preserve the independence of Korea and to maintain the integrity of the Chinese empire.

Tuesday, Oct. 22.

We have now another version of the draft Manchurian Agreement. It has been telegraphed to the *Tokyo Asahi*, and its provisions are said to be:—

- 1.—Simultaneously with the restoration of the railway from Shan-hai-kwan to Newchwang, Russia will evacuate Manchuria, provided that at no time is the duty of guarding the said Railway entrusted to Foreign troops.
- 2.—Within the course of the present year Russia will withdraw her troops from Shingking.
- 3.—Within the course of two years from next year, Russia will gradually withdraw her troops from Kirin and the Amur district of China.
- 4.—The Manchurian force under the command of the Shingking General shall be placed under Russian officers, but there shall not be any organized body of artillery.

The correspondent adds that there are also two or three other important articles. We think so, indeed. For this new draft is radically different from anything that preceded it. One may allege that it provides purely and simply for the evacuation of Manchuria by Russia, and that it contains only one provision which invites any kind of

objection, namely, the provision relating to the officering of the Shingking army by Russians. Apparently that arrangement is intended to hold for all time. At all events the alleged draft contains no reference to a limitation of period. Such a covenant would certainly be viewed askance by Europe and Japan. But what is to be said about the extraordinary provision relating to artillery? The appearance of such a clause renders the whole document apocryphal. We are strongly disposed to think that the truth as to the contents of this Agreement has still to be learned.

Wednesday, Oct. 23.

We have now another version of the Manchurian agreement. It comes from the *Fiji Shimpō's* correspondent, and is to the effect that the draft agreement contains eleven articles, the most important of which are:—

First, that Russia will not infringe upon China's rights of sovereignty, and will restore the railways and every thing else to the basis of the *status quo ante*.

Secondly, that China herself shall govern Manchuria without any reliance upon foreign assistance.

Thirdly, that Russia shall withdraw all her forces within three years.

Fourthly, that China shall consult Russia with regard to the troops she proposes to post in Manchuria.

The *Fiji* rightly remarks that if this version be correct, which seems probable, it indicates a circumspect and reserved attitude on Russia's part, and offers no ground for foreign objection.

Friday, Oct. 25.

There is much perplexity about the Manchurian Agreement. Some reports confirm the statement that the draft document provides for the complete withdrawal of Russian troops from Manchuria within 2 years, and contains no clause open to objection except that China's forces in Manchuria are to be trained by Russian officers. Other reports allege that the document embodies other conditions, about which, however, there seems to be much vagueness. Others maintain that the incident has not been carried to the extent of drafting an agreement, but has been limited to conversations between Mr. Lessar and the Chinese Plenipotentiaries. There appears, further, to be a pretty general impression that if the alleged agreement contains so little that is objectionable, there must be some secret treaty in the background, since it is highly improbable that Russia has so greatly modified the attitude displayed by her at the time of drafting the two original agreements.

THE HAWAIIAN AFFAIR.

The leading Tokyo journals announce that the outrage committed against Japanese female passengers at Hawaii has been settled after negotiation between Mr. Takahira, Japan's representative in Washington, and the United States Government. The terms of the arrangement are that the American Government expresses regret for the occurrence; that the sanitary officials at Hawaii are to be reprimanded; that in future female examiners will be employed in connexion with medical inspections, and that the Hawaiian sanitary officials are to be warned against any repetition of such mistakes. This arrangement does much credit to the American Government, as showing that it has been guided throughout by considerations of justice and international courtesy.

FINANCIAL.

Monday, Oct. 21.

Mr. Sakatani is reported as saying that the public has been much mistaken about the question of a sale of bonds in America. The Government has not approached that matter with anything like the earnestness alleged by newsmongers. Such affairs have too important a bearing on the credit of the country to be lightly undertaken. At all events, the exact issue will be known before the Diet meets.

With reference to this, the *Nichi Nichi Shinbun* writes as though the Cabinet had abandoned all intention of selling bonds abroad for the present at any rate. Whatever money may be required will be obtained by issuing Treasury bills. Last June, seven million yen worth of these securities were placed on the market at 7 per cent. interest, and the deficiency of funds still remaining was met by a loan from the Bank of Japan. The idea now is said to be another issue of from 8 to 10 million yen worth of bills. They will be sold at par, but as to the interest and the period of withdrawal details remain to be fixed in accordance with the convenience of purchasers. This, it will be observed, would signify adherence to the original *post-bellum* programme in a modified form. That programme contemplated the prosecution of the various undertakings by means of domestic loans issued in the ordinary manner at 5 per cent., the bonds redeemable in 50 years. But since such securities can not be placed at present without a heavy sacrifice, the Government has recourse to Treasury bills, carrying a higher rate of interest and redeemable in a few months.

Another statement attributed to Mr. Sakatani is that no reliance must be placed in the rumour that the Government does not intend to restore the Naval Capital Fund, upon which large drafts were made for the purposes of the Chili Campaign. The Chinese Indemnity, of which the first instalment may be confidently expected next year, will be applied to restore the Fund, and the proceeds of the additional taxes imposed last session will be devoted to other purposes.

Concerning next year's Budget, Mr. Sakatani tells the *Chiuo Shinbun* that it has been compiled in accordance with the scheme of financial reform, and that it will be found to be of much smaller dimensions than the Budget for this year. No serious opposition need be expected, therefore, from the Diet. The Kure Steel-plate Factory is a last-year's problem, and has already received the endorsement of the Lower House. It will be presented this session in a form more favourable, financially speaking, and there ought to be no difficulty in getting it passed. On the whole the compilers of the Budget have inclined to a negative policy, and it is just possible that the Diet may be disposed to take a more positive line with respect to certain works of improvement.

Mr. Ozaki Yukio continues to make his voice heard, and from many rumours it appears that the *Seiyun-kai* is gradually becoming excited against the Government. It need scarcely be said that if the members of the big party set themselves to pick up seeds of dissension, they can do so with great ease. The Steel-plate Factory is a case in point. Last session the *Seiyun-kai* supported that project almost if not altogether unanimously. That they should support it again this session seems to be a point of common consistency, especially as the financial condition

will be easier. Yet they are now understood to allege that their support last session was given under a misapprehension. They trusted the statements advanced by the Minister of Finance and believed that the Treasury could find funds, whereas the same Minister announced, a few weeks afterwards, that all the undertakings of which the steel factory formed a part must be abandoned if the country was to remain solvent. So the Party now looks askance at the steel-factory problem.

That of course is an explanation that will pass muster in some quarters, but to us it savours greatly of irresponsibility. The country may reasonably expect that its representatives will examine large financial problems with a little more intelligence, and will not be guided solely by faith in the reported ability of a Finance Minister. It is really too frivolous to pretend that because Viscount Watanabe behaved in an incomprehensible manner last session, a project with the conception and framing of which he had nothing whatever to do should be permanently discredited. If such a line be taken, this will not be the first occasion on which the Diet, out of a pure spirit of opposition, blocked the path of nationally necessary undertakings.

Another grievance is that the banner of the *Seiyun-kai* is not receiving due respect. Inscribed on that banner are the words "administrative reform and financial reform." But the only measure of financial reform that the present Cabinet seems disposed to undertake is raising the salaries of junior officials. As a matter of fact, the agitation kept up by the political parties is such that no Cabinet finds leisure, or is allowed to remain in office sufficiently long, to elaborate any radical scheme of reform—if, indeed, which we seriously doubt, any such scheme be feasible. The present Cabinet has been in power for five months, and yet the *Seiyun-kai* appear to think that its failure to produce a full-blown programme constitutes an insult to their flag. That is not serious. It is merely picking a quarrel.

An apparently more rational objection is that whereas the increase of taxation voted last session was for two explicit purposes, namely, to defray the expenses of the Chili campaign and to restore the Capital Funds to their legal dimensions, the Treasury is now understood to contemplate recourse to the Chinese Indemnity for restoring the funds, and diversion of the proceeds of taxation into other quarters. If the Treasury entertains any such intention, it must of course seek the consent of the Diet. Without that consent no change can be lawfully made. There may be valid reasons to doubt whether it would not be wiser to adhere to the original programme. That, however, is a matter of opinion which can be properly discussed by the Diet. What we understand the *Seiyun-kai* leaders to allege, however, is that the Cabinet is exceeding its powers in proposing a change. Surely that is a case of the proverbial lake and puddle once more. Circumstances change and policies must vary with them.

Thursday, Oct. 24.

The Treasury announces the issue of ten million *yen* worth of exchequer bills, carrying 7 per cent. interest, and payable within three months from the date of issue. Applications will be received from the 1st to the 5th of November, at the offices of the Bank of Japan in Tokyo, Nagoya, Osaka and Kyoto. The bills will be sold at par.

There are differences of opinion about the prospects of this operation. Some maintain that the transaction will be easy, as the 36th Bank, which does business for the Tokyo Clearing House, has a balance of 15 million *yen* on hand, for a large part of which it will be pleased to find a temporary investment. These financiers point also to the fact that the last issue—six millions—of treasury bills produced subscriptions amounting to 7½ millions, and are of opinion that a fully corresponding demand will be shown on the present occasion. Others deny that the issue has any chance of success. Their view is that the time is very badly chosen, inasmuch as the banks want all the money they can command at the fall of the year, and since they can turn over their funds two or three times at that season, a three months' investment at 7 per cent will not tempt them at all. These observers farther allege that on the occasion of the last issue of bills a good understanding existed between the banks and the Finance Minister, the latter enjoying the confidence of the former, whereas no such understanding exists at present, and the attitude of the banks towards the Treasury is anything but one of confidence.

A very short period will show which of these forecasts is correct. For our own part, we imagine that Mr. Sone had seen his way to success before he made this issue. It is of course unfortunate for the Treasury that it should be obliged to pay a high price for accommodation such as all Administrations have to seek from time to time. But so long as money commands a remarkably high rate of interest in the open market, the Government can not reasonably expect to get it on easy terms.

Of course our readers understand that there is no question here of issuing bonds which add to the national indebtedness. The transaction is nothing more than an ordinary measure of financial management pending the inflow of the next installment of revenue.

RACIAL PREJUDICE RAMPANT.

For good solid racial prejudice expressed with thoroughly brutal frankness the letter addressed to the *Japan Herald* by "An Australian Visitor" is worthy of the bays. The question at issue was whether the Queensland Parliament had or had not passed a bill for excluding all Asiatic labour. A correspondent of a Japanese journal quoted by us had reported that, in consequence of Japanese remonstrances; the bill had not been passed in its original form but had been amended so as to apply to Chinese subjects only, the Queensland Cabinet explaining that it would be impossible to obtain the Royal assent if Japanese were excluded. "An Australian Visitor's" comments "on this intelligence are:—

Although I am without definite information on the Exclusion Bill which is alleged to have been passed in the State of Queensland, I am quite certain that the information supplied by the *Mail's* correspondent is incorrect. The Commonwealth of Australia, of which I am proud to say I am a member and voted for, takes little heed of nations like Japan, and those of us who travel or reside in the country and perceive the dishonesty of its traders as constantly shewn in the published Law Reports, feel that the less commercial contact we have with it the better. Who can close his eyes to the last disgraceful action which has been ventilated in the Court of Laws, the Russo-Chinese Bank versus the 130th Bank? Fortunately for the credit of the country—of which there was some doubt—the latter Bank was properly exposed and compelled to pay. The Kobe Waterworks Bonds case still offends the nostrils of honest men and as far as criminal justice is concerned I need only refer to the Kent case. No! we do not want the Japanese in the greatest Commonwealth the World has ever seen except as labourers to help develop its im-

mense tracts of virgin country, and afterwards to be returned to their own country at the term of their agreement. Does the Government of Japan think for a moment that Australia pays any attention to its remonstrances? I flatter myself that it does not, and neither will it be dictated to by Great Britain—not like British Columbia. The Home Government is wiser than to interfere with the greatest of its self-governing possessions and which has been of such immense service to it in the South African campaign. With Russia, with whom I should not be averse to see some friendly arrangement on the part of Great Britain, menacing Japan on its frontiers it must imagine in vain that either Australia or Queensland cares one iota for its feelings on such a paltry matter of either admitting or excluding its nationals. If it suits Australia to admit Japanese labourers it may probably do so, but not otherwise. It is about time the Japanese were disillusioned of their importance in the eyes of the world.

If it were not too gross an impertinence to *The Times* we should ask our readers to contrast its recent utterances on this very subject with those of "An Australian Visitor," but at any rate we invite the Japanese to make the contrast lest they should imagine that this vulgarly bumptious and most offensive correspondent of the *Japan Herald* represents any class of Englishmen except the lowest. As a matter of fact there was no question whatever of the Australian commonwealth; there was question of Queensland only, and it is precisely because Queensland's conditions would render the exclusion of Asiatic labour disastrous to her development, that the applicability of an exclusion bill to the whole of Australia can scarcely be contemplated. Moreover, it is precisely against Asiatic labour that Australia wants to legislate, and, curiously enough, the *Japan Herald* itself—from whose office, if we are not much mistaken, this "Australian's" letter emanated—undertook, a few days ago, to defend Australia against a charge of racial prejudice by pleading that the anti-Asiatic legislation was inspired by the labour party, whereas "Australian Visitor" now alleges that Asiatic labour is needed and that Australia is prepared to admit it. However, we have no intention of entering into discussion with such a person. Our object is merely to call attention to the brutally insulting tone of his letter and to ask our readers whether any Japanese journal can be accused of having ever penned such an anti-foreign ebullition. Certainly if writing of the kind could be laid to the charge of Japanese newspapers there would be no possibility of denying that the anti-foreign prejudice of which this very *Japan Herald* is so fond of complaining, permeates the people of Japan. What is the use of writing such letters and what is the use of publishing them? Unless the Japanese are the most long-suffering and philosophical people on the face of God's earth, their feelings of indignation when they read effusions like that of "Australian Visitor" must be intense. Happily there are not many such Englishmen. If there were, we could easily understand the hatred that continental Europe exhibits towards our race.

GERMAN CRITICISM.

The following letter appears in the *Japan Times*:—

SIR,—One of your contemporaries quoted the London *Times* a few days ago to show that in 1870 our troops were severer towards the French than the English are now towards the Boers. Might I venture to observe, however, that the *Times* itself led the outcry in England against the alleged German methods in question (especially against making prominent prisoners travel on military trains in order to prevent train-wrecking) and that the *Quarterly Review* then compared Bismarck to Attila. The great English jurist Hall declared that the conduct of the Prussians was "universally and justly repudiated" and described that conduct as

"illegal brutality" which existing opinion refuses to condone." The veteran Field-Marshal Sir Neville Chamberlain condemns, I might add, at the present moment, British methods in South Africa, and there was once another British Field-Marshal who wrote to Massena apropos of the Portuguese guerillas:—"The question is simply whether a country which is invaded by a formidable enemy has the right to defend itself by every means in its power." At the Hague Conference, too, Sir John Ardagh, the mouthpiece of the War Office, answered that question like Wellington himself in the affirmative.

The foregoing, in which I do not enter into any discussion as to whether or not we really carried out severe measures in 1870, seems to me at all events to prove that the English now approve of—and even improve on, if we take into account Lord Kitchener's late proclamation and recent doings—what they very heatedly condemned in the alleged conduct of our troops in 1870: just as they have now adopted the policy of concentration for which they could find no name bad enough when it was being carried out in Cuba by Marshal Weyler.

I remain yours, &c.,
Tokyo, Oct. 21st.

GERMAN.

"One of your contemporaries" means the *Japan Mail*, and we therefore take the liberty of saying a word to this correspondent, though he has not had the courtesy to address us direct. We desire to ask him what line of defence he adopts. Only two seem open to him. Either he must admit that the English criticisms of Prussian procedure—criticisms which we have to take on his assurance—were correct, and that not only was Prince Bismarck comparable to Attila, but also that the conduct of his countrymen was "universally and justly repudiated" as "illegal brutality which existing opinion refuses to condone," or he must maintain that the English criticisms were entirely unjust and that his countrymen acted in accordance with the recognised usages of warfare. If he takes the former line, then he has to answer the question, "what right have the Germans to-day to raise hands of horror because another country commits acts of which they were themselves guilty thirty years ago?" If he takes the latter line, if he maintains that Bismarck was not comparable to Attila, and that his own countrymen were not guilty of illegal brutality in 1871, then he has to answer the question: "What right have the Germans to abuse England for doing things to-day which they did themselves thirty years ago, and which they still claim to have been justifiable?"

We might leave "German" impaled upon the horns of that dilemma, commiserating with him on the painful choice he has to make, but there is another word to be said. He ought to know enough about the rules of evidence to understand that unless he describes the precise acts which *The Times*, the *Quarterly Review* and the jurist Hall condemned, the applicability of their condemnation to English acts committed in the present war is quite inadmissible. That is an objection especially apposite in view of the fact that the one act specifically referred to by "German," namely, the placing of prominent prisoners upon military trains in order to prevent train-wrecking, has not been resorted to by the English. We may add that if "German" seriously intends to compare Weyler's concentration policy in Cuba with the British camps of refuge in South Africa, either he must believe that Weyler was singularly misrepresented or that the English are singular liars.

FOREIGN TRADE.

The volume of exports during the first 20 days of the current month exceeded the volume of imports by 3,083,943 yen. The causes were a marked increase in the export of silk and copper and a decrease in the import of kerosene, sugar and cotton stuffs.

AN APPEAL.

The Army League and Imperial Defence Association of Great Britain has addressed a very strong letter to *The Times* about the methods adopted in South Africa. Here are some paragraphs from the letter:—

In common with our fellow-citizens we have been amazed at the surpassing leniency wherewith our adversaries, who have long since openly ignored the fundamental conditions of organized military operations, have been allowed to perpetrate atrocities while their families have been supported and cherished. They have been permitted to violate the laws of war with impunity beyond the futile threats of belated proclamations, which they naturally ridicule, and their families are supported by our folk at home, though many of us owing to losses through the unnecessary prolongation of the war find the maintenance of our own families an arduous task.

Were Boer citizens placed on the trains in the vicinity of Boer commandos as hostages and if not, why not? Are members of "the Bond" placed under guards armed with loaded revolvers beside them, on every train that can by any possibility be attacked, and, if not, why not? Have any methods been adopted to convince by deeds, not by proclamations, the bandits now in the field that if a train be derailed their own political and social friends will be the first to perish.

The letter is accompanied by the following copy of orders issued by General Sherman in 1864, concerning which orders the Association remarks:—"These orders were good enough for Confederate swashbucklers a year before the fall of Richmond. Why should not similar orders be good enough for Boer Swashbucklers a year after the fall of Bloemfontein and Pretoria?"—

"You may order all your post and district commanders that guerillas are not soldiers, but wild beasts, unknown to the usage of war. To be recognized as soldiers they must be enlisted, enrolled, officered, uniformed, armed, and equipped by some recognized belligerent power, and must, if detached from a main army, be of sufficient strength, with written orders from some military army commander, to do some military thing. Of course we have recognized the Confederate Government as a belligerent power, but deny their right to our lands, territories, rivers, coasts, and nationality, admitting the right to rebel and move to some other country where laws and customs are more in accordance with their own ideas and prejudice."

"Your military commanders, provost-marshals, and other agents may arrest all males and females who have encouraged or harboured guerillas or robbers, and you may cause them to be collected in Louisville; and when you have enough, say 400 or 400, I will cause them to be sent down the Mississippi, through their guerilla gauntlet, and by a sailing ship send them to a land where they may take their negroes and make a colony with laws and a future of their own. If they won't live in peace in such a garden as Kentucky, why, we will kindly send them to another, if not a better land, and surely this would be a kindness, and a God's blessing to Kentucky."

"The use of torpedoes in blowing up our cars and the road after they are in our possession is simply malicious. It cannot alter the great problem, but simply makes trouble. Now if torpedoes are found in the possession of an enemy to our rear, you may cause them to be put on the ground and tested by wagon loads of prisoners, or, if need be, by citizens implicated in their use. In like manner, if a torpedo is suspected on any part of the road, order the point to be tested by a car-load of prisoners, drawn by a long rope. Of course, an enemy cannot complain of his own traps."

The fact is that two things have been conspicuous above all others in this war, namely, the extraordinary and suicidal leniency shown by the British towards the Boers and the stupendous lies told by the Boers and their European sympathisers.

By way of illustrating the difference between British methods and Boer methods, this story is apropos:—

Hopetown, Sept. 3.

A Cape policeman named Fivaz, who was lately made prisoner by Van Reenen's commando, has arrived here. He states that he and two native boys were sleeping on a farm at Winterhoek. In the morning they found five Boers round the house, and escape was impossible. The Boers shot the two natives, and made Fivaz walk to their laager at Strydenburg. Van Reenen declared that he intended

to keep him prisoner, make him walk ahead of the commando until he dropped, and then abandon him. Van Reenen, however, subsequently yielded to the request of Malherbe and released him.

The commando then went to Karee Kloof, where they caught two native scouts from Prieska, whom, it is stated, they intended to shoot. Mr. Wright, a farmer, asked Van Reenen to spare their lives and merely give them a beating. Van Reenen, however, made no reply and departed, taking the scouts with him. Later on Wright heard shots, and afterwards found the bodies of the scouts lying on the road a mile away. The Boers also sjamboked one of Mr. Wright's native boys.

MAIZURU.

The *Jiji* has a very practical article on the necessity of bringing the new naval port of Maizuru into railway communication with the general system of lines. It appears that the Government always appreciated this necessity, but that delays have occurred owing to applications by private companies to build the line. Two companies applied, a Kyoto Company and the Hankaku Company of Osaka. Both roads were to run independently to Fukuchiyama in Tamba, whence the distance to Maizuru is only 21 miles. The Government therefore gave permission to both as far as that place, reserving for future consideration the question of the Fukuchiyama-Maizuru extension. It appears that the Hankaku line has been actually carried to Fukuchiyama, and that a further expenditure of two million yen would bring it to Maizuru, whereas the Kyoto road has not made commensurate progress and could not be carried to Maizuru without an outlay of seven millions. On the other hand, from a military point of view, the Kyoto line is the better. The *Jiji* recommends that in view of the great difference of expense and of time, the Hankaku railway should be carried at once to Maizuru at State expense, the Kyoto line being left for subsequent consideration.

JOURNAL OF THE COLLEGE OF SCIENCE.

The College of Science of the Imperial University has just issued Part IV., Vol. XIII., and Part III., Vol. XV., of its Journal. As usual the papers contained are too learned to be generally interesting, though an exception may perhaps be noted in the case of Dr. Shunsuke Kurano's essay of the "Transpiration of Evergreen Trees in Winter." It is remarkable that out of seven essays forming these two volumes, no less than five are in German and only two in English. The ratio is generally reversed. The titles of the essays are:—

"Transpiration of Evergreen Trees in Winter."—By Shunsuke Kusano, *Rigakushi*. (With Plate XVIII.)

"Ueber die Sporocarpenevacuation und darauf erfolgreiches Sporenausstreuen bei einer Flechte.—Von M. Miyoshi, *Rigakuhakushi*, Professor der Botanik a. d. Kaiserl. Univers. z. Tokio. (Mit Tafel XVIII. Bis.)

"Studien ueber die Einwirkung des Kupfersulfats auf einige Pflanzen."—Von H. Hattori, *Rigakushi*. (Mit Tafel XIX.)

"Anatomische Studien ueber wichtige Faserpflanzen Japans mit besonderer Beruecksichtigung der Bastzellen."—Von K. Saito, *Rigakushi*. (Mit Tafeln XX. u. XXI.)

"Untersuchungen ueber die Schrumpfkrankheit (Ishikubyo) des Maulbeesbaumes," II. Bericht.—Von M. Miyoshi, *Rigakuhakushi*, Professor der Botanik, a. d. Kaiserl. Univ. z. Tokio.

"Untersuchungen ueber die niederen Organismen welche sich bei der Zubereitung des alkoholischen Getraenkes 'Awamori' betheiligen."—Von T. Inui, *Rigakushi*. (Mit Tafel XXII.)

"Observations on the Development, Structure and Metamorphosis of Actinotrocha."—By Iwaji Ikeda, *Rigakushi*. (With Plate XXV.-XXX.)

GERMAN OPINION OF ENGLAND.

Another German correspondent has entered the lists with the object, apparently, of defending his countrymen's attacks upon England in connexion with the Boer war. His letter will probably surprise those that read it as it has greatly surprised us. In the first place, this correspondent undertakes to prove that *The Times* and others are very much to blame for attaching any credit to the contents of Dr. Moritz Busch's Diary, and he is good enough to attribute this to the "common English ignorance of foreign things," which ignorance he is also pleased to designate as "that almost innate habit of nearly everybody of your countrymen." If "Civis Germanus," as he calls himself with more regard for brevity than Latinity, had paused to reflect, it might have occurred to him that people who read German books and quote from them are not, perhaps, so grossly ignorant of German affairs as he happens to think, and if he himself possessed any of that acquaintance with England and things-English which he so severely censures Englishmen for not possessing about Germany, he would know that the whole course of the Busch controversy was followed in England with much attention and interest, and that, while accepting the German view that the Doctor had been guilty of indiscretions and that his book had been compiled without any earnest regard for the great man whose confidence he had enjoyed for so long, no Englishman, nor any German, arrived at the conclusion that the whole contents of this remarkable work were to be set aside as untrustworthy. That, *pace* "Civis Germanus," would be a ridiculous verdict, and if our correspondent, instead of indulging in wholesale denunciation of Dr. Busch and of Englishmen, had adduced one tittle of reasonable evidence to show that the extracts quoted by a correspondent of *The Times* and reproduced in these columns were unworthy of credence, his remonstrance would have commanded the attention which it certainly will not now receive. It is further to be observed that "Civis Germanus" attacks only a part of the English case when he inveighs against his own countryman. He altogether ignores verbatim extracts from German orders and notifications sent to *The Times* by a German subject. Nothing can invalidate that testimony. Its conclusive character would stand even in the absence of Dr. Busch's Diary, and with every desire to credit the *bona fides* of our correspondent, we find difficulty in explaining how any intelligent man can imagine that he has set up a satisfactory case when he leaves unanswered the greater and the more important section of the evidence on the other side. That evidence proves, beyond all shadow of doubt, that the Germans themselves in their war with the French, resorted to practices even severer and more drastic than those now employed by the British against the Boers.

We pass now to our correspondent's second contention. He endeavours to set up a distinction between the Anglo-Boer and the Franco-German wars, on the ground that from the moment when the British Government "illegally declared the countries (Boer) annexed," the war ceased to be a contest between two belligerent governments, and entered a phase in which "all means" became allowable to the Boers. What is meant, we wonder, by "illegal annexation." Since when and under what code of laws did it become illegal to annex conquered territory? The use of the epithet "illegal" in such a context merely illustrates

the mood of prejudice and even hatred that so many Germans carry to the discussion of this question. It is a mood that betrays men into strange errors, and on this occasion it has betrayed "Civis Germanus" into the error of forgetting that the game of annexation was commenced by the Boers themselves. They annexed Natal, they annexed a large part of Cape Colony, and they would have gone on publishing annexation proclamations without limit had not the tide of success been turned against them. If the character of the war was in any way changed by the introduction of the annexation element, it is upon the Boers themselves that the responsibility rests, and we commend that fact to the notice of "Civis Germanus" who talks so glibly about the British "innate habit of ignorance."

But "Civis Germanus" advances one very explicit and very important statement of his own, which results not from his indiscreet allusion to events in which the Boers themselves took the lead, but from his curious forgetfulness or ignorance of the course of the war. He says:—"All the measures taken by your officials tend to the annihilation of the Boers as a State, a nation, and a race." We grant the annihilation as a State. England does not intend that the Boers shall any longer enjoy the rights of independent statehood, and if any other country in England's place would have adopted a different line, history has yet to furnish some hint of the existence of such an angelically altruistic Power. But when "Civis Germanus" alleges that all the measures taken by British officials tend to the annihilation of the Boers as a nation and as a race, he shows that he has not followed the course of the war at all, and that he bases his opinion solely on the gross falsehoods published by the journals of his own country, whose stupendous ignorance of England and English methods has been shown throughout this war in a manner that most Englishmen would have deemed incredible two years ago. Does "Civis Germanus" know nothing of the repeated proclamations issued by the British promising the fullest grace to all Boers that made act of surrender? Does he know nothing of the fact that thousands of Boers took advantage of these proclamations, and were allowed to return to their farms and re-enter into possession of all their property? Does he know nothing of the fact that in many cases these very Boers, after having taken the oath of allegiance, and after having reaped the material fruits of the perjury they contemplated, turned round and acted the part of traitors, tearing the hand upon which they had fawned? Does he know nothing of the fact that among the men now fighting on the Boer side are many who for years lived as British subjects and enjoyed all the advantages of that condition, never troubling their heads in the smallest degree about Boer independence or a Boer State? If he knows nothing of these things, then he is singularly disqualified to take any part in the controversy, and if, knowing them, he still declares that all the measures taken by British officials tend to the annihilation of the Boers as a nation and a race, we leave him to find an epithet for his own judgment.

As to his contention that *The Times* has brought forward these points merely for the purpose of re-creating enmity between the Germans and the French, we would point out two things. The first is that the *The Times*, so far from entertaining a sense of deep regret because the hostility of the French towards the Germans is vanishing, has uniformly expressed its satisfaction at

that happy state of affairs, satisfaction which, we venture to affirm, is shared by every educated Englishman, in spite of the hatred shown by the Germans towards England throughout the course of the Boer War. The second is that it was a German subject who sent to *The Times* the copies of Prussian orders and edicts issued during the Franco-German war, a German subject who probably felt indignant at the gross injustice done by his countrymen to the English. For the rest it is a quaint conception, surely, that when the Germans engage in a campaign of wholesale abuse and slander of England, the English are to be accused of mean motives because they deduce from German annals evidence that the Germans themselves in their last war resorted to measures more drastic and severe than those they now denounce so bitterly on the part of the English. That is in truth an excellent illustration of the case under consideration. Everything is permissible to the Boers and the Germans; nothing is permissible to the English.

Now there are just two things we should like to say to our correspondent by way of conclusion. He declares that against such a foe as England is now showing herself in South Africa, all means are allowed. Will he be good enough to indicate in what respects England has shown herself such a foe, and will he be good enough to explain on what principle of justice he contends that while "all means are allowed" to the Boers, no means except such as can be taken with kid-gloved hands are allowed to the English. His whole argument is tacitly based on the assumption that England has been guilty of practices such as are condemned by civilized nations and not permitted in civilized warfare. Will he tell us what these practices are. It will not do to refer to the annexation of the two States as an unjustifiable or uncivilized measure. Even if such a silly argument were possible under any circumstances, it certainly can not be employed by a German. What is the case against England?

THE BUDGET.

The *Kokumin Shinbun* publishes a brief statement of the Budget for next year, and vouches for the accuracy of the figures, which it says that it has had much difficulty in procuring. They are as follows:—

	YEN.
Ordinary Revenue.....	226,345,000
Extraordinary Revenue.....	35,148,272
Total	261,493,272
DETAILS OF EXTRAORDINARY REVENUE.	
	YEN.
Sale of Government Properties.....	1,094,092
Miscellaneous Receipts.....	107,890
Receipts from Communes.....	1,050,653
Issue of Bonds	22,525,150
From the Indemnity	8,065,856
Forestry Funds	2,043,000
Contributions.....	60,000
Carried over from last year	191,829

The principal enterprises for which provision is made in the Budget are the establishment of a medical college, a high commercial school and a high industrial school; the building of a steel-plate factory at Kure, and the erection of barracks in Formosa. As to administrative reform, the establishment of officials will be reduced by 20 per cent., and by that means, as well as by economies effected in the contingent expenses of the Departments, a saving of 2,800,000 yen will be made, which money is to be used for increasing the salaries of the remaining officials. A sum of nine million yen

appropriated on account of the *post-bellum* undertakings for the current year, will remain unexpended until 1903.

The *Kokumin Shinbun* further affirms that the restoration of the Capital Fund for the Navy will be effected by means of the Chinese Indemnity, and that the proceeds of the increased taxes will go to the account of general revenue. It is with regard to that point that some trouble may be anticipated with the political parties.

It is also stated that a sum of 17½ million *yen* will be appropriated from the Chinese Indemnity to form a reserve fund for Naval and Military arms and ammunition, and for pension purposes.

The negotiations for a sale of bonds abroad are still in progress. If successful, 14,700,000 *yen* of the proceeds will be devoted to restoring sums drawn from the *Sho-kinbu* of the Treasury, and 16,000,000 to repaying loans from banks, the remainder being appropriated to the *post-bellum* undertakings.

CHINA.

It is now stated that Prince Ching will not leave Peking until the 31st of this month. As he will have 527 miles to travel before reaching Hsian, and as he will certainly make a point to get there before the Imperial Court's arrival, it is difficult to see how the Court's alleged programme of being in Hsian by the 27th of November can be carried out.

Both the *Fiji Shimpō* and the *Asahi Shinbun* have received telegrams from Shanghai saying that the new five-per-cent. *ad-valorem* tariff will be enforced by the Imperial Chinese Customs from the 11th of November.

A curious case of apparently very flagrant injustice has just been exposed in the columns of the *North-China Daily News*. In a note describing "another rising of desperadoes and Boxers in Chiang-shan," that journal mentioned a report that the insurgents were receiving encouragement from certain reactionary gentlemen of Hang-chow, "chief among whom was an ex-Hanlin Reader named Fan Kung-hsi, who, it is alleged, was mainly instrumental last year in making the high officials at Hang-chow disseminate throughout the province the news of the Empress Dowager and Prince Tuan's decree calling upon the officials of the Empire to exterminate foreigners." Thereupon Mr. Liu Ming-tsz, who claims to have been an eye-witness of what happened at Hang-chow last year, wrote thus to the *North-China Daily News* :—

On looking up my diary, I find that on the 9th August, 1900, the state of affairs in Hangchow grew worse; everybody was in fear and doubt, as if expecting something to happen before the day was out. If it had not been for the efforts rendered by the most respectable and intelligent of the gentry, the various chapels, and residences of foreigners in Hangchow would have been destroyed long ago. At that time the ex-Hanlin Reader Fan Kung-hsi (Chashien), ex-Hanlin Compiler Yang Wen-yün (Shih-ü), and Loh Mow-hsiün (Mee-tsai), and the Secretary of the Grand Secretariat, Kao Yün-lin (Pah-soh) started a trainband service by enlisting men as militia to patrol and keep watch in the city. But in spite of their efforts, some ruffians made their way into the residences of Bishop Moule and Rev. G. W. Coultas, with a view to rob and plunder the houses. As soon as Mr. Fan Kung-hsi and his friends learned this, they immediately made the then Governor Yün dispatch soldiers to suppress these ruffians, so that the threatened houses were untouched.

In regard to disseminating the false decree, Mr. Fan told the Governor, when the latter summoned him for his opinion, that if he let the people burn the chapels and massacre Christians that day, they would destroy the yamen and murder the officials the next. He had private consultation with the Governor, and

was instrumental in putting a stop to proceedings which would otherwise have ended more disastrously than they did.

We suspect that in the matter of being the victims of unjust accusation there are a great many Fan Kung-hsi's, but for the purpose of defending them, there are very few Liu Ming-tsz's.

There have been so many changes recently in the personnel of the *Corps Diplomatique* in Peking that the following extract from a Shanghai contemporary will be useful to persons who desire to keep themselves posted :—

Speaking of Ministers, Mr. Conger will soon be the only one here who passed through the siege, and will then become the doyen, as Col. Denby was for so many years. After the siege the British Minister, Sir Claude MacDonald, was the first to be transferred. The new German Minister, Dr. Munim, came about the same time. Then the Japanese Minister, Mr. Nishi, left, and his successor, Mr. Komura, has also left within the last few weeks. The United States Minister was granted leave, and has lately returned. The French Minister, M. Pichon, was the next to leave, being succeeded by M. Beau. Then the Russian Minister, M. de Giers, was succeeded only lately by M. Paul Lessar. The Italian Minister, Marquis Ruggi, is the last one to leave, his successor not having yet arrived. The Spanish Minister, M. de Coloman, who has been doyen for the last two years, the Netherlands Minister, Mr. Knobel, who has served the next longest time to the Spanish, and was the only Minister wounded during the siege, the Belgian Minister, M. Joostens, who came just in time to pass through the siege, and the Austro-Hungarian Minister, Baron de Wahlborn, who was on leave during the siege, are all soon to leave. All these changes in the diplomatic body will make it easier to receive back the Empress Dowager and such officials as Yung Lu. The past is to be forgotten, and China is to be given another chance to scheme against the world. The United States Government may be behind other countries in a trained system of diplomats, but once again the Minister in Peking of greatest experience in Chinese matters will be the American.

KOREA.

Some question about the ownership of a small plot of land by a Russian subject is said to have arisen at Fusan. According to a telegram in the *Fiji Shimpō*, the Russian Consul at Masampo has gone to Fusan to discuss the matter with the local officials there.

It is suggested that the reluctance shown by the Korean authorities to abolish the grain veto is due primarily to the difficulties in which they have become involved owing to prematurely importing a quantity of Annam rice. The only chance of avoiding heavy loss on that transaction is to keep the veto in force. Thus whatever success might have attended the Japanese Representative's endeavours to procure the revocation of the interdiction had the case turned on harvest conditions only, he is not likely to be successful so long as the Korean Government has the white elephant from Annam on its hands.

The new treaty between Korea and Belgium was ratified on the 16th instant.

Mr. Hayashi, Japanese Representative in Seoul, speaking to the *Nichi Nichi Shinbun's* correspondent in that city, says that since Korean officials find their account in maintaining the grain-export veto, and since it furnishes to the people a pretext for evading the taxes, there is little chance of getting it repealed at present. The Korean Foreign Minister seems to be rather an impossible person, according to Mr. Hayashi. When he has important business to discharge at the palace, he pleads the fact that the Sovereign had retired to his bed-chamber as an explanation for postponing an audience and deferring the discharge of the business. Mr.

Hayashi denies, incidentally, that the Russian Representative has proved an impediment in the matter. He seems, finally, to have very little expectation that the International Company of the East will advance any money for the Seoul-Wiju Railway.

THE KYOTO HOTEL.

Thursday, Oct. 24.

The Kyoto Hotel affair has found its way into print. It is discussed by the *Japan Herald* under the heading "Japanese Antagonism to Foreign Enterprise," and it serves that journal as the text for ventilating its favourite views about "the antagonism of the Japanese to foreigners being permitted to attempt anything likely to lead to a profit." Our contemporary seems quite pleased to have found what it considers a practical illustration of its ancient hobby that the opening of Japan would not confer any benefits whatever on foreigners, and after stating the so-called facts in a most misleading manner, the *Herald* concludes by saying : "This flagrant case will not be likely to be soon forgotten, and should serve as a caution to over sanguine and too hopeful foreigners. In this country the most useful undertakings may be found incapable of realization by circumstances which could not be reckoned on as likely to occur." Now we happen to have most intimate knowledge about the "circumstances" of this affair, and since the allegations of the *Japan Herald* are likely to prove most mischievous if left uncorrected, we shall state the facts. Our contemporary's account is this :—

The need of a good Hotel, conducted so as to meet the requirements of foreign visitors, has been long felt. This led the Directors of the Oriental Hotel at Kobe to conceive the project of inducing the public to subscribe the requisite share capital for that purpose, and their efforts were crowned with success. Enough money being paid up for the requisite purpose, ground was bought, and an architect was employed to design a suitable building with its proper appurtenances. Ere this, the projected structure might or could have been erected, by a Japanese artisan who entered into a contract to build the building, but when he began to cart the necessary material, he was stopped by the priest of an adjoining temple, who refused to allow the use of the only road giving access to the property, he claiming that the road in question belonged to the adjacent temple. The assertion of this unexpected claim has been the means of causing the whole enterprise to be abandoned, since no reasonable arrangement, even involving the payment of a very considerable sum of money, coupled with an engagement to keep the road in repairs, has sufficed to placate the priestly extortioner, who is believed to be the agent of plotters to prevent the enterprise being attempted. The negotiations have been spread over a year or upwards, but all to no purpose. The money subscribed for the building and furnishing of the hotel, which was mainly intended for foreign visitors' use, has been kept idle during the time mentioned, and will ultimately have to be returned to the subscribing shareholders, less the expenses incurred, unless indeed the land purchased can be sold at a sufficient profit to cover them.

Portions of the above are quite unintelligible but the general drift can be deciphered despite the extraordinary English. So far as relates to the purchase of the land and the arrangements for commencing to build, the account is correct enough. But otherwise it is very erroneous. The projectors of the hotel made an unfortunate mistake at the outset : they purchased a lot of land without assuring themselves that any suitable means of access was available. There were apparently two means of access : one a back road, scarcely better than a path, which would not have been at all suitable ; the other a very excellent road, which the projectors imagined, doubtless, that they might use freely. But it turned out, as might easily have been ascertained at the

outset, that this latter road was not a public highway but a private avenue. It did not belong to a "priestly extortioner" as the *Japan Herald* asserts, apparently quite unconscious of the ludicrous contradiction involved in applying such a term to a landlord who is at the same time declared to have refused even "a very considerable sum of money." It belonged to a society called the *Hokokkai*, of which Marquis Kuroda is president, and which numbers among its members Marquis Nabeshima, Marquis Hachisuka, Baron Kaneko and many other prominent Japanese. The purpose for which the Society was formed was the erection of a monument to Hideyoshi, the *Taika*, and the road in question is an avenue the land for which was purchased, and all the expenses of construction were defrayed, by the Society. Even if the Society were disposed to allow this road to be converted into the approach to a hotel, the law would veto such an arrangement, for the law provides that no land belonging to a religious body may be used for business purposes during a longer period than three weeks. But the Society was not disposed to sanction any such arrangement. It desired that the approach to the monument should not be available for ordinary traffic, and its members strongly objected to the idea of sharing the avenue with a hotel. That they had an absolute right to raise this objection can not for a moment be queried, and that it is a reasonable objection with which most persons will sympathise, seems equally undeniable. There was no objection whatever to the hotel as such, still less was there any disposition to place obstacles in the path of the projectors because they were foreigners. To show how flagrantly untrue these charges are, we may mention that the Secretary of the *Hokokkai* did everything in his power to make arrangements for purchasing land for an alternative road, and did actually map out a route which might be utilized for that purpose, the proprietors of the land being willing, as he took the trouble of ascertaining, to part with it at a reasonable figure. Our readers will now be able to appreciate the propriety of the *Japan Herald's* assertion that "the priestly extortioner is believed to be an agent of plotters to prevent the enterprise being attempted." Our information stops short of any explanation as to why the projectors of the Hotel decided to wreck their whole enterprise rather than to avail themselves of the alternative route found for them by the Secretary of the *Hokokkai* after considerable trouble, but we can answer for it that so far from encountering an obstructive or unsympathetic attitude, the agents of the projectors received every possible assistance from members of the *Hokokkai* and from its Secretary. The Society did indeed decline to have its avenue converted into a hotel approach, and since its very natural objection was not suggested by any idea of "extortion" but was purely a matter of perfectly reasonable sentiment, the question of money did not enter into the account at all. Foreign enterprise is not unwelcome in Japan, so far as we can see, but foreign enterprise can scarcely expect that Japanese national and religious sentiment will efface itself entirely in order that hotels may be built or factories erected by foreign projectors. Assuming that there be any anti-foreign prejudice in the country, these recklessly unjust charges and baseless suspicions are certainly not calculated to placate it. Had the hotel in question been projected by Japanese subjects, it is most improbable that they would have fallen

into the error of imagining that the *Hokokkai's* avenue would be convertible into a hotel approach, and had they at the outset committed such a blunder, they would assuredly have admitted that the fault lay with themselves instead of attempting to accuse the *Hokokkai* of extortion or of prejudiced opposition to business enterprise.

Friday, Oct. 25.

Certainly no reader of the *Japan Herald* has reason to complain of lack of amusement if he takes the trouble to examine the wonderful arguments advanced by that journal and the still more wonderful English in which they are formulated. Our contemporary has fully succeeded in covering with ridicule an affair which it doubtless intended to treat very seriously, the affair of the Kyoto Hotel. Certain foreigners purchased a lot of land in Kyoto under the mistaken impression that a private avenue leading to a statue of Hideyoshi could be used for public purposes. The society of Japanese noblemen and gentlemen to whom the avenue belonged declined, and indeed were unable, to allow the avenue to be thus used, and the projectors of the hotel resolved to abandon their scheme rather than adopt an alternative route which the secretary of the society had found for them. That is the whole story. Out of such materials the *Japan Herald* manufactured a libel to the effect that the difficulties encountered by the projectors of the hotel were due wholly to Japanese unwillingness that foreigners should undertake any profitable enterprise in this country. The true facts having been explained by us, the *Japan Herald* replies:—

The *Mail* denies this, and indulges in a long rigmarole about some society, bearing the name of the *Hokokkai*, but of the existence of which is we may observe, entirely unknown to foreigners, and attributing the opposition of the project to the objection alleged to be entertained by its members, because the road leads to a monument erected to Hideyoshi being made use of by the visitors to an hotel.

Truly our contemporary has almost outdone himself in this striking display of grammatical construction. "But of the existence of which is we may observe, entirely unknown to foreigners." "Because the road leads to a monument erected to Hideyoshi being made use of by the visitors to an hotel." "Indulges in a long rigmarole about some society bearing the name of the *Hokokkai* and attributing the opposition of the project, etc." It is not impossible to decipher the drift of the *Japan Herald's* meaning, but it has certainly done its best to bewilder its readers, which is, perhaps, the wisest course it could adopt under the circumstances.

The *Herald* then proceeds to refute our statements, and for that purpose evolves the following sentence:—

Now what much militates against the correctness of the *Mail's* statements is the ugly fact that the priestly extortioner concerned, was the maker of the claim for cash he made, and subsequently added to, that if the money asked were paid the use of the road would then be granted to the Hotel Company!

Why, the English of Sam Weller's valentine was magnificent compared to the *Japan Herald's* production. "The priestly extortioner was the maker of the claim for cash he made, and subsequently added to." What on earth was the priestly extortioner's real performance? We entirely agree that his acts, as depicted by the *Japan Herald*, do constitute a very "ugly fact." However, it is unnecessary to pursue the subject of the hotel, because our contemporary has now exposed its complete ignorance of the whole affair. It confesses that it never heard of

the *Hokokkai*, and it has the splendid assurance to declare that the existence of such a society is entirely unknown to foreigners. Considering that the main part of the negotiations relating to the road were conducted with the *Hokokkai* by the projectors of the hotel, that the road belongs to that society, and that the secretary of that society did everything in his power to assist the projectors by making arrangements for an alternative route, the *Japan Herald's* avowal that it never heard of such a society as the *Hokokkai* furnishes an excellent illustration of the information it possesses.

Our contemporary is particularly irate because we mentioned, *en passant*, that portions of its writing were unintelligible owing to the extraordinary English employed. It rebuts that allegation, with exquisite courtesy, by accusing us of "scattering lies at random." It is an old established fact that even to a costermonger nothing is so terribly offensive as to be accused of talking bad English, and we can easily understand how painful such a charge must be to the erudite and polite newspaper whose charming ideas of syntax have been illustrated in the quotations adorning our columns above. If it be permissible to offer a suggestion, we advise our excited contemporary to advertise for the services of some youth who has received a tolerable education, and to appoint him to the post of "dresser" of manuscript in the office of the polished and scholarly journal.

MR. TANAKA SHOZO.

Mr. Tanaka Shozo has resigned his position as a member of the House of Representatives. His reason for the step is characteristic. He says that people have begun to allege that it was simply for the sake of getting elected that he took up the question of the Ashiwo mine so vigorously. Such a charge is exceedingly repugnant to him. He wishes to disprove it by the most practical demonstration in his power, and therefore he resigns his seat. We are bound to say that, in our opinion, Mr. Tanaka's retirement will rather promote than impede the orderly discharge of business in the House of Representatives, for many of his performances there were violent and discreditable. On the other hand, in spite of unsightly displays due to a quick temper and the sense of an unredressed grievance, he has won respect as a thoroughly honest politician. He is the only member of the House of Representatives that has steadily refused to accept the increase of 1,200 *yen* annually which the Diet voted for the salaries of its members, and in other ways he has proved himself a man of the highest principles. After ten years of parliamentary life it is very regrettable that such baseless rumours should drive him from his seat, but his countrymen will certainly sympathise with his motives.

THE EQUITABLE SOCIETY.

We wonder whether the *Tokyo Asahi Shimbun* ever intends to recognise the responsibilities of the position it has won. By sheer hard work, by courageous enterprise in collecting news and by clever writing, it has gained a high place in Japanese public esteem. Yet it apparently thinks nothing of prostituting its columns to most unworthy purposes. We find it now attacking the Equitable Insurance Company. On the ground that a foreign employé of the Company has behaved dishonestly, the *Asahi* declares that the Company has made a

failure, that out of six million yen worth of policies taken out by Japanese subjects, only one has thus far been realized, owing to the fact that there has not been time for more than one of the policyholders to die, and that the other persons insured by the Company are now suffering from uncertainty as to whether their security is living or dead. What amusing nonsense! If the *Asahi* knew anything at all about the Equitable it would know that such talk is veritable balderdash, and if it knows nothing, why does it undertake to speak? The foreign public, which does know, understands very well that the *Asahi's* injurious paragraphs are written in the interests of the Equitable's Japanese competitors, but the Japanese readers of the *Asahi* can not be supposed to be equally well informed. Some of them are doubtless deceived, and that is the purpose of the *Asahi's* paragraphist. A worthy purpose, in truth, for a journal ranking among the four first newspapers in Japan.

EMIGRATION COMPANIES.

The Government has amended the regulations with regard to Emigration Companies. Hitherto these companies have been required to put up ten thousand yen by way of security, but it is now enacted that any company hereafter formed must put up a minimum of thirty thousand yen. As for companies already in existence, their ten thousand yen will be regarded as sufficient for an emigration of one thousand persons, but if they despatch a greater number of emigrants, they will have to put up 10 yen for each, until a sum of thirty thousand yen is reached.

This new legislation is obviously dictated by the fact that many abuses have occurred in connexion with emigration companies and that in several cases their means have not proved sufficient to meet emergencies resulting from their own laches. To exact a larger amount of security seems to be the most practical method of dealing with the situation. Nevertheless some Japanese journals express dissent from the arrangement, and are evidently disposed to regard it as a device on the part of the old companies to protect themselves against competition. That involves the hypothesis that the Government is acting in collusion with the old companies, a conception that must to most persons appear rather extravagant, though our vernacular contemporaries seem to find no difficulty in entertaining it.

ARRIVAL OF CHINESE OFFICERS AND STUDENTS.

The *Hakui Maru*, which arrived at Bakan on the morning of the 22nd instant, carried Lieut.-General Yang and forty other Chinese officers and students who have come to Japan to attend the autumn manoeuvres. Among the students are two grandsons of Viceroy Chang Chih-tung.

General Yang, speaking to a Japanese interviewer, explained that although the Chinese Court had refused Viceroy Chang's application for permission to repair to a place on the Court's route for Peking, in order to greet Their Majesties, the refusal was due wholly to solicitude for the Viceroy's health, which was much impaired at one time. The General states, however, that the Viceroy has now completely recovered.

It can not be denied that the coming of such a large party of Chinese to attend the manoeuvres has considerable significance.

The Yangtze Viceroy is evidently looking towards Japan with constantly increasing interest as the country upon whose doings they are to model their own measures of progress.

GERMAN NOTES.

Professor Baumgarten has promulgated a theory that bovine tuberculosis is not transmissible to human beings. About 20 years ago, when he was serving as a surgeon in a hospital where Dr. Rotkowsky worked, the latter made many attempts, invariably without success, to inoculate cancer patients with tuberculosis germs, his conviction being that cancer and tuberculosis are mutually exclusive. These failures are regarded by Professor Baumgarten as positive proof that bovine tuberculosis can not be transmitted to human beings, and he explains the fact by saying that bacilli suffer modifications in the bodies they inhabit, and that those which have accommodated themselves to the organisms of the lower animals become comparatively innocuous to man. That would be a very comfortable theory if it relieved the public of all apprehension with regard to diseased milk or butter, but the Professor is careful to recommend that precautions with regard to those staples of diet should not be relaxed. In short, he believes in the theoretical harmlessness of the bacilli, but shrinks from seeing his belief subjected to a practical test.

The exact facts about the "Kowtow" are made clear by journals just received. It seems that the German Government did not require Prince Chun himself to "Kowtow," but did require that the other members of his mission should perform the "Kowtow" or some modified form of it. When it was found that an interminable deadlock would result from insisting on that demand, the Kaiser solved the difficulty by signifying his willingness to receive Prince Chun and an interpreter alone. Thus the "Kowtow" disappeared from the question.

The German newspapers usually regarded as inspired made light of the "Kowtow" question after the above solution had been found. They concluded that however humiliating the ceremony might have been made, the Chinese Government would have found means to hide its true character and significance from the nation. The same journals declared, however, that the ambassador should be obliged to use a formula such as would impress the Mandarins at all events. It does not seem, however, that any special formula was insisted on. What was written upon the yellow silk letter from the Emperor of China was this:—

"On behalf of the great Emperor my most gracious lord and master, I have the honour to place this letter in your Majesty's Imperial hands. After the revolutionary movements of last year in China the Imperial Court, moved thereto by its own inclination no less than by the demand of the Powers, felt bound to express by means of a special mission to Germany its sincere regret for these events, and, in particular, for the occurrence which cost the life of your Majesty's distinguished Minister, Baron von Ketteler. In order to place the sincerity of this regret beyond the possibility of any doubt, his Majesty the Emperor of China has chosen for this mission his nearest blood-relation. I am able to assure your Majesty that the Emperor my most gracious lord had, in the fullest sense of the word, no connexion whatever with the troubles which have brought great misfortunes upon China and losses and anxieties upon Germany. Nevertheless, the Emperor, in accordance with the custom of ages, has taken the responsibility upon his own sacred person. I am therefore charged, in handing over this letter, to give expression to the cordial feelings which the Emperor, my exalted Sovereign, entertains for your Majesty. I have further been instructed to act as

the interpreter of these sentiments on the part of the great Emperor and the whole Imperial family, and to give expression to his wish that your Majesty's House may flourish and enjoy health, happiness, and blessing in the fullest measure. His Majesty the Emperor of China hopes that the events of the past year have only constituted a temporary disturbance in the relations between the two countries, that the clouds have now given place to the clear light of peace, and that the inhabitants of Germany and of China may learn more and more to understand and to appreciate one another. And such is also my own personal desire."

When Prince Chun arrived at the New Palace for his audience, he was not given any military escort nor did any of the soldiers on guard at the gates salute him. But as he left the Palace he had a guard of honour and was saluted by a band.

The Peking correspondent of *The Times* says that the Chinese chuckled over the result and thought that Prince Chun had gained a diplomatic victory. Indeed it seems certain that the effect of the policy adopted in Berlin will be unfortunate, for the Chinese can not fail to conclude that the Prince refused to enter Berlin and remained at Basel until his conditions had been accepted, whereas in truth he was kept at Basel by the German Government until the manner of his reception had been decided.

As usual Russia seems to have been the only gainer. The Peking correspondent of *The Times* telegraphs:—

The incident has given another opportunity to Russia, which she has cleverly seized. Throughout the dispute the Russian Legation, foreseeing that Germany would give way, was in daily communication with Li Hung-chang, advising China to keep firm and thus embarrass Germany, and declaring that the Tsar, never ceasing to testify his friendship to China, was interceding with the German Emperor to spare China the indignity which he desired to cast on her special Embassy. Accordingly the Chinese in Peking to-day attribute the successful result of Prince Chun's protest to opportune Russian assistance.

There has occurred a split in the camp of the supporters of the new tariff bill in Germany. The agricultural classes demand even higher *minimum* duties on grain than those embodied in the bill, but the industrialists are opposed to any duties. Agrarian newspapers, at the date of latest advices, were denouncing the "selfishness" and the "treachery" of their former allies.

Russian journals are much pleased at England's disappointment over her bargain with Germany in the matter of the celebrated agreement. It has taken England a year they say, to discover that she was "duped," though her diplomatists ought to have known better.

There was every indication, at the date of latest advices, that Kauffmann would be reelected to the post of Second Burgomaster of Berlin, though the Emperor refused to confirm his original election. Originally he was chosen by a small majority and may be said to have owed his election to the support of the socialists, but on the second occasion he was expected to poll an overwhelming number of votes as the citizens objected to the supposed reason of the Emperor's refusal to confirm his election, namely, that when an officer of the reserve 20 years ago he took part in an agitation against the proposed State monopoly of tobacco.

THE JAPANESE AND MORMONS IN 1872.

(COMMUNICATED).

When the Iwakura Embassy was on its way eastward from San Francisco it was caught in a snow blockade and compelled to remain in Salt Lake City from the

4th to the 21st of February. While there, the following incident occurred, according to a quotation, in Lauman's "Japanese in America," from a local newspaper:—

"One of the principal members of the Japanese Embassy was waited upon yesterday by a messenger from the 'Prophet Brigham,' requesting the Oriental Prince to call on the Western Prophet. His Highness remarked that it was not etiquette in Japan for persons of his rank, when among strangers, to make calls, but awaited the calls of people among whom they may be sojourning.

"The prophet's messengers replied that the Seer and Revelator was very anxious to see the representative of His Majesty, but was sorry to admit that it was impossible for him to do so immediately. The Royal Ambassador inquired why the Prophet could not call. To this the messenger replied that the Prophet was unwillingly confined to his room in charge of a Federal officer. The Prince saw the point at once, and, with a frown, said:—"We came to the United States to see the President of this great nation; we do not know how he would like for us to call on a man who had broken the laws of his country and was under arrest."

It may be well for the Japanese of the present day, especially the officials, to exercise similar caution in their relations with the Mormon Apostles now here.

NOTES ON CURRENT EVENTS.

The White-Horse Society—an appellation derived from an incident of *sake* drinking at the formation of the association—is a society of artists among whom the most eminent is Mr. Kuroda Kiyoteru, who threw Japanese society into convulsions, six years ago, by hanging a picture of a nude female in the Kyoto Exhibition. This Society has now opened a picture-gallery in Ueno, Tokyo, and nude subjects, drawn with startling accuracy, figure prominently among the exhibits. It was a hard nut for the bewildered police. Undoubtedly such doings came under the category of *fuzoku kwanan*, but they were permitted in all western countries and the Japanese public was still divided about the problem. So the police undertook to represent this division by stretching a piece of muslin over the lower parts of the figures. Tokyo is laughing heartily. It is such a sweet novelty. Paintings with police draperies disposed so as to save the public's prudery!

The people of Niigata prefecture seem to be considerably excited about the question of local boundaries. It was the intention of the authorities to combine three districts for administrative purposes, and the arrangements for combination were put in progress without consulting the inhabitants. The latter denounce such action as a flagrant violation of the right of local self-government. Many of the local officials have resigned, and a meeting has been held condemning the project of amalgamation and agreeing to indemnify to the extent of 3 *yen* daily any one who may come into conflict with the law by refusing to accede to the proposed change. There is a rumour that the headman of one of the villages, who attempted to appease the people, was wounded.

Her Imperial Highness Princess Kitashirakawa left Tokyo by train on the morning of the 20th instant. She was accompanied by a number of ladies-in-waiting and chamberlains, and by Marquis Date, Count Kiosu, Viscount Honda and others. The

Princess embarked in the *Asama* at Yokohama, and the war-vessel weighed at once for Formosa, where a shrine is to be dedicated to the memory of the late Prince.

A telegram from Hamamatsu says that the Kanaya tunnel has collapsed. There were fears of this for some time and all precautions had been adopted. It is expected that the repairs will be very speedily effected.

It is confidently affirmed that the reported issue of Treasury Bills will take place in a few days, the amount being ten million *yen*, and the rate of interest 7 per cent. The term of redemption is not yet fixed, but will probably be three or four months. This money, which is to be applied to continuing the *post-bellum* undertakings, would have been obtained from the Bank of Japan, but the latter having already advanced to the Treasury a sum of 24 million *yen*, further drafts upon its resources would have inconveniently restricted its facilities for accommodating the general public.

A telegram received by the *Asahi* says that on the 18th instant the Chinese Peace Plenipotentiaries handed over to the Spanish Minister as Doyen of the *Corps Diplomatique*, the whole of the bonds for the Indemnity. That is very prompt work, but, after all, the giving of paper promises is easy enough. It must be confessed, however, that whatever may be said about the initiatory stages of the Boxer trouble, China has not much ground for complaint as to the concluding arrangements, for although her conquerors inflicted a fine on her, they very kindly made dispositions for her to pay it without undue inconvenience.

The Emperor is slightly indisposed, having caught cold, and it has been decided that His Majesty will not attend the autumn manoeuvres of the Guards Division in Gumma prefecture, for which purpose he was to have left Tokyo yesterday (18th).

In the *Asahi* we find an interesting paragraph. It says that the loan of twelve hundred and eighty thousand *yen* which the Yokohama Water Works office was to obtain in America has all ended in smoke, and the officials are now in the happy position of having spent a considerable sum on presents to useless negotiators and on unnecessary telegrams. On the other hand, a sum of five hundred and twenty thousand *yen* due to Messrs. Favre Brandt and Company for pipes imported, has to be paid by the 30th of this month. Under the circumstances the Water Works Authorities see no course except to borrow money from a Japanese bank at 12 per cent., and they have obtained the consent of the Municipality to take that step. We can not believe that the Water Works would have to pay such a price for accommodation even under the circumstances related by our contemporary.

Mr. and Mrs. Uchida, who left Tokyo by the 6 o'clock train on the evening of the 23rd instant *en route* for Peking, had a great send off. About three hundred people assembled at Shimbashi to bid them farewell, and among the number were several members of the Cabinet, many prominent Japanese officials and some foreigners. A more animated scene has not often been witnessed at Shimbashi.

YOKOHAMA LITERARY SOCIETY.

The Yokohama Literary Society began its winter's work on Friday evening, and despite the inclement weather there was a fair attendance at the Van Schaick Hall. The lecturer was Miss Jessie Ackerman, who spoke before the Society last session, and her contribution was warmly received. The full programme was as follows:—

Overture—
PART I.
Andante from Symphony in C. Major...Schubert.
Mrs. Poole and Mr. Mason.
Lecture—"Incidents of Travel in Many Lands"...
Miss Jessie Ackerman, F.R.G.S.
PART II.
Vocal Duet—Tuscan Folk Songs.....Caracciola.
(a) "A Streamlet full of Flowers."
(b) "When I am Dead."
Miss F. Mendelson and Miss Poole.
Vocal Solo—"The Rose".....Cur hmann.
Mr. A. H. Atkinson.
Recitation—"The Minuet".....Miss Ross.
Vocal Quartette—
"Softly fall the Shades of Evening"...Hatton.
Miss Mendelson, Miss Poole, Mr. E. W. Maitland
and Mr. W. N. Allen.

THE SCHLÜTER CONCERT.

There was a large audience at the Public Hall on the evening of Wednesday, drawn thither chiefly by the expectations which had been aroused as to the powers of Mr. Max Schlüter, and it may be said at once that few if any were disappointed. The young performer, if not a great, is undoubtedly a most talented violinist, his command of the instrument betokening the possession of musical gifts and of training of the highest order. The concert opened with a fine number, Mozart's Quartette in E flat minor, in which Mr. Schlüter took the violin, Miss Mendelson the piano, Mr. H. Poole the viola, and Mr. R. Schmid the cello parts, the result being an admirable performance, which was deservedly applauded. Schubert's song "Ungeduld" was charmingly rendered by Mrs. Mollison, and being rapturously recalled she gave a "Fantaisie" by L. Denza. Next came Handel's Sonata in F major, a splendid performance by Mr. Schlüter in combination with Miss Poole at the piano. The Duet-tini for two violins by Godard brought out the young master again, this time with Mr. H. Poole, Miss Poole accompanying, and again, as indeed was the case after every number, the applause was hearty even to vociferousness. In the Violin Concerto, D minor (Vieuxtemps) Mr. Schlüter was heard to fine effect, the accompaniment being played by Miss Mendelson. In her two songs "Ich Liebe dich" by Grieg, and "Damon" by Max Stange, especially in the latter, Mrs. Mollison again held her audience spellbound and had to return and bow her acknowledgements of the ovation accorded her. Perhaps No. 7, a trio for violin, organ and piano, bringing out Mr. Schlüter, Mr. Allen and Miss Poole respectively, received more marked approval from the house than any other part of the programme. It consisted of (a) "Nocturne" by Mendelssohn, and (b) "Berceuse" by Godard, and the applause which it evoked continued until Miss Poole and Mr. Schlüter returned to play the last number but one, a violin solo—"Premier Chagrin" by Godard and "Danse Hongroise" by Ondricek. This was so warmly approved of that Mr. Schlüter with the same accompanist gave another solo, which *moreau* brought the concert to a close. It should be said that beautiful baskets of flowers, the gift of Mr. Schlüter, were presented during the evening to the ladies taking part in the concert. It would be idle to attempt a discussion of the merits of this young musician, for it was admitted by those well qualified to judge that he is an almost perfect master of the violin. In grace of expression, beauty of tone, and generally in the power of evoking from that fine instrument its varied and speaking charms, he stands above all but the most amply equipped critics. Nor can we speak discriminately of the ladies and gentlemen who gave him their assistance. The audience manifested their delight in increasing measure after each successive number, and we may safely content ourselves by declaring the concert an unqualified success.

THE NIPPON YUSEN KAISHA.

THE section of shareholders of the Nippon Yusen Kaisha who are agitating for changes in the management of the Company, appear to insist upon five points; first, that the Company's estimates for each year's expenditures should be submitted to the shareholders; secondly, that a committee of Councillors, numbering 30, should be appointed; thirdly, that strict rules should be enacted with regard to rewards to officers; fourthly, that regulations for determining the duties of the Company's employes should be minutely laid down, and fifthly, that larger dividends should be declared by reducing the reserve funds. As to these suggestions, it will doubtless seem to the public that some of them are quite incompatible with efficient working. We have never heard of any mercantile, industrial or maritime company in any part of the world that was required to submit to its shareholders estimates of income and outlays for each year. Business could not be conducted on such a system. The privacy essential in many operations would be violated. In other countries, England for example, no such estimates are thought of by shareholders, and if they were seriously called for, the reply of the directors and principal officers would be to resign *en masse*, for the demand would be inevitably interpreted as a declaration of want of confidence. To an equally impractical category belongs the suggestion that a committee of 30 persons should be appointed to discuss and decide all important questions relating to the conduct of the Company's affairs. That would be a veritable case of driving the ship ashore by an excess of oarsmen. It would be difficult to conceive anything more impractical. This, too, amounts to a declaration of want of confidence in the present management, and we may venture to suggest that if there be really any feeling of the kind in responsible quarters, the better plan would be to reconstruct the establishment instead of saddling it with a piece of wholly unworkable mechanism. Indeed the inference suggested by this suggestion is that its formulators are either making a jest of the whole affair, or have no knowledge whatever of business methods and requirements. The third and fourth points as to regulations about rewards and about official duties are matters upon which, as outsiders, we have no opinion to offer; but the fifth proposal, namely, that the reserves, or at any rate a part of them, should be dissipated for the purpose of paying larger dividends, must be condemned *in toto* by all thinking men. It is suggested that this proposal, like the lady's postscript, though standing last on the list, embodies the true gist of the whole agitation, and that the agitators are not investing shareholders who look to their yearly dividends as a steady source of income, but merely speculators whose hope is to "bull" the company's stock. If they succeed, the doom of the Nippon

Yusen Kaisha will be written, for a Company which, in these days of keen competition, divides its reserves among its shareholders and retains no funds to meet emergencies or to organize new developments, may truly be called moribund. It is not to such a company that the Treasury pays a substantial yearly dividend, but to a company which, content with a reasonable dividend, interprets its obligations to the State in a progressive spirit, and understands that the success it has already obtained should serve only to inspire fresh efforts, and that the lines where the flag of Japan is already seen are only paths to wider routes of enterprise. If the empire is ever to have a really fine mercantile marine, or to be able to utilize the powerful army it has organized, agitation like that now fomented against the Nippon Yusen Kaisha must be suppressed. It may have its uses. Criticism is always wholesome when it is honest, and we do not imagine that the Nippon Yusen Kaisha is further removed beyond the range of criticism than are many other big companies. That, however, is not the question. The general public must judge the critics by the proposals they themselves advance, and as to those proposals the verdict must be that they are mischievous and impractical.

FRENCH NOTES.

The religious orders which deem it incumbent to quit France rather than comply with the conditions of the Associations Law, are finding a poor welcome in other countries. Italy contemplates taking precautions against them; the Belgian Government has virtually vetoed their coming, and it is said that Germany intends to follow the example of some of the Swiss Cantons by prohibiting foreign communities. England and Holland thus seem to be the only countries where refuge can be found, Spain and Portugal being already agitated against their own religious communities.

France's attitude in the dispute with Turkey seems to have been unanimously approved in Europe. *The Times*, after declaring that its opinion is entirely favorable to the demands of France, says:—"The procedure of the French Government for the assertion of these demands is fully entitled to the approval and to the moral support of the civilized Powers. It has been temperate, dignified and firm. If the Sultan fails to appreciate its significance and the excellent impression it has produced on public opinion, he will show less discernment than he has usually exhibited in similar conjunctures."

M. Déroutede evidently wants to fight a duel with M. de Cassagnac. He has written a letter calling the latter "an Orleanist agent, a Dreyfusard agent, a Ministerial agent, a provocation agent and *un misérable*." Truly the custom of duelling seems to create rather than to restrain licence. If a man is willing to fight he seems to think that he may say what he pleases.

It seems probable that we may hear at any moment that M. Santos Dumont has won the Deutsch prize. The account of his trial ascent on Sept. 6th, is:—"For an hour and a half he manoeuvred in perfect conditions of stable equilibrium over

the Longchamps Racecourse, and then shouted to his friends to meet him at the Cascade Restaurant. The rendezvous was reached with scientific precision and punctuality, the balloon being guided as easily as a racehorse, and coming to earth in front of the restaurant quite gently and without a hitch. It was on the way back to the Meudon slopes that the first accident occurred. As the guide-rope was trailing among the trees of Baron de Rothschild's property, it caught, and the balloon was a captive. The efforts to disengage it, which lasted three-quarters of an hour, proved futile, and finally it became necessary for a bystander to climb a lofty pine and to fling M. Santos Dumont a rope, which he fixed in his keel and by which the balloon was pulled down. The keel was somewhat bent in the process. The balloon had then to be towed home, for too much gas had escaped to make a fresh ascent possible. The distance was considerable, and the lake which intervened complicated the difficulty. M. Santos Dumont had all but arrived when a gust of wind broke one of the ropes by which the balloon was being towed. The men who had hold of the others were frightened and let go. The balloon went up suddenly nearly 300ft. M. Santos Dumont, who was in the car, instantly opened one of the valves: the gas accumulated in the upper half, and the balloon descended at an immense velocity to the ground. The shock seriously shattered the whole machine, breaking its wooden frames; and M. Santos Dumont, who, however, was not hurt, declared that it was the first time in his life that he had ever felt really frightened."

The Russian *Norosti* having sympathised too vehemently with the French nationalists and having pretended that the pardon of the French political exiles would make a favourable impression in Russian political circles, has been suspended for a month.

The difficulties of the Paris Municipality in making ends meet seem likely to affect the beauty of Paris injuriously. *The Times* correspondent writes:—

Paris is threatened with the disappearance of many of those oases of verdure which are such a relief to the eye from the wilderness of bricks and mortar. Not that the avenues of trees on the boulevards are in jeopardy—these will continue to be one of the chief embellishments of the city—but the numerous private gardens which agreeably supplement them are likely to be taxed out of existence. The municipality, driven to its wit's end just at the end of last year to make up the revenue lost by the remission of the octroi on wine and beer, lit on a device of imposing a tax of $\frac{1}{2}$ per cent. on land not built upon. This is a rather vague term, and there was an alarm that even the small courts at the back of most of the Parisian houses were to be subjected to the impost. The city authorities do not propose to go to this length; and, indeed, as only 4,300,000fr. are required to cover the deficit, such a wholesale measure would be far in excess of any fiscal exigencies. Moreover, they are ready to allow every house, untaxed, a space of ground equal to the area of the building. Still it is lamentable to think that the inevitable disappearance of private gardens is likely to be hastened by this annual fine of $\frac{1}{2}$ per cent. on their estimated selling value as building ground. Gardens more or less spacious are still numerous, and are a source of pleasure not merely to the owners or occupiers but to the neighbours and passers-by, and their sanitary qualities are obvious. Schools and convents also have grounds, which are not so much a luxury as a necessity. Cloistered orders, if they are to continue in existence under the new law, manifestly require them. Wealthy residents, it may be thought, will not leave Paris or sacrifice their gardens on account of the new tax; but nowadays even the rich, in view of reduced rents or interest on investments, are disposed to limit their expenditure. The spacious garden in the rear of Rothschild's Bank is being built upon. Although this began before the tax was imposed, that tax is calculated to influence less opulent residents. Much will no doubt depend on the degree of rigour

with which the law is enforced, but it will certainly tend to deprive Paris of one of its charms for foreign visitors, and, what is more serious, of one of its elements of salubrity.

It is now denied that Turkey has imposed any new tax on French religious orders. The origin of the false rumour was that the local authorities were recently instructed to show more diligence in collecting dues from monastic institutions which have no firmans.

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

The Editor of the *Kokumin Shimbun*, Mr. Tokutomi, has reviewed at considerable length Mr. Nakae's Tokusuke's — 年有半 *Ichinen-yūhan*, a book that is in many respects quite out of the common. As Mr. Tokutomi is always worth reading when dealing with literary subjects, we give the gist of his review:—This book represents the opinions of a man who is suffering from a mortal disease and hence of a man who is conscious that this will be his last say, so to speak. Under these circumstances, Mr. Nakae has said many things that writers differently situated would withhold. A year and a half the doctors told him some time ago was the approximate limit of his life's duration. Hence the title of the work. Mr. Nakae is well known to the public as a man who in addition to possessing an intimate knowledge of Chinese literature has studied French books very thoroughly. His published works show him to be a scholar of exceptional insight, and thus his last book is in many ways more striking than anything he has written. It contains numerous accusations of men and things, but the advice with which its pages abound cannot but serve a useful purpose. Possessing an intimate knowledge of Japanese human nature, Mr. Nakae has found it an easy task to put his finger on national weaknesses. To quote a few instances: "Japanese know well in what their interests consist, but they do not know what is right and reasonable. They allow themselves to be swept along by events without reflecting whither they are going. For centuries accustomed to submit to the violence and arbitrariness of the *samurai* without opposition, they do not give their conduct a moment's thought, but just act from impulse. What are wanted in this age are not warriors, but philosophers, not men of action as much as men of thought." "There are lots of men who can talk and many that use their hands well, but few who use their brains" (*Nihon nite wa kuchi no hito, te no hito ōku shite, nō no hito sukunashi*). "Japanese are too easy-going. They attach themselves to things too impulsively and give them up with equal readiness. They are lacking in seriousness of mind. They too readily agree with those whom they meet and are apt to flatter." This is all true, remarks the *Kokumin*, but we hardly expected to hear it from a man given to drinking. Nakae's character sketches are well worthy of consideration, though we cannot agree with what he says in many cases. He speaks of Marquis Saigō as lacking in courage and resolution in action. In this Mr. Nakae is quite wrong. Marquis Saigō excels in the very quality in which he is represented as being deficient. He is a man who is seen at his best in a difficult situation. When many men would be at a loss what course to follow his mind is always made up. Of Marquis Saionji, Mr. Nakae says, "He is a man of lofty ideas and broad views, extremely intelligent and possessing great insight into affairs. He sees through things at once. Hence he is not easily carried away by curiosity nor does he show any great enthusiasm for new things. On this account people say that he is cold and indifferent. But his mood is the result of insight in most cases." More than half of this is true, says the *Kokumin*, but Mr. Nakae knows the Saionji of ten years ago and not the Saionji of to-day. . . . The chief value of the *Ichinen-yūhan* consists in the manner in which it makes known to us the real Nakae, whom we take to be an honest and a very discerning writer. People are surprised that a man of such talent and knowledge of affairs should spend his days in drinking. But the fact is Mr. Nakae has seen enough of the world and its ways to be dis-

gusted with it, and he seems to have come to the conclusion that this subject won't bear thinking about; so, as a diversion, he drinks and now and again makes strange remarks that few understand. These freaks are to be regarded as his method of giving an outlet to his mental dissatisfaction. The Nakae known to most people is the surface Nakae and not the real man. Although so fond of learning he has always taken a keen interest in political affairs. There has been no greater enemy to the Sat-Chō Clan Government than he. He has been called the Rousseau of Japan, because he has ever championed the cause of the people. The terms for the popular party and the official party, *Min-tō* and *Ri-tō*, were invented by him. But when the two great parties that represent popular interests, the *Jiyūtō* and the *Kaishintō*, became hostile to each other, Nakae's interest in politics ended and he went into business. In this he was unsuccessful and it is pathetic to find so fine a man summing up his misfortunes in such words as the following:—*Waga jigyō ni okeru mōke wa tanin kore wa tori; son wa ware hikiuke; sono suye wa saiban, bengōshi, shittatsuri, kyōbai, dandan to semekitaraitte taoretarai*. "The profits which my business brought was appropriated by others; the losses only fell to me—the end of it all being that, pressed by courts of law, by barristers, by bailiffs and by the sale of attached goods, step by step I was ruined." At this juncture he took to writing again, but just when his many admirers were rejoicing over his return to the literary world, the hand of death was laid on him, and here we are reviewing his dying utterances. It is a sad case, but there is comfort in the thought that Nakae leaves behind him a number of disciples who will perpetuate his influence in the world. As regards money-making and the like, he was always the most unbusiness-like of men. One day a few months ago he took his wife to Sakai. There on the shore the two conversed cheerfully at first, but suddenly Nakae's soul clouded over and he turned to his wife and said, "I am only waiting for death. Being a man, I have read much and know what is true and what is right. Therefore my thoughts yield me much pleasure. So much is this the case that, though stricken by a mortal disease, often I can forget my trouble. But you my wife, being a woman, though of late you have listened with delight to what I have to say on many subjects, have not sufficient mind to explore things for yourself. I have shown myself to be a poor hand at making money and have accumulated nothing but debts, and now I have to leave you to provide for yourself. You are too old to marry again." Then, smiling, he said to his wife, "Shall we enter the sea and go to paradise together like two constant lovers?" Whereupon they both laughed merrily and so the scene ended. The language used in describing this incident is very beautiful and yet so sad that it is hard to read it with dry eyes. He was evidently trying to act the Stoic, but ever and anon the Epicurean part of his nature would assert itself. The blending of joy and sorrow, laughter and weeping is all reproduced in his book in a most telling manner until the reader feels as though he himself were passing through the same dread ordeal and attempting to meet death with a smile. To speak of this man as the Rousseau of Japan is to misrepresent him. He is far more sober than the great French radical and his mind is better balanced. The general public knows him not. Those who really know him express no surprise as they read the *Ichinen-yūhan*.

Mr. Nakae read the *Kokumin's* review with great pleasure and sent for Mr. Tokutomi to thank him for his appreciation of his views and real character. On that occasion Mr. Nakae said, "I am no wild schemer, but an ordinary practical man of the world. I am no Rousseau."

* * *

The *Chūō Kōron* publishes an article on public amusements in Japan, which deals specially with the *yose* and their influence. The writer is of opinion that the country is ill-provided with entertainments that are at once amusing and instructive. So many attractions known in Europe and America are not to be found here. The *yose* corresponds in a way to the Music Halls of the West, with perhaps more license than Western

Society grants to the latter. Police reports published two years ago showed that there were in Tōkyō alone 153 of these Halls. They are by no means equally distributed over various districts. Kanda is specially noted for the number of *yose* there, just as Kyōhashi is noted for its newspaper offices and the Kōjimachi district for its theatres. There are no less than 43 *yose* in the Kanda district. This district, it must be remembered is more frequented by students than any other. Out of some 50,000 students residing in Tōkyō it is calculated that 35,000 live in Kanda. This accounts for the enormous number of lodging-houses in that district. In the whole of Tōkyō there are said to be 1,631 lodging-houses (*Geshi-kuya*), and of these 1,086 are in the Kanda, Kōjimachi, Hongō, Nihonbashi, Shitaya and Asakusa districts. As regards lodging-houses, Hongō stands first and Kanda comes next, but in the matter of *yose* Kanda leads. The *Chūō Kōron* contends that the entertainments given at these places should be radically altered in character, so as to prove an educational factor of importance.

The paper quoted above devotes much space month after month to attacking abuses of every kind. In a recent number it has an article entitled *Shijō (Kami no uye) no Hanzei* (The Sins of the Press) in which the subject of indecent advertisements is gone into. The *Chūō Kōron* contends that the Government is far too lax in dealing with the publishers and circulators of thoroughly demoralising books. The manner of advertising various specifics is often suggestive of actions that the law condemns. For instance, in recommending a drug for the use of women, one advertisement says, "Those women who are afraid of causing abortion by taking this medicine are recommended not to take it," which is a clever way of informing people how to produce abortion. A book called *Kwaizakuru himitsu onna koroshi*, that sells at 22 *sen* is contaminating from cover to cover, and ought to be suppressed at once. The *Konin Hiji-yome-iri Dōga*, which sells at 13 *sen*, is little better than the last mentioned. Other indecent publications in wide circulation are the *Danjo Kōyō*, *Makura no yume*, price 26 *sen*. *Shinsen Makura bunko*, 26 *sen*; *Keiseikai shijō hachite*. There are many others whose titles even, the *Chūō Kōron* says, are too indecent for publication in its pages. If the newspapers were to cease inserting advertisements of these books, their circulation would be greatly curtailed thereby. But this step they are not likely to take unless the Government interferes. The Osaka journals are specially to blame in this matter, as they have more indecent advertisements than the papers of any other city. A good deal of information on this subject is given by the *Chūō Kōron* which we cannot transcribe here. It rightly says that the attempts of the Monbushō to teach morality to the young must to a large extent be frustrated by the circulation of polluting literature in a most bare-faced manner.

* * *

In the *Kokumin Shimbun* appears a report of an interview with Marquis Saionji in which the following opinions are given as those of the Marquis:—Art critics in this country say a great many things that are quite unintelligible to ordinary readers. They are always talking about the objective and subjective characteristics of pictures. What they mean by this is not at all clear. They are running these two terms to death in a way that is unknown in the West. In China this method of criticising works of art is unknown. . . . Coming to the subject of changes in our language, and the method of writing and composing, I do not doubt that eventually we shall adopt some simpler system of signs. The development which our language has undergone in the past is very marvellous in its way. We have imported terms wholesale from the neighbouring continent and by means of Chinese have managed to make all Western technical terms thoroughly intelligible to our people. Even in the *Meiji* era alone the language used by popular writers has made wonderful strides, as any one can see who will

* The term *Shijō-hachite* comes from wrestling and here is applied to prostitution.—(WRITER OF SUMMARY).

take the trouble to compare a newspaper article written to-day with one written 25 years ago. The vague, stilted Chinese style proved quite unsuited for giving full expression to Western thought, and so it has been made to give place to an easy-flowing and expressive semi-colloquial style which answers the purpose of writers and translators excellently. Though we cannot expect any rapid radical transformation of the language, it is very desirable that deficiencies in our forms of speech should be supplied. In Japanese very frequently the distinction between singular and plural and between the tenses of verbs is not marked at all. In telegrams it is often very awkward. If we send the message *yuku*, for instance, it is not clear whether one or many are going. Neither is it clear whether the person referred to has gone or is going. . . . As regards the difficult Chinese style, if there were about a hundred Japanese who could read and write it, it would be all that is required. The rest of the nation had far better adopt a popular three-parts colloquial style. The development of the language should be allowed free scope to take what direction it will. It will thus suit itself to the wants of the time. There are some who say that if Imperial Rescripts and the like were written in Genbun Itchi (Spoken and Written Languages United) style, they would lose their dignity and impressiveness, but I am not of this opinion. Rescripts could be written in this style so as to produce the same effect. If men cannot be impressive when they use the ordinary speech of everyday life, that is the fault of the men and not of the language they use. But change in these matters is not to be effected in a day. . . . What is to be regretted more than anything is the manner in which our young men are handicapped by being put to study difficult Chinese which will be of little use to them in after-life. This can only be compared to the levying of a tax which people can ill afford to pay.

On painting the Marquis said: In oil painting and water-colouring we have not made much progress. Our water-colours are no more than sketches. . . . I am very fond of music, both Japanese and foreign. But Japanese instruments are not suited for orchestral purposes in large halls. They are better listened to in small rooms and when few in number. I like the *samisen* best. But the range of the notes is very limited and the pleasure afforded by it only momentary. The air no sooner begins than it is over, like the explosion of an incense squib. . . . There is nothing that I enjoy more than travelling, and sea-voyages are a great pleasure to me. I prefer to keep to countries where I know the language. So my journeys have taken me to France, Germany, Switzerland, and Italy only among European countries.

* * *

Every other week the *Kokumin Shimbun* publishes a Literary Supplement. In No. 14, lately issued, Mr. Tokutomi gives us an article on "The Japanese and the English in public and private life" (*Kōshi 公私, ni okeru Nihonjin to Eijin*), of which the following is the substance: Bismarck once said, "As an individual the Englishman is an upright and thoroughly trustworthy gentleman whom you can respect. To call an Englishman a liar is the greatest insult you can offer him. But the English Government is the very opposite of this. Its most distinctive characteristic is hypocrisy, and it will resort to measures that the individual Englishman utterly despises. The French are somewhat given to act in a similarly unscrupulous manner, specially when dealing with weak countries, but they do so in a more open manner and they do not put on a pretence of virtue in the way the English do." This criticism is too extreme for us to adopt it as it stands, says Mr. Tokutomi, but the distinction between the action of individual Englishmen and official action to which Bismarck called attention undoubtedly exists. In not a few cases private and public behaviour are in direct opposition to each other. How do we stand as a nation in this matter? Mr. Townsend Harris, who arrived in Edo in 1857, and who signed our first Treaty with America, once said *Nihonjin wa sekai no*

saidai kyōgensha nari (Japanese are the biggest liars in the world). This was no doubt an exaggeration of the truth, but in the matter of mutual distrust we Japanese know that it exists to such extent that we are hard put to it when having to defend ourselves against the charges brought by foreigners. But when we come to consider the action of our Government in its dealings with other Powers, we see integrity and fairness that it is hard to find elsewhere. Our honesty in international affairs has been designated by some to be *baka shōjiki* (the honesty of a fool). Considering the prominent part we took in the relief of Peking and other military operations in China last year, that we should only send in a bill for the actual cost of the expedition has astonished the world. But this is our way when dealing with other nations. We see then that the moral tone of our politics as regards foreign affairs is very high. So that we excel just where England fails and fail where England excels. Which nation has the greater advantage, the one which can boast of high-toned individual morality or the one which maintains a lofty standard in her international dealings? This is a question that we find it hard to answer, concludes Mr. Tokutomi.

* * *

The *Nippon Shimbun* draws a parallel between the Scotch and the inhabitants of Northern Japan. The following are the chief points of the comparison: It is proposed to establish two new Universities, one in Kyūshū and the other in Sendai, and it is assumed that the persons residing in these parts have progressed far enough to warrant such a step. But is this so far as the Northerners are concerned? Comparing the North-Eastern part of Japan with Scotland, we find the people are as different as it is possible for them to be. The Scotch are respected by the English for their fine qualities, but the residents in the North-Eastern part of Japan have for a long time been regarded as inferior to their Southern fellow-countrymen. (*Tōhoku wa anadorare, mu-shinkei to yobaretaru koto hisashi*). They fear the Southerners, but are not feared by them. In Great Britain the opposite is the case. On the whole the Scotch have a higher reputation than the English. If the English are patient, persevering, energetic, and brave; the Scotch are more so. But the races of Great Britain are thoroughly amalgamated and there is no real mutual want of respect between them as there is here. But nevertheless it cannot be said that in Japan the Northerners are shallow. Some able men have come from the North-East, such as Takayama Hikokurō, Gamō Kumpō, and Rin Shihai. In regard to the inauguration of the various business enterprises of the *Meiji* era the North-East of Japan has taken a leading part. But in accumulating profits from the undertakings started they have fallen behind their Southern competitors. As originators the Northerners are ahead, but as utilisers of opportunities and facilities they are always surpassed by the Southerners. It is a peculiarity of the Southerners that they originate few things. They allow others to go ahead, but no sooner do they see there is money to be made in a thing than they exert themselves to secure the lion's share of the profits. In all matters whether political or commercial the Northerners allow themselves to be ousted by the Southerners. So much so that modern Japan is the Southerners' Japan* and it is recognized that the Northerners are half asleep. They are regarded as a pliable, easily-led people and are looked down upon for this reason. Politicians like Count Itagaki and Count Gotō recognised years ago that the Northerners made good tools for the carrying out of their designs and used them accordingly to a very large extent. The Scotch bear no such relation to the English. They are found leading rather than being blindly led. Though Northerners in Japan are by no means shallow and artificial, they lack stability of character and steadfastness of purpose, just the qualities in which the Scotch excel. They are angry occasionally, and then they are for the time extremely formidable, but a little submission appeases them, and they will allow the cause of

* In the original the terms, North-Easterns and South-Westerns are used throughout.—(WRITER OF SUMMARY.)

their anger to remain unchanged. They are specially susceptible of flattery, a weakness which is not found in Scotchmen. This is the opinion of persons who are well versed in the politics of modern Japan. It is far preferable to be able to use whatever opportunities offer rather than wait for the instigation of other people. The use of opportunities is an art that the Northerners have not learnt. Hence it is that so much that they begin is never finished.

* * *

As has been already stated in these columns, the *Nichi Nichi Shimbun* on the 4th inst. celebrated the publication of its Nine-thousandth number by the issue of a giant edition of the paper consisting of no less than 128 pages. On politics, law, literature and religion there are special contributions from the pens of well-known writers, all of more or less merit. Among them an article on "The Confusion and Crudeness in the Establishment of Law," by Mr. Okuda Yoshito, the head of the Cabinet Bureau of Legislation (*Hōseikyoku-chō*), deserves special notice. Mr. Okuda writes on a subject which he has specially studied, and therefore speaks with authority. We can do no more than give the outline of his essay, entitled *Hōrei Seitei no Soman*. The laws and regulations issued by various Departments of State, says Mr. Okuda, are frequently at variance with each other and the work of bringing them into line is a task that the Government has not yet succeeded in completing. There is a tendency with the Departments to act independently of each other and each tries to get all the money it can out of the exchequer. Work is frequently done three or four times over at great expense to the State because each Department wishes to act separately. The following statistics will give some idea of the activity of the various Departments in issuing orders, regulations, and drafting laws. From November, 1890, when the Constitution came into operation, down to August of this year the total number of Imperial ordinances issued was 3,851. Out of these 503 took the form of laws. This was at the rate of more than one per day. Besides this there were 1,200 Departmental orders, bringing the number up to 5,861. Over and above these are all the provincial orders issued, making an aggregate of new regulations that is quite phenomenal. Many of these orders introduce unnecessary changes. They follow no recognised principle or system and were dictated in many cases by mere temporary causes or the whims of high officials. Laws have not changed as much as ordinances, but some of these have been changed far too often. The law concerning the building of railways, for example, passed in 1892, has been changed ten times, and the Registration Fee law passed in 1896 has undergone five modifications. But this is a trifle compared to the instability of ordinances. The Imperial Ordinance bearing on the rank and remuneration of high-class officials during about ten years has been changed 76 times; the cause frequently being the creation of some new official or some new office. Imperial Ordinances affecting the salaries of *hannin* officials have been altered 40 times; those of the military 38 times. Ordinances that have been changed ten or twelve times are too numerous to be dealt with here. In education the same confusion exists. Ordinances and regulations are altogether lacking in system and hence they conflict with each other in a variety of ways. Then on some points the rules are far too numerous. Those bearing on the discipline of officials number 37. Rules affecting the financial arrangements of the various Departments are always changing. In reference to the methods of purchasing things required for official use there is the greatest discrepancy between the methods followed; in some cases free competition being allowed by various Departments and Bureaux; and tenders called for from the general public, in others the competitors being specially chosen. Rewards and perquisites granted to one Department are withheld from another. For instance, in the Naval Department permanent officials get what are called *fujorei*, presents to help them along, which are not granted to army officials occupying corresponding posts. There

are many such inconsistencies. It is high time that the Government should insist on the abolition of the Department spoliation system, the system by which each Department tries to get all it can for any and every purpose, without regard to rival claims. Systematic administration is what is lacking and on the supply of this deficiency the nation must insist. The following table shows the number of Imperial Ordinances and Laws that have come into existence since 1890.

Year.	Laws.	Imperial Ordinance.
1890	3	21
1891	5	249
1892	9	120
1893	19	263
1894	25	208
1895	32	174
1896	32	406
1897	50	471
1898	32	373
1899	109	467
1900	87	423
1901	38	173

In its issue of Oct. 18th the *Tōkyō Nichi Nichi Shimbun* publishes an article on "Japanese Students in Foreign Lands" of which the following are the salient points: Even supposing that a country's home educational system is all that it ought to be there is much to be gained from sending a certain number of students to foreign schools. It is done habitually in Western countries. But with us the benefits of sending students abroad are very great, since our home system of education is lacking in many important elements. We have not fully realised this as a nation. According to investigations made by the Mombushō two years ago, 105 students had been sent by that Department, 12 by the Foreign Department and 16 by the Naval Department, making a total of 133. Besides these a few have gone at their own expense, but as a rule these have not stayed abroad long and have seldom completed their courses. The Government ought to go into this subject more earnestly and take steps for sending men abroad to study commerce, industry, and the like. Hitherto too much favour has been shown to men in pursuit of mere academic learning. Some people say that Government has not sufficient money for this. But very little is required. Ten thousand *yen* a year would suffice to send four or five and 200,000 or 300,000 *yen* would maintain a hundred students. The Government spends far too much money in despatching officials to foreign countries who effect nothing that is beneficial to the State. In many cases the men who go speak no foreign tongue. Their tours are very costly to the State nevertheless. This should be stopped and the money hitherto devoted to it utilised for maintaining promising students in Western countries. Neither our commerce nor our industry can be developed properly without our sending specialists to study these subjects in the great centres of the world's activity and business enterprise.

YACHTING.

Saturday was a fine day for the 39-raters but the breeze was too much for the cruisers and 21 raters, though doubtless individual boats in both those classes could have gone over the courses without serious trouble. Consequently it was wisely resolved to start only the big craft, of which three slipped their moorings and began cruising about before gunfire. The wind was a little to westward of north, coming in heavily at times with occasional rain squalls; there was a nasty joggle in the harbour; between the entrance and the Lightship there was less sea but off Honmoku it was no joke even for the 39-raters. They were all three under reefed lower sail. *Mary* had the best of the start, getting over eight seconds after the signal; *Kingfisher* was a couple of seconds later but most unfortunately her reef points began to part and before the race had really commenced for her her mainsail ripped and she had to bear away to her moorings, a cripple. But for this accident there is no doubt that the race would have been doubly interesting. *Haidee* was taken unawares and crossed the line twelve seconds astern of *Mary*. She had indeed a bad start, and the result was soon observable in the wind-

ward work out to the entrance, which *Mary* passed about 4 minutes ahead. The wind had all the weight they wanted and they reached out to the Lightship at great speed, *Mary* being able on this leg to add about half a minute to her lead. It was a clear run with a high following sea to the Widow Buoy and here again it was seen that *Mary* was getting away from the white cutter, for there was a difference of eight minutes between them when they hauled on the wind for the thrash homeward. There was a very heavy sea off the Spit and both craft took water freely on board, *Mary* in particular knocking up quite a smother of spray. The latter, almost immediately after flattening in sheets, began to lose her advantage. She laboured heavily though carrying only jib and mainsail, while *Haidee*, looking very snug and handsome under her new canvas, came up fast. After making a short board *Mary* seemed to point high enough for the Lightship, but when *Haidee* after standing well out came in and met her there was little difference between them. Very soon *Haidee* also went on the starboard tack and began to come up hand-over-hand. *Mary* was very heavily handicapped. She had set her staysail again, but in the heavy thrashing her copper had opened forward and began to strip, retarding her progress of course to a most serious extent. So *Haidee* sailed through her lee with comparative ease and was immediately leading boat. As they neared the Lightship both went much easier and at this mark *Haidee* led by half a minute only. In the smooth water she went the faster and passed the *Barfleur* a minute and ten seconds to the good, but *Mary* picked up as they approached the harbour entrance and passed in just 51 seconds astern. She gained a few seconds by being steadied on her course more promptly than the leader, but they seemed to run in without any appreciable change in their positions and crossed the line as follows:—

Haidee... 4h. 29m. 40s. *Mary*... 4h. 30m. 20s.

Those are the official times but observers with watches made the difference between the two just about half a minute. At any rate as they sailed on level terms, both under club time allowance and under handicap (on which the two prizes were given) there was no mistake about *Haidee*'s win, and her owner was the recipient of many congratulations when he came down town from the race course.

BASEBALL.

Saturday was not a particularly pleasant day for field-sports, being squally, damp, and cold, but there was nevertheless a fair attendance at the Cricket ground in the afternoon to witness the baseball match between the Y. C. and A. C. and a nine from the U.S.S. *Yorktown*. The play was disappointing all round, the naval visitors being very uncertain in their fielding, muffling several easy catches and in the fourth and fifth innings getting fairly rattled. At this point *Yorktown* had piled up 19 runs to 13 made by the *Yorktown* men, and in the next innings the home side put on 2 more, making them 8 to the good. Then in the seventh innings, when two had retired, Kilby missed at first base, and White made a glaring error in the right-field, allowing three men to get in besides a home-run for the batter. Another run was made by the Navy ere the innings closed. This was all that either side managed to get, the game concluding with the home team the winners by three runs. Mr. Merriman was umpire. Teams and runs by innings are appended:—

ARRIVAL OF SIR CLAUDE MACDONALD.

PUBLIC RECEPTION.

The C.P.R. steamer *Empress of India* arrived at Yokohama on Tuesday morning, getting up to her moorings about half-past seven in the morning with, as it seemed to most of those residents interested in her arrival, far less demonstration than usually signals her appearance in the Bay. Much conjecture was engaged in on Monday as to the non-appearance of the vessel but as a matter of fact we believe she left Vancouver a day late. Not long after nine o'clock the members of the Committee appointed to arrange for Sir Claude MacDonald's reception, with a considerable number of the public, began to assemble at the English Hatoba. At a quarter to ten the British Minister's party left the steamer in the C. P. R. launch *Spindrift*, and on landing with Mr. and the Hon. Mrs. Beethom Whitehead and Mr. H. A. C. Bonar, British Consul,—returning from long leave,—they were met on the jetty by all those that signed the address, who were greeted cordially by Sir Claude and Lady MacDonald. Thereafter the Minister, escorted by Mr. J. F. Lowder and followed by the general body of the public, proceeded to the British Court Room.

In the Court Room seats were found for all the ladies but most of the gentlemen had to stand, places being given to Sir Claude and Lady MacDonald and to Mr. and Hon. Mrs. Beethom Whitehead at the desk occupied in former days by the clerk and other officials of the Court. With the brightly dressed bevy of ladies thus disposed round the hall, and the warm sunlight that momentarily threatened to invade its precincts, the scene was lively as well as interesting. Perhaps it may be added that the dingy laize of the clerk's table was covered by the British colours, which Sir Claude abstractedly turned over during his reply to the address.

Mr. LOWDER, having asked for silence, proceeded to address the Minister. He said: Sir Claude MacDonald, as a soldier is bound to obey orders so a lawyer who should travel beyond the four corners of his brief would rightly incur the censure of his client. But though I may not be allowed to attenuate in any way the words of welcome contained in the address I am about to read to you, it is permissible to state that on no occasion save one to which I will refer presently, has the proposal to give our Minister a public reception been approved with greater unanimity than that which has brought us here this morning. The occasion I alluded to was when we assembled, in this same room, many years ago, to take leave of Sir Harry Parkes on his transfer to Peking. But then, Sir Harry Parkes had lived among us and identified himself with us for a great number of years; his family had grown up amongst us; and our intercourse with him and with Lady Parkes was such as to engender in our hearts a warm personal feeling of affection for him as a man in addition to the esteem in which we held him as a Minister. And I can assure you, Sir, on behalf of my countrymen and countrywomen for whom I am speaking, that with the slightest encouragement we are one and all prepared to extend that sentiment to yourself and Lady MacDonald.—(Loud Applause). The form of address (which had previously been placed in the hands of the Minister) I shall now read from a manuscript copy.

Following is the text of the Address, which was handsomely engrossed by Mr. J. M. Marques upon large heavy paper. The superscription read:—

AN ADDRESS PRESENTED TO SIR CLAUDE MACDONALD, G.C.M.G.; K.C.B.; &c., &c., &c., HIS BRITANNIC MAJESTY'S ENVOY EXTRAORDINARY, MINISTER Plenipotentiary and CONSUL-GENERAL IN JAPAN, BY THE BRITISH RESIDENTS OF YOKOHAMA.

To,
SIR CLAUDE MACDONALD, G.C.M.G.; K.C.B.; His Britannic Majesty's Envoy Extraordinary, Minister Plenipotentiary, and Consul General in Japan.

SIR,—We have asked you to break your journey to the capital because we wish to take ad-

vantage of the first occasion on which you have landed at Yokohama to tell you with what gratification we learned that you were to come to Japan as the Envoy of our Sovereign; and because, in bidding you welcome on your return from home to resume the functions of that great office, we desire to give expression to the admiration with which your gallant and noble defence of the Legations at Peking inspired us, in common with the whole civilized world. Among the many thrilling episodes incidental to the terrible crisis you then passed through, the story of none will go down to posterity shining with brighter lustre than the heroic adjutancy of Lady MacDonald, whose unceasing and devoted attention to the comfort and welfare of the sick and wounded elicited the warm personal thanks of His Majesty's Government, an honour which is probably as unique as that by which His most Gracious Majesty has since been pleased to mark his recognition of your own success in saving the besieged occupants of the Legations from wholesale massacre. And although we trust that the need for such exceptional services and self-sacrifice may never arise again, your eventful and distinguished career in the military and diplomatic services of your country is at once a justification of the great confidence placed in you by His Majesty's Government, and a pledge that the interests of your countrymen, in what way soever they may be threatened or endangered will never fail to be safe-guarded so long as they are entrusted to your care.

Varied as these interests are, they have but one common object, namely, the establishment, preservation, and development of commerce on bases mutually advantageous to producer and consumer, and calculated to confer the greatest prosperity on the greatest number; and though by reason of the self-seeking of nations and individuals the attainment of such an ideal may seem Utopian, the nearer it is approached, the nearer will the world be to that universal peace and plenty which all alike desire. When diplomacy shall have accomplished that end, it will have achieved the purpose of its evolution; and it is because of your reputation as an experienced and sagacious exponent of the broad, beneficent, and enlightened commercial policy, seeking the good of all, irrespective of nationality, which Great Britain was the first to initiate and adopt, and has never since ceased to inculcate and to pursue, that we hail your return to Japan with pleasure, and pray that you may be endowed with health and strength for the accomplishment of your high mission.

Dated at Yokohama, in the empire of Japan, the 21st day of October, 1901, and signed on behalf of the British residents of that city by

J. W. CROWE,	H. W. KESWICK,
JAS. DODDS,	J. F. LOWDER,
A. J. EASTON,	W. F. MITCHELL,
J. D. HUTCHISON,	J. P. MOLLISON,
D. JACKSON,	R. D. ROBISON,
F. S. JAMES,	JAS. WALTER,
E. M. JANION,	A. G. MOREY WEALE.

The various passages in the address, especially that referring to Lady MacDonald and to the honour conferred on Sir Claude by the King, were warmly applauded.

At this point Miss James stepped to the front and, offering to Lady MacDonald a beautiful bouquet of flowers, said: "Allow me to welcome you back to Japan and in the name of the British ladies of Yokohama to beg your acceptance of this bouquet."

The gift was smilingly acknowledged.

Sir Claude MacDonald said—Mr. Chairman, ladies and gentlemen, I beg to thank you most heartily on behalf of my wife and myself for the very kindly welcome you have given us on our return to Yokohama. In this address you have alluded to the part it was my good fortune to be able to enact during the siege of the Legations in Peking. You have mentioned it in a manner far too flattering but altogether charming. I am glad to have another opportunity of testifying on behalf of all those of all nationalities who so magnificently supported me on that occasion—(applause). I was of course brought more in contact with my own people, and it warms my heart to think of the splendid man-

ner in which the old race came out of that ordeal. I allude more especially to those whose profession was not that of arms; I allude to the young Britishers who fought with such bravery and such tenacity—(applause)—and I am alluding also to the women and even the children who by their bright unselfish behaviour and devotion helped to cheer us when things looked blackest. I wish also to take this opportunity of bearing testimony in a public manner to the magnificent conduct of the Japanese defenders of the Legation—(applause). The pluck, endurance and dash of their men was the admiration of all, and was only equalled by the tender devotion of their women to the sick and wounded—(applause). You have referred in the address to the commercial policy of Great Britain. I can only say that it shall be my utmost endeavour to maintain that policy on the lines you have laid down, with all my heart and soul—(applause). Mr. Chairman, ladies and gentlemen, you have alluded also in this address, in very feeling terms to the part that my wife took in the defence of the Legations. On her behalf I beg to thank you and I may add that if it should ever be the lot of any of you to stand in such great peril I only hope you will have by your side as brave and true a heart—(loud applause). I thank you again for the kindness of your reception which I feel very, very deeply—(applause).

Cheers were then given for Sir Claude and Lady MacDonald.

An informal reception followed and the health of the Minister and his wife was toasted in a glass of wine.

Sir Claude, on the plea that he had already delivered one speech said he would put forward his wife in his place, but that lady laughingly declined and so the matter ended, the Legation party leaving for Tokyo by an early train.

MARINE COLLISION ENQUIRY.

Judgment has been delivered by the Tokyo Local Marine Court of Enquiry in reference to the circumstances of a collision between the British steamer *Indravelli* and a lighter named the *2nd Masumi Maru*, then in tow of the steamer *Hanci Maru*. The persons whose conduct was under investigation were Wasuke Tokuda, master of the *Hanci Maru*, and Walter Edward Pyne, pilot of the *Indravelli* on the occasion mentioned.

The Court finds that Wasuke Tokuda having taken a number of boats in tow on the morning of July 7th, 1901, proceeded through the Yokohama harbour entrance and at once changed his tow by placing the nine lighters (which had hitherto been attached to his steamer in two lines, with one lighter made fast alongside) in one line astern; that he did so in complete indifference to the direction and strength of the wind (north), so that the lighters drifted to leeward and closed the outer approach to the harbour. Thinking that it was the duty of the *Indravelli* to avoid him, he recklessly changed his course by turning his steamer to the right and so allowed the *2nd Masumi Maru* to drift towards and eventually to collide with the bow of the *Indravelli*. This blunder arose from negligence in the discharge of his duties and brings his conduct within the purview of Clause 2, Art. 1, of the Disciplinary Law for Mariners, the same being punishable by the application of Clause 2, Art. 1, of the same law. On the other hand the proceedings of Walter Edward Pyne were free from any point that could be regarded as improper and do not come under the provisions of Art. 19 of the Pilotage Regulations.

The certificate of Second Mate, Class B, held by Wasuke Tokuda, is therefore suspended for one month.

THE ROYAL VISIT TO CANADA.

IN BRITISH COLUMBIA.

In the minds of most British subjects considerable interest doubtless attaches to the tour through British North America, which the Duke and Duchess of Cornwall have just completed. The Royal party, with the previous doings of which in Eastern Canada we need not trouble our

readers, started from Ottawa on Sept. 24th, their Highnesses leaving behind them the happiest possible impressions. Their stay in the capital, it was said, had been a blend of quiet dignity and modesty. The Duke was described as a public speaker of ability and his accent was declared to closely resemble that of the native-born Canadian. They were accompanied by Lady Minto, the Governor-General remaining in Ottawa to meet them on their return. On the following day the train in which they were travelling skirted the north shores of the Great Lakes; at noon on Sept. 26th they were at Winnipeg, where a rousing welcome was given to them, and at 10 p.m. the journey westward was resumed. The following day was spent in crossing the great plains of Western Canada and they reached Regina, the capital of the Northwest Territories, at midday. A stay of three hours was made here, but by 9.30 the next morning the Royal train was at Calgary, among the foothills of the Rockies. The Duke and Duchess here met a large party of Indians and, having donned their furs, started on the ascent to Banff, which was reached at 8 p.m. and where a stop for the night was made. The highest point of the Rockies was crossed the following day and at 11.45 a.m. on Sept. 30th the royal train, preceded by that carrying Lady Minto, Sir Wilfred Laurier, (the Premier) and others, arrived at Vancouver. Their Royal Highnesses at once drove to the Court House where an address was presented to the Duke by the Mayor of the city and a portfolio of views of British Columbia was graciously accepted by the Duchess as well as a beautiful bouquet of roses. An address from the Chinese residents was also handed to the Duke. The Royal visitors then drove to and opened the new Drill Hall; went to and inspected a timber mill; drove about the city; received an address and a valuable historic head-dress from the aborigines of the Province, and then went on board the C. P. R. steamer *Empress of India*. Escorted by the cruisers *Warspite*, *Amphion*, *Phaeton* and *Condor* and two torpedo boat destroyers the Royal party arrived at Victoria on the morning of Oct. 1st; received the usual address and were present at demonstrations in their honour, returning to Vancouver on Oct. 3rd and leaving immediately for the East, a couple of days being spent at Banff on the return journey.

IS SOCIETY DETERIORATING?

The question is put by Susan, Countess of Malmesbury, in the *Lady's Realm*. The gist of her article would seem to point to the opinion that it is not. In some respects at all events the Countess maintains that the position of women has greatly improved:—

They found, early in the century, habitual drunkenness; they will leave sobriety. They found the coarsest of language and a flow of oaths on the slightest provocation; and they leave, outside a certain very limited set which seems to rejoice in the unclean and the ambiguous, careful if slangy speech in which such a thing as a big, big D is as rare as plums in a workhouse pudding.

The modern hygienic comforts and facilities of houses must also have their effect.

In the Countess's opinion, the great curse of the day is that "we are all gorged with amusements," so that those who give themselves up to this pursuit are "shortly assailed by a desolating cloud of boredom which is only another word for surfeit":—

Our dinners are too long, too hot, too gorgeous, too large, and, therefore, usually too deadily dull to be enjoyable; but even if they were perfect in every detail they could not continue to amuse a person who dines out every night of his life. Still, with all their faults, they must be less intolerable than those interminable feasts of roast beef, cygnet, or pea-chick at which our grandfathers sat, flanked by bottles of port and brown sherry, from three in the afternoon till they were carried to bed or perhaps tottered unsteadily into the presence of the ladies.

They drank, no doubt, to still the gnawing worm of boredom, which even then must have had some power; but now, says the Countess, we bear our disillusion and satiety in soberness, if with depression and languor.

LITERARY NOTES.

"The Highlander of Miss Fiona Macleod and William Black is," says A. G. Freer in the *Pilot*, "a man I never met, and talks a language I never heard farther north than the London stage."

It is understood that Mr. Fisher Unwin, who has recently purchased the *English Illustrated Magazine* from the proprietors of the *Illustrated London News*, proposes to transform it into a monthly literary magazine. Every publisher must have his own magazine nowadays, and perhaps after a somewhat chequered career the *English Illustrated* may develop into a magazine worthy of its name under the most generous-minded of latter-day publishers.

Christmas books are beginning to appear among the publishers' advertisements in home papers. One of the most attractive is *Fables and Folk Tales from an Eastern Forest*, collected and translated by Mr. Walter Skeat. These were taken down from the lips of the Malay peasantry, in the twilight of their own tropical jungle, during the progress of the Cambridge Expedition of 1899 through the remoter States of the Malay Peninsula. The illustrations by Mr. F. H. Townsend are said to be delightful.

Prof. Karl Pearson, of University College, London, has prepared a revised edition of his *Ethic of Freethought*, which discusses the problems of the day—Religion, Labour and Sex. The aim of the book is to contrast the emotional and relationistic treatments of philosophical and social problems; to show how the enthusiasm of the study is a real factor of human development, and how the slow and gradual educational work of the thinker is after all more permanent than the emotional influence of the market-place. It will be published by Adam and Charles Black.

"Have you any special method of writing?" asked Mr. Blathwayt of John Oliver Hobbes. The answer appears in an interview in *Great Thoughts*:—"Before I begin to write, I spend six months in silence and thought, and so perhaps my characters have a strain of thoughtfulness in their composition. Once I begin to write, however, I fly at it, for it's all at my fingers' ends. Very often I have been thinking out a book for seven years, off and on, and people don't understand this. And as regards the sentiments I put into the mouths of my characters, and the outlook on life which is a part of their mental equipment, well, it is never a case of my individual point of view. They have to live their own lives quite apart from mine."

Mr. Fortescue, Keeper of Printed Books at the British Museum, has been telling the Library Association that "there is always a tendency among such as are close to the abyss of insanity to cleave to the public library." This has reminded a contemporary of the evidence given by Carlyle before a Commission on the British Museum, which sat fifty years ago. Said that writer of books, "There are several persons who come to read in the British Museum in a state of imbecility. They are sent there by their friends to pass away their time. I remember there was one gentleman who used to blow his nose very loudly every half hour. I inquired who he was, and I was informed that he was a mad person sent by his friends. He made extracts out of books and puddled away his time there."

There is always plenty of variety now-a-days in the *Cornhill* bill of fare, and the quality is always good. One of the most readable of the contents for September is a paper by the Hon. Mrs. Anstruther on "That Tyrant Income," which contains some advice, as for example:—

The truth is this: the secret of financial happiness lies in your own personal attitude towards your income. If you treat it as a friend on whose generosity you may rely to help you in time of need, then will you be doomed to disappointment, for few incomes have great souls—they are mean and shrinking things, incapable of heroic expansion! But if, from the first instant that you and it foregather, you treat it as your natural enemy, then may your life be a happy one. Conquer it or it will assuredly conquer you and become your tyrant. Yet only in one way

can it be humbled and brought low, and happy is the man who discovers the way to do this early in his career. Keep it hidden, for publicity is to it the breath of life. . . . Never let your nearest or your dearest suspect its real height, or breadth, or length, or power. . . . Should searching questions be put to you ament its size, do not hesitate to lie right royally in your responses. Swear it is but a small weak thing, worthy of no consideration. . . .

The problem of competing races in Hawaii is considered by Bishop Potter in the September *Century*:—"Who they are who will ultimately be dominant in his place it is not easy to forecast. At any moment the United States may close its Hawaiian doors to those races which, of the Eastern world, are nearest to the islands, and which are now represented there by a large proportion of the population—some 24,000 Japanese and 15,000 Chinese, who to-day, in fact, taken together, make an element larger than that represented by the Hawaiians themselves or any other peoples. Both these races have brought to the Hawaiian Islands forces and qualities which, originally, were foreign to the native people."

So the problem is set: the mixture of races, energies, industries, and of the higher moral qualities which these various strains, ancestries, and activities stand for. There are other theatres in which the same drama is being played out under much broader and, it may be, more complex conditions, but not in which a more interesting or indeed dramatic experiment is being made.

LAW CASES.

Judge Yasuda, sitting in the Yokohama Chiho Saibansho on Monday, heard various objections regarding rights of claim made by Mr. Hiyaki, the administrator in the bankrupt estate of Ogaki Naotaro, living at Ichome, Minami Nakadori, as follows:—With regard to Messrs. Simon, Evers & Co., the administrator recognized a claim for the payment of yen 2,500; against the claims of Messrs. Carl Rhode & Co. for payment of yen 139.70, he objected but afterwards cancelled his objection; against the China and Japan Trading Company, the payment of yen 3,900 out of yen 4,800 was assented to, but the remainder, amounting to yen 980, was disputed; and with regard to Messrs. Sale & Co., the administrator said that he would decide after investigation whether the claim for yen 512.85 should be acquiesced in or refused. The next hearing was fixed for the 28th inst. at 1 p.m.

We learn from the *Kobe Herald* that judgment in the case of E. W. Maitland v. Tokuda Tasaburo, in which payment was claimed of yen 2,718.97 in respect of damage to cotton yarn in Kobe harbour, was given on Tuesday. Judgment was entered for plaintiff with costs.

On Wednesday in the Yokohama Chiho Saibansho, before Judge Yasuda, the hearing was resumed of the suit brought by Mr. John H. Jewett, of Messrs. Bavier and Co., against Mr. Ozeki Katsunosuke, No. 68, Shichome, Benten-dori.

Counsel for plaintiff stated that the loan which defendant contracted with plaintiff should have been redeemed in August last year but defendant in November asked for an extension of grace. Meanwhile plaintiff notified defendant that the shares of the Sanshi Bank, which had been given as security, must be sold. This bank suspended payment just at this time and the shares were not sold owing to the objection of defendant.

Counsel for defendant contended that according to the statement of the witnesses, Mr. Nakazawa and Mr. Yendo, it was clear that defendant proposed to sell the shares himself for the sake of plaintiff, but plaintiff refused, saying that the shares had already been sold, and when their price fell, on account of the bankruptcy of the Sanshi Bank, plaintiff sued him and claimed the redemption of the loan. The hearing was adjourned till the 30th inst. in 10 a.m.

LETTER FROM AMERICA.

Buffalo has been for ten days past the centre of American history—in a sense which the projectors of the Pan-American Exposition hardly imagined. One who thinks of the significance of names cannot but put in a line Bosphorus, Coevorden, Oxford and Buffalo. He sees in these names not only an image of the creature which is the classic symbol of agriculture, of food, and of fertility, but also the glories of water and passage across it, communication between men and otherwise separated countries and continents. The student of history, as he names these names, thinks of new epochs and new occasions requiring new men. The classic myth of Europa at the Bosphorus links together Asia and Europe. Coevorden maske one picture, again the Germanic fathers issuing out of the forest across the Netherlands and into the British Isles. With Oxford one's thoughts are linked with the movement of the human intellect out of the darkness of the Middle Ages into the modern era of knowledge.

So also Buffalo, originally named, it is said, in remembrance of its illustrious namesakes, is situated by the great lakes and is the centre of mighty traffic and communication. The inland traffic of the United States on the Great Lakes exceeds by far the total of American commerce by sea. In its early days a gateway to the mighty West, it has in these last days been the centre of Pan-American interest. Now it seems to be the city above all others, whose name suggests the beginning of a new era in United States history.

With the death of President McKinley, there passes away a line of statesmen who were eminent and active in the struggle against slavery and in the great civil war. Mr. Theodore Roosevelt is the first Republican president of the United States who had no important place and took no active part in the war to save the Union. From Abraham Lincoln, the commander-in-chief of the army and navy, to William McKinley, who as a private soldier and officer served under the great statesman and commander, all the Republican presidents and vice-presidents had a full share in the work of war or reconstruction, or of the problems growing out of the war. This may be said of Abraham Lincoln, Andrew Johnson, Ulysses S. Grant, Rutherford B. Hayes, James A. Garfield, Chester A. Arthur, Benjamin Harrison and William McKinley. With Theodore Roosevelt begins a new line of American presidents whose task it will be to administer the affairs of one of the greatest of the nations, at a time when its problems are new and unsettled, withal more complex and tremendous than ever before.

The Pan-American Exposition, which has yet nearly two months and a half to run, will, I imagine, go down into history as having made some wonderful successes and several surprising failures. Weather, strikes, other mind-absorbing incidents, apathy, lack of any dramatic event associated with it and, finally, an anarchist's dastardly deed have all been against it. It cannot be said that the first word in its name does in any large proportion represent an accomplished fact, for while Canada and Mexico have been generously represented and taken an enthusiastic part, yet other nations in South America have paid but little attention to the exhibition, which was meant especially to emphasize the unity of interest of the nations of the two Americas.

Canada has a very fine building with exhibits and Jamaica is represented by the agricultural society, but of the Latin-American countries only Mexico, Chili, the Dominican Republic, Ecuador, Honduras, have special edifices, though the Argentine Republic, Bolivia, Costa Rica, Guatemala, Hayti, Nicaragua, Peru, Salvador, and Uruguay have exhibits, either under state patronage or through individual exhibitors. In two countries political disturbances compelled abandonment or curtailment of plans, in another the representation is only by a commissioner. Cuba has both a fine building and an excellent exhibit of products showing the resources of this new insular nation.

However, the American part of the great Exposition which commemorates no event, but whose

sole object is to promote commercial and social interests among the states and countries, is emphasized, for here are the Indians both old and new in large numbers. Certainly in no eastern city within the memory of living men, were so many of "the North Americans of yesterday." Without reference to "Buffalo Bill" and his gathering of aboriginal natives for a temporary show in the city, there is within the grounds a most interesting "Congress," of over forty tribes, of men, women, children and babies with their prairie ponies, their tepees, and their lodges, council houses, etc. Besides the sham battle, with its noise and dust, one can see the industries of an Indian village, as well as its putting up and taking down, while among these splendid horsemen in their savage toggery, one can see the genuine sons and grandsons of chiefs famous in history. In some notable cases these have on their persons valuable heirlooms, in the form of silver medals, given by former presidents as far back as Washington.

Besides these there is in another part of the grounds, a village of the Indians of the Six Nations, which takes one back to the historical situation of two or three hundred years ago. They have their council house, stockades, and apartment houses built of bark and timber. Here are the descendants of the most intellectual Indians of America, whose forest republic, the more it is studied, increases the wonder of students. No one would ever guess, from the arrow heads, beads, and stone equipments, which we dig up in Ithaca almost every time the foundations of a house are prepared, what a superb confederation of tribes, what elaborate rules of war and peace, what eloquence and diplomacy, what triumphs of natural fortification, what poetry and legends were part of the intellectual and material assets of the men who dwelt in "the Long House," and who were once the political factors making the balance of power between French and English, in the long struggle for the possession of the North American continent. It is the profoundest student of the Iroquois and their inner life, and not the shallow sneerers and cheap romancers, who appreciate most highly this race, whose greatness has, certainly in its old form, vanished. Nevertheless the progress of the Indian, interrupted and destroyed by the white man two centuries ago, is now proceeding on higher levels and by nobler paths. Not only are tens of thousands of Indians now Christians, property owners, and educated men, but we have the promise even of their poetry, legends and history being committed to writing, in English, by their educated sons and daughters.

I spent several days at the Exposition, which is comparatively easy to study and enjoy, because not so large or so elaborate as one of the world's expositions, as at Paris or Chicago. Japan is splendidly represented. I use this adverb advisedly, referring not to a great wealth and variety of exhibits, for all that there is from Japan is under private auspices, but to the fine impression made. Here are the *jin-rikisha* men; here is a restaurant, where Japanese food is well cooked and daintily served; here are the bazaars where knickknacks and a variety of pretty things are sold at the most reasonable rates. Within the enclosure of "Fair Japan" are the general features of a garden, the rockery, running water and stone lanterns. The very creditable dwelling house contains domestic equipment and works of art, and in this we find gentlemanly and, as I discovered in conversation, scholarly attendants. For the theatre, or exhibition of acrobatic and other performances, there is no extra charge after admission into the enclosure, except a small one to see the dwelling. Everything is so clean and so pleasant to the eye that it is nothing wonderful that "Fair Japan" has won high measure of popularity. To be sure, not even the Indian Congress or Fair Japan or a trip to any of the more or less attractive, honest or dishonest, proper or improper shows on "the Midway," can compare for a moment with the popularity of the "Baby Incubator." That in which science and philanthropy join, with its sweetly sleeping infants, with never a cry or a squirm, simply and daintily garbed—the girls ribboned with pink and the boys with blue—touched all hearts as nothing else could.

I saw President McKinley, sitting beside his wife, ride into the grounds and from the Esplanade had a good look at the lady, whom I remember meeting, with such pleasure, when she was a fair young girl, in London in July, 1869, and whom I had not seen since, and at the President who seemed to be in the very fulness of physical health and spirits. His speech next day showed growth in manhood and statesmanship. When one knows his ancestry, inheritance and private life, to say nothing of his public experiences, it is not difficult to understand why his faith in the American people and in their future has always been persistently optimistic. The next day he enjoyed that trolley ride through the gorges of the Niagara, by which one can, in four or five hours, go from Buffalo up to the city at the Falls, see with the fullest satisfaction the American and Canadian cataracts, ride up to Queenstown, look upon the battlefields and monuments and then again crossing the river at Lewiston, ride close alongside the foaming rapids and whirlpool—features of nature almost as wonderful as the great downpour itself and then back to Buffalo.

It was after this ride that the President gave a reception in the Music Hall, where most of the prominent organists and singers have been and will be heard during the Exposition, that the tragedy of anarchy took place.

President McKinley's tender words, intended to shield his wife from shock and the murderer from violence, his patient sufferings and final words were in perfect harmony with his whole life. When all the horrible things said, and caricatures, and suspicions of foreigners unable to understand American life and purpose, and the groanings and nightmare terrors of pessimism fill the air and the newspapers, it is always reassuring for an American who knows what are the conservative forces and what are the real life and wealth of his country to "meditate on these things." Both the chief servant of the people just murdered and the new President are known as men of profound religious conviction, of pure private life, and of sincere purpose to follow out the best traditions of the fathers and to live up to their inheritance.

It is amusing to one who knows Theodore Roosevelt personally, or who knew his parents before him, to see what curious ideas are held concerning his personality, by foreigners, or by those who know of him only since he was "colonel." Those who have the deeper knowledge know that he made his mark first of all as a student and a writer, having especially written of "The Naval War of 1812," in which he treated the subject with a breadth, accuracy, and fairness that has won recognition in England almost as fully as in the United States. Other books of his are on "The Winning of the West," others treat on hunting and game, or are literary essays or biographies. Originally a puny and backward child, he devoted himself to physical culture and to athletic exercise and became strong. When a student in Europe, he won membership in the Alpine Club of London, by having successfully climbed the Jungfrau and the Matterhorn. When he entered politics he surprised the old and experienced by his diligence, absolute honesty, fearlessness and ability and power to reform evils. Whether as a commissioner of the civil service, or of the police force of New York City, he stirred things up, always for the better. Closely studying and mastering his work, he was successful in whatever he undertook. Even when he became Secretary of the Navy, he put new life in the department and thus became a potent element in the success won in 1898 in the Spanish War. It is no wonder that in 1898 he was able to inspire such enthusiasm among our western frontiersmen, cowboys, dead shots, and perfect horsemen, who did not know what fear or fatigue meant. Nor was his career as a soldier and governor surprising to those who had known him earlier; for although he likes good books, good men and plenty of fun, he does not like what is false, vile or low in any form, or under any pretext. He believes in his country because he knows what kind of people made it, and what kind of people are—despite anarchists, sectionalists, sectarians and selfish schemers—likely to

maintain the rule of it in the long run. So it is without fear that we look to the new President to carry out the general policy of peace and reciprocity of our third martyred president.

Ithaca, N.Y., Sept. 17th, 1901.

W.E.G.

RUDOLF VIRCHOW.

The following translation of Dr. Baelz's lecture on Rudolf Virchow was made in the office of the *Japan Times* and kindly placed at our disposal:—

I accept with pleasure the kind invitation of our esteemed host, the German Minister, to give you a short sketch of the life and work of Rudolf Virchow who completes to-day his 60th birthday and in whose honour we are here assembled together.

It is of course unnecessary for me to tell you who Rudolf Virchow is. You all know his name as that of a great *scientist*, of a pioneer of science.

When I return, however, to the work he has done, there opens out before me a prospect so great, so many-sided, containing so wide a field of activity, that in truth a more eloquent tongue than mine were needed to do justice to the man and to his work.

Virchow's has indeed been an interesting life. In connection with this life the oft-cited words of scripture might be used again:—"The days of our years are three score years and ten; and if by reason of strength they be fourscore years, yet is their strength labour and sorrow." But it would not be appropriate to quote these words in the sad and mournful sense in which we are accustomed to hear them, that is to say at the grave-side out of the mouth of a priest; no, we must here employ them in the more cheerful sense in which we state an agreeable fact. Virchow's life was indeed a life of labour and toil but joyous labour and joyous toil, fruitful labour and fruitful toil. And on that account his labour and toil did not exhaust his strength and his energy as in the case of men who sink early into a soon-forgotten grave. On the contrary they rejuvenated him, strengthened him, tempered him as steel is tempered. As in the case of that bright triplet of German Stars, the Emperor William I., Bismarck, and Moltke, so also in that of Virchow has work and toil together with the happy feeling of duty done acted as an elixir of youth which has preserved to him in his entry into the eighties a freshness such as is accorded to few mortals at that advanced stage of life.

This youthful strength, continued activity, and cheerful fidelity to duty may well be extolled here in Japan where one is so often asked how it comes to pass that people in our countries remain so vigorous till advanced old age.

That Virchow has retained intact his intellectual vigour, we know from the reports of the many learned Conferences at which he plays such a prominent part; but one only gets a true idea of that vigour when he is brought into close personal contact with the Professor as was recently the case with me. In that case the individual who is thus favoured is left to wonder ever after at the fabulously rich stores of well-ordered wisdom which are heaped up in that head. He is almost afraid, too, when he hears this man say quite calmly while speaking of the now appearing foundations of science, "Yes, it is thirty or forty years ago since I demonstrated this and this." Or "It is fifty years ago since I made this discovery or gave this explanation."

Wonderful also is the intense interest which he has continued to take in all the great questions of the present day, be they scientific, political, social or religious. He is rightly of opinion that a *scientist* must also be a man of universal culture and must interest himself in matters lying outside the beaten track of his professional duties if he does not wish to go through life as if he were wearing blinkers. And I might here recommend this conduct on the part of a great man to the consideration of Japanese *scientists*.

The lusty vigour of which I have spoken in connection with Dr. Virchow is not only mental but physical. He spent hours for instance walking with me through the four storeys of the large and very beautiful Collection House in his Institute and explained to me with youthful liveliness the interesting preparations.

The first work which brought Virchow's name into prominence, concerned itself, in contradistinction to his later work, with practical matters. We find him, therefore, a young man of 27, battling in the year 1848 with the frightful Hunger-Typhus epidemic, and his account of this epidemic in combating which he fearlessly and without any care for his own interests pointed out the mistakes that were being made, bears testimony as much to his warm sympathy for his suffering fellow-men and his youthful and fiery reforming zeal as to the unusual value of his scientific observations and to his extraordinary talent.

Shortly after we find him the editor of a medical journal with the characteristic title *Die Medicinische Reform*.

By nature an ardent politician, he threw himself with enthusiasm, like so many German patriots, into the movement of 1848 and 1849 which cost him, but only indeed for a short time, his place in the University of Berlin; and although he played an important part for many years on the political stage, he won no such success there as in the arena of science.

In 1849 he was Professor of Pathological Anatomy in Würzburg; in 1866 in Berlin, where his Institute has been from that time to the present day a place of pilgrimage for youthful scientists. Above all his progressive influence was felt; he stimulated; and his work was fruitful.

He is most famous for his *Cellular pathologie*, because the ideas contained therein have acted far outside his professional path. *Cellular pathologie* sounds very learned but the fundamental idea can be given just as well in simple German. The bodies of men are composed of millions and billions of cells, different in appearance and in functions, the name cells coming from the word cells in the sponge; and any abnormal conditions of these cells mean what we call sickness. Virchow opposed himself especially to the hitherto widely propagated opinion that through the deposit (*niederschläge*) of the humours organic bodies could be formed something like ice-crystals in water, therefore against the teaching of spontaneous generation or *Generatio spontanea* to which he then also helped to give the coup de grace. His definition was *omnis cellula e cellula*, that is each cell owes its existence to a similar and previously existing cell; he applied also to the animal Kingdom the axiom that like springs from like. This definition, at first fiercely contested, found in all later investigations confirmation and extension in both kingdoms of organic nature.

As in the period succeeding 1870 political jealousy was often carried into the realms of science, it was sought on the other side of the Rhine to discover slight faults in the great work in order thereby that the whole theory might be shaken. But when a mighty building is erected on quite new principles, it is quite possible that here and there a joining is not close enough or that here and there a rafter gives way. To-day, however, Virchow's great building—so to say—stands firmer than ever and the definition *omnis cellula e cellula* has been found to hold good also for the infinitely small bacteria since discovered, the bacteria so dangerous to man and situated on the border line between the animal and vegetable kingdom, the bacteria which are infinitely smaller than the cells Virchow first had in his eye. It is indeed difficult to form any idea of the smallness of these beings which are yet so mighty and which make up in number and in virulence what they lack in size. If we consider the microbe that causes the so-called Blood Poisoning, when it is magnified one thousand times, it seems an almost invisible point, so small in fact that we must first colour it before it can be distinguished among its surroundings. Yet this small thing is a body which has three dimensions and is in truth 1,000 × 1,000 × 1,000 enlarged, therefore 1,000 million times, although only two of these dimensions appear quite clearly to us. And this small object which in spite of its enormous enlargement can barely be seen, this little being lives, grows, propagates its species, and dies like any other cell and like the higher animals. And if it gets into the blood of the Lord of Creation, he also dies! What a prospect, what possibilities does not the microscope here open out before us, the microscope in the extension of whose employment among medical men Virchow contributed perhaps more than any one else.

But this discovery ought not to make us conceited, nay, it should rather humble us, for it enables us to guess how very little we yet really know and how little our science, to-day so sure of its triumphs, will seem perhaps to our posterity.

There are many people who feel inclined to say:—"Ah! had we only eyes as sharp as the microscope." Short-sighted men, the fulfilment of whose wish would be even as disastrous to them as was the fulfilment of his to the mythical King who wished all that he touched to turn to gold. We would be frightened to death in case these people had their desire! We would not dare to breathe in the chaos of mysterious life which we would discover in the pleasant breezes we had hitherto considered so pure.

The number of Virchow's other publications in the field of medicine is legion. Of special influence were his studies on inflammation and swelling. He also became the founder and editor of two prominent medical journals, the *Archiv* and the *Vierteljahrsschrift für klinische Medizin*. The *Archiv* he edited 54 years and consists so far of 150 volumes. This astonishing amount of work was only possible to a man who turned night into day and required only the minimum of sleep and recreation. Virchow is not only, however, one of those who are endowed with an intuitive insight into the workings of nature, he is also one of those who are able to fix and, so to say, to materialize what others feel only vaguely.

In spite of his eminence he also tried to maintain

cordial relations with outside medical men, and in contrast to those who tried to carry on the cure of the sick only in the laboratory, he always spoke with pride of "the practitioners, we clinical men." He was the first to organize in 1866 and 1870 a sanitary campaign, and he gave the idea for the Lazaretto on the *Tempelhofer Felde* and even superintended with success the carrying of that idea into practice.

Outside medicine he had a leading place—the leading place rather—in anthropological science in Germany. Thirty-two years ago he founded the German Anthropological Association of which he remains to this day the president. Through his calling as an anatomist and through natural inclination, a disposition with which too few are gifted, he was capable of studying thoroughly the normal as well as the sick man. He also studied everything in connection with the remains of pre-historic man and became quite an authority on pre-historic weapons. Together with Schliemann he had examined the site of Troy and by his travels in the Caucasus threw a new light on the early history of this frontier people, living between Europe and Asia.

I do not propose to speak of his action as a politician; there is nothing in his communistic action in Berlin which does not however merit the fullest recognition and which has not got that recognition. If to-day Berlin stands first of all great cities in regard to water-supply, street hygiene, sewerage and all such questions as arise in cities, Virchow is to no small extent to be thanked for it. I have it on the authority of the late Mr. Burton, Professor of Sanitary Engineering in the University here, that whoever wants to study such questions to day and their solution in the fullest extent and in the best manner, must go to Berlin. It were to be wished that the capital of Japan would study and imitate this example.

Virchow's great service met everywhere with acknowledgment and admiration. In London, St. Petersburg and Rome he was feted like a prince, for a prince he was in the field of mental life, a prince who had enlarged for all men his universal Kingdom extensively and intensively.

Virchow has now, therefore, reached his 81st year and those among you who do not know him personally may wish to hear how the man, whose jubilee we celebrate to-day, appears.

He has neither the massive form of Bismarck nor the striking eagle face of Helmholtz. He is small, somewhat bent by the weight of years, with white hair and beard. He wears glasses on his curved nose and, like the typical old German professor that he is, pays little attention to his outward appearance. A characteristic thing about him is the fine, almost ironical, smile which almost always plays around his lips. He needs only to throw at you one of his sharp looks of inquiry in order to let you see what manner of man he is; and one has not spoken to him long until he is struck and fascinated by the originality of his thoughts and keenness of his observation. He can be very kindly—when he likes. He can also be very reserved; and for this no one can think the worse of him considering how his time is taken up. He cannot accept of course all the invitations he receives if he is to make his way through the labyrinth of work that opens out before him every day.

This, then, is the man whose 80th birthday we celebrate to-day. May it be given to him to see many times the return of this day by the side of his loving wife and in the midst of his pupils and admirers.

FIRES.

An explosion of fire-damp occurred in the Otsuji mine, Magatsu-mura, Yenga-gori, Fukuoka, Prefecture, on the 22nd inst. One workman was injured.

Fire broke out in a powder magazine belonging to the War Office at Akabane on the afternoon of the 18th inst. but the flames were extinguished promptly.

Fire occurred in a confectioner's shop at Rokubancho, Higashi Horidori, Niigata Prefecture, on the afternoon of the 21st inst. Thirty houses were burnt.

An extensive fire occurred at Higashi Sengokumachi, Kagoshima, at 3 a.m. on the 23rd inst., while a strong north-easterly wind was blowing. The flames were extinguished at 5 o'clock, when 363 houses had been destroyed, including one theatre, one bazaar, one lecture hall, and one church.

Fire broke out about 3 a.m. on Wednesday in buildings at No. 148, Chinatown, Yokohama, occupied by Chinese. The alarm was given from the Kagacho Police Station, the brigade of which, as

well as that of the Satsumacho Fire Department under Supt. Morgin, promptly turned out. There was a good supply of water and though some of the adjoining houses were touched, the firemen were able to confine the flames to two 2-storied brick faced tile-roofed buildings, which, however, were destroyed. The brigades were in full operation for an hour and a half.

NEWS OF THE WEEK.

The Kanda bridge, Tokyo, is to be opened on the 25th inst.

The maples at Myogi, Kondo, and Kinkei are now in fine colour.

The Ota Railway Company, Mito, decided on the 20th inst. to dissolve.

Prince Yamashina arrived at Kyoto on the evening of the 20th inst. and put up at the Kyoto Hotel.

Two Chinese named Okesho and Bakushokei, of Kobe, were granted naturalization papers on the 23rd inst.

A landslip occurred at Tobe-machi, Yokohama, on the 19th inst. It crushed in a well and partly damaged a dwelling house.

Fujita Yetsutaro, lawyer, of Nagoya, was arrested on the 19th inst. charged with fraudulently obtaining an official document.

Snow fell at Shiraidake, Miyagi Prefecture, Kotayama, Aomori, and on the mountains of Nikko on the morning of the 19th inst.

The Japanese standing squadron (*Hatsuse, Iwate, Asahi, Yakumo, Oboro, Yagiri, and Chihaya*) left Kobe for Oita on the 23rd inst.

Forty Chinese military officers arrived at Nagasaki on the morning of the 21st inst. from Shanghai and left for Kobe the same evening.

The manoeuvres of the Imperial Bodyguards concluded at Mayebashi on the 23rd inst. and Lieut.-General Hasegawa left Isezaki for Tokyo the same afternoon.

Shimada Kanegoro, of Saitama, was robbed of yen 697 between Asakusa-bashi and Ningyo-cho, Tokyo, on the afternoon of the 19th inst. He reported the matter to the police at once.

A fisherman named Takahashi Yejiro, of Chiba, was arrested by the Shinagawa police on the night of the 17th inst. on a charge of stealing 25 yen belonging to a boat owner at Shinagawa on the previous night.

At the opening ceremony of the Iron Foundry at Fukuoka, Mr. Hirata Tosuke, Minister of Agriculture and Commerce, the Governor of Fukuoka, and Viscount Yenomoto are expected to deliver speeches.

Information received at Fusan from Mokupo states that Japanese fisherman have found a stranded steamer of about 700 tons near Kokuzan Island. Her name is said to be unknown. A police constable is making enquiries.

A thief entered the office of the silk works at Takinogawa-mura, Kita Toyoshima-gori, Tokyo, between the 11th and 16th inst. and stole 5 *kan* 750 *me* of silk and 3 *kan* 400 *me* of sample silk, valued at yen 2,500.

A tailor named Mihashi Seitaro, living at Osaka-machi, Fujisawa, committed suicide by poisoning himself in a house of ill-fame in the same street on the night of the 21st inst.

A *soshi* named Uchida Mitsushiro, a native of Miye, living at Hanazakicho Kuchome, Yokohama, was arrested by the Tobe police on the night of the 19th inst. on a charge of stealing several articles from houses in Isecho and Hanazakicho.

Nakamura Tsunekichi, living at Miyoshi-cho

Shichome, Yokohama, was arrested by the Koto-buki-cho police on the night of the 16th inst. charged with stealing 96 silk handkerchiefs and an umbrella from a house occupied by Ijiri Tokujiro at Hanazaki-cho, Yokohama, on the 16th inst.

A gambler named Tanaka Jukichi, living at Kanagawa, was arrested by the police on the morning of the 20th inst. in a house of a head-gambler at Kanagawa. He is charged with having murdered two *soshi* after a quarrel in a restaurant at Nagano, on the 25th.

Miyata Koshiro living at Hanazakicho, Yokohama, was arrested on a charge of the theft, early on the morning of the 21st inst. While being conducted to the Court from jail, he jumped into the street and ran calling out that if anybody stopped him he would be killed. He fell down at Shichome, however, and was arrested again.

Hamano Ikutaro, employed in a bird's shop at Motomachi Nichome, Yokohama, and Tajima Sadakichi and Kamei Kichigoro, employed by foreign residents on the Bluff, were arrested and sent to the Procurator's office on the 23rd inst. on a charge of having purchased and sold game not in season.

Katabe Katsugoro (65), living at Nakamura-machi, Yokohama, entered a restaurant at Chojomachi on the night of the 18th inst. After having eaten his fill and drunk a lot of *sake*, he announced that he could not pay the bill and going out into the street attempted to commit poison by drinking poison. He is expected to recover.

Two armed burglars entered the house of Captain Uchida Horiyu at Toshima-mura, Yokosuka, early on the morning of the 19th inst., and stole various articles. The Captain happened to be absent at the time and the house was in charge of a young girl and an old woman. The robbers used up these women in a *futon*.

A physician named Arabori Kaneyoshi, (53), living at Shiokoji, Kyoto, was arrested by the police on 22nd inst. at Kyoto, on a charge of stealing thirteen pots of *omoto* (lycopodium) belonging to Kato Motojiro, at Antomura, Shizuoka Prefecture, on the night of the 10th inst. The accused is a younger brother of the late Prince Kido Kojun.

The *Kobe Herald* hears that several changes are contemplated in the staff of the P. & O. S. N. Co., in the Far East. Mr. Marshall, now acting Agent at Yokohama, going to Shanghai; Mr. Alf. Woolley coming to Kobe—which, it would appear, is to be regarded as the senior post in Japan hereafter; and Mr. Abbott, now in charge of the Company's interests at Kobe, taking over the Yokohama Agency.

Arita Gentaro, manager of the Toyo Tammei Kyoku (a private detective office), at Nishicho, Shitaya, Tokyo, was arrested by the police of Shitaya on a charge of having with two others entered various houses in Tokyo and vicinity armed with a sword and stolen money in considerable amounts besides inflicting wounds on persons on May last. His two companions were arrested the following day.

The Japanese sailing ship *Ise Maru*, belonging to Mr. Nakamura Shinyemon, of Yetchu, laden with salt salmon arrived at Yokohama from Siberia on the 22nd inst. While fishing at the Obara river in Kamchatka about the middle of August she was arrested by a Russian war-vessel and charged with fishing illegally. A fine of 100 roubles per member of the crew was imposed, the amount for ten men being 1,000 roubles, but eventually her certificate and other documents were confiscated and she was discharged.

A wealthy resident of Akimotomura, Kimitogori, Chiba Prefecture, named Nomura Shunzo, was robbed of a bag containing 1,000 *yen* and 500 *yen* in War Bonds, at a hotel known as the Unraikan at Hongcho, Sakurada, Tokyo, on the 3rd inst. He reported the matter at once to the police who found that a man staying for

two or three days in the hotel, Boyenkan Iidamachi, had left a bag. The hotel people opened the bag and found the property as above described. The articles were handed to the owner on the 23rd inst.

Lady Curzon of Kedleston will get to India in time to join the Viceroy on his trip to Burma, which he is going to make by land, passing over through Assam and Manipur, and dropping down the Irrawaddy to Mandalay and Rangoon. One of the Viceroy's most important acts will be the opening of the Mandalay Canal, the only work of its kind undertaken in Burma since our occupation of the country. The canal takes off from Madeya River, and is forty miles in length, with distributaries running to about ninety miles, the whole irrigating some 80,000 acres. The work has taken five years, and has cost thirty-two lakhs.

Gold medals to commemorate the visit of the Duke and Duchess of Cornwall to Canada have been struck, and will be offered to the King, the Duke of Cornwall, Mr. Chamberlain, Lord Stratheona, and Sir Wilfrid Laurier as the gift of the Citizens' Committee of Montreal. On the obverse of the medal is a profile portrait of the Duke and Duchess, with the words, "Visited Canada, 1901." On the reverse are the Royal arms surmounted by a crown and supported by two Canadian soldiers, with the inscription, "Canada in South Africa, 1899," while under the Royal arms are the words, "For Crown and Empire." The gift which will be presented to the Duchess is a jewel in the shape of maple leaves enclosed in a richly-chased box of solid silver. One of the handsome arches to be erected on the occasion of the Royal visit will be at the entrance of the McGill University. It will be an exact reproduction of the Brandenburg Gate at Berlin.

AMERICAN TOPICS.

During the first fifty years of the Republic no President under 55 years of age sat in the executive chair. Since then the average age of all the Presidents has been brought down to 53 years, not including President Roosevelt, who is ten years under that age.

Mr. J. Ogden Armour, heir of the late Philip D. Armour, and his father's successor in the vast packing business in Chicago and other cities, has agreed to pay into the United States treasury the sum of \$19,700 for the smuggling of pearls and diamonds into the United States from Europe.

The Cascade division of the Great Northern Railway is to be equipped with electric motors for the operation of trains instead of locomotives. The officers of the engineering department have been working on the plans for this improvement for nearly two years, and within a short time definite plans for the change will be announced.

Of the five Vice-Presidents—Tyler, Fillmore, Johnson, Arthur and Roosevelt—who have succeeded to the Presidency to fill vacancies created by death, three hailed from New York State, namely, Fillmore, who succeeded Zachary Taylor in 1850; Arthur, who succeeded Garfield in 1881, and Roosevelt, who has just succeeded McKinley.

Waycross, Ga., the Ruskin commonwealth of Socialists, has been abandoned. Only three families remain, the others having departed for different points north and west. The printing outfit as advertised was sold by the sheriff on August 31, while the land went the same way on September 3. The proceeds will pay labour claims and a mortgage. The colony moved from Tennessee to Georgia two years ago.

A series of experiments are to be undertaken in the Chicago hospital school to determine the kind of food most conducive to the physical and mental growth of children. These experiments have been suggested by observations made upon the condition of boys and girls coming to the hospital for treatment and education. It has become the firm conviction of the dean of the school that lack of observation, attention and concentration,

defective memory and self-control and a number of other unfavourable conditions in children are due largely to improper nutrition.

Louisiana and Texas have adopted the Mississippi system of employing convicts. The latter abolished the leased system so commonly in vogue among the Southern States, purchased 12,000 acres of Yazoo delta land and turned its convicts into it, under armed guard, to raise cotton. It has proved to be healthful to the convicts and profitable to the State, and is regarded as an important step in penological reform.

Monsignor Stephan, director of the Catholic Indian missions since 1884, died at Washington, D.C., on September 12th. He was a practical Indian missionary, having laboured among the Indian tribes for many years. He also served as a chaplain in the civil war. In March, 1899, he celebrated his golden jubilee in the priesthood. On that occasion the Pope honoured him by raising him to the dignity of protonotary apostolic.

Miss Alice Roosevelt, the President's eldest daughter, is handsomely remembered in the will of Nathaniel Hawthorne Cusack of Washington. Miss Roosevelt receives \$100,000. She was a great favourite of Mr. Cusack, who had known her father since his boyhood days, and who was very intimate with him during his term in Washington as Assistant Secretary of the Navy. Mr. Cusack established the foundation of his fortune, which is estimated at \$2,000,000, in Spokane, Wash., in mining. For the past eleven years Mr. Cusack has lived in Washington, D.C., being engaged in a contracting business. He died on Aug. 23rd.

Amos W. Butler, secretary of the Indiana state board of charities, has made a study of the feeble-minded in the Indiana institutions. In a group of 241 families in which there are two or more generations of feeble-mindedness, he found 970 persons who are blood relations. Of these families, 221 have two generations of feeble-mindedness, sixteen have three generations, three have four generations, and one has five generations. The number of direct descendants who are feeble-minded is known to be 726. These facts led Mr. Butler to the conclusion that the state should retain control of these grown-up children during life.

Experts in computing the cost of the strike to the steel corporation and to the workers estimate that 50,000 men have been thrown idle for two months and a half. Their loss in wages approximates \$10,000,000. Gross earnings of the constituent companies have been cut off to the extent of nearly \$15,000,000. Much of this will be made up, for many of the orders hold good, and the manufacturers will have opportunity to fulfill orders, with export trade cut off. It is estimated that the Amalgamated Association carried 9,000 of its membership into the strike, out of about 14,000 when the strike started, and the outcome of the contest has lost recognition for 2,500 of these men.

Messrs. Edward Duryea and Joseph Mayer, experts appointed to examine the Brooklyn bridge as a result of the recent collapse, have reported that the structure is now loaded to its extreme capacity and a few more tons will render it unsafe. The reports call for \$1,000,000 needed for repairs. The outside truss needs to be replaced with a new truss. Rust has eaten insidiously into many parts, and these must be replaced. The startling statement is made that a blockade of cars, for which the bridge is notorious, will now imperil the great structure. The report is backed up by mathematical proof and is likely to prove a great card in opposition to Tammany Hall in the coming municipal election.

The amount of life insurance carried by President McKinley has been a subject of considerable discussion in the American newspapers and some of the insurance journals. *Finance* has ascertained that President McKinley carried \$315,000 in life insurance policies, which were distributed as follows:—\$100,000 each in the Equitable Life, New York Life and the Mutual Life Insurance companies of New York; \$10,000

in the Connecticut Mutual and \$5000 in the Michigan Mutual of Detroit. President McKinley was written for \$5000 in the Michigan Mutual Life in 1873, which for ten years remained and then was increased by another \$5000 policy written by Joseph S. Saxton. For a number of years he carried a policy of \$5000 in the Connecticut Mutual Life, which was taken out when there was no agent of this company in Canton, O., his old home, and the payments were made direct to the Cincinnati general agent.

CORRESPONDENCE.

EDUCATED MEN AND CHRISTIANITY.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I shall feel greatly obliged if you can find space in your columns for the following extracts as a supplement to the letter from Sir G. G. Stokes which you kindly inserted in your issue of Oct. 2nd. These are not communications to me direct, but they are personal replies received from men of note in the scientific world in England, all of them Fellows of the Royal Society, by Mr. G. T. Manley, who was Senior Wrangler a few years ago, and published by him.

Professor Tait, F.R.S., Lord Kelvin's noted collaborator in much of his work, writes with regard to the views of men of science as respects Christianity, "Surely a sufficient answer would be to name such men in the past as Faraday, Graham, Rankine, Adams, Clerk Maxwell, Joule, Cayley, &c., and happily still in the present, Stokes, Kelvin, Salmon, and others too numerous to mention. Where were, or are, scientific names even to be put on a level with these." Professor Ewing, F.R.S., head of the Cambridge Department of Engineering, writes thus:—"The more I reflect on the subject, the more obvious does it seem to me that the discoveries of science in no way affect the fundamental beliefs of Christianity. To my mind at least there is no inconsistency whatever in accepting to the full the teachings of science and at the same time believing in the revelation of God to men in the person of Christ His Son."

Professor A. Macalister, F.R.S., Professor of Anatomy at Cambridge University, writes "I think the wide-spread impression of the agnosticism of scientific men is largely due to the attitude taken up by a few of the great popularizers of science like Tyndall and Huxley. From my own observation, living as I do amongst those who study, I think that men of science are like most other men of the community. Many of them are so engrossed in their work that they give little heed to other subjects, including religion, &c., a few are actively or passively hostile; but as large a proportion are believers in Christianity as you will find in any other class of the community. Speaking for myself I can not see anything incompatible with the modern development of scientific teaching in the fundamental doctrines of Christianity, and consider that it is only on the basis of a crude and superficial philosophy that any such incompatibility has been supposed to exist. Accordingly it has been my experience that the disbelief in the revelation which God has given in the life and work, death and resurrection of our Saviour is more prevalent among what I may call the camp-followers of science than among those to whom actual scientific work is the business of their lives."

Lord Lister, President of the Royal Society, writes—"If you think that any advantage would arise from your saying that you know as a matter of fact that I am a believer in the fundamental doctrines of Christianity, there can be no objection to your doing so."

Lord Kelvin, the previous President of the Royal Society, writes:—"In answer to your letter I have many times in my published writings within the last fifty years expressed myself decidedly, on purely scientific grounds, against atheistic and materialistic doctrines. I may add that I am a member of the Church of England and of the Episcopal Church of Scotland."

Sir William Huggins, the present President of the Royal Society, was one of those who marked his letter private; but I may say without breach of confidence that it was couched in a spirit of Christian sympathy which fully accords with what I heard of his Christian character from others.

To these last three Mr. Manley adds the names of two others who have recently held the Presidency of the Royal Society: Sir George Stokes and Professor Michael Foster, and he asks, "Where is the man of science professing to be an agnostic or atheist whose name can be put above them?"

Yours faithfully, P. K. Fyson, Bishop.
Hakodate, Oct. 18th 1901.

THE MORMONS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Since my last letter you have published two

communications, an extract from a third, and also written editorially, on the "Mormons."

The first is the letter of J. R. Birkelund M.D. of this city, who denounces the "Mormons" and their God and accuses them of deception and many other things, all on the testimony of "Anti-Mormon Leaflets."

"He that answereth a matter before he heareth it, it is folly and a shame unto him." We are accustomed to have gentlemen who attach "D.D." to their signatures attack us, but men with "M.D." following their names do not as a rule bother themselves about the morals of a community and pay little attention as to whether men believe in one or more Gods. The gentleman of medicine, from all I hear, can find an abundance of purification work to do in this land even if the four Mormons from Utah are left alone. He closes his article, which is an appeal to have the "Mormons" refused the privilege of preaching in this land, with a very choice exhibition of liberality. One to which a man with the least spark of respect for freedom of speech would be ashamed to sign his name. He says: "It is to be hoped that not only technicalities but the merits of the case may cause a final rejection." Technicalities are scorned by respectable people the world over. Perhaps the doctor does not know that many years ago the Christians in Japan were guilty of aiding in a bloody rebellion and that to-day, notwithstanding this, they have perfect freedom to propagate their doctrines. The millions of people in Japan, with the exception of a few thousand who have been converted to so-called Christianity, do not have the least respect for the Christian religion. Surely our man of medicine is utterly lacking in a comprehension of human character if he even imagines that a Nation giving liberty to all Christians to-day, who in days gone by were guilty of inciting a rebellion, will be so narrow as to deny freedom of opinion to men who pledge themselves to sustain the laws of the land.

The doctor does not seem to know that we are living in an enlightened age, and that the Government of Japan has made wonderful progress in civilization. The people of all the world look with wonder and amazement at what has been accomplished in the past thirty years by the Japanese Nation, and I have not the least fear that his suggestions or those of your other correspondents will have the slightest weight with Japanese officials.

As to the doctor's talk about the technicalities in the laws of Utah and that the living with plural wives is polygamy, permit me to give a little information which he seems not possess. He gained his information from "Anti-Mormon Leaflets" and it is, therefore, not reliable. A man would be considered lacking in common sense if he were to go into Court and ask for a decision after having employed the attorney of his opponent to state his case to the Court or the Jury, and yet this is just what the Tokyo doctor is guilty of doing. He has stated the charges of our opponents and then with a sublimity, a grandeur and magnificence of cheek that is beyond most men, calls on the Japanese officials to take advantage of "technicalities" to enter a decision against the "Mormons." Fortunately the Japanese can give the doctor pointers in liberality, and he will have to move to a less civilized country before his suggestions will have any weight.

The Congress of the United States, I rejoice to say, did not see things as the technical and narrow minded doctor would have the Japanese officials see them, and, therefore, accepted Utah as a State with a law which defined polygamy to be the marrying of more than one wife. The law was purposely framed so that men having plural wives could take the test oath and become citizens of the State. When Utah was a territory all men having more than one wife were by Congressional enactment disfranchised and had no rights as citizens. When Statehood was granted these men were restored to citizenship. They did not discard their plural wives, to whom they had been married in good faith, prior to the Manifesto of President Wilford Woodruff. Congress did not require this as a condition upon which they could be restored to citizenship.

It seems that there are some Christian ministers who are labouring in Asia in other places than Japan, who feel that it would be little less than a crime in the sight of God and man, for men who have more than one wife to put their plural wives away. I quote from a non-Mormon publication purchased a few days ago in Yokohama, "A Plea for Polygamy." It seems that the author was "much surprised" to find such a thing allowed "under any circumstances." He says:—

"As I had been educated a strict monogamist, in New England, I had never once dreamed that any other social system than monogamy could be possible among Christian people, anywhere; and I remonstrated with the missionaries for permitting polygamy among their converts, under any circumstances whatever."

"I was answered by them that the Bible has not forbidden it, but, on the contrary, has recognized it, as sometimes lawful and proper; and although

they themselves did not encourage it, they could not positively prohibit it. I then endeavored to recollect some prohibition in the Bible, but could neither recollect nor find one there. On the contrary, to my own astonishment, after a careful examination of the Sacred Scriptures, I did find therein many things to favour it. The missionaries also said, . . . 'Shall we compel them to put away all their wives, but those first married, and then receive them into the church? But in many cases this would be impracticable, in others unjust, in all cruel. For the chastity of women hitherto irreproachable would be tarnished by their repudiation: they would often be left without a home and without support; and, like other disgraced and destitute women of all lands, they would be thrust upon a life of infamy and vice.' 'Who' continued they, 'shall dare assume the responsibility of separating wife from husband, and children from parents? since the Bible expressly forbids a man to divorce his wife, for any cause, except unfaithfulness to her marriage vow. God is not said in the Bible to hate polygamy, but it says there that 'He hateth putting away.''" The main point attempted to be made by all your correspondents and in your editorials is because the "Mormons" believe in the rightfulness of plural marriage, although not allowing men at the present time to marry plural wives, they should, because of their belief, be denied the privilege of preaching in Japan. You and your correspondents can save much time and labour by remembering that until Japan shall enact a law denying freedom of opinion, and so long as it shall retain its present law, its officials cannot deny the "Mormons" religious freedom unless they shall break their own laws. We do not and have not denied that we believe that plural marriages are right and have been approved of God under certain restrictions, but as stated no plural marriages are now allowed in our Church.

If the Boers surrender to the English as the "Mormons" have to the laws of the United States, and agree to submit to Great Britain's rule it would be absurd to refuse them the privilege of becoming subjects of King Edward unless they would damn their souls by swearing that they had done wrong to take up arms and offer their lives on the altar of sacrifice for that which they believed to be not only right but a sacred duty.

I have given you several columns of testimony as to the honesty of the "Mormon" people and you have said, "he (Grant) adduces various appreciations by other persons in support of his assertion, 'that the Mormons are honest and virtuous, conspicuously free from drunkenness, licentiousness, delinquency and vice of every kind.' As to all that we have nothing to say. Nor have we ever had anything to say. The Mormons may be everything that Mr. Grant claims for them, and indeed we go so far as to admit that whatever we have read or heard of them justifies Mr. Grant's encomium." I will simply ask the doctor who accuses the "Mormons" and their God of deception and dishonesty etc., etc., to read some of the things already published in the *Mail* sustaining my position as to the honesty of my people. If a community is honest, virtuous, and law-abiding then the individuals composing it must of necessity be so. I will refute one of his statements and that is, that the "Mormons" are trained in deception from infancy and their God is dishonest. What does the doctor know, but from "Anti-Mormon," of the trainings in a "Mormon" home? Has he lived in one from infancy and heard the teachings? Has he met the "Mormon" God and talked with him? I speak from an actual knowledge of the case, as I was reared in a "Mormon" home from my infancy and know what the teachings are in a "Mormon" home, yes, in thousands of them and I know his statement is untrue. I have been taught and so are all young "Mormons" reared in a faithful home, that to be anything but honest was wrong in the sight of God, to be anything but virtuous was to commit a sin next to murder. I have been true to my mother's teachings and I hope all those who are so much worried over the "Mormons" can say as much.

I do not think the Japanese officials care whether men believe in one or more Gods, or no Gods at all, whether Jesus Christ was married or not, whether Adam will be the God of this world, or whether men believe in the accepted God of the Christians, who is thus described by them:—"There is but one living and true God, everlasting, without body, parts, or passions; of infinite power, wisdom and goodness." Such a God to my mind is nothing.

I find that my reply to the Tokyo doctor answers sufficiently the long extract from the Yokohama Baptist minister's communication. Incidentally, I will say to him that the Bible sanctions polygamy and if he does not wish to stand as a hypocrite professing belief in that Good Book, he had better apply to the Japanese officials to have it cast out of the country.

Referring to the letter signed "D." "D." stands for "dunce," "devil" or "divine." Until the gentleman using it is not ashamed of his name and shall have courage to sign it to his com-

munications we will pass him and his "shocking statements" without comment.

When the Savior was on the earth all the religious professors of the age combined against him. He has again visited the earth and established the Church of Jesus Christ, which Church was the only one denied a hearing at the World's Parliament of Religions at Chicago, 1893. History repeats itself. Religious intolerance caused the death of Jesus Christ, and also the death of Joseph Smith the Prophet of His Church in the latter days.

Yours respectfully, HEBER J. GRANT.
Tokyo, October 20th, 1901.

STRAW COUPLINGS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—A week or more ago I noticed the brake couplings of two carriages in a train leaving Shinbashi tied together with straw-ropes, and in the train leaving that station at 8.45 a.m. to-day, couplings of the brake between the rear end of first class three compartment carriage No. 19 and second class small carriage No. 6 were also so joined together. Perhaps these were the same couplings as I saw joined together in this manner as mentioned above, and may have remained in that condition ever since. This I think may be taken as a fair specimen of the way in which the Japanese Government care for the lives and generally for the safety of the travelling public. The carriages themselves are almost always coupled together in the most careless manner, they are filthy dirty, and the porters absolutely inattentive as to opening carriage doors, or assisting passengers in any way. They seem to consider that they are Government officials and the public are their servants having no right to courteous treatment.

These are complaints one hears whenever one travels on the Railway from Japanese and foreigners alike. The journey between Shinbashi and Yokohama is, from the bad condition of the road, of the rolling stock and careless coupling of the carriages, a perfect misery to those whose business or pleasure causes them to travel on the Japanese Government Railway.

Yours obedient servant,

CONSTANT TRAVELLER.

Tokyo, October 22nd, 1901.

GERMAN OPINION ON ENGLAND.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In answer to your above articles on the above topic I beg to make the following statements: 1. Dr. Maritz Busch's diary was compiled by means of a series of the meanest indiscretions and was written for sensational purposes only. When it appeared—almost immediately after the death of Bismarck—it caused indeed a very big sensation as was intended by its author. It was found then and clearly proved that most of its contents were words and sentences taken from the connexion in which they had been used and therefore producing quite a different effect from the meaning they originally had. The German public therefore agreed that the book was not to be used as a reliable historical source and no earnest and fair writer will think for a moment of stating something on Busch's authority. The fight about the book and its definite condemnation by the public has been so notorious that one might fairly suppose that there is *nota fides* on the side of a writer who nevertheless quotes it as an authority. Yet I think there is *no nota fides* on your side or that of *The Times*, but only your common English ignorance of foreign things. But as long as you do not get out of that almost innate habit of nearly everybody of your countrymen, you have no right of discussing foreign matters, and if you do so nobody will take you for serious at all.

2. Our war of 1890-1 was a fair combat between the German and French Governments according to the prescriptions of the international law of war, not between the two peoples. Non-combatants had therefore no right to interfere with the course of events and when they did they had to undergo a severe and indeed very hard but just punishment which they themselves had foreseen when meddling with the warfare. Your Boer war is quite a different thing. It was a war between two belligerent governments until the time when your Government illegally declared the countries annexed and the Boer forces mere marauding bands. From that time it has become a struggle between two nations, the issue of which decides the existence or non-existence of a whole people. All the measures taken by your officials tend to the annihilation of the Boers as a state, a nation and a race. That is no more lawful warfare but murder, and against such a foe all means are allowed.

3. In its recent issues *The Times* has continually observed the tendency of stringing up again "the natural and universal hatred of the French against everything German," which it sees with deep regret is

vanishing from day to-day. I am convinced that that was its main purpose when issuing the above article. That is the same policy your papers have followed so often, for instance when instigating Japan against Russia and the U.S.A. against Germany. To try to instigate against each other the other nations in order to become the *tertius gaudens* instead of making one's own cause a just one and when attacked defending it with all fair means, that is the policy which has made your public community the object of the contempt and hatred of the whole world, though every foreigner will admit the honesty and integrity of the individual Englishman.

I am yours, etc.

CIVIS GERMANUS.

THE SOCIAL EVIL.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—It may be interesting to your readers to know that the long litigation connected with the work of rescuing girls from a life of shame is now drawing to a close. The case to test the validity of the "debt" contract is on the docket for the 31st inst. in the Supreme Court, and when this case shall have been disposed of our legal work will end, so far as we now know. It will be remembered that the "labor" contracts and the decisions of the courts that a girl could not be bound by contract to a life of shame became the basis of the Home Dept. regulations that provided for "free cessation," *jivu hitigo*. Under these regulations thousands of prostitutes have left the brothels and have returned to honourable lives. It was not expected at the time that the brothel keepers would try to collect the debts due them from the released girls by process of law, as it was our opinion that the "debt" part of the contract became invalid with the other, labor, part.

Suits, and distrains on the property of parents and relatives of released girls, however, have followed almost every free cessation case in some places, and as several girls have been frightened or forced back into their old trade by these means, we felt compelled to take such action as would clear up the matter, expecting at the time to secure the dismissal of the suits. So far, however, every court has upheld the contracts and accounts as presented by the brothel keepers, on the ground that the papers are in legal form, and the court declines to go behind these papers into the facts, that is, we have had judgments "according to the papers" presented by the keepers.

The grounds of our appeal are:—first, the purpose of the debt is to bind the girls to a life of shame until it is paid and as said debt only increases with years of labor, there is no prospect of its ever being paid, hence in reality the money paid for girls comes nearer being the purchase price than a loan. Purchase of human beings being prohibited in Japan, the transaction is illegal, and being illegal should have no standing in court. Secondly, the effect of the debt is to cause young girls to continue to prostitute themselves against their will, hence it is in conflict with section No. 90 of the Civil Code, and should be invalidated, as was the labor contract, by virtue of the above section; and thirdly, the appeal court having declined to take notice of the facts in the case, the judgment is based on insufficient grounds and should be quashed, and sent back for re-trial. I think that there has been a gradual increase in the number of jurists who side with our position, but the result of the appeal to the highest court in the Empire cannot be predicted with any degree of certainty. We have done all that we can and the matter is now before the court of final resort. The effect of the judgment will be disastrous to the brothel keepers should we win, but will strengthen their hold on the poor unfortunates in their possession should the keepers win. It is scarcely necessary to say that the effect on society will not be slight, no matter which side wins.

Yours most sincerely,
Nagoya, Oct. 21, 1901.

U. G. MURPHY.

THE LADY OF RIDDLES.

Mary, Queen of Scots. By Samuel Cowan. 2 vols (Sampson Low. Net 28s.)

THE extraordinary fascination exercised by Mary, Queen of Scots, is inexhaustible. Regardless of the enormous number that exist already, a new biography of her can never be superfluous, because, to say the last word either upon her career or her personality is practically impossible. The murder of Darnley is an unsolved problem; her marriage with Bothwell is one of the most impenetrable mysteries of history; while the character of the woman herself is as unexplained as anything in the dramatic disorder of her existence.

To penetrate its intricate dilemmas and remain unmoved would be extremely difficult. Investigation of the truth concerning her rouses instant excitement, for, as a matter of fact, the fascination of the woman did not die with her, and her biographers, like her contemporaries, unable to feel indifference, are inclin-

ed either to hate or to love her. In the majority of cases they do the latter, for Mary's charm is enormous, the more so that, like her beauty, it is a thing more felt than seen, a thing curiously indefinable, and, therefore, insidious, haunting, like a fever in the blood, the brain is unable to reach or to cope with.

Was she guilty, cruel, secretive, a wonderful combination of passion, cunning, lies, and deception? On the other hand, was she a tortured, tender, sinless creature, fighting single-handed against a very sea of hate, intrigue, and treachery? Or was she a little of both—a little passionate, a little *ruse* (she had been brought up in a Court where cunning was a fine art), a little cruel, and at the same time more innocent than guilty, more deceived than deceiving, more driven by fate than desire into horrible and inextricable situations—a woman, in fact, for whom pity cannot be too profound or unequalled? The question has never been finally answered, and she still draws interest with the undying fascination of the unexplained, enticing always a half-rasped curiosity and burning inclination either to love whole heartedly or to hate unreservedly; her character, quite as much as her guilt or her innocence, having been torn piece-meal by speculation and controversy.

Mr. Cowan's two new volumes, moreover, have not minimised in the slightest degree the old uncertainty. Though they deal essentially with the supreme secrets of the Casket letters and the Bothwell marriage, we are no further in the matter than we were before. Mr. Cowan, it is true, does not believe that Mary either wrote the letters or was other than a piteous victim in the Bothwell abduction. But neither do Hosack, Strickland, Tytler, and many others, while Skelton only credits her with a part—and that a non-incriminating part—of the famous correspondence. Except, therefore, a deepened sense of the universal lying and baseness of the period, and of the mass of spurious documents and invented statements everywhere mixed up with the truth—in fact, an intensified conviction of the extraordinary difficulties of arriving at an opinion at all—Mr. Cowan's book must be held to give us little fresh upon the subject, while certainly it throws no new light upon the wonderful, pathetic creature herself.

His manner of writing also has a slight excess of confidence for a subject so beset by contention. Mr. Cowan's brevity seems scarcely thoughtful enough to employ in a study where no opinion can be accepted lightly; where every opinion, in fact, must be laboriously explained and justified. In this new work upon Mary there is a tendency to forget that no statement can be presented as if contradiction were out of the question. For every statement has been contradicted, every opinion weakened by an opposite, every document even practically given the lie to by another with a different story.

Later on, as the subject grows in dramatic intensity, the writer's style acquires more weight of manner. Nevertheless, taken as a whole, and in spite of the inclusion both of the Riccio bond, with its incriminating signatures, and the gracious letter, presumably the last ever written by the maltreated Queen, its literature seems to us one more volume ardently expressing belief in Mary's innocence, and little more. What Mr. Cowan has done, however, that is of new and valuable service, is to procure an admirable collection of photographs of Mary herself, though it is strange, that having got them together he remained dead to the opportunity they afforded of an entirely original study of his singular historical episode. For lives of Mary based upon ancient documents are many and voluminous. And the end of them all is virtually a confession that the mystery of her career is beyond solution by research. Nothing reported can be relied upon, so widespread was the treachery bred by the times, her position, and the bitter friction between herself and Elizabeth. One may believe her innocent, one may believe her guilty, according to the documents selected to rely upon—certainly is out of the question.

But a Life of Mary, Queen of Scots, written by the light of her temperament, has yet to be written, and her temperament a collection of her portraits puts well within the reach of understanding; for, though a good many of them undeniably differ, the large majority are absolutely alike, both as to the essential characteristics and as to the general impression conveyed. And the face and the life have an amazing congruity, while it must be remembered no existence can wriggle outside of the moulding grip of character. Its results must be produced undeviatingly within the limits of the nature dealing with it. Ambiguity is impossible in the consequences of a limpid, simple disposition, while interminable confusion issues invariably where moves are fluctuating, dubious and complicated.

Mary's face is in all her portraits, above all, the face of a woman capable of retaining many secrets. It is rather a cruel face, and that of a creature who would never be wholly what she seemed. At the same time it is intellectual, artistic, and of an astounding subtlety—a subtlety so extreme, indeed, that

it is doubtful whether even she ever quite understood her own character or its consequences.

The oval of her face is delicately voluptuous. There is no firm outline of jaw to give strength or decision. Her nose is too long and too pointed, with a downward tendency at the end, expressive of a certain grim insensitiveness. Her chin is slightly over-small, her forehead slightly too high and too large. Coolness, self-possession, and a rather exceptional mental capacity, might be expected from the upper part of the countenance, but the little chin—it is said to have been slightly dimpled—reveals, more than anything, a desire to be loved much and often, to be loved *sub rosa* sooner than not at all.

As for the eyes, it is impossible conscientiously to regard them as either spiritual or candid. For that matter they are not even beautiful, though they are incontestably attractive. Dangerously so even, because there is no fathomable end to their expression. But in nearly all the portraits they are small and sly, with a certain pitiless tranquillity, and an undesirable habit of looking sideways. Her mouth is small, fascinating, with a full under-lip; supremely, again, the mouth of a woman with a liking for kisses, though the manner in which the upper lip closes over the lower discloses also an immense capacity for self-suppression. The eyebrows are refined and delicate, the hair exquisite and full of a delightful emotionability. Taken as a whole, however, and in spite of its abounding possibilities, Mary's appearance emphatically denies the saint theory, though at the same time it suggests strongly that should a new biographer investigate her life with careful reference to her character, some, at any rate, of its present incomprehensibilities might become comprehensible, and certainly its love affairs, its disasters, its interminable complications.

What we should like to see would be a life of Mary taking the tendencies of her disposition for guide wherever records are confusing, a life daring to believe it as at least possible that she was not entirely ignorant of the scheme to do away with the detestable Darnley; a life deliberately putting the Casket letters on one side as documents impossible to form a reliable judgement upon, and then having the courage to write of her with tenderness and sympathy. For, granted even that she was very guilty, judged by the standards of guilt as they are to-day, the life of Mary that should be written would never attempt to estimate her by these standards at all. Murder, to begin with, is a totally different affair now to what it was in Mary's time, when torture of every sort was a common practice. From early childhood the girl's nerves had been toughened to violent deaths, to burnings, and to every kind of atrocity. Human life was held of so little account that men, women, and children were exterminated upon every conceivable pretext. Executions were common, whippings, and the use of the rack commoner still, while the savageness of the age seemed to create a positive lust for bloodshed. To Mary the signing of death warrants was part of the day's business, and occurred too frequently even to stir imagination. At an early stage of her reign she had sent to their deaths Chastelard and Sir John Gordon, and, viewed from present standpoints, they were both unspeakably cruel actions. Certainly, few women would have the stomach to behold a man—youthful, poetical, and good looking—merely for the sin of having loved them too inordinately.

Besides recognition of the enormous difference in civilisation, there is one other essential fact to remember as regards Mary—that is Scotland's own unutterable culpability in the business of her life. Nothing, indeed, is sadder or more piteous than the accounts of Mary's existence when she first came, full of the ignorant confidence of youth, into her dreary kingdom. Bitterness and treachery confronted her almost at the landing-stage. From the beginning sour looking faces condemned the radiant vitality of her girlhood. Knox actually denounced her to her face from the pulpit, thundering against "the Queen's dancing, and little exercise of herself in virtue and godliness," while the whole Court—harsh, austere, and suspicious—must from the very earliest days have chilled to the marrow her irrepressible young life.

In remembering her conduct it should be remembered how pitifully at bay she stood in that cheerless country—she, who had just come from a Court where love-making, flattery, and a joyous lightness, had enveloped her like a perfume—surely she had more excuse than most people, not only in plucking sweetness from whatever roots she could, considering how rare it was, but in taking also a certain natural zest in defying for her part, also, these contemptuous bigots, who had lowered lids at her with not one whit less derision, when she had first come, as a blameless juvenile, into their depressing society.

But more, perhaps, than any, the Bothwell incident would gain by being rewritten with due regard to her temperament and to the appalling circumstances of her life at the time of its occurrence. During the period of her seclusion in a room draped with crepe, after the Darnley murder,

the very doors of the churches were rendered pictorial with coarsely coloured caricatures of her, while the question as to the degree of fascination a nature such as Bothwell's might have temporarily exercised over her can only be realised when the amazing complexity of her character has been definitely acknowledged. That the man possessed enormous force of personality is undeniable, and the lower part of Mary's face suggests a woman likely to surrender to the relentless power of it. Bothwell was a brute; and there is a certain type of woman to whom indomitable brutality is irresistible. When everything has been said, also as to his terrifying her into consenting to the marriage, one important fact is forgotten—the fact that this queer, ambiguous lady possessed a magnificent and unflinching courage. Her superb fearlessness, in fact, is the one thing about her uncontested; the one quality nobody has denied, either during her lifetime or afterwards. Never in all the various vicissitudes of her existence was she ever known to be cowed and intimidated. Her death was exquisite, so tranquil and undisturbed that its courage is more prominent than its ghastliness.

Could so intrepid a woman have been coerced by terror? The question is not asked with a view of being answered, because in all the accumulated mass of statements there is nothing to render a reliable answer possible. The Bothwell marriage, like all the rest, remains a mystery, surrounded, it is true, by suspicions, but not actually condemnatory circumstances. For from these same circumstances, her partisans draw one set of conclusions, with admirably plausible reasons for maintaining them, and her adversaries another, also with extremely plausible reasons for conviction. But certainly a passionate nature—and Mary's face is that of a passionate woman—might, under certain circumstances, become a prey to the horrible fascination of a Bothwell. In any case, she was a supremely interesting woman, but it is at least questionable whether, if only a certain faultiness could be accepted sympathetically, the fine achievement of her spiritual development during the agonised years of her captivity would not make her more deeply piteous than she ever could be as the colourless saint of so many advocates.

Personally, we think that Mary, judged with allowances for the peculiar environment of her times, could hold her own unwhitewashed, were it only as a woman possessing superlative fascination, superlative patience and dignity, and an inimitable loveliness towards all those who constituted her friends and adherents.—*The Academy*.

TELEGRAMS.

(REUTER'S SERVICE TO THE "JAPAN MAIL.")

THE SOUTH AFRICAN WAR.

Shanghai, Oct. 18.

Bands of rebels from the Calvinia district are advancing southward under Boer commanders, looting and recruiting as they go. Parties of them have reached Hopefield and Saldanha Bay. Complete confidence is felt by the British military authorities in their ability to cope with these raiders.

A later telegram says that there has been fighting near Piquetburg, forty miles from Capetown. The Boers attacked the district troops, but these being reinforced by a squadron of the Sixteenth Lancers, the Boers retreated, after suffering some slight loss.

Captain Bellew, of the Lancers, and four men were killed.

BOTHA'S COMMANDO DISPERSES.

Shanghai, Oct. 19.

Botha, finding the invasion of Natal disastrous, has dissolved his force, leaving the units to escape as best they can. Botha with a few men has gone north.

BOER LEADERS EXECUTED.

J. Kruger and Lieutenant Brede have been hanged at Cradock for train-wrecking.

AFGHANISTAN.

Shanghai, Oct. 20.

It is stated at St. Petersburg that a complete agreement has been established between Russia and Great Britain, averting all danger of a quarrel regarding Afghanistan.

RUMOURED DEATH OF DE WET.

A later telegram says that there are persistent reports in Natal that De Wet is dead.

THE ROYAL TOUR.

The Halifax tour of the Duke and Duchess of Cornwall is completed.

IMPERIAL YEOMANRY.

The first draft of re-enlisted Yeomanry has sailed for South Africa.

SOUTH AFRICA.

Shanghai, Oct. 21.

The Canadians have surprised a laager, killing three and capturing four men. The enemy abandoned everything, quantities of stock, food, and ammunition.

SOUTH AFRICA.

Shanghai, Oct. 22.

Commandant Marais was among the recent prisoners.

AMERICA AND TIENSIN.

The United States has asked China to recognise her right to a municipal concession at Tientsin.

FRANCE, TURKEY, AND THE POWERS.

France has decided not to wait much longer, but to resort to coercion, if warranted by circumstances, against Turkey.

Later.

France, Russia, and other Powers are discussing a joint representation, and eventual action, for the purpose of obliging the Sultan to execute the provisions of the Treaty of Berlin regarding Macedonia and Armenia. It is probable that guarantees will be demanded for the execution of the reforms; at the same time a fresh settlement of the Cretan question will be raised.

SOUTH AFRICA.

Scheepers has been banished, along with eleven others, from South Africa.

SOUTH AFRICA.

Shanghai, Oct. 23.

The attempted southern movement of the rebels from Calvinia has been checked. The commandos have been hustled or scattered.

MARQUIS ITO IN AMERICA.

Marquis Ito has dined with President Roosevelt. Mr. Secretary Hay was present. The President pressed Marquis Ito to accept a banquet after the period of mourning for the late President McKinley had expired, but Marquis Ito was unable to wait.

GENERAL BULLER PLACED ON HALF PAY.

Later.

Owing to a speech delivered on the 10th of October, General Buller has been removed from command and has been placed on half-pay. General French has been appointed to the command of the First Army Corps.

THE BULLER INCIDENT.

Shanghai, Oct. 24.

Except the *Daily News*, all the papers consider that the decision regarding General Buller was inevitable. They say that there was no alternative without ruining the discipline of the Army. They express personal sympathy with Buller and deplore the inglorious close of his honourable career.

LORD SALISBURY.

Lord Salisbury has returned from the continent.

BRITISH PARLIAMENT.

The King will open Parliament in full state between the 23rd and 28th January.

(RECEIVED AT THE LEGATION OF FRANCE.)

SENEGAL.

Saigon, Oct. 19.

The sanitary condition of Senegal is excellent.

RIOTS AT BUDA PEST.

There have been several riots at Buda Pest, where the electors have been in conflict with the troops. One hundred were wounded and several hundred arrests were made.

SOUTH AFRICA.

The English have shot several Boer officers as rebels.

THE WORKMEN OF FRANCE.

Saigon, Oct. 20.

The miners have submitted their demands to M. Waldeck Rousseau, who has replied that the fixing of a minimum rate of pay must depend upon an understanding between the colliers and their employers. He added that a general strike would be as injurious to the men as to the masters.

The Chamber of Deputies is discussing a project of law relating to workmen's pensions, and the Commission of Official Inquiry is examining into the matter of an eight-hours day.

FRENCH NEWS.

Saigon, Oct. 23.

The extraordinary session of the French Chamber has been opened tranquilly. M. Basly has introduced a project of law establishing a minimum legal salary for miners.

(SPECIAL TO THE "JAPAN MAIL.")

ACCIDENT TO THE "SHERIDAN."

Nagasaki, Oct. 23.

The U.S. transport *Sheridan* arrived here with tail-shaft damaged. She will dock for repairs.

(RECEIVED BY THE FOREIGN OFFICE.)

THE CHINESE INDEMNITY.

With regard to agents for receiving the Indemnity, Russia has named the Russo-Chinese Bank and Germany has appointed the German Asiatic Bank.

JAPANESE IN QUEENSLAND.

A letter from Townsville, dated in the beginning of September, says that the attempt to pass a bill in the Queensland Parliament for excluding all Asiatic labour, has failed in consequence of Japan's remonstrance. The bill was amended so as to apply to Chinese only, and was then passed unanimously, the Queensland Minister of Foreign Affairs having announced that it would be impossible to obtain the Royal sanction if Japanese were included.

(RECEIVED IN TOKYO.)

THE INDEMNITY.

The Foreign Indemnity Committee has prepared and submitted to the Chinese Plenipotentiaries a draft relating to lump coupons.

CHINESE TARIFF.

The Chinese Government has decided to put the new *ad valorem* duties into operation from the 11th of November. According to the Peace Protocol the 7th should have been the date, but as the 11th falls on the 1st day of the 10th month of the Chinese Calendar, it is thought more convenient by the Customs Authorities to choose that day.

KOREAN LIGHT-HOUSEES.

The Korean Government has instructed Mr. McLeavy Brown that a sum of 250,000 *yen* is to be appropriated yearly for a period of 5 years to the building of light-houses, and that a sum of 1,600,000 *yen* is to be appropriated for supplying Seoul with water-works.

MARQUIS ITO.

Marquis Ito will sail from New York for Boulogne on the 26th of October.

(FROM THE "OSTASIATISCHE LLOYD.")

NEWS FROM EUROPE.

Berlin, Oct. 14.

A festival which was planned here in commemoration of the China Expedition, has been postponed on account of Count Waldersee's illness.

The eightieth birthday of Professor Virchow was the occasion of great ovations for the famous pathologist. Delegations from all over the world had come to Berlin. The Emperor addressed a personal letter to the Professor, conferring upon him the gold medal for art and science. Chancellor Count Billow invited all the international delegates to a banquet.

Berlin, Oct. 17.

H.I.H. Prince Henry of Prussia has been appointed by King Edward an Admiral in the British Fleet.

In Seville troubles have broken out, during which a number of people were killed and wounded. The police were arresting some anarchists, who offered resistance. As the police were not able to master them, the troops were called out.

(FROM THE "N.-C. DAILY NEWS.")

JAPANESE MILITARY VISITOR.

Hongkong, Oct. 14.

Last Saturday General Fukushima left the Colony in the steamer *Hongkong Maru*, after having breakfasted at Government House. The General visited the Viceroy at Canton last Friday.

PRESENTATION TO THE CHIEF JUSTICE.

A meeting of the Volunteer Corps was held on Friday last for the purpose of presenting their retiring Commanding Officer, Sir J. W. Carrington, the Chief Justice of Hongkong, with a handsome silver salver. The Governor, Sir Henry A. Blake, and Major-General Gascoigne were present at the meeting.

THE PUBLIC WORKS DEPARTMENT.

A Commission has been appointed to enquire into the working of the Colonial Public Works Department.

(FROM THE "NAGASAKI PRESS.")

BRITISH TORPEDO-DESTROYERS IN COLLISION.

London, Oct. 7.

During yesterday's manoeuvres the torpedo-boat destroyer *Angler*, while making a sharp turn at full speed ran into the torpedo-boat *Salmon*, tearing the screw and several plates off the latter. The injured vessel immediately hoisted the signal "going down." The other torpedo-boat destroyers with great difficulty rescued the crew, and also succeeded in saving the vessel. Both damaged vessels were towed to Sheerness. None of the crews suffered injuries. An inquiry has been ordered.

FRANCE AND THE PORTE.

Constantinople, Oct. 6.

The French Charge d'Affaires has delivered a Note to the Porte, in which France declines the latter's proposition to reduce the debt demanded by £185,000. France insist upon the first demand for the sum of £345,000.

BRITAIN AND INDIAN AFFAIRS.

London, Oct. 7.

Lord George Hamilton, Secretary of State for India, returned here immediately upon receipt of the news of the death of the Amir of Afghanistan. A special session was held in the afternoon by the Committee on Indian Affairs.

FRANCE AND RUSSIA.

Paris, Oct. 4.

In order to propagate the Russian language in the French Army, it has been decided to open at the Paris Military Club regular courses for studying the above language, and the class will be accessible to all French officers of the land and naval forces.

Asano Risuke (64) employed by the diver, Masuda Mankichi, at Hanazaki-cho, Yokohama, was arrested by the Tobe police a few days ago, charged with having stolen *yen* 106 belonging to his employer in June last.

JAPANESE POSTAL METHODS.

The *N.-C. Daily News* of recent date says:—

"The Post office in Japan is a very curiously managed institution. There is railway communication all the way from Yokohama to Nagasaki, and there are steamers almost daily from Nagasaki to Shanghai, yet it constantly takes letters 10 days, and often more, to get from Yokohama to Shanghai. We have covers before us now, received here yesterday morning, bearing the Yokohama postmark of the 7th instant. Unfortunately, the Japanese don't seem to mind these delays, and foreigners' complaints are useless."

This paragraph called forth the following letter signed "Britisher":—"Your paragraph concerning Japanese Post Offices caught my eye this morning for a good reason, as what I propose to say below more than endorses your views—it shows up the peculiar administration of that department in Japan, and also the existence of a 'cabinet noir' of extraordinary dimensions.

"When I was in Japan lately I had occasion to write several important letters, setting forth at length details concerning financial schemes. These letters in each case were mailed 48 hours before the advertised closing of the bags and in each case turned up at their destination from seven to fifteen days late, slit up and bearing evidence of having been copied.

"In addition to this, three or four letters never arrived at all at their destination, and it may be presumed that they were confiscated, for it is not reasonable to suppose that they could have been all lost in transmission. It is therefore high time to impress upon the Japanese postal authorities the fact that they are deliberately violating a trust by tampering with private correspondence; that in European countries such things do not occur, and, moreover would not be tolerated for one instant; that the boasted civilisation of Japan is a mere myth when mediæval methods are so easily reverted to in matters where common business honesty should be the sole guide; and lastly that a 'cabinet noir' tampers with political or diplomatic covers only, and never with private letters, which under all circumstances should be held sacred by all."

KEROSENE.

The market continues weak.

American	\$2.73
Russian	2.40
Langkat	2.35

SUGAR.

Hardly any change to report.

Brown Takao	Y. 5.90 to 6.55
Brown Manila	6.35 to 7.30
Brown Daitong	4.80 to 5.00
Brown Canton	5.00 to 7.40
White Java and Penang	7.60 to 9.10
White Refined	9.50 to 10.95

EXPORTS.

RAW SILK.

The decline continued and a further drop of yen to all round brought about one large purchase for the United States, in Medium to Good Filatures. This has temporarily strengthened the market again, but business can still be done at our quotations and the prospect is not good for a permanently higher market.

QUOTATIONS.

Filatures—Extra, Fine	Y. 950 to 960
Filatures—Extra, Coarse	930 to 940
Filatures—No. 1, Fine	920 to 930
Filatures—No. 1, Coarse	900 to 910
Filatures—No. 1½, Fine	880 to 890
Filatures—No. 1½, Coarse	860 to 870
Filatures—No. 2, Fine	860 to 870
Filatures—No. 2, Coarse	860 to 870
Common—Coarse	—
Re-reels—Extra	930 to 940
Re-reels—No. 1	910 to 920
Re-reels—No. 1½	890 to 900
Re-reels—No. 2	860 to 870
Re-reels—No. 3	830 to 840
Kakedas—Extra	890 to 900
Kakedas—No. 1	870 to 875
Kakedas—No. 1½	840 to 845
Kakedas—No. 2	810 to 815
Kakedas—No. 2½	770 to 775

WASTE SILK.

No change in the market. Prices are as before. Some concessions might be obtained for undesirable parcels but good quality is strongly held.

QUOTATIONS.

TEA MARKET.

Yokohama, October 23
Arrivals of new Tea—56 boxes.
Purchases of Tea—78,700 lbs.
Tea in Stock—610,900 lbs.

EXCHANGE.

Yokohama, October 24.

No change in silver from London nor in sterling quotations from China, but London discounts are 7% higher and the large business closing in Silk will tend to harden local rates.

YOKOHAMA: SATURDAY, NOVEMBER 2ND, 1901.

DEATH.

At Hongkong, Oct. 26th, Mr. JAMES MC-WILLIAMS, father of C. F. McWILLIAMS, of Yokohama. Aged 69 years. A native of Burlington, Vt., U.S.A. Communicated by Cable.

SUMMARY OF NEWS.

PRINCESS KITASHIRAKAWA left Taipeh for Tamsui on the morning of the 29th ult.

THE special festival of the Yasukuni Shrine will be held from 1st November to the 4th.

THE new Chinese Minister to Japan will leave Shanghai on the 1st November for this country.

THE Crown Princess proceeded to the Hama Detached Palace on the afternoon of the 27th ult.

THE Emperor and Empress have presented

2,000 yen toward the special festival expenses of the Yasukuni shrine.

BARON KODAMA, Minister for War, will return to Tokyo from Formosa on or about the 14th of Dec.

CAPTAIN TSUDA, Naval attaché in the Japanese Legation in Germany, died a few days ago at Berlin.

SEVEN hundred students of the Shizuoka Middle School left for Fuji on their autumn picnic on the 30th Oct.

PRESIDENT LOUBET will return the visit of the Czar to France. The President proceeds to Russia in April next.

THE new Chinese Minister to Japan left Shanghai on the 29th ult., and is expected to arrive in Tokyo on the 3rd inst.

SEVEN thousand troops belonging to Shibata and Muramatsu, Niigata Prefecture, arrived at Fukushima on the 28th ult.

MR. KUNISHIGE MASABUMI, formerly Director of the Shrines and Temples Bureau, Home Department, died on the 26th ult.

MR. ISHIZUKA JUHEI has been elected a member of the House of Representatives for the Fifth section of Nagano Prefecture.

THE Tokyo Metropolitan police issued regulations for bicycle riders on the 24th ult. The regulations contain 17 articles.

THE first frost of the season was experienced at Kusaka-mura and Totsuka, Kanagawa Prefecture, on the morning of the 23rd ult.

A WORKMAN named Kotani Hisa, living at Jogi-mura, was killed by a train near Ogikubo station on the afternoon of the 26th ult.

TWENTY-THREE men were arrested by the Asakusa police in a restaurant at Moritacho, Asakusa, on the night of the 25th ult. charged with gambling.

A TELEGRAM received by the *Jiji Shimpō* from Fusan under date the 27th ult., states that the Japanese steamer *Okuni Maru* has run ashore off Utsun.

A MAN travelling by a train which left Yokohama for Tokyo on the night of the 29th ult. jumped down near Omori and was killed. It is thought to be a case of suicide.

A POSTMAN named Fukuda Senkichi, employed by the Kurata post office, Gunma Prefecture, was murdered between Kurata-mura and the Odo post office on the morning of the 25th ult.

THE Kagoshima branch of the Meiji Fire Insurance Company has telegraphed to the Tokyo head office that the estimated loss by the fire on the 23rd is about yen 15,000.

THE Yokohama Water Works have decided to borrow yen 600,000 from the First National Bank at interest of 9.4 per cent. per annum. This will be devoted to paying off an amount due by the office for pipes.

THE local authorities of Meiji have ordered the removal from Fushion of a number of cigarette and beer advertisements, and if the order is not complied with before Nov. 10th will pull down the offending objects.

SATO KIKU (16), employed as a maid servant, in a house at Negishimachi, Yokohama, was arrested by the Yamate police on the 25th ult. on a charge of having stolen several articles and money from a public bath house.

A WORKMAN named Akai, employed in the military arsenal at Koishikawa, Tokyo, while working in the gun factory on the morning of the 29th ult. was caught in the belting of the machinery and dashed to pieces.

MURATA HACHIRO (15), son-in-law of Murata Daijiro, proprietor of a printing office at Kamezawacho, Honjo, Tokyo, was arrested by the Honjo police on the 28th ult. charged with setting fire to the house on the night of the 26th ult.

A POLICE-CONSTABLE named Sugai Asataro, employed in the Fubasami station, Tochigi Prefecture, committed suicide on the 25th ult. by cutting his throat with a short sword. The Tochigi Kencho presented 96 yen towards his funeral expenses.

H.E. VICE-ADMIRAL YAMAMOTO, Minister of the Navy, gave an entertainment at his official residence, on the night of the 30th ult. General Katsura, Admiral Ito, Count Arco-Valley, German Minister to Japan, and Admiral Kirchhoff, Commander of the German squadron in Japan, were present.

A WOMAN named Asa, wife of Ishijima Roku-nojo, living at Hoshikawa-mura, Kita Saitama-gori, Saitama Prefecture, was murdered on the night of the 27th ult. while her husband was absent. The neighbours heard the woman calling out for help but when they entered the house the murderer had escaped.

A SERIOUS disaster occurred in a coal mine belonging to Mr. Chizumi Kisaku, at Miyamura, Shonai-mura, Fukuoka Prefecture, on the 26th ult. Several men were excavating in the mine, when suddenly a stream of water burst upon them. Twenty coolies were drowned. The water is being pumped out but no bodies have yet been reached.

THE Japanese steamer *Kyūyo Maru*, 678 tons, belonging to Marquis Shotai, ex-Lord of Lochoo, left Osaka on the 18th ult. and arrived at Okinawa on the 23rd. She was expected to depart on the 25th, but bad weather set in and she was driven ashore at Nawakawa on the night of the 27th ult. She was built at Sunderland in England, in 1886, and her cargo was insured in the Nippon Marine Insurance Company for yen 4,000.

AN old farmer named Tajima Shozayemon, living at Nagano-mura, Kamakura gori, Kanagawa Prefecture, committed suicide by hanging himself in a tree near his house on the evening of the 24th ult. It appears that the old man was distressed at his son Sanjiro running away with a woman. When Sanjiro heard of his father's deed he returned with the woman to the village and on the evening of the 26th inst. they both committed suicide at the father's grave.

THE Japanese junk, *Myoken Maru*, belonging to Toyoura-gori, Yamaguchi Prefecture, with four men on board, went out dragging for coral near Otokojima, on the 4th Oct. The following day rough weather set in and the men sought shelter. Next day one man was washed away by a heavy sea and two more died from exposure, only Yamamoto Kojiro living to tell the tale. He floated about one week without food and was eventually picked up by the military chartered steamer *Fukui Maru* on the 11th inst.

THE NEWCHWANG RAILWAY.

Monday, Oct. 28.

The *Chiao Shinbun* and the *Asahi* publish a telegram to the effect that Russia has agreed to restore to China the Newchwang-Shanhaikwan Railway on the following conditions:—

1.—That no foreign Power shall be allowed to interfere with the Railway.

2.—That the Railway shall never be used for the transport of either English or Japanese troops.

3.—That if China contemplates the construction of any branch line, she must first seek Russia's consent.

4.—That the Railway shall not be carried across the Liao River, nor ever employed in a manner injurious to Russia's industrial and commercial interests.

5.—That the Chinese Government shall compensate Russia for all her outlays in connexion with the repair and restoration of the line.

It is apparent that for some time past the newsmongers have been exerting themselves to injure Russia's credit. Version after version has been circulated of an alleged Manchurian agreement, and the majority of these statements have represented a document of such a nature that the idea of its having been deliberately drafted by serious diplomats is quite untenable. That is especially true of the allegations now advanced with regard to the Newchwang-Shanhaikwan Railway. Russia has no right whatever to impose terms about the future of that line, and if she attempted to make conditions such as are attributed to her by the correspondents of the *Asahi* and the *Chiao*, she would be throwing her gauntlet full in England's face, since the line was built with British capital and may be said to have been under British control prior to the outbreak of the Boxer rebellion, a rebellion in whose sequel Russia did not acquire any rights whatever superior to those acquired by Great Britain. The wisest plan is to withhold credence from all these rumours. We are persuaded that they will be found very different from the truth.

As to the general question of this much-talked-of Agreement, the latest account is that the draft has been submitted to a council in the Chinese Court, and that the Plenipotentiaries in Peking have been instructed to negotiate with full regard to the contingency that should any special privileges be granted to Russia, other Powers will claim some equivalent under the most-favoured nation clause. That is exactly the chief danger of the situation, and that is precisely what the unhappy Plenipotentiaries can not guard against, if there be any truth in the demands attributed to Russia. All accounts agree in alleging that one of her conditions is acquisition of the sole privilege of building railways and exploiting mines in Manchuria. If China chooses to grant that privilege to her, China is within her rights. There is nothing in the treaties that forbids China to be as liberal as she pleases provided only that her liberality is uniform. It may indeed be contended, and the contention could be logically supported, that while China is free to grant specific concessions to any Power, she can not, without violating the treaties, grant general concessions to the exclusion of other States. But that is not the line that the objection of other States will take. They precluded themselves from taking it on the day when they established spheres of influence. Germany certainly would not raise any objection on such a score, for one of her first

steps after establishing herself at Kiao-chow was to assert a claim to the exclusive privilege of railroad building, mine-exploiting and industrial enterprise in general in Shantung. The claim has been disputed by England, but her protest does not appear likely to be carried beyond an academical stage, nor can we expect that she would adopt more vigorous methods though Russia in Manchuria followed Germany's example in Shantung. What we might expect, however, is that Russia's adoption of the German precedent would move England to acknowledge the logic of facts, and to demand on her own account corresponding privileges from China: in other words, to demand the exclusive right of every kind of industrial enterprise in the Yangtze Valley. France would follow suit, of course, and the theory of "spheres of influence" would thus pass to the verge of the practical partition of the Chinese empire. How Germany would view such a claim on England's part remains to be seen. She professes to interpret the Anglo-German Agreement as conferring on her, Germany, an absolutely equal position with England in the Yangtze Valley, and as conferring nothing whatsoever on England in return. It may be confidently asserted that history contains no other example of such a rendering of a covenant between two Powers, except in cases where the neck of one of the contracting parties was under the heel of the other. Nevertheless if Germany maintains that reading, she could not agree to allow England to advance, in respect of the Yangtze Valley or any portion of it, a demand similar to that advanced by herself in Shantung and now attributed to Russia in Manchuria. Never once in all the long years when British blood and British treasure were expended to open China for the world's trade and to break down her obstinate conservatism—never once throughout that cycle was a German soldier or a German ship seen upon the horizon of the Far East. Yet this same Germany now professes to think that her rights in the Yangtze Valley are equal to those of England. She has, however, acquired a strong commercial position by industry and enterprise, and, for the rest, it is impossible not to admire her fine assurance. She knows at least that nothing is lost by self-assertion. But a great deal of interest and curiosity attach to the action she will take should the example set by herself in Shantung and followed—according to rumour—by Russia in Manchuria, lead to a general scramble for exclusive privileges.

It is said that the management of the Manchurian negotiation is entirely in the hands of Li Hung-chang, and that his views are opposed to those of Prince Ching.

Tuesday, Oct. 29.

A telegram received by the *Asahi* says that Russia puts at from half a million to a million of taels the sum due to her in connexion with repairs and restorations of the Newchwang-Shanhaikwan Railway; in other words, that is the sum she will require to be repaid before surrendering the line. Of course Russia has a right to be compensated for her outlays, and she will be compensated. The *Asahi* thinks that the money will come out of China's pocket. Very likely it will. If China can not preserve order in her territories, and if one result of her inability is that her railways are wrecked by mobs, she must evidently bear the consequences. But it is impossible not to sympathise with China's unhappiness. She can not but derive from all these events a profound conviction of the wisdom of her originally conservative

attitude. If only she could have permanently prevented the iron horse from setting foot upon the celestial soil! She was tormented beyond endurance to build the Newchwang-Shanhaikwan line, and at last, yielding to the sheer impotency of her foreign friends, she allowed it to be built with British capital. To-day she has to put up a large sum on account of repairs done to it by the Russians, and her outlay will end in the road's being handed over to England. Again, had she never granted any railway-making concessions to Russia in Manchuria, would she now be in imminent danger of losing the whole of that big region? The Powers of the world preached admirable sermons to her about her duties and responsibilities to civilization and progress, and when she extended half-hearted recognition to those responsibilities and duties, she found that she had put a fatal weapon into the hands of her teachers. Of course it is easy to show that the fault is ultimately her own, and that, had she done as Japan did, she might have avoided all embarrassment. But is it not also easy to understand that, in her eyes, obedience to the dictates of civilization may seem to have involved something very like ruin?

THE SALE OF BONDS ABROAD.

Saturday, Oct. 26.

The leading Tokyo journals agree in stating that the attempt to sell fifty million yen worth of bonds in America has failed. Apparently the failure is now beyond question, though hitherto the rumours in that sense have been denied. It is further alleged that Marquis Ito did not concern himself much about the matter during his visit to the United States, since he foresaw from the time of leaving this country that the transaction was not likely to prove successful.

Referring to this matter, the *Kokum Shinbun* enters into a detailed statement for the purpose of showing that the Government can very easily tide over its present embarrassments without immediate recourse to either the foreign or the home market. The sums that ought to be provided are these:—

	Yen.
To restore monies taken from the Indemnity	14,700,000
To repay money borrowed from the Bank of Formosa	5,200,000
To the Sinking Fund	8,470,000
Total	28,370,000

It will be observed, however, that none of these payments is imperative; the Treasury can postpone them without much inconvenience. Consequently, since the sum required to relieve the situation completely, when everything is provided for, is 54 million yen, it follows that by postponing the above three payments, a total of 25,630,000 yen would suffice. There remains, however, the cost of the Chinese campaign. That stands in the accounts at 17 million yen, but the calculation is on a basis of 20,000 troops, and since it has been found possible to reduce the number largely, the authorities are of the opinion that 7 millions will suffice for that purpose. The total actually required is thus brought up to 32,630,000 yen. Then there is a sum of 35 millions nominally needed for carrying on *post-bellum* undertakings next year. In practice, however, it is not found possible to prosecute the works so rapidly, and the estimate is that 19 millions will suffice. Thus the grand total of money needed is brought to 51,630,000 yen. In this aggregate there are included 24 millions borrowed from the

Bank of Japan and $7\frac{1}{2}$ million *yen* worth of Treasury bills issued last summer. The repayment of these two sums also may be postponed, namely, 31,500,000 *yen*, and, finally, subtracting that amount from 51,630,000 *yen*, there remains a sum of 20,130,000 *yen* as the apparently irreducible minimum which the Treasury has to find. It is added that the Treasury entertains no doubt of being able to provide the money by one means or another.

Arithmetically speaking the above figures are clear enough. But our readers will perceive that no explanation is given as to the origin of the chief sum, namely, 54 million *yen*, which is set down as the total required for completely squaring off the accounts. That sum, as we understand the case, is the total which the Government purposed raising by the sale of bonds in America by other means. The Government, in short, desiring to discharge its debts to the Banks of Japan and Formosa, to restore the sum drawn from the Indemnity over and above the original estimate, to pay off the first issue of Treasury bills, to make the usual annual reduction of the national debt, to meet the expenses of the Chinese campaign and to carry on the *post-bellum* enterprises, would have raised the total sum of 54 million *yen*; but being unable to do so, has now resolved to postpone such of the above liabilities as admit of postponement. By that means, the sum immediately required is reduced to some 20 million *yen*, which the Treasury expects to find without much difficulty. We need scarcely repeat that the whole source of trouble is the impossibility of floating the domestic loans contemplated in the *post-bellum* programme. The impression produced upon the public by the present state of Japan's finances is that she is in constant difficulties to make ends meet, whereas the truth is that she is endeavouring to carry on, by means of her ordinary revenue only, extensive works which it was her original intention to pay for out of the proceeds of domestic loans.

The Japanese newspapers unanimously regard this failure to sell bonds abroad as greatly impairing the Cabinet's reputation. They admit that the Treasury's difficulties can be tided over by the simple process of not discharging its liabilities, but they naturally find that remedy very unsatisfactory, and they point out that instead of resolving the problem the Ministry is merely postponing its solution.

A very disastrous effect has been produced upon the share market by the announcement of this failure to sell bonds. The following figures will show what has happened:—

	Quotation on 1st.	Quotation on 2d.
Nippon Tetsudo	71.00	70.70
Sanyo Tetsudo	52.80	52.30
Kwansei Tetsudo	38.10	37.00
Kiushiu Tetsudo	53.20	52.10
Tanko Tetsudo	79.15	77.25
Kyoto Tetsudo	21.05	20.80
Densha Tetsudo	116.70	114.80
Yusen Kaisha	74.30	72.70
Toyō Kisen Kaisha	27.70	26.70
Kanagafuchi Bōseki Kaisha	40.10	38.75
Shōhin Torihiki	66.00	66.00
Tokyo Kabushiki Torihiki	161.80	155.00

The only re-assuring feature of the situation is the great activity in the silk market. Large sales have taken place in Yokohama and are still continuing. During 2 days the transactions are said to have amounted to nearly $1\frac{1}{2}$ million *yen*.

Wednesday, Oct. 30.

Certain Tokyo journals, among which we are surprised to observe the *Jiji Shimpō*, offer explanations of the Japanese Govern-

ment's failure to effect a sale of 50 million *yen* worth of bonds in America. They affirm that the methods employed were faulty. Mr. Morgan, whom the negotiators hoped to interest in the matter, was approached, they say, from two directions on behalf of the Treasury and from one direction by a private Japanese company. The Treasury's representatives were Mr. R. Irwin, acting under instructions from Count Inouye, and Mr. Sugiyama, directly commissioned by the Minister of Finance, and the Company was the Tokyo Electric Tramway Company. Mr. Morgan, being simultaneously assailed from three sides, naturally conceived an unfavourable opinion of the would-be borrowers, and so the matter fell through. The trouble about this story is that Mr. Morgan was never approached by Mr. R. Irwin acting under instructions from Count Inouye or from any one else. That allegation is made out of whole cloth. Whether Mr. Sugiyama was a sufficiently prominent personage to be entrusted with such a task, we can not undertake to pronounce any opinion, though our Tokyo contemporaries very plainly impugn his qualifications. But we do venture to assert that the reasons assigned by the metropolitan journals for the failure of the transaction are quite beside the mark. The trouble lay, not in the methods pursued by the Treasury, but in the fact that rich as America is, she has no money which she cares to invest in the Far East. All her cheapest money is placed in American and British securities. That which is a little dearer goes into Continental European securities. Then there is the money that finds its way into railway stocks or banks, and finally there is the most expensive money of all which is employed on enterprises in the Western States. With such a large field of investment at their own doors, American capitalists have not begun to think of distant countries like Japan, and the best informed American citizens in this country confidently predicted from the first that the sale of the bonds would fail. Very possibly some of the Japanese Government's methods may be open to criticism, but the criticism alluded to above seems quite erroneous.

FINANCIAL AFFAIRS.

The Treasury announces an issue of 16,575,450 *yen* in the form of 5 per cent. bonds, the rate of issue being 87.33 *yen* for a 100 *yen* bond. It is of course understood that the Bank of Japan purchases these bonds, and that the proceeds are to be devoted partly to restoring the Naval Capital Fund and partly to meeting the expenses of the China campaign. On the other hand, the Treasury further announces the redemption of 33,300 *yen* worth of Railway Bonds, and of 7,744,450 *yen* worth of Public Undertakings Bonds, which it purchases at 90. These redeemed Bonds also are understood to have been in the hands of the Bank of Japan. Thus the transaction amounts to this, in fine, namely, that the Bank of Japan purchases 16,575,450 *yen* worth of bonds at 87.33 from the Treasury and sells back to the Treasury 7,777,750 *yen* worth of bonds at 90. Transactions of that nature do not affect the general finances of the country, except in so far as they tend to further impair the Bank of Japan's ability to grant accommodation to private companies and individuals. The Government already owed the Bank of Japan 24 million *yen*, and the debt seems to have been now increased to 32,797,700 *yen*.

GERMANY AND MANCHURIA.

Tuesday, Oct. 29.

According to a telegram from London, Germany is preserving an attitude of strict neutrality with regard to the Manchurian question. That was to have been expected. Her statesmen alleged, months ago, that they did not recognise any responsibility to trouble themselves about Manchuria, and indeed, apart from the Anglo-German Convention, we do not see how Germany is concerned in Manchuria's fate. It will apparently remain to all time a mystery how she can construe that Convention as exclusive of Manchuria, but inasmuch as her interests are not at all involved in preserving Manchuria to China, whereas they are very much involved in not thwarting Russia's designs, every impartial onlooker must admit that her attitude of neutrality is natural and reasonable. The only pity is that she did not sooner discover how indifferent the big territory is to her. Had she appreciated that fact in 1895, she would not have joined Russia and France in expelling Japan from Liaotung and Shinkiang. A prominent statesman remarked, when the Boxer troubles commenced, that although Russia would prefer not to see Germany permanently posted in Shantung, and Germany would prefer not to see Russia permanently posted in Manchuria, either Power might find consolation in the precedent that the other's usurpation would afford. Germany, however, has forfeited that derivative benefit. For whereas the Anglo-German Convention frees the hands of its signatories in the event of any Power's acquiring territorial advantages in the sequel of the Boxer complication, Germany, so far as she herself is concerned, has placed Manchuria outside the pale of the Convention, and could not therefore plead Russian absorption of that region as a basis of policy for herself in Shantung. These speculations, however, are more or less academical, for it is quite within the competence of Russian and German statesmanship to regulate the course of events so that the fruit shall fall into their countries' laps without any violent shaking of the tree. We do not in the least degree grudge to either Power any gains, territorial or otherwise, that may accrue to it. Our only concern is that other States having legitimate claims, especially England, may take care not to be left out in the cold.

The chief point made by Prince Konoye in the last speech delivered by him at a meeting of the *Domei-kai* was that Russia, having been a member of the union of Powers during the recent Chinese complication, and having been a party to the general agreement concluded by the Powers in the sequel of that complication, has no right to make a separate arrangement on her own account with regard to Manchuria. He maintained that if such a right were recognised in Russia's case, it could not be denied to other Powers, and the partition of China would soon become an accomplished fact. Not for a moment, therefore, must Russia be permitted to impose special conditions of any kind as to her position in Manchuria: what she has to do is simply to withdraw her troops.

There is a great deal of force in the Prince's argument, but he appears to have forgotten one fact, namely, that the pacification of Manchuria was left entirely in Russia's hands. The result of that policy was very clearly perceived at the time, and was plainly predicted in these columns. The Powers behaved as though Russia alone was in-

interested in restoring order in Manchuria, and it can scarcely be denied that they thus conferred on her a constructive title to adopt subsequently an attitude of independence. If a company of British marines, or a party of blue-jackets from a Japanese, or any other, ship had been landed at Newchwang and had taken part in the subsequent operations, the position of the Powers *vis-à-vis* Russia's exclusive claims would be very different to-day.

Thursday, Oct. 31.

The *Fiji Shimpō* raises its powerful voice against the campaign of the *Domci-kai*, the *Dobun-kai* and others in favour of the preservation of China's integrity. It fears that a false idea of Japan's attitude will be conveyed to the public by the utterances of these societies and of their fellow-agitators. An impression will be suggested that Japan entertains the ambition of effecting an union of Oriental States and putting herself at the head of the hegemony for the purpose of checking Occidental aggression. She has no such purpose. All that she desires is the maintenance of the open door in China. Her objection to partition is based on the principle that no Power must acquire within the Chinese empire such authority as will enable it to exclude the subjects and citizens of other nationals from an equal share in the commerce and industry of China. Japan hopes to see China become progressive, and believes that by that course only can the ancient State be preserved as an unit among the nations. She also thinks that China may borrow the elements of progress with special facility in Japan, where they may be said to have been prepared for Oriental digestion. But she does not entertain any ambition such as the writings and sayings of the *Domci-kai*, the *Dobun-kai* and others might suggest to the general public.

MARQUIS ITO.

Marquis Ito, speaking at a banquet given to him by the Metropolitan Club in New York, explained that Japan's recourse to foreign markets for the purpose of selling bonds was in consequence of the outlays involved in carrying on her post-bellum enterprises. She had originally contemplated domestic loans for that purpose, but money could not now be obtained in the home market except at exorbitant rates of interest.

Marquis Ito did well to push that fact prominently into public attention, for Japan's great trouble is that the Occident regards her merely as a borrower, and does not consider the reasons of her borrowing. She consequently figures as an impecunious State, whereas her temporary embarrassments arise solely from the fact that she is diverting a large part of her annual revenue to a capital fund for carrying out exceptional enterprises. It is unfortunate that her statesmen, when they mapped out the *post bellum* programme in 1896, did not more clearly appreciate the nation's financial condition. Had they done so, they would have foreseen that, *pari passu* with the undertakings contemplated by them on the country's account, the country itself would surely project many enterprises of its own, and that domestic resources could not possibly suffice to finance both programmes. We ourselves predicted from the outset that recourse to foreign markets would ultimately be inevitable, but we did not anticipate that Occidental capitalists would be so difficult to convince of the facts of the case.

THE KYOTO HOTEL AFFAIR.

Monday, Oct. 28.

The public are evidently to have a new edition of the old story—a wholly false anti-Japanese statement published by the *Japan Herald* on the strength of irresponsible rumour and then a desperate attempt on the part of that eminently scrupulous journal to conceal its blunders under a mass of polite personalities and vituperation. An element of comicality is imparted to the business by the *Herald's* exquisite English, which is about on a par with Mrs. Flora Finch's monologues. Our good contemporary is troubled with such an unretentive memory that by the time he has penned a sentence of four lines he loses touch altogether of the sequence of his ideas, and becoming desperately hopeless of emerging from the labyrinth, puts a full stop and is done with the matter. Observe these pretty paragraphs for example:—

A recent number of this journal containing the strongly worded and uncompromising letter of an Australian reflecting on some unpleasant Japanese characteristics, and an article about the proposed to be erected Hotel at Kyoto, which project has been abandoned in consequence of native opposition to foreigners being permitted to engage in enterprises likely to be profitable.

The writer denounced, after having wielded the pen for some half a century, without rendering him obnoxious to the charges which the vindictive penman of that spotless and distinctly precious journal has preferred.

These sentences remind us, of Japanese cats; they are without tails; and indeed the *Herald's* performances are altogether in the feline line for they vividly recall what Mark Twain said of the cats on the roof, namely, that they make themselves objectionable not by the racket they produce but the awful grammar they use. Our brilliant contemporary offers, however, a full excuse for his grammatical lapses, and offers it in the weighty and concise style that characterizes all his writings:—"Most of what is held up to ridicule," he pleads, "may be principally attributed to compositors' errors, bad proof reading, and neglected corrections." That is a pretty formidable list. The "neglected corrections" item is specially noticeable because it suggests that our contemporary has taken our advice to heart and will probably advertise for the services of some young lady or young gentleman to "drop in" daily on the way home from school and edit the manuscript of the *Japan Herald* before it passes into the hands of the compositors. It is possible, thus, that "most" of these wonderful blunders will be "principally" avoided. However, these things are of small moment. The main fact is that the *Japan Herald*, after admitting that it never even heard the name of the Society whose private avenue the projectors of the hotel were prevented from using and with whose representatives the projectors were for some time in constant communication, nevertheless has the assurance to insist that its original account of the transaction was correct. Such falsehoods are not calculated to promote the spirit of friendship which the Japanese are accused of not showing. The fact is that every possible assistance was rendered to the projectors of the hotel by Japanese officials and by the Hokokkai. We are not speaking from hearsay. We are speaking from absolute knowledge. The Foreign Office in Tokyo addressed a communication to the Governor of Kyoto, who replied that he was only too anxious to promote the wishes of the projectors and that they might count on his good offices. Subsequently the Honorary Secretary of the Hokokkai, a high official in the Department of Home Affairs, visited Kyoto, and made such arrangements as would have

enabled the projectors to procure land on reasonable terms for building a road of their own. It would not have been as convenient a road as the Hokokkai avenue, nor yet as convenient a road as the Secretary had originally hoped to obtain by purchasing land from a temple; but it would have served well enough, and would have possessed the advantage of being the hotel's sole property. Why the scheme was abandoned at that point we do not know, but we gather from the *Kobe Chronicle* that the projectors imagined they had a legal right to use the private avenue of the Hokokkai, inasmuch as the Civil Code provides that "if land is so surrounded by other land that it has no access to the public highway, the owner of the former land may pass over the latter land to reach the highway." We find difficulty in imagining that the projectors really entertained the view attributed to them by the *Kobe* journal, for the land in question has already, and has always had, access to the public highway. It is true that the access happens to be from a direction inconvenient for the purposes of a hotel and that the road is little better than a lane, but the fact that access does exist removes the question entirely beyond the purview of the law. The Code does not empower a landowner to choose whatever access he pleases, irrespective of the rights and convenience of his neighbours; it merely provides that he must have access in some direction; in other words, that he can not be imprisoned in his lot by the land-owners surrounding him. The plain truth is that the projectors of the hotel made a mistake in not assuring themselves beforehand as to the facilities of access to the land, and it is unjust and absurd to shift the responsibility to Japanese shoulders.

Wednesday, Oct. 30.

At the last annual general meeting of the Oriental Hotel Company, a report of which appeared in our last issue, Mr. A.H. Groom, speaking in his capacity of Chairman of Directors, made the following statement:—

Before much progress had been made, however, the Company's contractor was informed that he could not use the main thoroughfare for carrying material to the ground. This objection was raised by the Hokokkai, Trustees for the Hieyoshi shrine. The Directors then entered into negotiations with the Hokokkai, both directly and indirectly; they interviewed the Governors of Kobe and Kyoto, the Minister of Home Affairs, and other high officials, but in spite of their efforts, the result was most unsatisfactory. Finally a letter was received from the Secretary of the Hokokkai, Mr. Nakane, from which the Directors first learned that the roadway was in the hands of the Treasury Department. The letter went on to say that the right of way would be given, but that no guarantee could be given, as to the length of time it could be granted for, upon payment of 10,000 yen by the Company. It was thus clear that the objection to the use of the road had nothing to do with the sacredness of the shrine, as a money payment could overcome the difficulty. At the same time the conditions offered were of such a nature that no body of business men could think of accepting them. The Directors, seeing that the feeling against the foreign enterprise was so general, and fearing to lock up a large sum in an undertaking that would probably not receive fair treatment decided to abandon the scheme. An unauthorised account of this unfortunate affair has appeared in the *Japan Mail* lately, but the facts are as I have stated.

It is impossible that Mr. Groom can have intended to impugn the facts stated in these columns, for he knows well that those facts are absolutely accurate. Indeed, up to a certain point, we are better acquainted than Mr. Groom himself with the course of the negotiations that took place. His language, however, is calculated to convey the impression of casting doubt upon our assertions, and we therefore think it right to re-affirm the correctness of everything hitherto alleg-

ed in these columns. We now learn for the first time, however, that the *Hokokkai* ultimately waived its objection to the Hotel Company's use of the road, and that it did so in consideration of a payment of ten thousand *yen*. As to the inference drawn by Mr. Groom from that fact a different view suggests itself. He says that the introduction of a monetary question "makes it clear that the objection to the use of the road had nothing to do with the sacredness of the Shrine." That does not follow by any means. The leading members of the *Hokokkai*, though reluctant to see the avenue employed for secular purposes, may have been persuaded to take a different view of the matter if the Hotel Company contributed a donation of ten thousand *yen* to the capital fund of the Shrine. Such an act of generosity would differentiate the Company effectively from any ordinary business concern. There is also another point to be noted. We are informed that the construction of the road originally proved a most troublesome and costly process, numbers of people having to be bought out, and expensive arrangements having been necessary with regard to moving a shrine which stood in the way. These various persons, while consenting to cede their land at reasonable prices for a religious purpose, might not unreasonably object were the road subsequently put to secular uses, and in their case an expenditure of money might be essential. The question was by no means so simple as might be inferred from Mr. Groom's brief statement.

Another point, which seems to have surprised the Directors of the Company as much as it has surprised us, relates to the ownership of the roadway. We certainly gathered most unequivocally that it was the sole property of the *Hokokkai*, and we can only now conclude that in speaking of it as belonging to the *Hokokkai*, the Secretary of that Society meant that, without the *Hokokkai*'s consent, the road might not be used for any purpose unconnected with the shrine. But the discovery that the ultimate title rests with the Finance Department ought to have been welcomed by the Directors, since nothing is more certain than that a Governmental Department would never arbitrarily close a road which had been in use for business purposes during any considerable period. Mr. Groom complains that, even in consideration of a payment of ten thousand *yen*, no guarantee would have been given as to the length of time during which the road would be available by the Hotel. As to that, it should be observed that the Finance Department would have had no concern whatever with the payment of the ten thousand *yen*. The Finance Department's share in the transaction would have been limited to granting the Hotel's application backed by the *Hokokkai*, and the finale of the matter would have been that the Hotel Company would have acquired exactly the same title to the road as the *Hokokkai* has. That ought to have satisfied the Directors, we think. It satisfied the members of the *Hokokkai* when they were about to build that shrine, and it might well satisfy them since it implied almost absolute certainty of tenure for probably two or three hundred years.

What seems to us to call chiefly for comment is Mr. Groom's statement:—"The Directors, seeing that the feeling against the foreign enterprise was so general, and fearing to lock up a large sum in an undertaking that would probably not receive fair treatment, decided to abandon the scheme." Mr.

Groom may have private reasons for that assertion. If so, he does not give them. He rests his case solely on the attitude of the *Hokokkai*. Now the Secretary of the *Hokokkai*, finding that great if not insuperable difficulty must attend any attempt to give to the Hotel Company a right of way over the Society's avenue, himself undertook to find an alternative route, and did actually find such a route, mapping it out and ascertaining that the proprietors of the land over which it would pass, were willing to part with the ground on reasonable terms. Mr. Groom did not mention that fact, but it effectually disposes of the view formed by the Directors that there was "a general feeling against the foreign enterprise." Our own conviction is that Mr. Nakane and all other Japanese, official or private, connected with this affair, worked earnestly and honestly to effect a favourable settlement, and that they will be profoundly astonished at the view taken by the Directors of the Hotel.

Friday, Nov. 1.

The *Japan Herald* says that this journal has "a special mission to make Japan and the Japanese seem good in the eyes of the foreigner—a mission by the way, it is singularly ill-fitted to fulfil." However that may be it is an unquestionable fact that the *Japan Herald* has a special mission to make foreigners seem hateful in the eyes of the Japanese, and that during some thirty-five years it has persistently shown itself singularly well-fitted to fulfil that mission. Not once has it lost an opportunity of putting the worst possible construction upon the acts and motives of the people of this country. Its latest attempt is to represent the *Hokokkai* as having been willing to take a bribe of ten thousand *yen*, and it compares that Society to the metropolitan policemen who could be squared but not with coppers. Such writing is eminently calculated, of course, to promote the smooth prosecution of foreign enterprises in this country. The chairman of the Hotel Company spoke of the Kyoto scheme as definitively abandoned, but from an observation let fall at the meeting some shareholders seem to still entertain hopes of ultimate fulfillment. Most assuredly the comments of the *Japan Herald* are not calculated to further that hope.

EMIGRATION.

Hitherto a limit has been imposed on emigration to Hawaii. A notification of the Home Department forbade that more than 60 persons—irrespective of wives and children—should embark on any one mail steamer. This limit has now been raised to 100. In the case of emigrants to Vancouver also the total veto, issued in August of last year, has been changed to read that anyone possessing a certificate from the Japanese Consul in Vancouver may proceed to Canada, taking with him, of course, his wife and children.

THE MANOEUVRES.

Field Marshal Marquis Oyama is appointed chief of the Umpires Board at the approaching autumn manoeuvres. The members of the Board are, Colonel Prince Kanin; General Sakuma; Lieut.-Generals Kuroki, Oku and Terauchi; Major-Generals Fukushima, Tamura, Iseji, Shibano, Uyeno and Harada; Colonel Noma, and a number of other officers, making in all fifty-one. A large number of applications have been received from persons desiring to attend the manoeuvres.

PRESIDENT ROOSEVELT.

(COMMUNICATED.)

Theodore Roosevelt, who, by the untimely death of William McKinley, has become President of the United States, is the youngest man who has ever held that exalted office, having been born in New York City, October 27th, 1858. He was not yet 43 years of age when he took the oath of office. Gen. Grant was 46 and Grover Cleveland was 47 at the time of their inauguration. If Mr. Bryan, who is two years younger than President Roosevelt, had been elected in 1896 he would have become President at the early age of 36, or just within the limits provided by the constitution, which is 35 years of age. But age is not always a matter merely of years. Roosevelt has been in public life more than 18 years and for the last 16 years has enjoyed a national reputation. The writer well remembers the interest with which he watched his career in the New York legislature where by his able and fearless advocacy of needed reform in the face of machine politicians, he not only brought himself into notice but aided greatly in giving Grover Cleveland, who was at that time Governor of New York, an opportunity to display those qualities of courage, firmness and independence, which led to his nomination to the Presidency. At this time he was quite young, having graduated from Harvard University in 1880 and been elected to the Legislature of New York in 1882. So well known and influential had he become by 1884 that he was recognized as one of the leading Republicans of the State and was one of the four State delegates chosen to lead the New York delegation at the Republican convention held at Chicago in 1884. Two of the four associated with him were George William Curtis, so many years editor of *Harper's Weekly*, and Andrew D. White, at present Ambassador to Germany. With his able associates he made a desperate effort to prevent the nomination of Mr. Blaine. He was unsuccessful, but the earnest, skilful and manly way in which he conducted himself attracted the attention of the whole country and from that day Roosevelt has been a favourite and an object of hope to all those who love honesty and independence in political leaders. After serving three terms in the New York Legislature he retired, and in 1886 was nominated as an independent candidate, and endorsed by the Republican party, for Mayor of New York City. He was probably the youngest man who ever ran for that office. He was defeated, Tammany proving too strong for him. Early in his career in the New York Legislature Roosevelt had purchased a ranch in the far West, in what is known as the "bad lands" of the Little Missouri, a region so wild that he was able to shoot deer from his own veranda. Here he spent a part of every year, and most of his time from 1886 to 1889. He was indefatigable in hunting, study, and writing. He wrote a series of exceedingly clever books on hunting and ranch life, based on his own experience, which are likely to grow more and more valuable as the picturesque life which they describe in such an interesting and vivid manner, disappears. This, however, was not Roosevelt's first venture into authorship. When just out of college he published his "Naval War of 1812," a book which has passed through a number of editions and is recognised as the standard work on that subject by both English and American writers. He began about this time the composition of a work in four volumes entitled

"The Winning of the West." It is a history of the conquest of the great region between the Alleghenies and the Mississippi river. This book is surprisingly thorough, accurate and complete, and has given Roosevelt a permanent place among American historians. In addition to these he has written a number of biographies and volumes of political essays. Altogether he has published some sixteen volumes during the past twenty years. It is not to be supposed that this is all of equal merit or of the highest grade. It is true to say, however, that it is all honest, earnest, vigorous thought, clearly expressed. These books alone are a life's work. Considering the stress under which they must have been composed they are an amazing achievement. In 1889, President Harrison appointed Roosevelt President of the Civil Service Commission. The appointment of Government clerks on the basis of merit as shown in examinations was still on trial and was bitterly opposed by the party politicians. Roosevelt was known to the country as a vigorous advocate of civil service reform, and his appointment was hailed with delight by the independents of all parties. He served six years and fully justified the highest hopes. There were 14,000 clerks under civil service rules when Roosevelt began his work and 40,000 when he retired. But, better than this, the "merit system" was established beyond the power of the spoils-men to overthrow. In May, 1896, Roosevelt accepted the position of President of the Police Board of the city of New York. He did so as a duty. As he himself expressed it "that had become the storm centre of the country." This was literally true and the whole country watched with admiration the manner in which Roosevelt set about reforming what was probably the worst police department in the United States. His term of service was brief, covering only a year, but it was the ablest in the history of the city and was especially valuable by showing what to do and how to do it. When Mr. McKinley became President he invited Roosevelt to become Assistant Secretary of the Navy. As a rule the country does not pay much attention to Assistant Secretaries but in this case the assistant was much more conspicuous than his chief. His extensive knowledge of naval affairs and his great administrative ability had much to do with rendering so nearly perfect the preparation of the navy for the war with Spain. Then in this war Roosevelt found another great opportunity and he put into practice the theories of patriotism and devotion to country which he so earnestly advocated. Resigning his position in the Navy department he organized a cavalry regiment made up of western men largely and many of the "cow-boy" class. Known as the "Rough Riders" this regiment caught the public eye and by its picturesqueness and its achievements became easily the most famous regiment in the war. Although Roosevelt had served for some years in the New York National Guards and had risen to the rank of Captain, he nevertheless had his friend Leonard Wood appointed Colonel and himself accepted the second place. The whole country followed with eager interest the movements of this regiment, which played a conspicuous part from the time they landed in Cuba until the fall of Santiago. Almost at once Wood became brigade commander and Roosevelt had full responsibility for the regiment which he led with conspicuous bravery in a desperate charge up San Juan hill. A few days after the battle he was promoted to the rank of Colonel and

two months later was nominated by the Republican party as its candidate for Governor of New York. The party politicians of the machine were not in his favour, well knowing that they could not use him, but the rank and file would have it so. There was no open opposition and he was triumphantly elected, after having given an exhibition of vigorous political campaigning such as has rarely been witnessed. His administration was conspicuous for thorough going honesty and intelligent reform. He desired to serve another term to complete his work and would undoubtedly have been re-nominated and elected, but there arose a demand all over the country that he should be associated on the national ticket as candidate for Vice-President. This was the genuine desire of the great majority of the Republican party, many of whom would indeed have preferred him for the first place. Roosevelt strove against this desire of the party with might and main and it looked as though he would decline even if nominated, but he could not refuse in the face of such unanimity as prevailed. And now as a result he is President. It reminds us of the fact that Daniel Webster, than whom no man ever desired more to be President, twice refused the nomination for Vice-President, and in each case the man elected President (Zachary Taylor and Wm. Henry Harrison) died in office and the Vice-President succeeded to the office. It is not to be wondered at that Webster refused to be a candidate for Vice-President and that Roosevelt accepted with the greatest reluctance, for it has not been the custom to nominate first class men for the position but to assign it to some follower of a defeated candidate for the higher position. And besides this it is a position of but limited duties. Of the 23 men who have held the office since the present method of election was established, not more than four (Calhoun, Van Buren, Hendricks and Roosevelt) were of presidential stature. It was certainly a piece of rare good fortune that at this time when the United States was destined to lose a President by death, it should have had such a man as Theodore Roosevelt in the vice-presidential chair. In intellect, education and character he is the peer of any man who has ever occupied the office. No President has been better read in American history, or had a more thorough knowledge of the political questions, political methods and politicians of the day, and none has had as good a knowledge of the country as a whole as he. He has moreover a remarkably sound judgment. Americans have confidence that the administration of Roosevelt will be one of which they may well be proud. Honest, independent, energetic, of dauntless courage but modest and most manly withal, he represents the finest type of present day Americans. So much as the above can be said even by

A DEMOCRAT.

EXPERIENCES OF THE WAR.

A trooper in the South African Constabulary writes in these terms to friends in Japan:—

We left Kruger's Dorp at 4.30 a.m. and although our destination was only ten miles away it took us until 5 p.m. to complete the journey. After we had left Kruger's Dorp four miles, we fairly got into the enemy's country, so much so, that the Scottish Horse had to fight a rear guard action the remainder of the way, losing one man killed and one wounded. This of course made our transport wagons very slow in coming up. However we got in safely and immediately began

to prepare ourselves for any possible attack. We had not much time to do it in, but we made the most of it and did what we could. Fourteen men, myself included, were told off to take up a position, a mile away to the right, on a small kopje and stay there all night to act as a flanking party. The night passed quietly enough and the following day we began to strengthen our position. The Boers dug the trenches in the main camp, while the Canadians strengthened their outposts, some of them a mile from the camp, and the one I am writing this in, is nearly two miles away. The Boers continually fired at us while we were building our little block-houses, but beyond scaring the Kafirs, did no other damage. Whenever their fire became too strong the 15-pounders shelled them, and they soon cleared out.

Yesterday (June 20) another man and myself went out on Cossack post about a mile from here, along the same ridge. Of course it was pretty near the Boer position. No sooner had we started out from the block-house than the Boers started to fire their signal guns, and then from every direction you could see them come galloping, and they all collected in one position. It was marvelous to see how quickly they got there, they came in by twos and threes, and took very good care to offer an exceedingly small mark. However there happened to be about 25 of our own men out scouting and they all collected on the same kopje as we, and of course started to fire on the Boers. Some of their shots made the Boers quicken their pace, and also made a good many more make their appearance, but they took no notice of us until they had gained their position and had got under cover. After a while our 25 men left us, and went back to camp again. They had not gone five minutes, before from three different directions, the Mauser bullets began to sing over us. It was impossible to move without hearing the hum of a bullet. At one time I thought they were going to try and take our position: you see there were only two of us on the ridge. However they sent out two more men to us with ammunition, and we fired back, when we could see the Boers. This went on for about two hours, off and on, and then the Boers left their position, with the exception of six men. They must have had fifty there at one time. They made one or two attempts to get on out right, but we fired one or two shots pretty close to them.

We have, so far, not had any actual fighting, it has all been sniping. The Boers lie for us among the rocks and try to trap our Cossack posts, when they come out in the morning, and once or twice they have very nearly succeeded in doing it.

Perhaps the job I like least is sentry go at night in the main camp. The Boers creep up close to the barbed wire entanglement and as the sentry is compelled to walk up and down the whole line they manage to get a good shot at him against the sky line, while it is perfectly impossible to see them creeping up through the burnt grass on a dark wet night. One fellow let drive at me and I tell you his bullet came pretty close, and as I could distinctly see the flash of his rifle I gave him a couple of shots back but missed.

SECRETARY OF THE BRITISH LEGATION.

The news just communicated by telegraph that Mr. Whitehead is to be transferred to Brussels, will be received with much regret in Tokyo, where Mr. and Mrs. Whitehead have rendered themselves widely popular during their residence of three years. These changes come in the ordinary routine of official promotions, but their effect in a small community such as that of the foreign residents of Tokyo is greatly felt.

Sir Brooke Boothby, Bart., the new Secretary of the British Legation, was nominated an Attaché Sept. 23, 1881; passed a competitive examination Jan. 25, 1882; passed an examination in Public Law March 3, 1883; was appointed to Athens Mar. 24, 1883. Was promoted to be a 3rd Secretary

Jan. 25, 1884; and was Acting *Chargé d'Affaires* from Feb. 24 to 28, 1884. Was transferred to Brussels Aug. 13, 1884, where he was acting *Chargé d'Affaires* Sept. 18 and 19, 1884. Was transferred to Lisbon Jan. 25, 1886, and to Rome July 16, 1887. Was promoted to be a 2nd Secretary Dec. 1, 1888; transferred to Vienna Mar. 8, 1889; to Lisbon Mar. 27, 1894; to Munich May 27, 1895 where he acted as *Chargé d'Affaires* from Oct. 18 to Nov. 30, 1895, and from May 14 to Aug. 1, 1896. Transferred to Paris Dec. 4, 1886, where he acted as *Chargé d'Affaires* from July 12 to 15 1898. Promoted to be Secretary of Legation at Rio de Janeiro Dec. 19, 1898.

RUSSIA IN NEWCHWANG.

Russia in Newchwang has evidently appreciated the fact that the strong hand is the winning hand in Chinese politics now-a-days. The Shanghai correspondent of *The Times* sends to that journal copies of proclamations issued by Russian officials in Newchwang and Liaotung. We have already alluded to these proclamations, but it is worth while to reproduce them *en bloc* for the sake of the evidence they furnish that Russia knows how to take advantage of a situation created by the energy of her own people or the supineness of her rivals:—

As this port has now reverted to the control of the Imperial Russian Government, all you who have matters in dispute and the like should bring your petitions to the superintendent's or other Government offices, where redress can be obtained and cases settled in perfect justice and impartiality.

Of late, however, there have been frequent instances of native merchants and people who have disputes on hand, instead of coming straight to the superintendent's yamen for justice, they pray for assistance from foreign merchants of other nationalities or go to missionaries, plainly showing by such conduct gross ignorance of the fact that merchants of all nationalities come simply to trade, and nothing else, whilst the sole duty of missionaries is to disseminate the tenets of their respective religious faiths. Each has his duty to do peculiar to his own profession; but none of the above-mentioned people possess authority to interfere in other people's affairs, which is the prerogative of the Russian Imperial Government.

You people are therefore hereby warned that, from this date onwards, whenever you have disputes, no matter what they may be, you must come for redress and settlement either to this yamen or to the Judge's yamen, or to the police-station; you are forbidden from again appealing for help to foreign merchants or missionaries. By doing so you cannot obtain any advantages, but instead you will incur the displeasure of the authorities and render yourselves liable to suspicion.

If, after the issuance of these presents, there be found any person disobeying this proclamation, I will surely punish the delinquent severely and will exercise no mercy. Tremble! Be most careful! Do not say by-and-by that you have had no notice! A Special Proclamation.

The second proclamation by the same official affords still more curious reading, for it deals with a strike for higher wages among the *employés* of the oil factories under the leadership of a certain Wu Wang-tze:—

Now, according to the laws of Imperial Russia, the leaders of any movement—such as causing a general strike, a stoppage of labour, or closing the market and shops—are sentenced to the same punishment as those guilty of rebellion, whilst their followers are also punished very severely. I, the Superintendent, therefore have on the one hand given orders for the arrest and punishment of the said Wu Wang-tze, the leader of the said strike, and those with him, and now issue the present proclamation calling upon all *employés* of oil manufactories to resume work to-morrow morning at the latest. Should any one disobey my commands he will be instantly arrested and most severely punished. He will then, finally, be banished from the precincts of this port and will not be allowed to linger a single moment in Ying-kou.

Let all, therefore, carefully obey this proclamation. Do not transgress!

"GERMAN."

"German" has again addressed the *Japan Times* in reply to comments contained in this journal. That is a curious method of conducting a discussion, but we presume that "German" has special reasons for concealing his identity from the editor of the *Japan Mail*.

The first point he makes in his rejoinder to our last note relates to the placing of prominent Boer prisoners on British trains so as to secure the latter against being wrecked. We asserted that such a step had not yet been taken, and "German" now replies by a quotation from *The Times* of September 9th, where it is alleged that "in future" the most prominent Dutchmen are to be selected to "accompany passenger trains running through dangerous districts." Truly we can not compliment "German" on ingenuousness. When he made his original allegation, *The Times* of September 9th can not have been in his possession, and therefore his assertion as to the placing of Boer prisoners on trains must have been pure speculation. He is not to suppose, however, that we condemn such a precaution. We do not condemn it by any means. There may be room to doubt whether it should be resorted to in the case of military trains. *The Times* speaks of "passenger trains," and in their case it seems to us that there can be no manner of question as to the propriety of the precaution. Military trains, however, belong to a somewhat different category and we can understand that certain critics might have scruples against protecting them by such a device. But, for our own part, we are distinctly of the opinion that when the wrecking of trains is practised by one side in a war, it is altogether fair that prisoners should be used as a means of safeguarding the other side against such a manoeuvre. The prisoners are not exposed to any risks greater than those their captors run, and have no just reason to complain because their services are utilized in that way. If the English regarded the measure as "a heinous crime" in 1870, we think that they showed want of judgment. But until "German" proves that they did so regard it, we must claim the right of remaining sceptical.

"German" then criticizes Lord Kitchener for describing his weekly tale of Boer killed and wounded as "a bag," and condemns a cavalry officer who compared the killing of the enemy at Elandslaagte to "pig-sticking." We venture to allege that nine hundred and ninety-nine Englishmen out of every thousand equally condemn the use of such terms, but are not so foolish as to attach any deep meaning to them, or so ignorant as to imagine that the rare employment of indiscreet language by one or two officers indicates the prevalence of a merciless mood among the British troops or the British public in general.

But, after all, we come back to the great question, what is the conduct on the part of British generals and British soldiers which the Germans have been condemning for months back in the most scathing and vehement terms? What have the English done in South Africa that they should be written of and talked of as though they were cruel savages? We asked "German" to answer these questions, and his reply is that two years ago an English officer spoke of the lancing of men in a cavalry charge as something comparable to pig-sticking; that Lord Kitchener has employed the indiscreet term, a "bag" of Boers, and that an English paper

has described the killing of Colonel Vande-leur as "murder." These, forsooth, are the justifications advanced for one of the bitterest and most inveterate campaigns of abuse and condemnation ever conducted by any nation against a people with whom it is on nominally friendly terms.

CHINESE NEWS.

Saturday, Oct. 26.

The *Fiji Shimpō's* Peking correspondent telegraphs that the object of Russia in seeking to conclude an agreement about Manchuria is to render the time of her evacuation uncertain and to obtain control of any Chinese troops stationed there. He adds that the Chinese Government has detected this design. Indeed it is not quite easy to see why there should be any documentary agreement at all. Its only effect would be to extend recognition to Russia's occupation of the district.

Monday, Oct. 28.

The *Asahi* has a telegram saying that the Empress-Dowager refuses to accede to the suggestion of Prince Ching and Viceroy Li, and has determined to celebrate her birthday in Kai-fong.

It is now alleged that there is a Court intrigue against the appointment of Governor Yuan to the Viceroyalty of Chili, and that he will give up the governorship of Shan-tung.

The Court will not arrive at Kai-fong until the 31st instant, according to the latest intelligence. That is a delay of only 3 days compared with the original programme.

There is said to be strong opposition in Chinese official quarters to the Manchurian Agreement, especially to the clause providing for the training of the Chinese troops in Manchuria by Russian officers.

Thursday, Oct. 31.

Russian officials seem to have shown great energy in repairing the extensive injury done to the Manchurian railways by the recent floods. A telegram to the *Asahi* says that the lines have been completely restored and that trial trips were successfully made over them on the 26th instant.

In this context may be mentioned another piece of intelligence telegraphed to the same journal, namely, that the Russian Government has ordered that any men now serving in Manchuria whose time expires at the close of this year, shall be sent home, and that reliefs will not be sent from Russia.

According to the *Asahi Shimbun*, the total outlays incurred by Japan in connexion with the Chinese complication up to the end of March last—i.e. the end of the last fiscal year—were 22,815,090 yen. Distributed among the various Departments, these outlays stand thus:—

	YEN.
Foreign Department	177,756
Home Department	11,526
Finance Department	170,855
Naval Department	5,589,911
Army Department	16,780,093
Communications Department ...	84,949

22,815,090

Of this total, twenty million yen was taken from the Naval Capital Fund and the remainder was paid out of ordinary revenue. Of course the expenses incurred subsequently to March have still to be published. They will doubtless represent a large sum, as the operations may be said to have been con-

tinued until June, and the cost of bringing back the troops has to be included.

The *Universal Gazette*, of Shanghai, publishes the following list of amounts which each of the nineteen provinces will be required to pay between 1902 and 1910 towards the liquidation of the Indemnity China has to pay to the Foreign Powers on account of the disturbances in the North last year:—

	Tls.
Chibli	800,000
Kiangsu	2,500,000
Anhui	1,000,000
Shantung	900,000
Shansi	900,000
Honan	900,000
Shensi	600,000
Kansu	300,000
Chinese Turkestan	400,000
Fukien	800,000
Chékiaug	1,400,000
Kiangsi	1,400,000
Hupeh	1,200,000
Hunan	700,000
Szechuan	2,200,000
Kuangtung	2,000,000
Kuangsi	300,000
Yunnan	300,000
Kueichou	200,000
Total Tls.	18,800,000

It will be observed, remarks the *North China Daily News*, that Kiangsu is considered the richest province, having to pay Tls. 2,500,000 as its share in the nine instalments, whilst Kueichou province is the poorest, being required to pay only Tls. 200,000.

A WORD ABOUT THE LOOT QUESTION.

Sir Robert Hart has placed on record his views about the looting question, and they certainly deserve perusal:—

Looting has evoked much discussion. It has had its uses and abuses. Tar is the right thing when in the right place, and perhaps so, too, is loot. But when the tar-brush is spoken of, it oftener suggests the idea of dirt than of matter in the right place. During the siege we looted neighbouring houses; we thereby got food to live on and materials to make sand-bags with. After the siege, we had to find quarters for ourselves, and we had to furnish them. And we had to find food for ourselves and for the Chinese connected with us. If we occupied other people's empty houses, if we collected necessary furniture from other people's deserted houses, and if we seized and used food at points where there was nobody in charge to buy it from, it was because necessity forced us to do so, a necessity that grew out of such lawless doings as temporarily swept away all possibilities of living according to law. Charitable interpretation will recognise the plight we were in, and acknowledge the fitness of the effects produced by such a cause.

All the same, it is possible that much more was taken than was required: and to whatever extent that was done, to that extent might appropriation be objected to. The question is, of course, complicated by considerations suggestive of ideas of reprisals, prize-money, and sacking, and considerable latitude is allowable. The flight of a terror-stricken population may or may not constitute a valid reason for regarding the rights of ownership as ended. For my part, I should have preferred protection for deserted houses, and the restoration of their property intact to returning families.

For some days after the relief, license, as inevitable, ruled, and one thing may safely be said—the missionary was at all events not worse than his neighbour: the probability is that he was better, and the certainty is that for whatever he did he had better reasons and more justification than others.

And yet, just because he was a missionary criticism was all the more pointed.

Whoever pleads necessity and helps himself to other people's goods must first of all show very unusual circumstances to be entitled to a hearing; and each appropriation must then be judged of on its own special merits. I have no doubt the missionaries who had thus to help themselves did so with a clear conscience, and their critics would hardly have acted otherwise under the circumstances. Still there was looting—looting of every kind—justifiable and unavoidable, and also avoidable and unjustifiable—and looting has a bad name, and the reproach of it sticks.

Apart from the exhilarating, but demoralising, effect it may have had on the Chinese members of their churches, I do not think that Chinese sufferers will make any special distinction as regards the foreigners concerned. They will simply say: "Foreigners looted." But non-Christian Chinese are said to be very wroth over the indignities put on them by them for the moment triumphant—converts, and the losses they attribute to their initiative and their growing greed.

One name has been much spoken of, and written about in this "looting" connection. I allude to Dr. Ament. Before the siege began, it was Dr. Ament, single-handed, who ventured down to Tungchow, fifteen miles from Peking, and brought up the missionary community that would probably have perished there had it not been for his plucky, timely and self-sacrificing intervention. During the siege Dr. Ament turned out with the rest of us, rifle in hand, when that horrid bell called on us to muster and, perhaps, make a last stand for women and children. And it was Dr. Ament, too, who was set apart by the Legation authorities to take charge of whatever looted property was brought in for the use of the Legations—a tribute to his honesty and capacity. Later on, it was Dr. Ament who, like or with his colleagues, with no house of his own to return to, took refuge in the palace of a prince known to have played a leading part in the destruction of the missionary premises with which Dr. Ament was connected—a very righteous "tit-for-tat," and approved of, I believe, by his national officials. Still later, it was again Dr. Ament who courageously ventured outside of and away from Peking, to inquire into the condition of converts at various points, and with the support of officials, arranged in an amicable manner for compensation for injuries and losses.

First and last, and all through, Dr. Ament did excellent work; and I am sure personal gain, personal profit, and personal considerations never weighed with him in the slightest. But he stood on delicate ground, and—it is easy to throw stones! To my mind it would have been better for missionaries to have left the righting of wrongs to those in authority. But the times were out of joint, everything was anomalous, and some one, evidently, had to go to the front; it was the need—the duty of the minute—that had to be attended to, and perhaps the wonder is that there is not more to find fault with!

All this is pretty much what we have ourselves said on the same subject. Before condemning people for looting the question has to be determined, when did the direct results of the siege come to an end. If it was legitimate to take property from the Chinese during the siege in order to further the work of defence or to support the lives of the besieged, why was it not legitimate to continue the process until all the privations immediately consequent on the siege had ceased? Nothing can be more illogical to our mind than to say that while a man is under actual attack by an enemy, he may despoil that enemy for the purposes of self maintenance, but that the moment the attack ceases, no matter to what straits it may have reduced him, he must respect everything left behind by his defeated and fugitive enemy. There is certainly legitimate looting and illegitimate.

In connection with this subject we may refer to the writings of the German press with regard to the astronomical instruments carried away from the wall of Peking by the German troops. It does not appear that public opinion in Germany condones or justifies that act for a moment. The condemnation seems to be universal, and we have no doubt that in deference to such unanimity of view the instruments will be restored to their old place and to their rightful owners. If so, the credit of the restoration will far outweigh the discredit of the original act. It is a hard thing for a nation to acknowledge a wrong and still harder to redress it.

THE DIET.

It is alleged that the Diet will be convened for the 6th of December. If so, the notice must be issued immediately in order to allow the legal interval of 40 days. Recently, rumour indicated the 22nd or 23rd of

December as the most probable date, but since that would mean the postponement of all business until next year, the Cabinet seems to have adopted an earlier day. Meeting on the 6th, the Houses would complete their organization by the evening of the 8th—the 7th being Sunday—and the official opening would take place on Tuesday 9th. There would thus remain just 16 days before the rising of the Houses for the New Year's recess, and since the Budget Committee's report must be presented within 15 days from the time when it is placed in their hands, the most important work of the session might be concluded, so far as the House of Representatives is concerned, during the present year.

The Diet is convened for the 7th of December, which will be Saturday. We presume, therefore, that the official opening will be on the 10th of December.

GERMAN NOTES.

It is alleged that Germany is seeking to obtain from the Sultan a lease of Farsan Island in the Red Sea for the purposes of a coaling station. The matter is kept secret, but confident statements on the subject are circulating in Paris.

The city of Berlin contributed £5,000 to the Virchow Foundation by way of celebrating the birthday of the eminent investigator.

There are many complaints about the increase of rents in Berlin. A few months ago, the Government made an addition to the salaries of teachers and minor officials in order that they might be able to meet the greater cost of living under the circumstances, but they still complain that they are inadequately paid.

Herr Kaufmann has been re-elected as Second Burgomaster of Berlin by 104 out of 124 votes.

The *Times'* correspondent at Salonika reports that the Deutsche Levante Linie has bought, for £105,000, the Courtji Steamship Company's fleet of 20 vessels, and that now for the first time will be seen a fleet of German vessels carrying on the Turkish coasting trade under the German flag.

The German autumn manœuvres were interrupted by rain on the second day. Two army corps were taking part, and the plan of operations was an invasion of Prussia by troops having the support of a naval squadron in the Bay of Danzig. This coöperation between the navy and the army was regarded as a specially interesting feature and the interruption of the manœuvres caused correspondingly keen regret.

A STORM.

Riukiu and Oshima were visited by a severe storm on the 29th ultimo. Some boats were wrecked and three or four houses were overthrown. The advent of this storm was foreseen by the meteorological authorities, but as there appeared to be little chance of its invading the mainland, they did not warn any of the central districts. The heavy rain on the night of the 29th and 30th may be regarded as Yokohama and Tokyo's share in the phenomenon. The whole of October, indeed, was unusually disturbed from a climatic point of view. In return apparently, for dispensing with the perennial typhoon, the clerk of the weather allotted ample compensation in the shape of rain.

THE PROGRESSISTS.

The Special Examining Committee of the Progressist Party has submitted to the General Examining Committee a list of propositions as materials for the Party's platform. Among them the most important seems to be that on the expiration of the five year's term originally fixed for imposing an increased rate of land tax, the former rate shall be reverted to, but, at the same time, the local land rate shall be increased, so as to provide funds for local purposes. The Progressists were always vehemently opposed to this increased land rate, and even after the bill had passed the Diet, they endeavoured to keep the subject before the public. Apparently, however, popular opinion could not be roused, which is not surprising seeing that the agricultural class, upon whom the land tax falls, are unquestionably prosperous, and have good reason to be content with the lightness of their fiscal burden. The Progressist leaders were then understood to take a different view of rural conditions. Some of them spoke with much feeling about the hardships of the farmer's life, and drew a picture of him plodding to his heavy toil while the stars were still in the sky and dragging his weary feet home after the moon had risen. If all that was sincere, we do not see how the Progressists can now consistently advocate an increase of the local land tax in lieu of reversion to the former rate of national tax. On the other hand, the question of local taxation certainly merits attention. The sums collected in the communes have practically doubled during the past six years, and though the people are well able to bear the impost—which, in fact, is fixed by themselves—it would be a satisfaction to the public to see the whole matter carefully investigated.

The Committee further declares that Japan must increase her navy up to the full limits of her financial capacity. Unfortunately that is true. Unfortunately the immaculate civilization of the twentieth century decrees that every nation must spend a great part of its resources and devote many years of the lives of its bread-earning population to the business of getting ready to fight or to be fought with. Japan can not enjoy exemption from the universal mania. But if she is to increase her navy, how can she at the same time decrease her national taxes? When her *post-bellum* programme is completed, she will find herself in a very comfortable financial position, supposing her present system of taxation remains unaltered. She will find herself with an annual surplus of revenue amounting to some thirty million *yen*. Out of that surplus she could pay for a moderate increase of her navy, or could at any rate maintain it at its present strength. But so soon as she begins to cut down the taxes, naval expansion and naval maintenance vanish from the field of possibility.

There are other planks in the new platform but their vagueness deprives them of all practical interest. The public can no longer be roused to a white heat of excitement about administrative reform, the establishment of party cabinets, or the adoption of an undefined "strong foreign policy."

Nevertheless, signs of renewed activity on the part of the Progressists will be heartily welcomed. Count Okuma has wisely said that nothing can be worse, from a political point of view, than the absence of opposition. It has seemed of late that Japan was likely to be condemned to that *ultima Thule* of disadvantage, but the Progressists may save the situation.

THE KIUSHIU MEDICAL COLLEGE.

The Budget for next year contains an appropriation for establishing a new Medical College in Kiushiu. At first it was supposed that Fukuoka would be the site of the College, but at present the plan seems to be that the Special Medical School now maintained by the prefecture of Nagasaki should be converted into a State Medical College. The public will probably hear a good deal about competition between Nagasaki, Fukuoka and Kumamoto for the honour of being selected. Meanwhile the *Nichi Nichi Shimbun* opposes the project altogether. It admits that there is much need of larger accommodation for medical students in the Imperial University, but it denies that the pressure would be relieved by establishing a college at Nagasaki, or Fukuoka, inasmuch as students would not go there. They will not go even to Kyoto. It was supposed that parents living in the central districts of Japan would all be greatly pleased to have the opportunity of sending their sons to Kyoto, just as though a Kyoto University had not been established. The case will be worse with Nagasaki or Fukuoka, our contemporary thinks, and it therefore advocates a large increase of the accommodation at the Tokyo University instead of spending money on founding a college in Kiushiu.

That may all be very true so far as it goes, but the question remains, to what point is the centralization of education to be continued. Japan can not reconcile herself to having one University only and one set of affiliated colleges, all in Tokyo. It is quite natural and indeed inevitable that in view of the superior equipment of the Tokyo University and the reputation it has acquired, students should flock thither in preference to attending colleges in other towns, comparatively provincial. But it will not be always so, and strong efforts must be made to prevent it from being always so.

THE SLUMP ON 'CHANGE.

Shares and stocks still continue to show a downward tendency in consequence of the failure to sell bonds in New York. The quotations on the 29th of October, as compared with those on the 19th, were as follows:—

Name of Company.	Quotation on 19th Oct. in Yen.	Quotation on 29th Oct. in Yen.	Fall in Yen.
Nippon Tetsudo.....	72.10	70.00	2.10
Sanyo Tetsudo	53.30	52.50	.80
Kwansei Tetsudo	38.85	37.20	1.65
Kiushiu Tetsudo.....	53.90	52.10	1.80
Tanko Tetsudo	81.80	74.30	6.50
Kyoto Tetsudo	22.60	19.55	3.05
Densha Tetsudo.....	120.85	112.00	8.85
Yusen Kaisha.....	75.10	69.25	5.85
Toyo Kisen Kaisha	28.80	25.84	2.95
Kanegafuchi Boreki Kaisha.....	43.05	35.30	7.75
Shokin Kabushiki-tori-hikijo	69.00	55.60	13.40
Tokyo Kabushiki-tori-hikijo	168.30	142.00	25.70

These figures show what a thirst there is in Japanese business circles for the introduction of foreign capital. The sum in question is only five millions sterling, yet so keen is the demand for money and so limited the banks' capacity for granting compensation, that the share market is sensibly affected by the fate of this comparatively petty transaction. Of course things will soon right themselves. The steady inflow of gold from abroad owing to a favourable balance of trade; the excellent harvest, and the resumption of trade operations with China owing to restoration of peace, will all pro-

duce a wholesome effect upon the situation.

It was supposed that the Government's recently announced sale of bonds in the domestic market signified merely a transaction with the Bank of Japan, but it now transpires that 16 million *yen* worth of the bonds were sold to the Postal Savings Bank.

KOREA.

Monday, Oct. 28.

A telegram in the *Jiji Shimpō* says that there had been a verbal agreement between the Korean Minister of Foreign Affairs and Mr. Hayashi, in the sense that the veto on the export of grain should be withdrawn two months after its issue. The 26th inst. was the termination of that period, but no sign was shown of withdrawing the veto. On the contrary, opposition to its withdrawal had grown in official circles, and no prospect offered of action in a sense favourable to Japan. The sender of the telegram adds that it is regrettable that Mr. Hayashi did not obtain a written agreement instead of contenting himself with a verbal promise in such an important matter.

Several instances of violent conduct on the part of Korean soldiers are reported. Japanese subjects appear to have been the principal victims, but it is alleged that other nationals also have suffered and that there is much dissatisfaction in Seoul on the subject. The Korean braves in Pyōng-yang are showing a similar disposition. Mr. Hayashi, the Japanese Representative, is said to have preferred a formal complaint.

Wednesday, Oct. 30.

With regard to the frequent outrages committed by Korean soldiers against the persons and properties of Japanese subjects in Korea, outrages which have elicited constant but fruitless complaints from the Japanese Representative in Seoul, the latter is now said to have issued an instruction to his country's Consuls in Korea directing that in future they shall themselves apprehend and punish all Korean soldiers offending in such a matter. Tokyo journals describe this action as an extreme step necessitated by the complete indifference of the Korean authorities to all complaints emanating from foreigners and to any demonstrations made by the latter's vessels-of-war. It is indeed an extreme step, since it amounts to nothing less than a public declaration that Korean officials are incompetent to discharge their functions and that the duty must be taken out of their hands.

Friday, Nov. 1.

The Korean Minister of Foreign Affairs, Mr. Pak, is coming to attend the military manoeuvres in Japan in his capacity of a general officer. This will probably be the first instance of a Cabinet Minister's appearing in such a role.

Telegrams from Seoul say that the Korean Government has agreed to withdraw the veto upon the export of grain, and that the resumption of commercial transactions will be announced to take place from the 15th of November. It is stated that Mr. Hayashi, the Japanese Representative in Seoul, brought very strong pressure to bear on the Government in order to procure the removal of the veto from the 1st of November and that the Government reluctantly agreed to concede what was desired from the 1st of December. Mr. Hayashi, however, persisted in his application, and it was finally agreed to "split the difference," the date thus becoming Nov. 15th.

ROADS IN TOKYO.

A correspondent of the *Japan Times* expresses surprise that crushed stone is not used instead of gravel for road making and road-repairing in Tokyo. That is a point that has been repeatedly noted in these columns. There can be no doubt that if crushed stone were easily available, Tokyo would have had excellent roads long ago. But the chief difficulty is the want of such stone. It can not be obtained, we believe, from any place nearer than Boshu, and of course the expense of bringing it thence would be prohibitive. Under such circumstances it is hardly just to accuse the municipal authorities of dishonesty because they employ gravel. Mr. Gervas Holmes has written a great deal on the subject of roadmaking in Tokyo, has given some excellent advice and has offered to direct and superintend the laying down of any street assigned by the authorities for the purpose. But we do not understand that Mr. Holmes purposes to indicate the method of obtaining materials. His programme is limited to showing how the materials should be used to the best advantage. Where, however, is stone to be obtained for crushing? If that question could be satisfactorily answered, the road problem would be brought very close to solution.

NOTES ON CURRENT EVENTS.

Speaking at the Hatsuka Club, Count Matsukata gave much wholesome advice to his countrymen. He reminded them that Japan's fleet had been acquired mainly with the proceeds of the Indemnity, and not by means of money put up by the nation in the ordinary way. The life of a man-of-war, however, was limited; not many years hence they would have to face the problem of renewing these ships. That was a matter that gave constant concern to thoughtful men. His Excellency spoke also of the hopelessness of seeking to educate a spirit of practical economy among the people so long as they could not rely upon the savings banks to keep their money safely, and he dwelt upon the want of credit of Japanese merchants, insisting that nothing militated more seriously against the import of foreign capital. Above all, Japan must endeavour to develop her resources with the hope of becoming self-supplying. There was plenty of margin for development. What was most needed was technical education. The Count also avowed his conviction that the establishment of a steel factory was essential.

We read in the *Chingai Shogyo Shimpō* that the project of forming a kerosene oil trust in Echigo has been revived. An attempt to organize such a trust was recently made, but it proved a failure owing to the opposition of the Nippon Sekiyu Kaisha. Apparently the promoters of the movement are meeting with greater success on the present occasion. They are said to have secured the coöperation of the 69th Bank in Nagaoka, and to be thus sufficiently furnished with capital. This project is reported to be inspired by a desire to oppose the International Oil Company, whose operations are assuming formidable dimensions. If that be the case, a strange inference is suggested. The Japanese profess to be extremely anxious to have foreign capital brought to their country, but so soon as a foreign firm comes and, combining with Japanese, spends large sums to develop the country's resources, they form a coalition against it. At that rate what they

want is to have money handed to them by the confiding foreigner in order that they may enjoy the pleasure and profit of expending it while keeping him at arm's length and allowing him only a minimum of benefit. We trust that the *Shogyo Shimpō* is wrongly informed.

In connexion with the consecration of a shrine in Formosa to the memory of the late Prince Kitashirakawa, the widow of His Imperial Highness had contributed a sum of five thousand yen to charitable enterprises in the island.

There are persistent rumours that a very large number of Chinese students may be expected to arrive in Japan within the course of the next few months. The *Kokumin Shimbun* is positive on the subject, and speaks of arrangements that are being made for the reception of several hundred.

We understand that Messrs A.S. Rosenthal & Co. are in receipt of cable information to the effect that the decision of the U. S. Treasury Solicitor entirely vindicates their firm, that the goods which were seized have been returned, and that the firm have been reimbursed all outlays to which they were put in the matter.

The Emperor, with the thoughtful liberality that always distinguishes him, has sent sums of money to the people who may be supposed to have incurred expenses on the expectation that His Majesty would attend the Guards' Manœuvres. He has sent 1,000 yen to the Kencho of Gumma, 500 yen to the Takasaki municipality, 300 yen to the Maebashi municipality, 300 yen to the officials of Gumma Kencho, 300 yen to the Female High School of Maebashi, and 50 yen to the *Rinko-kaku*, which is presumably the place where His Majesty was to rest en route.

The celebration of Yale's Centenary seems to have been a most brilliant affair, as indeed might have been expected. Degrees were conferred on Marquis Ito, Dr. Hatoyama and Dr. Nakajima Yeiichi, Professor of Engineering in the Imperial University. Marquis Ito's speech related to the development of constitutional institutions in Japan; Dr. Hatoyama made a scientific comparison of the Japanese Codes with those of France and Germany; and Dr. Nakajima spoke of the history of the Imperial University of Japan.

The *Kokumin Shimbun* and the *Chino Shimbun* assert that an order has been given by the United States Government to the Uraga Dock Company to build a small fleet of gunboats for use in Philippines. By the former journal the number of vessels is put at 6, by the latter at 10, but both are equally positive that the order has been given, and they say that Professor Sakurai Shozo has gone to America on business connected with the order. The ships are said to be 200 feet long and to have a displacement of 500 tons.

The Osaka branch of the *Kenseihon-to* has adopted the wise resolution that the Party should revert to its old name, *Shimpō-to* (Progressists) instead of adhering to the hybrid term *Kenseihon-to*. It was further resolved that the progress of affairs in Manchuria should be carefully observed, and that the Manchurian convention should not be suffered to assume a character detrimental to Japan's interests. Mr. Inugai Ki delivered a speech, in the course of which he emphatically denied that any agreement ex-

isted between the Cabinet and the Party. He maintained that the first desideratum of the time was to increase the membership of the Party, and with that view he advocated energetic canvassing in preparation for next year's general elections.

The export of silk this season has been exceptionally large. Up to the 20th instant the total sales amounted to upwards of 54 million yen. The biggest year since the commencement of the trade was 1899, when the export reached 63 million yen. It is not impossible that that figure may be equalled by the end of December. The value of the trade last year was 44,627,189 yen. In the following table the figures for each month are shown:—

Month.	Yen.
1	4,817,107
2	6,323,458
3	5,841,256
4	6,321,514
5	6,433,002
6	3,451,822
7	2,801,221
8	8,104,516
9	6,590,094
10	4,003,935 (to 20th of Oct.)
	54,687,925

There is some dissatisfaction in Hawaii on account of the experiences of the islanders under American rule. On the 3rd anniversary of the act of annexation, August 12th, only one of the Hawaiian journals made any allusion to the event, and that one, the *Volcano*, wrote:—"The three years of so-called American rule in Hawaii has been a damnable disgrace to every Hawaiian who loves his country and his country's flag." The *Volcano* is bitterly hostile to Governor Sanford B. Dole, and that, perhaps, accounts for its discontented mood. Unfortunately for the reputation of the press, every one knows, now-a-days, how unsafe it is to conclude that because a newspaper uses condemnatory language there is really anything to condemn. So far as we can gather from the *Volcano's* article—which for vehement outspokenness is not unworthy of the paper's name—the basis of criticism is that the privileges of self-government have not been extended to the Hawaiians in as full a measure as they would enjoy them in the United States.

It is alleged that the prefectural system is to be abolished in Formosa, and the organization of the *Bennusho* extended. There are at present three prefectures, Taipeh, Taito and Tainan, and their abolition is expected on the 1st of November. Probably it is found that administrative decentralization is not the best policy for Formosa at present.

This debating society has just held a meeting in Tokyo which was attended by some 2,000 persons. Mr. Oishi Masami delivered a speech, two hours long, on his favourite topic, the necessity of an Anglo-Japanese alliance to check Russian aggression in the East, and the necessity of organizing a Japanese Cabinet with a strong and fixed policy. Other speakers attacked the present Cabinet.

The Emperor is to visit the Shokonsha Shrine on the 2nd of November, in order to be present at the dedication of the shrine which has now at last been completed, and to worship on behalf of the officers and men that lost their lives in the China campaign.

The *Hashidate*, which recently returned from a six months' trip as a training ship to

British, American, Russian and Chinese ports, is to be fitted with a new kind of water-tube boiler invented by a Mr. Miyahara. This boiler has been used in some mercantile steamers, and has been found very successful, but its employment in a man-of-war will commence with the *Hashidate*. The *Hashidate's* sister-ships, the *Matsushima* and the *Itsukushima*, steel cruisers of 4,278 tons displacement, are fitted with the Belleville boilers, so that the new Miyahara boiler will be in good company.

His Excellency Count Arco-Valley gave a banquet at the Imperial German Legation on Monday evening in honour of Admiral Kirchhoff, commander of the German Squadron in the Far East. The Minister President of State, the Minister of State for the Navy and other prominent Japanese officials were present. After dinner a *soirée* took place, and was the occasion of the first dance of the season, music being provided by the excellent band of H.I.G.M.S. *Hansa*.

The *Fiji Shimpō* publishes a telegram from Nagasaki saying that, pending repairs to their vessel, 150 German sailors have landed and formed a camp, over which sentries are posted with fixed bayonets. It is added that one of the men having committed an offence, escaped to the camp whither the police could not follow him, and that the whole business is exciting much comment as a violation of Japan's sovereignty. But it must of course be assumed that the Germans did not land without full permission from the Japanese Government. Our contemporary's telegram was probably sent by some one ignorant of the details.

The Emperor is to leave Tokyo on the 6th of November for the scene of the autumn manoeuvres. The Imperial train will start from Ueno at 8 a.m. and is expected to reach Sendai by 4 p.m.

There has been an exceptional slump in British consols. A telegram received by the Specie Bank on the 29th instant, says that the latest quotation was £91 17s. 6d., a figure such as had not been reached for several years. Japanese securities have experienced the depressing influence, whatever it may be. The five-per-cent. are quoted at £104 5s. 0½d., and the four-per-cent. at £76 2s. 6d.

Count Inouye seems to have met with a nasty accident during his recent visit to Hokkaido. Riding to inspect a mine, his horse fell with him, and he received a hurt on the shoulder which caused him much pain. He was able, however, to resume his journey, and not until he returned to Tokyo did he seek a medical opinion, when it was found that the injury might have proved quite serious had not the Count's health been good.

Russia is reported to be about to establish a consulate at Chemulpho, and to have applied to the Korean Government for an allotment of land. Considering how often her ships-of-war visit that port, it certainly seems desirable that she should have a consulate there.

Yamagishi Sadakichi, living at Tori Aburacho, Nihonbashi, and a former *banto* named Uchiki Yasobei, were arrested by the police on the 30th ult. charged with having forged sixty-one shares to the value of yen 7,000 in the Yoshikawa Tokusaburo, a cotton shop at Yanagiwara, Kanda, which they sold for yen 3,000 to share brokers.

FRENCH NOTES.

The papers to hand by last mail are filled with long descriptions of the Tsar's visit to France. It seems to be agreed that graceful and hospitable as were France's preparations and her manner of welcome, her prime purpose was to convince the Russian Sovereign of the strength and absolute preparedness of her army and navy. Doubtless she succeeded. The display of artillery, notably quick-firing guns, is believed to have been something quite exceptional, though no details are publicly known.

The moment that the Tsar and Tsaritzza set foot on French soil, six thousand carrier pigeons were dispatched to carry the tidings of the landing. It is related that for a few minutes a cloud of grey and white circled over Dunkirk.

The only contretemps appears to have been at Compiègne, where tens of thousands of people arrived expecting to find shelter and food, but found neither the one nor the other, and found also that there would be no chance of seeing any thing of the Presidential and Imperial party as all the railway carriages were rigorously guarded.

Venezuela is attempting once more to resume diplomatic relations with France. She broke off intercourse in 1895, in consequence of having learned through an Italian Green Book that the French *Chargé d'Affaires* at Caracas had proposed to his colleagues a course which the Venezuelans found objectionable.

The Imperial train sent to Compiègne for the Tsar and Tsaritzza was 220 metres long. It consisted of only eleven carriages, but each carriage had a length of 20 metres and weighed 20,000 kilos. The train was drawn by two enormous compound engines.

The *Times'* Paris correspondent, writing under date of Sept. 13th, said:—

The precautions that are being taken are really extraordinary. One may say that it is fortunate that Nicholas II. is not aware of them, otherwise he himself would be frightened at beholding the terror of those called upon to watch over his security. For instance, the soldiers of regiments far removed from the scene of next week's operations who were to be sent home when their time was up are now to be kept under arms until after the Tsar has quitted French soil, because the whole railway line over which the Tsar is to pass will be guarded by soldiers with loaded rifles stationed at intervals of 25 metres all along the way. In reality, the entire line on one side or the other will be watched by sentinels only 12½ metres apart, which represents 80 men per kilometre—a veritable army for the protection of the Imperial visitor. One cannot but ask oneself—against whom are these formidable precautions being taken? It is doubtful whether at the least civilized epoch a spectacle so surprising was ever prepared merely for the sake of protecting the life of one human being against a mysterious and unknown enemy who spreads broadcast over the world a fear that is almost superstitious. One understands in these circumstances that they who have the responsibility of ordering events hesitate, even were it in their power to intervene, to encourage Nicholas II. to visit points where his protection would become uncertain, if not impossible.

In 1900 there were 987,130 bicycles in France. The number in 1894 was only 203,026. It appears that the tax collected by the Treasury in 1900 was 5,474,975 francs, or about 5½ francs a vehicle. That is much less than people in Japan have to pay, yet the proceeds of the tax in this country are insignificant.

The *St. James's Gazette*, speaking of the Franco-Turkish trouble, says:—

"The Sultan is what his women have made him and so will his successor be. The mother of Abdul Hamid was a beautiful renegade Armenian, the re-

lentless foe of her own race. It is not possible for the motherhood of a nation to be degraded as is that of Turkey, and for the manhood of the race to be at the same time progressive or enlightened. Turkey has no female dignity corresponding with a queen or an empress. The harem is but a collection of wives and concubines in which the child of some unknown slave may rise to power. There is no aristocracy to check the Sultan. Great families can not exist. Why is official corruption in Turkey more official and more corrupt than in any other land on earth? Polygamy and the insatiable greed of Turkish wives are responsible for it all. The enslavement of women brings terrible retribution. The ladies run their husbands into debt, and the men have to look sharply after bribes in order to meet their deficits. Matrimonial morals are curiously ordered. In the silk factories of Brusa a young girl will come in the morning to ask for an hour's leave to get divorced, as she and her husband are tired of each other. Later in the day she requests another hour's leave, this time to get married again. A girl under twenty may have assumed and repudiated the conjugal bonds at least a dozen times. Amongst the agricultural classes throughout Turkey the women are miserably degraded, especially in Asia minor. The village women are poor, stunted, and downtrodden. In thousands of cases they become, when no longer young, mere beasts of burden. These are the killers of the soil. This, more than any other reason, accounts for the degeneration of the Turk."

CONCERT AT UYENO.

The patrons of the concert to be given for the benefit of the Tokyo Young Men's Christian Association at the Academy of Music, Uyeno Park, Nov. 2nd, at 2 p.m., wish to announce that they order of the parts has been reversed from that originally printed. The programme will stand as follows:—

PART I.

- | | |
|-----------------------------------|---|
| 1. San-Gyoku | <i>Koto</i>Mr. Hagioka. |
| | <i>Koto</i>Miss Yamamura. |
| 1. San-Gyoku | <i>Samisen</i>Mr. Takahashi. |
| | <i>Koto</i>Mr. Yamamura. |
| 2. Shakuhachi.—Kodo aratame | <i>Koto</i>Mr. Araki. |
| | <i>Koto</i>Mr. Hagioka. |
| 3. San-Gyoku | <i>Koto</i>Miss Yamamura. |
| | <i>Samisen</i>Mr. Takahashi. |
| 4. Kiyogen | <i>Koto</i>Mr. Miyake and others. |

PART II.

- | | |
|--|--------------------------------------|
| 1. Violin | Mr. G. Ishino. |
| 2. Soprano Solo.—O had I Jubal's Lyre, (<i>Händel</i>) | Mrs. James Cowen. |
| 3. Duet Piano.—Grande Fantaisie et Variations | Mr. and Miss Gentile. |
| 4. Quartette.—Vocal | Mr. and Mrs. Cowen. |
| | Mrs. Topping. |
| 5. Soprano Solo.—Lucia de Lamermoor | Miss Coates. |
| | Miss Mastropasqua. |
| 6. Soprano and Baritone.—Calm as the Night | (<i>Goetz</i>) Mr. and Mrs. Cowen. |
| 7. Piano Solo.—Barcarole | Miss Gentile. |

AN ABORTIVE FRAUD.

A man who represented himself to be Mr. Amanomiya Masakatsu, a clerk in the Accountants' Bureau, Finance Department, was arrested on the morning of Oct. 29th charged with having perpetrated a somewhat silly piece of fraud. Proceeding to the office of a sharebroker named Handa Yotaro, he purchased 100 Nippon Yusen Kaisha shares, giving in payment a cheque on the Kyobashi Bank for yen 7,000. After he had gone the broker's clerks did what they ought to have done before—they looked in the directory for the name of their client. Not finding it, one man started at top-speed for the Kyobashi Bank while another ran to the head office of the Nippon Yusen Kaisha. At the bank it was learned that the cheque was worthless, and he who went to the Nippon Yusen Kaisha office found the swindler in the act of having the shares formally transferred. The alleged Mr. Amanomiya's arrest speedily followed. To the Nihonbashi police he confessed that he was an artist named Inai Chugen, living at Minami Sakumacho, Shiba, and if he had obtained the money he intended travelling in Germany.

The damaged steamer *Taikoku Maru* arrived at Fusan on the 30th with 280 Chinese on board. They were transferred to the steamer *Tategami Maru* and sent to Chefoo.

"ANOTHER GERMAN."

THE pages of the *Japan Times* have become a happy hunting ground for Germans desiring to attack the *Japan Mail*. A correspondent signing himself "Another German" has now entered the lists with a letter filling more than two columns of our Tokyo contemporary's space. It is a very interesting letter, interesting not merely as an expression of German sentiment but also as an example of the manner in which some Germans read history. What we observe, above all, is the propensity displayed by these various German writers to attribute evil motives and rancorous feelings to everybody disagreeing with them. When the leading English newspaper ventured to point out that the Germans themselves in their war with France had adopted even severer methods than those for which they are now so loudly condemning England in South Africa, these German writers immediately declared that the object was to revive French animosity towards Germany, the gradual decline of which feeling Englishmen so greatly regretted. When a German subject sent to *The Times* copies of German orders and edicts issued in the war of 1871, these German writers at once declared that he was paid to do so. When the *Japan Mail* ventured to criticise some of Count von WALDERSEE's methods—criticisms the justice of which was admitted by all humane persons—these German writers immediately discovered that the *Japan Mail* not only hated Germany but was also seeking to compromise her with a third party, Japan. Persons who approach a discussion with such proclivities are not likely to take a very impartial view, and we can not be greatly surprised that British history assumes a peculiar complexion in the eyes of men one of whom admits that Great Britain is to him an object of "contempt and hatred." For our own part, we frankly admit, as every liberal-minded Englishman must admit, that the history of our country includes many episodes of which we have no reason to be proud, and which we agree with "Another German" in condemning, though we can not by any means agree with the wholesale character of his condemnation. Indeed, before reading his letter we did not think it possible that any educated German could compile such a strongly prejudiced retrospect. It would be very easy, as "Another German" must well know, to adduce from the history of his own country and from the history of other European States, many incidents deserving the reprobation of posterity at least as fully as anything in England's history deserves it. But two wrongs do not make a right, nor have we any disposition to seek to whitewash England's reputation by blackening that of States now nominally friendly to her. If there be many Germans—which, in spite of the strangely hostile tone of the German press, we take the liberty to doubt—if there be many Germans who read the history of the past and of the present as it is read by

the *Japan Times*' correspondent, then indeed there can never be any hope of real amity between the two countries. But it is permissible to believe that the majority of the German nation are sensible enough to let the dead past bury its dead, and to refrain from questing with eyes of malice among the musty annals of mediæval times in order to marshal accusations against which no nation can be safe. As for ourselves, "Another German" endeavours to fix upon us the stigma of hating his country and alleges that all our comments upon Count von WALDERSEE had the mark of Cain upon their brow. It is a pity that if this gentleman can not distinguish between the language of fair criticism and the tones of animosity, he should himself enter the lists with an attack upon England's reputation, the most prejudiced and the least sympathetic of all the assaults to which her greatness as well as her faults ever subjected her. If hatred is to be inferred from everything savouring of unfavourable criticism, then what are we to think of the German nation's attitude towards England as evinced by the writings of its newspapers during the South-African war, and what are we to think of the mental attitude of "Another German" himself, who attacks England's fair fame with a degree of rancour such as we have never seen equalled? Does it become such a writer to pretend that "inevitable little differences apart, England and Germany might go together hand in hand," and does it become him to pretend that our fair criticisms of current events in which England is directly concerned are prompted by a desire to injure Germany in Japan's sight when he himself publishes in a Japanese journal a letter two columns long, setting forth many of the salient features of England's past history in a most hateful and prejudiced light; endeavouring to hold her up to the ridicule of the world because "200,000 Englishmen—the greatest army England has ever had under arms—have been fighting vainly and ingloriously for more than two years against a shepherd tribe of 200,000 souls," and declaring with plain exultation that "she has reached the limit of her civilization and crossed the threshold of her destiny," and that "the United States of South Africa will be called the grave of England's might and greatness?" It would indeed be a vain and idle task to point out the extraordinary bias that disfigures every comment made by this writer on the South African War. A man who can describe the choice before the Boers as a choice between "victory and slavery" must be classed with that other countryman of his who, in order to establish a distinction between the Franco-Prussian and the South-African wars, could persuade himself to assert that when a country is invaded and its capital invested by a foreign army, the people of that country are not concerned, and may be treated with extreme severity if they venture to raise a hand in defence of their fatherland, as the Germans treated the

French people in 1871. England may have "reached the limit of her civilization and crossed the threshold of her destiny," but we trust the day will never come when any Briton would be content to hold his hand and leave to his Government the whole task of defending British soil against a foreign invasion, as "Civis Germanus" insists that the French people should have done in 1871. It is our desire to refrain from pursuing this controversy, since it evokes from German writers comments which even the most cold-blooded Englishman can not peruse without burning indignation. One word must be said, however, though in truth we doubt whether in view of the temper displayed by "German," "Civis Germanus" and "Another German," any rejoinder can be calmly considered by them. That word is that Englishmen are not the assailants in this instance. What Englishmen have done is simply to defend themselves—not violently or immoderately we think—against one of the most rancorous campaigns of slander and misrepresentation ever conducted by the press of any country. We have not assailed Germany. It is not we that have devoted columns upon columns of journalistic effort to prove that a nation with which we once stood side by side in battle, and which has at least the credit of being the home of enlightened freedom, is unworthy of anything but execrations and is rushing to its ruin amid the delighted cheers of the civilized world. It is not we that have been "jealous if here and there another civilized nation forms an emporium of trade." Germany is the aggressor. Germany is the vehemently hostile critic. It is necessary to recall that important fact, forgotten altogether, it would seem, by the correspondents of the *Japan Times*, who write as though they themselves were the victims of the calumnies and the condemnations they have heaped upon England's head for the past two years. We do not grudge the Germans their well earned and well deserved successes in the field of trade and industry. It may be that the long unchallenged supremacy enjoyed by British merchants and British manufacturers impaired their capacity for competition and thus created opportunities of which Germany is now taking clever advantage. We have every confidence, however, in Englishmen's residuum of strength and in the sagacious energy that will enable them to re-adjust their methods and rise superior to the new situation. If they lack such capacities, then they must succumb. But they do not shrink from the fight nor are they unprepared to grant a fair field to all competitors. It appears to us that when "Another German" gave himself so much trouble to delve among the annals of bygone ages in order to trump up a case against England, he might have lit upon one record which would have restrained him from charging her with petty jealousy of trade and industrial competitors; the record that wherever the British flag flies or wherever

British influence is paramount, there every nation in the world has free access and enjoys absolute liberty of commerce and manufacture. He might have discovered that whereas the British colonies in China, as elsewhere, are fully open to Germans who enjoy there precisely the same privileges as do British subjects themselves, and of whom many thousands have lived happily and thriven prosperously under British auspices, the first act of Germany when she acquired a "sphere of influence" in China was to close it to all comers, and to declare for herself a monopoly of mining, industrial and railway-building privileges there. Had not the search of "Another German" been singularly one-eyed, he might, we think, have found these things written on the pages of the past at least as plainly as are the incidents he so injuriously depicts, and finding them it might have occurred to him that the petty jealousy he attributes to Englishmen is scarcely consistent with the uniformly ungrudging liberality of their attitude towards men of all nations and all creeds. So far as Englishmen are concerned, we think we can say with confidence that even the discovery of such men in their midst as "German," "Another German," and "Civus Germanus" will not change their friendly feeling towards Germany, or destroy their hope that Germans and Britons may always be found standing side by side as they stood in the days of European storm and stress a hundred years ago.

JAPANESE SILKS IN AMERICA.

We printed on Friday the finding of the Solicitor of the United States Treasury in the case of several packages of Japanese silks which had been seized by the New York Customs authorities on suspicion that they had been imported under a false declaration of weight. The Solicitor to the Treasury after examining thoroughly into the affair, exonerated the importing firm, Messrs. A. S. Rosenthal and Co., of any intent to defraud and the goods were at once released. *Apropos* of the incident a correspondent writes:—

Every well-informed person is aware of the marvellous progress that has been made in recent years in the silk textile industry of the United States, through the mechanical as well as business ingenuities peculiar to Americans, and above all, through the highly protective tariff which, in some cases, is tantamount to a prohibitory duty. The most conspicuous among silk woven goods are schappe goods, ribbons, a certain class of satin and cheap taffeta, in the manufacture of which American weavers have made such progress that similar articles from foreign countries are practically shut out from the American market. Here it may be worth while to say something about schappe goods, which are closely related to Japanese silks in the eyes of American protectionists. Schappe silks are a class of textile woven of spun silk, which, by the way, is already in extensive use in Japan for weaving cheap grade articles for home consumption. Until the enforcement of the Dingley Tariff in 1897, schappe goods for consumption in the United States were largely imported from France, but such importation has been entirely shut off through legislation imposing a heavy duty of \$3 per lb. Under the Wilson-Gorman Tariff, silk textile fabrics of all classes were subject

to 45 per cent. *ad valorem*, while, under the McKinley, to 50 per cent. *ad valorem*. This indiscriminatory *ad valorem* system was, for a long time, the subject of much discontent among some silk weavers, especially those who were trying to weave schappe goods, for the reason that some articles, including the latter, paid comparatively small duties under the *ad valorem* system, on account of their original foreign prices being cheap. Hence it was contended that the duties were not enough to cover the excess of wages paid in the United States. Among the articles above referred to, Japanese silks did not fail to be included and finally, when the movement for a higher tariff was started in 1895-1896, both houses of Congress having then become decidedly Republican, the silk weavers in America, especially those of schappe, commenced to show marked activity in congressional circles, and it was reported that Messrs. Cheney Bros. of New York, Patterson, etc. (the famous silk weavers) alone contributed \$100,000 toward the funds for the movement. Subsequently, a tariff bill was drawn up in the Spring of 1897 by the Committee on Ways and Means of the House, (of which the late Mr. Dingley was Chairman) embodying new features, calculated to partly abolish the exclusive *ad valorem* system for silks and to conform in every way with the wishes of the American weavers. The following provisions were found in the silk schedule of the bill:—

Silk woven fabrics in the piece, weighing not less than 1 1/3 oz. and not more than 8 oz. per square yard, and boiled off, etc.....\$3 per lb.
If weighing less than 1 1/3 oz. and more than 1/2 oz. per square yard\$4 "
If not more than 1/2 oz. per square yard.....\$8 "

but in no case shall they pay less than 50 per cent. *ad valorem*. After eventful discussions and deliberations in both Houses, as well as a meeting of their conference committees, the above portion of the silk schedule was amended and passed as follows:

Silk woven fabrics in the piece, weighing not less than 1 1/3 oz. and not more than 8 oz. per square yard, and boiled off, etc.....\$3 per lb.
If weighing less than 1 1/3 oz. and more than 1/2 oz. per square yard\$3 "
If not more than 1/2 oz. per square yard\$4.50 "

But in no case shall they pay less than 50 per cent. *ad valorem*. In this form the bill became law on the 24th July, 1897, and is still in force.

The first item of the above is manifestly intended to hit schappe goods. Owing to their low market value, yet comparatively heavy weight, the specific duty thus charged amounts to such an enormous impost, that, when rendered into *ad valorem*, it is equivalent to more than 100 per cent. Japanese *habutai* is also aimed at by the first and second items, especially the latter, the specific duty thus charged being equivalent to 62 1/2 per cent. when rendered into *ad valorem* on the basis of yen 8 per 100 *monme*. During 1897, when the above schedule went into force, the original Japanese prices of *habutai* were so low that the specific duty was equivalent to 75 per cent. or even more. The attempted impost, as originally proposed by the bill, of \$4 per pound on boiled-off silks weighing less than 1 1/3 oz. and more than 1/2 oz. per square yard, was a flagrantly discriminatory measure against the most saleable descriptions of Japanese *habutai*, as, at the moment of the submission of the bill to the House, such specific duty was equivalent to about 100 per cent. It was through hard efforts on the part of those interested, especially the late Mr. Hoshi, then our Minister in Washington, Mr. Matsui Keishiro, then his secretary, Mr. Sadatsuchi Uchida, Japanese Consul in New York, and more particularly Mr. D. W. Stevens, that popular and indispensable fixture in the Japanese Legation at Washington, that the rate above referred to was reduced to \$3 per lb., and the continuation of the importation of Japanese *habutai* into the United States was made practicable, although under constant difficulties. The third item of the duties

above mentioned does not strike any Japanese goods, but is evidently intended to hit mousseline de soie, which is still largely imported into the United States from France, no remarkable progress having as yet been made by the former country in the manufacture of that textile.

Japanese *kaiki* is not exempted from suffering, since it is subject to heavy duties under other items in the silk schedule of the Tariff. So also are Japanese silk handkerchiefs. The writer, however, does not intend to enter into the question of *kaiki* and handkerchiefs in this article, but will confine himself to that of *habutai*, in order to make the case as comprehensible as possible.

On the whole, the silk schedule of the Tariff of 1897 was framed so ingeniously that by means of various specific items, the most flagrant discriminations were made against French schappe and Japanese silks, yet without giving opportunity to the foreign governments to file official protests with the State Department in Washington against such discrimination. American protectionists, or rather silk weavers, were, after all, successful in driving out schappe goods and, as a consequence, several prominent silk houses in New York had to close their doors, while a few others turned their attention to enjoying the benefit of the protection rather than fighting against it, and changed their business of importing into that of weaving. Nevertheless, American weavers have not so far been able to place on the market articles to take the entire place of Japanese *habutai*, even under such protection. Of course, so far as Japanese twill *habutai* is concerned, it was altogether driven out of the market through the appearance of the America foulard. The last mentioned article is made of regular silk on the warp and spun silk on the weft, and can be printed and finished so as to give such a beautiful effect that it has successfully ousted the comparatively more expensive Japanese twill *habutai*. Further, the Americans are hard at work to turn out goods as desirable as *habutai*, and are already offering on the market cheap plain silk which is seriously threatening the existence of the low grade Japanese *habutai* and Kawamata silk in America. As regards the better grade of *habutai*, there is no reason why they should not be able to turn out, sooner or later, goods to take its place entirely, considering the mechanical simplicity of its weaving, and the mechanical as well as the business genius which has been displayed by American weavers in their enterprises, not to speak of the remarkable readiness Congress displays to amend the Tariff Law in such a way as to shut out Japanese *habutai* through ingenious methods of indirect and tortuous discrimination. It is all very well for some Japanese silk weavers and merchants to console themselves by asserting the singular effect the hand weaving system in Japan gives to the textile, which effect can not, it is further claimed, be imitated by power looms; but they should not forget that the singular superiority always asserted by the Lyons weavers, dyers, printers, and finishers did not obtain for them a permanent monopoly in America, and that they have now only to gaze helplessly at the countless number of weaving mills and dyeing, printing and finishing establishments actively working in Patterson and other places.

Now turning to the question of the actual influence of the Tariff on silks, it will not be difficult to realize that since about 40 per cent. of the landed cost of Japanese *habutai* in America consists of import duties to be paid in hard, cold cash before taking delivery of the goods, strong encouragement is given to importers to closely study how to pay as little duty as possible, within the limit of the Tariff Law, and that unfortunately some unscrupulous and greedy importers see their account in fraud and smuggling. It was in 1893 (or thereabouts) that a house equally prominent in New York and Japan was penalised in more than \$100,000 for defrauding the United States Government by making false declarations as to the contents and value of their invoices of Japanese silks. The Examiner concerned in the affair was dismissed from the service. During 1899, a large Chinese syndicate was detected making entries in San Francisco with a series of incorrect invoices of Japanese silks, and

had to pay a heavy penal duty, the Examiner concerned being of course discharged.

In order to form an idea as to how an Examiner can give unlawful help to favoured importers, it is advisable to say something about the practice of Custom House business in America. An importer in New York of purchased dutiable goods (named in distinction from consigned goods for which some special formalities must be complied with in making entry) must first make entry either for immediate "consumption" or "warehousing," at the office of the Collector of the port of New York, by filing there with a consular invoice, a bill of lading duly endorsed, and swearing to the declaration as to his ownership of the goods, and the correctness of the invoice as to contents and value. Under certain circumstances he is allowed to make addition to the invoice value when making entry, and to avoid the Appraiser's "advance." The collector then transmits the invoice, and orders the whole or a part of the goods represented thereon to the Appraiser's store for examination, the law requiring the former to order at least one package out of each ten to the latter's store. The Chief Appraiser (commonly called local appraiser) of the port of New York has under him a number of Assistant Appraisers who are detailed to various divisions of the service, and each of them has under him a corps of Examiners who are supposed to be experts. It is the duty of an Examiner to check every item of the invoice thus transmitted by the collector and to examine the contents of the package thus sent by him to that store, and he reports the result of his work to his superior. It rarely happens that the Chief Appraiser or even an Assistant Appraiser orders a revision of an Examiner's report, so that the invoice is thus "returned" to the Collector either as "correct" or "with the Appraiser's revision" as to the valuation or classification. The Collector then proceeds (usually after a long delay) to fix and liquidate the rate and amount of duties to be paid on the basis of such return, unless the importer be dissatisfied with the revision of valuation, if any, in which case he may give notice to that effect to the Collector who, upon receipt of the same directs reappraisement by one of the General Appraisers. There are nine of them, each receiving a yearly salary of \$7,000, three of whom are constantly in attendance in New York, and sit there as the "Board of three General Appraisers" whose principal duty is to examine and decide cases of dissatisfaction on the part of importers as to the reappraisement of a General Appraiser, and as to the classification, or the rate and amount of duties to be paid. Mr. Sharrets who is reported from America as having been appointed United States Commissioner to the Chinese Customs Tariff Convention is one of them. When the importer is still dissatisfied with the decision of the Board, he may apply to the Circuit Court, and may have the question of law and fact reviewed by it and he can even get the Supreme Court of the United States to further review the case, under certain conditions.

Notwithstanding all the theoretically excellent system in force as above for the administration of these most complicated Tariff Laws, anyone can well imagine how easy it would be for an unscrupulous examiner to unlawfully co-operate with importers and save them duties by passing false invoices as correct, in the face of his superiors, who are mostly typical politicians holding their positions for work done for their party, and not having any knowledge of imported articles.

The penal clauses of the Customs administrative act provide that any person who shall make any entry by means of false invoice or statement shall be fined for each offence a sum not exceeding \$5,000, or be imprisoned for two years or less, or both, in the discretion of the court. A similar penalty is imposed upon any officer of the United States who shall receive any bribe in connection with customs business; but such offending officer can hardly be convicted, as he never leaves, as a rule, any trace, or clue to evidence, of his having received a bribe. Generally the only penalty he undergoes is removal from the service for negligently passing incorrect invoices.

YOKOHAMA AUTUMN REGATTA.

Splendid weather favoured the Autumn Regatta of the Yokohama Amateur Rowing Club, which was held on Saturday, having been postponed from the 19th on account of the sharp blow on that day. It was thought, however, that the usual course was too rough—as indeed it was for the jumble off the Creek would have swamped any boat—so the alternative course, from the harbour entrance in past a mark boat anchored off the Grand Hotel was chosen. As the weather was certainly too favourable to warrant another postponement, this was practically the only thing that could be done. But it was a most unsatisfactory business at best. For one thing, the people about the Boat-house on shore saw very little of the races until the boats were quite close in and until the gun was fired had little idea as to which was leading. Moreover, with a strong tide pouring through the harbour entrance and anything of a northerly breeze (and it is especially in the case of even a mild wind blowing on shore that a change in the course becomes necessary) the business of getting into position for a start is most tedious. The steam launch drifts; the boats drift; some lie across the course while others beyond range of the starter's voice keep paddling along by themselves as if hoping to be allowed a start of fifty yards unquestioned. (Apropos of this matter we strongly recommend the Committee to invest in a megaphone the use of which even on an ordinary day would save much time and avert not a little misunderstanding.) Also when the boats are lying at the three-quarter-mile distance waiting to go off they may be obstructed by and form much annoyance to yachts which, when coming in before a northerly breeze like to make a sharp turn of the corner at the lighthouse. Further, the mile races have to be started close to the northern breakwater so that the boats cross the fairway and that is an inconvenience which might in certain cases be a positive danger. Before we quit the subject too, it may be said that the arrangement of the programme combined with the difficulties of the course to greatly delay the events. Fortunately in one sense the Goddard brothers made up their minds not to row in the Senior Pairs so that the usual Scratch Fours scramble took place in daylight, but had the programme been carried out to the bitter end it must have finished in darkness. The arrangement we refer to was in great part necessitated by the composition of the crews undoubtedly but it was impossible to avoid contrasting the result with those of previous years when the crews of one race were half way to the starting point before the previous event was concluded.

The races were not exciting, most interest being taken in the Junior Pairs, where Abbey and Gorman made quite a game struggle against Pollard and Cartwright. There was not a large attendance of spectators. A band gave the usual musical selections during the afternoon.

After the races the prizes were gracefully presented by Mrs. Bent. Mr. H. C. Litchfield officiated as judge, Mr. L. Mottu and Mr. F. J. Hall as starters, and Mr. Robt. Hay as time-keeper. Committee:—Mr. H. C. Litchfield, President; Mr. P. S. Ben, Captain; Dr. Wheeler, Messrs. R. Hay, F. J. Hall, L. Mottu, H. Keswick, W. Goddard, W. M. Squire, C. Thwaites; Mr. H. A. Poole, Hon. Treas.; Mr. H. E. Hayward, Hon. Sec.

Following were the events:—

SENIOR DOUBLE SCULLS.— $\frac{1}{4}$ Mile.

"TERN."		lbs.
Bow.	H. E. Hayward.....	143
Str.	W. M. Squire.....	145
"PEARL"		lbs.
Bow.	H. Y. Irwine.....	150
Str.	M. Schellenberg.....	150

Two crews went out in the Senior Double Scull's starting just inside the southern breakwater, 30 yards or so from the harbour entrance. They went off very level, Squire in the inside berth, that is next the breakwater, but there was little advantage in that for the water was smooth to both alike. They steered badly, with the result that though Squire more than once secured a lead—following

upon a slight mix-up when both came together—Schellenberg still held him when three-quarters of the course had been covered. Here, however, Squire drew ahead and though pushed by the other crew who had really entered to make a race won by two lengths. Time, 6.02.

JUNIOR DOUBLE SCULLS.— $\frac{1}{4}$ Mile.

"TERN."		lbs.
Bow.	F. Herb, Jr.....	144
Str.	J. Helm.....	154
"PEARL"		lbs.
Bow.	W. B. Mason.....	130
Str.	E. Powys, Jr.....	134

This was a procession of sorts, Helm and Herb going off with a strong lead and increasing it all the time, their opponents after an attempt to get on level terms practically giving up the race. It seems somewhat inconsequential to give the time, but Helm rowed the course in 6.37 $\frac{1}{2}$.

OPEN FOURS.—1 Mile.

Prizes presented by Local Stores.

"FLAMINGO."		lbs.
Bow.	H. Y. Irwine.....	150
2.	J. Helm.....	154
3.	H. A. Poole.....	150
Str.	H. E. Hayward.....	143
Cox.	F. H. Abbey.....	140
"SEAMEW."		lbs.
Bow.	N. G. Maitland.....	157
2.	B. J. Jackson.....	185
3.	O. Strome.....	194
Str.	W. M. Squire.....	145
Cox.	J. E. Moss.....	133
"DARTER."		lbs.
Bow.	H. Goddard.....	131
2.	F. Pollard.....	167
3.	A. L. Manley.....	165
Str.	W. Goddard.....	128
Cox.	D. MacLaren.....	140

Three crews went out for the Open Fours and after some trouble were sent off to a fine start. They rowed very level for about a hundred yards, after which Hayward in the outside berth began to draw away, the others going level. With a stroke of about 33 Hayward gradually increased his lead and half way in he was a good length in front, Squire getting a little ahead of Goddard. It looked as if Hayward had the race very easily but nearing the finish Squire, though two of his men showed signs of distress, got up and came in only two lengths astern of him after a splendid effort. Goddard was an indifferent third. Time 7.26.

JUNIOR FOURS.— $\frac{1}{4}$ Mile.

"FELICAN."		lbs.
Bow.	G. G. Mitchell.....	137
2.	J. F. Marques.....	128
3.	C. Schramm.....	157
Str.	F. Herb, Jr.....	144
Cox.	C. Thwaites.....	130
"DARTER."		lbs.
Bow.	C. H. Abbey.....	112
2.	R. Meiklejohn, Jr.....	124
3.	R. F. Reece.....	171
Str.	H. Gorman.....	135
Cox.	W. Goddard.....	128
"SEAMEW."		lbs.
Bow.	A. E. Pawsey.....	125
2.	C. H. Thorn.....	130
3.	H. Kramer.....	150
Str.	C. H. Moss.....	135
Cox.	H. Goddard.....	131
"FLAMINGO."		lbs.
Bow.	P. Moss.....	124
2.	K. Dodds.....	144
3.	F. W. Pettit.....	147
Str.	E. J. Moss, Jr.....	134
Cox.	J. E. Moss.....	133

Four crews went out for the Junior Fours and after the usual bother occasioned by the tide at the entrance they started very level. Herb, in the position next the breakwater, assumed a slight lead after the first few strokes, and a minute later Gorman drew out in front of the other two, which seemed to be pretty level. As they entered on the last quarter of the course, going about 30 to the minute, he was a good length ahead and as he passed the Bathing Barge he had added another couple. He finished easily three lengths to the good, the red and green boats being almost level. Time 6.05 $\frac{3}{4}$.

SENIOR FOURS.—1 Mile.

	"SEAMEW."	lbs.
Bow.	J. Helm	154
2.	J. S. Cartwright	160
3.	O. Strome	164
Sir.	W. M. Squire	145
Cox.	J. E. Moss	133

"FLAMINGO."

Bow.	H. Y. Irwine	150
2.	H. Temme	161
3.	B. J. Jackson	185
Sir.	H. E. Hayward	143
Cox.	F. H. Abbey	140

"DARTER."

Bow.	H. Goddard	131
2.	F. Pollard	167
3.	A. L. Manley	165
Sir.	W. Goddard	128
Cox.	D. McLaren	140

Squire, next the breakwater, took the lead at once, Goddard, on the outside line, next. The former, continuing to increase his advantage, was about halfway home three lengths clear, and Hayward had drawn up level with Goddard. In the sequel Squire finished 10 or 12 lengths in front, a length and a half separating Hayward (second) from Goddard. Time 7:33 3/4.

JUNIOR PAIRS.—1/4 Mile.

	"WIDGEON."	lbs.
Bow.	F. Pollard	167
Sir.	J. S. Cartwright	160
Cox.	J. E. Moss	133

"MALLARD"

Bow.	C. H. Abbey	112
Sir.	H. Gorman	135
Cox.	W. Goddard	128

Cartwright took a strong lead but the light weights stuck to them pluckily, though rowing very badly together. Won by 3 to 4 lengths. Time 7:21.

SENIOR PAIRS.—1 Mile.

	"WIDGEON."	lbs.
Bow.	H. E. Hayward	143
Sir.	W. M. Squire	145
Cox.	J. E. Moss	135
Bow.	H. Goddard	131
Sir.	W. Goddard	128
Cox.	C. H. Abbey	112

The Goddards scratched, so this race did not come off.

The usual Scratch Fours took place, three boats competing and a crew stroked by Herbert Goddard came in first.

YOKOHAMA UNION REGATTA.

The annual Union Regatta of Yokohama took place on Sunday, fine weather prevailing, and the affair being very successful. The races began early in the forenoon and continued till well on in the afternoon, being witnessed by a number of invited guests from an enclosure erected on the Bund as well as by considerable crowds who lined the sea wall. Mr. Otani Kabei was president of the sports; Rear-Admiral Mori acted as principal judge, and was assisted by Captain Amano. There were in all thirteen events, some of which were very closely contested. A crew representing the Mitsui Bussan Kaisha beat boats from the First and Third Banks; the Second Bank beat the Yokohama Silk and Fire Insurance crews; the Yokohama Custom House beat the Harbour Police; and the Mogi Co. beat the Nippon Yusen Kaisha and the Seventy-fourth Bank. There were races also for the Yokohama Commercial School; the Higher Commercial School of Tokyo, and for other visiting crews. A band played during the day and there was much excitement both on shore and on the various launches and other craft that went up and down the course or were stationed off No. 5.

YACHTING.

The 21-raters had a race on Saturday which resolved itself into a match between *Vixen* and *Molly*. It resulted in favour of the latter, which received 22 minutes, the corrected times being: *Vixen* 4h. 57m. 15s., *Molly* 4h. 56m. 30s.

The other 21-raters preferred to compete for a prize offered by Mr. Duke Marshall, *Edna*, *Nan-*

deska, *Sodeska*, *Abunai* and *Yugao* starting. The course was round the Honmoku Lightship, the quarantine steamer, the Lightship again and home and *Edna* won easily, *Yugao* and *Nandeska* finishing together, *Abunai* next and *Sodeska* last.

A cruisers' race brought out *Seanhild*, *Daimyo*, *Asagao*, *Mosquito* and *Surprise*. It was pretty much of a match between *Seanhild* and *Daimyo* but the latter drew out a lead towards the close and finished first, though *Asagao* won the prize on her time allowance.

BASEBALL.

Y. C. AND A. C. VERSUS TOKYO UNIVERSITY.

Only very short notice could be given of this match and consequently there was but a small attendance on the Cricket ground on Saturday afternoon. The game was well worth watching, though the visitors were eventually beaten by 12 runs to 6. The local players were in good form and their fielding above all praise. The University team made some very good plays and secured a home-run in the course of the afternoon. Needless to say the weather was delightful. Score and players:—

AMERICAN TOPICS.

The total number of persons lynched in the United States of America during the past 21 years—including 1901, as far as it has gone—is 3,130, or an annual average of 154, approximately. Forty-three of the States have been concerned in this exercise of mob law, the numbers of their respective outrages varying from 1 (Connecticut and New Jersey) to 253 (Mississippi). Only in 6 States did no lynchings occur, namely, Delaware, Massachusetts, New Hampshire, Rhode Island and Vermont. The evil seems to have reached its climax in 1892, when there were 236 cases. Since then there has been a steady and uniform decline, so that the number in 1900 was only 115. It is noted that statistics do not bear out the contention that grave crimes against women are the chief cause of lynchings and that no other punishment is effectual to check such offences. Out of 1,700 lynchings perpetrated between January 1st of 1885 and January 1st, 1901, only 602 were on account of crimes against women, the remainder being for murder, theft, politics, unpopularity and generally bad reputation.

The outlook for those who will be compelled to spend the winter in Nome is not pleasant. Wages are low, food is dear, and there are not enough substantial houses to shelter one-third of the population. It will certainly be a winter of discontent, if not one of actual suffering and death, for those who are unable to reach a better climate.

Mr. J. Pierpont Morgan, it is believed, has purchased a famous landscape by Hobbema, the gem of a magnificent collection of Dutch pictures at Dorchester House, Park Lane, the property of Captain Holford. The price paid by his agent was \$110,000. The previous record price for a painting by Hobbema was \$40,000 at Christie's for an example from the Earl of Dudley's collection. Captain Holford was only tempted to sell by the extravagant price offered.

President Roosevelt will probably make an extended visit to the Pacific Coast next year. The President has spoken of his intention to several of his friends, among them Mr. H. W. Scott of the *Portland Oregonian*, and Mr. S. A. Perkins of the *Tacoma Ledger*. It is proposed that the President shall visit Washington and Oregon first, thence going to California, and returning through the Central Western or Southern states. The President has never visited the Pacific slope.

President Roosevelt is said to be very much in earnest in his desire to find some satisfactory solution of what is known as the Southern political problem. He is by no means satisfied to permit matters to drift along, as they have been going and a new departure is confidently expected by those who have conferred with him on this subject. This new departure in a word means cutting loose from old lines and the appointment of the best men to Federal offices throughout the South, even if they prove to be Democrats. The well known negro Booker Washington has been called to the capital to have interviews with the President.

According to President George B. Stewart of the Auburn, N. Y., Presbyterian Theological Seminary, commercialism has "caused a loss of prestige in the ministry and the increase of materialism in society and the church" has reached to such an extent as to reduce in a marked degree the number of theological students. This is the reason he assigns for the falling off of the number of students in the seminary over which he presides from 105 in 1899 and 91 in 1900 to 72 at the present time. Perhaps the division which has of late years developed in the denomination over the proposed creed revision has something to do with the change also.

The United States cruiser *Cleveland* was launched on September 29th at Bath Iron Works. At a few minutes before noon the christening party, including Miss Ruth Hanna, Senators Hanna, Frye and Hale and Congressman Littlefield, mounted the platform at the bow of cruiser, and almost at the stroke of noon Miss Hanna, with a daintily mounted silver hatchet, cut the cords, releasing the key shores, and as the big boat began to move, broke a bottle of American champagne over the bow, christening the cruiser. The cruiser is one of the *Denver* class. These vessels are protected cruisers. Their general dimensions are as follows. Extreme length, 308 feet; breadth, about 43 feet; extreme draft, fully loaded, 16 feet 8 inches; full load displacement, about 3,400 tons; bunker capacity, not less than 700 tons. The armament will be: Main battery—Ten 5-inch, 50-calibre, breech-loading, rapid-firing guns. Auxiliary battery—Eight 6-pounders, rapid-firing guns; two 1-pounders, rapid-firing guns; four Colt machine guns. The sail area will be about 8,000 square feet. The coal capacity of these ships with bunkers full is sufficient to give them a radius of action at full speed of about 2,600 miles.

The President and Attorney-General Knox are reported to have fully considered the case of Judge Humphreys of Hawaii. The latter has been fully vindicated by both the Department of Justice and the President, and now there are certain features of his case which, it is said, are causing President Roosevelt and Attorney-General Knox to incline to the belief that a thorough investigation of the Hawaiian territorial government would be advisable. In his defence against the charges of the Hawaiian Bar Association Judge Humphreys made some serious and sensational accusations against Governor Dole and several of his appointees. These accusations in full have been laid before the President by the Attorney-General, and are contained in a printed brief carefully prepared by Judge Humphreys and his counsel.

One report which is expected to be made early in the next session of Congress will be awaited with considerable interest in industrial circles. This, says *Bradstreet's*, is a summary of the results of an investigation by the Department of Labor into the effect of trade-school teaching on produc-

tion, on economy in the use of raw materials, and on wages and the securing of employment. The investigation has been conducted so as to cover this country, the United Kingdom and the leading countries of continental Europe. One direction in which the report will be of special interest is in determining to what extent the United States is at present supplying technical training to its own artisans, and how far and on what lines it is drawing upon the trained classes of European artisans. The statistics bearing on this question will attract wide attention not only here, but abroad, for in the intensified competition in manufactures which the future will doubtless witness, the influence exerted by technical education cannot fail to be an important one.

Bishop Partridge, of Kyoto, preaching at Trinity Episcopal Church, San Francisco, on Sept. 29, took for his text. Acts xxvi: 17-18: "The Gentiles unto whom now I send thee, to open their eyes and to turn them from darkness to light and from the power of Satan unto God, that they may receive forgiveness of sins and inheritance among them which are sanctified by faith that is in me." Outlining broadly the Asiatic missionary effort and its promises, and specializing in relation to China and Japan, where, for a number of years he has laboured, he said that the enthusiasm following the work in those regions could not but result in favourable returns. He noted that the work was fully systematized, which assured its practical success. He explained the methods along medical and educational lines; the women's labour for the field and the training of a native ministry. Each of the four heads was thoroughly illustrated and great stress laid on the beneficial effect of orderly system such as that employed.

The Interdenominational Council of Women for Christian and Patriotic Service of New York has started a campaign in favour of the adoption of an anti-polygamy amendment to the Federal Constitution. Their reason for doing so is the alleged practice of the polygamous relationship by the leaders of the Mormon church in Utah, the disposition of the State authorities to deal leniently with offenders, the revival by the Mormon hierarchy of the practice and teaching of the doctrine of polygamy, and the insidious expansion of the Mormon influence throughout the Western States, which may ultimately, if let alone, prevent the possible adoption of a constitutional amendment prohibiting polygamy in the Republic through a failure to secure the necessary two-thirds vote of the states. The council invites all ecclesiastical bodies, all reform organizations and all women's societies of every description which are in sympathy with the movement to pass resolutions in favor of such an amendment and send copies of the same to the United States Senators and Representatives in Congress from their respective states and districts.

What provision will Congress make for Mrs. McKinley, is a question now being asked. It is not likely, remarks a San Francisco paper, that it will do less for the widow of the latest martyred President than it did for the widow of the second Chief Magistrate who fell by the bullet of an assassin. Mrs. Garfield received the remainder of the salary for the year which her husband would have been entitled to had he lived, a pension of \$5,000 a year and the franking privilege through the mails for life. Congress also compensated the physicians who attended Garfield, and will doubtless do the same for those who ministered to McKinley. The physicians in the Garfield case were in attendance upon him for two months and received \$35,500 for their services. McKinley survived the bullet only seven days, and it is probable that his attending physicians will receive an amount proportionately less. The funeral expenses of Garfield, amounting to \$22,000, were likewise paid, and the same course will be followed regarding the disposition of McKinley's body.

The following is the text of the late President McKinley's will:—

Executive Mansion, Washington, D. C.—I

publish the following as my latest will and testament, hereby revoking all former wills:

To my beloved wife, Ida S. McKinley, I bequeath all of my real estate, wherever situated, and the income of any personal property of which I may be possessed at death, during her natural life. I make the following charge upon all of my property, both real and personal: To pay my mother during her life \$1000 a year, and at her death said sum to be paid to my sister, Helen McKinley. If the income from my property be insufficient to keep my wife in great comfort and pay the annuity above provided, then I direct that such of my property be sold so as to make a sum adequate for both purposes. Whatever property remains at the death of my wife I give to my brother and sisters, share and share alike. My chief concern is that my wife, from my estate, shall have all she requires for her comfort and pleasure, and that my mother shall be provided with whatever money she requires to make her old age comfortable and happy.

Witness my hand and seal, this 22nd day of October, 1897, to my last will and testament, made at the city of Washington, D. C.

WILLIAM M'KINLEY.

It is given out on authority that the McKinley estate will total \$225,000 to \$240,000, including life insurance of \$67,000. Aside from the \$67,000 mentioned, the estate consists of real estate contiguous to Canton and of deposits in Washington banks.

FIRST IMPRESSIONS OF SHANGHAI.

Mrs. Patton's many friends in Yokohama will be glad to learn from private letters received, that she has already made an excellent start, having between the 1st and 8th of October, the date of her last letter, booked a sufficient number of pupils to clear her monthly expenses, including rent, which she says is a huge item compared to what it was in Japan.

She describes Shanghai as being such an immense place that it will take a long time for her to become known to all the foreign residents, for she says she finds that the Shanghai folks as a rule, know little, and are careless, of what is taking place in Yokohama or elsewhere, so that her present pupils have been obtained only through the few friends who knew her in Japan, and it will be necessary for her to make a local name for herself before she can reach the majority of the community.

In spite of her good pecuniary prospects, Mrs. Patton is evidently not very favourably impressed with Shanghai so far, for she writes that the only three redeeming points she has yet found to compensate her for quitting Japan, are—first, that she can go to sleep at night without fear of being disturbed by earthquakes,—secondly, that the little street sparrows, notwithstanding they have to exist on the eaves of three and four storeyed houses and are smothered by the soot from chimneys innumerable, yet twitter at early morn much more sweetly than she has ever heard them in Japan—and lastly, her experience of her first private dancing pupil was that he paid in advance, without any demur, \$25 for the same number of lessons for which she would have received \$9 in Yokohama!

But as a set-off against this last cheerful item, the expenses of living are certainly higher on the whole than in Japan, and rents are exorbitant! Mrs. Patton thinks it should reconcile foreigners to the income tax to which they are now subject under Japanese jurisdiction, and which they consider so oppressive, to be informed that there is a Municipal tax of 10 per cent. monthly levied upon all rents, so that directly a tenant takes a house he becomes liable to a 10th of his rent every month. This gives him the inestimable privilege of a vote at all special meetings of ratepayers, but in her case, she does not at present feel that the game is worth the candle; her rent (for a flat on a third floor) being 90 taels a month (averaging \$122 in Japanese yen), thus making her monthly tax 9 taels, or in round numbers 12 yen, an annual addition to her rent of \$144 Japanese yen which sum is more than \$50 yearly in excess of her

average income tax to the Japanese Government when living in Yokohama.

There is also a municipal tax of \$2 a month for keeping a private jinrikisha! Mrs. Patton thinks there would be a great outcry amongst the foreigners in Japan if they were called upon to pay \$2 every month for the privilege of keeping a jinrikisha! There are, when all is said and done, many worse places to live in than Japan, particularly as regards the simple, but elegant and inexpensive luxuries which people who have lived there long will never know how to appreciate at their true value until they lose them.

In regard to flowers, for example, Mrs. Patton says that one of her deprivations is the absence of the daily or weekly visit of the Japanese flower-sellers, with their lovely stock of half-blown blossoms on the long stalks that fit so gracefully into a Japanese vase. The best that her servants (who feel the want as much as herself), can do, is to bring home from the market a handful of wilted asters and marigolds on stalks about three inches long, already over-blown, and ready to fall to pieces as soon as put in water. The sense of the aesthetic which a long residence in Japan certainly tends to foster, meets with rude shocks at every turn in China, where the eye of the new arrival receives on its retina the first impression of a bewildering phantasmagoria of pig-tails, with the filthiest of human beings attached to them, haunting one day and night like some evil night-mare from which there is no awakening!

In conclusion, Mrs. Patton states that with regard to climate, she experienced during her first fortnight in Shanghai almost every variation of which a climate is capable. Heavy muggy days, with an atmosphere so thick as to make the mere act of breathing an effort—sloppy, rainy days, when perhaps Shanghai did not look worse than any other large city under similar conditions—days cold enough to require a fire, alternating with others of clammy heat, and, few and far between, a day as clear and bright and cheering as would be desired. But as the papers had been notifying that a typhoon had been cruising about the southern coast of Kiushiu during the time, it may perhaps be fairer to absolve Shanghai from being answerable for all these vagaries of climate, and throw the whole responsibility of them on the typhoon.

LAW CASES.

After a four years delay judgment was delivered in the Tokyo Court of Appeal on the 24th inst., in the case of a man named Fukuda Tokunji. He was discharged on the ground that no proof existed against him. Readers may remember that this man, who was charged with burglary, either became insane or feigned insanity, and ate his own clothing. He also refused to speak except at rare intervals.

In the Yokohama Chiho Saibansho on Monday before Judge Yasuda, the hearing was resumed of objections by Mr. Hiyoki, the administrator in bankruptcy for Mr. Ozaki Naotaro, to the claims of certain of the latter's creditors. The administrator contended among others that the claim of Messrs. Sale & Co. for payment of yen 465.610 ought to be refused.

In the Yokohama Chiho Saibansho on Tuesday, before Judge Kano, the hearing was begun of a suit by Mr. F. W. Horne against Mr. W. S. Stone claiming yen 670.110 as compensation. Plaintiff received an order from defendant on June 6th, 1900, for six phonographs but defendant declined to take delivery on the plea that electric batteries and other fittings were not sent with the six phonographs. Defendant ordered electric batteries on June 15th, 1901, but they had no connection whatever with the phonographs. On July 15th the phonographs were sold by auction. Plaintiff claimed compensation for damage, with seven per cent. interest till the day of auction. Defendant contended that he ordered from plaintiff six phonographs, together with electric batteries, and was there-

fore not responsible for damages. The hearing was adjourned till Nov. 7th at 1 p.m.

Judgment in the McGlew divorce case was given at the Kobe Chihō Saibansho on Monday, according to the *Kobe Herald*. Divorce was granted and costs were given against respondent.

On Saturday morning, says the *Nagasaki Press*, a court-martial was held on board H.B.M.S. *Alacrity* on John Joseph Baxter, ordinary seaman, charged with striking Mr. Frank Roomes, master-at-arms, of H.B.M.S. *Glory*. The prisoner pleaded guilty, and was sentenced to two years' imprisonment with hard labour and dismissed from H.B.M.'s service.

In the Yokohama Chihō Saibansho on Thursday before Judge Kono, the action by Mr. J. Mendelson of No. 258, claiming the payment of yen 2,122.69 as compensation from Mr. Tanaka Nijuro, living at No. 17 Nishigashi, Kyobashiku, Tokyo, came up. Plaintiff imported from America last year 100 tons of manure in compliance with the order of defendant, but the latter did not take delivery of it from plaintiff. Judgment was given in default and the defendant was ordered to pay damage fixed by plaintiff at yen 2,122.69. The costs of the Court to be borne by defendant.

In the Yokohama Chihō Saibansho, on Thursday judgment was given in the civil suit brought by Mr. Tanaka Nijuro, living at No. 17 Nishigashi Kyobashi-ku, against J. Mendelson, of No. 258. It was adjudged by the Court that defendant should pay to plaintiff yen 1,000 and yen 1,200 but the claims of defendant for the payment of interest rejected.

In the Yokohama Chihō Saibansho on Wednesday, judgment was given in the suit brought by Mr. John H. Jewett, of Messrs. Bavie & Co. against Mr. Ozeki Katsunosuke, of Bente-dori Shichome. Respondent was ordered to pay petitioner yen 3,500.00 and yen 235.39 interest.

"GOD'S WAY."

Not thine the silver coronet of age,
The gentle call that bids the soul away;
The *Finis* set upon the finished page,
The darkness stealing o'er the closing day.
Nay, in the strong, bright noonday of thy life
Darkness fell on thee, and death's silent pall:
Even in the thick and glory of the strife
Came the sharp, sullen signal of recall.
"God's way!" The warrior bent his head, and so
Passed the strong soul to where all things are
clear,
Prepared unquestioning the road to go
Nearer to God, to whom God's self was near.
W. GILCHRIST WILSON, in the *Spectator*.

LITERARY NOTES.

Mr. Iacadio Hearn's forthcoming book is called "A Japanese Miscellany."

After a fairly prosperous career of thirty-four years the *Argosy*, founded by Mrs. Henry Woods, has come to the end of its voyage. Up to the last it has been well "laden with golden grain," but the public which once supported it has turned to new gods, and like many another old established magazine, the *Argosy*, though never conducted with greater spirit than during the past few years, finds itself confronted with a steadily decreasing circulation. So the publishers have given up the struggle.

In the *Pall Mall Magazine* Mr. Tighe Hopkins re-tells the story of how the first Baron Tauchnitz conceived the idea of publishing foreign authors in their own languages, and paying them, before there was any international copyright. In the original prospectus issued to English authors Baron Tauchnitz said:—

Allow me to remark that I, as well as any other publisher in Germany, have at present the right to embark in such undertakings without any permission from the authors; and that my propositions arise

solely from a wish thereby to make the first step towards a literary relationship between England and Germany, and towards an extension of the rights of copyright, and to publish my editions in accordance with those rights.

From this generous dealing grew up the great firm which to-day has an unrivalled position on the Continent. Lord Lytton and Dickens were the first English authors to be approached by Tauchnitz.

The death of Lord Morris, remarks the "Book-worm" of the *Academy*, has led to the resuscitation of at least one venerable anecdote with which the deceased had no association whatever. It is the story of the extremely décolletée lady, of whose appearance (it was at a ball) some one said to a judge, "Did you ever see anything like it?" To which the judge replied, "Not since I was weaned." Well, this tale was told of Chief Justice Doherty in W. H. Harrison's "Reminiscences," and a variant on it has place in the *Diary* of J. C. Young. Why does not somebody write a book on *The History of Jest*?

Mr. Arthur S. Way (the translator of Euripides and Homer) has published through Messrs. Macmillan a rendering of the Letters of St. Paul into a modern English which shall be easily intelligible for the ordinary reader. Mr. Way explains in a preface his reasons for departing from the word for word translation of the Authorised and Revised Versions, and for supplying as he has done in places, brief links to indicate the connection of the thought. He claims, however, that his rendering is strictly a translation, not a paraphrase, and that it should convey its meaning to the reader to-day, as Paul's written words conveyed their meaning to the community addressed.

The Alfred Millenary has produced a wealth of books in England this year dealing with the great King. One of the most interesting we have met is published by Mr. Elliott Stock, and the writer is Mr. J. Charles Wall. It deals with the abbey which the King founded. Asser has told us that "the love of a monastic life had utterly decayed in the nation," long harried by heathen folk. Besides the purposes of devotion, sanctuary and almonry, Alfred desired to have round him not mere sinewy axe-wielders but scholarly leaders of a civilised people. Having fetched from Artois Grimbald—saint, musician, and theologian—and from Wales the learned Asser, and other teachers from other quarters, he gave his nobles and aldermen the choice either of acquiring learning or of retiring. They accordingly "applied themselves surprisingly to study," though some of the old warriors, puzzling over horn-book and crabbed page, had to be helped by princely youth. Thus arose Hyde Abbey, originally Winchester New Minster, whose secular canons were reformed in 965 into regulars of S. Benet. In 1180, after much clashing between their bells and those of Old Minster, the Benedictines removed in solemn procession to the extramural Hyde Mead, carrying the golden crucifix given by Cnut, the sacred vessels and images, relics of S.S. Grimbald, Budoc and Valentine, and the bodies of Alfred and his royal house. When in 1538 with the pliant aid of the last mitred abbot, Salcot, this illustrious house was pillaged, and the "rotten bones swept away," the tomb of the greatest monarch of English race probably remained intact, either till Cromwellian times or, as Mr. Wall shows evidence, till 1788, when, the site being required for a gaol, a sarcophagus found in front of the high altar was sold for a trifle and the contents thrown upon a refuse heap. Of Alfred's lesser foundation, the Abbey of Athelney, near the spot where he stood god-father to Wardragon Guthrum, even fewer vestiges remain; but the interesting "Alfred's jewel" in the Ashmolean is a relic at least of his sojourn in the Isle of Athelney.

Mr. Frank Hugh O'Donnell's address to the Independent Nationalists of Galway is an entertaining document. He alludes to the present Nationalist Parliamentary party as "the bounding brothers of the circulating hat," and after some detailed criticism of their achievements at Westminster, concludes:—"These are the coruscating

flashes of statesmanship of the United Irish jackasses. Independent Nationalists of Galway, you are a fast diminishing tribe, thanks to the Mosaic One and the Melancholy One. Since the rigged Convention was substituted for the free suffrage of the masses your birthright of liberty has been the toy of every thimbleigger. But have you lost all power of resistance to the most impudent of charlatans? Do you want to see these gentlemen carried out again kicking by policemen? Send your subscription to the *Freeman*; they will do it again for a few coppers; but do not dishonour Galway in perhaps its dying hour." Election addresses are not an exhilarating form of literature, but Mr. O'Donnell's intrepid vituperation recalls to the staid mind of the editor of the *Spectator* the controversial methods of Eatanswill.

On the completion of their "Information for the People," W. and R. Chambers began the issue of a new work on Saturday December 3, 1842, entitled "Cyclopædia of English Literature, consisting of a series of specimens of British writers in prose and verse, connected by a historical and critical narrative." It was completed in eighty-six weekly numbers, and the first volume appeared in 1843 and the second in 1844, price seven shillings each. Robert Chambers, assisted by Dr. Robert Carruthers, of Inverness, was mainly responsible for the book, new editions of which appeared in 1858 and again in 1876. The first volume of a new edition of the "Cyclopædia," which has been greatly extended and in large measure reconstructed and rewritten, is announced to be ready early in November. The work, which is under the capable editorship of Mr. David Patrick, LL.D., editor of "Chambers's Encyclopædia," will be completed in three imperial octavo volumes. The first volume is illustrated by nearly 300 portraits, specially reproduced for the books from authentic paintings and engravings.

Whatever may be their opinion of the ethics of Dr. Ibsen's plays, most people will deeply regret the failing health of the veteran dramatist. It is a foregone conclusion that his life cannot last more than a few months. The State bears the heavy cost of the three physicians who attend him. Yet with his intellectual capabilities still left, he insists upon writing an apology of his life, in the sense in which Newman used the term, and insists on writing every line himself, and no one is allowed to see it. He even went so far as to start destroying his manuscripts, but his friends succeeded in rescuing most of them.

Mr. Douse, in the *Home Counties Magazine*, adopts the suggestion of Kluge, and adduces evidence to show that the name "Surrey" means the land of the South Rige (the Rugii of Tacitus), who were found on the Baltic about the Oder. Early in our era the Goths dispossessed them, and some migrated to the south, west, and north-west. It is probable that some found their way to Britain in the fifth century under their own chief or king. Eastry, near Sandwich, Kent, is called the "district of the Eastriges," in a charter of 788. In corroboration of Mr. Douse, a writer in the *Globe* avers that he has seen an old map in which Surrey is named "Sud-reg," and further remarks that from 400-600 A.D., the great migrations of the Slavs from the south and east of Europe, which carried them, among other places, to the Baltic and north-western countries, by pressing on local tribes, is now thought to have determined the whole Anglo-Saxon, Frisian, and Intish migration to Britain after the Romans left it open.

JAPAN IN KOREA.

The following letter from *The Times* Peking correspondent who recently paid a visit to Korea, will be read with interest in Japan:—

On the occasion of my last visit I found that it was admitted by all that the position of most power and influence in the peninsula had been obtained by the Japanese. And, guided by a Minister of exceptional capacity and adroitness, they have well maintained the position. While acting with much caution they watch with the keenest vigilance every movement made by Russia, especially along the Korean frontier.

Their numbers are constantly on the increase, and they are distributed over every portion of the peninsula. Protected by the rights of ex-territoriality they wander over the country, gaining by their keener wits advantages over the good-natured but improvident natives. Their land transactions are a constant source of trouble. A Korean can never resist a money loan, however severe the terms, whether he be in need of money or not. In the acquisition of title-deeds full advantage is taken by the Japanese of this national characteristic. By transactions in land which have not received the approval of the Japanese Minister a greater portion of Roze Island, an island occupying a conspicuous position in the harbour of Chemulpho, was acquired by a Japanese speculator. By similar transactions a large portion of the *ginseng* fields near Songdo became Japanese. Disputes were rife in both cases, but in both cases have the disputes been arranged. In the case of Roze Island a sum of £5,000 is all that is needed to induce the Japanese to surrender his title. In the case of the *ginseng* lands the entire crop has been farmed by the powerful Japanese company, the Mitsu Bishi.

The railway to Chemulpho has been completed and the imposing bridge across the Han River, which will be used for the Fusan Railway, is now in full working order. It is an excellent piece of work. The fisheries of the coast are mainly Japanese, the telegraphs are Japanese, the shipping is nine-tenths Japanese. Japanese have a virtual monopoly of the coal mines of Ping Yang for five years. Finally nearly all the banking of the peninsula is in the hands of Japanese banks; the bank notes and coinage are Japanese.

Russia, recognizing the present power of Japan, and realizing the immense disadvantage under which she lies in relation to Japan, at any rate for the next two years, treats the Japanese with studied conciliation, ostensibly communicating to the Japanese Legation the movements and expeditions of the Russian troops in Manchuria, especially when they approach the Korean frontier, whether at the Yalu River or at the Tumen. For some time past there has been much excitement in the neighbourhood of the Yalu. Chinese refugees have been fleeing in thousands to Chefoo. But it is impossible to ascertain if they have been driven only by their fears or whether there is a recrudescence of activity on the part of the "red-haired rebels," the Hungtutzes. Borderlands are proverbially scenes of unrest and disaffection inviting foreign interference. Uprisings at the Yalu would give opportune action for Russian intervention.

The Masampo question is in abeyance. Japan has obtained there within the treaty port limits a concession exactly balancing the Russian concession, and so the rivalry continues. An advantage gained with much diplomatic skill by Russia is at once met with a compensatory movement on the part of Japan.

At Quelpart Island the disturbance provoked by an attempt on the part of Yi Yong-ik, the Minister who is at present highest in favour at Court, to impose taxation from which the people have been exempt for centuries, nearly ended in an international complication due to the importation into the uprising of a number of spurious native Christians who joined the Church *en masse* in order to obtain French protection. No foreigners suffered injury. Troops were sent from Korea, and the dispute was adjusted. It is interesting to note that the troops selected to cope with a situation which might have caused difficulty with France were the local levies from the island of Kanghoa, near Chemulpho. They added fresh laurels to their crown. Ever since the repulse of the French expedition under Admiral Roze in Oct., 1866, the troops of Kanghoa have been regarded by the Koreans as more than a match for "French barbarians." So they were sent to Quelpart, and the strife ended.

Nothing further is known here regarding the Anglo-French loan, the preliminary contract for which was signed by M. Cazalis on behalf of the Yun-nan Syndicate on April 15. Its terms have no doubt been already published in London. Its first four clauses read:

I. M. Cazalis s'engage à prêter au Gouvernement Impérial Coréen la somme de cinq millions de dollars argent (environ douze millions et demie de francs), cette somme devant être employée à la fabrication de monnaie d'or et d'argent et à la mise en exploitation des mines de charbon de Pyeng Hyang.

Sur ces cinq millions de dollars deux tiers seront fournis en lingots d'or et un tiers sera fourni en lingots d'argent. Ces lingots seront livrés à Chemulpho.

Ces lingots devront être en or et en argent purs. Ils seront essayés en Corée, et si on y trouve un mélange de cuivre ils seront refusés.

II. Les conditions de ce prêt seront les suivantes:—Intérêt, cinq et demi (5½) pour cent par an; commission, de dix (10) pour cent pour frais de banque.

Remboursement total dans le délai de vingt-cinq ans.

III. L'amortissement sera divisé en vingt-cinq versement égaux à raison d'un versement par année.

Le premier versement aura lieu une année com-

ptée après le jour où les lingots auront été livrés à Chemulpho.

Ces versements devront être effectués par le Gouvernement Impérial Coréen dans la banque qui lui sera désignée par M. Cazalis.

Ils seront faits en lingots d'or ou d'argent, ou en tout autre monnaie agréée par M. Cazalis.

IV. Pour le cas où le Gouvernement Impérial Coréen ne pourrait pas effectuer régulièrement les versements relatifs à l'amortissement, il est convenu que le service de cet amortissement sera assuré par un prélèvement sur les recettes des Douanes Maritimes de la Corée.

The fears so widely stated in the Press that the loan proceeds would be applied to the construction of the so-called French railway to Wiju, on the Korean frontier, there to be linked on to the Russian Manchurian railway, are not shared here. For the loan proceeds cannot be applied to railway construction, and the railway projected to Wiju is not a French railway, except is so far that by an agreement signed on June 26th, 1899, such a railway, if built by the Koreans, must employ only French engineers in its construction and use only French material. The length of the line is 350 kilometres. The Koreans have certainly no intention of building the line. The money is needed for the Palace and will quickly disappear, frittered away in senseless extravagances. The real object of the loan was to obtain control of the Customs, the service which is most economically managed in the best interests of the Korean Government. To do this required the withdrawal of its chief commissioner, Mr. McLeavy Brown, who by agreement has absolute control of the Customs till October 31, 1905. A crude attempt was made to influence his decision and, by exposing him to some personal slight, induce him to retire from the chief commissionership. He was boycotted by the Koreans; his interpreter, Kim Ku-yi, was threatened with strangulation and exiled to Chinnampo; his garden was invaded by Palace eunuchs; he was called upon to give up his house, his garden, and offices to the Emperor. But support was quickly forthcoming. Energetic action was taken by Mr. Gubbins, the British *Chargé d'affaires*, and Mr. Brown retained his position.

NEWS OF THE WEEK.

Mr. Date Bunzo, M.P., of Shizuoka, died on the morning of the 25th ult.

Mr. Ishii Nizayemon, of Kanakura District, was elected a member of the prefectural assembly, on the 26th ult.

Five vessels of the Russian squadron were to arrive at Nagasaki on the 26th or 27th October from Vladivostock.

A *Times* telegram from Suez says that Arabi Pasha, on being interviewed, expressed the warmest admiration of British rule in Ceylon.

The Servian army threatens to resist the resolve of King Alexander to appoint the brother of his consort as successor to the Servian Throne.

Matsumoto Kimihei, living at Futabacho, Honjo, Tokyo, was arrested by the Honjo police on the night of the 26th ult., charged with uttering counterfeit coins.

Fire broke out in a public bathhouse at Nakanocho, Kuwanagori, Miye Prefecture, on the night of the 24th ult. Fourteen houses were destroyed. Seven visitors to the bath were injured.

Saito Shinosuke, living at Nishi Tobemachi, Yokohama, was arrested by the police on the night of the 28th ult. charged with cutting the face of his landlord with a knife during a quarrel.

Mr. Mehta, the Parsi cricketer, has resigned his appointment in the Patiala State, where he was captain of the Household Troops. He goes to England to qualify for Gloucestershire.

Iwabori Jukichi, living at Nishi Torikoye-cho, Asakusa, Tokyo, was arrested by the police on the afternoon of the 26th ult., on a charge of stealing several articles valued at yen 4,000 from various waiting rooms of the Tokaido stations.

At Singapore, on the 10th ult., there was a sale of land belonging to the Trustees of the Church family, relations of Mr. Thomas Church, a Resident Councillor of Singapore in its early days. The total amount realised was \$684,000,

and the highest price per square foot ever obtained in Singapore—\$52—was reached.

Kasuga Sadashige, Nakajima Yesuke, and two others living at Morishitacho, Asakusa, Tokyo, was arrested by the Asakusa police on the 27th ult. and charged with obtaining yen 310 from a countryman of Chiba Prefecture by fraudulent means.

Iguchi Moju, a railway watchman living at Yamagita, Kami Ashigara-gori, Soshu, while sitting in his watch box at Kyowa-mura, on the night of the 24th inst. was tied up by two men armed with sword-sticks, and deprived of his wages and some articles.

Part of the Tokyo forts artillery were marching from Yokosuka to Hashirimizu on the morning of the 26th ult. when a gun carriage fell into a ditch and capsized the gun. Four soldiers were injured,—one very badly and he is not expected to live.

Over five hundred farmers, belonging to Aitakayama, attacked the town office of Numazu, on the afternoon of the 28th ult. Several police inspectors and constables appeared on the scene and eventually restored order. The trouble arose about the laying out of a public road.

Four youths named Tanaka Yoshikichi (17), Ito Kotaro (14), Yamada Seikichi (14), and Kawamura Shujiro (15), were arrested by the Kanda police on the 27th ult. on a charge of having stolen a cash box containing 37.27 yen from a tobacco shop at Norimono-cho, on the night of the 4th inst.

Yamaguchi Katsuji, of Nagano, was arrested by the Yamate police on the morning of the 26th inst. in a house of ill-fame at Yeirakucho, Yokohama, on a charge of having made an armed entry into the house occupied by Tajima Tadao, at Negishimachi, Yokohama, on the night of the 25th ult. He stole nineteen articles, valued at over yen 195.

On the 24th ult., the festival of the 13th moon was held at Ishido-mura, Kita Adachi-gori, Saitama Prefecture. All the farmers took a holiday and attended theatricals at Takao. A storm came on at night and some twenty persons of Higashi Yoshimi-mura, proceeding up the river in a boat on their way home were capsized and three were drowned, the rest escaped.

A *sendo* named Yamada Ushimatsu, of Chiba, living at Kanagawa-machi, Yokohama, was arrested by the harbour police on the 28th inst. charged with having stolen several articles belonging to a shipping and forwarding agent named Inouye, Motohamacho, Yokohama, during the past few months.

The P. and O. steamer *Australia* took home a very handsome present for Major-General Baden-Powell. The gift consists of a sword of honour with a hilt of Australian gold, and its intrinsic value may be judged from the fact that it is insured for £400. The sword is presented by the citizens of Australia, in commemoration of the heroic defence of Mafeking.

A Buddhist engraver named Abe Yoshitaro, living at Shiocho, Yotsuya, Tokyo, was arrested by the police on the 26th ult. charged with a sacrilegious robbery. He had been ordered to repair an image belonging to Morita Yasuji, at Nakano-mura, Tokyo, in July last, but instead sold it for yen 100 to a foreigner and replaced it by an imitation. The stolen figure was a well-known piece of ancient work by Hidari Jingoro.

A farewell tiffin was extended to Mr. Thos. Wallace McIlraith at the Yokohama United Club on Saturday. Mr. E. Flint Kilby was in the chair, and after the repast proposed the health of the departing guest. He wished him, his wife, and son, every success and happiness in Shanghai, for he felt sure that with the wider scope that China presented Mr. McIlraith would find work congenial to his tastes and commensurate with his abilities. After hearty good wishes had been extended by Mr. V. R. Bowden, Mr. F. H. Bug-

bird, Mr. A. J. S. Lefroy, and Mr. A. Bellamy Brown, Mr. McIlraith returned thanks in suitable terms.

The East window of Christ Church, which it was found impossible to have in place when the Church was consecrated, has now arrived and the congregation had an opportunity last Sunday for the first time of seeing and admiring what must be termed an artistically beautiful work. The subject is "The Transfiguration" and in its illustration the builders, Messrs. Heaton and Co., of London, have made full use of the resources which decorators have at command in these days. The high state to which the art has been carried is demonstrated by the subdued and lovely hues and combinations which this work displays. Arriving here some three weeks ago, the window was quickly erected and as we have said was disclosed to the congregation on Sunday last. The cost, we believe, was £150.

The Isezakicho Police arrested on Oct. 28th a man named Adachi Keihiro, a native of Okayama, who is accused of several shady transactions. His latest exploit was to lease a room in the house of a *jinrikisha*-man in Otamachi Rokuchome, Yokohama, for which he paid *yen* 4 per month. There he displayed a signboard with the title "Nichi o Boyeki Shokwai" and gave a seal to the house-owner wherewith to give receipts for registered letters. He then advertised in the Osaka papers as agent of the English Watch Company of London, offering silver watches at *yen* 2 and gold watches at *yen* 4, with a sale limited to 2000 of each. Up to the 28th he had received 35 registered letters, 131 postcards, 104 ordinary letters, and money orders to the value of *yen* 700.

CORRESPONDENCE.

"MORMONS."

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In the *Mail* of the 22nd, another communication appears with some additional advice to the "Japanese of the present day" and "especially the officials." It is often said that advice is cheap, and if I ever had any doubts as to the truth of this statement they have vanished, since my arrival in Japan, because of the colossal amount of it which has been given to the Japanese on the "Mormon" question.

Your correspondent who sent the "communicated" item regarding an incident which happened at the time Prince Iwakura headed an Embassy which stopped for nearly three weeks at Salt Lake City, has taken advantage of this incident, which, by the way, I never heard of before although a resident of Salt Lake at the time, to get a slap at the "Mormons," but his aim will go wide of the mark for which it was intended.

Since my arrival in Japan I learned with regret that Mr. Fukusawa, one of the Embassy in question, has passed away from this life. I would have been pleased to meet him, and feel sure that a man who had done as much as he had for the advancement of his people educationally would be, as all broad-minded men are, pleased to reciprocate the kind treatment which they have at any time received. I am sure he would not have stopped to ask the question, "Was my kind treatment while in Salt Lake City, received from the despised 'Mormons'?" if so I must forget that I received it and in return treat them with contempt.

The Embassy was extended the hospitality of our city, and its members made quite a study of municipal government during their short stay there and also looked into the peculiar Territorial system which they found in Utah. Everything was done that could possibly make their stay a pleasant and profitable one, and I am sure the Japanese people are not the ones to resent kind treatment and hospitality, even when received from the much abused "Mormons;" consequently your correspondent could have saved himself the trouble of discharging his toy pistol at the "Mormons."

Many influential men admit that Brigham Young was one of the great men of the nineteenth century. My recollection of his being "unwillingly confined to his room in charge of a Federal officer," referred to by your correspondent is, that a decision was rendered against him, which he refused to obey, and he was therefore, sentenced for contempt and detained in his own home. The case was appealed and the Supreme Court of the United States reversed the decision. The President of the United States, Ulysses S. Grant, was so much annoyed with the outrageous decisions which were being rendered, without

the slightest regard for the law, against the "Mormons," at this time by U. S. Chief Justice James B. McKean, that he unceremoniously removed McKean—something almost unheard of in the treatment of Chief Justices in America. The President of the United States was not offended at Brigham Young, but with the Judge who rendered the decision against him, therefore, Prince Iwakura would have lost no prestige with President Grant had he called on the "Mormon" Prophet.

Yours respectfully,
HEBER J. GRANT.

THE LABOUR QUESTION IN BRITISH COLUMBIA.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—A good many hard things have been said lately regarding the attitude of portions of the British Empire towards certain classes of foreign emigrants, and I think that the views of the great Province of British Columbia have been somewhat misunderstood.

As all are doubtless aware, British Columbia is cut off from the rest of the Dominion by several great ranges of mountains, which we lump under the name of the "Rockies." For years it remained quite distinct from the other Provinces, more separate in interests and ideas than it was by constitution and geographical position, and this aloofness even confederation and the C.P.R. have not yet been able to overcome.

The population of British Columbia was estimated in 1900 as being 175,000, and of this number, at the outside, no more than two-thirds are Whites, and of the remainder, there are from 10,000 to 15,000 Chinese, 24,000 Indians and some thousands of Japanese, and there are also an uncertain number of half-breeds. These figures of course are only roughly approximate, but they are near enough, and show how easy it would be to swamp the White British population as far as mere numbers go.

But the question confronting the Province is not one of the future but of the present. Its own nationals are being crowded out of the labour market. Not because they are being replaced by more skilful workmen, but because aliens can flourish on wages that a Canadian cannot live on.

A new country is colonized and developed by labourers, or men who are willing to become such for the time being, and if the labourers employed are Chinese, Italians and Japanese, the country will soon practically belong to those races.

Can it be wondered at that the local legislators have sought to protect their countrymen and keep the Province for them, by passing restrictive Acts? Their action has been put down to "racial prejudice" and called "narrow" and "selfish," but surely ordinary patriotism could demand no less.

When the writer lived in Eastern Canada he looked with the same indifference as the rest of Canadians east of the Rockies look upon questions concerning British Columbia; regarded the agitation against cheap alien labour as the selfish clamour of the Labour Party and as being narrow and un-British. But once across the divide and it was different. All along the railway were gangs of workmen, Chinese coolies, varied by groups of Italians; and at this very time men, white men and Canadians, were crying out for work, men who had been crowded out by foreigners who worked "cheap."

Later the writer travelled somewhat in the interior of British Columbia, in districts remote from the railway, and passed through village after village, where one had to rub one's eyes and ask if this could really be Canada, these Canadian villages, with their wretched dirty hovels and weird-looking signs in hieroglyphics over the doors. Could it be possible that these men one encountered everywhere were enjoying every right and privilege of a British subject?

A short residence in Vancouver only increased the sympathy felt for the native labourer. One met men who had left their homes in the East thinking to better themselves in the young and growing West, many looking in vain for employment. On the railway, in the canneries, in the saw mills and in the hotels, everywhere the same old story, and then one wondered no longer that the labour question had in this new land already reached an acute stage.

Would the voters of Eastern Canada remain idle if the question was brought home to them? Would even the Mother of Parliaments be indifferent if the workmen in London were threatened in the same way?

It is easy for those at a distance to talk about "Imperial Interests." Colonials have already given up much at that call. Those at all acquainted with the history of Canada know how bitter at times has been the feeling over the sacrifice of Canadian interests with the greatest indifference by the Imperial Government. Huge slices of Canadian territory have been surrendered to the United States with the greatest good humour by those in London. Canadians have had the mortification of seeing Americans—

very queer ones sometimes—honoured and feted in London while they were ignored or snubbed. It is to the credit of Mr. Chamberlain that this is no longer the case, and that the rancour of years has given place to an ungrudging loyalty, but there is still deep in the heart of every Canadian the feeling of "Canada first."

What would probably be the action of the Japanese Authorities in a similar case? Would they—do they—gladly open their arms to the Chinese, Korean and Indian coolie? Do they even make it easy for the best class of foreigners to become land owners or engage in mining? Would they tolerate a foreign-owned fleet of fishing vessels in their waters? If such a thing were possible would they welcome thousands of Canadian, Australian and American labourers, who, by accepting lower wages than the Japanese coolie could live for, would oust him from his place at the hatoba, on the railway, in the mines and at the *jinrikisha*? Have they ever been so indifferent to the interest of their own nationals as that? It is a well known fact that the opposition of *rikisha* coolies was strong enough to kill a projected electric tramway, nor are the men who fought for their rights on the Fraser River likely to be less backward in asserting themselves in their own land.

Yours faithfully,
J. C.
Yokohama, October 23rd, 1901.

STRAW COMPLAINTS—AND OTHERS MORE SUBSTANTIAL.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Straw rope does not inspire us foreigners with confidence in its strength, but as the guard on the train, who must have been aware of its presence on the brake-coupling (as described by "Constant Traveller") was willing to risk a journey with it, the obvious conclusion is that it was strong enough for the purpose it was used for, whatever that may have been. "Constant Traveller" speaks of "straw couplings," but that is evidently a misleading phrase as applied to what he saw. No break-down appears to have resulted. Of course it was an untidy trick to use straw rope to keep an uncoupled and defective brake-tube from slipping off its stanchion, and to leave it on the tube afterwards, but it is wholly likely that something of that kind occasioned your correspondent's nervousness.

I am something of a constant traveller myself, and have seen more or less of the railways all over Japan. Their management leaves, it is true, something to be desired; so does the management of most railways everywhere. Especially is this noticeable in the case of the Government lines, which seem to be distinctly behind some private lines in certain respects. But it is wholly unfair and incorrect to suggest that Japanese railway administration is reckless of safety. Such a notion seems to me about as far from the fact as anything can be. Neither have I found railway servants otherwise than civil, and often they are most polite. As to dirt, what railway using bituminous coal in its engines can be expected to have the carriages always immaculate? Many Japanese travellers have a queer habit of littering the floors of the carriages with fruit parings and such things, which most Westerners would instinctively throw out of the windows; apart from this, I am not sure that Japanese railway carriages are very much dirtier than railway carriages generally, though to be sure they are not remarkably clean.

But there are some defects in the service on the Tokaido railway that ought to be remedied, and the authorities would perhaps be more apt to consider suggestions with regard to these, if they were not sometimes annoyed with thoughtless and offensive complaints. Of these defects the most important are, I think, the following:—

1. *Bad Running-car.*—Many of the carriages sway diagonally with such violence that a seat anywhere except just in the middle is most uncomfortable. This is as true of some carriages lately put on (whether new or renovated I am not quite sure—the upholstery is noticeably good) as of older ones. Certain long carriages, *quasi* American in style, do not sway much, but make up for this by jolting most unmercifully. A long ride, or frequent rides, in these vehicles may be really dangerous to health in some cases. It is useless for the Railway Bureau to say that these discomforts are unavoidable, for there are certain carriages in use on the same line, built in Birmingham, that are perfectly comfortable, on the same track, and at the same speed. "What man has done, man can do."

2. *Bad Lighting.*—People who seldom travel may not care much about the lighting of the carriages at night, but to those who are obliged to spend much time on the railway this is an important matter. The through express trains are, I believe, fairly well lighted, but certainly the local trains between Yokohama and Tokyo are not. The lamps give such a poor light that the authorities might just as well put

only one lamp to a carriage and save two-thirds of the oil bill. Nobody can read, unless by standing up and holding the page near the light. Some experiments have been made with electric lights, but such lights have not been regularly installed except on the Kobe express; there was a rumour a year ago that the obstacle was simply the matter of expense. But if funds are not available for the "axle light" fittings, why can we not have the lamps now in use slightly altered, so as to be like those used on the Nippon Railway? The cost would be trifling, and the improvement would be great. Better still, though less simple, they might perhaps be remodelled so as to burn acetylene gas.

3. *Whimsical Make-up of Trains.*—The railway now has plenty of carriages equipped with lavatories. Unfortunately a good many of the old style, without those necessities, are still considered too good for the scrap-heap. It might be wasteful to discard them wholly; but can any mortal man assign a good reason why trains with runs of one, two, or three hours should sometimes be composed wholly of these old carriages? It would actually be less inconvenient to regular travellers if it were made a rule that certain *never* had lavatory carriages, than to have a train for nine days successively made up with proper consideration for the comfort of passengers, and on the tenth day to have that same train no better than one of twenty years ago! Yet such freaks are actually indulged in at Shimbashi, and have been for two years past at least.

Other things might be mentioned, such as the absurd regulation that forbids passengers to carry private lights, no matter how safe or how clean; though fire applied to tobacco is not objected to! Stupid at best, such a rule becomes odious when the authorities do not themselves light the carriage properly. The gentlemen of the Railway Bureau may remember that some of these matters were mentioned in a communication to the *Japan Times* a good many months ago. Improvements such as bell-cords that are never used, and red targets on the rear of trains in the daytime that nobody needs, may be all very well to show that the Bureau is not asleep, but there is such a thing as misdirected energy. Attention to the three items above mentioned would be a boon to the travelling public. Why is it not given?

I am, &c.,

Tokyo, Oct. 24th.

C.M.B.

THE BODY POLITIC AND THE CIVIL SERVICE IN CHINA.

PART I.

CHAPTER I.—THE EMPEROR.

The Emperor in China, as the Emperor in Russia, is sole, absolute and autocratic sovereign (*samoderjajemodierjtsu*). He is absolute, but not necessarily arbitrary. As the modern word "liberty" does not mean liberty on the part of the individual citizen to do wrong or whatever he likes, but liberty to do what is right, so absolutism in China does not mean absolute power on the part of the sovereign to do wrong or whatever he likes, but absolute power to do what he thinks best for the good government of the nation.

A prince once asked Confucius if the principle to ruin a nation could be expressed in one sentence. "That," replied Confucius, "is difficult. I find no pleasure in being a ruler except that whatever I order no man shall oppose. Now if what is ordered happens to be right, it is well and good that no man opposes it. But if what is ordered is wrong and there is no man found to oppose it—is not that alone sufficient to ruin a nation?" Therefore the principle of the saying "voluntas regis suprema lex" is not accepted in the theory of government in China.

But all power in order to be effective must be absolute. "I do not know," says Lord Beaconsfield, "whether the theory of the divine right of kings is any longer tenable, but I believe unless the Government which actually exists in a country has absolute power to do what it thinks right, good Government in that country is an impossibility." This saying of the great English statesman is the keynote of his famous Imperialism. Imperialism, as Lord Beaconsfield conceived it, did not mean world-wide Empire, or the self-assertion of the Anglo-Saxon race. With Lord Beaconsfield, Imperialism meant *disinterested government*.

It is interesting to trace how Lord Beaconsfield came to his conception of Imperialism. The great statesman has himself said that he first understood the state of government of Great Britain when he discovered that the so-called Liberal party of his time had really become an oligarchy. The great Liberals of the two preceding Revolutions, in order to break down the barrier which divided the old privileged court nobility and the new rising nobility of country gentlemen, had had to destroy the supreme prerogative of the crown. In the first Revolution Cromwell

and held it in trust for the people under military rule. After the second Revolution, the Dutch king, William the Third, tried hard to wrest back the supreme prerogative of the crown, and failing in the attempt died broken-hearted. After King William's time each party in Great Britain tried to grasp for power only in order to further the particular interest of each other's own party or class without regard to the interests of the nation as a whole. Finally the rising moneyed middle-class or *bourgeoisie* of Great Britain, which had grown prosperous in the long peace after the Napoleonic wars,—by making use of the "phrases" of the great Liberals of the past generation, formed themselves into an oligarchy calling itself the Liberal party. Lord Beaconsfield turned Radical and called in to his assistance rank democracy as Cromwell had called in his dragoons. But after having succeeded in breaking up the oligarchy calling itself the Liberal party, Lord Beaconsfield proclaimed Imperialism, i.e. disinterested government with absolute power without fear or favour from within or from without to do what it thinks right and best for the good government of the nation. Lord Beaconsfield, in fact, virtually made himself a dictator, but what may be described as a Constitutional dictator.

Now what the German poet Heine says of the unlimited absolutism in Russia is also true of the government of China, namely that it is really a dictatorship for carrying out the liberal ideas of modern times (*der Absolutismus in Russland ist vielmehr Diktatur um die liberalen Ideen unserer neuesten Zeit, in's Leben treten zu lassen*). The essence of the liberal ideas of modern times is the democratic principle "open door," which is contained in the famous saying of the great Napoleon, *carrière ouverte aux talents*—career open to all in the state service. In China, as Heine points out it is in Russia,—the nobility, or governing class, is founded not upon heredity or property, but upon state service (*der russische adel entsteht durch staatsdienst*).

But in all governments in which the democratic principle of open door is to be carried out, there is always this danger to the commonwealth (*re public*), namely that those actually in power are liable to be tempted to shut the "open door" and monopolising all political power, form themselves into an oligarchy. Now the only check to the formation of such an oligarchy is dictatorship, the supreme prerogative of the crown vested in one able and disinterested person—the sovereign. In the normal state of the government of the empire, says Confucius, "the supreme prerogative rests with the Emperor. In abnormal times, the prerogative passes into the hands of the princes and nobles, or governing class, of the Empire." Carlyle also thought that the real saving feature of the Ancient Roman Republic was the provision in its constitution for the creation of a dictator in periods of national crisis. In modern times some writers have attributed the success, or rather the escape hitherto from complete breakdown, of the Great Republic of the United States in America to the fact that the President of the Republic for the time he is in office is really a dictator, more absolute than the King of Great Britain or perhaps the Emperor of Germany.

Now the position of the Emperor in China is also that of a dictator. The origin of the power of the Emperor in the present system of government in China is really military power, the power of a military dictator. In order to understand this, it is necessary to go back to Chinese history.

In the earliest times in China, as in Europe, the moral culture, or what may be called the germs of civilisation in the nation, were deposited and entrusted for safe-keeping in certain tribes or families. The heads of those families or tribes thus became the earliest rulers of China. This was the period of what is known as feudal government. The basis of the governing class then was birth, *noblesse oblige*. But a time came in China as it has come recently in Europe, when the germs of civilisation had permeated into all classes of society, and not only that, but it was even found that the tribes or families in which the germs of civilisation were originally deposited for safe-keeping had become effete and worthless.

This was the period of expansion and reconstruction. It was then Democracy, with what are now called liberal ideas in Europe, arose in China, clamouring for "open door"—for the breaking down of the barrier which divided the privileged governing class by birth and the common people. This took place over two thousand years ago in China. Confucius, over two thousand years ago, lived in the beginning of this period of expansion and Mencius, the real and greatest expounder of what are now called liberal ideas, lived nearly at the end of it.

But all pure democracy could only end in one way—in military dictatorship. In fact the democracy in China two thousand years ago at first ended in the supreme militarism of the first Emperor,—the builder of the great wall. But pure militarism, which Prince Bismarck defined as government by "blood and iron," although strong, is not stable. Thus it came about that the supreme militarism of

the Emperor which broke to pieces the chivalry of the feudal princes of China, soon broke itself before the democracy of armed peasants who arose in the modern province of Shantung. Finally after a short struggle, a man from the common people, originally only an inspector of police, (長亭) made himself complete Master of the Empire and thus became the first great Commander or democratic Emperor of China,—布衣天子, russet coat Emperor as the Chinese call him. He was the founder of what is now known as the Han dynasty.

The first Emperor of the Han dynasty was at first inclined to continue the government of the Empire by pure militarism. "I got the Empire," he said, "on horseback with my sword." "Yes," replied a Liberal of the time, "but your Majesty cannot hope to keep and govern the Empire with your sword alone." In this way it came about that the military dictatorship came to be modified into what Heine calls "a dictatorship for carrying out the liberal ideas of modern times"—what may perhaps be best defined as Constitutional dictatorship or Imperialism as distinguished from pure Militarism.

In early feudal times the basis of the governing class was birth. In pure militarism the basis was force and the appeal was to few. But in what we have called constitutional dictatorship or Imperialism, the appeal is made to the reason of the nation and this is done by creating a governing class on the basis not of birth or property, but of education. In fact the stability of the Government in China depends upon its having the best educated men in the country as its supporters. The Emperor is absolute in power. But his absolute power is supported by and responsible to the public opinion of the educated governing class. We have said that the principle of the saying *voluntas regis, suprema lex* is not accepted in the theory of Government in China. What is accepted would be *judicium in concilio regis, suprema lex*. It does of course sometimes happen that the Emperor will arbitrarily exercise his absolute power without reference to the opinion of the educated governing class. But in such a case a special branch in the body politic is there to use moral force in dissuading him from such a course. The Emperor can of course persist in ignoring such a moral force; but, if he does so, he does it at peril to the continuance of his power and his throne. When the Emperor in China persists in outraging the public opinion of the governing class of the country, there is only one constitutional way by which the latter can revenge themselves and put an end to his misrule, namely by becoming corrupt and worthless. When the governing class in whose hands the good government and the well-being of the masses lie—for the acts and influence of the Emperor affect only the persons immediately surrounding him,—become corrupt and worthless, the suffering masses rise up as ungovernable democracy. Then the government of the country reverts to its primitive form of pure militarism,—*la force attendant le droit*. The supreme power then will fall into the hands of the man who is most able to wield it and then there is a change of dynasty. Thus although the masses in China have no say in the actual government of the country, yet it is they and they alone with whom rests the final decision as to when there is to be a change of dynasty in the land. Mencius says, he who receives his investiture from the Emperor becomes a prince, he who receives it from the prince becomes a lord, but he who receives it from the common people, becomes the Emperor.

From the above it will be seen, that the basis of the power of the Emperor in China is, in origin and at bottom, really military power, the power of a military dictator. The system of government is not, as it is said, family or patriarchal government. It is really military government. But when once the supreme military power of the Emperor is established, the pure militarism modifies itself into what Heine calls a dictatorship for carrying out the liberal ideas of modern times; a dictatorship appealing to the reason of the nation through the educated governing class; in one word Imperialism or Constitutional dictatorship. The Government of China may therefore be best defined as Imperialism.

CHAPTER II.—THE BODY POLITIC.

In European political literature the sovereign is generally considered as forming only one part of the body politic. He is said to represent one modern subdivision in the body politic called the executive, as distinguished from two other subdivisions called the legislative and the judicial. But in reality this is not correct. The sovereign's power is co-extensive with the whole and every part of the body politic. He is, as it were, the soul of the body. What is properly called the body politic is only the organ or instrument by which the sovereign exercises his power and authority.

Indeed the function of each and all of the modern subdivisions in the body politic is really to advise the sovereigns. The executive advises him as to how he is to decide on matters of the immediate present. The judicial advises him as to how he is

decided in the past. The judicial department when acting independently is merely a delegation of the sovereign's authority and only gives effect to his past decision, called law. The legislative in proposing new laws, advises the sovereign as to how he is to decide in the future. Thus the whole of what is properly called the body politic with all its modern subdivisions, is essentially only an advisory body.

In China the state departments are also classified under three subdivisions corresponding to the modern subdivisions in the body politic in Europe.

The Executive in Chinese is called the *ko* (閣), which literally means a chancel or cabinet (*curia*).

The Legislative in Chinese is called the *tai* (台), which literally means a platform or tower.

The Judicial in Chinese is called the *shing* (省), which literally means to revise.

In order to understand the particular functions of these subdivisions in the body politic in China, it is necessary to give a brief historical sketch of their origin.

I.—THE "KO" OR EXECUTIVE.

In earliest times, the chief of a tribe in dealing with the affairs of his people when in doubt on any question would call together the members of his family or clan and also his household servants (家臣) to advise him. This was the origin of what is properly called the body politic. The meeting or council of the members of the family or clan and household servants became the *curia* or *aula regis*—the king's council.

In the earliest times the king's council combined within it all the functions of the Executive, the Legislative and the Judicial. But at a very early date in China, a distinction came to be made in the body of the king's council. Members of the king's council were divided into two classes. One class was composed of counsellors with the rank of lords (*ch'ing* (卿) of the council. These were Ministers of the Crown with substantive and active functions. The other class was composed of counsellors with the rank of senators or honourables (大夫). These were senior members of the nobility or governing class attached to the council merely as counsellors without any active functions. The council composed only of the lords of the Council constituted the *ching fu* (政府) or what in Europe is called the *concilium assiduum*. But when any great or important question of state policy arose, a full meeting of the king's council was called, in which the inactive senators as well as the lords of the Council took part. This last constituted the *ting yi* (廷議) or what in Europe is called the *magnum concilium* or *commune concilium*. The *magnum concilium* or the king's great council was often held in the ancestral temple of the reigning house. Hence schemes of national policy were spoken of as *minao suan* (廟算)—deliberations of the temple.

Thus at a very early period in China, the body politic was divided into two subdivisions. But it was not until about two and a half centuries before the Christian era that the executive department in the body politic was distinctly separated from the advisory or legislative department. At this time the feudal system of China was being broken up by the rise of what in modern Europe are called liberal ideas. Instead of the feudal system of government, the first Emperor of the Tsin dynasty (the builder of the great wall) B.C. 221-209, organised a centralised national government. Under the first Emperor, while the *ting yi*, *magnum concilium* or the king's great council, remained the same, the *cheng fu*, *concilium assiduum* or select council, was divided into two departments each with distinct well defined duties and functions. One became the Executive Council and the other a purely advisory or consultative Council. The latter is the parent of the modern court of censors (see below).

The Executive Department was the Council of Ministers with active functions, presided over by a Minister President called *ch'eng hsiang* (丞相), who directed the administration of affairs under the authority of the Emperor. The Executive was spoken of as the *hsiang fu* (相府)—the Prime Minister's department. This then was the first distinct constitution of the sub-division in the body politic called *ko*, or the Executive in China.

Note.—Under subsequent dynasties the Executive in the Chinese body politic was represented by departments bearing different names. During the Han dynasty (B.C. 206—A.D. 220), the office and title of Minister President was several times abolished and reinstated. When there was no Minister President, the Emperor himself presided over the Council of Ministers. The administrative details of the department were put in charge of some Minister with other substantive appointment, who thus became the Principal Secretary of State (錄尚書事). Under the S'ang dynasty (A. D.

618-905) members of the Emperor's Executive Council were called Secretaries and Counsellors of the Palace Council (同中書門下平章事). A Minister with the title of Chief Secretary of State (尚書令) directed the administration of affairs. Under the Sung dynasty (A. D. 960—1278), besides the Palace Council, a select committee of the Palace Counsellors was formed, called the Emperor's Private Cabinet (樞密院), for deliberation on great and important questions of State policy. Under the Yuan or Mongol dynasty (A.D. 1280-1341), the Executive Council was represented by a department called the central department of revision (中書省). A Minister with the title of Chief Secretary, or Director of the Central Department, directed the administration of affairs. Under the last Ming dynasty (A.D. 1368-1628) the name and constitution of the executive department in the State were nearly the same as they are under the present dynasty.

At the present day the *ko*, or the Executive in the body politic in China, is represented by a department called the *nei ko* (內閣),—literally, inner cabinet, and translated by the late Mr. Mayers, the Grand Secretariat. But it is really the Privy Council. As the Privy Council in Great Britain, the *nei ko* in China is the representative of the ancient *curia* or *aula regis*, the Supreme Council of State of the Empire. The function of the *nei ko* is to advise the Emperor in all matters of government and State policy and to transmit the Orders-in-Council—called *ting chi* (廷寄) to all departments and branches of the administration. Ministers holding presidency of any one of the two High Courts (殿) or *aula regis* and three Cabinets (閣) or *aula regis*, into which the Chinese Privy Council is divided, take precedence in rank of all functionaries in the Empire. All other members of the Council rank as State Ministers.

In active function, however, the *nei ko* in China, as the Privy Council in Great Britain, is now superseded by a smaller body or select committee, called the *chun chi ch'ui* (軍機處), or Military Cabinet. The present Chinese Cabinet was originally only a Military Council of the early Emperors of the present dynasty. The *nei ko*, or actual Privy Council, having been found to be too large a body for the speedy and effective transaction of business, its active functions were transferred to this Military Cabinet. But copies of all acts and state papers executed in the Military Cabinet must be regularly sent to the Archives of the *nei ko*, or actual Privy Council in China. The *nei ko* therefore has now become merely an Imperial Chancery or Court of Archives. Admission to the membership of the *nei ko*, or Privy Council, in China merely confers dignity and precedence without carrying with it any active duty either administrative or judicial.

The Chinese Cabinet, on the other hand, like the British Cabinet, is not a State department and has no standing in law. It is only a select committee of State Ministers holding other substantive appointments who are specially selected by the Emperor to be his immediate and personal advisers. The Emperor himself is President of the Cabinet and all business is daily transacted in his presence. Members of the Cabinet are called *chun chi ta ch'en* (軍機大臣),—Cabinet Ministers.

II.—THE "TAI" OR LEGISLATIVE.

We have seen in the above that about two and a half centuries before the Christian era under the first Emperor of the Tsin dynasty, the *cheng fu* (政府)—the *concilium assiduum* of the King's council—was divided into two distinct departments. In early times there were in the King's council permanent clerks (史) who were appointed to keep the records and do the clerical work in the council-chamber. These clerks were called clerks of the Palace—*nei shu* (內史). At the time of the above mentioned first Emperor these clerks of the Palace were relieved of their clerical duties in the Palace and raised to the rank of senators or counsellors (大夫) with the title of Royal Clerks—*yu shih* (御史). They were made members of a specially created censorial board or advisory Council whose special function was to watch over the acts of the Executive Council of Ministers. The Censorial board or committee was called the *yu shih tai* (御史台), the Board (literally, watchtower) of Royal Counsellors. The Board was also sometimes spoken of as the *Sze hsun tai* (司憲台)—Constitutional Body. This was the first constitution of the state department in China known at the present day as the Court of Censors.

In its first Constitution, however, the Court of Censors was more of a judicial or constitutional-judicial rather than a legislative body in the modern sense. It was indeed something like the present Judicial Committee of the Privy Council in Great

Britain. The President of the Court of Censors was the Lord Keeper (御史大夫) who had charge of the great Seal of State. He was equal in rank with the Minister President of the Executive Council of Ministers. Moreover, as the members of the Censorate under the first Emperor were drawn from the rank of the old Clerks of the Palace, who had charge of the archives of law and precedence, this body of Royal Counsellors at first represented the *noblesse* of the robe, or aristocracy of lawyers, as distinguished from the *noblesse* of the sword, or military nobility in China.

But in the beginning of the Han dynasty immediately following the dynasty of the first Emperor, what in modern Europe are called liberal ideas began to be more understood and adopted in the system of government. Thus the Court of Censors came to represent not merely the *noblesse* of the robe, or aristocracy of lawyers; it came really to represent the new governing class, or aristocracy, founded upon a basis of education. During the Han dynasty, men of merit and ability and distinction of birth, were summoned by royal writs (詔書) from all parts of the country and were generally made members of the Censorate before being appointed to any high or substantive position in the State service. Members of the Censorate were called *yen kuan* (言官), official speakers. Thus the Court of Censors gradually became what it is at the present day, the department of State in the Chinese body politic par excellence which, like the House of Commons in Great Britain, represents the people.

The Court of Censors, however, even now is not a legislative body in the modern sense of the word. The power of initiative in legislation in China is not confined to any branch in the body politic. But the chief function of the Censorate in China, as it was originally that of the House of Commons in Great Britain, is to watch over the Executive. The special duties of the Censors are to bring to the notice of the sovereign the grievances of the people; to denounce any abuse of power on the part of all officials; and lastly to remonstrate with the sovereign himself when he is found to act unconstitutionally, i.e. arbitrarily and contrary to the reason of the nation as represented by the opinion of the educated men of the country. Members of the censorate, as the members of the House of Commons in Great Britain, are privileged and cannot be called to account for anything they say. In all great State trials, the Court of Censors act as prosecutor on behalf of the people. In fact the history of the Censorate is the constitutional history of China.

But the Court of Censors in calling attention to abuses and grievances, is naturally called upon to suggest a remedy and this by proposing alteration of existing laws which act injuriously or enactments of new laws to meet the emergency. In this way the Censorate in China may be regarded as a legislative body in the modern sense.

In fact, at the present day, in China the *tai* or legislative in the body politic, is represented by two chambers, an upper and a lower chamber. The lower chamber is the Court of Censors, which we have already described. The upper chamber, or the House of Lords in China, is composed of five chapters and one office, namely:

1. The Chapter of the Lord Chancellor. 寺理大
2. The Chapter of the Lord Chaplain. 寺常大
3. The Chapter of the Great Lord Chamberlain. 寺祿光
4. The Chapter of the Earl Marshal. 寺侯大
5. The chapter of the ordinary Lord Chamberlain. 寺監鴻
6. The office of the Commissioner of the Privy Seal. 司政通

The above five chapters are survivals of offices created in very early feudal times out of the household servants (家臣) of the chief of a tribe. The office of Commissioner of the Privy Seal was a later creation. The household servants afterwards became the lords or members of the King's Council. They composed the *concilium assiduum* of the King's Council. At the time of the first Emperor, when the body politic was divided into two departments, these lords formed the Executive Council of Ministers. In later times and at the present day they have become a mere advisory or consultative body. In constitution the present Chinese House of Lords corresponds to the Judicial Committee of the Privy Council in Great Britain.

Note.—The House of Lords in Great Britain too, it will be remembered, was originally only a Judicial Committee of the *magnum concilium*, or the King's great Council.

The Lord Chancellor in China is the highest law officer of the Crown. On occasions of great or important State trials, he sits as President representing the Sovereign.

With the exception of the Lord Chancellor, however, the members of the House of Lords in China now have no special active functions. Their only

duty is to attend on the person of the Emperor on all great state occasions. As constant attendants attached to the person of the Emperor, they are of course also called upon to bring to the notice of the Emperor anything that goes wrong in the body politic and also to suggest a remedy by proposing alteration of existing, or enactment of new, laws. The functionaries holding appointments in the five chapters retain their ancient title of Lords—Ch'ing (卿). The five chapters, together with the office of the Commissioner of the Privy Seal, may therefore be appropriately called the House of Lords in China.

Members of the House of Lords take rank as State Ministers. Therefore a department official such as a Taotai or Commissioner when appointed Minister to a foreign country at the present day, is generally made a member of one of these five chapters, or House of Lords, and, by virtue of that, becomes at once equal with the highest functionaries in the Empire.

III.—THE "SHENG" OR JUDICIARY.

We have seen that the Court of Censors, which is now a legislative body, was on its first constitution really a judicial body. The members of the Censorate were principally taken from the ranks of the old clerks of the Palace. These clerks of the Palace who hitherto had sole charge of the archives of state papers in the King's Council, became really a body of lawyers. At this time, when the feudal system of government in China was being broken up and before a new system was organised, it was important and necessary for the conduct of business in government to keep and closely adhere to the old forms of precedents and procedure. But outside the ranks of these old forms. Therefore those men who had exclusively a knowledge of the old forms of precedents and procedure, very easily and naturally formed themselves into an independent body in the State, whose influence had to be recognised. Indeed this was the only period in Chinese history when an independent body of men called lawyers (吏) was recognised.

Note.—Such an institution of lawyers has long since ceased to exist in China. The reasons for this are not far to seek. In the first place, by the application of what in modern Europe are called liberal ideas, i.e., by placing common reason and common sense supreme above the mere dictates of precedent and authority, the old feudal forms of law and procedure in China have been simplified and brought to the level of the common understanding of all ordinarily educated men. In the second place, the sense of common morality and common reason which is expressed by the two Chinese words *tao li* (道理) has become so generally and universally understood and recognised that law which in China is merely the dictate of that sense has become the common property of every educated man who enters the State services.

The Court of Censors thus was originally the first judicial body in the State system in China. The Censorate at first represented the noblesse of the *robe* or aristocracy of lawyers. But very soon after its institution, already in the beginning of the Han dynasty, the Censorate ceased to be a purely judicial body. The Censorate in fact came to represent the newly created governing class founded on a basis of education, and, in this way, from being a purely judicial body, became what it is to-day a legislative or representative body in the modern sense.

Now just at the time when the Censorate ceased to be a purely judicial body, a new branch in the body politic in China arose which, at the present day, properly represents the judicial subdivision in the State system. This was what has now become the six departments of state.

Now, it will be remembered that when the king's select council, or *concilium assiduum*, was divided into two departments, the clerks of the Palace, who now became members of the Court of Censors, were then relieved from their clerical duties. Their clerical duties in the Executive Council of Ministers, were then left or put in charge of two classes of under Palace officials. One class of these officials were called the State writers or State copyists (尚書). The other class were attendants in the Palace called grooms in waiting (侍郎). Thus while, on the one hand, the archives of State documents and records of precedents and procedure which formed the body of constitutional law, were put in possession of the old Palace clerks, now constituted into a council of Royal Councillors, the new Palace officials in the Executive Council on the other hand, i.e., the State writers and grooms-in-waiting, who now had charge of the acts and records of the current administration, gradually came to constitute the future judicial subdivision in the body politic.

Under the first Emperor, the State writers and grooms-in-waiting formed one body of under-Palace officials in the king's Executive Council. In the beginning of the Han dynasty, these Palace officials

began to acquire some importance. The whole body was divided into two sections, the right and left sections (左右曹). At the head of each section an officer was appointed with the title of Chief of the State Writers (尚書令). When the office of Minister President was abolished, the details of administration in the State Secretaries' offices were put under the direction of some Minister with another substantive appointment, who thus became the first Principal Secretary of State in China (錄尚書事). It was, however, not until a very late period in Chinese history, i.e., in the beginning of the Tung dynasty (A.D. 618) that the sections under the direction of the one Principal Secretary of State were divided and became the modern independent six Departments of State of the present day. The Presidents of each of these six Departments of State now retain their ancient name of State Writer or State Secretary (尚書) i.e., Principal Secretary of State. The Vice-President or Under Secretary of State is now still styled Groom-in-waiting (侍郎). The department secretaries in the sections of the State Departments are called Grooms-in-ordinary (郎中) and the department under-secretaries are called Extra Grooms (員外郎). Below the department under-secretaries, there are department assistants (主事).

Thus the Sheng or judicial subdivision in the body politic in China at the present day is represented by six departments of state, namely:

1. The Department of State for Civil Service.
2. " " " " for Revenue.
3. The Department of State for Religion and Education.
4. The Department of State for War.
5. " " " " for Criminal Law.
6. " " " " for Public Works.

The Departments of State in China are not, as those in Europe and America, executive-administrative but judicial administrative departments. The Departments of State in China cannot initiate acts of administration. They do not give orders. They merely take cognisance, register and revise all acts of administration of the Executive. They are entrusted with the keeping of all statutes, all laws and ordinances criminal as well as disciplinary, prescribed for every detailed act of administration throughout the Empire. The chief function of the departments of State in China is, whenever any act of administration is called in question, to decide and to report to the sovereign whether such an act is in accordance with law. Also acting as they are as legal advisers of the Crown, when any new law or alteration of existing law is proposed, the proposal is referred to each of these departments immediately concerned to give its opinion and, if necessary, to alter and draw it up in proper legal form. In this way the six departments of State in China really form the judicial subdivision in the body politic.

The Departments of State in China, however, although forming the judicial body in the State system, are not law courts in the modern sense of Europe and America. The highest Court of Law in China is formed out of the officials of three departments in the State, who are called the three highest law officers of the Crown (三大法司). In a great State trial of criminals, the Lord Chancellor of one of the five chapters in the House of Lords, sits as president representing the sovereign. The presidents or speakers of the Court of Censors or House of Commons in China act as prosecutors for the people. The Principal Secretaries of State for criminal law act as legal advisers to the Crown.

The above then are the history and functions of the three subdivisions called the *ko*, the *tai* and the *shing* in the body politic in China which correspond to the Executive, the Legislative and the Judicial in the modern European sense.

In the Chinese theory of medicine the organs and functions of the human body are divided into three systems, namely, the nervous system (太陰), the digestive or distributive system (陽明) and lastly the circulatory system (太陽). In comparing the body politic in government to the human body, the *ko* or the executive is the nervous system from which proceed all vital functions in the administration. The *shing* or the judicial is the digestive and distributive system which digests and distributes the acts of administration. The *tai*, lastly, or the legislative as it is now called in European language, is the circulatory system which drives and keeps out all old tissues and impurities in the body politic and gives tone to the whole system.

IV.—THE "K'WAN" (館) OR THE CONSULTATIVE.

Besides the above three subdivisions in the body politic in China, there is another supernumerary or adjunctive branch in the state system which may be called the consultative body.

One department forming the consultative body is the *chan-shih-fu*, translated by the late Mr. Mayers as the Imperial Supervisorate of the Education of the

Heir Apparent. Now the Chinese words *chan-shih-fu* literally mean "elegant matters" (雅事) *chan-shih-fu* therefore means department of elegant matters i.e. Fine Arts. It is, in fact, the Imperial Academy of Fine Arts (including Literature). When the Academy was first instituted in the Han dynasty (B.C. 206) it was chiefly intended by this institution to give to the education of the Heir Apparent and princes of the Imperial family the benefit to be derived from the society of the most accomplished men of letters and artists of the Empire who were thus made members of the Academy. The members of the Academy were spoken of as officials in the suite of the Heir Apparent (太子官), just in the same way as the Prince of Wales in Great Britain being Patron of the Royal Academy, the Royal Academicians might be spoken of as in the suite of the Prince of Wales.

The Imperial Academy at the present day is an intermediate department between the lower Chamber in the Legislative body, i.e. the Court of Censors or House of Commons, and the upper chamber of five chapters or House of Lords in China. Members of the government class in China who are intended for the higher branches in the State service are divided into two classes. Those who merely possess a knowledge of law and administration pass from the Hanlin Institute (see below) or Civil service staff college into the Court of Censors or lower chamber in the Legislative body. Others who evince a wider or higher culture are made members of the Imperial Academy before becoming either Members of the upper Chamber or Ministers of State. The President of the Imperial Academy ranks, *causa honoris*, as Minister of State. All members of the Imperial Academy are entitled to address the Emperor on any matter connected with the education and public morals of the country.

The other department forming the consultative body in the State system in China is the Hanlin Institute. As the members of the Imperial Academy were originally intended to be associates and companions of the Heir Apparent, Members of the Hanlin Institute, which came into existence in the Tang dynasty (A.D. 618) were at first merely a society of young distinguished literary men attached to the person of the Emperor.

The actual function of the original Members of the Hanlin Institute is, however, now taken up by distinguished men in the State service, who are specially appointed to be in attendance in the Emperor's Library (上書房行走).

The Hanlin or Imperial Institute at the present day is not a literary college; but like the Barristers' Inn in Great Britain, it is really a Law School. The Hanlin Institute, in fact, is the Staff College of the Civil Service. Members of the Civil Service who show an aptitude, and are intended, for the higher positions in the State service are at once made members of the Institute. The Members of the Institute are called upon, not only to study, but like the Military Staff Departments in Europe, to write the history of the nation. Therefore in connection with the Hanlin Institute there are two standing Committees.

1. The Committee of Council for writing down and keeping a journal or diary of the daily doings of the Emperor in Chinese (起居居館).
2. The Committee of Council for drawing up the general history of the country. (國史館).

There is in addition to the above another standing committee called the Committee of Council for Constitutional Law (會典館). This last, however, is under the joint control of the *nei ko* or Privy Council as well as of the Hanlin Institute.

The President or Chancellor of the Hanlin Imperial Institute is some senior State Minister with some other substantive appointment. There are two classes of Privy Councillors and two classes of Ordinary Councillors. These correspond to the K.C. and King's Sergeants in the English bar. The two classes of Privy Councillors take rank as State Ministers (學士). Ordinary members of the Institute are divided into three classes: 1. Fellows of the Institute (殿撰). 2. Members of the Institute (編修). 3. Associates of the Institute (檢討).

Note—It is curious to note here that the members of the Hanlin Institute or barristers in China who receive only a nominal stipend from the State, are compelled, like their brother barristers in Great Britain, to live by honourable black-mailing. Chinese barristers, it is true, generally do not meddle with law suits, but they can *forcibly* present scrolls or other specimens of their calligraphy and receive therefore, *causa honoris*, not fees but honorariums in money.

In conclusion the whole of the body politic is generally expressed in Chinese as composed of the *lin-pu*, *chin-ching*, *han*, *chan*, *k'o*, *tao*—in all six branches or departments.

1. *Lin-ching* (六部) are the six Departments of State.
2. *Chin-ching* (九卿) are the (originally nine) lords of the Chapters or House of Lords.

3. Han (韓) is the Hanlin Institute.
 4. Chan (詹) is the Chan-shih-fu or Imperial Academy.
 5. K'o (科) are members of the Court of Censors appointed to watch over each of the six State Departments. Equalling Parliamentary Secretaries in Great Britain).
 6. Tao (道) are members of the Court of Censors appointed to watch over each province.
 The State ministers and functionaries forming the above-named branches thus constitute together the Congress of Notables or National Parliament of China.

KU HUNG-MING, M.A.

Wuchang, 3rd Sept., 1901.

ANECDOTES OF MR. MCKINLEY.

The death of President McKinley has been the means of bringing to light a number of characteristic anecdotes which are of more than ephemeral interest. One which the late President himself was fond of relating, concerned the theft of one of his speeches by a fellow-campaigner during a hot political fight:

A well-known general of the Civil War, who has since become prominent in United States politics and is now a senator from one of the Western States, was going to speak at a political meeting at Marlboro, and so also was McKinley. They drove down from Canton together. As they were driving along, the general asked his companion for some pointers, and the latter kindly explained the situation and advanced arguments in support of the position of the Republican party. Mr. McKinley, as usual, had his subject well in hand, but in addition was fortified with notes giving certain statistics in corroboration of his argument. He told the general about what line of thought he intended to pursue in making his speech at Marlboro, and the latter, who was to speak first, agreed that he would say very little and would leave the bulk of argument to McKinley. The general duly made his bow to the audience, and began his speech. As he became warmed up, the recollection of what Mr. McKinley had been talking about on the way to the meeting became stronger, and he began pursuing the line of argument that McKinley had prepared for himself. The general laid down his proposition just as the major had done in the carriage, and finally said:—"And I can prove all this; major, just hand me those documents," and then proceeded to read at length from McKinley's notes. When the general had finished there was little left for the major to say.

Once, while visiting Philadelphia, his host timidly suggested that Pennsylvania's metropolis would be an excellent place for the chief executive to live. The President replied:

"Excellent? That word scarcely describes the place." Mrs. McKinley sat close to him in a reclining-chair. He turned to her, and clasping her hands between his own, said merrily: "Well, I would dearly love to live here. But, I have a dear girl who guides me always right, and she thinks our home town of Canton is the Eden of the world." His eyes sparkled and his whole countenance was aglow with smiles as he looked into his invalid wife's face and said: "And strange, but true, ladies and gentlemen, I always think as that girl does." The conversation was suddenly ended by Mrs. McKinley lapsing into one of those conditions which made her frail most of her life. She seemed unconscious, and a commotion followed. Every one present was alarmed except the nation's chief. Calmly and composedly the President gently clasped his wife to his breast with his left hand, while with his right he caressed her forehead and eyes—as he had done a thousand times before—and lowly whispered with a trembling voice: "Now, dearie, I am here. Look into my face." In a moment the first lady of the land clasped her husband, and nestling on his breast, said, unconscious of those about her: "Oh, Will, you are so kind!" Then she kissed him, and not one present at that scene will ever forget William McKinley's affection and care for his delicate wife. The conversation was then renewed as though nothing had occurred.

President McKinley was a great smoker: He went to Oberlin, O., several years ago to make an address, and stopped with Professor Monroe, the head of Oberlin College. Every man who has been in Oberlin knows what a strait-laced town it is. There is no drinking, no chewing of tobacco, no smoking. After supper McKinley told the professor he believed he would go to the smoking-room to enjoy a cigar. "Why, we haven't such a thing as a smoking-room in the town," said Monroe; "nobody smokes in this town, but we'll find a place." He led the way to a secluded room, where no one could see the operation, and McKinley lit a good cigar and began to contentedly puff away. In a few minutes he looked around for a cuspidor; but not seeing one, he inquired for one. "There is no such a

thing in town," said the head of the college. "Well, I will see that you get some when I get back home," answered McKinley. True to his word, but more as a joke than anything else, McKinley wrote to a mutual friend of himself and Professor Monroe of the predicament of the latter. The friend immediately sent a quantity of cuspidors by express to Professor Monroe. Several months after the incident, McKinley again went to Oberlin, and, once more desiring to indulge in a cigar, called for a cuspidor. "My gracious, man, I'm sorry," said Monroe, "but my wife has used all of them for flower-pots, not knowing what they were for."

President McKinley was a shrewd man in a political fight. His successes before receiving the Republican nomination for President were largely due to his own political foresight:

In the campaign of 1890, when McKinley was beaten by three hundred and six votes for Congress, in a district which had been gerrymandered until it had nearly three thousand Democratic majority, he displayed wonderful generalship. Four days before the election McKinley and his managers knew nearly how every man in the district would vote. They saw the probability of defeat, but were plucky enough to put up the greatest fight known in the district. In figuring up the prospects McKinley decided that every vote was needed. Some one told him that one of his best friends, then absent on a bridal tour, would probably return if he (McKinley) sent a telegram. The young fellow had been married about a week, and was in New England with his bride. He had intended to be away a good while. McKinley sent him a telegram:—

"It is right to be married, and I congratulate you with all my heart, but every man owes a debt to his country. That debt can best be paid by voting as his conscience dictates in election day."

Needless to say, the young friend returned in time to vote.

An amusing story is told of a good-looking, well-dressed man of middle age, who sauntered up to the White House door one afternoon in the second winter of President McKinley's first incumbency:

He had an unlighted, half-smoked cigar in his teeth, and said pleasantly, to the tall door-keeper, who swung the door open for him:

"Howdy? Bill in?"

The door-keeper replied that the President was out driving.

"Too bad, too bad," sighed the man.

The door-keeper politely asked him if his business with the President was pressing.

"Yes," replied the visitor, mournfully, "it is. As you see," holding out his unlighted, half-smoked cigar, "my weed has gone out. I wanted Bill to give me a light. He promised me, in the year 1184, at the Battle of Hastings—which, as you remember, I won hands down—that if ever my cigar went out, all I'd have to do would be to drop in on him and get a light. Too bad, too bad!" And the man again sighed miserably.

"Wait a minute," said the door-keeper. "I hear the rattle of the President's carriage—he's coming in the back way. I'll see him," and, leaving another attendant to keep an eye on the man with the ineffaceable grin, he slipped into the passage, lighted a cigar, and, after waiting a moment, returned with it in his hand. "Mr. McKinley's renewed assurances of his most distinguished consideration," said the door-keeper, with great solemnity, holding out the cigar, "and here is his cigar, from which he begs that you will accept a light for your own."

There was an expression almost of rapture on the man's face as he took the cigar and applied the burning end of it to his own. He returned "the President's cigar," placed both of his hands upon his chest, and bowed deeply to the door-keeper, who returned the kowtow as ceremoniously, and backed out, saying: "Tell Bill to join me with the army in Flanders at twenty minutes past eight o'clock, moon time."

Then he passed out, puffing vigorously at his cigar, and he never appeared at the White House afterward, contrary to the expectations of the door-keepers, who had figured that the unbalanced crank would be dropping in every day for a bit of the fire from the President's cigar.—Argonaut.

TELEGRAMS.

(REUTER'S SERVICE TO THE "JAPAN MAIL.")

THE CRETAN QUESTION.

Shanghai, Oct. 25.

The Temps says that four Powers have agreed on the principle of sanctioning the incorporation of Crete with the kingdom of Greece.

SOUTH AFRICA.

Colin Brander's Scouts have captured 42 Boers.

The King has received General Hilyard. The two guns which were captured by the Boers on the occasion of Gough's reverse have been recovered.

A RUSSIAN STORY.

It is stated, principally on the strength of news received from Russian sources, that Japan has agreed to grant to Korea a loan of 75,000,000 dollars.

MARQUIS ITO.

Marquis Ito has had the degree of LL.D. conferred on him by the University of Yale.

BRITISH POLITICS.

Lord Salisbury had a long interview with the King to-day. The Cabinet meets on Monday.

BRITISH WAR POLICY.

Shanghai, Oct. 26.

Speaking at Bradford, Mr. Gerald Wyndham, Parliamentary Secretary to the War Office, said that the policy of the British Government would still continue to be to finish the war at the earliest possible moment. The Government would give Lord Kitchener all he asked for that purpose.

FRENCH LOAN.

A French loan of about 500 million francs is impending. It is to be secured on the Chinese indemnity.

THE BULLER INCIDENT.

The Radical Press in England is striving to excite the country in favour of Sir Redvers Buller.

VICTORIANS IN TROUBLE.

Three members of the Victorian contingent in South Africa were sentenced to death, but the sentence was afterwards commuted to twelve years penal servitude, for mutinous conduct. This sentence has also been quashed and the men released.

MARQUIS ITO.

Shanghai, October 27.

Marquis Ito has sailed from New York for Europe. He visits France first.

MILITARY OPERATIONS.

The columns operating for six weeks to the S.W. of Rustenburg have returned to Klerksdorp, bringing 250 Boers and a quantity of supplies.

BOER MOVEMENTS.

Shanghai, Oct. 28.

The banishment of thirteen more captured Boer leaders has been promulgated.

Botha, with a few followers, has gone to Amsterdam, where Shultzberger and the moveable Transvaal Government are temporarily located.

SOUTH AFRICA.

Shanghai, October 29.

Colonel Hawkins surprised and captured three laagers at Nylstroom, including three field cornets and the ex-landrost of Pretoria, with fifty other prisoners. Gorrings has summarily tried and shot Schultz and some other prisoners who were wearing khaki uniform.

BULLER'S CASE.

A later telegram says the Cabinet had a meeting lasting two and a half hours, at which it is understood the chief topic discussed was the case of General Buller.

THE SITUATION IN GERMANY.

Shanghai, Oct. 30.

The commercial and industrial depression in Germany is deepening steadily. The factories are restricting their production everywhere.

The Bourses were further depressed yesterday and iron works in succession are closing.

BOER MATTERS.

A later telegram says that Delarey and

Kemp attacked a column of Methuen's force on the Marico River. There was severe fighting. Forty dead Boers were left on the field including Commandant Woolfsmarians. The British casualties were: 2 officers and 27 men killed and 5 officers and 60 men wounded. All behaved with the greatest gallantry.

MCKINLEY'S MURDERER.

The murderer of President McKinley has been electrocuted.

NEW CANAL TREATY.

Shanghai, Oct. 31.

The *Daily Chronicle's* Washington correspondent telegraphs that Lord Pauncefoot has received authorization to negotiate and sign a new canal treaty.

NEARLY CAPTURED.

Rimington by a long night march nearly captured Louis Botha, who bolted hastily, leaving his papers behind.

(RECEIVED AT THE LEGATION OF FRANCE.)

THE MINERS' AGITATION.

Saigon, Oct. 24.

In the Chamber of Deputies, M. Basley demanded the immediate discussion of his project of law, which also provides for an eight hours' day and for miners' pensions. M. Waldeck-Rousseau opposed the immediate discussion, and it was rejected by 290 votes against 249.

At Saint Etienne the miners have decided to postpone the general strike.

THE FRENCH MINERS.

Saigon, Oct. 26.

The Government is examining a project of law relating to the pay of miners. It will be submitted to the Bureau of the Chamber next week.

Complete calm reigns in mining centres.

FRENCH NEWS.

Saigon, Oct. 29.

The Chamber of Deputies is considering the question of bounties to the mercantile marine.

According to the journals, Toulon will organise an important naval force to proceed to Turkey.

FRENCH NEWS.

Saigon, Oct. 30.

A Decree has been issued organising native courts in Tongking.

The Minister of Finance has introduced a project of law providing for the issue of 269 million francs at 3 per cent., which figure corresponds to the amount of the Chinese Indemnity.

(RECEIVED IN TOKYO.)

THE CHINESE INDEMNITY.

The gold warrants for the Indemnity were handed by Prince Ching and Viceroy Li to the Spanish Minister on the 13th of October. These warrants ought to bear the signature of the President of the Board of Revenue, but he being absent from Peking, they merely carry the seal of the Board of Revenue, and the countersignatures of Prince Ching and Viceroy Li. Japan has nominated the Shanghai Agency of the Specie Bank to receive her share of the Indemnity, and France has appointed the Shanghai Branch of the Banque de l'Indo-Chine.

THE FRENCH TROOPS.

France has been removing her troops from Peking since the 27th of October. She will leave about 1,700 men.

JAPANESE IN KOREA.

Japan has for some time been seeking to obtain from Korea a site for a special settle-

ment at Cha-pak-po near Masampo. The Korean Government made the desired concession officially on the 29th of October. The area granted covers nine hundred thousand *tsubo* (750 acres) and is the land recently surveyed and pegged out by a Russian man of war. Any parts owned by Korean subjects are to be purchased within a year. Japan is to have the policing of the new settlement.

(FROM THE "N.-C. DAILY NEWS.") TURBULENT JINRIKISHAMEN AT SINGAPORE.

Singapore, October 22.

A jinrikisha strike commenced here yesterday owing to the enforcement by the Government of certain unwelcome regulations. Europeans were assaulted yesterday and to-day and gharries smashed.

Police and armed Sikh guards are patrolling the main streets, and a strong reserve of police is held in readiness in anticipation of rioting later.

A fight took place at mid-day to-day between the police and the jinrikisha-pullers, the police being stoned. Forty arrests were made.

THE ENTENTE BETWEEN RUSSIA AND CHINA.

Peking, Oct. 24.

In a private letter addressed to H. E. Li Hung-chang, Yung Lu represents that the Empress Dowager is desirous of coming to terms with Russia, whose power she can trust to avert any further aggression, and who will undertake the personal protection of the Empress Dowager after her return to Peking.

Li Hung-chang may rely upon Yung Lu's support, and is to conclude the Manchurian treaty at once with Russia, without caring for the opposition of the Southern Viceroy and Governors.

JINRIKISHA STRIKE AT SINGAPORE.

Singapore, Oct. 24.

The strike is practically at an end, most of the jinrikisha pullers having returned to work to-day. The firm attitude of the Government has achieved this. Several of Tuesday's rioters were convicted at the Police Court yesterday. Some were fined and others sent to prison.

PROMOTION FOR MR. POLLOCK.

Hongkong, October 25.

Mr. H. E. Pollock, K.C., Acting Attorney-General, Hongkong, has been offered and has accepted the post of Attorney-General of the Fiji Islands.

DEATH OF MR. EDWARD ROBINSON.

Hongkong, October 25.

Mr. Edward Robinson, barrister-at-law, died of dysentery on Thursday morning. His funeral was widely attended.

THE RETURN OF PRINCE CHUN.

Singapore, October 25.

Prince Chun arrived at Singapore per N.-D. L. steamer *Bayern* to-day. The Chinese merchants assembled along-side at the wharf to meet him, but illness prevented the Prince from landing.

(FROM THE "OSTASIATISCHE LLOYD.")

GERMAN COMMERCIAL TREATIES.

Berlin, Oct. 22.

The German Government reserves the right to notify the non-continuation of the Commercial Treaties at the time which seems most suitable to her. The time for doing this will depend mainly upon the passing of the new Tariff Bill, which will be laid before the Reichstag during the coming winter.

INTERNATIONAL PEACE.

Mr. W. T. Stead, of London, has been proposed for the Nobel prize for the furthering of international peace.

ILLNESS OF MR. SIEMENS.

The former manager of the Deutsche Bank at Berlin and member of the Reichstag, Johann Georg Siemens, is ill with cancer of the stomach.

NEWS FROM EUROPE.

Berlin, October 24.

King Edward conferred the China Medal upon H. M. the German Emperor.

OBITUARY.

The former manager of the Deutsche Bank at Berlin and member of the Reichstag, Mr. Siemens, is dead.

THE WAR IN SOUTH AFRICA.

SCHALK-BURGER'S APPEAL.

Adelaide, Oct. 1st.

Mr. Schalk-Burger, one of the well-known Boer leaders, has forwarded a long letter to Lord Kitchener in which he expresses a strong desire for peace, and suggests—as a means to this end—that the British Government should revoke the formal annexation of the two Boer Republics, and proclaim a general amnesty in respect of all Boers still in the field and of all natives of Cape Colony and Natal who may have taken part in the struggle in opposition to British arms. His argument is that the exercise by Great Britain of such royal magnanimity would go far to heal the bleeding wounds caused by the war, would settle peace on a secure basis, and lead to the amicable development of South Africa by Briton and Boer working side by side.

THE REPLY.

Lord Kitchener has replied to this singular proposal to the effect that Great Britain cannot now abandon the annexation of the Boer Republics in the manner suggested.

MAINTENANCE OF BOER FAMILIES.

Lord Milner has issued instructions for the disposal of all landed and other property belonging to burghers still in the field, the proceeds to be devoted to the maintenance of destitute Boer families.

RELOTTED MUTINY OF AUSTRALIANS.

Private J. Steele, a member of the fifth contingent of Victorian Mounted Rifles, has just been court-martialled in South Africa on a charge of endeavouring to persuade the colonials to mutiny. He was found guilty and sentenced to be shot, but the sentence was subsequently commuted to ten years' penal servitude. Two other members of the contingent taking an active part in the disturbance were respectively sentenced to two and three years' penal servitude. The brief cabled details of the unfortunate affair go to show that Steele suggested to his comrades to pile their arms and refuse to follow the lead of Colonel Beatson, who was in command, till that officer apologised for having called the Mounted Rifles "a set of white-livered curs."

BOERS WISH TO JOIN THE ARMY.

October 2.

Two hundred Boers on parole in Ceylon have voluntarily offered to serve in the British army in any part of the world except South Africa.

ITALIA FORT.

Further details to hand respecting the attack by the Boers under Botha upon Italia Fort go to show that the assailants sustained a most disastrous defeat, although the attack was pushed home in the most desperate fashion, the inducement being the stores, etc., contained within the fortress. Two hundred Boers were shot dead in the vicinity of the fort, and over three hundred others were wounded and captured.

THE AUSTRALIAN MUTINEERS.

The Federal Premier states that his Government is making inquiries into the case of the Australians in South Africa charged with mutiny and sentenced to various terms of penal servitude.

[NOTE.—Reuter has telegraphed direct to the east that these sentences have been quashed.—E.A. J.M.]

Rather a serious complexion is put upon the increase of mosquitoes in London, if it is true that it is due to the defective drainage of the marshy lands and brooks in the eastern suburbs. These, it is said, are neglected, and become more filthy every year. They certainly give an idea that they might be a most prolific breeding ground for mosquitoes and other pests. The worst of it is that, whether or not it is from dirty feeding, their bites are more poisonous than heretofore, and produce more unsightly swellings.

BANK OF JAPAN.

BANKING ACCOUNT.

On Saturday, Oct. 26th:—

SAVE YOUR SKIN

How to Preserve Purify and Beautify the Skin and Complexion.

To preserve, purify, and beautify the skin, and prevent pimples, blotches, blackheads, redness, roughness, yellow, oily, mothy skin, chapping, and many other forms of skin blemishes, no other skin or complexion soap is for a moment to be compared with CUTICURA SOAP, because no other soap reaches the cause, viz., the clogged, irritated, or inflamed condition of the PORES.

SAVE YOUR HAIR

How to Prevent Falling Hair Scalp Humours and Dandruff.

Cleanse the scalp and hair thoroughly with a warm shampoo of CUTICURA SOAP, rinse with warm water, dry carefully, and apply a light dressing of CUTICURA, purest of emollients, gently rubbed into the scalp. This simple, refreshing, and inexpensive treatment will clear the scalp and hair of crusts, scales, and dandruff, soothe irritated, itching surfaces, stimulate the hair follicles, supply the roots with energy and nourishment, and make the hair grow upon a sweet, wholesome, and healthy scalp, when all else fails.

SAVE YOUR HANDS

How to Make the Hands Soft and White in a Single Night.

Bathe and soak the hands on retiring in a strong, hot lather of CUTICURA SOAP. Dry thoroughly and anoint freely with CUTICURA Ointment, the great skin cure and purest of emollients. Wear during the night old, loose kid gloves with the finger ends cut off. For red, rough, chapped hands, dry, fissured, itching, feverish palms, shapeless nails, with painful finger ends, this one night treatment is simply wonderful and a blessing to all afflicted with sore, chapped, rough, or tender hands.

Cuticura Complete External and Internal Treatment for Every Humour.
The Set
Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales and soften the thickened cuticle, CUTICURA Ointment, to instantly allay itching, inflammation, and irritation, and soothe and heal, and CUTICURA RESOLVENT, to cool and cleanse the blood. A SINGULAR SET is often sufficient to cure the most torturing, disfiguring, and humiliating skin, scalp, and blood humours, with loss of hair, when all else fails. Sold throughout the world. Aust. Depot: R. TOWNS & CO., Sydney, N. S. W. 80, Africa Depot: LEESON LTD., Cape Town. "All about the Skin, Scalp, and Hair," post free. FOTIER DRUG AND CHEM. CORP., Sole Props., Boston, U. S. A.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, NOVEMBER 9TH, 1901.

BIRTH.

On Nov. 4th, to Mr. and Mrs. Richard Boyes, a Son.
Shanghai papers please copy.

DEATH.

At his residence, No. 263, Bluff, Mr. HERMANN GRAUERT, of Linzen (Germany), aged 65 years.

SUMMARY OF NEWS.

A BASEBALL club has been started in Hongkong.

A PROLONGED earthquake was felt in Yokohama at five minutes before twelve on Monday night.

SNOW is reported to have fallen at Sapporo, Hakodate, Aomori and Hirosaki respectively on the 30th ult. for the first time this year.

THE Japanese steamer *Ryugo Maru*, which sank in a storm at Okinawa on Oct. 30th ult., is to be raised if possible by the Osaka Ironworks.

THE benefactions of Mr. Andrew Carnegie are reaching Ireland. He has offered the city of Waterford £5,000 with which to build a library.

A TELEGRAM received in a certain quarter of Tokyo on Tuesday says that Viscount Watanabe, former Minister of Finance, is now staying in Milan.

A MESSAGE from Matsuyama in Iyo province says that on the night of the 30th ult. eight persons were murdered by a man who was afterwards arrested.

THE opening ceremony of the Yachiyo theatre, Matsushimacho, Osaka, took place on the 1st instant, when 1,500 persons were present. The building cost over *yen* 100,000.

MR. G. COATES, German Consul-General in Yokohama, who set out for Korea in September last on leave of absence, will probably return to this port on or about the 10th inst.

ACCORDING to the *Correspondencia*, there is some talk of a marriage between the Infanta Maria Theresa, younger sister of the King of Spain, and the Grand Duke Vladimir of Russia.

BOTH the Mitsui Bussan Kaisha and the Tokyo Electric Car Company are reported to have abandoned the project of opening tramways in Tientsin, owing to the objections raised on all sides.

THE submarine cable between Saghalien and Hokkaido is reported to have recently been damaged. It is said that there is no hope of the broken line being repaired during the cold season.

ACCORDING to private information from Vladivostok, the river Amur was closed to shipping on the 18th October, and communication with Amur ports is now effected by way of Eastern Siberia.

News from Fukushima Prefecture says that on the morning of the 1st inst., a woman named Tomo, 37 years old, wife of a farmer living at Awano-mura in that prefecture, gave birth to three sons and two daughters. The mother and children are doing well.

PRESIDENT FOWLER, of the Puget Sound Bridge and Dredging Company, a Seattle corporation, has been notified that his firm had been awarded the Government contract, valued at \$2,000,000, for dredging the harbour of Manila and completing the old Spanish breakwater.

ON the night of the 1st instant two police inspectors and fifty police-constables made a raid upon a house at Honbachelori, Kyobashi, Tokyo, and arrested eighty-six gamblers. Over sixty, including the occupier of the house escaped; 300 *gata* being seized and taken to the station in a cart.

THE Osaka Shosen Kaisha will open a branch at Shanghai in January, where new premises have already been erected. Mr. Hori, chief of the Kobe branch, has been ordered to take charge of the new Shanghai branch and will leave Kobe for his new post on the 9th inst. by the steamer *Saikio Maru*.

At the meeting of the Tokyo City Council to be held on the 8th inst., a proposal for the imposition of an additional tax for shooting licenses will have to be discussed. It is said that the proposed supplementary tax will consist of *yen* six for first class, *yen* three for second class and *yen* .60 for third class permits.

A JAPANESE pickpocket deprived Mr. Clifford Wilkinson of his purse at Sannomiya station on Sunday and being detected was carried on to Sumiyoshi along with a policeman who boarded the train to enquire into the matter. As the train neared Sumiyoshi the man sprang down struck his head on the line and was instantly killed.

ABOUT 7 p.m. on Thursday when a N.Y.K.'s lighter, with 15 passengers from the steamer *Inaba Maru* was on her way to the Shin-Hatoba, Yokohama, she collided with a steam-launch of the same company which was coming into the Hatoba. All the passengers on the lighter were thrown overboard, but were fortunately rescued in time.

THE exportation of *habutae* from Yokohama is gradually increasing yearly. Trade returns published in Tokyo papers show that during the period from January to October last the value of this fabric exported amounted to *yen* 17,705,025, whereas the total for last year did not exceed *yen* 17,233,428, showing an increase of *yen* 472,597 in favour of this year.

SERGEANT-MAJOR Ijichi Shoun, engaged at the Military Cadets School, living at Sakamachi, Yotsuya, Tokyo, attempted to murder a woman by cutting her throat on the morning on the 2nd instant. He afterwards tried to commit suicide by stabbing himself in the throat, but was stopped by neighbours. He was sent to a military hospital at once but died the same afternoon.

At a little past 6 p.m. on the 2nd inst., a collision took place between a passenger train and a goods train at Minatogawa station on the Kansai Railway with the result that six passenger carriages and two goods vans were smashed. Fortunately, however, as all the passengers had just left the train when the accident occurred, none of them sustained injury, but a railway coolie and another employe were injured more or less severely.

ABOUT 1 a.m. on Tuesday, a girl attempted to commit suicide by drowning herself in Yokohama harbour but was rescued by two *senbo* who happened to be working near in a boat. Domestic troubles and the fact that she suffers from an incurable disease, drove the unfortunate girl to take such a step. She is the eldest daughter of a man named Sankichi Yoshida of No. 113, Shichome, Tobe, Yokohama, and is 22 years old.

A DISPATCH from Maizuru dated the 3rd inst. says that the opening ceremony of the new Maizuru Admiralty was conducted successfully on that day. Two arches of evergreens were erected at the entrance of the Admiralty, the buildings of which were profusely decorated with flags and bunting. There was a display of fire-works and various other demonstrations both on land and sea, boat races being among the most interesting and exciting spectacles. The offices of the Admiralty were thrown open to the public.

DR. BAELZ, of the Tokyo Imperial University, met with an accident on last Sunday night. The doctor left his residence in Inai-cho, Azabu, in a carriage at a little past 9 p.m. for the purpose of attending the ball held at the Imperial Hotel. When the carriage reached a slope at Sanchoime, Shimmachi, Akasaka, one of the horses took fright and fell in a narrow ditch, together with the carriage. Fortunately neither the doctor nor his coachman was injured, and the former proceeded at once to the Imperial Hotel in a *jirikisha*.

THE Paris correspondent of *The Times* quotes an editorial article in the *Temps* commenting on the appointment of a commission in Tonquin to report on shipping bounties in the Far East. The *Temps* says the French mercantile marine is decreasing terribly, and this is stultifying the colonial policy of the country, since there is no use in securing privileged markets if the trade is carried on in foreign vessels. There are no French ships now engaged in the Far Eastern trade except those belonging to subsidized lines, hence a scheme of colonial bounties may benefit the French maritime world.

SOUTH AFRICAN QUESTIONS AGAIN.

Monday, Nov. 4.

The Boers are certainly taking the fullest advantage of the extraordinary and apparently mistaken clemency shown them by the British. It is now a common device of theirs to dress in khaki and thus deceive the British troops. That was the device adopted by Smuts—a suitable name—on September 17th, when, in order to escape from the cordon of columns hemming him in, he rushed a squadron of the 17th Lancers at Eland's River Poort, killing 3 officers and 20 men and wounding an officer and 30 men. It is hard to know what measures should be adopted with such an enemy. Brave as the Boers are and greatly as we admire the stubborn resistance they have made, we can not conceal from ourselves the fact that much of their apparently gallant obstinacy is due to the system of gross lying adopted by their chiefs to keep them in ignorance of the real state of affairs, and that much of their ability to keep the field is owing to the use of manoeuvres universally condemned by civilized nations. We have not the smallest doubt that if any army of continental Europe were in the position of the British army at present, every Boer prisoner dressed in khaki would be marched out and promptly fusilladed. The British will not resort to such measures, however, and so the Boers go on murdering British officers and men by brigands' dodges, and our European friends go on vilipending us for imaginary cruelty.

One of the latest examples of Boer lying was at Klerksdorp when the Boer commander informed some prisoners that they would soon be relieved from active service, as on September 20th France and Germany had arranged to take over South Africa, restore peace and prosperity and remove the British clement from the land. Doubtless that wonderful story was fully credited by the simple Boers to whom it was habitually related.

Tuesday, Nov. 5.

A correspondent writing from Nagasaki asks us to re-produce a cutting from an American paper which he encloses. It consists partly of extracts from Miss Hobhouse's report on the Refugee Camps in South Africa and partly of comments by the American journal. We must decline to publish it. In the first place, it appears to us that there is too much electricity in the air to allow of quiet and dispassionate discussion. We want to live at peace with our German friends and we can confidently trust in time to correct the misapprehensions under which they are now labouring as we think. In the second place, the allegations of the American journal are too extravagant to be treated seriously. It asks the public to believe that the Boer women and children are detained in refugee camps by the British because their presence there prevents the Boers from cutting the lines of railway, and thus depriving the English of supplies and compelling them to retire from the Transvaal and from the Orange River Colony. That is really too silly. Misrepresentations are probably inevitable in connexion with such a war as the South-African struggle has proved, but since no one possessing even a rudimentary knowledge of the English nation could for an instant credit the theory of this American journal, we do not think it necessary to controvert its view. In the third place, Miss Hobhouse has been completely discredited. It has been shown, among other things, that when she spoke with horror of the mortality among Boer children—an

incident which every Englishman bitterly deplores—she rested her case on the returns from one special camp where an epidemic of measles had broken out, and where it was found impossible to induce the Boer women to adopt proper sanitary precautions, as they were entirely ignorant of such things and had no confidence in them, and she failed altogether to notice that in the other camps the death rate among the children was below the normal. Our correspondent will doubtless be interested in the following editorial remarks made by *The Times* on Miss Hobhouse's pamphlet and on a letter from a correspondent at Cape Town with reference to that pamphlet:—

Sufficient time has now elapsed for matured colonial opinion on the statements made by Miss Hobhouse to have reached us by mail. We publish this morning a communication from a correspondent at Cape Town and a letter from Mr. Sampson, a member of the Cape Legislative Assembly, which agree in substance in their view of that lady's pamphlet. Our correspondent feels the sympathy we all feel for the sufferings brought upon the wives and children of our enemies by the war. But he insists with force and point on some considerations which the pro-Boers here and the foes of England abroad deliberately and persistently ignore in their treatment of this subject. Miss Hobhouse's pamphlet, our Correspondent complains, has been seized upon in Cape Town as a weapon of party warfare. It has been used as such a weapon wherever the name of England is hated, and even in the dynamite Press of America. In these circumstances our Correspondent thinks it worth while to examine the competence of the compiler of these charges against us, and the nature of the charges themselves. Miss Hobhouse, he points out, as men of common judgment pointed out long since at home, is deficient in one of the first qualities of an investigator into such a subject. She has no knowledge and no previous experience of the habits of the people whose condition she undertook to examine. Our Correspondent, who has that knowledge and experience, affirms that the overcrowding which impressed her, like many of the other alleged hardships of which she complains, is habitually practised by the Dutch in ordinary times of their own free will. This statement is fully confirmed by Mr. Sampson, who laughs at Miss Hobhouse's complaint of the want of sufficient towels at Green Point, and tells an anecdote of a Boer farmer who once tenderly inquired whether his English guest was "still quite well" at dinner-time after indulging in the imprudence of taking his morning tub. In the next place, our Correspondent observes that Miss Hobhouse has but little acquaintance with the "taal," and that her ignorance of the Dutch character is so gross that she places implicit belief in all that was told her notwithstanding the notorious untruthfulness of the Boers. Our Correspondent asks, further, whether the camps were necessary and whether the women and children in them would have been better off in their own homes. All the soldiers, he declares, to whom he has spoken are unanimous that the camps were an absolute military necessity. All men who understand the realities of war are equally unanimous that the women could not have been left on their farms, save on conditions which would have exposed them to starvation. But the chief point which our Correspondent urges is that the sufferings of the women and children of the enemy have been no worse than the sufferings of our own women and children. He gives proofs, terrible proofs, of the truth of this contention. They are not rhetorical, like the highly-flavoured stories which adorn Miss Hobhouse's pamphlet. They are dry, unimpeachable records of sufferings borne without whining. They are none the less eloquent. They speak for themselves. Those of our readers who compare them with the account given by Mr. Sampson of what he and his Brother Assemblyman, Colonel Harris, saw in the Kimberley Camp will agree, we fancy, that it is high time for the British public to discontinue their sympathy and their help more equally between the families of our enemies and the families of our own kith and kin, many of whom have died for their country.

In connexion with this subject of the refugee camps, it has apparently escaped the attention of our Nagasaki correspondent and of other critics also that the British Generals adopted the simplest and most straightforward method of dealing with the false reports circulated by enemies of England or by hysterical ladies; they invited the Boers themselves to visit the camps and inspect the state of their inmates. We quote—

again from *The Times*—the result of that step, probably unique in the history of war:—

The extraordinary consideration with which we treat the enemy whose "delegates" are denouncing us as ferocious oppressors, is well shown by a novel inspection which has just been made of the concentration camp at Middelburg. "The British are keeping our women, and we steal enough from the British to support our men in the field. What more do we want?" is the explanation of the continuance of the struggle recently given by a prominent Boer in Johannesburg, according to our correspondent, Mr. Harvey. Apparently they did want something more. Their minds may have been disturbed by the highly-flavoured narratives of the sufferings of the refugees prepared for British consumption, and they desired to satisfy themselves what the real state of their women was. The subject was mentioned in an interview between General Blood and General Viljoen at the end of August, and it was proposed that General Viljoen should go and see for himself. The general declined. He was afraid of compromising himself with his burghers. We offered to let him send one of his staff, and he agreed. On Wednesday Lieutenant Malan, one of his aides-de-camp, carried out the inspection. He was accompanied to the camp by General Blood and other officers, but our Correspondent, who was of the party, expressly states that he made his inspection alone, and General Blood told him to ask if there were any complaints. The Boer emissary spoke to as many of the refugees as possible. There are nearly 7,000 of them—men, women, and children—at Middelburg. General Viljoen's representative declared that he found all content, that nothing was specially wanted, and that the only complaint made was of the quality of the meat. It is the same meat as is eaten by our soldiers and by the civil inhabitants of the town. Our Correspondent admits that it is poor at present, as there is no possibility of obtaining grazing cattle. Malan, we are assured, was agreeably surprised. His testimony, as our Correspondent remarks, must be of greater value than that of any commission from England, as it is above all suspicion of partiality for the English, and it comes from a man familiar with the ordinary habits of the refugees.

It would be idle to hope that even this testimony will carry weight with persons who desire to retain their hostile belief. But to the unprejudiced such evidence is conclusive.

Some curious testimony was recently furnished in reference to the question of train-wrecking. In the first place, the following letter was addressed by a Frenchman to *The Times*:—

Monsieur l'Éditeur.—Je puis vous assurer (à cause de la position que j'occupais en France en 1870-71) que jamais un train allemand ne s'est mis en marche sans otages.

Tous mes collègues et mes amis ont passé par là. Nous avons tous été requisitionnés.

Pour ma part j'ai servi d'otage 28 fois. Vous lisez bien—vingt-huit fois. Quinze fois j'ai été requisitionné en plein hiver, la nuit, par la neige et la gelée. Chaque fois le commandant allemand m'a fait monter sur la locomotive.

Voilà comment on protégeait les trains.

Je ne prends pas parti dans votre différend anglo-boer; cela ne regarde que les belligérants seuls. Si je prends la parole, c'est une question d'humanité pour sauver une foule de vies innocentes.

Je joins ma carte comme garantie.

Agréez, Monsieur, mes civilités empressées:

We do not reproduce this letter by way of reproach. It is our conviction that such precautions against train-wrecking are not a violation of the principles according to which war ought to be conducted.

The second piece of testimony is a copy of a proclamation issued by E. R. Grober "Head commandant of the Southern Army Division of the Orange Free State Burgher Forces" at the instance and with the sanction of President Steyn and the Executive of the Orange Free State in November, 1899, when the Boers had obtained possession of a portion of Cape Colony:—

"I have appointed and do hereby establish, by virtue of the powers in me vested by the former detailed proclamation, and do hereby generally make known the following rules and regulations:—

"1. In the territory with its inhabitants extending over the country at present occupied by the officers, burghers, and troops of the Orange Free State or which may hereafter be occupied by them, the martial law of the Free State, as embodied in Law No.

to of 1899, is hereby declared to be applicable to every deed which may tend to endanger the safety of the burghers and men, injure them, or assist the enemy.

"2. The martial law before mentioned is regarded as in force throughout the whole extent of a ward, district, or other division or area of administration as soon as this proclamation has been made known by placarding or by announcement in one of the communities thereof.

"3. All persons who do not constitute a portion of the British Army and who (a) serve the enemy as spies; (b) cause the burghers and men of the South African Republic and Orange Free State to lose their way when acting as their guides; (c) kill, murder, or rob persons belonging to the men of the two Republics, or form a part of their following and train; (d) destroy bridges or damage telegraph lines, heliographic apparatus, or railways, or in any way cause damage to parts or portions of the same whereby the Republics may be hindered or her (sic) people or property damaged, or even they who in any way endeavour to repair or improve the damage done to property or apparatus or who set fire to the ammunition, war supplies, quarters, or camps of the Republican forces of the said Republics, or in any way damage them; (e) take up arms against the forces of the said Republic, shall at the discretion of the Council of War, be punished with death or imprisonment not exceeding 15 years."

Paragraphs 7 and 8 state:—

"And I hereby further officially notify that life and property will be secured to all who place themselves under the protection of the Government of the Orange Free State or of the South African Republic and their lawfully appointed officers and officials, whose laws and orders they will obey and carry out.

"8. No one who does not take up an inimical attitude towards the Governments of the Orange Free State or the South African Republic or their officers, officials, laws, or orders, will experience any harm.

"9. Those who refuse to subject themselves are hereby granted permission to leave within the period of 14 days the territory conquered by the forces.

"10. All persons who have been driven from their farms or homes or have fled, and who are now willing to subject themselves to the conditions of this proclamation, may return to their homes."

This proclamation shows not only what the Boers themselves thought of train-wrecking when they were the sufferers from it, but also that they considered it right to deny belligerent privileges to all subjects of Great Britain who were not members of the regular army. Great Britain has not proceeded to any such length in the case of burghers not belonging to the Boer Army. Above all, it has never occurred to her to do what the Boers did when the tide of fortune began to turn against them, namely, to force all the able-bodied men, in the territories occupied by them, without distinction of nationality, to take up arms against the English.

Thursday, Nov. 7.

British military critics having commented in somewhat condemnatory terms on the tactics followed by one of the German armies during the recent manoeuvres, the *Kreuz Zeitung* replied, with considerable show of irritation, that the manoeuvres were not directed against a supposed Boer army; that the object of the manoeuvres was merely to see whether troops in large masses were mobile, and that "as the British have no such kind of manoeuvres and have no conception of their use and object, the British criticisms of them are, from a military point of view, absolutely worthless." That is polite. It is a fine thing to have a swelled head, and we English have had it in our time. But the *Kreuz Zeitung*, when it follows up the above *riposte* with an attack upon British tactics in South Africa, forgets that it lays itself open to a damaging rejoinder of its own kind, namely, that as the Germans have never been engaged in any warfare even remotely resembling that in South Africa, their criticisms as to British tactical methods of conducting it are "absolutely worthless."

Speaking of "swelled head" recalls an incident which recently occurred. A

German, talking to an Englishman about certain articles of furniture which had been imported from England, expressed the conviction that they could not have been made in Great Britain but must have been made in Germany, as they were too artistic to be of British manufacture. Even supposing this critic to have been oblivious of the fact that the nineteenth-century renaissance in art furniture and art decorations for interiors had its origin in England and still has its head-quarters there, it might have occurred to him that to send German things to England in order to find foreign customers for them, amounts to admitting that without the English *cachet* their artistic qualities would not have been recognised by outsiders. It all comes of "swelled head," a most delightful malady while it lasts, and not particularly harmful to anyone.

The news of General Buller's compulsory retirement from the service, coming almost simultaneously with that of Benson's rear-guard action, recalls the battle on the Tugela and the disaster that occurred there to the British artillery. In Benson's case two guns were rushed, that is to say, the gunners and their escort were obliged to abandon them. But the Boers could not carry them off, and the British could not immediately recover them. They lay within easy rifle range of both sides, and the Boers finally having been compelled to retire, the British took possession of the guns. At the Tugela something practically similar occurred, with this great difference, that the eleven guns ultimately fell into the Boers' hands. The guns had not been rushed, but their teams had been shot down as well as most of the gunners, and the remainder had been obliged to retreat out of range of the Boers' rifles. It may perhaps be remembered that the first telegram received here carried the story to the point where the guns were lying between the two positions, some gallant but disastrously fatal attempts having been made by the British to drag them away with fresh teams; and it may also be remembered that certain of us entertained a hope that the Boers would be equally unable to draw the guns into their own lines. In fact, the eleven pieces having been left at a place five hundred yards from the Tugela, it should have been just as feasible for British riflemen to hold off the Boers as for Boer riflemen to hold off the British. It is here that General Buller comes upon the scene. One of his officers, it is said, actually did ask permission to place a party of sharpshooters under cover within easy range of the guns so as to protect them against any enterprise on the part of the Boers during daylight, the idea being that teams could then be sent out to recover them after night-fall. But Buller is reported to have replied:—"D—n the guns. The guns don't matter. Let the men save themselves." Perhaps he was right, but if the officer commanding Benson's rear-guard had taken a similar view, two field-pieces would certainly have been carried off by the Boers in the recent action between Bethel and Balmoral.

CHINESE NOTES.

Saturday, Nov. 2.

A telegram received by the *Asahi Shimbun* and published in the form of an extra, says that the text of the new Manchurian Agreement having been forwarded by Viceroy Li to the Court *en route* for Kaifong, was submitted by the Court to the Viceroy's Liu and Chang, who expressed

the opinion that although the articles of the proposed agreement were considerably more favourable than those of the formerly drafted Convention, the conditions relating to the time of withdrawing the Russian forces and the training of Chinese troops by Russian officers were most dangerous and, moreover, some of the other terms, if granted, would open the door to very embarrassing demands from the Powers under the plea of the most-favoured-nation clause. The Viceroy therefore recommended that the Agreement be rejected. The Emperor having laid this recommendation before the Empress-Dowager, Her Majesty entirely concurred, and a telegram was sent to Viceroy Li in Peking on the 30th October, peremptorily ordering that the proposals of Russia must be categorically refused. The receipt of this command gave such a shock to the Viceroy that he burst a blood-vessel and is now in a very precarious state.

Such is the *Asahi's* telegram. We may add that the authenticity of the news is greatly doubted in official circles in Tokyo.

Prince Ching left Peking for Kai-fong on the 31st of October. It is of course stated that the Manchurian Agreement will make great progress in his absence, but we are disposed to think that Viceroy Li will scarcely care to prepare such an instrument for the Court's welcome on its return to the capital. Has it been a part of Russia's diplomacy, we wonder, to bewilder the world about this agreement. If so, she has certainly managed the matter most cleverly, for probably no one could be found to assert with any semblance of confidence what the contents of the draft are. One story, apparently authoritative, is that the agreement has not passed the stage of preliminary *pour-parlers* and that no part of its terms has yet been committed to writing. Another story, evidently sensational, is that Russia has intimated to China that failure to accept the Agreement as now drafted will forfeit all right to be consulted hereafter about the fate of Manchuria. Nothing remains except to believe nothing, a state of public incredulity which may, perhaps, be adroitly utilized.

Monday, Nov. 4.

A telegram to the *Fiji Shimpō* confirms the *Asahi's* news that Li Hung-chang has broken a blood-vessel, or at any rate thrown up a quantity of blood, and that he is unable to attend to business. This message does not suggest, however, that the cause is connected with the Manchurian Agreement. At Li's time of life such an incident must be serious.

Although there is no official intelligence supporting the statements telegraphed from Peking to the *Asahi Shimbun*, it seems to be thought that an Agreement on the lines recently reported can not possibly be accepted by China, and that if the story of its rejection is premature, it is nevertheless prophetic.

It really can not matter very much to Russia whether she obtains a written agreement or does not obtain it. She is in possession, and she will remain in possession just as long as she pleases, agreement or no agreement, unless some means not at present discernible are employed to induce her to get out. We should imagine that the reluctance of the Chinese Court to sign anything in the nature of a promise to recognise the justice of Russian tenure for a fixed number of years, will be not unwelcome to many Russians. Their rejoinder will be, "Very well. If China won't agree to any arrangement, our hands are free to do as we

please." Of course, from China's point of view, there can be no reasonable basis for setting a time limit to Russian occupation. If it be possible for Russia to pledge herself to withdraw her troops two years or three years hence, it should be possible for her to withdraw them at once. Indefinite postponement in such a case plainly indicates perpetual tenure, but definite postponement is only one degree worse for, in the obvious absence of all determining factors, it implies that Russia arbitrarily fixes her term of occupation.

The *Jimmie* devotes some space to speculating on the attitude of Germany at this juncture. It considers that she is troubled with earth hunger, the pressure of her prosperity compelling her to seek fresh outlets for her surplus population. Therefore she is not unlikely to follow Russia's example, which affords her a good opportunity to carry out her policy of partitioning China. She is the Power to be watched closely, in our contemporary's opinion.

It is strange to be told that Germany's policy is the partition of China when the ink is not yet dry upon a Convention by which she pledged herself to abstain from anything of the kind. Besides, the *Jimmie* seems to forget that Germany has declared Manchuria to be outside the area of Chinese territory. Nothing that Russia does in Manchuria can free Germany from the engagements she undertook in the Anglo-German Agreement so long as she maintains that Manchuria is beyond the scope of that Agreement. It is certainly true, as our contemporary observes, that Germany shows much restlessness at present and that her doings attract the world's attention very closely. But we can not for a moment suppose that she has proposed to herself the partition of China as a definite policy. She would probably be quite content if, while reserving Shantung as an exclusive field for her own subjects' enterprise, she could at the same time secure free access for them to the fields of all other Powers.

The *Kokumin Domei-kai*'s attitude seems to be very rational. They maintain two things: first, that as this Manchurian question has grave import for Japan, she must insist that China and Russia should make public the whole of the proposed agreement; and secondly, that if an agreement such as that indicated by rumour be concluded, it will open the door to wholesale demands on the part of other Powers, the entire responsibility for which will rest on China. The *Domei-kai*, previously to embodying that view in resolutions, sought an interview with the Minister of State for Foreign Affairs, but finding him engaged, postponed further action.

Count Okuma thinks that whatever Power possesses Manchuria will be mistress of the fate of the Far East. Therefore Japan can not possibly consent to see Russia in possession. The present Cabinet will not be found weak-kneed in such a matter, whatever the public may say of it, especially when a man like Mr. Komura holds the portfolio of Foreign Affairs.

It must be confessed that there is an *aliquid amari* in Count Okuma's references to the present Ministry, as transcribed by the *Yomiuri Shinbun*.

A new version of the latest phase of the Manchurian Agreement is wired from Peking by the *Jiji Shimpō*'s correspondent. The *Asahi*'s account was that the Court had peremptorily forbidden the conclusion of the

Agreement, and that Li had burst a blood-vessel on receipt of the mandate. The *Jiji*'s version is that an edict has been addressed to Li, commending to his particular attention a memorial submitted to the Throne by Viceroy Chang Chih-tung, directing him to take no steps without careful consultation and without due regard to the indications furnished by his own conscience. Such an edict must be more painful to Li than even a peremptory veto, for he and Chang Chih-tung have always been rivals, if not actual enemies, and to have Chang's memorial thrown in Li's teeth as a proper source from which to derive wisdom, must be indeed a better pill to the old Viceroy. But is this story more credible than that of the *Asahi*?

Wednesday, Nov. 6.

The withdrawal of the Japanese troops from Chili commenced on the 5th instant. Apparently the troops left there will be limited to one battalion in Tientsin and two companies at Shan-hai-kwan, a total force of about 1,200 men.

It is alleged, says a telegram to the *Nichi Nichi Shinbun*, that Li Hung-chang has tendered his resignation, the state of his health rendering it quite impossible that he should continue his duties. All kinds of rumours have been circulating recently about the old statesman, and of course his resignation at this juncture would be interpreted by the public as a result of the Court's attitude with regard to the Manchurian Question. Rumour further alleges that Prince Ching has been ordered to discontinue his journey to Kai-fong and to return at once to Peking.

Captain Idogawa reached Nagasaki on the 4th instant accompanied by 19 Chinese students, selected by the Viceroy of Szechuan for the purpose of pursuing their studies in this country.

Some Chinese have been attempting to smuggle arms and ammunition at Newchwang. The attempt was detected by the Russian Authorities. Such incidents may be expected to occur pretty often.

Thursday, Nov. 7.

The interesting and dramatic story about the Chinese Court's having peremptorily forbidden Li Hung-chang to conclude the Manchurian Agreement and about the old Viceroy's having burst a blood-vessel with chagrin and vexation on receipt of the mandate, is gradually fading into the *limbo* of *canards*, and we now revert to the tame and vulgar *status quo ante*, namely, that Russia is pressing China to conclude the Agreement.

Concerning the Shanhaikwan-Newchwang railway, it is alleged that China is prepared to pay the sum demanded by Russia as compensation for work done, but the conditions which the latter Power seeks to impose with regard to the restoration of the line are most distasteful to China; that is to say, the conditions that no foreign engineers shall be employed on the road; that no extension of it shall be made without Russia's permission, and that under no circumstances shall it be carried to the banks of the Liao. It is, of course, easy to see why Russia desires to impose the two last conditions. So long as she remains in the Liao-tung peninsula, she naturally desires to close all avenues by which Chinese or other troops could be massed on her flank. But it is equally evident that if China entertains any idea of continuing to be recognised as sovereign of Manchuria, she can not subscribe to such terms.

Rumour further alleges that Russia is pressing China for mining concessions at Mukden. So long as they are special concessions and not generally exclusive, we trust that she may succeed in obtaining them.

THAT WEARY SUBJECT.

Our readers must be tolerably weary of reading rumours about the Manchurian Agreement. They would doubtless welcome any definite news, but unfortunately Russia maintains absolute secrecy, and the accounts obtainable from Chinese sources do not command explicit credence. Considering the unquestionable character of the interests that Powers like England and Japan have in the fate of Manchuria, it would scarcely be unreasonable to seek from Russia an explicit statement of the conditions of the Agreement. But Russia's right to keep silence is quite indisputable. She is entitled to negotiate with another Power without inviting any third party to share her confidence, and if she chooses to do so, after having taken into full account the suspicions necessarily engendered by secrecy, that is her own affair. Great Britain received a very emphatic rebuff when she sought to have publicity given to the first draft of the Agreement, and she is not likely to repeat the essay, nor is any other Power likely to invite a similar rejoinder. There is nothing for it therefore but to collate the various rumours and to select for credence those that are most persistent and consequential. From that point of view it seems to be true that among the conditions which Russia seeks to enforce there are three to which China takes special exception. They are, first the withdrawal of Russia's forces after an interval of two years; secondly, an engagement that China will not post troops anywhere in Manchuria without Russia's previous consent; and thirdly that China shall not organise any artillery in the territory. The Chinese Government is understood to insist that two years is overlong for Russia to remain in military occupation, and that one year would be ample. Such a contention appears to be reasonable on China's part. We do not under-estimate Russia's position or seek to depreciate whatever rights she may have acquired in Manchuria; but it seems to us quite plain that if she can pledge herself definitely to withdraw her forces two years hence, she may equally pledge herself to recall them after twelve months. There is no special virtue in the term of two years. It is neither flesh nor fowl—too short for the thorough establishment of any reformed system of administration; too long to be consistent with a *bona fide* intention of ultimately surrendering the region. But considering China's recent history, two years is assuredly not too short for something untoward to happen; something which might convert into waste paper any convention now concluded. The Chinese Government must be exceedingly sanguine if it hopes to preserve for two years such order as would defy Russian criticism, and even Russia's friends must admit that when she wants opportunities she has a remarkable talent for creating them. So if China wishes to keep Manchuria for herself, she would be very ill-advised did she consent to a two years' military occupation by Russia. Besides, it is really perplexing to discover why Russia should remain there even for two months. Her railways are her only tangible basis of right. But if the object is to protect her railways, that function will re-

quire to be discharged just as carefully two years hence as to-day. Possibly when the text of the Agreement is published, there will be some intelligible indication of the reasoning on which this two years' limit is based, but at present it seems inexplicable. As for the two other conditions quoted above, they are obvious violations of China's sovereignty, and they are moreover difficult to reconcile with any genuine intention of ultimate evacuation on Russia's part.

MARQUIS ITO.

Marquis Ito has arrived in France, where he is said to be meeting with much attention at the hands of the French people.

A telegram of a rather alarmist character was sent to the American press from Chicago on Oct. 10th. It ran as follows:—

"Stricken by recurrent affection of the heart, a malady to which he has long been subject, Marquis Ito, the former Premier of Japan, is confined to his room at the Auditorium Annexe, and may be forced to abandon his prospective tour of the United States. His condition is such that his attendants are much distressed concerning him. All plans for the visit in Chicago were laid aside and no arrangements were made for the continuance of the journey.

"Dr. Koyama, the Marquis' physician, said to-night that his condition was less hopeful than in the early part of the journey. 'We may be forced to return to Japan at any time because of his Excellency's health, and for that reason we have made our plans from day to day,' he said. 'It was our hope that travel in this country and in Europe would be of much benefit to him, and that rest from cares of state would give him the needed strength.'"

On Oct. 13th, however, it was stated that "Marquis Ito and party, who have been sight-seeing in Chicago, left to-night for New York, whence they will proceed to Washington. While there, the Marquis will call on the President. Marquis Ito has been in poor health for some time, but just before leaving to-night he said he was feeling stronger than when he left Japan."

THE NEW JAPANESE SETTLEMENT AT CHUNKING.

It was announced a few days ago that an arrangement had been effected between China and Japan for a special Japanese settlement at Chunking. This is not a new question. A grant of land for a settlement at that place formed part of the agreement concluded between China and Japan after the war of 1894-5, but the actual convention relating to the settlement and the selection of a site were not concluded until the 24th of September. The convention consists of twenty-two articles. The duties of policing and municipally governing the settlement and of repairing the roads devolve upon the Japanese, but the purchase of the land from its present owners is to be effected by Chinese officials who will rent it in perpetuity to the Japanese. As to the removal of graves and houses, the Chinese Authorities engage to employ their best offices, the Japanese Consul paying the expense of removal after consultation with the Chinese officials. Should it be found impossible or inexpedient to move any burial ground, it will be fenced in and left intact. There are the usual articles about extraterritorial jurisdiction, and it is provided that in cases where Japanese subjects are the complainants, judgment shall be delivered by a mixed court after the Shanghai type.

THE IMPERIAL BIRTHDAY.

The weather has been so capricious of late that a raw cold and wet day on the 3rd instant would have been quite in keeping with the experiences of the past fortnight. But apprehensions on that score were dispelled by a burst of brilliant sunshine in a cloudless sky and without a breath of chill air. It would have been ideal weather for the usual Birthday parade, but owing to the state of the ground and His Majesty's indisposition that ceremony was dispensed with, and the citizens of Tokyo were not edified by the accustomed thunder of guns and rattle of rifles. It does not appear, however, that the Emperor is suffering from any serious indisposition, for His Majesty was able to hold the usual Birthday Reception at the Palace.

Of course the Tokyo journals "spread themselves" in honour of the occasion. To our mind the chief success was scored by the *Asahi* which issued a picture of Prince Michi, the Emperor's grandson. It is probably an idealized likeness though it professes to be taken from a photograph by Mr. Ogawa when the little Prince attained the great age of 160 days. He now numbers 190 days. When the photograph was taken, Prince Michi weighed 1.725 kwan. We do not know whether that is a great weight for a baby five months old, but we recognise the importance and perspicacity of the *Asahi's* comment that His Imperial Highness, being now 30 days older, probably weighs more.

In Yokohama the Japanese flag was strongly in evidence, both on the Bluff and in the former Settlement and at noon the men-of-war in harbour fired the usual salute, while every school held exercises and musical drills.

About three hundred officers were promoted on the Emperor's Birthday. The principal among them were Colonels Prince Kanin, Shibiya, Saito and Yoshida, who become Major-Generals. It is expected that there will be considerable changes in the various commands.

The usual ceremonies took place in the Palace on the Imperial Birthday. After having given audience to the officers commanding the German, French and British Squadrons, as well as to Sir Claude and Lady MacDonald, the Emperor entertained a large number of distinguished personages at luncheon. His Majesty made a speech, marked by the brevity that characterises all his utterances, expressing the pleasure it gave him to meet the Foreign Representatives and his own subjects on the occasion of his birthday. His Majesty's speech was translated into French by Baron Sannomiya. Viscount Katsura, Minister President of State, replied in a few words on behalf of the Emperor's subjects, and Baron d'Anethan, speaking as Doyen of the Corps Diplomatique, thanked His Majesty for the honour paid to the Foreign Representatives, and in their name wished the Emperor a long and prosperous reign. Baron Sannomiya again undertook the office of translator. The number present at luncheon was 280.

In the evening the Minister of State for Foreign Affairs gave a brilliant ball in the Imperial Hotel. Owing to the indisposition of Mrs. Komura, the honours as hostess were done by Countess Toda. Mr. Komura had previously entertained the Foreign Representatives and other distinguished personages at dinner, on which occasion Baron d'Anethan proposed the Emperor's health.

Their Imperial Highnesses Prince Komatsu and Prince and Princess Kanin entered the ball room at half past nine, and dancing commenced immediately, being kept up until nearly 2 a.m. The grounds of the Hotel were brilliantly illuminated, and the decorations of the anteroom and the ball-room attracted universal admiration, not only on account of their beauty but also because of their novelty. It may be added that all the arrangements as to refreshments, supper and vehicles were quite faultless, thanks to the talent and experience of Mr. Yoshida, of the Foreign Office, by whom the direction of these ceremonies is generally assumed. The number of persons present was about two thousand.

The Prince Imperial has been promoted to be a Lieut.-Colonel in the Army and a Commander in the Navy. The Birthday gazette contains the names of over three hundred officers raised from the rank of Lieut.-Colonel to that of Colonel or from the rank of Major to that of Lieut.-Colonel.

A Chemulpo message dated the 3rd inst. reports that Mr. Uchida, Japanese Minister to China, arrived at that port the same day by the steamer *Risshin Maru* on his way to Peking. The Japanese Emperor's Birthday was duly celebrated by the Japanese residents there. The war-ships *Kaimon* and *Oshima* fired a salute in honour of the occasion.

GINSENG.

There seems to be a renewal of the once-perennial trouble about ginseng in Korea. This valuable root is grown in considerable quantities in the peninsula, especially in the neighbourhood of Kaisong, in Kyong-ki-do, which is near Soul. The cultivators have never been allowed to dispose of the root on their own account. The business has always been a Government monopoly. In old times, when Korea sent annual tribute to China, her envoys used to carry with them the year's exportable supply of ginseng, which they sold as best they could to Chinese merchants. But when Korea acquired her independence under Japan's auspices 1896, it became necessary for the Soul Authorities to provide some other means of disposing of the root. They therefore established agencies at suitable places in China. Meanwhile Japanese adventurers, taking advantage of the discontent caused among the cultivators by the extremely low prices at which they were compelled to part with their produce to the Government, repaired to Kaisong, and succeeded in obtaining large quantities of the root. Things went merrily enough until this illegal trading began to bear inevitable fruit. Some of the Japanese, secure against open complaint on the part of the Korean cultivators, obtained supplies of ginseng on the credit of promissory notes which they never redeemed. Finally these irregularities became so flagrant that, after much consultation, it was decided to entrust to a Japanese firm the whole business of selling the *ginseng*. The Mitsui Bussan Kaisha were selected, and since last year they have been carrying on the work, paying cash to the Government immediately on receipt of the root, and then exporting and disposing of it at the firm's risks. It is a big business, involving a floating capital of over a million yen annually, and whether the results have thus far been favourable to the Japanese firm, we do not know, but rumour says that they do not succeed in collecting their money from the Chinese consumers.

as promptly as they themselves pay over the purchase price to the Korean Authorities. The point is, however, that a new invasion of adventurers has taken place at Kaifong, this being the time for harvesting the crop, and that some seventy persons, Japanese and Koreans acting in collusion, are resorting to all sorts of devices to evade the official monopoly. Application has been made by the Korean Government to Mr. Hayashi, and it is said that the matter is causing some trouble.

HIS EXCELLENCY MR. POK.

Of course the very exceptional incident of a Minister of Foreign Affairs proceeding to a foreign country to witness military manoeuvres, is beginning to excite the news-mongers. Mr. Pok might naturally have been expected to lock up his Generalship in his Ministerial portfolio, and since he has not taken that obviously normal course, but reverts to his soldierly role for the sake of paying a visit to Japan, he must be prepared to be much-talked-of. The quaintest story afloat is that he is coming to discuss the already much discussed *Man-Kan* exchange; in other words, the arrangement which would assign Korea to Japan in return for her acquiescence in Russia's Manchurian doings. The folks in whose busy brains that remarkable barter first germinated, may fairly claim the cake for unadulterated foolishness. Japan is not going to trade in other people's properties. Besides, she is probably quite content with her present position in Korea. She seems to be getting along very nicely there. The Korean Government has been "induced" to withdraw its anti-grain-export veto, and the Minister of Foreign Affairs in Seoul, when urging that course upon his Government, persuaded himself to allege that the continued operation of the veto would prove injurious to trade. Simultaneously with the receipt of that news comes intelligence that Korea has conceded Japan's request for land to form a special settlement at Cha-pok-po near Masampo; that the area of the settlement is 750 acres, and that it includes the land surveyed and pegged out last year by Russian officials. That is a striking denouement of the Masampo incident, which created so much sensation at the time—a turning of the tables, which may possibly elicit from Russia on her side some mutterings of *de te fabula narratur*. The general inference is that Japan may be content to let things take their course, and that her position in Korea may appear sufficiently satisfactory in her eyes not to require the costly purchase of any third party's endorsement.

As Mr. Pok, Korean Foreign Minister, who has come to Japan to witness the manoeuvres, Mr. Tei, who went from the Foreign Office to meet him, and other persons of the party, were proceeding from the *Saiyen* to the shore, their boat was upset and they all got a thorough ducking, but no one seems to have been seriously injured.

Mr. Pok was expected to arrive at Bakan on the evening of the 2nd instant for the purpose of attending the Japanese autumn manoeuvres. The Foreign Office in Tokyo sent Mr. Tei to meet him, and the Head Quarter Staff sent Captain Tsunoda.

THE SEVENTH HIGH SCHOOL.

The ceremony of opening the Seventh High School in Kagoshima was recently celebrated. This institution may be regarded as the offspring of the celebrated Zoshikan, founded a hundred and thirty years ago by the feudal chief of Satsuma, for the purpose of educating *samurai*. The students of the school acted a prominent part in the rebellion of 1877, at which time the late Saigo Takamori was regarded as virtually the head of the school. Saigo had given to its maintenance the whole of the pension (*shōtenroku*) received by him from the Government for distinguished services at the Restoration, and his example had been followed by several other prominent men of Kagoshima Prefecture. After the rebellion, the school dwindled to the dimensions of an ordinary middle school, and subsequently it became an upper middle school, but there its career of progress seemed to have stopped, though had the late Viscount Mori lived, he would doubtless have carried out his scheme of making it a high school. That has now at last been accomplished, mainly owing to the princely munificence of the house of Shimazu, which has given a large tract of land and a handsome sum of money for the support of the institution. Admiral Count Kabayama delivered an address on the occasion of the opening ceremony, telling the story of the school, and doubtless awakening many curious memories in the minds of his hearers.

A SUGGESTION.

The Japanese form societies and associations very readily, often for excellent purposes. We wonder when some person sufficiently influential to give effect to his ideas in that form, will take up the question of cruelty to animals and organise a society to correct the abuse. Cruelty to children may be said to be almost unknown in this country, though we do not pretend to assert by any means that it is absolutely unknown. But of cruelty to animals there is enough and to spare. No one seems to mind it, however. Horses are treated daily with revolting brutality in the streets of the capital but not a voice is raised in their behalf. There is a habit in this country which belongs to the same category as the use of bearing-reins in Europe and America. The bearing-rein is an abominable instrument of torture. If any human being had his neck strained into a fixed and unchangeable position, and were then required to exert his muscular strength for hours, consecutively, he would undoubtedly suffer excruciating agony, and it is patent that horses do sometimes suffer excruciating agony from that cause. Yet ladies and gentlemen who would not willingly hurt a fly, drive about day after day with their carriage-horses trussed up so that the poor animals must often be in cruel pain. The Japanese resort to a precisely opposite practice. They draw the horse's head down and tie it by means of a rein passing from the bit, between the fore-legs, to the belly-band. This is at least as bad as the bearing-rein, though there is some excuse for it on the ground that it prevents the horse from observing the approach of other animals and attempting to fight with them. But it is hopeless to speak of such abuses while others far more flagrant, fail to arouse any practical pity.

THE PROGRESSISTS.

Amid the bewildering chorus of mutual recriminations indulged in at the present moment by newspaper organs and party politicians, there appears to be a consensus of opinion that a *rapprochement* is taking place between the House of Peers and the Progressists. We can not trace the exact lines of agreement, but the general goal would be an assault upon the Cabinet. The Progressists do not compare with the *Seiyun-kai* in the matter of numerical strength in the Lower House, but they would become a decidedly powerful party if their views had the support of a majority in the House of Peers. This may prove to be one of those wholly unfruitful incidents so frequent in the field of Japanese politics, where, for want of any solid platform to stand on, men clutch at any straws of purpose that happen to come floating in their direction. But it is at all events among the news of the hour.

The General Council of the Progressists held a meeting on the 5th instant, and adopted a series of resolutions which show that the Party is about to become a vital factor in the political field. The most important of the resolutions were these:—

That since several States are in perfect accord with Japan's policy as to Far-Eastern affairs, she should cooperate closely with them for the purpose of carrying out that policy.

That, in order to preserve China's integrity so far as Japan's interests are concerned, the balance of power must be preserved.

That as the present condition of Manchuria is injurious to the preservation of peace in the East, the region must be at once restored to its original condition.

That since Japan's position in Korea is not as firm as the interests of both countries require, steps should be taken to place it on a securer basis.

That as the state of affairs in the East demands very close attention, the Government should organise an Asiatic Bureau to undertake all business of that nature.

That the Government should devote much more attention to the promotion of trade and industry, and should choose its ministers and consults with more care for the attainment of that aim.

That the State's revenue should be raised as far as possible from indirect taxes; that the Land Tax should be reduced, and that the income of the communes should be increased.

That the Government's enterprises should be re-adjusted according to the order of their importance, and that instead of being made to depend on loans they should be conducted by means of ordinary revenue.

That a special office should be organized for the purpose of introducing uniformity into the Government's purchases of materials, and that storehouses should be connected with it.

There were some other resolutions, but as they are of a vague and uninteresting character we omit them.

Mr. Oishi Masami subsequently delivered a speech strongly advocating the formation of an offensive and defensive alliance with England.

THE KYOTO-HOTEL AFFAIR.

The *Kobe Herald* has interviewed Mr. A. H. Groom with reference to the Kyoto-Hotel Affair and the statements made in the columns of this journal. If the arguments advanced by Mr. Groom are rightly reported, which we must assume, they furnish a most unexpected explanation of the interpretation put by Mr. Groom on the attitude of the Japanese. A part of what Mr. Groom said, according to our *Kobe* contemporary, is contained in the following paragraphs which we quote verbatim:—

Reference was then made to the statement of the *Japan Mail* about an alternative road. As will be seen the newspaper says:—"The Secretary of the Hokokukai, finding that great if not insuperable difficulty must attend any attempt to give to the Hotel Company a right of way over the Society's avenue, himself undertook to find an alternative route, mapping it out and ascertaining that the proprietors of the land over which it would pass, were willing to part with the ground on reasonable terms. Mr. Groom did not mention that fact, but it effectually disposes of the view formed by the Directors that there was 'a general feeling against the foreign enterprise.'"

Mr. Groom's reply to this was as follows:—"That is a mere statement made by Mr. Brinkley and I am perfectly certain that he cannot substantiate it. In fact such an offer was never made to the Directors of the Hotel so far as the Directors are aware. There is nothing to show how, when or where, or by whom, it was made. Certainly there were all sorts of vague propositions that we might do this and might do that by paying large sums of money but nothing was ever definitely put before the Directors about an alternative road that was considered feasible. Mr. Reynell, who was specially looking after this question of the feasibility, &c., of other roads stated to me to-day that no such proposition was made as far as he knows, although, as I have said, there was a lot of discussion and suggestions that we should see certain people, but nothing definite ever came of it, and the Directors certainly would not have been inclined to accept any proposition to pay a large sum of money for indefinite rights."

Mr. Groom alleges, it will be observed, that he is "perfectly certain that Captain Brinkley can not substantiate" the statement about an alternative road having been found by Mr. Nakane, about its having been mapped out and about preliminary inquiries having been made as to the terms on which the proprietors of the land would be willing to part with the necessary areas. We confess that it surprises us very much to find Mr. Groom expressing "perfect certainty" in such a matter. His assertion amounts, in effect, to directly impugning the veracity of the editor of this journal. Under the circumstances it becomes necessary to speak very explicitly.

In the spring of this year, Mr. M. Kirkwood, being confined to his room by an illness which temporarily incapacitated him from prosecuting his endeavours to settle the question of the Kyoto-Hotel road, laid the matter before Captain Brinkley, and asked him to use his good offices, inasmuch as the difficulties which the Directors of the Hotel scheme had encountered would, if not overcome, inevitably create an impression that the scheme was opposed not on its merits, but because it was a foreign enterprise. Captain Brinkley readily acceded. It is unnecessary here to enter into full particulars of the steps he took, as the question immediately under consideration relates to the alternate road only, and it will suffice to say that after much discussion about the possibility of obtaining permanent access to the *Hokokkai's* avenue, Captain Brinkley asked Mr. Nakane, the Secretary of the *Hokokkai*, whether some alternative scheme could not be devised, as it seemed inconceivable that a useful project like that of the hotel should be wholly wrecked owing to such a cause. Mr. Nakane, who fully understood, and professed to sympathise with the point of

view that many foreigners would take unless the affair could be settled, said that he had already given some thought to the matter of an alternative route and that he anticipated no serious obstacle. He then produced an accurate map of the place, and showed that, immediately adjoining the *Hokokkai's* road, lay the grounds of the Miyoho-in temple. These grounds, being the private property of the priests, might be sold by them for any purpose, and as a part of them had actually been sold for the purpose of constructing the *Hokokkai* road, Mr. Nakane thought it probable that the priests would be willing to accommodate the Hotel. Could such an arrangement be effected, the Hotel would have a private avenue of its own in no respect inferior to the *Hokokkai's* avenue. Captain Brinkley inquired what steps could be taken for approaching the priests of the Miyoho-in with the best prospect of success, and Mr. Nakane answered that as he knew the priests personally, having negotiated with them for the purchase of land on behalf of the *Hokokkai*, he would willingly consult with them on behalf of the Hotel also on the occasion of his pending visit to Kyoto whither he was called in the routine of official business. This involved a delay of some weeks, but as it seemed the most promising exit from the dilemma, Captain Brinkley, with Mr. Kirkwood's consent, requested Mr. Nakane to use his good offices. Mr. Nakane left Tokyo shortly afterwards, and on his return he explained to Captain Brinkley that the land of the Miyoho-in was not available, as the priests had entered into some engagement relating to accommodation for a building to enshrine Buddhist relics then *en route* from Ceylon, but that he had mapped out an alternative route and obtained assurances as to its feasibility. This route would not be as favourable as that through the Miyoho-in precincts, but it would apparently suit all the purposes of the Hotel, and moreover the Directors of the latter would be the absolute owners of the road and could obtain it of whatever width they pleased, which would enable them to let or sell spaces along the sides, valuable for the erection of shops. Mr. Nakane had prepared a plan of this route, showing the exact sums demanded by the proprietors of the land. He handed the plan to Captain Brinkley, who in turn transmitted it to Mr. Kirkwood with full explanations as to everything that had transpired. There Captain Brinkley's connexion with the matter ceased completely and finally. To his surprise he received no intimation of any kind as to the subsequent steps taken by the Directors, but he was informed, by a third party, after this matter had begun to be ventilated by the press, that the alternative route suggested and mapped out by Mr. Nakane had not been approved by the Directors. It would now appear, from Mr. Groom's emphatic allegation, that the map and the accompanying details never reached him, and that the Directors remain wholly ignorant of that phase of the matter. It certainly could not have been supposed possible that a point of such importance would have remained beyond the knowledge of the Directors, but from what has been stated above Mr. Groom will see, that his "perfect certainty" as to Captain Brinkley's being unable to substantiate his statements, was not justifiable, and we have no doubt that he will be the first to acknowledge his mistake. What became of Mr. Nakane's map and the accompanying figures we can not tell. Captain Brinkley's information ceases after the transfer of the documents to Mr. Kirkwood.

It seems desirable to make brief comment on some other remarks attributed to Mr. Groom. The *Kobe Herald's* report runs thus:—

"I want to bring out very clearly," Mr. Groom also said, "the fact that it seems to me a most ungracious act, whoever the road belongs to—the Treasury Department or the Hokoku-kai—that they should refuse us permission to use the road for taking timbers to our building. That is a most unheard-of piece of obstruction I call it, and that really is about the whole matter."

The concluding statement of the *Japan Mail* was also brought up, viz.: "Our own conviction is that Mr. Nakane and all Japanese, officials or private persons, connected with this affair worked earnestly and honestly to effect a favourable settlement, and that they will be profoundly astonished at the view taken by the Directors of the Hotel." "Is it such a tremendous matter," Mr. Groom said, commenting on this statement, "to get permission to transport timbers over a road? It seems to me this is making a mountain out of a molehill. They profess to be entirely in favour of the scheme, 'that the Hotel would be an excellent thing,' &c., but how is it that all these difficulties arise? It is pure obstruction: any business man would see that."

Mr. Groom concluded: "The Directors during a year and a half had exhausted all means to enable them to proceed with the building of the Hotel, having had the benefit of the good offices of the Governor and other officials. In spite of all this influence it seems that they could not arrange for the permission to carry the necessary material to the site."

"In the opinion of the Board of Directors the local opposition to the undertaking could not be overcome even by the assistance of prominent officials, and even if the right-of-way difficulty had eventually been overcome, they foresaw other likely obstruction."

It would appear from this that the question turned upon the temporary use of the road for carrying building materials. But of course the permanent use of the road for the purposes of the Hotel was the real question. Mr. Groom speaks of "all these difficulties." But there is only one difficulty, namely, that the *Hokokkai* was unwilling to share its road with a hotel company. Mr. Groom further speaks of having had "the benefit of the good offices of the Governor and other officials." How can that be reconciled with the theory that the enterprise was generally obstructed because it was foreign, as Mr. Groom stated in his report to the shareholders? Finally, Mr. Groom speaks of "local opposition which could not be overcome even by the assistance of prominent officials." As to local opposition, Mr. Groom and his fellow-directors are, of course, in the best position to judge, but we may be permitted to point out that this is an entire change of venue so far as the Directors are publicly concerned. They have hitherto represented the opposition as coming from the *Hokokkai* only. Now the *Hokokkai* has its head quarters in Tokyo, and its Directors are Marquis Kuroda, Baron Kaneko and other prominent gentlemen of Tokyo, while its Secretary is Mr. Nakane, formerly chief of the Local Government Bureau in the Department of Home Affairs. The *Hokokkai's* opposition can scarcely be called local from a Kyoto point of view. It is of course conceivable that the proprietors of Japanese hotels in Kyoto may have endeavoured to place obstacles in the path of a rival institution whose success would mean their ruin. But it is wholly inconceivable that the hotel proprietors of Kyoto can have enlisted the coöperation of a Society like the *Hokokkai* to safeguard their interests by illegitimate methods. If the *Hokokkai's* road has not been immediately available for the purposes contemplated by Mr. Groom and his fellow-directors, the difficulty must have been due either to *bona fide* reasons or to anti-foreign prejudice on the part of the Society. Which view does Mr. Groom take? Perhaps, finally, it may not be amiss to remind Mr. Groom and his friends that so far as this matter is con-

cerned, they are only projectors of a hotel and that they themselves have no title to be heard in any other capacity. Many strenuous efforts have been made in their behalf, but so far from acknowledging them, they seem to labour under a belief that they have encountered factitious obstruction on all sides.

MR. OHASHI SAHEI.

The death is announced at the age of 67 of Mr. Ohashi Sahei, on the 3rd instant at 5 a.m. Mr. Ohashi was a remarkable figure. He came from Echigo in 1887 with a very slender fortune and established a publishing office now widely known as the Hakubunkwan. He commenced by republishing old Japanese novels, and though the works issuing from his press were so carelessly proof-read that they became proverbial for errors, their exceedingly low price attracted wide custom and the Hakubunkwan prospered steadily until its enterprising proprietor came to be reckoned among the millionaires of Japan. Mr. Ohashi's disease was cancer of the stomach, but by the ignorant section of the public his death will doubtless be ascribed to the fact that he purchased and resided in the house of the late General Viscount Kawakami in Bancho, a house supposed to kill all its inmates. The funeral takes place on the afternoon of the 6th. It may be added that Mr. Ohashi, who knew that his years were numbered, recently devoted ten thousand *yen* to the formation a public library, the building for which is now in course of erection in Bancho.

In accordance with the will of the late Mr. Ohashi Sahei, proprietor of the Hakubunkwan, Mr. Ohashi Shintaro, the son and heir of the deceased, has made a donation of *yen* 6,500 to various public bodies and institutions, including *yen* 1,000 to the Nagaoka Primary School in Echigo province, *yen* 1,000 to a primary school in Nihonbashi, *yen* 2,000 to the Waseda University now in course of organization, *yen* 1,000 to the university course of the Shingon sect, *yen* 300 to the Tokyo School for the Dumb and Blind, *yen* 200 to the Tetsugaku-kan in Hongo, and *yen* 1,000 to the Publishers' Guild in Tokyo.

THE TOKYO BARRISTERS.

The Tokyo barristers, to the number of 174, held a meeting on the 1st instant, for the purpose of discussing the Government's proposed amendments of the Criminal Code and the Code of Criminal Procedure. This meeting had been anticipated with considerable interest, not merely on account of the importance of the question at issue, but also because the barristers were known to be tolerably equally divided in their views, and because each side had been canvassing with great energy. If legal reputation and standing counted for much, the opponents of revision ought to carry the day, for they are headed by ex-Chief-Justice Miyoshi Taizo, and they include in their ranks a majority the leading lights of the bar, whereas their adversaries are mostly young men. But we can not discover that the opponents of revision have any solid basis for their views. They take their stand on pure conservatism, arguing that as the Criminal Code and the Code of Criminal Procedure have been in operation for several years, the nation has become accustomed to them, and their radical alteration would be unwise. Evidently such an argument as that has perennial force. It would acquire fresh cogency every year that passed, and in the end all reform would become impossible.

Very probably the barristers under Mr. Miyoshi Taizo have much more rational reasons to allege, but such is their position as represented by the Tokyo press. At the meeting on the 1st instant they put up Mr. Kikuchi Takeo as their spokesman. He proposed changes which would have practically wrecked the Government's revisions, but on going to the vote his motion was rejected by a majority of 17. It was then decided to determine by signed ballot the chief question—namely, the adoption or rejection of the minor alterations that the reform party proposed to make in the Government's project. But when the ballot was taken, a very noisy scene occurred, owing to an alleged mistake in registering one of the names. Some of the barristers called each other hard names, and showed a disposition to appeal to force. Finally a second ballot was taken, the result being that the anti-reform party obtained 82 votes, against 92 cast by the reformers.

MASAMPHO.

Mr. Sakata, Japanese Consul at Masampho, who is now on a visit to Tokyo, has been interviewed by the *Jimmin*. He says that Masampho, which was opened to foreign trade in May, 1899, and which attracted a considerable share of public attention in the autumn of the same year owing to Russian doings, is a place of much importance. It lies only 37 miles from Fusan, and it served the Mongols for a basis on the occasion of their invasion of Japan in the 13th century. It has always been the chief emporium of the rice grown in Southern Korea. Concerning the complications in 1899, Mr. Sakata says that under the most-favoured-nation clause Japan had undoubted right to purchase land anywhere within a radius of 10 Korean *li*—40 *cho* of Japanese measurement—from an open port. Hence, when she proposed to acquire an area of 250 acres at Cha-pok-po, well within that radius, her action was altogether legitimate. Russia, however, having recourse to something very like a naval demonstration, endeavoured to compel Korea to refuse the concession sought by the Japanese, until finding her remonstrances unsuccessful, she abandoned her attitude of opposition and sought compensation for herself at Yulkumi. It must be confessed, however, that Russia's method of procedure laid her open to some suspicions, for whereas the Japanese had acquired their land at the rate of 200 *yen* an acre, which was about the market price, Russia paid twelve thousand *yen* an acre for a small and less advantageously situated lot of which she subsequently made no use, until quite recently she erected a kind of hut there and placed 10 marines to guard the place, which is absolutely unemployed for any commercial purpose. Japan, on her side, has 7 policemen and 2 gendarmes to preserve order in a settlement of some 250 persons, who last year carried on a trade of 280,000 *yen*. There is an inn called the "Masampho Hotel" in the Japanese settlement, and Russia also has a hotel at Ching-hai-wan, but the doors of the Russian building are overgrown with cobwebs. Steam service between Masampho and Fusan is established, and altogether the former place promises to become very important.

FINANCIAL AFFAIRS.

Wednesday, Nov. 6.

It is generally announced by the Tokyo press that the Cabinet has finally effected adjustments which will render it possible to dispense with loans, whether domestic or foreign, during the next fiscal year, and that, at the same time, there will be no interruption of undertakings whose suspension would mean national loss. The programme now adopted is said to have emanated from Admiral Yamamoto, Minister of State for the Navy, and to have received the warm support of General Baron Kodama, Minister of State for the Army. Briefly speaking, the main features of the programme are that large economies should be effected in the ordinary expenditures and that the Departments should pay into the Treasury the sums held by them on account of uncompleted works. It appears that the progress of the *post-bellum* undertakings has not been by any means as rapid as was originally anticipated. To push them at the proposed rate would have caused many difficulties, and would have dislocated the labour market. Hence the sums set aside in the past on account of these enterprises are not fully expended, and if the money can now be made available, it will prove quite sufficient for present purposes, when supplemented by extensive economies which the various Ministers have agreed to make. No figures are furnished to give explicitness to these statements, but there does not appear to be any doubt that the difficulties which recently confronted the Cabinet owing to its failure to dispose of bonds in New York have been successfully grappled with, and that the situation is now easy. It is indeed asserted that the outcome of the matter is to strengthen the position of the Cabinet.

The *Nippon* observes, with apparent truth, that one of the greatest difficulties hitherto encountered by every Cabinet in dealing with the Budget had been want of union among the Ministers themselves, each pulling against the Treasury and on behalf of his own Department alone. Apparently, finding themselves now confronted by a common difficulty, the Ministers have resolved to join hands for its solution, and there can be no doubt that by their united strength they will effect their purpose.

Thursday, Nov. 7.

It is alleged that at the Cabinet meeting on the 5th instant, a final decision was arrived at with regard to next year's budget. One important feature of the programme is that economies to the extent of ten million *yen* are regarded as feasible in the ordinary expenditures of the Departments. Hitherto the Departments have generally found themselves with sums in hand aggregating some three million *yen* at the end of each fiscal year. With these monies and the proceeds of strict economies, the Treasury anticipates an asset of ten millions. In the second place, 16 millions worth of bonds have been sold to the Post Office Savings Bank, and in the third place, out of a sum of 17 million *yen* appropriated for the troops in China, it is believed that 10 millions can be drafted into other sections of the accounts. Finally, the Government had intended to replace a sum of 15 millions borrowed from the Chinese Indemnity of 1895, but that operation can easily be deferred. It will be seen that these four sums aggregate 51 million *yen*. Now the intention had been to raise a sum of 54 million *yen* by the sale of bonds in New York, so that the difference between the original pro-

gramme and the new plan is only 3 million *yen*, a sum too small to cause any embarrassment.

The Treasury's issue of Exchequer Bonds has not been very successful. It is expected that the subscriptions by the general public will not exceed three or four million *yen*, and that the Bank of Japan will have to take some six millions. Osaka offered to purchase only 200,000 *yen* worth.

Friday, Nov. 8.

On the 5th instant, Viscount Katsura entertained at dinner several prominent financial officials as well as the President and Vice-President of the Bank of Japan. Very full explanations were offered with regard to the Government's budgetary programme for next year, which appears to be on the lines already explained in these columns. The Prime Minister mentioned that the Treasury's debt to the Bank of Japan is 29½ million *yen* at present, and that it might have to be raised to 40 million *yen*. The whole would be paid back, however, by the close of the fiscal year, so that no inconvenience to the business world need be anticipated.

Accounts differ as to the views entertained by Japanese merchants and manufacturers with regard to the Government's financial policy. The *Jimmín* maintains that there is much dissatisfaction; the *Jiji*, on the contrary, alleges that the programme is generally endorsed. It can not be doubted, of course, that business men would have been much better pleased had an inflow of foreign capital relieved the tightness in the money market, and some of them may think that cleverer management on the part of the Treasury would have carried the sale of bonds to a successful issue. But the situation being what it is, all impartial persons must be disposed to admit that the Treasury has now taken the course most expedient under the circumstances.

Mr. Kondo Rempai's remarks to the Economic Society at its meeting in the Ueno Sciyoken on the 5th instant, were very practical. He said that whatever might be the fate of special attempts to introduce foreign capital into Japan, there was one source of constant inflow which the Japanese should do everything in their power to encourage, namely, the coming of tourists from abroad. Something like two thousand tourists arrive every year, and supposing them to spend on the average a thousand *yen* each, the total would be two million *yen*. That is a stream of Pictolus that the Japanese should endeavour to promote, to which end they ought to treat foreigners as guests, and instead of trying to extort money from them, should make every charge reasonable and moderate, and should consult their comfort in all directions. That is most practical counsel. The Welcome Society has been doing what it could for some years to further the purpose Mr. Kondo has in view, but the Welcome Society can reach only the fringe of the problem.

On the same occasion, Mr. Nosé, Japanese Consul at Fusan, spoke about the state of the coins circulating in Korea. He alleged that silver coins have become most inconveniently scarce, practically non-existent, the only coins available being of nickel or copper. The nickel coins are struck in four ways: the Government strikes them; the people strike them secretly; the people strike them with official connivance, and the Emperor strikes them. It was originally arranged that when the Gov-

ernment struck such coins, a percentage of the profit should go to the Court, but as that arrangement did not bring much money into His Majesty's pocket, the Court began to act as a mint on its own account. The natural result of all these unsecured issues is that the purchasing power of the coins has fallen appreciably, until a Japanese silver *yen* will buy 140 *sen* in nickel pieces. Local taxes are paid in copper cash, which have a good intrinsic value. The local officials take care that payments shall be made in these coins, which they then sell to Japanese in the settlements for silver *yen*, making a profit of 40 or 50 per cent. on the transaction, and subsequently they exchange the silver *yen* for nickel coins, gaining another 40 per cent. Thus the nickel coins are steadily ousting all sounder money. It will be a bad business when the fares of passengers by the Sôul-Fusan Railway are all paid with nickels.

Subscriptions for the Government's issue of 10 million *yen* worth of exchequer bills amount to only 4,980,000 *yen*. Thus the Bank of Japan has to take up 5,020,000 *yen*. Tokyo subscribed 3,540,000 *yen*; and Osaka, Kyoto, Nagoya, etc., put up only 1,440,000 *yen* between them. Osaka was the most disappointing of all, its offers aggregating only 200,000 *yen*. The subscribers for over 200,000 *yen* were only the Specie Bank of Yokohama, the Mitsu Bishi Bank, the Mitsui Bank, the Fifteenth Bank, the First Bank, the Hundredth Bank, the Osaka Savings Bank and the Nippon Yusen Kaisha.

"CHADAI."

The *Jiji Shimpô* recently employed its powerful pen to promote the introduction of a reform which every one would welcome, namely, the abolition of the *chadai*. There is no more senseless custom, nor could any more senseless custom be devised. It is essentially a remnant of feudal days. It destroys the relation of landlord and guest, for the former regulates his conduct by expectations which must always be more or less fallible, and the latter, if he be a snob—and there is an element of snobism in many men's nature—finds in the *chadai* convenient opportunity to indulge in that disgusting and most inartistic vice, purse-pride. The *Jiji*'s idea, taken up by the *Yorozu Chôho* also—which journal, having battered upon slander, now seeks to become popular by a display of social virtue—is that the inns should distinctly eschew the custom of receiving *chadai*, and should, on the other hand, raise their fixed charges sufficiently to compensate themselves for the resulting loss. An inn in Hokkaido seems to have followed the advice not wisely but too well. It posted up a flaming notice "no *chadai*," and then proceeded to charge its guests 7 *yen* per day for board and lodging. If that tariff be based on a *bonâ fide* estimate of what was required to recoup the loss of *chadai*, it constitutes a pertinent comment on the costly character of the *chadai* habit. But the *Jiji* thinks that it was based on the landlord's greedy eagerness to take advantage of an opportunity. Certainly if Japanese inns are going to charge 7 *yen* a day, a reversion to the *chadai* will be desirable, for that system has at least the advantage of allowing a traveller to choose between extravagance and economy.

THE MANŒUVRES.

In spite of the inclement weather on the morning of the 6th, the Emperor adhered to his resolution of setting out for the manœuvres. The Imperial party left Ueno station at 1 p.m. and reached Utsunomiya at five minutes past five o'clock, the train being only 5 minutes behind time. It need scarcely be said that Utsunomiya was gay with arches and that the sky above the town glittered with fireworks.

The Governor of Sendai, Mr. Onoda, seems to have taken exceptional care to make suitable preparations for the event. Road-repairing and sanitary precautions are said to have been actively going on for some time, and a scale of charges had been issued for all public conveyances, including *jûrikisha*. Field Marshal Marquis Oyama is said to have conveyed instructions to the Governor in the sense that however things might fare with Japanese visitors, the utmost efforts must be made to provide every possible facility and accommodation for the foreign officers attending the manœuvres. The Governor, apprehending scarcity of hotel room, has made arrangements for using the dormitory of the Second High School as sleeping apartments for the foreign officers, and has caused beds and furniture to be placed in the various apartments. The lecture hall of the School will be converted into a species of parlour and smoking room, to which end a piano and a harmonium have been placed there. Provisions are to be supplied by the managers of the Seiyô-ken at Ueno, who have sent out a large supply of table utensils, cooks and waiters.

THE KOREAN LOAN.

The proposed loan of five million *yen* by a so-called French Syndicate to the Korean Government seems to have owed its failure to the inability of the Koreans to furnish any appreciable security. They offered the Sôul-Wiju Railway in the first instance. But the Sôul-Wiju Railway is a property with very doubtful prospects, its future being of a strategical rather than a commercial character. The Korean Government was willing to give a guarantee amounting to two hundred thousand *yen* annually, by way of interest on the capital devoted to the construction of the road. But as that sum would not have sufficed even for the purpose to which it was destined, and there would not have been any provision for a sinking fund, the project necessarily fell through. Then a mining concession was suggested as security; but since the worth of a mine can not be estimated without working it, the Syndicate were naturally unwilling to treat that proposition seriously. There remained the Customs revenue, which would have been the best security of all. Without Mr. McLeavy Brown's consent, however, the Customs revenue could not be hypothecated, and his consent seems to have proved unobtainable. Perhaps the commissioner's obduracy in that matter accounts for the somewhat truculent pressure to which he was subjected. Thus the loan fell through owing to the old-fashioned difficulty, want of security. We take these facts from the *Jimmín*.

A Nagasacki message says some 43 head of cattle that were brought to that port from Chemulpo by the *Uyu Maru* were found to be suffering from rinderpest, and consequently all the animals were killed by the authorities.

FRENCH NOTES.

The Tsaritsa seems to be very fond of photographing. It is recorded that during the military manoeuvres at Reims, Her Majesty, though apparently much fatigued, "followed the operations with attention and kept taking photographs, either of some movements of the troops or of the batteries at the moment when their mechanism was being explained to her." It is well to be a Tsaritsa. If any ordinary lady had attempted to take photographs under such circumstances, there would have been trouble.

A telegram received by the *Fiji Shimpō* says that an Italian squadron has sailed for the Dardanelles as well as the French squadron. The public have not had any information indicating that Italy was likely to take part in this affair, so the news of her action comes as a surprise. All Europe's sympathies, however, are with France, and it is not improbable that, rather than allow needless bloodshed, pressure will be brought to bear on Turkey by the united Powers.

Europe, we observe with pleasure, is beginning to recognise the high statesmanship of M. Delcassé, who has always seemed to us one of the ablest foreign ministers that France has possessed. The *Popolo Romano*, commenting on the Tsar's visit to France, says that it is "a triumph personally for M. Delcassé, whose policy, animated by pacific and conciliatory sentiments, corresponds completely with the intention of His Majesty."

It is not often that newspapers allow their fanaticism to overcome discretion so completely as did the *Libertaire*, an anarchist French journal, when it published an article by a rascal called Laurent Tailhade, appealing for some man courageous enough to rid France and Russia of their chief magistrates. The editor of the *Libertaire* and the author of the article thus rendered themselves liable to imprisonment for from three months to two years. Tailhade had succeeded in evading the police up to the date of latest advices, but the editor had been apprehended. It is surely a strange state of society where such things are possible. We believe that conscription and the huge armaments of the time have much to do with it.

GENERAL BARON KODAMA.

It is alleged that General Baron Kodama is anxious to resign the portfolio of War. His acceptance of that office was originally only a temporary measure, and his recent visit to Formosa, in connexion with the dedication of the shrine to the late Prince Kitashirakawa, showed him, it is said, that his presence is required in the island. General Kodama is known to be a man of great earnestness in the discharge of his duties, and as he agreed to become Governor-General of Formosa before there was any talk of his taking the portfolio of War, he doubtless considers that his first obligation is to the island. On the whole the course now attributed to him seems consistent with the best interests of the country. He has certainly done well as Governor-General of Formosa. Order appears to have been restored there at last, and the public is no longer distressed by accounts of outrages by bandits and other symptoms of unrest. If his presence is required to complete the good work, he acts wisely and patriotically in resigning the pleasanter and more distinguished post of Minister of War.

NOTES ON CURRENT EVENTS.

It has been definitely decided that Mr. Kurino, hitherto Japanese Representative in Paris, will be transferred to St. Petersburg, and that Mr. Motono, now Japanese Representative in Belgium, will succeed Mr. Kurino in Paris. Mr. Motono is on his way to Japan, and will probably reach Kobe about the 27th inst.

The German Admiral, introduced by Count Arco-Valley, and the French Admiral, introduced by the Representative of France, were received in audience by the Emperor on the 3rd instant. Sir Claude and Lady MacDonald also had audience of the Emperor on the occasion of their return to Japan. Sir Claude MacDonald introduced Vice-Admiral Sir Cyprian Bridge.

There has been a big seizure of gamblers in Tokyo. The arrests were effected at half-past nine o'clock on the night of the 1st inst. at the house of Aoki Kumejiro, in the Kyobashi quarter of Tokyo. This man had been keeping a gambling den under pretence of engaging in land transport operations. The police completely surrounded the place, and arrested 86 persons amid a scene of great confusion. Aoki himself, however, managed to effect his escape.

A few days ago it was journalistically reported that a number of German marines, landing at Nagasaki, had formed a camp, pending some repairs of their vessel and that the camp was guarded by armed sentinels. Some of our Japanese contemporaries were disposed to speak strongly about this incident as a violation of their country's sovereignty, but it subsequently transpired, as a matter of course, that whatever had been done was done with the full assent and co-operation of the Japanese local authorities. The *Nippon*, however, now publishes a story of a different character. It says that a drunken German marine, having behaved with great violence at a Japanese restaurant, was apprehended by the police but broke away from them and escaped into the camp mentioned above. Thence he presently emerged accompanied by a number of his comrades, and falling upon the police, of whom there were three or four, these marines beat them severely. Application was made to have the man delivered over, but he still remains in camp, and the only satisfaction thus far obtained is a letter of apology from the German Consul. The *Nippon* complains very bitterly of this outrage, but it need scarcely be said that without fuller and better authenticated details, no judgment can be passed.

All residents of Tokyo and Yokohama will be glad to learn that the Venerable Archdeacon Shaw is steadily recovering from the attack of illness which at one time assumed such a serious aspect. Dr. Baetz has been in constant and most kindly attendance, so that the Archdeacon has had the best possible medical care. Convalescence is expected in a few days.

We learn that a change is about to be made in the foreign direction of the Uyeno Academy of music. The Japanese diplomatic representative at Berlin has been requested to engage a new general instructor: and it is expected that the coming incumbent will enter upon his duties in Tokyo early in 1902. We trust this new departure will have a good effect, and place the Imperial Music-school on the very pinnacle of success.

The despatch boat *Chihaya* (1,250 tons) re-

cently built at Yokosuka, has been added to the Japanese fleet. Her debut was unfortunate, as on her trial trip she collided with a torpedo-destroyer. But the damage sustained was insignificant. She is said to be a success. Her stipulated speed was 21 knots, but she made 22 on her forced-draught trial.

The Nippon Land and Sea Insurance Company, which by failure to meet its engagements in London and San Francisco, attracted a great deal of unfavourable notice and finally applied for permission to go into liquidation, has now been allowed to do so, or will be allowed in a few days. The application was originally refused by the Department of Agriculture and Commerce, which despatched experts to make a thorough investigation of the Company's affairs. In consequence of the report submitted by them, leave to liquidate was withheld, and in the meanwhile the shareholders who had not paid the calls on their shares—to the amount of five hundred thousand yen—were required to do so, all sales of shares being forbidden in the interval. It appears that about three hundred thousand yen has now been collected, and as the London and San Francisco liabilities are not so large as was supposed, there will be no difficulty in discharging all obligations. Indeed, a surplus is expected to be returned to the shareholders. Under those circumstances leave to liquidate will be given.

The representatives of the so-called "reform party" of the Nippon Yusen Kaisha had an interview with the President, Mr. Kondo Rempai, on the 28th October. It seems to have been a very amicable meeting. The "reformers" explained that they had no complaint whatever to prefer against the present management of the Company, but they could not reasonably expect to see its affairs always in such good hands, and they therefore desired a stricter system of organization and control, which should avert all future dangers and be a pattern to other companies. Mr. Kondo promised that full attention should be given to the points raised by them, but he asked that they should commit their views to writing, in order to facilitate discussion by the principal officers of the Company.

It is curious to observe how extremely sensitive some folks are to criticism and how difficult they find it to distinguish between comment and condemnation. With regard to complaints about the Tokyo roads, appearing in the correspondence columns of a contemporary, we took occasion to observe that a serious obstacle to the making of good roads is the difficulty of getting broken stone, a difficulty which has been for many years familiar to every one interested in the subject. The rejoinder evoked from one of the correspondents—"Grumbler"—by our innocent observation is that the *Japan Mail* sounds that all too familiar note of *shikata ga nai*, that we "defend the present practice," and that "it must have made several readers rub their eyes to find the *Japan Mail*, of all papers, coming to the defence of the present system of road-mending." What a veritable "Grumbler" it is to be sure! Need we assure him that the *Japan Mail* does not say *shikata ga nai*, does not defend the present practice, and does not support the present system of road-mending. To say that a certain medicine is difficult to procure does not mean that no medicine whatever should be administered. We trust that "Grumbler" has not injured his eyes

by rubbing them, but if he opened them just a little bit wider he would see more clearly.

Mr. Romanoff, Vice-Minister of Foreign Affairs in Russia, and his party, numbering 11 in all, reached Nagasaki on the evening of the 3rd and devoted the 4th to visiting the Mitsui Bishi Docks and the Mitsui Bishi Coal Mines, after which they proceeded to Miike to inspect the Karatsu and Miike Mines. They were to return to Nagasaki on the 5th and to resume their journey to Tokyo on the 6th.

The *Shogyo Shimpō* alleges that Mr. Romanoff has abandoned his idea of visiting Yokohama and Tokyo. This change of plan is referred to instructions received from St. Petersburg. Our contemporary adds that as Mr. Romanoff is a great lover of objects of art, he will probably spend in Kyoto what time remains available for seeing Japan.

Twelve British naval officers are *en route* for the scene of the autumn manoeuvres. Marquis Date, of Sendai, has contributed 2,000 *yen* towards the citizens' expenses in connexion with the manoeuvres.

The property of the Nishinari Railway has been distrained for a paltry sum of five thousand *yen*. It appears that, the company having failed to redeem a promissory note for that amount, the bank which had cashed the note fell back upon the endorser, one of its own principal officials, and the latter, in turn, obtained an order to seize the railway's property. The Nishinari Railway is a small Osaka line.

The Chrysanthemum Garden Party at the Palace is to take place on the 16th inst. Should the weather be unpropitious, the party will be abandoned.

The Naval Authorities are said to be contemplating the establishment of a naval station in Formosa. Recent events have shown that the China seas are likely to be a scene of activity in the immediate future. Japanese men-of-war have found continuous employment there during the past few years. But Japan has no naval station contiguous to those waters. Sascho is the nearest, and Sascho can not compare in that respect with the Russian Port Arthur, the British Wei-hai-wei and the German Kiaochow. These considerations are very obvious, and it is predicted that they will finally produce the effect of postponing the projected construction of a naval station at Muroran, for the sake of immediately constructing one in Formosa.

Friends of Japan will read with much pleasure the speech delivered by the Minister of State for Education at the Fifth High School in Kumamoto, which His Excellency visited on the occasion of his recent tour of inspection in Kiushiu. Dr. Kikuchi pointed out that one of the serious defects of education in Japan at present is multiplicity of examinations. Students devote their whole attention to "cramming" for examinations, and teachers direct their instruction to the same end. Nothing conduces less to the making of practical men, and it is of practical men that Japan has most need at present. She wants engineers, she wants navigators, she wants technical experts of every kind. The supply is quite inadequate, and while youths occupy their energies getting up for examination purposes theoretical sciences which serve no useful purpose in their future careers, the country's progress languishes. These truths can not be too strongly impressed on the attention of those engaged in the work of education.

THE BOOKSHELF.

Mr. Walter Denning, the first volume of whose new series of Anglo-Japanese Readers was recently published, has now brought out a book entitled "Specimens of Translation." It is a small volume as to size, and it may be purchased for 25 *sen* at the Sanseido in Tokyo, but it contains 150 closely printed pages of translations given side by side with the Japanese text. A great variety of subjects have been ranged over by the author, from newspaper articles and political speeches to philosophic utterances and orthographic discussion. We think that this book must prove most useful to Japanese students of English and also to English students of Japanese, for the translations are not only accurate but also idiomatic. The idea of publishing such a volume is novel, we believe, but that something of the kind was wanting no one can doubt now that the discovery has been made. We hope the public will appreciate the book as fully as its merits deserve.

The Snares of the World, by HAMILTON AIDE. London, John Murray.

It is a pleasant surprise to receive a novel from the pen of Mr. Hamilton Aide in the year of grace 1901, for the veteran essayist and *litterateur* has been comparatively silent for some space now. But the passage of time—it is something like 45 years ago since Mr. Aide first made a stir in the literary world—has brought no blunting of his powers of critical observation, nor cramped the happy expression of his style. *The Snares of the World* is a capital story of modern fashionable folk and one imagines that some at least of the characters have been limned from real life. The heroine, the *Hon. Mayra O'Connell*, a lovely Irish girl of charming character, is an emancipated woman in the best meaning of the term. *Mayra* unconsciously falls in love with a man whom she endows with graces of mind and heart that border almost on the godlike. But her idol has feet of clay and the process of disillusionment for the high-spirited, noble-hearted Irishwoman is very bitter. But sunshine follows the storm and in the end *Mayra* places her love and life in the safe-keeping of a man who is thoroughly worthy of her. The scenes of the novel take us to Ireland, anon to Hungary, and of course to London and English country-houses, and many delightful characters are introduced as the story progresses. Among them is one *Count Falkenstein*, an Hungarian magnate with some original ideas of his own with regard to the treatment of gypsies and the peasantry on his estate. He has gypsy blood in his veins and this enables the author to introduce some pleasant and unusual incidents in his narrative that otherwise would seem incongruous at this late stage of European civilization. Another interesting figure is *Lady Bramleigh*, a philanthropic and beautiful member of the aristocracy, whose doings and manoeuvres bear a close resemblance to those of a certain living countess who at times takes up a prominent space in current fashionable gossip. The pen-pictures of modern life are very vividly drawn and together with the fine-character developments increase the charm of a very attractive story. The book is on sale by Messrs. Kelly and Walsh.

THE LATE MR. H. GRAUERT.

We regret to record the death of Mr. H. Grauert, which took place on Friday morning, Nov. 1. The deceased gentleman, who was one of the best-known in the German community, had been ill for some time, diabetes, it was understood, being the cause of his sickness, but it was not till within a day or two ago that a fatal termination to his illness was apprehended. Mr. Grauert will be remembered by all with whom he came in contact as an amiable gentleman of the most profound business integrity, and the deepest sympathy

will be felt for his widow and young family in their sad bereavement.

The remains of Mr. Hermann Grauert, were interred on Monday forenoon in the General Cemetery of Yokohama. Shortly before nine o'clock in the morning the coffin was removed from the residence No. 263, Bluff, to the Catholic Church at No. 80 former settlement, where a requiem mass was performed, Father Pettier being the chief officiating clergyman and being assisted by four other priests and a number of acolytes. The service, which was largely musical, was attended by a large number of residents, the unusual extent to which all nationalities were represented testifying unmistakably to the high esteem in which the deceased gentleman was held by the foreign community. The coffin was carried from the Church by the Japanese employes of Mr. Grauert and when the cortege set out for the cemetery, the widow of the deceased with his only son followed the hearse, Mr. R. Bleifus accompanying her as mourner. The pall-bearers, who walked beside the hearse, were:—Messrs. H. J. Holm, V. Gielen, F. Grosser, F. Retz, T. Meyerdirks, O. Hayne-mann, M. Kauffmann, and B. A. Munster.

The hearse was covered with wreaths and a large number of Japanese stands of flowers formed part of the procession. At the cemetery a short service took place and the coffin was then consigned to its place.

FIRES.

Fire broke out at 10.45 p.m. on Thursday night in a tea godown of Messrs. Mourilyan, Heimann and Co. at No. 35, and soon spreading under the influence of a brisk northerly breeze caught another godown of the same firm. Both buildings were single storey, stone-faced and tile-roofed. The supply of water was, unfortunately, very poor, one hydrant being quite unworkable, and in any case it would probably have been impossible to prevent the flames from spreading to the two-storey dwelling house of brick, stone-faced, tile-roofed, with its outhouse, at No. 66, occupied by Dr. A. G. Smith, which were quite gutted.

The Kagacho and Water Police Brigades under Inspector Ikariyama turned out and rendered valuable assistance, especially with their floating steam barge. Also fire parties with two manual engines came ashore from the French cruisers *D'Entrecasteaux* and *Friant*, in charge of officers, but their services were not required. On account of the tide being ebb the Satsumacho Brigade which, under Supt. Morgan turned out promptly, could not work its steamer. Dr. Smith's property was fully covered by insurance and he saved his instruments.

An extensive fire occurred at Minatocho, Noshiro, Akita Prefecture, at two o'clock on the morning of the 1st inst. One hundred and eighty-five houses were destroyed. No one was hurt.

Fire broke out in the Yoshiwara at Susukiro, Sapporo, on the night of the 1st inst. Five houses were burned.

On the night of the 4th inst. fire is reported to have broken out in the Totomi Tobacco Factory in Hamamatsu and the whole of the premises were destroyed.

WILL ADAMS' GRAVE.

Dr. Hocken, of Dunedin, New Zealand, who is now on a visit to Japan, writes to us calling attention to the state of Will Adams' grave. He says:—

Visiting a few days since the historic spot I was surprised and grieved to find the tomb and its fencing so dilapidated; several of the pillars—some with Japanese inscriptions—were lying on the ground encrusted with mud and lichens. One intimation stated that the railing had been painted by the men of a British warship. Another, ran: "Will Adams' tomb renovated Jan. 1878, to be maintained for ten years by order of Norman Wiard, Anji Renroko in charge, a person of Hase." Surely appeal is needless to ensure the restoration of so interesting a memorial to one whose memory and deeds do justice to us, his countrymen, and were so highly estimated by the Japanese themselves.

THE CABINET.

SENSATIONAL and generally baseless reports are circulated in many quarters about the probable effects of the Cabinet's failure to sell bonds in New York. Politicians that desire to see a ministerial crisis are diligently predicting the resignation of the Cabinet, and are inviting the public to believe that alarms and excursions are taking place on the official stage. But the folks behind the scenes do not appear to be particularly disturbed. The Treasury has taken its measures promptly. It has done three things, so far as we can see: sold 16 million *yen* worth of bonds to the Postal Savings Bank; issued 10 million *yen* of exchequer bills, and postponed the repayment of its debt of 24 million *yen* to the Bank of Japan. These are temporizing measures, it is true, and some critics will doubtless say that to make ends meet by declining to discharge old liabilities and contracting new, is a sorry sort of performance. After all, however, the business upon which the Treasury was engaged in New York was the raising of a loan, and the only difference between the present situation and the contemplated one, is that instead of owing money abroad, the Government will continue to owe it at home. Japan has been fortunate in many things, but she is not to be congratulated as to the phases of her finance during her *post-bellum* period of expansion. In point of fact she has a handsome surplus of annual revenue, but it does not suffice to pay for the extraordinary enterprises to which she has put her hand, enterprises which any other country, having access to the world's money market, would pay for with borrowed funds. Undoubtedly her financiers made a mistake in 1896 when they imagined that during the next seven years the domestic market would respond readily to calls amounting to something like 150 million *yen* for prosecuting the various undertakings planned in the sequel of the war. Foreign onlookers did not endorse that forecast, being convinced that the Japanese people would require all their available capital for their own purposes—namely, to prosecute the various enterprises invariably projected by a victorious nation—and that recourse to the European money market would in the end become inevitable. Had that necessity been recognised at the time, the country would have fared better, for all the money required in connexion with the *post-bellum* programme could have been obtained with the greatest ease immediately after the war. The result of not entering the London market then as a borrower was that the Treasury had to commence a long series of struggles resulting from failures to place the projected domestic loans, and the roughly judging public thus gradually arrived at the conclusion that Japan's finances were in disorder and that to lend money to her would be a very risky venture. Yet the real trouble is that she is trying to pay

out of ordinary income expenditures which fall properly under the heading of capital, and that if she could re-adjust her account she would find herself in a flourishing condition. The railways and telegraphs which the State now seeks to extend are returning an average revenue of 6½ per cent., and that consequently becomes a thoroughly sound enterprise, to say nothing of the part that such things perform as developers of national wealth. It is futile now to wish that her economists had conceived larger ideas, instead of resorting to a course of finikin finance which has kept her constantly before the public as a seeker of small accommodation and has convinced the world that her affairs are not flourishing. But it is not too late to hope that her politicians will see the wisdom of not giving factitious importance to events such as the failure to sell a poor five millions sterling worth of bonds. From the writings of certain vernacular journals and from the talk of certain politicians one would imagine that a national catastrophe had occurred, and that nothing less than the sacrifice of a cabinet can appease the deity of luck. We do not perceive any symptoms of this hysteria in governmental circles, and we may be permitted to remind party politicians that all their outcry only tends to create a situation with which they themselves would be quite incompetent to cope did they succeed in getting into power. They, too, are concerned in seeing their country prosperous, but it must be frankly confessed that ever since the opening of the Diet, and ever since the beginning of the farcical clamour for a reduction of the land tax and a cutting down of official salaries, the doings of the political parties have steadily contributed to injure Japan's credit.

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

Under the title of *Mōmoku teki Jisenka* (Blind Dispensers of Charity) the *Chūō Kōron* discusses the principles that ought to guide benevolent societies and those individuals who habitually dispense charity. That more harm than good is done by numerous bodies whose express object it is to help the poor, says the *Chūō Kōron*, is an undoubted fact. There are two extremes which it is well to avoid: one being utter indifference to the lot of our fellow-men and the other being communism. But how to help the poor without increasing poverty is a problem not easily solved. Perhaps the people who do most harm as dispensers of charity are religious people who under the influence of emotion scatter gifts right and left indiscriminately; more as a gratification to their own feelings than out of regard to the worthiness of the objects of their charity. In an age when charity is fashionable and when the names of donors are blazoned abroad to the encouragement of vanity in thousands of instances, the results of help given are not looked into and blind distribution goes on with its deadly work of undermining that independence of spirit which is one of the finest of all moral traits. Charity should be separated from religion, says the *Chūō Kōron*. When charity is principally managed by religious people it tends to manufacture hypocrites. When people are in want there is a great danger of their pretending to believe what in their hearts they reject for the sake of the temporary aid to be received. What is called softness of heart in

the dispenser of charity is by no means a desirable quality; as a man or woman who has this is more easily imposed on. The fact is the dispensation of charity must be regarded as a purely business proceeding, and it must be carried on on business principles. Each case must be investigated; and where it is found that poverty is the result of idleness or vice, people should be allowed to suffer the natural consequences of their folly. But it is lawful of course to help those who suffer on account of the idleness or vice of others. It is not enough to help the poor temporarily and to take no steps for getting rid of the cause of poverty. Most of the poverty that exists in the world is remediable. To attack it at its root is what society must do. But this is done only to a very limited extent. The *Chūō Kōron* addresses charity dispensers as follows:—*Tōku yamai no genin yori kitaru wao omowazu, tada bimbōnin wao sukuite, hito ni hokoru tomo-gara, sukoshiku kayarimite, unshiro tsumetaki shisō wao motte yeyen ni watawai no ne wao tatsu koto wao kurete-yo.* But this method of proceeding is by no means popular, continues the organ we are quoting. There is little sensation and picturesqueness about it, and so the work of manufacturing crowds of hypocrites for every deserving case helped goes on. Even where orphans who really need help are concerned, the greatest care should be taken to cultivate the spirit of independence among them and to cut them off from mere charity as soon as possible. Care also should be taken not to make the lot of orphans better than that of the children of hard-working parents. This would be equivalent to putting a premium on beggary. . . . Women's charity associations are as a rule much more injurious to society than those carried on by men; because women do not realise the importance of independence of spirit, living as they do lives of dependence (*Fujin teki megumi ga hito wao doku [poison] suru hanahadashiki wa satoru-heshi*). The *Chūō Kōron* concludes by affirming that most of the evils attendant on indiscriminate charity-giving are caused by the action of religious people who do not trouble themselves about the real causes of the distress they attempt to relieve.

In another article entitled *Jidai Shisō no Gisei*, the *Chūō Kōron* contends that the present age is unfavourable to high-toned morality; that those who are most successful in competition with others are usually men who are quite unscrupulous as to the methods they follow. What is required for success is neither feeling nor intellect as much as will. Hoshi Toru attained the position he held principally owing to the strength of his will. He was in every way a product of the age and thoroughly understood what are the conditions of success. He despised weak-willed men and gathered around him men of indomitable resolution. His untimely end was something that he could not foresee. Barring such an accident, the course that he took was bound to be successful.

The *Tōkei Shūshi* reproduces a table of statistics prepared by the Department of Justice two years ago giving a list of criminals and the religious sects to which they belonged.

To the nine thousandth number of the *Nichi Nichi Shinbun*, already noticed in these columns, Dr. Inoue Tetsujirō contributed an extremely long article entitled, "Religion and Morality from an educational point of view." Dr. Inoue's views have been so often stated in these Summaries that it is unnecessary on this occasion to do more than give an outline of the position taken by him in reference to the introduction of religious teaching in schools. The article is divided into nine parts. We give an abstract of the opinions expressed under each separate heading. (1) There has been a great deal of discussion of late as to the inefficiency of our educational system, and various persons have suggested that what is wrong is the want of religion and morality in the teaching. The present writer is of opinion that no radical change in the system followed is called for, and his advice to those who are responsible for the education of the nation is to keep to the old lines and turn a deaf ear to the advocates of change. Let things be discussed as much as possible, but let no changes in principles be ventured on at the instance of short-sighted people or because the representatives of certain sects advocate the substitution of their views for those now acted on. (2) Christians constantly affirm that the reason of the weakness of the moral restraint and influence exercised in schools is the absence of religion. They take it for granted that there can be no high class morality without religion—an assumption for which there is no warrant whatever. To me it appears that the introduction of religion into schools would create far more evil than it could possibly remedy. Religion must be kept out of all Government schools. (3) The introduction of religion into a school means the propagation of sectarianism, as sects are necessarily rivals and in many cases reconciliation is impossible. The imbuing of innocent, ignorant young children with party feelings is an unmitigated evil. When people come to years of discretion they have opportunities of hearing and judging for themselves what is to be said in favour of this creed and that, but while they are children their minds should not be warped in one direction or another. By religion I need hardly say I mean established creeds like Christianity and Buddhism. The advisability of imparting religious ideas that are not distinctively sectarian is another question, which is not now under discussion. Of course there is religion which is the property of all thinkers. But it is not this that Christians and Buddhists wish to teach in the schools. They wish to propagate their own narrow, exclusive, sectarian views. They are the vendors of special wares and wish to establish a monopoly. There are truths connected with Christianity and Buddhism that can be utilised discreetly by teachers, but this is quite different to allowing the regular representatives of these creeds to teach their own special doctrines. (4) Both Christianity and Buddhism are some two thousand years old, and it is not to be supposed that they are adequate to the wants of the present age. In both of them, as I said before, there are elements that can be used. Buddhism has its deep philosophy and Christianity has certain valuable ethical principles. These elements can be woven into the teacher's instruction without his committing himself to the advocacy of the Christian creed, or the Buddhist creed, as it exists to-day. (5) Religion as taught by priests and ministers at the present time is full of superstition. One of the objects of education is to get rid of the superstition that is apt to haunt the mind of youth. Nothing could be more opposite than the spirit of modern science and superstition. While teaching the latter in the school the former must not be allowed to enter. As for religious ceremonies most of them are very silly. (*Shūkyō no gishiki ni ōku wa, makoto ni bakageta mono.*) If one sect be allowed to propagate its doctrines in the school others cannot be forbidden. There is no safe course but keeping them all out. (6) The great religions of the world were much needed in the dark ages during which they appeared, but are not needed in the same degree now. The world has outgrown them to a large extent. It cannot be said that religion has progressed proportionately with other things, and that is the

reason why existing creeds are no longer believed in by the learned, who turn to philosophy to supply them with matter for thought and for guidance. The principle that religion needs constant renovation has been established beyond doubt by the history of the various creeds. Brahminism gave place to Buddhism, Judaism to Christianity, and later on Roman Catholic Christianity was replaced by Protestant Christianity in certain countries. But the transformation and renovation have not gone on at a sufficiently rapid pace to allow of the educationist's making use of religion as it is taught to-day. (7) What is indispensable to everybody is morality. This should take the place of religion in all schools. In France and Switzerland religion is kept out of the schools (*Shūkyō wa Kyōiku no hani yori nazotte aru.*) (8) When we speak of the necessity of introducing morality into the schools, we do not mean by this that we advocate the teaching of mere theories, such as that of Utilitarianism. We must have moral teaching that is effective in influencing the lives of men,—that serves as a standard and a guide to each person who uses it. This kind of ethics may with propriety be called religion. In the case of educated people the foundation of ethical belief is undoubtedly philosophy. With foreign philosophers like Kant, Lotze, and Green ethics and religion are part of one system, which constitutes efficient moral guidance. Confucianism, which is a system of morals, served all the purposes of a religion in this country for a very long time. (9) It cannot be said that the object of religion, as generally understood and the object of national education are the same. The principal object of religion is to give to mankind mental satisfaction. The object of state education is to make the nation prosperous and to encourage its progress in every way possible. Teaching which interferes with the realization of the latter aim should on no account be allowed.

* * *

The Roman Catholic organ the *Kyōe*, which of late has been greatly improved in many ways, in its 247th number, quotes from the *Asomori Shinbō* a speech of Mr. Honda Yōichi, in which he gave an account of his visit to Europe last year. Among other things Mr. Honda is reported to have in substance spoken as follows:—"We have a variety of religious beliefs in this country. All sorts of sects have sent missionaries to Japan. The same diversity of belief is found in Western countries. What impressed me while in Europe last year was the danger of conflict between the secular and the spiritual power, specially in Italy. At Rome I found two kings. They each had their separate courts and were surrounded by soldiers. From foreign Powers separate ministers were accredited to each. Two sets of orders were issued to the same subjects. I wondered how the unity of a state thus governed could be preserved. It seemed to me that the situation if introduced into this country would be fraught with danger. . . . Japanese must be careful what form of faith they adopt, and must be specially careful in reference to Catholicism." Commenting on this the *Kyōe* says:—"We are astonished that a man of Mr. Honda's standing should show such ignorance of history. Once the Pope did wield secular power, but since Italy was united under Victor Emanuel the Pope has had no secular power. The Vatican only was left to the Pope at that time. Mr. Honda's account of the situation is quite misleading."

In No. 238, the *Kyōe* replies to an adverse criticism of religion published in the *Nippon*. The latter asserted that religion and religious people had lost their sacredness in the eyes of the public and that the reason of this is the worldliness of professors of religion. To this the *Kyōe* retorts that religious people can't be held responsible for the indifference shown to them and their creed. It is the result of influences over which they have no control. The world is bent on money-making and in the rush of business life the claims of religion are little regarded. The fault of this lies with the public generally and is no proof of lack of earnestness in the propagators of creeds.

The *Kyōe* is nothing if not controversial. It replies to attacks on the Roman Catholic creed

from all quarters, and in its turn carries war into the enemy's camp. The *Saikyō Jihō*, a Buddhist organ, writes on the spread of socialism in Japan and says that Christianity is encouraging it. To this the *Kyōe* replies that it is only certain Protestant writers such as Messrs. Kinoshita, Abe, and Uchimura that espouse socialistic doctrines of an extreme type. By the Roman Catholics the relations of the classes to each other are explained in a manner conducive to order and quiet.

The *Kyōe* informs us that the Roman Catholic Mission in the East includes 31 ecclesiastical districts as follows:—In Japan, 4; Korea, 1; Manchuria, 2; Tibet, 1; Southern China, 7; Tonquin (Annam), 3; Cochinchina, 3; India, 4; between Malacca and India, 6. These districts are under the control of 35 Bishops, with a staff of 1,117 foreign missionaries. There are 2,428 evangelists and 1,254,068 converts. The baptisms in 1900 amounted to 219,275. Out of these 30,812 were adults. There are 4,783 church buildings, 41 Schools of Divinity, 2,133 theological students, 2,910 elementary schools and orphanages, and 93,537 pupils and orphans in these institutions.

The following is the report for Japan for the year 1900:—

	Tōkyō.	Nagasaki.	Osaka.	Hokkaido.	Totals.
No. of Converts	9,053	37,101	4,294	4,643	55,091
Received from other churches	3	—	4	4	11
No. of baptised					
Adults	619	432	138	298	1,487

Elementary Schools and Orphanages	21	16	9	8	54
Pupils and Orphans	2,792	8,442	600	916	4,452

The increase for the year, taking the whole country, was 735 converts, the baptisms showed a decrease over last year of 160.

The Roman Catholic Mission, according to the *Kyōe*, is feeling the need of more union among its various churches, and with a view of promoting this, a society has been formed called the 教友會, Kyōyūkai. The foundation ceremony of this Association was attended by *Les Abbés* Everard, Ligneul and Bertrand. In stating the objects of the Society on that occasion, it was remarked that the great opposition which the Catholic Church encounters in various quarters can only be successfully met by more combination among members of the Church, and by making efforts to instruct and stir up converts who had been baptised in infancy and had grown up without comprehending all that religion required of them. Debating societies were to be started and other efforts were to be made to awaken a spirit of inquiry. The importance of the Church's possessing a literary organ capable of representing Catholic views in an adequate manner was dwelt upon.

* * *

Mr. Nakae Tokusuke's *Ichinen-yūhan* was fully noticed in these columns in the "Monthly Summary of Current Japanese Literature for October." Mr. Nakae has written another somewhat remarkable book called *Zoku Ichinen-yūhan*, but the subject of which is given as *Mushin, mureikon* (No God and no Soul). This like the former work is published by the Hakubunkan and sells at 35 sen a copy. A review of the *Mushin, mureikon* appears in the *Kokumin Shinbun* over the signature of "Muyen," the writer who dealt with Dr. Hozumi's "Ancestor Worship" in the columns of the same paper. The following is the substance of "Muyen's" review. This book is published as a supplement to or a continuation of the *Ichinen-yūhan* and bears the title of *Zoku Ichinen-yūhan*. The former work dealt with literature principally.

This one treats of philosophy. Mr. Nakae rejects the popular theories in reference to the existence of God and a soul and advocates the view that all philosophy must rest on an experimental, intellectual and scientific basis. The philosophy advocated is wholly materialistic and savours of arbitrariness. The body becomes the principal essence (本體) to be relied on and the mind is worked by means of it. The bodily substance becomes imperishable and thus we have an immortal body instead of an immortal soul. Matter alone is eternal and it forms the substratum of all things. Here "Muyen" complains of the ease with which Mr. Nakae reaches this startling conclusion—a conclusion which is directly opposed to the views of the majority of the world's great philosophers. To the majority of thinkers the *Cogito, ergo sum* argument suffices to demonstrate the existence of mind as distinct from matter. What is new about Mr. Nakae's book is not the theory it advocates, but the manner in which that theory is stated, which savours of the openness and the absence of any desire to write for effect that characterises the true philosopher. In elaborating the theory that spirit perishes but matter remains, he says:—"While the souls of Christ and Shaka have perished, even the roadside droppings of the horse last for ever. The spirit of Sugawara Michizane became extinct with his body, but the branches and leaves of the plum-tree he so much loved have propagated themselves a thousand times and secured for themselves an eternal existence."^{*} Mr. Nakae then goes on to speak of himself thus, *Mi taishitsu ni okasare, ichi nen, hannen to nichi-nichi, tsukizuki, shi ni chikazuki, tsutsu aru jinbutsu nado ni arite wa, shinin (深仁), shikō (至公), no Kami ari, mata reikon ga fumetsu de atte, sunawachi shingo (身後) naruo dokuji no shi (資) zoe tamochi uru to shitara naraba, oini mizukara nagasamuru tokoro ga aru de arō; shikashi rigaku no sōgen (尸骸) wo ikan sen.* "For a man who is stricken with a mortal disease and who for the space of one year and a half, month by month and day by day, draws nearer death it would be no small solace to know that there is an all-loving and impartial God, that the soul is immortal and that hence human beings after death^{*} will have independent existence. But (if such theories be accepted) what becomes of the sacredness and inviolability of scientific truth?"[†] It is its plain declaration on this point that makes this book so different from other works of the same kind. Even those who differ from Mr. Nakae can not withhold their sympathy from him in his difficulty. Mr. Nakae is wholly devoted to what he considers to be the truth and cares not a straw for anything else. The pursuit of truth is his one delight. What makes this book valuable is the resolute manner in which it sets aside as quite untenable that theory which makes man the centre of the universe. The idea of the existence of a personal God and of an immortal soul has its origin in the notion that man is the centre of the universe and that his comfort and welfare are of more importance than all else in the system of existing things. To Mr. Nakae this theory appears to be the height of absurdity. To him it seems inconceivable that a being which in the great life of the universe, amid the infinities of time and space, of matter and motion, appears utterly insignificant, should be the pivot on which all the complicated system turns. The importance attached to human beings, the superiority of man to all other existences for the purposes of the philosopher may be an almost indispensable theory. But on what foundation

does such an assumption rest? The theory that another life is needed to set straight or to atone for the inequalities of human lot in this life is thus based on the supposition that man's lot is the first consideration in the arrangement of the affairs of the universe. A study of astronomy and other sciences has demonstrated to Mr. Nakae that there is no satisfactory ground for this supposition and so current theology and current psychology are both rejected by him. But what is worthy of note is that his theory respecting the comparative insignificance of man, whom he regards as a mere dot on the great map of time and space, does not make him indifferent to the well-being of his fellow-creatures. These last two books of his are full of the most fervid utterances on truth and error, virtue and vice, right and wrong, and it is quite plain to him who reads between the lines that the author of these last messages to the world he is so soon to quit is a man who believes that he has a mission in life, that he can benefit his fellow-men by pointing out to them the way in which they should walk. He writes with utter indifference to both praise and blame, he covers up nothing, he deals in none of the popular plausibilities that pass for truth among un-seeing men—he writes with a tremendous earnestness. So, though as a philosopher and a well-read scholar, the anthropolatry which places man on a higher throne than all cosmic existences appears to him absurd, he evidently holds the opinion that in his own sphere and among his own people each individual man has duties to be performed from which he must not shrink even at the point of death. Self-dependence, self-development, earnestness, these are his watchwords. Thus we find that, ultra-materialist as he is, in point of devotion to a high moral ideal, Mr. Nakae inhabits a different world from mere lip-professors of religion. When the man himself and all his views be taken into consideration, his utterances are nothing like as dangerous as those of the religious bigot. (*Butsuron no jissai teki no kiketsu wa, kanarazu-shimo henkyō naru shukyōka no tonaeu hodo kiken naru mono ni arazu.*)

As a contribution to philosophical investigation it may be doubtful whether Mr. Nakae's *Zoku Ichinichigan* will be considered of much value, but as a revelation of the foundation of Mr. Nakae's faith and as an indication of what is the keynote of his life and character it will be highly prized by all thinking people.

* * *

* Lord Rosebery quotes from Napoleon's conversations words to the same effect. Thus:—"Say what you like, everything is matter, more or less organised. . . . A man is only a more perfect being than a dog or a tree, and living better. The plant is the first link in a chain of which man is the last. . . . It is my opinion we are all matter. . . . When we are dead, we are altogether dead." "Napoleon the Last There," pp. 170, 171. (WRITER OF SUMMARY.)

† The meaning evidently is that Mr. Nakae would accept the popular theories about God and the soul of man if he could, but that to him truth is of more moment than personal comfort.—(WRITER OF SUMMARY.)

Seikōkai, and the members of this body hold conferences and act in union in a variety of matters, such, for instance, as the use of the same hymnal in all their churches. The Evangelical Alliance has doubtless done much to cement union among the different missions, and for the last four years united evangelistic work has been carried on under the auspices of the Association. The enthusiasm that revealed itself in connection with the preaching services held in the Spring of this year should be utilised for furthering the cause of union among the sects. The indifference of Japanese Christians to sectarian distinctions is so great that the work of combining the various bodies ought to prove comparatively easy in this country.

(2) The independence of native churches is perhaps a question of greater moment than union among the sects. As long as Japanese churches rely on a steady supply of foreign money, it is quite impossible for them to act independently. The difference between a church that is self-supporting and one dependent on foreign patronage is just the difference between trade dependent on protection and free-trade. One is artificial and sickly; the other natural and healthy. Though the progress of self-supporting churches may be very slow, it is sure. What Christians there are of a different type from the employees of foreign missionaries. It is quite impossible to go on accepting foreign money without growing servile and losing the love of being independent. Then there is another reason for wishing to see native Churches independent, and that is this. Until the disbursement of church funds is entirely in the hands of Japanese, pastors and evangelists will never be properly paid. The reasons for the low salaries paid to Christian workers at present are: (a) the desire of the missionaries to make the money they have to dispose of go as far as possible, and (b) a feeling that self-supporting churches are more likely to be founded if the rate of pay is low. Many bodies of Christians who, though able to provide small monthly salaries, shrink from holding themselves responsible for large amounts. Those pastors that are paid out of foreign funds to a large extent lose the sympathy of their fellow-countrymen; and when they try to win converts they are always exposed to the charge of preaching for pay, and so without knowing how much they get most people seem to be of opinion that these pastors are comfortably provided for by their foreign patrons. If they happen to be informed that the men are working on low salaries, some people immediately infer that they are not worth more than they get. So it happens that the Japanese pastor and evangelist is misunderstood on all sides, and the difficulties of his position are so great that it is not surprising to find men of ability throwing up their posts and taking to other occupations. More than half of the Kumiai Kyōkai churches are self-supporting and the rest have resolved to become so within three years. . . . Some people affirm that for missions to be worked on foreign money is no different from borrowing foreign money to develop the resources of a country. But in our view there is all the difference in the world between the two things. For a country like ours, whose independence is thoroughly established, to borrow money from a richer state is in no way parlorous. But for a weak Power, whose independence is in a very shaky state, to load itself with a foreign debt is to invite ruin. If the church of Christ in Japan were quite independent, it might borrow money on interest without harming itself in any way. But this situation has not yet been reached. The church has not yet proved itself strong enough to stand alone, hence further dependence on foreign aid only encourages helplessness.

It is said that the Yokohama Water Works authorities are now conducting negotiations with a British firm in Yokohama for the floating of Water Works bonds. The issue price of the bonds is said to have been arranged at yen 89 per yen 100 face value and the rate of interest at six per cent. per annum. It appears, however, that the question of whether the future proceeds arising from the water supply in this city will be offered as security or not remains to be considered by the Japanese authorities.

Two important questions connected with the future of Christianity in this country are now engaging the attention of the Churches, says the *Tōkyō Maitshi Shinshi*. One of these is the union of the various sects working in Japan; the other the independence of native churches. (1) There are some 32 Missionary societies represented in Japan. Reduced to sects the number falls to about 22. The idea of uniting various bodies of Christians in Japan is by no means new. Years ago churches were formed at Yokohama, Kobe and Osaka on the non-denominational principle, and these churches received the support of missionaries belonging to the American Board, the Dutch Reformed and other Presbyterian churches. But subsequently Methodist missionaries, missionaries belonging to the Fukuin-Kyōkai, and many others arrived in the country and the nonsectarian character of churches was gradually lost. In 1878 a large united conference was held at which the subject of a grand coalition of sects was discussed. But as a result of that meeting only two sets of Christians joined hands. The Presbyterians founded a United Church called the Itchikyōkai and the congregationalists founded the Kumiai Kyōkai. The Methodists have long been considering the advisability of forming one body and the prospects of union among them are very bright at present; though it may take another four or five years to make the necessary arrangements. There are three branches of the Episcopalian Church represented in Japan, the English Church Missionary Society and the Society for the Propagation of the Gospel, and the American episcopalians, but these three branches some years ago united under the title of the 聖公會,

YOKOHAMA LITERARY SOCIETY.

The usual fortnightly meeting of the Yokohama Literary Society was held on Friday evening at Van Schaick Hall and despite the raw, inclement weather and clashing of several other public functions, attracted a fair attendance. The Vice-President's paper took up most of the evening, and then Mrs. McIvor and Mr. W. Karl Vincent played a duet from the "Caliph of Bagdad" (*Boisclieu*) in brilliant style; the President read Rudyard Kipling's humorous sketch "My Sunday at Home;" and Mr. E. W. Maitland gave a sympathetic rendering of "Margarita" (*Lohr*). The following was the paper read by Mr. A. Bellamy Brown:

An old man in a lodge within a park;
The chamber walls depicted all around
With portraiture of huntsman, hawk, and hound,
And the hurt deer. He listened to the lark,
Whose song comes with the sunshine through the dark

Of painted glass in leaden lattice bound;
He listeneth, and he laugheth at the sound,
Then writeth in a book like any clerk.
He is the poet of the dawn, who wrote
The Canterbury Tales, and his old age
Made beautiful with song; and as I read
I hear the crowing cock, I hear the note
Of lark and linnet, and from every page
Rise odours of ploughed field or flowery mead.

Longfellow pays loving tribute to the Father of English poetry in the above sonnet and with keen poetic insight lays his finger upon the salient points in the older singer's work. For after all allowance is made for the influence which years of service in the Franco-Norman atmosphere of the Edwardian court wove around him, Chaucer must be acknowledged as being essentially English in his freedom and frankness of spirit; in his manliness of mind; in his preference for the good in things as they are to the good in things as they might be; in his loyalty, his piety, his truthfulness; so that, as Professor Ward so aptly puts it, "He is the first English poet to read whom is to enjoy him; he garnished not only our language but our literature with blossoms still adorning them in vernal freshness; and thus became a figure unique in the gallery of English writers."

I have pitched rather head-long into my task, I fear, but I crave indulgence to be excused from going into the dry, historical facts of Geoffrey Chaucer's birth, career, and list of writings; for those things are to be gathered by anyone at all interested in the early beginnings of English literature among a host of books, from the humble text-book of our school-days to the elaborate treatises prepared by the scholars of the Early English Text Society. Chaucer's most famous work is undoubtedly the *Canterbury Tales*, which he left a fragment, and it is one of the figures which he introduces, the twenty-second of the thirty-one characters, which I intend to bring to your particular notice this evening. We all should know the opening of the famous *Prologue* which describes how the pilgrims gathered at the Tabard Inn in Southwark preliminary to starting on their journey to the shrine of St. Thomas of Canterbury. Those pilgrims included nearly every rank of mediæval middle-class society. There was a Knight, and his son, with an attendant yeoman; a prioress and a nun, with three priests; a monk and a friar; a merchant, a clerk at Oxford, a serjeant-at-law, a franklin, a haberdasher, a carpenter, a weaver, a dyer, a tapestry-maker; Roger of Ware, a London cook; a shipman from the west country; a doctor of physic; Alison, that chatter-tongue wife of Bath, who delighted to wear red stockings and fine clothes; two brothers; a poor town parson, and a ploughman; a reeve, or steward; a miller; a summoner of delinquents to the ecclesiastical courts; a pardoner, one of the first of the innumerable host which spread all over Europe hawking pardons from the Pope; a maniple (or buyer of victuals) from a lawyer's corporation; Chaucer, and last but not least Harry Bailey, the jovial Boniface, whose shrewd wife made life for him at the Tabard Inn far from comfortable at times, so that he was glad of an excuse to get beyond the reach of her harrying. In sooth, a goodlie companie. It was

Harry Bailey's suggestion that the Pilgrims should beguile the tedium of the way by telling tales, and the one who told the best, in the opinion of the majority, was to have a supper at the expense of the company on their return to Southwark. The scheme of the Tales was nobly planned, but as I have before remarked, it has come down to us as a fragment, Death evidently removing Chaucer from the scenes of this life ere he had time to bring his work to a completed whole. This has always been a matter of regret to scholars, and even to the casual reader, for one would dearly like to have seen who won the supper—which of the Tales, in fact, Chaucer deemed the best; and besides one cannot help thinking there was many a good tale yet to tell, many a scene from English life to be woven into the thread of the narrative which would have made our early literature all the richer and the more precious to students of a later age. But we must, under the circumstances, be content with what we have, and be thankful that we have so much. The portraits Chaucer has limned and the description he gives of life as lived in England in the Fourteenth Century which connect Tale with Tale are of inestimable value, enabling us to distinguish the first beginnings of many things which are now an indissoluble part of the English character and constitution. Most assuredly more attention has been paid to the figures of other of the pilgrims to Canterbury than has been accorded to the physician, or "Practisour," as Chaucer him. Yet he is well worthy of attention. Amongst the pilgrims there are only eight of whom the Poet gives a longer account in his famous *Prologue*, but the 38 lines which he devotes to the man of physic tell of his dress, his studies, and something of the nature of his plan of treating patients, and are pregnant of meaning to one who loves to delve among the musty records of the past, opening up as they do innumerable lines of absorbing research. What a totally different man must this "doctour of phisyk" have been to the medical man of the present day! To begin with, his line of study is the more remarkable in that he lived before the invention of printing. We are not told where he was educated, nor whether he had taken his degree of Doctor in one of the Universities; but we are definitely informed that he "knew well" no fewer than fifteen authors. Nearly half of them were Arabian, five were Greek, two were English, and one was a Scotsman. The large Arabian element is that which most surprises at the first glance, yet it needs but a slight reflection for any one familiar with the history of the Middle Ages to acknowledge the huge debt which we moderns owe to the mediæval Arabs who kept alight the sacred lamp of learning when the European nations were plunged in the mists of densest ignorance. Badly would we have fared had not the descendants of the men who burnt the Alexandrian library suddenly changed the whole tenour of their ways of thought and become the preservers and transmitters of learning to after-times. As Dr. Morris points out, the order of the fifteen names in Chaucer's list of learned men is mainly historical—first the Greeks, then the Arabs, then the more modern men. Inside these divisions the order is decided by considerations of rhythm and rhyme. *Æsculapius* heads the list, but the physician would have found some difficulty in finding his works, for he left none, if indeed, in the light of modern research, he ever existed outside the fairy-land of myth and tradition. It has been suggested that his name may have been borrowed for some treatise on medicine not now extant, but, to follow the authority I quoted just now, this theory alluring though it be, would be to enter upon an unsatisfactory field of conjecture full of pitfalls for the unwary. Hippocrates the Great—his name was corrupted in Chaucer's time to *Ypocras* and was then used to denigrate a cunningly compounded drink, which was spiced with "gynger, synomone, graynis (grains) of paradise; sugar, and turnesole (heliotrope), and served with "wafurs" in a stoppered bottle—Hippocrates belongs to the fifth and fourth centuries before Christ. His treatises are the earliest extant upon medicine. *Deoscorides*, a writer on *materia medica*, chiefly herbs, is the earliest after the Christian era.

Galen and Rufus also belonged to the second century, living in the palmy days of the Roman Empire, when the great Emperor Trajan was master of the world. Rufus was of Ephesus and wrote on the names of the parts of the human body. Galen—spelt in the Middle Ages Galien—was probably the most eminent authority on our physician's list. His works, of course, are not studied now, except for the history of medicine, but in their pages Chaucer's "doctour of phisyk" had a treasury of knowledge. It may be doubted whether medical science made much advance from the second to the fourteenth century, from Galen's to Chaucer's time; but it can proudly boast that during the past half century it has made greater strides than from the beginning of the world to the end of the Georgian era, so great is the heritage into which we fortunate folks have come. In the list of his Arabian authorities, Chaucer has preserved no order. When Greek learning became pedantry, the torch of mediæval learning kindled at the altar of the Greek schools was kept alight at Damascus and Bagdad. And so we find that John of Damascus represents the one race; and Rhazes, a great authority on small-pox, the other. Both men belong to the ninth century. Next come three eleventh-century men. Avicenna (born at Bokhara), Haly, and Serapion. Averroes, born in Cordova, belongs to the twelfth century. Haly, or more properly Alhazen, was a Persian author of a medical treatise known as the *Royal Book*, but more famous for his knowledge and discoveries in astronomy, or rather astrology. Chaucer's physician, by the way, recognized a connexion between star lore and the healing craft, so it is not strange that the men whom he took for guides should not be specially distinguished as physicians but were rather men of wide learning and research. They were, in fact, philosophers, in the full meaning of the term as then applied by Chaucer and his contemporaries. Avicenna, for instance, was a commentator upon Aristotle, and Averroes wrote upon both Plato and Aristotle. But of the two, Averroes had the greatest influence as a philosopher; Avicenna as a writer on medicine. The position of the mediæval students of Chaucer's days was somewhat akin to the Japanese seekers after truth in the early part of the nineteenth century—they had to learn Greek philosophy through Latin translations of Arabic versions of the originals; just as Japanese students learnt of the science of the west through Dutch dictionaries, and wrote out the result of their discoveries in classical Chinese characters. Avicenna's book was the *Canon of Medicine*, a text-book of medical study in the European universities of the middle ages. No doubt our physician read all these books in Latin; for in his time Greek was little studied, much less Arabic. Serapion is a Greek name, and it was that of a famous physician living long before the time of Christ, an Alexandrine Greek who wrote against Hippocrates. His works are not extant, and it was more likely that the reference is to one or two Arab physicians of the name, who very probably assumed it because of its ancient renown; if so, they belonged to the eleventh century. Constantyn is Constantine Afer, a native of Carthage, and probably of Arab origin, but a Christian monk, who left Carthage and became one of the founders of the famous medical school of Salerno in Italy—that school to which Longfellow sends Prince Henry in the *Golden Legend*, and which he describes as being full of noisy wranglings and profitless disputations. Salerno may be said to have owed its greatness to the fact that the Saracens brought Arab medical learning across the Mediterranean. In the Merchant's Tale, Chaucer quotes from a work by Constantyn on a strictly medical subject, calling him "the cursed monk dan Constantyn." The three men of learning last mentioned by Chaucer lived nearer his own time. Gilbertyn is Gilbertus Anglicus (Gilbert the Englishman), who wrote his *Compendium Medicine* at some time after the middle of the thirteenth century. Bernard Gordon was a Scot, who became Professor of Medicine at Montpellier fully a century and a half before Rabelais took his thirst for learning and his love of fun to that renowned medical school. And now to the physician himself. Professor Morris has

discovered that John of Gaddesden, of Merton College, Oxford, died in 1361, so he belongs to the generation immediately preceding Chaucer's. He is usually described as Court Physician in the reign of Edward II., and certainly had a large London practice, while one of his most famous cures is his treatment of the king's brother for small pox. Gaddesden wrapped his royal patient "in scarlet cloth, in a bed and room with scarlet hangings," and we have it from contemporary annals, transcribed in the latest biography of the day, that when the fever had run its course the prince rose from his bed without a trace of the malady left behind. Dr. Norman Moore, in the "Dictionary of National Biography," says that Gaddesden's book, called *Rosa Medicinae*, often called, however, *Rosa Anglica*, is crammed with quotations from ancient writers. "The book begins with an account of fevers based on Galen's arrangement; then goes through diseases, injuries, beginning with the head; and ends with an *anti-doliarium*, or treatise, on remedies. It contains some remarks on cooking, and innumerable prescriptions, many of which are superstitious, while others prove to be common sense remedies when carefully considered. Thus, the sealskin girdle with whalebone buckle which he recommends for colic is no more than the modern and useful cholera belt of flannel. Gaddesden cared for his gains, and boasts of getting a large price from the Barber-Surgeon's Guild for a prescription of which the chief ingredient is tree frogs. His disposition, his peculiarities, and his reading are so precisely those of the Doctor of Phisik in Chaucer's *Prologue* that it seems possible that Gaddesden is the contemporary from whom Chaucer drew this character." The theory is not so wild as at first glance appears. If Chaucer was born, as is now generally held, in 1340, he would have been of age in the year that Gaddesden died, and in the smaller London of his times it is highly probable that he may have met the eminent doctor and in after years turned his peculiarities to account as is the wont of literary men in all ages and all countries. For the purposes of this article we will assume that Gaddesden was the prototype of Chaucer's physician, and for a few moments will try and discover what manner of man he was as shown in the record of the *Canterbury Tales* and other papers which have been found of recent years in the queer store-houses of the past. We have seen that he must have had an extensive acquaintance with the literature of his day, and it is interesting to notice how he digested it and then what use he made of the varied mass of learning so acquired. To begin with, it is only in accordance with the habits of his day that astrology should form the principal basis of his treatment. He would watch the sky for a favourable star, or combination of stars, to be in the ascendant; then he made an image of his patients. If this effigy were made at a season astrologically propitious, it was thought treatment of the image helped the patient through magic. Magic exerted a powerful influence over the minds of the multitude till long after the fourteenth century, but it may be wondered whether this clever man really believed in cures being effected through its agency; but granting that he did, then to what extent did he go; or was it but a device of the man of genius playing on the foibles of the mass, and only pretending to invoke the aid of magic when he was really leaving Nature to work out her own cure? The proposition is most alluring, but we must not dally with it now. Later we read that Gaddesden by no means relied entirely upon astrology to help him out in medicine or surgery. Chaucer declares that his doctor knew the cause of every malady, and attacked the root of the mischief. His diagnosis of the cause referred it to what he would call "the elements;" or as they were more familiarly known till long after his day, "the humours." These were composed of sets of four: cold, hot, moist, and dry; black bile, yellow bile, blood and phlegm. Chaucer in his *Prologue* mentions the former by name, but the latter, being too well known, he does not trouble to detail. This famous theory of the "humours" is very old, probably dating from Hippocrates, and certainly systematised by Galen. The ancients believed that these four humours (from Latin

humor, moisture, fluid) were present in every man, and that his temperament, temper, idiosyncrasy, complexion, depended on the way in which the humours were mixed. If the mixture were equal, he was said to be good-tempered or good-humoured; but if any one of the four was in excess of the others, the temper was decided thereby. If of black bile, he was atrabillious, or melancholy; if of yellow bile, he was choleric; if of blood, he was sanguine; if of phlegm, he was phlegmatic. It was a rough and ready reckoning as you will, but very serviceable for early mediæval folk, and to a student of our literature profoundly pregnant, for it throws many a cross-light upon phrases and passages of speech which pass current after centuries of use even at the present moment. To pass on. Once the diagnosis determined, the ground was cleared for the physician's prescription. In Chaucer's day, the medicines in constant use were mostly herbal, and according to Prof. Morris, were made up in two forms, *drages*, or drugs, and *lectuaries*, or electuaries. The former word is by many etymologists connected with *dry*, and seems to be used of some forms of powder; while the latter is easily perceived to be something that can be licked. Both imply that the medicine was made up in a pleasant form, like the powder in the jam of our nursery hours. The word "drug" nowadays, suggests an unpleasant medicine, but Dr. Skeat quotes from *Cotgrave's Dictionary*, published in the year of the Restoration, 1660, the following passage:—"Dragee, a kind of digestive powder prescribed unto weak stomachs after meat, and hence any junkets, comfits, or sweetmeats served in the last course as stomach-closers." Of course meat is used in this context in its old-fashioned form of food, not necessarily flesh. Fifty years ago medicines were nastier than they are now, and one of the welcome signs of the times for sick folk is the return of the mediæval notion that drugs can be profitably administered disguised in somewhat the form of sweetmeats and not forced down unwilling throats in all the naked horridness with which we shall always associate the early Victorian black draughts and boluses! In Chaucer's day medicine came, as it does in ours, from the chemist, though that necessary individual was not always called the apothecary. The first meaning of the word was alchymist, and we know to what fruitless pursuits those worthy men were welded; the making of gold rather than the restoring of health. And here I would like to digress for a moment and call attention to the fact that in the United States the dispenser of drugs is invariably known as a druggist, thus preventing the confusion which arises at times in England through our calling the scientific demonstrator of the laboratory by the same term as we apply to the compounder of medicines. Chaucer we find has a sly hit at the doctor and the chemist, accusing them of playing into one another's hands, the doctor prescribing expensive remedies from which the chemist reaped a large profit, and then the knight of the pestle and mortar returned the compliment by recommending patients to the wily physician. Echoes of that libel are current among the wits even in this year of grace!

A few words more as to the appearance of our physician. We learn from the poet's description that he was a man particular as to his diet, that he did not eat much, but that what he ate he took care should be right nourishing food and easily digested. He rode to Canterbury clad as became his position in Society, being dressed in "sanguin and in pers." His coat was, in other words of blood-red hue, trimmed with cloth of the colour of peach blossom, and lined with taffeta and sendal; his under garments were of grey-blue cloth. Lest we should be misled into thinking that this rich and handsome costume denoted extravagance, Chaucer hastens to add that the physician was moderate in his expenditure, no spendthrift, but kept what he had fairly earned. We can thus imagine him to be a substantial man of parts, looked-up to by his neighbours as a miracle of learning yet one to be trusted in cases of emergency where life and death hung in the balance; a wise counsellor, a sagacious comforter in the hours of sickness and distress; altogether such an one as we are accustomed now-a-days to

consider all doctors of medicine should be. Chaucer increases our obligation by painting such a portrait. It is in accordance with the character which he gives this man that when his time came for telling a tale he chose the sorrowful Roman legend of *Virginia*, which Chaucer first read no doubt in *Livy* and which the French romancists transplanted and redressed in the *Roman de la Rose*. When the Doctor's tale came to an end the Pilgrims were, seemingly, plunged in sympathetic silence, so Master Harry Bailey, to restore the balance, and in the character of presiding officer of the party, proceeded to banter the story-teller upon the sadness of the theme. Says the mirthful Boniface—I paraphrase the mediæval English rather freely—"I am so distressed by your tale that I would like a drink!" He thought that a glass of good ale would provide a wholesome restorer of their depressed spirits. Does not this happy touch bring us with a sudden jump straight from Bailey's into our own century? We can almost see the twinkle in Chaucer's eye as he described the scene, while we also realise that the ready money of colloquial expression in his days was very like what it is in our own. I have said that the Doctor's tale deals with the story of *Virginia*, and I close my paper with a quotation which will give you some idea that despite the obvious nuditarianism of many of the *Tales*, Chaucer highly revered good women and could conjure up the image of sweet English maidenhood. The Physician is speaking of the lovely Roman maiden as she is seen going about her father's house:—

As wel in body as goost chaste was sche;
For which sche flourid in virginite,
With alle humilite and abstinence,
With all attemperance and pacience,
With measure eek of beryng and array.
Discret sche was in answering alway,
Though sche were wis as Pallas, dar I sayn.
Her facound eek ful womanly and playn;
Noon countrefetted term hadde sche
To seme wys; but after hir degre
Sche spak, and alle hire wordes more or lesse
Sounyng in vertu and in gentilesse;
Schamefast was sche in maydenes schamefast-
nesse,
Constant in hert, and ever in besynesse
To dryve hire out of idel slogardy.

A. B. B.

U.S. TRANSPORT ON A ROCK.

The U.S. Transport *Warren*, from Manila for San Francisco, arrived in Kobe harbour on Tuesday morning, after having struck a rock in the Inland Sea near Moji and narrowly escaped sinking. The accident occurred about 9 o'clock on Sunday morning. The vessel was steaming full speed at the time, and of course in broad daylight. The vessel had passed Moji an hour or so before the accident occurred. When nearing the point styled Isaki on the charts, on which there is a lighthouse, a Japanese vessel got in the *Warren's* course and it was in avoiding this vessel that the transport struck a rock—a charted rock which is said to be named "Fisherman's Rock." It appears that the Japanese boat was warned by the *Warren's* whistle to stand clear of the steamer's course but there was no reply to the warning and the *Warren* attempted to pass round the smaller vessel with the result described. The engines were reversed immediately the vessel struck and she backed off without much difficulty. She was then found to be making water, but on examination it proved that she was not doing so seriously. In the meantime, however, the vessel's head had been turned shorewards with the idea of beaching her, as was done in the case of the *Morgan City* which struck a rock in the Inland Sea in a somewhat similar way and was subsequently beached. The *Warren*, however, is a double-bottomed steamer and the second bottom does not seem to have been seriously damaged by the impact on the rocks. At any rate, as it was found that the vessel was not in serious danger her head was again turned and the voyage to Kobe continued at reduced speed. She arrived on Tuesday morning. She has nearly 1,000 people on board.—*Kobe Herald*.

THE IMPERIAL RACE TRACK.

It would be difficult to concoct within such small space a more complete collection of lies than is contained in the following paragraph which, under the heading given above, and accompanied by a view of the former race track at Shinobazu, Ueno, appears in the *Illustrated Sporting and Dramatic News* for Sept. 21st:—

The Tokyo Imperial race track is under the control of the Nippon Race Club; and was built by the present Emperor for his special race meetings held for three days during his birthday week. The course is well laid out, being nearly a mile in circumference and constructed on a beautiful site in the Ueno Park. It is bordered with fine cherry trees and the centre contains a picturesque lake and an imperial tea pavilion. It commands a splendid view from the Royal Stand and is one of the finest tracks in Japan. Racing is well patronised by the princes and the nobility, many giving splendid cups and purses, the Imperial cup being of course the trophy of the meeting. The Japanese own some very good ponies, notably the horses of the present Prime Minister Count Ito. The Jap. ponies are a cross between a China pony and an Australian horse, standing much higher than the China pony, cleaner limbed and are altogether finer animals. The pari-mutuel system is the favourite mode of betting with the majority of Japanese.

This precious bit of nonsense is signed by "E. J. Leslie," who if he received payment for it ought in all dishonesty to send the money to a charitable institution.

CRICKET.

Y. C. AND A. C. VERSUS THE FLEET.

The cricket match on Saturday afternoon was rather a poor affair, the naval visitors being completely outclassed. Owing to the early hour at which it is necessary to draw stumps in November the game was not played out. Score:—

Y. C. & A. C.

K. F. Crawford, c. Broadhurst, b. McKinlay	12
F. E. White, c. Attenborough, b. Fenn	57
H. W. Kilby, lb.w. Haycock	29
E. W. Maitland, not out	46
E. G. Fradgley, c. Digby, b. McKinlay	1
F. E. Wilkinson, not out	2
E. W. Kilby	
A. H. Firth	
F. O. Stuart	Did not bat.
O. Strome	
C. Libeaud

Mr. Harter	
Mr. Bowling	
Extras	4

YACHTING.

The usual sendoes' race took place on Friday, with the following result:—

	Start	Finish	Allow.	Corrected Finish.
<i>Swanhill</i> ...	12.27.40	2.39.10	—	2.39.10
<i>Dainyo</i>	12.27.10	2.53.00	—	2.53.00
<i>Asagao</i>	12.28.10	3.00.40	7	2.53.40
<i>Surprise</i>	12.28.00	3.01.30	25	2.36.30
<i>Mosquito</i>	12.27.13	3.12.30	15	2.57.30

Surprise therefore won the first prize; *Swanhill* taking second place; and *Dainyo* third.

Dainyo broke her throat halliards in the course of the race. *Asagao* broke her tiller. *Asagao* started beyond the starting line, after trying in vain to round the western Markboat, being in irons for a considerable time. *Mosquito* did not round the lightship on returning, the sea and wind at the Widow Buoy proving too much for her. She ought to have had one reef tied up.

LAW CASES.

In the Yokohama Chihō Saibansho on Friday, the first meeting in bankruptcy of the creditors of Mr. Ogaki Naotaro, was held. The Bankruptcy Commissioner reported the results of the management of affairs and the Bankruptcy Administrator the results of the disposal of the moveables and fixtures of the bankrupt; he explained the method in which the Bankruptcy Administrator collected money due to the bankrupt, and that the money thus collected amounts to yen 7,549.97.

In the Yokohama Chihō Saibansho on Monday morning, before Judge Yasuda, the hearing was resumed of the case of Messrs. A. M. Essabhoj, No. 45, v. Messrs. Browne & Co., No. 72, Agents for the Austrian Lloyd's S. N. Co., the plaintiffs claiming yen 1,127.50 for the loss of two boxes of Indian indigo.

Mr. Fujita, Counsel for the plaintiffs, was absent, and Mr. Masujima represented the defendants.

Counsel for the defendants said that as the defendants were relieved of the agency for the Austrian Lloyd Co. last month the claim against them must now be regarded as null and void, and moved the court to give judgment in default.

After a short consultation, the court announced that the plaintiff's claim was dismissed, the costs of the case to be borne by the plaintiffs.

In the same Court on Monday morning, before Judge Yasuda, there was heard an action brought by Mr. Sumi Kikichi, of Ichome, Honcho, Higashi-ku, Osaka, against Mr. C. D. McGrath, of Messrs. A. A. Vantine & Co., No. 268 in the former Settlement of Yokohama, claiming yen 8,407.50 as damage for failure to fulfil a contract.

Mr. Hioki appeared for the plaintiff and Mr. Masujima for the defendant. Counsel for the plaintiff said that the plaintiff made a contract with the defendant on the 22nd of March this year for the purchase of 400 bicycles at the rate of yen 45.50 per bicycle up to September last. During a period from the 29th of March, when the first transaction was carried out, to the beginning of May, the plaintiff issued seven orders and received 105 bicycles at a cost of yen 4,595.50 in all, as the plaintiff was at liberty to have delivery in parts. On the 8th of May when the plaintiff issued an order for 10 wheels he was refused by the defendant for some reason or other. Consequently the plaintiff communicated with the defendant in order to break the contract. The claim of yen 8,407.50 above referred to was, continued counsel, for the 295 bicycles remaining undelivered. Counsel for the defendant stated that Mr. McGrath had no relation whatever with the company, though he might be attending the office. Counsel for the plaintiff then proposed to ask the American Consul whether Mr. McGrath was president of Vantine & Co., or not.

Mr. Masujima, however, objected to this proposal and asked the court to give judgment at once.

The court announced that the case would be reconsidered and that the next hearing would take place on the 27th inst. at 10 a.m.

In the Yokohama Chihō Saibansho on Wednesday morning, before Judge Yasuda, the hearing was resumed of the case of Mr. J. Martin of No. 239, Bluff, Yokohama, and Mr. C. K. M. Martin of No. 265, Bluff, against Mr. Ranger of No. 153 in the former Settlement.

Mr. Ideura appeared for plaintiffs and Mr. Harada for defendant.

Plaintiffs claim from defendant payment of yen 150 for hire of a steam-launch during the period from November, 1899, to February, 1900, at the rate of yen 37.50 per month and also the payment of yen 222.50 for the supply of some 40 tons of coal, which was delivered in January and February last year. Mr. Munro was called as a witness and gave evidence with regard to the hiring of the steam-launch, to the effect that he was one of the promoters of the former Maples Sanitarium, but that he had no connection whatever with the present Maples Hotel. He then stated that the steam-launch was rented

by the defendant for the period mentioned above and that even though the former sanitarium was dissolved the partners concerned are responsible to pay off all the debts signed by the sanitarium before it was wound up. Mr. Robert P. Munro, another witness, of No. 18, Hachikancho, Kyobashi, Tokyo, was summoned, and to a question from the Bench, answered that he had no relation with the present case. He stated that all the debts of the former sanitarium had to be borne by the defendant in accordance with a resolution agreed upon at the time when the sanitarium was dissolved, and that the times of delivery of the coal above referred to were correctly given.

Counsel for defendant stated that though the defendant announced that the 1st of April should be the final day for paying off the debts due by the sanitarium, yet the plaintiffs had not applied for payment.

Counsel for plaintiffs denied the above statement and said that all the debts due by the sanitarium were transferred to the defendant when the former sanitarium was dissolved, and that the defendant had agreed to pay all the debts up to the 1st of May last, adding that the statement to the effect that the 1st of April last was the final day was evidently made by the defendant for his own purposes.

The Court announced that judgment will be given on the 11th inst. at 10 a.m.

In the Yokohama Chihō Saibansho on Thursday afternoon, before Judge Kano, the hearing was resumed of the case, adjourned from the 29th ult., of Mr. F. W. Horne, of No. 70, Yamashita-cho, Yokohama, against Mr. W. S. Stone, of No. 77, claiming yen 741.02 damages. Plaintiff was represented by Mr. H. Sato and defendant by Mr. G. Akiyama.

Owing to the departure for America of Mr. Fisher, who was expected to appear as a witness in the present hearing, counsel for plaintiff moved that Mr. W. H. Stone, of the Communications Department, should be summoned as a witness, but this proposal was rejected. As previously stated, plaintiff imported, in accordance with the order of the defendant in June last year, six phonographs and six batteries, but owing to the fact that the batteries did not arrive simultaneously with the phonographs the defendant refused to take delivery of the complete plant even after the arrival of the batteries.

The Court announced that judgment will be given on the 12th inst. at 9 a.m.

TOKYO CHAMBER OF COMMERCE.

A special general meeting of the Tokyo Chamber of Commerce was held on Wednesday, the chair being occupied by Baron Shibusawa. After the reading of the report of resolutions passed at the united conference of all the Chambers of Commerce recently convened in Niigata, the various subjects selected for representation to the Government were brought up for discussion, when the items relating to the amendment of the regulations of Chambers of Commerce, the encouragement of the habit of saving money, the economic policy with regard to China, and the opening of a competitive exhibition of exports were passed unanimously. With regard to the question relating to the adjustment of the national finance, namely the introduction of foreign capital with a view to redeeming domestic loans and purchasing private railways, different opinions were expressed, and after a good deal of warm discussion it was finally passed as originally proposed. The meeting then rose, after appointing a committee for the purpose of placing the above proposals before the Government. The committee consists of Baron Shibusawa, Messrs. K. Shibusawa, K. Okura, R. Fujiyama, E. Asabuki, K. Amenomiya, K. Kimura and K. Inouye.

The Bursaries of \$100 for the best boy pupil, and \$100 for the best girl pupil, of Scotch parentage, at the Shanghai Public School, given by the Shanghai St. Andrew's Society, were won this year by Master John Peebles and Miss Winnie Lamond respectively.

AUTUMN MEETING OF THE NIPPON RACE CLUB.

FIRST DAY.—MONDAY, 4TH NOVEMBER.

PATRONS:—H. I. H. Komatsu-no-Miya, H. I. H. Fushimi-no-Miya, H. I. H. Arisugawa-no-Miya.

PERMANENT COMMITTEE:—Sir Claude Maxwell MacDonald, K.C.B., K.C.M.G., President; Dr. Wheeler, Vice-President; Mr. R. D. Robison; Mr. Jas. Dodds; Mr. F. Strahler; Baron d'Anehan; Mr. V. Blad; Governor Sufu; Mr. S. Poklewski-Koziele; Mr. T. Thomas; Mr. G. Philip; Mr. S. Isaacs; Mr. W. F. Mitchell; Mr. A. J. Easton; Count von Wedel; Mr. L. Mottet; Mr. T. Koinoye.

EXECUTIVE COMMITTEE:—Mr. A. J. Easton, Chairman; Mr. A. Bianchi; Mr. K. Mori; Mr. L. Mottet; Mr. Geo. Philip; Mr. M. Pors; Mr. T. Thomas.

Officers of the Day:—

CLERK OF THE COURSE:—A. J. Easton, Esq.

SECRETARY:—S. H. Sonerton, Esq.

JUDGE:—A. Bianchi, Esq.

ASSIST. JUDGE:—S. Warming, Esq.

STARTER:—A. J. Easton, Esq.

TIME KEEPER:—F. J. Hall, Esq.

CLERK OF SCALES:—Dr. E. Wheeler.

HANDICAPERS:—T. Thomas, Esq. and Dr. E. Wheeler.

In spite of the very cold, unseasonable and variable weather of the past fortnight, a fine spell has evidently set in to favour the Autumn Meeting of the Nippon Race Club. The Course on Monday was, naturally, after the recent heavy rains, somewhat heavy and against the probability of fast times being made, but nevertheless good sport was afforded and some indication of the qualities of the new Australian horses was given, while the form of one or two of the last season's cracks was also displayed. Among the riders Mr. Mottu again added to his numerous laurels by winning three races, and one may confidently expect to see his colours well to the fore again before the meeting closes. The attendance in the Paddock and Stand during the earlier hours of the racing was under the average, but later on filled up fairly, and the pari-mutuel and sweeps were well patronised. The arrangements were all satisfactorily carried out by the officers of the day, as named above. The events follow:—

1.—THE COSMOPOLITAN PLATE, for Country Breds and Australian Subscription Horses of 1899-1901 that have not won more than five races weight for age; winners at date of entry 5lb. extra, of two or more races 7lb. extra, entrance, yen 5; winner yen 250. Three-quarters of a mile.

Mr. Yodo's Saikio, *147lb. (Kurosaka) 1
Mr. Satsuma's Ojosama, *135lb. (Mayeda) 2
Mr. Sphinx's Fourree, *137lb. (Miyagawa) 3
Mr. May-Scherz's Brunhilde, *137lb. (Kobayashi) 0
Mr. Hugo's The Orb, *142lb. (Mr. Mottu) 0
Mr. Russia's Tola, *137lb. (Horikoshi) 0
Mr. Tatsuta's Matsukaze, *142lb. (Takahashi) 0
Mr. Cherry's Oimatsu, *147lb. (Hayashi) 0
* Mares—Allowance deducted. † Geldings—Allowance deducted.

This event brought out the fair field of eight starters, of whom Fourree was first favourite. The first attempt to effect a start was a failure, Oimatsu breaking away and causing some delay. The second was equally ineffectual, but at the third a fair start was made. Saikio, the old favourite, got the lead and kept it to the finish, beating Ojosama by two lengths; Fourree finishing third. Time 1.23½.

PARI MUTUEL, 5 yen—Brunhilde 76, The Orb 10, Tola 45, Ojosama 25, Fourree 143, Saikio 38, Matsukaze 8, Oimatsu 28; total, 1,363.50 yen—Saikio, yen 38.

2.—THE FIRST GRIFFIN RACE, for Australian Subscription Horses of Autumn, 1901; weight for age; entrance, yen 5; winner yen 250, second horse yen 50. Three-quarters of a mile.

Mr. Yodo's Tenriu, *140lb. (Kurosaka) 1
Mr. Pond's La Comtesse, *140lb. (Nakazumi) 2
Mr. Hugo's The Orbit, *140lb. (Mr. Mottu) 3
Mr. May-Scherz's Sleipner, *140lb. (Kobayashi) 0
Mr. Russia's Amoor, *139lb. (Horikoshi) 0
Mr. Sphinx's Eleve II, *140lb. (Miyagawa) 0
Mr. Tatsuta's Tsukuba, *140lb. (Takahashi) 0
Mr. News' Electric, *140lb. (Kubota) 0
Mr. Elliot's Butterfly, *139lb. (Mr. Elliott) 0

The Australian Griffins of this season made their first appearance in this race. Tenriu was a warm favourite and in the result justified the trust placed in her. At the start Butterfly made the running but the favourite soon shook off her field and came to the front. In the straight Tenriu came away and finished a length in front of La Comtesse, who had

run into second place, The Orbit finishing third. Time, 1.25½.

PARI MUTUEL, 5 yen—Sleipner 12, The Orbit 49, Amoor 67, Eleve II, 26, Kirishima 11, Electric 11, Tenriu 140, La Comtesse 7, Butterfly 18; total, 1,534.50 yen—Tenriu, yen 11.

3.—THE SECOND GRIFFIN RACE, for Australian Subscription Horses of Autumn, 1901; weight for age; entrance, yen 5; winner yen 250, second horse yen 50. Five furlongs.

Mr. Yodo's Tenriu, *140lb. (Kurosaka) 1
Mr. Robison's Tasmanian, *140lb. (Tomioka) 2
Mr. Starlight's Bucephalus, *140lb. (Ichi) 3
Mr. May-Scherz's Sleipner, *140lb. (Kato) 0
Mr. Hugo's The Orator, *140lb. (Hingaki) 0
Mr. Russia's Volga, *140lb. (Horikoshi) 0
Mr. Tatsuta's Tsukuba, *137lb. (Goto) 0
Mr. States' Kansas, *140lb. (Sugiyura) 0
Mr. Iris' Momiji, *140lb. (Rikizo) 0

Nine of the Australian griffins started for this race Bucephalus being the first selection among the team and Kansas next. At a poor start Tasmanian got away with a few lengths to the good, but was soon displaced by Tenriu who kept her place without difficulty to the finish, winning by four or five lengths from Tasmanian, Bucephalus close up for third. Time 1.09½.

PARI MUTUEL, 5 yen—Schwarzer Peter 15, The Orator 24, Volga 29, Tsukuba 16, Kansas 3, Bucephalus 220, Tenriu 100, Momiji 35, Tasmanian 27; total 2,110.50 yen—Tenriu, yen 21.

4.—THE ALL-AGED STAKES, for all Horses; weight for age; Country Breds and Australian Subscription Horses of 1899-1901 that have not won more than 5 races allowed 7lb; entrance, yen 5; winner, yen 300. One mile.

Mr. Avis' Hawfinch, *140lb. (Hakodate) 1
Mr. Russia's Mira, *140lb. (Horikoshi) 2

This race was a match between the two crack Australians Hawfinch and Mira. Hawfinch was favourite by two to one but the performances of the champion mare last season brought her many friends. Hawfinch took the lead from the start and kept it. Mira made a try in entering the straight but could not get near her opponent, Hawfinch winning by half a dozen lengths. Time, 1.50½.

PARI MUTUEL, 5 yen—Mira 190, Hawfinch 306; total 2,232—Hawfinch paid 7.50 yen.

5.—THE CRITERION STAKES, for China Ponies; weight as per scale; entrance, yen 5; winner yen 300, second horse yen 50. Three-quarters of a mile.

Mr. Hugo's Sunrise, 150lb. (Mr. Mottu) 1
Mr. Tytherleigh's Standard Rose, 150lb. (Mr. Easton) 2
Mr. Russia's Mogol, 150lb. (Horikoshi) 3
Mr. May-Scherz's Hucklebein, 150lb. (Kato) 0
Mr. May-Scherz's May-be, 141lb. (Kobayashi) 0
Mr. Tatsuta's McMorse, 150lb. (Takahashi) 0
Mr. Elliot's Excelsior, 147lb. (Mr. Elliott) 0

Standard Rose was most favoured for this race, and May-be next. The latter got away with a good start, and led to the Trees, when Standard Rose came to the front and led till half way down the straight, when Sunrise, admirably ridden by Mr. Mottu, came up with a rush and passed the post a length to the good, Mogol third. Time, 1.38.

PARI MUTUEL, 5 yen—Hucklebein 17, May-be 161, Sunrise 85, Mogol 32, McMorse 61, Standard Rose 177, Excelsior 32; total 2,545.50 yen—Sunrise 30 yen.

6.—THE GRAND STAND STAKES, for Country Breds and Australian Subscription Horses of 1899-1901 that have not won more than five races at date of entry; weight for age; winners at date of entry 5lb. extra, of two or more races 7lb. extra, of two or more races 7lb. extra; entrance, yen 2; winner yen 300. One mile and a half.

Mr. Hugo's The Coronet, *147lb. (Mr. Mottu) 1
Mr. Satsuma's Madge, *130lb. (Hakodate) 2
Mr. B. Runge's Itis, *145lb. (Kato) 0
* Mares—Allowance deducted. † Geldings—Allowance deducted.

Coronet started with a lead with Itis next and Madge, close up; the same order was kept till passing the Stand first time. Coronet then led by about 1½ lengths. Going up the hill Itis and Madge closed up a little on the leader but lost ground again at the mile and quarter. After passing the Trees Madge passed Itis and ran into second place, the latter apparently being finished. Coronet increased her lead in the straight and finished four or five lengths to the good, Madge being 5 or 6 lengths in front of Itis. Time, 2.58½.

PARI MUTUEL, 5 yen—The Coronet 302, Madge 180, Itis 178; total, 2,970 yen—Coronet, yen 10.

7.—THE FLEMINGTON Cup, for Australian Subscription Horses of Autumn, 1901; weight for age; winners at the meeting 5lb. extra; entrance, yen 5; winner yen 300, second horse yen 50. One mile and a quarter.

Mr. Cherry's Brown Bess, *140lb. (Hayashi) 1
Mr. Decimus' Merry Thought, *140lb. (Takahashi) 2
Mr. Russia's Amoor, *130lb. (Horikoshi) 3
Mr. Tatsuta's Kirishima, *140lb. (Goto) 0
Mr. States' Missouri, *137lb. (Sugiyura) 0
Mr. Elliot's Butterfly, *140lb. (Ichi) 0

This was generally presumed to be Brown Bess race, and such proved to be the case, the other starters being fairly equally backed for small amounts. The favourite walked away from the field from the start and won easily by three or four lengths. Time 2.30½.

PARI MUTUEL, 5 yen—Amoor 36, Kirishima 2, Missouri, 34, Merry Thought 58, Brown Bess 34, Butterfly 84; total 2,587.50 yen—Brown Bess 7.50 yen.

8.—THE MONGOLIAN PLATE, for Subscription China Ponies of 1901; weight as per scale; winners Japan at date of entry 5lb. extra, of more than one race 7lb. extra; winner of No. 5 Race 5lb. extra; entrance, yen 5; winner yen 250. Three-quarters of a mile.

Mr. May-Scherz's Max-Willem, 150lb. (Kato) 1
Mr. Russia's Ourod, 160lb. (Horikoshi) 2
Mr. Iris Aranami, 149lb. (Rikizo) 3
Mr. Starlight's Buccaneer, 149lb. (Ichi) 0
Mr. Pond's Iroha, 140lb. (Nakazumi) 0

Aranami and Ourod were the most favoured backers for this race. The former made the running and looked like a winner until reaching the Trees where Max-Willem came up strong and collared the former in the straight won a good race by a length Ourod having run into second place. Time 1.39½.

PARI MUTUEL, 5 yen—Max-Willem 42, Ourod 16, Buccaneer 57, Aranami 175, Iroha 68; total 2,222 yen—Max-Willem paid 54.50 yen.

9.—THE SYDNEY STAKES, A Sweepstakes of 20 each with yen 250 added; first horse to receive 75 per cent.; second horse to receive 25 per cent. for all horses; weight for age. Country Breds, at Australian Subscription Horses that have not won more than 5 races, 7lb. allowance. Three-quarters of a mile.

Mr. Hugo's The Crown, *140lb. (Mr. Mottu) 1
Mr. May-Scherz's Faule Grete, *133lb. (Kobayashi) 2
Mr. Russia's The Count, *140lb. (Ichi) 3
Mr. Norfolk's Blackberry, *140lb. (Sugiyura) 0

The Count and The Crown were pretty evenly backed for this race. Some trouble was given at the start, but the third attempt was successful, Fau Grete taking up the running and leading to the entrance to the straight, where The Crown came 1 and after a hard race to the finish won by about half a length, The Count finishing third. Time 1.11½.

PARI MUTUEL, 5 yen—Faule Grete 78, The Crown 218, The Count 261, Blackberry 57; total 2,740 yen—The Crown, yen 12.50.

SECOND DAY.—TUESDAY, 5TH NOVEMBER.

Tuesday, the second, and principal day, of the Autumn Meeting of the Nippon Race Club proved so far as the weather was concerned, most unpropitious. The morning broke bleak and dull, with threatening rain, which began to fall in a light drizzle at 11 a.m. and by the afternoon developed into drenching showers. Not only was the comfort of visitors considerably impaired, but before the end of the day's racing the Course had become so saturated and sloppy that the lighter class of horses had little chance. It was a day for the mud-larks, and heavier animals. In spite of the inclement weather, however, a fair number of visitors from Tokyo, including several Japanese and Legation officials, attended the meeting. H.I.H. Prince Kanin arrived on the ground at 1.15 p.m., accompanied by an Imperial Chamberlain and an aide-de-camp. H.I.H. was received at the gate of the compound, on alighting from his carriage, by H.E. Sir Claude Macdonald, President of the Nippon Race Club, Governor and Madame Sufu, and members of the Executive Committee of the Race Club, by whom H.I.H. was conducted to the Imperial Box on the Grand Stand. A little later on, after the conclusion of the third event, the Emperor's prize for that race was handed to the winning owner, Mr. Kirkwood, by the Prince. Mr. Watanabe, Master of Ceremonies in the Imperial Household Department, kindly acting as interpreter in the presentation. Prince Kanin, through his interpreter, expressed his pleasure in being able on this occasion to present His Majesty's prize to Mr. Kirkwood, as His Majesty had always taken a keen interest in field sports. Mr. Kirkwood, in accepting the prize, said that on behalf of himself and the members of the

Nippon Race Club he would ask Mr. Watanabe to convey to the Prince their deep appreciation of the interest His Majesty had always taken in their sports, and he would ask him also to express their great pleasure at seeing His Imperial Highness at their races. He—Mr. Kirkwood—hoped that the Prince would use his great influence in trying to obtain greater support from the Japanese of such sports as these, because he—the speaker—felt confident that the future of horse-breeding in this country depended largely on the support which His Imperial Highness and others in a similar position gave to the races.

These remarks having been interpreted to His Imperial Highness by Mr. Watanabe, the Prince shook hands with Mr. Kirkwood, and Mr. Easton called for three cheers for His Majesty the Emperor, which were heartily given, while another cheer was added for His Imperial Highness.

After the second race a protest was lodged by Mr. Easton, the rider of Aberdeen, against the rider of Mogul, Horikoshi, for foul riding in "boring" him. The protest was upheld and Aberdeen was awarded second place in the race and Mogul third. During the latter part of the afternoon the rain interfered most obviously with the enjoyment of visitors and with the sport generally, but did not prevent all the events on the programme from being fully carried out. Following are details:—

1.—THE NIPPON STAKES, for Australian Subscription Horses of Autumn 1901; weight for age; winners of Races Nos. 2 and 3 first day excluded; entrance yen 5; winner yen 250, second horse yen 50. Three-quarters of a mile.

Mr. Sphinx's Evele I, *137lb. (Miyagawa) 1
Mr. Starlight's Bucephalus, *140lb. (Ichi) 2
Mr. Russia's Volga, *140lb. (Horikoshi) 3
Mr. May-Scherz's Schwarzer Peter, *140lb. (Kato) 0
Mr. May-Scherz's Sleipner, *140lb. (Kobayashi) 0
Mr. Tatsuta's Tsukuba, *141lb. (Goto) 0
Mr. States' Kansas, *140lb. (Sugiyama) 0
Mr. Cherry's Brown Bess, *140lb. (Hayashi) 0
Mr. Pond's La Comtesse, *140lb. (Nakazumi) 0

* Mares—Allowance deducted. † Geldings—Allowance deducted.

Mr. May-Scherz declared best of his pair to win. Brown Bess, who had made a good record on the previous day, was the first favourite. The field numbered nine and there was little difference to be seen in their running till the trees were reached, when Bucephalus and Evele I. came to the front. In the Straight the latter took the lead and won a good race by a length, Volga being beaten for second place only by a nose. Time, 1.26.

PARI MUTUEL, 5 yen—Schwarzer Peter 9, Sleipner 8, Volga 6, Evele I 14, Tsukuba 6, Kansas 6, Bucephalus 53, Brown Bess 217, La Comtesse 41; total, 1,620 yen—Evele I, yen 115.50.

2.—THE SHANGHAI PLATE, for China Ponies; weight as per scale; winners at the meeting 3lb extra; entrance yen 5; winner yen 250, second pony yen 50. One mile and a half.

Mr. Hugo's Sunrise, 153lb. (Mr. Mottu) 1
Mr. Tylerleigh's Aberdeen, 150lb. (Mr. Easton) 2
Mr. Russia's Mogul, 150lb. (Horikoshi) 3
Mr. May-Scherz's Hucklebein, 150lb. (Kato) 0
Mr. May-Scherz's May-be, 141lb. (Kobayashi) 0
Mr. Tatsuta's McMorse, 150lb. (Takahashi) 0
Mr. Tylerleigh's Standard Rose, 150lb. (Jimba) 0
Mr. Elliott's Excelsior, 142lb. (Mr. Elliott) 0

Mr. May-Scher and Mr. Tylerleigh started two each; best to win. Aberdeen was first favourite and Sunrise second. Aberdeen and Standard Rose were the first to get to the front and led past the stand, with McMorse next in order. After negotiating the hill Sunrise worked to the front, while Mogul also displaced Standard Rose and Aberdeen. Sunrise increased his lead in the run home and won by about three lengths from Mogul; Aberdeen finishing third. Time, 3.30.

After the race Mr. Easton, rider of Aberdeen, protested against the riding of Horikoshi on Mogul, charging him with boring. The protest was sustained, and Mogul was disqualified for second place.

PARI MUTUEL, 5 yen—Hucklebein 8, May-be 19, Sunrise 143, Mogul 49, McMorse 67, Standard Rose 15, Aberdeen 216, Excelsior 12; total 2,380.50 yen—Sunrise, 16.50 yen.

3.—THE BRISBANE CUP, for Country-Breds and Australian Subscription Horses of 1899-1901 that have not won more than five races at date of entry; winners at date of entry 5lb. extra, of two or more races 7lb. extra; weight for age; winner of Nov. 1 Race, first day, excluded; Non-winners at the meeting 5lb. allowance; entrance yen 5; winner yen 250, second horse yen 50. One mile.

Mr. Hugo's The Coronet, *147lb. (Mr. Mottu) 1
Mr. Cherry's Oimatsu, *147lb. (Hayashi) 2
Mr. May-Scherz's Faule Grete, *147lb. (Kobayashi) 3
Mr. Tatsuta's Matsukaze, *142lb. (Takahashi) 0
* Mares—Allowance deducted. † Geldings—Allowance deducted.

The Coronet and Faule Grete were the favourites. Oimatsu made the running from the start, but at the houses Coronet came up and after a fine race in the Straight won by half a length, Faule Grete a good third. Time 1.54.

PARI MUTUEL, 5 yen—Faule Grete 236, The Coronet 334, Matsukaze 66, Oimatsu 79; total, 3,217.50 yen—The Coronet, yen 9.50.

4.—THE TOKYO STAKES, for Australian Subscription Horses of Autumn, 1901; winner of Race No. 7, first day, excluded; weight for age; entrance yen 5; winner yen 300, second horse yen 50. One mile and a half.

Mr. Robison's Tasmanian, *140lb. (Tomioka) 1
Mr. Elliott's Butterfly, *140lb. (Mr. Elliott) 2
Mr. Hugo's The Orbit, *140lb. (Mr. Mottu) 3
Mr. May-Scherz's Sleipner, *140lb. (Kobayashi) 0
Mr. Russia's Amoor, *130lb. (Horikoshi) 0
Mr. Sphinx's Evele II, *140lb. (Miyagawa) 0
Mr. States' Missouri, *137lb. (Sugiyama) 0
Mr. News' Electric, *140lb. (Kubota) 0
Mr. Decimus' Merry Thought, *140lb. (Takahashi) 0
Mr. Iris' Momiji, *140lb. (Rikizo) 0
Mr. Pond's La Comtesse, *140lb. (Nakazumi) 0

* Mares—Allowance deducted. † Geldings—Allowance deducted.

Eleven of the new Australians started for this event, Merry Thought being the favourite. After some delay at the start the favourite got away first but before the half mile was reached yielded the lead to Tasmanian, who, running strong, left his field behind him and won in a canter by any number of lengths; Butterfly finishing second and The Orbit third. Time, 3.06.

PARI MUTUEL, 5 yen—Sleipner 22, The Orbit 84, Amoor 74, Evele II 42, Missouri 14, Electric 19, Merry Thought 170, Momiji 22, La Comtesse 47, Butterfly 10, Tasmanian 160; total, 2,988 yen—Tasmanian, yen 16.50.

5.—THE NANKIN STAKES, for China Subscription Ponies of 1901; winners in Japan at date of entry 5lb. extra, of more than one race 7lb. extra; winners at the meeting 5lb. extra; weight as per scale; entrance yen 5; winner yen 250, second pony yen 50. One mile.

Mr. May-Scherz's Max-Willen, 150lb. (Kato) 1
Mr. Pond's Iroha, 147lb. (Nakazumi) 2
Mr. Russia's Ourod, 160lb. (Horikoshi) 3
Mr. Starlight's Buceaneer, 143lb. (Ichi) 0
Mr. Iri's Aranami, 149lb. (Rikizo) 0
Mr. Avis' Popinjay, 156lb. (Hakodate) 0

Max-Willen and Ourod were fairly equally favoured by backers. The former obtained a slight lead at the start and kept it to the end, though hard pressed by Iroha in the run home. Ourod was close upon the latter's girths at the finish. Time, 2.20.

PARI MUTUEL, 5 yen—Max-Willen 165, Ourod 153, Buceaneer 59, Aranami 96, Iroha 38, Popinjay 40; total, 2,479.50 yen—Max-Willen, yen 15.

6.—THE JAPAN ST. LEGER, for All Horses; weight for age; winners at the Meeting 5lb extra; Country-Breds and Australian Subscription Horses of 1899-1901 that have not won more than five races allowed 7lb.; Entrance yen 5; winner yen 350. One mile and a half.

Mr. Avis' Hawfinch, *145lb. (Hakodate) 1
Mr. Russia's Mira, *140lb. (Horikoshi) 2
Mr. Russia's The Count, *140lb. (Ichi) 3
* Mares Allowance deducted. † Geldings—Allowance deducted.

This race resulted in a match between Mr. Russia's two cracks and the mare Mira. The course was by this time very heavy and Mira's chances were small. Hawfinch consequently started a warm favourite. He went to the front soon after the start and increasing his lead won as he liked, Mira, however having secured second place. Time 2.59.

PARI MUTUEL, 5 yen—The Count 110, Hawfinch 516, Mira 212; total, 3,771 yen—Hawfinch 7.50.

7.—THE CHAMPAGNE CHALLENGE CUP, (Presented by Messrs. G. H. Humm & Co.), for Australian Subscription Horses of 1901 and thereafter, that have not run at more than two meetings; to be won three times in all by Horses the bona fide property of the same Owner or Owners, with yen 300 added by the Club until the Cup is finally won, when the Second Horse will receive the added money; weight 145lb. winners 7lb. extra; entrance yen 10. One mile.

Mr. Sphinx's Fourree, 145lb. (Miyagawa) 1
Mr. Satsuma's Ojosama, 145lb. (Mayed) 2
Mr. Hugo's The Orb, 152lb. (Mr. Mottu) 3
Mr. May-Scherz's Brunhilde, 145lb. (Kobayashi) 0
Mr. Russia's Tola, 145lb. (Horikoshi) 0

Mr. Tatsuta's Matsukaze, 145lb. (Goto) 0
Mr. States' Kansas, *143lb. (Sugiyama) 0
Fourree, the favourite, took the lead just after the start, and though challenged by Ojosama in the run home, kept it to the finish, winning by a length or more. Time 2.01.

PARI MUTUEL, 5 yen—Brunhilde 35, The Orb 241, Tola 23, Ojosama 84, Fourree 199, Missouri 10, Kansas 6; total, 2,704 yen—Fourree, yen 13.50.

8.—THE BANZAI STAKES, for Country Breds and Australian Subscription Horses of 1899-1901 that have not won more than five races at date of entry; winners at date of entry 5lb. extra, of two or more races 7lb. extra; Non-winners at the meeting 5lb. allowance. Winner of more than one race at the meeting 5lb. extra; weight for age; entrance yen 5; winner yen 300. One mile and a quarter.

Mr. Satsuma's Madge, *135lb. (Hakodate) 1
Mr. Hugo's The Coronet, *152lb. (Mr. Mottu) 2
Mr. May-Scherz's Faule Grete, *141lb. (Kobayashi) 3

* Mares—Allowance deducted. † Geldings—Allowance deducted.

Faule Grete made the running at the start and led on passing the Stand by a length. After passing the Shakespeare, however, she appeared to be finished and the race lay between Madge and The Coronet. Madge appeared to have most left in her, however, and won a good race by a length and half. Time, 2.35.

PARI MUTUEL, 5 yen—Faule Grete 149, The Count, 309, Madge 171; total, 2,830.50 yen—Madge, yen 16.50.

THIRD DAY.—THURSDAY, 7TH NOVEMBER.

At the conclusion of the Races on Tuesday the Course and the Paddock were in bad enough condition, but the continuous downfall of rain through Tuesday night and Wednesday morning reduced them to a perfect slough. It was therefore found necessary to postpone the third day's racing to Thursday with the proviso that if the rain continued a further postponement might have to be notified. During Wednesday afternoon the downfall ceased and the sun made his appearance at fitful intervals, but not with sufficient strength to effect much in drying up the course.

The racing on Thursday was, naturally, greatly marred by the rainy weather, and for the same reason the attendance was much smaller than on the previous days. Under the circumstances the track was very heavy and in consequence there were serious "surprises." The most exciting finish of the day was in the China Solace when Aberdeen and Iroha ran a dead heat for first place, May-be being next. The Champion race for All Horses was an easy win for Hawfinch, though The Coronet made a good fight for it. In the Mixed Champions Tasmanian scored quite an unexpected victory, though his win was easy. Mr. Mottu was again a lucky rider.

It is understood that there will be an Off Day next week, the exact date of which will be announced later.

Following are the events:—

1.—THE PRIX DES HARAS (Handicap), for all horses; a forced entry of yen 10 for all horses entered at the meeting; non-starters half forfeit; winner yen 300, second horse yen 100. One mile.

Mr. Hugo's The Crown, 157lb. (Mr. Mottu) 1
Mr. Russia's Mira, 148lb. (Horikoshi) 2
Mr. Russia's The Count, 140lb. (Ichi) 3
Mr. May-Scherz's Brunhilde, 130lb. (Kobayashi) 0
Mr. May-Scherz's Schwarzer Peter, 127lb. (Kato) 0
Mr. Hugo's The Orb, 35lb. (Hayashi) 0
Mr. Sphinx's Evele I, 140lb. (Miyagawa) 0
Mr. States' Missouri, 124lb. (Sugiyama) 0
Mr. News' Electric, 133lb. (Kubota) 0
Mr. Norfolk's Blackberry, 133lb. (Hakodate) 0
Mr. Yodo's Saikio, 147lb. (Kurosaka) 0
Mr. Tatsuta's Matsukaze, 131lb. (Tomioka) 0

There was a large field of twelve, which went away fairly well together, but soon got strung out. In the distance a fine race ensued between Mira and The Crown for first place, the latter winning by half a length. The Count was fairly well up. Time, 1.58.

PARI MUTUEL, 5 yen—Brunhilde 5, Schwarzer Peter 8, The Crown 128, The Orb 37, Mira 190, Evele I 33, The Count 31, Matsukaze 2, Electric 3, Missouri 2, Blackberry, 10, Saikio 69; total, 2,335.50 yen—The Crown, yen 18.

2.—THE CESAREWITCH STAKES, (Handicap), for China Ponies; a forced entry of yen 10, for all ponies entered at the Meeting; Non-starters half forfeit; winner yen 300, second pony yen 100. One mile.

Mr. Tatsuta's McMorse, 143lb. (Takahashi) 1
Mr. May-Scherz's Maybe, 137lb. (Kobayashi) 2
Mr. Russia's Mogol, 150lb. (Horikoshi) 3
Mr. Starlight's Buccaneer, 138lb. (Ichi) 0
Mr. Tytherleigh's Standard Rose, 145lb. (Mr. Easton) 0
Mr. Elliott's Excelsior, 140lb. (Mr. Elliott) 0

Maybe had a good lead from the very start and kept it up until the Trees, when McMorse went to the front and won by four or five lengths, Mogol was third. Time, 2.21 1/2.

PARI MUTUEL, 5 yen—May-be 123, Mogol 149, McMorse 129, Buccaneer 38, Standard Rose 123, Excelsior 55; total 2,776.50 yen—McMorse, yen 21.50.

3.—THE MIXED CHAMPIONS, for All Horses (except Subscription Horses of 1901) a forced entry for winners at the meeting, of one race yen 10, of two races yen 20, of more than two races yen 40; optional to beaten horses at an entrance fee of yen 25; weight for age; winner yen 500. Mile and a quarter.

Mr. Avis' Hawfinch, 140lb. (Hakodate) 1
Mr. Hugo's The Coronet, 140lb. (Mr. Mottu) 2
Mr. Norfolk's Blackberry, 140lb. (Sugura) 0

* Mares—Allowance deducted. † Geldings—Allowance deducted.

Hawfinch, the favourite, took a good lead at the start and maintaining it throughout won just as he pleased. Time, 2.28 3/4.

PARI MUTUEL, 5 yen—Hawfinch 568, Blackberry 71, The Coronet 171; total 3,645 yen—Hawfinch yen 6.50.

4.—THE CHINA CHAMPIONS, for China Ponies; a forced entry for winners at the meeting, of one race yen 10, of two races yen 20, of more than two races yen 40; optional to beaten ponies at an entrance fee of yen 25; weight as per scale; winner yen 500. Mile and a quarter.

Mr. Hugo's Sunrise, 150lb. (Mr. Mottu) 1
Mr. Tytherleigh's, Aberdeen, 150lb. (Mr. Easton) 2
Mr. Tatsuta's McMorse, 150lb. (Takahashi) 3
Mr. May-Scherz's Max-Willem, 150lb. (Kato) 0

Max Willem led at the start, with Sunrise close up, but the latter came away in the Straight, and won by three lengths. McMorse and Aberdeen raced hard for second place, the latter eventually getting the best of it by a length. Time, 3.0 1/2.

PARI MUTUEL, 5 yen—Sunrise 371, Max-Willem 107, McMorse 91, Aberdeen 204; total, 3,478.50 yen—Sunrise, yen 9.50.

5.—THE AUSTRALIAN CHAMPIONS, for Australian Subscription Horses of 1901; a forced entry for winners at the meeting of one race yen 10, of two races yen 20, of more than two races yen 40; optional to beaten horses at an entrance fee of yen 25; weight for age; winner yen 500. Mile and a quarter.

Mr. Robison's Tasmanian, 140lb. (Tomioka) 1
Mr. Satsuma's Madge, 140lb. (Hakodate) 2
Mr. Sphinx's Fourree, 140lb. (Miyagawa) 3
Mr. Yodo's Tenriu, 140lb. (Kurosaka) 0
Mr. Cherry's Brown Bess, 140lb. (Horikoshi) 0
Mr. Sphinx's Evele I, 137lb. (Ichi) 0

* Mares—Allowance deducted. † Geldings—Allowance deducted.

Mr. Sphinx declared the best of his stable to win. Tenriu and Fourree took up the running, but at the the Trees Tasmanian came away and got home with a dozen lengths to spare. Time, 2.35 1/2.

PARI MUTUEL, 5 yen—Tenriu 123, Brown Bess 67, Evele I, 18, Tasmanian 115, Madge 227, Fourree 128; total, 3,055 yen—Tasmania, yen 26.50.

6.—THE MIXED CONSOLATION for Country Breeds and Australian Subscription Horses of 1899-1901 that have not won more than five races at date of entry and have started and not won a race at the meeting; weight for age; entrance yen 5; winner yen 250, second horse yen 50. One mile.

Mr. Satsuma's Ojosama, 137lb. (Mayeda) 1
Mr. May-Scherz's Faule Grete, 140lb. (Kobayashi) 2
Mr. Tatsuta's Matsukaze, 140lb. (Goto) 3
Mr. Hugo's The Orb, 140lb. (Mr. Mottu) 0
Mr. Cherry's Oimatsu, 140lb. (Hayashi) 0

* Mares—Allowance deducted. † Geldings—Allowance deducted.

An easy win for Ojosama, though Faule Grete tried to catch her in the Straight. Time, 2.03.

PARI MUTUEL, 5 yen—Faule Grete 130, The Orb 116, Ojosama 130, Matsukaze 17, Oimatsu 185; total, 2,601 yen—Ojosama, yen 20.

7.—THE CHINA SOLACE, for China Ponies that have started and not won a race at the meeting; weight as per scale; entrance yen 5; winner yen 250, second horse yen 50. One mile.

Mr. Tytherleigh's Aberdeen, 150lb. (Mr. Easton) †
Mr. Pond's Iroha, 147lb. (Nakazumi) †
Mr. May-Scherz's Maybe, 141lb. (Kobayashi) 3
Mr. Russia's Mogol, 150lb. (Kobota) 0
Mr. Russia's Oroul, 153lb. (Horikoshi) 0

Mr. Starlight's Buccaneer, 144lb. (Ichi) 0
Mr. Iris' Aranami, 144lb. (Rikizo) 0
Mr. May-Scherz's Hucklebein, 150lb. (Kato) 0
Mr. Elliott's Excelsior, 147lb. (Mayeda) 0

This was a splendid race, resulting in a dead heat between Aberdeen and Iroha for first position, Maybe being third. Time, 2.25.

PARI MUTUEL, 5 yen—Hucklebein 12, May-be 61, Oroul 122, Mogol 39, Buccaneer 8, Standard Rose 12, Aberdeen 231, Aranami 38, Iroha 29, Excelsior 32; total, 2,650 yen.

At first Iroha was declared to pay yen 10, but after an appeal to the Committee the pool was divided between the two horses.

8.—THE GRIFFIN CONSOLATION, for Australian Subscription Horses of Autumn 1901 that have started and won a race at the meeting; weight for age; entrance yen 5; winner yen 250, second horse yen 50. Three-quarters of a mile.

Mr. Starlight's Bucephalus, 140lb. (Ichi) 1
Mr. Hugo's The Orator, 140lb. (Higaki) 2
Mr. Decimus Merry Thought, 140lb. (Takahashi) 3
Mr. May-Scherz's Schwarzer Peter, 140lb. (Kato) 0
Mr. May-Scherz's Sleipner, 140lb. (Kobayashi) 0
Mr. Hugo's The Orbit, 140lb. (Mr. Mottu) 0
Mr. Russia's Amoor, 140lb. (Hayashi) 0
Mr. Russia's Volga, 140lb. (Horikoshi) 0
Mr. Sphinx's Evele II, 140lb. (Miyagawa) 0
Mr. Tatsuta's Tsukuba, 137lb. (Goto) 0
Mr. States' Missouri, 137lb. (Sugura) 0
Mr. News' Electric, 140lb. (Kubota) 0
Mr. Pond's La Comtesse, 140lb. (Nakazumi) 0
Mr. Elliott's Butterfly, 140lb. (Mr. Elliott) 0

* Mares—Allowance deducted. † Geldings—Allowance deducted.

Fourteen horses started and they were soon strung out, the scurrying between Bucephalus, (the favourite) The Orator and Merry Thought. The horses named eventually finished in that order. Time, 1.31 1/2.

PARI MUTUEL, 5 yen—Schwarzer Peter S, Sleipner 10, The Orbit 39, The Orator 18, Amoor 30, Volga 29, Evele II, 19, Tsukuba 15, Missouri 5, Electric 4, Bucephalus 183, Merry Thought 115, La Comtesse 50, Butterfly 38; total, 2,533.50 yen—Bucephalus, yen 14.

LITERARY NOTES.

When the last mail left England Mrs. Archibald Little was busy correcting the proofs of her new book, "The Land of the Blue Gown." This is to be well illustrated, and amongst the representations will be a number of photographs taken by several amateur photographers at Shanghai, who have kindly placed their plates at Mrs. Little's disposal. The result should be very interesting.

When King Charles II. fled from Cromwell's Ironsides on Sept. 23, 1651, he escaped by turning down Lee Lane, at Bradpole, near Bridport. On Sept. 23rd—the 250th anniversary of the King's flight—a memorial-stone was unveiled at the entrance to the lane by Mr. James Penderel Brodhurst, a lineal descendant of Humphrey Penderel of Bosobell.

A second edition of Maurice Hawlett's "New Canterbury Tales," published by the Macmillan Company was called for on the day of publication in America. For English writers of a distinctly new note, America seems to afford a growing promptness of recognition. Both "Richard Yea-and Nay" and "The Forest Lovers" ran into several editions within a fortnight of their issue.

The thousands who have enjoyed Dumas' *Three Musketeers* will be pleased to learn that D'Artagnan is not a mythical personage, as some would have us believe. The Carnavalet Museum has just come into possession of a holograph by the redoubtable musketeer. It is a certificate given by "the Comte d'Artagnan, captain-lieutenant of the first company of Horse Musketeers of the King's Guard, and lieutenant-general of His Majesty's forces," to the effect that a certain De Saint Aubin de Faucriol had served under him.

"A Maid of Venice" will be the title of F. Marion Crawford's new novel, to be published by the Macmillan Company. The period of the story is the end of the fifteenth century, when the Queen of the Adriatic was nearing the time of her greatest splendor. The romantic episode with which the story deals is historically true, being

taken from one of the old Venetian chronicles. The action and interest centre in the household of a master glass blower, a member of one of the most powerful Venetian trade corporations, which had many rights and privileges.

Lord Rosebery's address at the unveiling of the Alfred statue at Winchester had a distinctly literary flavour, as was to be expected. His Lordship declared that the memorial was placed there to consecrate a great memory, to raise the standard of a great example. Alfred offered the highest type of kingship and of the English race. With his name were associated the beginnings of our fleet, our literature, our laws, our foreign relations, and our first efforts at education. He was the first Englishman who never knew when he was beaten. In history he stood as Alfred the Truth-teller. His word was his bond—a quality then rare among princes, and never too common. He was a true king, the guide and leader of his people, and the captain of their enterprises. The English race of that day became the central source of the American people, who though separated often by differences of policy, in supreme moments of stress and sorrow irresistibly joined hands with us across the centuries and the seas.

We note in the annual report of the Church Missionary Society for 1900-1902 the following reference to Dai Nippon:—With regard to Japan the period of ebb-tide, which has lasted for some years, seems to be happily at an end. The Nippon Seikokwai, indeed, has been comparatively free from the "downgrade" influences that have troubled some other Churches; but progress in conversions from heathenism has been slow. Now, however, all the prospects are brighter. There is a revived spirit of inquiry; the moral power of the Gospel is more recognised; and the General Conference of Protestant Missionaries, held at Tokyo in October, showed every sign of encouragement. Some private meetings for the deepening of spiritual life which followed it seem to have been attended with very marked tokens of the Divine blessing. In Japan especially, argumentative preaching is of little use. A full Gospel, proclaimed in the power of the Holy Ghost, and illustrated in daily life, can alone win the hearts of the Japanese. This mission has lost a zealous missionary by the death of the Rev. J. B. Brandram.

An interesting paper was read by Mr. W. W. Skeat before the Anthropological Section of the British Association upon the Sakeis and Semangs of the Malay Peninsula. These wild tribes, he explained, comprised the three divisions of Martin's classification. The first were the dark, frizzly-haired Negrito tribes residing in the northern districts. The height of the men was about 4ft. 9in., and that of the women 4ft. 5 1/2 in. Their skin was of very dark brown colour, sometimes passing into black. The head was between long and round, and the hair very dark brownish black, curling close to the scalp. It was never blue black as among Malays and Chinese. The second class consisted of the lighter wavy-haired tribes, called Sakei, in the southern districts. These had lighter colour of skin and long heads, with hair lank and wavy, often worn in a great "shock," but their height did not differ materially from that of the Semangs. The third-class consisted of mixed tribes who lived in contact with Malay settlements in the southern districts. The food of these wild tribes was mainly vegetable, consisting of wild roots and fruits, eked out by any sort of animal food procurable. Mr. Skeat described their hunting and trapping, their use of the blow gun, the bow, and darts poisoned with the sap of the upas tree, their clothing made from beaten tree bark, their huts and shelter, their musical instruments, festivals, and songs, their chiefs and medicine men, the exorcism of the devils and the tiger man, their marriages and burials, and, lastly their ideas of a future life—the wild man's paradise being the moon, which they called the "Island of Fruits."

NEWS OF THE WEEK.

Shortly before five o'clock on Monday afternoon a violent earthquake was felt in Yokohama, but we have not heard of any damage being done.

For three days commencing on the 10th inst., the Kagacho Police will carry out the destruction of ownerless dogs in the former Settlement. In consequence, owners of dogs are warned to take steps to fasten collars round their animals' necks.

The *Muenichenier Zeitung* on Oct. 15th printed a despatched from Huversum which said that Mr. Kruger, in spite of all denials, was seriously ill.

Captain Chapman, who commanded Itala fort in the late fight, has been noted for the Brevet rank of Lieutenant-Colonel on his promotion to the rank of Major. Five Distinguished Service Orders and twelve Distinguished Conduct medals have been awarded for the Itala and other affairs.

The *Kobe Herald* prints the following London telegrams under date, Oct. 31st:—The Schley Enquiry is concluded. It is believed that Admiral Schley will be completely exonerated. —The Buffalo Exhibition is expected to reveal a deficit of about ten million dollars.—There is great excitement amongst the South Wales miners who are taking legal proceedings against the restrictions placed upon the output.

In April next, an International Fine Arts Exhibition will be opened in Turin. In this connection, a wealthy merchant of that city, recently came to this country for the purpose of inducing Japanese artists and business men to forward articles to the exhibition. The Italian merchant is now said to be endeavouring to enlist the support of Mr. Naganuma Shukei, a sculptor, who made the acquaintance of the foreign merchant while visiting Italy.

The death is announced of General Sir Lloyd William Mathews, Premier of Zanzibar. The deceased, who was only 51 years of age, was one of the few British officers in the service of native potentates. He was created K.C.M.G. in 1894. He served in the British navy from 1863 to 1881, serving in the Ashantee war of 1873-4. He entered the service of the Sultan of Zanzibar in 1878, and was Consul-General of British East Africa in 1891. At the time of his death he was President of the Ministry and General in the army of the Sultan of Zanzibar.

The most severe and havoc-wreaking typhoon known in the Philippines for twenty years, with but one exception, occurred on the 13th ult. The damage which has resulted, says the *Manila Times*, is widespread and devastating, though at present its full extent cannot be learned. Enough is known, however, to hold out most dire augury. At least three American soldiers have lost their lives, and many natives have perished, houses and shipping have suffered severely, and nearly all the telegraphic wires are down.

There is news to the effect that a contract was signed on Tuesday between the Naval Authorities and the Kawasaki Shipbuilding Yard of Kobe, whereby the latter undertakes to construct two first-class torpedo-boats within two years from the day of the signing of contract. According to the contract, each boat will be of 120 tons, with a speed of 28 knots, and the cost of construction is put at *yen* 290,000 per boat. It is understood that the boats will be built entirely of materials produced in this country. This is said to be the first enterprise of the kind undertaken by a private shipbuilding company in this country.

The following report will be presented to the shareholders at the thirty-fifth ordinary meeting, to be held on Tuesday, the 12th Nov. in Hong-kong:—The net premia amount to \$1,380,796.37, and the working account shows a balance at credit of \$514,805.07, which sum the directors recommend be appropriated in the following manner:—A dividend of 16 per cent. to shareholders (\$4 per share) \$96,000.00; a dividend

of 15 per cent. on contributions, payable to all contributors of business whether shareholders or not, 125,000.00; to be carried to new account, 293,805.07—\$514,805.07.

We are asked to say that in case of unpropitious weather the Garden Party which Sir Claude and Lady MacDonald propose giving on Saturday to celebrate the King's Birthday will not take place.

The death is announced, under sudden and tragic circumstances, of the well-known Dr. E. W. Way, of Adelaide. His death was due to heart disease, and occurred, strangely enough, while he was engaged in operating upon a patient in his private hospital. He died with the operating knife in his hand.

The accouchement of the Queen of the Netherlands is expected to take place in January (a month before the Duchess of York). If five years had passed without Queen Wilhelmina giving birth to a child, her marriage would have been dissolved by the Dutch Parliament. The Constitution of Holland also provides that, if the Queen has a son, she is to abdicate in his favour when he reaches the age of eighteen. The whole of Holland is agog with the hope that there will be a son and heir to the throne. Most of the Queens and Princesses of Europe are engaged at the moment in preparing some suitable present for the occasion.

It is with regret that we have to announce the death of Mr. Frederick Howard, says the *North-China Daily News* of the 29th ult., who has for many years been pilot in Shanghai. Mr. Howard had not been in good health for some months, but had been able to attend to his duties and his death was quite unexpected. He left Shanghai on Sunday morning, having been called to Woosung to bring the steamer *Eltrickdale* up the river. He went on board the steamer and had brought up as far as the Oil Wharves, when he suddenly fell down dead on the bridge. Just before his death, he was seen to wave his hat to a friend on a passing steamer. Deceased was 50 years of age and had been in the East for years. Until eight years ago he was in Japan, in the service of the Nippon Yusen Kaisha.

A Kobe message to hand says that the steamer *Ise Maru*, which returned to the port on the 4th inst. from Vladivostok, brought news to the effect that as the result of a protest advanced by Japan the Russian authorities have withdrawn the imposition of high tonnage dues which it was proposed to charge against vessels entering the Russian port. This step had been practically carried into effect soon after the departure of the steamer *Yamashiro Maru* from Vladivostok on the 14th of last month, and on the 24th ult. when the *Ise Maru* entered Vladivostok she had to pay duty at the usual rate of *yen* 0.15 per ton. The same message adds with regard to the proposed increase of the customs tariff at Manila, where the higher rates were expected to be enforced on and after the 15th inst., the authorities there are reported to have decided to postpone the enforcement of the new tariff for a period of 60 days, so that the proposed measure will not be carried into effect until after the 15th of January next.

The attempt of Count de la Vaulx to cross the Mediterranean in a balloon, which left Leis Sablottes, near Toulon, appears to have failed. The Minister of Marine, M. de Lanessan, has received a despatch from Toulon announcing that the cruiser *Du Chayla*, which was escorting the balloon, is returning to port with the balloon and her passengers which she picked up 10 mile east of St. Laurent lighthouse. The balloon was uninjured. The result of the experiment does not cause any surprise after the news brought to Marseilles by steamer on the morning of Oct. 15th that the southeast winds which were blowing out at sea, would carry the balloon to the coast of Spain or to Gibraltar. Moreover, the latest news from the passengers of the balloon indicated that it was proceeding very slowly. These two factors probably caused the Count to abandon his attempt.

AMERICAN TOPICS.

Mr. McCormick, an intimate friend of the late President and whose wife is a family connexion of the latter, delivered an address at the funeral service in the British Embassy Chapel in Vienna, and related the following interesting incident:—

"It was my privilege to know Mr. McKinley personally for over ten years, and I can truthfully say that a purer and a gentler soul I have never met. Thirty years of harassing public life, full of dangers, pitfalls, and deceits, left him with a heart as unchilled and a sympathy as unchecked as it was on the day when, as a boy of 18, he joined his regiment to go and fight for his country. His religious faith was as complete and steadfast as it was broad and generous. Once, at the beginning of the last war, when he had worked late into the night, as was his custom, he pushed back his chair and closed his desk wearily, and the Adjutant-General who was sitting beside him said 'You are tired to death, Mr. President.' He paused, and then said in a low voice, 'Yes, and I could not keep it up, Corbin, did I not feel that I was doing the work of the Master.' This perfect faith sustained him in his supreme hour, and as one who wraps the draperies of his couch about him he closed his eyes upon this world, calm in the belief of an immortal awakening."

It is now alleged that the gun-boats to be built for the United States in Japan number 13, and that the work has been entrusted to the Mitsu Bishi, the Ishikawa-jima, the Kawasaki and the Uraga Dock Companies. The material will be sent from America, but it is considered cheaper and quicker to have the work done in Japan than in the United States.

Senator Allison, of Iowa, is reported to have said at Chicago that Congress will make a thorough investigation into Anarchism this winter, and will do its utmost to pass suitable laws for the prevention of such crimes as that committed against President McKinley. A statute forbidding any gathering of Anarchists will probably be passed.

Mr. Seth Low, President of Columbia University, has been nominated for the Mayoralty of New York, by the Republican Party and the Anti-Tammany reform organisation known as the Citizens' Union. Mr. Low is popular with the Independents and Republicans alike, and is the strongest candidate the anti-Tammany forces could have put forward.

Poor's Manual, just issued, shows that the total mileage of American railroads at the beginning of 1901 was 194,975 miles. The net increase mileage during 1900 was 3,503 miles, being larger than in any year since 1892, except in 1899, when over 4,000 miles were added to the mileage of the country. Earnings of all roads for the year amounted to \$551,020,460, and the payments \$458,460,571, leaving a surplus over fixed charges and miscellaneous payment of \$92,559,889.

Miss Ruth Charlotte Dana, who died in Boston recently, bequeathed \$5,000 to Archbishop Williams to establish a scholarship in the American college at Rome for students for the priesthood from the Boston archdiocese. This is to be as a memorial of her brother, Richard H. Dana. A further bequest of \$5,000 was given to the archbishop for establishing a scholarship in the Catholic university at Washington for a like purpose, and \$2,000 was given to the rector of Boston college as a scholarship for students preparing for the priesthood.

The United States steel corporation has issued a statement of its business for the first six months of its life. With net earnings of \$54,954,871 up to the end of September, it has allowed \$7,600,000 for interest on bonds \$7,059,705 for sinking fund purposes, paid dividends on the common and preferred stock for the first and second quarters, amounting in the aggregate to \$27,968,224, and still retains a surplus of \$12,326,742 for the half year. This represents an income, over and above operating expenses, of more than ten per cent. The capital stock of the trust is \$1,100,000,000, half in common and half in

preferred, in addition to the funded debt, consisting of \$304,000,000 in five per cent. bonds, making a grand total of \$1,404,000,000. At the present time there is outstanding \$507,675,300 of the common stock and \$509,498,500 of the preferred stock.

It is understood that the Canadian Pacific Railway authorities have under consideration an immense scheme of irrigation for the Canadian northwest, by which it is proposed to make a good farming and grazing country out of millions of acres which now lie dry and arid. These barren lands lie between Calgary and Medicine Hat, immediately to the north of the railroad line. It is likewise understood that as an experiment 300,000 of the 3,000,000 barren acres will be put under irrigation. The plan includes the building of a dam at Bow River, a mile east of Calgary, and intersecting canals. The force of gravity is relied upon to do the rest of the work.

As is well known, October is the largest month for disbursements in the U.S. outside of January and July. According to the *Daily Stockholder*, interest became due during the month on bonds whose par value is \$1,293,095,237, the amount of such interest being \$28,941,172, as compared with \$27,448,172 last year, \$25,189,799 in 1896, \$24,073,774 in 1898 and \$24,983,721 in 1897. Dividends have been declared on stocks whose par value is \$1,929,283,929, and the amount of such payment is \$35,805,965, as against \$30,277,965 last year. \$20,456,574 in 1899, \$18,480,610 in 1898 and \$14,673,035 in 1897. Total payments reach \$64,757,137, as against \$57,726,137 last year, \$45,646,373 in 1899, \$42,554,384 in 1898 and \$38,650,256 in 1897.

Dr. William C. Gray, the editor of the *Interior*, died September 29, at his home at Oak Park, a suburb of Chicago. Dr. Gray underwent a surgical operation just before he left Chicago for his summer vacation in the Wisconsin woods. When he returned, a few weeks ago, he was in a weakened condition, due not only to the operation, but to the growing infirmities of age. Dr. Gray was one of the foremost Presbyterians of the west, and had been identified with the *Interior* for more than thirty years. His "Campfire Musings" and editorials were widely read. He was born in Butler county, Ohio, in 1830, and began his newspaper career as the editor of the *Maine Democrat* in 1851. Two years later he established the *Tiffin (Ohio) Tribune*. After one year as editorial writer on the *Cleveland Herald*, he became, in 1863, the editor of the *Newark America*, retaining this position until 1871, when he formed his connection with the *Interior*.

John George Nicolay, the author and private secretary of President Lincoln, died at Washington, September 26, aged seventy years. He was born in Essingen, Bavaria, on February 26, 1832, and came to the United States with his father in 1838. For some time he lived in Cincinnati, where he attended the public schools. Mr. Nicolay went to Springfield, Ill., in 1857 as an assistant to the secretary of state, and when Abraham Lincoln was nominated for the presidency he became his secretary. After the election he was appointed private secretary of the president, and served in that capacity until the assassination of Lincoln. From 1865 until 1869 he was United States consul at Paris, and on his return edited for a time the *Chicago Republican*. He was marshal of the United States supreme court from 1872 until 1887. Mr. Nicolay was the author of a "Life of Abraham Lincoln," which he wrote in collaboration with John Hay. "The outbreak of Rebellion" is another of his works. He also contributed to the *Encyclopaedia Britannica* the biographical sketch of Abraham Lincoln.

The report of the New York Clearing House for the year ending September 30th is a record of phenomenally large dealings, effected with a minimum of actual cash, and with an entire absence of friction or unnecessary disturbance. The following tabulation presents the total clearings for nine years, together with the aggregate balances paid in cash by the banks and the average daily clearings:—

	Clearings.	Balances	Aver. daily clearings.
1901 ...	\$77,020,672.493	\$3,515,037.741	\$254,193,638
1900 ...	51,964,588.572	2,730,411.810	170,936,146
1899 ...	57,368,230.771	3,085,971.370	189,961,029
1898 ...	39,853,413.047	2,338,529.016	131,529,418
1897 ...	31,337,760.947	1,908,901.808	103,424,953
1896 ...	29,350,804.883	1,843,289.239	96,232,442
1895 ...	28,264,379.126	1,806,574.349	92,670,095
1894 ...	24,421,380.864	1,585,241.634	79,704,425
1893 ...	34,421,380.869	1,696,207.176	113,978,082

The aggregate clearings for the year just ended were the largest on record, exceeding those of 1900 by \$25,000,000,000, while they were \$20,000,000,000 larger than the total for 1899.

The friends of civil-service reform are expressing a belief that the spoils system has met a vigorous and uncompromising foe in the new President, for "with the merit system," as the *Pittsburg Post* (Dem.) points out, "the President has been associated from the time it became a great public question." His connection with it is sketched by *The Post* as follows:—"He was largely instrumental in its adoption by the State of New York in 1884. As President of the United States Civil-Service Commission, from 1889 to 1895, under the administrations of President Harrison and President Cleveland, he applied it with the greatest fidelity, intelligence, and practical skill. As president of the police board in New York City he enforced it. As governor of New York he saw that it took no 'step backward,' but made progress. Therefore it is not too much to expect that he will apply his energies to its enforcement in federal administration as it has not been since Cleveland's time." The *Chicago Journal* (Ind.) remarks that on the question of civil-service reform the President is "absolutely sound," and that "the people may rest confident in the belief that the 'spoils system' is dead." Many other papers express the same view. The Washington correspondent of the *St. Louis Globe-Democrat* (Rep.) says that not long ago Mr. Roosevelt, in talking with a confidential friend regarding the national civil service, pointed out where the merit principle could be still further introduced, much to the advantage of the nation, by bringing under it the consular service, the pension-examining surgeons, and later, with the consent of Congress, fourth-class postmasters.

GENERAL BULLER.

We extract from San Francisco papers the following references to General Buller and his speech. The first occurs in a London telegram of Oct. 10th and reads:—"General Buller, in a speech this afternoon, complained of the general criticism, especially in the newspapers, of himself. He admitted that he had advised General Sir George White that it would possibly be necessary to surrender Ladysmith, but, bearing in mind all the circumstances of the case, he was quite prepared to let the public judge of the justifiability of the newspaper attacks."

A London despatch of Oct. 11th said:—

The storm caused by General Buller's remarkable outburst continues to grow. The speech is the one topic of discussion and there is general anticipation that disciplinary measures will follow unless General Buller himself takes the advice of such a conservative supporter of the Government as the *Standard* and resigns.

The tone of the press is generally one of surprised amazement at his indiscretions. The people of England, generally, stuck to him throughout, and his and his wife's social influence has been most powerful and has even reached the court. It had been decided that he would be elevated to the peerage on the next honour list, but it is now doubtful if, after yesterday's confession that he advised the surrender of Ladysmith, "a humiliation compared with which," as the *Standard*, says, "all other reverses of the war would have been trivial," even the King and the people will continue to favour him.

General Buller's speech, pathetic in its weakness, is, the *Spectator* asserts, "the best possible justification for the declarations that he is not fit to command an army corps."

The *Saturday Review* refers to his "petulant apology" as "sheer feminism," adding: "The mysterious conspirator who issued threats at Aldershot might have come from De Quincey's 'Confessions.' The demand that he be shown a better commander

than himself savoured of the challenge of a nav the ring."

Sir Walter Peace, Agent-General for Natal, speaking in London to-night referred to the unfortunate utterances of Sir Redvers Buller and said:

"It must ever be remembered to General Buller credit that he saved South Africa for Great Britain. But for his change in the plans on his arrival at Town there is no doubt the Boers would have down to Durban, and in that case, in the big what has since happened, there is no doubt the Dutch would have risen and the British have driven from South Africa."

Another message of Oct. 12th read:—"The South African campaign has a curious effect on the Generals. Public attention is centred on General Buller's extraordinary exhibition, while social gossiping about the remarkable action of another General. This one is a Knight Commander of the Bath, holding a high command in South Africa. He is over 60 years of age, has been a widower for years and has engaged himself by letter to a woman of 50 whom he has not seen for twenty years. The bride-elect, who is an Irish woman, is preparing to go out to South Africa."

As for General Buller, he seems to have for shattered every vestige of his reputation. It is led that previous to General Buller's speech of 7th day he had received several plain hints from the Office expressing the hope that he would accept invitations to make speeches. His appointment to the command of the army corps was in a spirit of generosity. It was thought that General Buller could not do much harm in the two years remaining before he retired. Failure to appoint would have signified a public disgrace, which War Office was not willing to inflict on him, believing that General Buller had done his duty to the best of his ability.

One of the highest officials connected with the ministrations of the Army said:—"The utilitarian spirit of the age has taken away those sincerities, as Governor of Tilbury and Commander-in-Chief, with which, 100 years ago, Buller had been shelled, and at the same time rewarded. We had no alternative but to reward General Buller for his long and conscientious period of service by kicking him out or giving him a command which his demands. Of the two evils we chose what we thought was the lesser. Our justification is, perhaps, so what sentimental, but no army can be run without certain amount of sentiment."

As for the public dissatisfaction with our progress in South Africa, I fear that Lord Roberts and his optimistic prophets are, unintentionally, more to blame than any one else. No one got up and said that the Burmah war was over, or that it would over in a foolishly short space of time. It is nearly four years, and the British public took it as a matter of course. The South African war has barely got another two years to run, developing the Burmah affair, into a subaltern's campaign, continual local disturbances are being put down by small garrisons. To supervise such work we lack of no one better than Lord Kitchener. The complaint, which seems to have missed the attack of the critics, is that, having non-combatant populations in the war area, he is prohibited from trying supplies to any degree of military thoroughness. If we could concentrate or deport the natives I think an effective devastation would quickly the campaign."

CORRESPONDENCE.

THE CHINESE INDEMNITY.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Allow me to say that you are quite mistaken to call the bond, which was handed to the diplomatic body at Peking on the 13th ult., *gold warrants*, because the document is only on number. It would be better to name it the "sur coupon." For the coupons for smaller amounts of bonds will be made out afterwards by the Chinese officials designated for that purpose.

A CONSTANT READER.

Tokyo, November 1st, 1901.

ROADS IN TOKYO.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—My attention has been drawn to your note under the above heading, in your issue of Monday, Oct. 28th, in which you state that "Mr. Holm's programme is limited to showing how the matter should be used to the best advantage." Here are altogether mistaken; I have never, in any of my ever said or wrote hinted at such a limitation.

If the authorities will have 50 *taels* of the stone being so freely used as foundation material broken and sifted according to my plans, I will let their men how to face up 1,000 *taels* of road-sur-

that shall be quite sufficiently good to illustrate my system, and probably prove to be sufficiently durable to stand the comparatively light traffic in these streets for a long time.

As to the exact locality where really good material may be obtained I must at present remain silent, but I have absolutely no doubt that you are mistaken in saying that it is unobtainable except at prohibitive rates.

I remain, Your obedient servant,

GERVAS HOLMES.

25 Tsukiji, Tokyo, Oct. 30th, 1901.

(Would it not be an immense expense to break-up the blocks of stone now being used for foundations? Of course it was to broken stone that we alluded when we said that Mr. Holmes' programme was limited to showing how the materials should be used to the best advantage and that he did not show how the materials, where to be obtained. He now says that we are "altogether mistaken" and yet admits that he "must remain silent as to the locality where really good material can be obtained." We fail to see the mistake. At any rate, Mr. Holmes must not think that we oppose him. We are heartily with him, and we shall be delighted to learn that we are wrong as to the costliness of procuring broken stone. — *En. J.M.*)

TO THE EDITOR OF THE "JAPAN MAIL."

Sir,—You have, I see, been good enough to publish my note *in re* road material in your to-day's issue: your editorial comment thereon is peculiarly satisfactory. You begin by asking, "Would it not be an immense expense to break up the blocks of stone now being used for foundation?"

I hope it would, because if the stone proves difficult and expensive to break, it proves almost to a certainty that it would turn out to be good road-making material, and from observations I have made during the last few days I begin to think that this would prove to be the case.

Anyway I am now sure that it would be quite good enough for experimental purposes.

As to the actual cost of breaking and sifting, I suggested in one of my numerous papers, that steam stone-breakers would probably be the cheapest way of accomplishing this object, but that in their absence convict labour might be usefully employed on this work.

As to the actual locality where good road-material may be obtained, I am informed that the province of Idzu contains any quantity of it.

In conclusion, I may say that I hope you will use your powerful influence to the utmost with the "Powers that be," to induce them to give a fair trial to plans that promise to abolish dust, mud and loose-stones, present a smooth clean surface for use in all weathers; a surface that shall afford ease, peace, and comfort not only to those who use the roads, but to those who live near them and pay for their construction and maintenance; and that at vastly less expense per tsubo than is now being expended on the attempt to arrive at the same point by a road that leads in a diametrically opposite direction.

I remain your obedient servant,

GERVAS HOLMES.

Tokyo, Tsukiji, Nov. 4th, 1901.

CUSTOMS INFORMATION.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir,—Will you accord us the courtesy of your columns for inserting the pamphlet enclosed herewith which has been translated to give information to passengers coming to the ports of Japan. Thanking you in anticipation.

Yours faithfully, DIRECTOR'S SECRETARY.
Yokohama, 5 Nov. 1901.

NOTICE TO PASSENGERS.

The following rules are translated for the information of passengers coming from abroad to any open port of the Empire of Japan:—

I.—All articles coming from abroad as personal effects or passengers' baggage shall be examined by the Customs Officer at the port of arrival.

II.—No formal entry is required for personal effects actually brought by passengers, but the latter shall make a verbal declaration of the contents of their baggage before the examination is commenced.

III.—Dutiable articles not declared and so concealed as to indicate an intention to evade the duty are forfeitable and the offender is liable to a fine corresponding to three times the amount of the duty which he has evaded or attempted to evade.

IV.—Passengers who have attempted to import prohibited articles or have imported them are liable to a fine corresponding to the value of the articles, and these articles are forfeitable.

V.—The importation of the following is prohibited by Law:—

a. Adulterated drugs, chemicals, medicines, food, and beverages, considered to be injurious by the Laws, Ordinances, and Regulations of the Empire.

b. All articles for use in smoking opium.

c. All articles which are considered to be dangerous to the public health for sanitary reasons or to

the safety of animals or plants, under the Laws, Ordinances and Regulations of the Empire.

d. Counterfeit coins of any kind and imitations of coins which might be considered to be counterfeit coins.

e. Articles infringing patents, designs, trade-marks, or copyright Laws of the Empire.

f. Opium and leaf tobacco.

g. Prints, printed books, paintings, engravings, carvings, or any other articles which might be considered dangerous to public security or morals.

VI.—The following articles are passed free of duty as personal effects, in certain quantities which depend upon the discretion of the Customs Officer:—

a. Clothing, shirts, gloves, stockings, hats, shoes, handkerchiefs and other personal effects of the kind.

b. Watches, umbrellas, canes, or sticks, bracelets, rings, hair ornaments, neckties, tobacco cases, towels, table cloths, articles of stationery, bicycles, pistols, sporting guns, musical instruments, toys, &c.

c. Toilet articles, cameras, portable telescopes or opera glasses, deck-chairs, food-baskets, portable dinner sets, portable drugs, trunks, blankets, &c.

d. Comestibles, beverages, tobacco (wines and spirits of any sort which do not exceed two pints of each kind. Tobacco which does not exceed in quantity thirteen ounces of cut leaf or one hundred pieces of cigars, two hundred pieces of cigarettes or six ounces of snuff).

VII.—The following are free of duty:—

a. Books, atlases, maps, charts, journals, and newspapers, &c.

b. Negotiable papers.

c. Gold and Silver (bullion and coins).

VIII.—No duty shall be levied on articles temporarily imported for the professional use of travellers, engaged in scientific researches, or on those imported as samples by commercial travellers, provided that security corresponding to the amount of duty is deposited at the time of importation and the said articles are re-exported within six months from the date of importation.

IX.—A passenger may apply to the Customs Officer at the port of his first arrival for a certificate of examination to be pasted on his baggage in order to have the baggage passed without examination at the next port.

X.—Any baggage not withdrawn from the Customs compound within seventy-two hours from the time of its landing shall be taken into the customs warehouse at the expense and risk of the person concerned.

A BOER TESTIMONY.

TO THE EDITOR OF "THE TIMES."

Sir,—Having observed that the Continental Press is continually accusing the English trooper in South Africa of cruelty and of all kinds of immoralities, and having seen lately in your columns some able refutations of these aspersions, written by British officers, I thought it might interest your readers to hear also the unbiased testimony on this matter from the other side as well. I write these lines out of the midst of the theatre of war, where we hear yet very frequently the booming of cannon, and after an experience of 13 months of daily contact with the much-accused Tommies. My only aim in doing so is to be just against all men, believing that the spirit of fairness stands above politics and party strife.

Our farm being situated in some cosy valley of the Magaliesberg range, at the foot of some important strategic positions, and these having been held from the very first of the struggle by the Imperial forces, we had the opportunity of seeing large numbers of men of a great many different regiments. At one time we counted detachments from all parts of the world encamped on our farm around our dwelling. The New Zealanders alongside of the Canadians, the European Regulars with the African Volunteers, the Indian born men with the Australians, all were there; truly a wonderful sight! Here, not 50 yards away from our plantations, you could see long rows of cavalry horses; a little higher up hundreds of little sheds made with branches for protection against the icy blast, with camp-fires everywhere; further up the hills all was full of infantry, the men contriving with stones and grass to make a sort of sheltered lair to sleep in. The whole day long lines of horses and men would come down to our house for water. Numbers of Tommies would be seen about in all possible costumes having a thorough good wash, enjoying immensely our fine stream of spring water; then soaping and rinsing their clothes with the dexterity of a laundry-maid, and keeping up all along a merry talk about the weather, the new country, and "them rascally Boers," wondering when these would have "enough of it."

Now, mind, in June to August, when the troops came first here, our climate is intensely dry, and the wind can be at times so fearfully cold that if unprotected or underfed one can easily freeze to death

during the night. The troops having tramped a thousand miles through barren plains, constantly enveloped in a cloud of dust, camping throughout without tents, with only a biscuit and a half a day, and some chance tough beef suddenly emerged into our sunny and fertile valleys and found themselves encamped almost at arm's length opposite beautiful plantations of orange trees. In many thousands their luscious fruit hang during these months in enticing clusters and seem to invite the passers-by to help themselves. The craving for some refreshing fruit or vegetable must have been almost irresistible after the miserable rations the men had during many preceding weeks. What was more natural than that I should have considered the present temptation too great for even the best of disciplined troops, so that I fully expected to see our fruit crop disappear as by magic during the first days. But what happened? Very soon some of the commanding officers came to our house to pay their respects, and most affably requested us to inform them immediately if any men were found trespassing in our gardens. Fancy our surprise at such courteous treatment from a conquering foe. Of course it became then a real pleasure to us to give with full hands fruit to the thirsty Tommies, and also a great many came to the house for buying the same, along with any other farm produce obtainable. Many a time when wanting bread and we handed them a large loaf they would offer us a half-crown for payment; and when we returned them 1s. 6d., saying that 1s. covered our cost, and that we did not want to make a profit on them, they would protest and bargain with us for paying more. All the while, for months the men crossed and recrossed our courtyard, where scores of fowl, ducks, and turkeys were walking about in undisturbed security; many of these, following their natural instinct, would wander far from the house up among the soldiers' camp, or along the rows of horses, scratching and finding a rich harvest. What would have been easier to the hungry men than to catch quickly some of these fat birds and replenish their scanty larder? Yet it is a positive fact that never, never a single bird was found missing up to the present day.

With the fruit it was almost the same, only a few rare exceptions coming to my notice, and these finished generally to everybody's satisfaction. As an example, I may state that one day a corporal and about eight men with a mule-wagon were sent out for firewood, and passing one of our plantations three or four Tommies slipped through the fence and filled their shirts with oranges. Just when they were returning, looking like "sausages de Bologna," I saw them and called out, "Hallo! good friends, what are you doing here in my gardens, stealing my fruit?" "Oh, Sir," they pleaded, "forgive us, we were so awfully thirsty. But we will pay for the fruit, sure, please say how much you want?" "Now look here, my men," I said, "if you pass here again and are thirsty just come up to the house yonder and I will give you plenty of fruit, but don't act as thieves again." And when I gave them back the oranges, which they had ruefully returned, they drove off with a thousand thanks as so many happy children.

At another time I found a killed corporal with a few men enjoying quietly with deep feeling my grapes, hanging temptingly near the path, where the patrols had to pass. His shoulders were as Table Mountain, his face as broad as the full moon, but covered with freckles and surrounded with a red fringe of a beard, the whole supported by two hairy, banded legs, thick as tree trunks. "Now then, Corporal Sandy," says I, "what would you say if I came with a couple of Boers into your garden in Scotland and stole your apples? Is that fair to steal my fruit?" "Och, Sir," says Sandy, "steal, steal you say, Sir? I never stole in my life yet! I did not steal, Sir, I only took a few grapes; that's all." "Well," I rejoined, "you'd better ask your mother, when you get home, if there is a difference between stealing and taking; but meanwhile don't take any more of my grapes, please." "Thank you, Sir," says Sandy, with a cunning twinkle and smacking his lips, "that I will," and off he strode with his men. After this episode he was for a few days a bit shy, but, seeing that I was not angry, we became soon the best of friends.

In this way we got into the best of terms with all the men, and when on Sundays we sent them up to the hills as a present a quantity of oranges, a few for each man, their gratitude was unbounded. Yes, instead of robbing our orchards, they kept a sharp look-out for any possible intruders, and would have fought in earnest defending our fruit if required.

When De Wet was hard pressed and chased along our district, large divisions of cavalry passed us. The men were exasperated by the duplicity of their opponents, tired out by continual fighting and riding, soiled and torn, covered with dust and mud beyond description. The plain was covered with many thousands of men and horses, and during the few hours stoppage the men had to find out for themselves where they could procure forage and eatables. Kiles up to us one day a tall young lieutenant with a squad

of men and demands roughly and peremptorily all my forage. If a powerless civilian like me were to reply in the same tone to a lot of hungry and suspicious men, as these were, the most serious consequences would have been unavoidable. I therefore answered quietly that against a receipt I would give them what they required. I kept always a good supply of refreshing lemonade at hand, and when I caused this drink to be handed round to the thirsty men along with soup, whilst the forage was counted off in the barn, the whole scenery changed. Instead of stealing my eggs in the outhouses, as they had begun doing, they stopped short and protected us against the depredations of the following squads. To the officer I offered a bedroom for a thorough wash and a good dinner *en famille*, which he thankfully accepted. He enjoyed immensely our wholesome home fare with plenty of vegetables, delicacies seldom met with when on the warpath, and altogether he passed a very pleasant hour in our midst. On leaving he begged me three times to forgive him his rudeness, and we parted as the best of friends. Poor young man! Very shortly afterwards he fell in action not far from here, and we recognized with sadness his portrait in the *Graphic* among the obituary pictures.

During certain periods of the war eatables were so scarce in these parts that one would see aristocratic young officers of crack cavalry regiments in patched and soiled khaki uniforms driving about the farms in old rickety carts, looted somewhere, looking for all the world like common pedlars. They would ask shyly and awkwardly for eggs, butter, bread, or anything eatable, and if money was refused they would offer in exchange rock-cocoa, jams, and such like delicacies, which, although they looked old and knocked about a good deal, generally "fetched" the ladies. Sometimes most amusing scenes took place at such barterings. One day three young beardless lieutenants of the Life Guards were before our house trying hard to obtain some eatables of any kind. Touched by their entreaties the lady of the house suddenly appeared on the verandah with a beautiful ham, which she was willing to dispose of. This made a profound impression on the gallant warriors, who vied with amusing earnestness to overbid each other for obtaining the precious ham. And when at last after much laughing and joking one of them secured the prize, he rode off as proud and happy as a king.

Let me state here, once for all, that the whole war through all the British officers, of whom a great number of all ranks visited us, treated us with the utmost kindness and courtesy, although they knew me to be a burgher, having had several sons doing their duty at the front, fighting for the country's independence.

Coming back once more to the general behaviour of Tommy Atkins, we have seen many convoys, some more than ten miles long, carrying off large numbers of prisoners and Boer families to Pretoria. The Tommies would be seen everywhere, guarding the wagons, tramping along patiently in clouds of dust, or ankle deep in the mud. Far from being harsh and unfriendly with the women and children, as frequently accused, we heard the very opposite from reliable friends and from our own children. During the "outspans" the Tommies would prove themselves the most kindhearted and obliging fellows imaginable. They would set the water a-boiling, help the children in a hundred ways, cheer the faint-hearted mother, and assist to make the weak as comfortable as possible. And at our farm they would tender their help ungrudgingly, either in pulling out a weak beast fallen into the water furrow, or in assisting to carry a big pig when killed, or in bringing back cattle which had strayed beyond the lines, and such like services. And all this they did, not expecting a reward, which they usually refused, but simply out of thankfulness and kindheartedness.

Now, Sir, these are plain facts, which I state truthfully, leaving to your readers to draw therefrom their own conclusions.

FORMER TRANSVAAL BURGHIER.

Rustenburg, Transvaal, July, 1901.

TELEGRAMS.

(REUTER'S SERVICE TO THE "JAPAN MAIL.")

OPERATIONS IN SOUTH AFRICA.

Shanghai, Nov. 1.

Byng's column captured 22, including two field-cornets.

Fortescue's column after a running fight all day killed four and captured fifty-four of the enemy, with 36 waggons and much stock.

The cavalry brigade at Aldershot has been ordered to hold itself in readiness for South Africa within a fortnight.

FRANCE AND TURKEY.

The Paris newspapers announce the departure from Toulon of portions of the Mediterranean squadron for the Levant in order to make a demonstration against Turkey.

THE FRENCH DEMONSTRATION.

Later.

Admiral Caillard commands the squadron that has left Toulon with sealed orders.

THE ROYAL TOUR.

The steamship *Ophir* has arrived at the Solent. She narrowly escaped an iceberg.

THE KING'S CONDITION.

The *Lancet* says that the unfavorable rumours about the King's health are baseless.

RE-INFORCEMENTS.

The cavalry brigade which is in readiness at Aldershot includes the 7th Hussars, of which Prince Arthur of Connaught is an officer. Arrangements have been made to send a large draft of infantry and artillery in November.

PLAGUE IN LIVERPOOL AND GLASGOW.

Shanghai, Nov. 2.

Foreign ports have declared Liverpool plague-infected.

It is officially announced that four servants in the Central Hotel, Glasgow, have been stricken with plague and one has since died.

FRANCE AND TURKEY.

Paris newspapers announce that Admiral Caillard has returned to Toulon owing to a telegram from Constantinople which says that the Porte is yielding to the French demands, but the squadron remains in readiness.

Later.

Admiral Caillard's return is incorrect. It is expected that he will reach Turkish waters on Monday.

SOUTH AFRICA.

General Kekewich surprised and captured Van Albert's laager of 78 men, including Commandant Kloppe.

AUSTRALIAN COMMONWEALTH.

The federal representatives of the Australian commonwealth have rejected a vote of want of confidence in the Government on account of the tariff.

THE U.S. TREASURY OVER-FLOWING.

The American Treasury is so overflowing that Mr. Gage, the Secretary of the Treasury, has been forced to redeem a million dollars' worth of Treasury bonds in order to prevent a depletion of the circulation of the country.

SEVERE FIGHTING IN SOUTH AFRICA.

Shanghai, Nov. 3.

Lord Kitchener telegraphs that a body of Boers, estimated to be 1,000 strong, made a severe attack upon the rear-guard of Colonel Benson's column, midway between Bethell and Balmoral, during a mist. They rushed the two guns of the rear-guard, but these were afterward recovered. Eight officers of Benson's column were killed, and 13 wounded; 58 men were killed and 156 wounded. The enemy lost heavily but no reliable estimate can be given. The fighting was carried on with great determination on both sides.

The Boers retired to the East.

Later.

Benson's total casualties in officers were 12 killed and 14 wounded.

THE ATTACK ON BENSON.

Shanghai, Nov. 4.

Louis Botha commanded the attack on

Benson's force. The guns [after they had been rushed] were so situated that neither side was able to touch them. The Boer loss is estimated at 300 to 400.

Shanghai, Nov. 5.

The Boers outnumbered the British at the battle near Bethell, and their losses were heavier than the English. Another column has gone in pursuit of the enemy.

The *Times* remarks that the details of the affair show that the fight was in no sense a reverse for the British.

SOUTH AFRICA.

Shanghai, Nov. 6.

Several small engagements have taken place with the Boers, whose losses were about 50.

PRINCE OF WALES.

It was announced in London on the 4th inst. that the title of Prince of Wales would be revived.

FRANCE AND TURKEY.

The French Chambers by a vote of 305 to 67 have recorded a vote of confidence in the Government with regard to the steps taken against Turkey.

THE SOUTH AFRICAN WAR.

Later.

Sir Michael Hicks-Beach, Chancellor of the Exchequer, speaking at Bristol, said he was convinced that the income of the Government was paid willingly by the taxpayers because of their patriotism. He wished he could say that the terrible war had come to an end, but he could not, and he possibly might have to ask the country later for powers of increased taxation.

FRANCE SEIZES SMYRNA CUSTOMS.

It is reported in Paris that Admiral Caillard has arrived at Smyrna and has seized the customs.

The German press views with intense dissatisfaction the determination of France to bring the Sultan to reason.

FRANCE SEIZES THREE PORTS.

Shanghai, Nov. 7, 9.40 a.m.

Admiral Caillard's squadron has arrived at Mitylene, where he landed men and occupied three ports and seized the Customs houses. France intends to pay herself out of the seized Customs.

BENSON'S GUNS.

Lord Kitchener, telegraphing from Pretoria, says that the Boers, after Benson's engagement, were unable to remove the guns until the British ambulances went out, when, under cover thereof, the Boers removed the guns. The Boer losses were undoubtedly heavy. Commandant Opperman was killed.

THE TURKISH QUESTION.

Later.

Admiral Caillard has telegraphed to the French *Chargé d'Affaires* at Constantinople that he has seized the Customs at Mitylene. France has notified the Porte of additional demands, and further states that a settlement of all must precede the renewal of diplomatic relations with Turkey.

DEFEAT OF "TAMMANY."

The returns of the New York municipal elections indicate a complete defeat of the Tammany candidates.

FRANCE AND TURKEY.

Later.

The Porte has sent to the French *Chargé d'Affaires* at Constantinople a Note enclosing a monthly draft on the Customs in payment of the French claims. The Note has been referred to Paris.

SOUTH AFRICA.

Seven hundred Mounted Infantry have

been ordered to hold themselves in readiness to embark for the Cape.

It is believed that a battery will be sent to the Cape from India.

A strong cavalry contingent will probably be accepted from Canada.

(RECEIVED AT THE LEGATION OF FRANCE.)

FRANCE AND TURKEY.

Saigon, November 1.

The naval division under the command of Admiral Caillard is awaiting instructions, which will be sent to-day. Secrecy is maintained as to the point of Turkish territory which will be chosen for a naval demonstration, should the attitude of Turkey render such a step necessary.

Saigon, Nov. 2.

The naval division under the command of Admiral Caillard, comprising two iron-clads, two cruisers and three destroyers, has left for Turkish waters.

Saigon, Nov. 4.

On receipt of the news of the departure of the Naval Division, the Sultan acquiesced in the French demands. But the Government of the Republic will not recall the ships in deference to vague assurances. It intends to settle all the points in dispute with the Porte.

THE MINERS.

Absolute calm prevails at all the coal mines and work is in full progress.

FRENCH NEWS.

Saigon, Nov. 6.

In the issue of an interpellation about the affair with Turkey, the Chamber, by 309 votes to 77, adopted an order of the day signifying confidence that the Government will cause the honour and the interests of France to be respected.

The Aeorostatic Commission have decided to award the Deutsch prize to M. Santos Dumont.

(RECEIVED IN TOKYO.)

CHINESE AND OTHER NEWS.

The negotiations that have been going on between the Japanese Vice-Consul in Chungking and the Viceroy of Szechuan with reference to land for a Japanese settlement in Chungking, were brought to a satisfactory conclusion on the 30th of October, an area of over 126,000 *tsubo* being granted for the purpose. The text of the convention will be officially published in a few days.

As already announced, the new Chinese *ad-valorem* tariff will be put into operation from the 11th instant, and all imports not entered at the customs previously to that day will have to pay.

A telegram from Vladivostok states that Mr. Romanoff, Russian Vice-Minister of Finance, will arrive at Nagasaki on the 3rd instant, and will spend the 8th, 9th and 10th inst. in Tokyo and Yokohama.

The Government of Korea informed the Japanese Representative in Seoul on the 30th October, that notices had been issued to the various localities removing the grain-export veto from the 17th instant.

The Bank of England raised its rate of interest to 4 per cent. on the 31st of Oct.

CHINA.

The paper money to be issued by Governor Yuan Shih-kai for circulation in Shantung will be manufactured in Japan; probably the Mint in Osaka will undertake the work.

SIBERIA.

It has hitherto been the habit of the Custom House Authorities at Vladivostok to levy a tonnage duty of 30 copecks per last once a year from every steamer running regularly to that port. But when the Nippon

Yusen Kaisha's steamer *Yamashiro Maru* entered on the 17th of October, she was suddenly required to pay a sum of 1,500 rubles. In reply to the Japanese Consul's query as to the reasons of this charge, the Customs Authorities stated that the new tariff had become operative, under the 827th Article of which every Russian vessel is liable for a payment of 5 copecks per last when leaving the harbour, whereas a foreign vessel must pay one rouble per last both on entering and clearing, and is not allowed to leave the port without payment. Nations entitled to most-favoured-nation treatment are, however, exempt from the charge. The Nippon Yusen Kaisha's agent paid the amount demanded, but subsequently claimed the benefit of most-favoured-nation treatment, and the claim being admitted, the money was restored. Foreign vessels were subjected to a similar demand, but will probably escape on the ground taken in the case of the *Yamashiro Maru*.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, NOVEMBER 9TH, 1901.

BIRTH.

At No. 53, Bluff, on the 9th instant, Mrs. G. CARPENTIER, of a Son, which survived its birth eighteen hours only.

MARRIAGE.

On the 13th instant, at Christ Church, Yokohama, by the Right Rev. Bishop Awdry, WILLIAM G. F. NELSON, of London, to EVELYN MARGARET, elder daughter of F. S. James, of Yokohama.

SUMMARY OF NEWS.

It is rumoured that another Filipino insurrection is contemplated in Panago.

M. DOUMER, Governor-General, has decided that Hanoi is to supersede Saigon as the capital of French Indo-China.

THE trade returns for Yokohama during the first 10 days of November showed an excess of exports over imports by over yen 2,620,000 in value. The exportation of gold from this port

during the period amounted to yen 506,100 and that of silver to yen 3,113, while there were no imports.

CONCERNING the Government's proposal to open a College of Medicine in Kyushu, it is reported that the authorities have resolved to establish the College in Fukuoka.

MR. SAI KIN, the new Chinese Minister for Japan, will it is reported, set out for Japan on the 16th inst. in order to take up his new duties. The Minister will be accompanied by the son of Viceroy Chan Chi-tung and other officials.

A MESSAGE from Nagasaki dated the 12th inst. says that the ceremony of commencing the work of construction of a large dock in the Mitsubishi Shipbuilding Yard there took place on that day.

AN anonymous philanthropist in Ireland has contributed, under the initials J. C. S., one thousand pounds to the Church Missionary Society, in order to assist in clearing off the adverse balance against the Society.

H. R. H. PRINCESS ALBERT DE BELGIQUE has presented the Crown Prince of Belgium with a son. It will be remembered that Prince Albert, who is nephew to the present King, and Crown Prince, was married on the 2nd of October, 1900, to Princess Elisabeth of Bavaria.

LIEUT.-GENERAL BARON KODAMA, Minister of War, and Governor-General of Formosa, having proposed to resign the post of War Minister it is believed that Viscount Katsura, Premier, will probably take up the War Minister's duties for the present.

INTELLIGENCE from Vladivostok under date of the 26th ult. says that a Japanese youth, aged 19, named Tokunagawa, who had been staying in Vladivostok for purposes of study was killed in his bed-room several days prior to the dispatch of the message. The report adds that the murderer has been arrested.

A FIRE damp explosion is reported to have occurred in the Komatsu coal mine in Tagawa district, Fukuoka prefecture, a few days ago, with the result that one of the miners was badly hurt. The disaster is believed to have originated in a lamp firing the gas.

DURING last month, the Kanagawa Prefectural Office issued 70 passports in respect of 74 persons wishing to go abroad for various purposes. On the other hand, 45 passports were returned to the Authorities during the same month, the number of persons who came home being 47.

THE Russian Authorities are reported to be in negotiation with the Nagasaki Prefectural Authorities for the lease of several thousand *tsubo* of land in Nagasaki, on which Russia is said to be desirous of building a sanatorium for the use of her sailors and others belonging to the Russian naval forces in the Far East.

MR. WATANABE KUMANOSHIN, of Tokyo, and several others have under contemplation a scheme for laying an electric railway from Aoyama, Tokyo, to Futago-no-watashi via Shibuya Station, Setagaya-mura and Komazawa-mura, its length being six miles 30 chains. The Tamawa Jari Denki Tetsudo is the title of the projected railway.

At about 7 a.m. on Monday a Japanese employe of the Yokohama Engine and Iron Works

fell into the Creek in an attempt to jump on to a steam-launch which was in motion. The man was drowned. His remains were discovered about 10 o'clock the same morning by the water police.

QUARANTINE regulations against Manila have been taken off at Saigon. It is expected that General Bell, U.S.A., will be sent to Samar to conduct the operations in that island. The Datu of the Moros at Zamboanga has offered to send a thousand men and clean out the island, without any expense to the U.S. Government, but the offer was declined.

On the evening of the 9th, when Mr. Asayama Giron, a doctor living at Sanchome, Kita-nakadori, Yokohama, was passing the Kurayami slope at Ise-cho in a *jinrikisha* he was attacked by two ruffians who also knocked down the *jinrikisha* coolie. In the meantime constables from the Tobu Police Station arrived on the scene and arrested the men. They have been ordered to undergo 10 days' detention in prison.

WITH regard to the negotiations between the Yokohama Water Works and a certain British firm in Yokohama for the floating of water works loan bonds, it is now reported that the foreign firm has agreed to make a definite reply not later than the middle of December next and that all the proposals advanced by the Water Works authorities have been communicated to a British capitalist in London, from whom the loan may be obtained.

SINCE the enforcement of the Harbour Regulations a few years ago foreign and Japanese war-ships have not been allowed to pass between the breakwaters at Yokohama. It is now reported that the Authorities recently resolved that in certain cases war-vessels may come inside the harbour should they convey a Prince of the Blood, or are in great haste to coal, or desire shelter from a storm, provided that application to that effect is made to the Yokohama Harbour Office.

On the night of the 9th inst. the Nippon Yusen Kaisha's steamer *Nitto Maru* was in collision with the *No. 1 Otake Maru*, a sailing-vessel belonging to Mr. Uchiyama Ihei, off Matsuya, Sagami province. The result was that the latter had three masts broken, while a large quantity of cargo consisting of timber was thrown overboard. The Captain of the unfortunate vessel received severe injuries. It appears that the sailing-vessel was on her way from Okabe, Rikuzen province, to Tokyo when the disaster took place.

THE British man-of-war *Algerine* will, it is reported, pass the winter in Newchwang and the British Consul there has been instructed to make the necessary preparations in connection therewith. The *Nichi Nichi* states that the presence of this vessel in the Chinese port during the coming winter is considered necessary in view of the fact that as the result of negotiations now going on between China and Russia the latter Power will probably withdraw her forces from Newchwang.

AN application is reported to have been made by certain transportation companies of Yokohama to the Yokohama Silk Merchants' Guild for an advance on the ruling rates of freight and as the reason for the demand it was stated that a notification recently issued by the Kanagawa Prefectural Authorities, whereby owners of carts are obliged to bring them to a certain standard of repair and to limit the loads carried has necessitated the proposed advance. The increase asked is 2 *rin* per box of raw silk and 3 *rin* per box of waste silk.

DEATH OF LI HUNG-CHANG.

Saturday, Nov. 9.

Telegrams to Tokyo announce that Viceroy Li expired at 10.30 a.m. on the 7th instant in Peking. His last day seems to have been devoted solely to thoughts for the welfare of his country. Knowing that his end was imminent and that the great place he had occupied in his country's politics would become a dangerous void after his death, he telegraphed on the 6th to the Imperial Court advising that Yung Lu should be appointed his successor; he telegraphed to Prince Ching, counselling his immediate return to Peking; he telegraphed to Prince Ching's son, Prince Ping, saying that his end was rapidly approaching and begging the Prince to urge his father to hasten back to the capital; he telegraphed to Governor Yuan Shih-kai praying him to work for his country in her hour of stress, and he telegraphed to Generals Chu and Ma asking them to hasten to Peking, but saying that he had no hope of meeting them in this world. Accompanying these details is a telegraphic statement that in spite of the Viceroy's precarious condition M. Lessar, the Russian Representative, pressed upon him, until the last moment, the necessity of signing the Manchurian convention; a story to which little credence can be attached.

There have been so many rumours of Li's death that the public would have hesitated to receive this last report as authentic, had it not been officially confirmed. Li was in his 84th year, if we remember aright. During the past ten or twelve years he has been bitterly abused by English newspapers, and even now when the old patriot lies dead, the chorus of slander will not be wholly stilled. Yet history will surely call him one of the greatest statesmen China ever produced, and will write him down a man uniformly faithful to his own conception of his country's best interests. He was friendly to Russia, and therein lies the whole gravamen of his crime in British eyes—a crime so heinous that his petty detractors have not hesitated to accuse him of selling his country for Russian gold. Those that know him best have always treated that tale with contempt. Li had to choose between Russia and England, and, speaking frankly, the wisdom of his choice must be admitted from his own point of view. From England China had nothing to fear; from Russia she had everything to fear. Had there been any possibility of securing such a measure of English aid as would have guaranteed China against Russian aggression, Li would have been better advised to clasp hands with Great Britain. But there was no such possibility, for in order to secure England's help, China must have become genuinely self-helpful, and no one knew better than Li that the latter result was unattainable within any limit of time granted by the emergency. Something had to be done quickly, and if it seemed to him that the prudent plan was to placate a very real enemy rather than to rely on a very problematical friend, who can venture to assert that he lacked sagacity? Events, it is true, have not justified his policy. Russia stands to-day in possession of at least as large a section of Chinese territory as could have fallen to her had China openly defied her. But that result has been promoted by the operation of factors which could not have been foreseen at the time when Li had to approach the solution of the problem. The course he selected was consistent with the

promptings of human wisdom and with the dictates of true patriotism. There are those that charge him with having amassed enormous riches by corrupt practices. It remains to be seen whether he died possessed of wealth amounting to even a fraction of the sums that have been credited to him. It is not possible for a high official in China to amass great riches by corrupt practices without becoming a butt for the attacks of censors and private enemies. The fact that Li escaped such attacks is a strong testimony in his favour. In all China's moments of real difficulty and danger, Li was the man called to the helm, and he never hesitated to take the post of danger or failed to save the situation partially at any rate. Now that he is gone, the world, and above all China, will learn to appreciate his value.

Monday, Nov. 11.

Telegrams received in Tokyo state that Li Hung-chang's end was very peaceful. Since the rupture of a blood vessel some days ago his strength gradually failed and he finally passed away as placidly as though sleep had overtaken him.

There are conflicting reports about Prince Ching. Some authorities allege that the Foreign Ministers being all anxious that he should return at once to Peking and assume charge, he has abandoned the prosecution of his journey and may be expected in the capital in a few days; others say that the Imperial Court insists on his presence at Kai-fong, being desirous of receiving from him a full verbal report, and of consulting with him as to the future direction of affairs.

The remains of the deceased statesman are to be carried to his native province, Anhui, and interred in the family sepulchre. Telegrams say that a warm and appreciative Imperial Decree has been issued with respect to his decease, and that a State funeral on the most extensive scale is ordered for about the 20th instant.

The *Jiji Shimpō* discusses the departed Viceroy in an appreciative and laudatory strain. It considers that Li's treatment of the Korean problem was the great mistake of his life, since it involved his country in war with a neighbouring empire and plunged China into many troubles. On the other hand, Li showed his statesmanlike and patriotic sense of responsibility when, at the close of the struggle, he stepped into the breach and concluded peace on the best terms procurable. Not one of his countrymen can be held to approach him in knowledge of foreign affairs. It may indeed be truly said that for many years he controlled and directed his country's relations with the outer world. As to his greatness, there can be only one verdict. The *Jiji* further thinks that his demise will have the effect of shifting the political centre of gravity to the Yangtze Viceroy. There is no one capable of stepping into Li's shoes in Peking. Yung Lu and Wang Wen-shao have been talked of, but the former is by no means a *persona grata* with foreigners in consequence of his connexion with the Boxer troubles, and the latter does not enjoy a fraction of the confidence that Li possessed. Governor Yuan is also indicated, but Governor Yuan is engaged in the process of building up his power, and the work has not yet been carried far enough to permit of his taking Li's place. Thus by a process of exhaustion, the Yangtze Viceroy is reached.

In the *Asahi Shimbun* there is a telegram saying that two of the high officials in Peking have sent a message to Prince Ching, saying that there is no necessity for his immediate

return to the capital, but that he should use his best endeavours to induce the Court to enter Peking before the close of the year.

The *Nichi Nichi Shimbun* thinks that Li Hung-chang was one of the greatest men of his era. It admits that he made a fatal error in his estimate of Japan when he allowed the Korean affair to plunge the two empires into war, but it considers that many sapient judgments and much clever diplomacy may be placed on the other side of the account. Not a few foreigners have laid the most serious charges at Li's door; have accused him of selling his country and of considering self before State. That is simply due to ignorance of Chinese affairs. Li saw that his country had no ally among Western Powers and that she could not count on procuring an ally. He saw also that to rely on anything the Concert of States might do for China in the way of protection would be quite fatuous. There was, in effect, no choice. His only course was to try to placate the Power which directly menaced the safety of China. He well knew the dangers to which he thus exposed her and the complications that must ultimately ensue. But he selected the lesser of two evils.

The *Asahi Shimbun* contrasts the circumstances under which Li died with those that marked the demise of President McKinley. One statesman took leave of a country standing almost at the pinnacle of splendid prosperity to which his genius had contributed not a little. The other closed his eyes upon an empire plunged in difficulties which all his earnest and untiring efforts had failed to remove, and threatened with disasters which his far-seeing eyes could not fail to discern. A great vacuum is created by his death in the field of Chinese statesmanship. When Bismarck died, there were men to take his place. When Gladstone passed away, there were others to succeed him. But Li leaves no comparable successor, and dies at the very moment when his country had most need of his services. The *Asahi* also recalls how thorough and whole-hearted were the reforms undertaken by him during his viceroyalty of Chili; how he built railways; erected forts; established schools; promoted posts and telegraphs; acquired a fleet; organized an army; encouraged trade, and fostered manufacture, thus making of the metropolitan province a model for all parts of the empire. Yet when death came to him he had the supreme bitterness of seeing Tientsin, the city for which he had done so much, occupied by a foreign garrison, and of knowing that the time of its restoration to Chinese rule must be far distant.

The *Kokumin* writes in nearly the same strain. It details the events of Li's great career and declares him to have been undoubtedly the leader of progressive ideas in China. The mistake of his life was the war with Japan, but our contemporary believes that it was not his own mistake so much as that of his officers who betrayed him into thinking that the defeat of the Japanese would be easy.

The *Nippon* is assured that Li's record for half a century entitles him to be called the greatest statesman of the Orient. He knew well the weakness of his own country and the strength of foreign nations, and he sought by adroit management and wise concessions to gain time for accomplishing that unification, the want of which so seriously debilitates China. His great plan was to join hands with Russia not only for the purpose of averting her aggressions in the north, but also in the hope of using her to check the approaches of Japan from the

east. This involved the ultimate surrender of all China outside the Great Wall, in return for which he hoped so to organise and strengthen the larger China within the Wall as to render her invulnerable. Was this a wise programme? Could he have preserved the south by sacrificing the north? It is very doubtful. Such a course would have alienated the Yangtze Viceroy and forfeited the support of the southern provincials, thus closing to the Government its chief source of revenue. How Li would have dealt with the difficulties incidental to his programme, must now be matter of conjecture only. It is a sad thought that he rose to eminence by quelling a wave of rebellion which threatened to overthrow the Throne, and that he closed his eyes upon a country prostrated by insurrection.

The *Jimmin's* comments are somewhat obscure. It seems to think that Li's greatness consisted rather in craft than in sagacity; rather in versatility than in wisdom. It is the least sympathetic of all the leading Tokyo journals, but it admits unquestionably that the deceased statesman made the good of his country the pivot of his policy. The celebrated Count Katsu said on his deathbed that it is comparatively easy for a little country to be clever and adroit, and that a huge empire is more apt to blunder. But, on the other hand, when the latter produces a great man, he is essentially great. Li was that man. He excelled all his contemporaries in cleverness. Chang and Liu have been bracketed with him, but if ability be the basis of comparison, Liu must be described as slow and Chang as a "stick." Great as Li was, however, he did not succeed in winning public confidence. That was his blemish.

The *Chiao*, while fully recognising Li's great talents and his sincere patriotism, nevertheless thinks it fortunate for his country and for himself that he died before he signed the Manchurian agreement.

The *Yomiuri Shinbun* believes that Li died of poison, finding it impossible to extricate himself from the dilemma into which the Manchurian question had plunged him. None the less, until the hour of his death, the Russian Minister pressed him to sign the Agreement, and there are many Chinese who say that his fate lies at Russia's door. The mistake of his life was the war with Japan, and to recover from its consequences he made a second mistake, that of joining hands with Russia, thus forfeiting the sympathy of those that could have best supported his country, and exposing her to greater dangers than ever.

The *Hochi Shinbun* takes a somewhat similar view. It thinks that ever since he allowed his country to drift into war with Japan his career has been one of lamentable and mischievous blunders. To avert imaginary dangers from Japan, he placed China under the heel of the Triple Alliance, with results now only too patent. Even after the Boxer outrages, he made an understanding with Russia the basis of Peking's foreign policy, and he had the misery to expire when the dire consequences of his want of foresight threatened to bring catastrophe on his country. Yet he was a statesman of immense ability, and it is very doubtful whether China has any one to take his place.

CHINESE NEWS.

Saturday, Nov. 9.

The distress that has been caused in the Yangtze Valley by recent floods seems to be very real and very terrible. So often has the

local press been called upon to describe these harrowing catastrophes in China, that the phrases available for such a purpose have become hackneyed, and so invariable are the calamities, year in and year out, that the foreign public has been rendered partially indifferent by familiarity. Perhaps to these facts, but still more to the prejudice excited against China by the Boxer outrages, is to be attributed a reluctance shown by the foreign residents in China to come to her assistance on this occasion with their usual magnanimity. After all, it is hard for human nature to forget how mercilessly these same Chinese treated our own women and children in their time of deadly stress little more than a year ago, nor can it be reasonably expected that because the Yangtze Viceroy behaved with remarkable prudence throughout the troubles of 1900, the people over whom they rule will be differentiated by foreigners from the inhabitants of neighbouring regions. It is thus an essentially unfavourable time for appealing to foreign generosity, but as to the appalling misery that prevails through wide areas devastated by the floods, the testimony is unequivocal.

These catastrophes are nature's testimony to China's conservatism. Only a nation steeped to the lips in the fatalistic dogma, "whatever is is best," would allow tens of thousands of its people to perish miserably year after year from causes easily remediable by the resources of science. There is at least this excuse for Western aggression that were China brought under Occidental or Japanese sway, the condition of her "teeming millions" would be enormously bettered.

Monday, Nov. 11.

A telegram to the *Chungai Shogyo Shimpō* gives the conditions of the proposed treaty revision with China, as formulated by Great Britain, and says that they are approved by the Shanghai community:—

1. That additional ports be opened on the Yangtze.
2. That the navigation of interior waters be made free.
3. That *likin* be abolished or revised.
4. That the veto on the export of rice be abolished and its transport declared free.
5. That the regulations with regard to the working of mines and the building of railways be amended.
6. That trade-marks and copyright be officially recognised.
7. That mixed residence be permitted freely.
8. That a mixed court be opened in Shanghai.

The Chinese Emperor has conferred upon the late Li Hung-chang the posthumous title of Marquis and has ordered that his cenotaph be erected in the Hall of the Sages.

It appears certain from the latest news that Wang Wen-shao is to succeed Li Hung-chang in Peking as Peace Plenipotentiary, and that Chu Fuh will be appointed acting Viceroy of Chili and Northern Superintendent of Trade. Wang has been ordered, it is said to proceed at once to Kai-fong, for the purpose of receiving the Imperial instructions, after which he will go to Peking. Another telegram alleges that Governor Yuan has been relieved of his duties in Shantung, and that he will be appointed Viceroy of Chili and Northern Superintendent of Trade, his post in Chili being given to Chang Jin-chung. The last named official has hitherto been Superintendent of Transport. It will be observed that this list of appointments is confusing in the matter of the Viceroyalty of Chili, which one telegram assigns to Chu Fuh while

another gives it to Yuan Shih-kai. Possibly Chu Fuh is to act as *locum tenens* only until Yuan can take up the duties, which may be some months hence.

It does not appear that Prince Ching will return at once to Peking. He is said to be continuing his journey to Kai-fong. Thus there is no Peace Plenipotentiary in the capital at present.

Rumour says that the death of Li has effectually interrupted the negotiations for the Manchurian Agreement, as Li alone was carrying them on, Prince Ching having no part whatever in the business. But of course if Russia is intent upon coming to some arrangement, the disappearance of the great Viceroy from the scene can not prove more than a temporary interruption.

A correspondent of the *Jiji Shimpō* has thought it worth while to telegraph to that journal in the sense that the "secret documents" are still in the *Yamēn* of the late Viceroy and that they will not be removed until the arrival of Wang Wen-shao, when they will be handed over to him. That intelligence has a fine full flavour of the sensational.

It is expected that the Viceroy's remains will not leave Peking before the close of the month. Two of his sons, a grandson and his "second wife," are now in the capital, and Lord Li Kin-fong is hastening from Yang-chow to participate in the ceremony. Prince Kung has been instructed by the Emperor to take the chief part at the obsequies.

The Japanese Government has addressed a message of condolence to the Chinese Government, and Mr. Komura, Minister of State for Foreign Affairs, has conveyed expressions of sympathy to the family of the deceased Viceroy.

Tuesday, Nov. 12.

The telegraph confirms our conjecture that Chu Fuh's appointment to the Viceroyalty of Chili is only a temporary measure, pending the assumption of the duties of that office by Governor Yuan Shih-kai.

Rumour says that the death of Li Hung-chang so far from hastening the return of the Court to Peking, will probably defer that event.

It is said that Wang Wen-shao will not leave Kai-fong for Peking until the Court's arrival at the former place. The inference suggested is that the Court has not yet reached Kai-fong. But it was due there, according to the programme, on the 27th of October. This is somewhat perplexing. At all events it is plain that the Court has not yet resumed its journey beyond Kai-fong.

The subscription in Shanghai for the sufferers by the Yangtze floods has reached nearly thirteen thousand dollars. From the point of view of the number of persons subscribing, the amount seems distinctly liberal.

Prince Chun seems to have been the cynosure of all eyes when passing through Shanghai on his return from Germany. Shanghai newspapers describe in vivid terms his progress through the streets and say that he was regarded by his countrymen with eyes of the greatest curiosity as the man who had refused to kow-tow.

Wednesday, Nov. 13.

Governor Yuan, according to a telegram in the *Asahi Shinbun*, has declined to accept the post of Viceroy of Chili and Northern Superintendent of Trade, but it is thought improbable that the refusal will be accepted.

There is a rumour that although the Chinese Court may return temporarily to Peking

for the sake of appearance *vis-à-vis* the Foreign Representatives, it will ultimately withdraw permanently to Kaifong.

Mr. and Mrs. Uchida and Mr. Konoike arrived safely in Peking on the 10th instant.

Thursday, Nov. 15.

A telegram published by the *Asahi Shimbun* says that the Court reached Kaifong on the 11th instant and that Prince Ching had audience of Their Majesties on the same day. This is confirmed by a *Fiji Shimpō* message, but a Shanghai wire talks of the Court's being expected to arrive on the 12th. We imagine that the former statement is the more correct. Under any circumstances it is evident that the Court's journey occupies more time than was originally expected.

A strange rumour is circulated to the effect that Yung Lu has slandered Prince Ching to the Throne, representing him as aiming at the purple and as having the support of the Foreign Representatives. By way of proving his assertion Yung Lu advised that Prince Ching should be summoned to Kaifong, predicting that he would surely disobey the summons. The Prince, informed of these things, set out for Kaifong immediately on receipt of orders, and when no less than 14 telegrams reached him *en route* urging his return to Peking in consequence of the death of Li Hung-chang, he replied that to retrace his steps would certainly cost him his life, and that no course offered except to continue his journey. How large, we wonder, is the grain of truth in all this.

The British troops have handed over the Temple of Heaven, which they were guarding, to the Chinese.

Governor Yuan's request to be excused from accepting the Viceroyalty of Chili having been rejected by the Throne, he is to set out from Chinan on the 22nd instant, and will reach Peking on the 28th.

Wang Wen-shao, who succeeds Li Hung-chang as peace-commissioner, left Kaifong on the 11th for Peking.

Marquis Ito has sent a telegram of condolence to the family of the late Li Hung-chang. Ever since the Tientsin negotiations of 1885, Marquis Ito has been a friend of the Viceroy, and they have frequently corresponded. The Japanese statesman never believed the injurious stories circulated to Li's discredit, whatever he may have thought of the latter's policy.

Friday, Nov. 15.

The *Nichi Nichi Shimbun* has a telegram to the effect that after Prince Ching's audience in Kaifong, on which occasion the Prince laid before Their Majesties a detailed statement of events in Peking, the Court decided to return to the capital within the course of the present year.

Peking was visited by a snow-storm on the 12th instant, and at 11 a.m. on the 13th, when the telegram conveying this intelligence was sent, the snow was still falling, having already accumulated to a depth of 8 inches, and the thermometer stood at 32° F. It would not be surprising if, under such climatic conditions, the Court decided to postpone its return to Peking until next spring. A journey of several hundreds of miles across the plains of China in mid-winter is a serious undertaking for an old lady and a youth in a precarious state of health. A postponement of that nature should not suggest any sinister inferences.

The Emperor's Rescript with regard to the late Li Hung-chang is a profoundly sympathetic and appreciative document. Constituting himself the respectful spokesman of the Empress Dowager, His Majesty sets out by lauding the competence, wisdom, discernment and statesmanship of the deceased, and then proceeds to show how, at the head of the Wei Army, he quelled the Taiping Rebellion, for which service he received the title of "Earl," and was admitted to a leading position in the administration. There he never failed to assist the Government in times of difficulty, contributing materially to the preservation of peace at home and abroad. His mature wisdom and profound intelligence were always at the service of his country, and last year, when the troubles arose, he hastened to the scene, and being appointed Plenipotentiary, succeeded in restoring tranquillity on suitable terms, thus achieving a great deed for which a commensurate reward would have been bestowed when death unhappily removed him. Deeply grieved, the Emperor prays for his welfare in the world to come—it is impossible to find any literal translation for the expression *tara-kyō zo tamō*—, bestows on him the posthumous name of *Wang Chun* (loyal scholar), grants him the title of Marquis, and announces his admission to the Hall of Sages.

It appears that a mistaken rumour was recently circulated with reference to the manner of levying the 5 per cent. *ad valorem* duty provided for by the new Chinese tariff. The statement made was that ten per cent. would be added to the invoiced cost of goods, and that 5 per cent. would be levied on the sum. The question then rose whether freight and insurance should be included in the invoiced cost, and the decision was said to have been in the affirmative. It is here that rumour was mistaken. The latest news is that freight and insurance are not to be included.

A SENSATIONAL RUMOUR.

The *Asahi Shimbun* publishes a doubly headed paragraph to the effect that subsequently to the demise of Viceroy Li, the Russian Government addressed a secret telegram to the Empress Dowager of China, informing Her Majesty that Russia is determined to retain possession of Manchuria, and that if she is opposed in that direction, she will formulate demands dangerous to the independence of the Chinese empire.

The *Asahi* evidently believes that among its readers there is a section ignorant enough and gullible enough to swallow these ridiculous and obviously false stories. But does our contemporary deem it a patriotic task to deliberately rouse international prejudice and, instead of contributing to the maintenance of peace, to assist materially in promoting quarrels? It is evidently and plainly impossible that if the Russian Government addressed to the Empress Dowager any secret telegram whatever subsequently to the death of Li Hung-chang, the fact and the nature of the message could be already known in Tokyo, and as for the alleged nature of the message, it is the purest nonsense. It is really difficult to understand the reckless indifference to responsibility that induces an important and leading newspaper to publish such canards.

A remarkable duel with sabres has taken place near Leghorn between Lieutenant Reerivera of the artillery and Signor Ferrini. They fought seventy-two rounds, and, although actually slashing and thrusting at one another for an hour and forty minutes, they both escaped with slight cuts.

THE MANŒUVRES.

The autumn manœuvres came to an end on the 10th inst., the three last days having been happily very fine, though in the early stages of the operations the troops must have suffered considerably. The Emperor addressed to Field Marshal Marquis Oyama and the officers and men that took part in the manœuvres, a message saying that for a long time His Majesty had not had an opportunity of inspecting the forces in the north; that now, having witnessed their manœuvres in the field, he was gratified to observe the great progress they had made; that the tendency of the age in every State at present was to attach much importance to armaments, and that His Majesty looked to his troops, officers and men alike, to spare no efforts to become a bulwark of their country.

Subsequently His Majesty summoned Field Marshal Marquis Oyama to the Imperial head-quarters and instructed him to convey to the foreign officers who had attended the manœuvres various Orders which the Emperor was graciously pleased to bestow. The fortunate recipients were:—Major-General Pok (Korean Minister of Foreign Affairs), the First class of the Rising Sun.

Major-General Yang Kin-lung (Chinese), the Second class of the Rising Sun.

Major-General Ibanoff, the Second Class of the Sacred Jewel. Eight Chinese officers, the Second Class of the Sacred Jewel. Major Pelpiorkin (?), the Fourth Class of the Rising Sun. Four Chinese officers, the Fourth Class of the Rising Sun. Major Li (Korean), the Fourth Class of the Sacred Treasure. Captain Gorski (?), the Sixth Class of the Rising Sun. Seventeen Chinese officers, the Sixth Class of the Rising Sun. Fourteen Chinese Officers, the Sixth Class of the Sacred Jewel.

The memory of the celebrated Date Masamune was also honoured, the Emperor raising him to the First class of the Third Official Grade, in recognition of his skilful administration, his despatch of envoys to the West to acquire a knowledge of foreign affairs and his good services to the State.

On the evening of the 7th, an entertainment was given to all the foreign officers present at the manœuvres. It took place in the hall of the Middle School, and the principal feature was a display of old-time implements of war. On the following evening the foreign officers returned the compliment by entertaining their Japanese hosts in the same place.

The Emperor made a radical departure from his previous habits during his visit to Sendai. His Majesty attended an afternoon party given by the officers of the Second Division in the old castle of Sendai. The Sovereign has often entertained his subjects on these occasions, and has also condescended to visit the houses of leading statesmen and noblemen, but he never before attended a party given by the officers of a garrison. It appears that His Majesty departed from his routine in other respects also. He called two soldiers from the ranks and addressed various questions to them, examining their kits and their rations, and asking whether they did not find their food unpalatable, their life hard, and their separation from their families irksome. The men replied with much discretion that these things did not concern them when they remembered that it was all for the sake of their country.

The Emperor reached Uyeno station on his return from the manoeuvres at 11.05 on the 12th instant. Large crowds assembled to witness the return of His Majesty. The Empress went to meet the Emperor. His Majesty has contracted a cold and was obliged to take to his couch on reaching the Palace.

Probably in consequence of His Majesty's indisposition the Chrysanthemum Garden Party, which was to have taken place on the 16th instant, has been postponed until the 19th, when His Majesty expects to be quite recovered.

(FROM A SENDAI CORRESPONDENT.)

For many weeks past the Imperial visit to the great Northern Garrison town of Sendai has been the one absorbing topic of conversation among the inhabitants of Miyagi-ken, and municipal officials have been hard at work morning, noon and night making the necessary arrangements. These seem to be as complete in every respect as it is possible for forethought and special instructions from headquarters to make them. The military manoeuvres, to attend which is the chief object of His Majesty's journey northward, began in the neighbourhood of Semene on the 8th, and are to finish on Sunday, the 10th, by a grand march past. The foreign military and naval attachés received a special invitation from the citizens of Sendai to be present at a picnic party to be given at Matsushima on the 6th. In order to allow of the carrying out of this programme most of these gentlemen arrived in Sendai on the evening of the 5th, or early on the morning of the 6th. A local committee of foreigners consisting of Messrs. De Forest, Denning, Sneider, Jaquet and Kunze was appointed to represent the foreign community and to assist the citizens of Sendai in entertaining the visitors. The number of Chinese military and civil officers present at the picnic was about 30 and that of all other nations about 14. The weather was threatening all day, but only a few drops of rain fell. The party left Sendai for Shiogama at a few minutes before 10. Thirty minutes later they alighted at the station of that dirty-looking little town. They at once proceeded on foot to the Shiogama Daimeijin temple, situated in a very picturesque spot on the top of a hill in the midst of a number of very fine cryptomerias. The temple itself is in a very poor state of repair and is not of any special interest, but the sundial (1783) and the weather-beaten iron-lantern, which is more than 700 years old, attracted considerable attention. But of more interest than these are the two fine specimens of the species of holly known to botanists as the *ilex latifolia*, called *taraikō* in Japanese. These huge shrubs are three hundred years old, but are still full of vigour and flower profusely every year. It is said that there are no such specimens of the *ilex latifolia* to be found elsewhere in Japan. After a short rest the party embarked in three flat-bottomed boats and were conveyed to the village of Matsushima in tow of a small steamer. Here lunch was served in the upper storey of a tea-house that had been specially prepared for the occasion. What are known as the Christian relics, consisting of an autograph letter from Date Masamune, the Pope's reply, highly illuminated in Latin, various articles of dress, a picture of Pope Paul V., and of Hasekura Rokuyemon, several swords, crosses and rosaries, a full account of which has been published,* were exhibited to the visitors. These interesting objects which were kindly lent by Marquis Date for the occasion, are now rarely seen by the public and hence attracted great attention. The lovely little island of Oshima was next visited; after which the party embarked for the return journey. In going back the boats made a short detour in order to enable the visitors to get a better view of the various islands. Only a little more sunshine was needed to make the trip ideal, but as it was, great satisfaction was expressed by all present when at about 5.30 the various attachés drove off to the quarters furnished

for them in the Miyagi Ken Dai ni Chōgakkō. The city authorities have spared no pains in putting up this place, and Marquis Date has been kind enough to lend some magnificent screens to regale the eyes of the various military experts after their arduous labours in the field. Some idea of what the inspection involves will be gathered by stating that breakfast is served to the military attachés at 4.30 a.m., in order to enable them to catch the 6 o'clock train to Semene every morning. Each day they are to reach Sendai at sunset and start off again the next morning. The manoeuvres being on a larger scale than any that have taken place since 1898, have naturally attracted much attention. Not only the various attachés residing in Japan, but also English and French military officers from China are watching the operations with great interest. It is naturally the wish of military men to be allowed to gallop where they please and perhaps follow a division in all its movements, but this, it seems, is not allowed. They are, we are informed, all to be stationed in one spot and hence will only see a very small part of what is taking place. It is interesting to note that Captain Hirooka, who spent six months to the Transvaal during the most exciting part of the war, and who accompanied Lord Roberts in his march to Pretoria and received a medal on that occasion, is now acting as guide to the foreign attachés in the North. So far, five British military men have arrived in Sendai. Colonel Churchill, from Tokyo, Major Wingate, of the Bengal Cavalry, from China, with two lieutenants, and Lieut. Keswick, of the Militia, who has seen service in the Transvaal and who is now residing in Yokohama. Among military and naval men who are now in Sendai there are three French and three German officers, one Italian and one American (Major Wood). Mr. Bellows, the U.S. Consul-General, and the Chinese Minister also joined the Matsushima picnic party and propose to view the manoeuvres as far as they are able to do so. In reference to the general preparations for His Majesty's arrival, it may be mentioned that the whole town has been swept and garnished, all weeds removed and hedges clipped. All unsightly corners along the line of the route to be taken by the royal carriage have been concealed by bamboo fences or by matting, and the oldest and most unrepresentable buildings have been hidden from view by a number of ingenious make-shifts. The roads have been put in perfect repair: all large stones have been removed and all uneven parts have been levelled. At the Station, at the end of the principal bridge spanning the Hirose, and in the centre of the town are high green arches tastefully constructed and ornamented with white and yellow chrysanthemums. Among these that in the central of the town at the four-crossways is the most elegant; having assumed the form of a huge stone-lantern: it is decorated with flags and at night is illuminated with electric lights.

The route from the station to the quarters temporarily occupied by His Majesty in Mito-Yanagi-machi has been chosen so that the imperial equipage may not have to pass any unsightly or ill-omened places, such as prisons and the like. All the principal shops along the route are decorated in various ways. Some display valuable screens and others handsome druggets and various heirlooms.

The Emperor reached Sendai at twenty minutes past four on Thursday afternoon. For more than an hour before His Majesty's arrival a vast crowd of officials and prominent citizens from various towns had assembled at the station, and as ill-luck would have it, they got a thorough wetting before the Imperial train steamed into the station. His Majesty's carriage was drawn up close to the platform and there was no delay whatever in the starting of the Imperial cortège. The Imperial carriage was preceded by a few outriders and followed by one or two carriages and a long train of jinrikisha. The following arrangements were made for receiving His Majesty at the station. On the right hand side of the place where the Emperor alighted from the train stood the Prime Minister, next to him were several Field-Marshal, then Ministers of State, then

Generals and Admirals, then the foreign military attachés. These were all inside the station proper. In the road on the right hand side outside the station were ranged: (1) Military and civil officers of *chokunin* rank. (2) Japanese military officers invited to be present. (3) Civil and military officers of *sonin* rank. (4) Officials who were treated for the occasion as holders of *sonin* rank. (5) *Hannin* officials. On the left hand side of the carriage drive, close to where the Emperor alighted from the train, stood the Miyagi Prefect and the Mayor of Sendai. Next in order to these, but at some little distance off, stood officials in the following order: (1) The Presidents of the two Houses, (2) Members of the two Houses, (3) Members of the Prefectural Assemblies within the military districts occupied by the Second and Eighth Divisions (engaged in the manoeuvres), (4) all the honorary municipal officers connected with the towns embraced in the above named districts, (5) all the ordinary municipal officers of the towns of the same districts. Extended along the road beyond the space occupied by the above-named officials, divided into various sections, were numerous bodies. Not to mention them all, on the right hand (1) "Buddhists and Shinto priests, and religious teachers," where a notice read (*Zaisen goaikokujin mo fukume*), "The foreign residents of Sendai are included in the above." Owing to some mistake the foreign residents who had no official status and who should have assembled at this place, wandered about in a somewhat forlorn condition and ended by occupying a less advantageous position. (2) Next was a body of soldiers. (3) The students of the Second High School. (4) The students of the Sendai Special School of Medicine, Middle Schools, &c. Among the bodies on the left hand side extending beyond those mentioned above were the holders of various honours, the principal tax-payers, journalists, honorary members of the Red Cross Society, members of the Local Board of Commerce, Members of the Barristers' Association, the heads of villages and towns, the students of the Military Preparatory School, &c.

The crowd was as quiet and orderly as are all Japanese crowds on such occasions. At the break up of the vast assembly, however, there was considerable bustle and confusion and pick-pockets doubtless reaped a good harvest. One of these light-fingered gentlemen was unfortunately enough to extract a watch from the pocket of Mr. W. Denning, who seized him on the spot with the watch in his hand and despite the fellow's struggles handed him over to the police. The town of Sendai has been infested with robbers of late. Only three weeks ago Mr. Denning's house was entered in the middle of the night, the thief making off with two great coats and several hats.

The fireworks and illuminations on the night of the 7th were much interfered with by the rain, but they will doubtless be renewed during the three remaining nights of the Emperor's sojourn in the town, for His Majesty proposes to go up to Semene every morning and return to Sendai at night, unless the indisposition from which he has been suffering should interfere with the carrying out of this arduous programme. In the latter case it is said that His Majesty will rest in Sendai till Sunday, the day of the Kwampeishiki, or great review.

Not a drop of rain interfered with the military manoeuvres. The weather cleared Thursday night and Friday, Saturday and Sunday were perfect days—warmer than the oldest inhabitants remember for the time of the year, but with a delightful crispness in the air, mornings and evenings. The line between Sendai and Semene has been in the hands of the War Department since the 6th inst. and it is said that in order to facilitate the rapid return of the troops ordinary traffic from Sendai northwards will be suspended for several days after the 10th. The Emperor inspected the manoeuvres every day, starting from Sendai at 6.30 and returning to that town at sunset. On Saturday His Majesty alighted from his horse and walked some distance in order, we presume, to get a better view of what was going on.

On Friday the 8th about 120 invitations were

* Vide Proceedings of the Asiatic Society of Japan, Vol. XXI, pp. 63, et seq.

issued, in the name of the Committee appointed to superintend the entertainment of foreign guests, to a dinner held in the Miyagi Ken First Middle School at 7 p.m. But we are informed that the dinner was given by Marquis Oyama. It seems that the entertainment of the foreign military attaches and a few other gentlemen who have been inspecting the manoeuvres has been a joint affair; the War Office Tokubetsu Taiyenshu Tô-kanbu (A Committee for controlling arrangements connected with the Manoeuvres) undertaking the catering for the big party, and the citizens of Sendai providing sleeping accommodation and other comforts. The trip to Matsushima already reported in these columns was planned and carried out by citizens of Sendai. Saturday's dinner was a very brilliant affair. The students' dining-hall in which it was held is sufficiently long to allow of 120 guests being accommodated in one extended line. The room was decorated with screens, flags, and foliage plants and a dinner was served such as Sendai had never known. The foreign community of Sendai was represented by the Committee appointed, the members of which were all present with the exception of Dr. de Forest and Mr. Cleveland. After dinner Field-Marshal Marquis Oyama, who acted as host throughout the evening, read a short address of welcome to the foreign attachés, which was translated into French and read by Major Sato, and also translated into Chinese. General Yang, of Nankin, replied in Chinese. His speech was interpreted by the son of Viceroy Chang Chi-tung, who spoke Japanese in a remarkably correct manner and with perfect accent. The dinner was attended by most of the distinguished visitors staying in Sendai at the time, with the exception of the Prime Minister who was prevented from being present. The guests included Prince Kanin, the Household Minister, Marquis Date and General Soga. A very large room, in the upper story of the building, handsomely furnished for the occasion, was used as a drawing-room. The authorities were fortunate in finding a building so new, well-arranged and spacious as the First Middle School. The Chinese visitors were put up at the Second High School and catered for separately there. The Chiugakko building has only been in use about a year. It is of most modern type, having one whole side of each class room filled with glass sliding windows; a great boon to the students and teachers on dull days. The ceilings of the rooms are lofty, the passages leading from room to room broad, and the school has been erected on a spot that commands a fine view of the prettily wooded hills on the other side of the Hirose.

The Review held on Sunday commenced at half-past eight and lasted two hours. The Imperial train on its return journey reached Sendai at a little after 1 o'clock. The arrival of the train each day was announced by letting off fireworks. Prince Komatsu drove from the station to the Second High School. It was originally thought that the Emperor would visit the school in person and every preparation had been made for this visit. But His Majesty decided on the evening of the 8th that Prince Komatsu should act as his substitute. The students were all inspected in military costume and fully equipped in the school grounds and the teachers were presented to the Prince in a body. Certain rooms had been specially prepared for the reception of the Emperor. One large room, where His Majesty was to have rested for a few minutes, will not, it is said, be used again as a classroom. In the upper part of the building there was a display of old screens, various works of art, ancient scripts, stuffed birds, geological and other specimens. The Prince had spent the whole morning at the review and was doubtless somewhat fatigued. This may account for the shortness of his visit, which did not extend over about twenty minutes. On the afternoon of the 10th a very large assembly of high class civil officers and military men were entertained at the castle by the Imperial Household Department. It is said that some 2,000 invitations were issued. The guests all met at half-past four and after some time had been spent in conversation they partook of a standing meal. In this entertainment

the chief feature was the predominance of the military element; only some 240 civilians being invited. A most brilliant display of fireworks was continued up to the time of the breaking up of the party.

During the manoeuvres two special trains left Sendai every morning. The first of these carried all the high officers and members of the Staff, the foreign attachés and a very large number of visitors and left punctually at 6 o'clock. The first-class carriages were occupied by the foreign attachés and the high rank Japanese officers only. The second-class carriages by Japanese officers of lower rank and by a certain number of Chinese officers. The third-class carriages were filled with what were called *satsu haikwanja*, "spectators of various sorts." In this category were included journalists, newspaper reporters, photographers and the like. Tickets were issued before the commencement of the manoeuvres, by the Tokubetsu Dai Yenshi-tôkanbu, which entitled the holders to travel by the military trains and to be furnished with jinrikisha at a fixed rate at Semene.

The second train alluded to above carried the Emperor, Princes Komatsu and Kanin, and a few other important personages, and started from fifteen to thirty minutes after the ordinary military train. It took long to satisfy the curiosity of the Sendai people, for morning after morning they were up before the break of day to secure places along the road over which the royal carriage was to pass. But the crowds were orderly and quiet. Sunday's review is thus described by a correspondent:—"The weather was perfect, one of these calm, bright, clear autumn days that old residents in Japan know so well and never cease to enjoy. The arrangements were as perfect as the weather. There was no crowding, no confusion, no noise. Everybody seemed to have a place, to know it and occupy it. At every station and every cross-road there was the same expectant group with the ubiquitous policemen in charge, giving instructions as to the demeanour that suited the occasion. One pleasing feature was the number of school children that appeared everywhere all in their Sunday best with flags and banners, attended by their teachers all dressed in frock coats. The journey to Semene occupied about an hour and a half. In the early morning the orange and crimson autumn tints were very lovely. The line begins by traversing the great Miyagi plain and then runs amid small hills affording pretty peeps at well-wooded valleys here and there, but the scenery on the whole is decidedly tame. What happened at Semene I was not able with my limited knowledge of Japanese to find out, but the train stopped before it reached the platform. The agile foreign attachés seemed to welcome the diversion of leaping down, clearing a few ditches and making their way to their horses. But some of the Chinese visitors were quite unaccustomed to do anything in the way of bodily exercise beyond sitting still on a horse or in some conveyance and, moreover, be it known, they were very heavy. It was evident that the train did not intend to move on and these gentlemen had to be lowered from the cars like so much bulky cargo—a proceeding which caused no small amount of amusement to onlookers. At the station the foreign attachés all mounted their fiery steeds and *satsu* or non-descript visitors like myself contented themselves with riding behind two men in jinrikishas. The ride to the plain of Nakamura where the review was held was a perfect pleasure. The road had been put into perfect order and it wound through rice-fields enabling one to catch glimpses of vehicles and gaily dressed horsemen ahead. The distance was $2\frac{1}{2}$ *ri* and all along the route there were spectators on both sides of the road, who were kept from blocking the way by fragile straw rope stretched the whole distance. At short intervals where the assembly was large, policemen were to be seen, whose chief duty it was to enjoin perfect silence as the Emperor passed and to see that the costume and general attitude of the spectators were strictly correct. Many of the little bridges we crossed were ornamented with bamboos, and the impression was conveyed that there was an universal desire among the peasants

to devise some method of doing homage to the Emperor as he passed. The review was very merry but also very impressive. I was struck by the personal remarks of the Western crowd. Every passer by, whether French, English or German, Russian, or otherwise, was treated with equal respect. At the scene of the review newspaper reporters and photographers seemed very much *en evidence*. The Imperial tent was erected on a slightly elevated spot that enabled His Majesty to command an extensive view of the troops as they formed up on the plain. Immediately after the Emperor's arrival he received the foreign attachés and other distinguished visitors and then, mounting his favourite horse, accompanied by Prince Komatsu, Prince Kanin, and Field-Marshal Oyama, and followed by the foreign attachés His Majesty started off on his round of inspection. Directly the Emperor had passed each body of troops the soldiers closed in, so that by the time His Majesty had finished the inspection all were in position to begin the march past. To any one who like myself has never witnessed such a spectacle, the sight of 20,000 troops marching in perfect order, with thousands of weapons sparkling in the sun and gay uniforms adding to the brilliancy of the scene, the effect was very imposing. The stillness and clearness of the autumn air added greatly to the impressiveness of the occasion. One felt as if a gust of wind would break the spell and mar the grandeur of the spectacle. The senses must have no diversion whatever in order to appreciate such a sight. The march past over, after a very short interval, the Emperor entered his carriage and drove back to the station, followed by the Imperial suite and the foreign attachés. Refreshments were served at Semene and by 2 p.m. we were all back in Sendai again."

A royal message was read to the troops in which the Emperor congratulated them on their proficiency and reminded them that the state of the world is such that enormous importance must be attached to army training.

On the afternoon of the same day the Imperial Household Department invited a very large number of military men and a sprinkling of civilians to a party held at the Castle. It was not at first expected that the Emperor would be present, but in order, it is said, to show his appreciation of the way in which the manoeuvres had been planned and carried out, and in order to express his satisfaction with the loyalty shown by the citizens of Sendai on the occasion of the Imperial visit, despite the fatigue caused by His Majesty's exertions in the morning, the Emperor attended the party and through the proper channel made known to the honoured guests how highly he valued their devotion to him. The foreign attachés were the only foreigners present; as the Imperial Household Department had orders to invite such civilians only as had actual rank as *kôtôkan*. It does not seem to be known to some foreigners that there is no such thing as a foreign *chokunin* or a foreign *sônin*, that is, that no foreigner can legally hold any official rank in Japan. The foreign holder of *chokunin* rank is described in Japanese as *chokunin taigisha*, that is, one who is treated as a *chokunin*, and the same is the case with those foreigners who hold *sônin* or *hannin* rank. But this term *taigisha* is not exclusively applied to foreigners, and there are a large number of Japanese who while not actually holding a certain rank are treated as though they did. So that when, as on the occasion described above, two foreigners who were *kôtôkan taigisha* did not receive invitations to an Imperial party, it has to be borne in mind that the restriction which excluded them excluded some fifty or sixty if not a hundred other Japanese gentlemen. The party of Sunday afternoon was intended principally for the military and was, it is said, highly appreciated by them. The weather continued fine up to noon of the 11th, the day of the Emperor's return to Tôkyô. The arrangements at the station were the same as on the day of His Majesty's arrival and in the quietest manner possible amid solemn strains of music the Imperial train steamed out of the station and the wearied citizens of Sendai realised that the excitement was over. Rain set in the afternoon and then began

a hauling down of flags and a stripping off of the brilliant attire which the streets had worn for nearly a week. The Emperor, it is stated in the newspapers, has contributed altogether 4,000 yen towards the expenses of the town of Sendai and various smaller sums for different objects.

THE KYOTO, HOTEL AFFAIR.

We are obliged to refer again to this weary affair since Mr. Groom, chairman of the Board of Directors, speaking through the columns of the *Kobe Herald*, has made observations which can not be passed in silence. Mr. Groom is reported to have said:—

"The *Mail* only tells a part of the story. Captain Brinkley refers to certain negotiations he entered into and for which he expected a handsome remuneration, but the Directors did not entertain the proposal as any negotiations that it was possible for Captain Brinkley to carry through they considered they could have accomplished themselves without having to incur any further outlay. There certainly was, amongst many others, a proposition by Mr. Nakane for which another considerable fee would have been due, but it was not considered suitable, as it would (if practicable) have been too costly."

It is for Mr. Groom and the public to judge whether he has acted properly in seeking to obscure the facts of the case by introducing the question of remuneration which has nothing whatever to do with the point originally discussed. Moreover, he has evidently been greatly misinformed. Mr. Kirkwood, being prevented by sickness from negotiating for a road to the property of the projected hotel, asked Captain Brinkley to take up the matter and stated that he, Mr. Kirkwood, was willing to pay a certain sum out of his own pocket could the difficulties be overcome. Captain Brinkley emphatically declined to entertain any proposal of the kind. He stated his willingness to lend his aid as a matter of friendship. Mr. Kirkwood being prostrated by sickness, and he never had any communication of any kind with the directors on the subject of remuneration or any other subject, nor would he have thought of accepting anything from them whatever the issue of the negotiations had been. We do not suggest that in such cases those that give time and trouble are not entitled to remuneration, but we do say that in this particular case Captain Brinkley's action was prompted by motives of friendship in the first place, and in the second by a desire to remove a complication which seemed likely to create an injurious impression on the public mind. Whether under these circumstances Mr. Groom is justified in attempting to discredit Captain Brinkley and to obscure the main issue, it is unnecessary for us to consider.

The main issue is whether the directors of the Hotel, in their attempt to obtain a convenient means of access to their property, were obstructed by officials acting under the influence of anti-foreign feeling, and Mr. Groom, in his capacity of chairman of directors, alleged that they were so obstructed. There was not the slightest obscurity about it. It was a distinct and unequivocal statement, and it was interpreted by the public press as a declaration that foreign enterprise need not hope to succeed in this country owing to the obstacles offered by anti-foreign prejudice. It seemed to us that the circumstances did not warrant any such view. So far from opposing factitious impediments, all the officials consulted had shown themselves helpful and sympathetic. Above all, there was one conclusive proof; namely, the proof that Mr. Nakane had taken the trouble to map out an alternative road and to ascertain by direct consultation with the owners of the land over

which the road would pass the sums for which they were willing to part with their property. That fact, it seemed to us, completely disposed of the suspicion that officialdom had set itself in opposition to the hotel project. We therefore put it forward prominently. What was Mr. Groom's rejoinder? That no such proposition had ever reached the Directors, and that he was quite sure Captain Brinkley could not substantiate his statement. These things are fresh in the recollection of our readers, as is also our explanation that the map was actually drawn, that it was accompanied by an accurate statement of figures, and that the whole had been placed by Captain Brinkley in the hands of Mr. Kirkwood, after which the former knew nothing. What is Mr. Groom's second rejoinder? "There certainly was, amongst many others, a proposition by Mr. Nakane for which another considerable fee would have been due, but it was not considered suitable, as it would (if practicable) have been too costly." Now Mr. Groom's original allegation was that there was no such proposition; that the Directors had never heard of it, and that he defied Captain Brinkley to prove its existence. It is for him to reconcile his present attitude with his former one. We may add, however, with regard to his confusing interpolation "among many others," that there were never more than three propositions upon the *tapis*; namely, access by the *Hokokkai* road; access through the grounds of the Miyoko-in, and access by Mr. Nakane's alternative road. The cost of purchasing the land for the last would have been some eight thousand yen, to which must have been added the expenses of making the road, and a fee to the Japanese negotiating the purchase of the land, as is usual in all countries. On the other hand, the Hotel would have had a road of its own, and could have sold or let the spaces along the sides for shops, whereas the Directors were willing to pay ten thousand yen for the mere right of using the *Hokokkai*'s avenue. These are simple facts.

We observe, further, that the *Japan Herald* describes as "gratuitous and uncalled for" and as "having an insulting ring" the following observation of ours:—

"Perhaps finally it may not be amiss to remind Mr. Groom and his friends, that so far as this matter is concerned they are only proprietors of a hotel and that they themselves have no title to be heard in any other capacity."

By way of illustrating its own ideas of what has not "an insulting ring" and is not "gratuitous or uncalled for," our contemporary goes on to say:—"Captain Brinkley, disappointed, it would appear, of the handsome remuneration he was hoping to become possessed of at their hands, turns upon them and twits them with being only the proprietors of a hotel and declares that they had no other title to be heard. We are of opinion that his smothered wrath has betrayed him into an unseemly exhibition of combined malice and ignorance." If an evidence had been needed of the necessity of our remarks these graceful comments of the *Japan Herald's* would have amply furnished it. It was precisely because in the sayings of Mr. Groom and the writings of his advocates we detected a "ring" of pretension quite beyond the mere question of hotel projecting, that we ventured to offer our reminder. Apparently, however, the *Japan Herald* thinks that when men are projecting a hotel and are negotiating for an avenue of approach to it, it is "an unseemly exhibition of combined malice and ignorance" and an evidence of "smothered wrath" to remind them that

"so far as this matter is concerned they are only proprietors of a hotel" and that "they themselves have no title to be heard in any other capacity." Certainly had we supposed it an insult to speak of projectors of a hotel as hotel-proprietors so far as their immediate enterprise is concerned, we should have been more careful to deal tenderly with such delicate susceptibilities. But the long and short of the matter is that in the absence of solid argument, the writers and speakers who have entered the field, are obliged to fall back upon sentiment and recrimination. Mr. Groom takes refuge in talk of remuneration; the *Japan Herald* has recourse to prattle about "smothered wrath" and "unseemly exhibitions of combined malice and ignorance." We can not congratulate them upon the nature of their evasions.

COUNT SOYEJIMA ON LI HUNG-CHANG.

Count Soyajima, who enjoys the reputation of having a very intimate knowledge of Chinese affairs, thinks that Li Hung-chang was not a man of strong will. He never overrode obstacles to reach the goal of his views, but always allowed himself to be guided by circumstances. He was, in short, an opportunist. Even the merit of great learning is not attributed to him by Count Soyajima, and he is moreover declared to have owed his successes rather to good luck than good guiding. His creed was the old Chinese doctrine that it is better to bend than to break, and that the soft is always stronger than the hard in the long run. In 1895 he was betrayed by his subordinates—especially Lord Li Kin-fong, formerly Chinese Representative in Tokyo—into imagining that as Japan had adopted the system of conscription and thus lost the services of the *samurai*, it would be an easy matter to beat her troops. The Count also thinks that Li's failure to obtain any of his objects at the Shimonoseki conference was the origin of his subsequent leaning upon Russia; a conclusion which reflects upon the foresight of the Japanese negotiators, and is emphasized by a parallel case quoted by the Count from European history, namely, the issue of Germany's victory over Austria, when Prince Bismarck, by the easy terms he granted to the vanquished, converted Austria into a permanent ally of his country.

DEATH OF H.I.H. PRINCESS YAMASHINA.

We regret to announce the death of Her Imperial Highness Princess Yamashina which took place at 5.05 a.m. on the 11th instant. The Princess had been in a serious condition for some days, but her illness did not take a hopeless turn until 8 p.m. on the evening of the 10th. The event has aroused widespread sympathy in consideration of Her Imperial Highness' youth. There is no announcement of Court mourning, and it may therefore be assumed that the Chrysanthemum Party on the 15th instant will not be given up. The deceased Princess was the second daughter of Prince Kujo, and consequently the elder sister of the Princess Imperial. She was in her 24th year. Her marriage took place in 1895, and she is the mother of two princes and a princess, the birth of the latter having been the cause of her death. The Prince Imperial goes into mourning.

The funeral of the late Princess Yamashina will take place on the 17th instant, and will be conducted in accordance with Shinto rites.

TELEGRAPHIC INTERPRETATION.

From the editorial columns of the *Japan Times* we quote the following:—

What we find it difficult to understand is that words can be changed at random in a telegram without the reader being made aware of the liberty taken. Thus, for instance, in the *Japan Mail* of the 30th ult. we find that "Gorringe has summarily tried Schultz and some other prisoners who were wearing khaki uniform." The original telegram, which we have before us as we write, read "Gorringe summarily tried shot some prisoners khaki uniforms." Naturally we made out that Col. Gorringe had tried and shot the prisoners in question, and we notice that the British newspapers in China all understood the sentence in the same way.

On the 31st. ult. Reuter sent another telegram concerning the commercial and industrial depression in Germany,—a telegram which would have caused much anxiety and sympathy for Germans to be felt in Japanese commercial circles owing to the good relations that exist between the two countries were it not for the fact that the Japanese knew well that the difficulty was only temporary. This telegram read in the original "large iron works Saxony closing" and we took it to mean, as we think any unprejudiced person would have done, that one large iron works had closed. But not so the *Japan Mail* to which it conveyed the idea that "iron works in succession are closing," although the word "succession" is not to be found at all in the original telegram.

Finally, on the 5th inst. Reuter wired from Shanghai "times remarks details show fight no sense reverse British" which the *Mail* read:—

"The *Times* remarks upon the courage shown by Colonel Benson and the men under his command."

These blunders, we must frankly confess, we find it impossible to account for.

It will be observed that three errors in interpreting telegrams are attributed to this journal. The first is that we read "shot" as "Schultz"; the second that we read "in Saxony" as "in succession," and the third that we made the London *Times* speak of the courage shown by Benson's troops, whereas what *The Times* really said was that the fight had not been in any sense a reverse for the British. Our Tokyo contemporary knows very well that Reuter's telegrams reach us through a different office from that which distributes them to the *Japan Times*, and, moreover, that after receipt by the editor of the *Japan Mail* in Tokyo, they have to be telephoned to Yokohama, generally between 9 and 10 o'clock at night, in order to catch the paper before going to press. Thus much premised, we have only to add that the word "shot" came to the editor in Tokyo as "schultz"; that the expression "in Saxony" sounded to the receiver at the telephone in Yokohama as "in succession," and that on the night when the remarks of the London *Times* had to be telephoned, the confusion caused by false-contact wires was so great that it was impossible for the person at either end to be quite sure of the other's words.

Now we have no right whatever to complain, and we do not complain, that errors of this kind should be pointed out, if a contemporary thinks it worth while to devote its leading columns to such a subject. But we have a most distinct right to complain, and we do emphatically complain, of the tone adopted by the *Japan Times*. That journal unmistakably accuses us not only of "changing words at random in a telegram," but, also of allowing our "prejudices" to influence our rendering of the messages. In short, it accuses us of the miserable chicanery of attempting to mislead the public by garbled telegrams. Such charges do not lie within the range of reputable journalism. Of course it is quite easy to detect the purpose animating our contemporary's article. But with that we need not concern ourselves. Whether the *Japan Times* deliberately employs its columns to impugn the honesty of the editor of this journal, or whether it allows them to be employed by another for

that purpose, the result in the same so far as we are concerned, and the insult is equally unwarrantable.

BLACK-MAILING.

A court of first instance has sent forward for public trial Mr. Hasebe Tempu, editor of the *Choya Shinbun*. This person is charged with black-mailing of the most flagrant nature. He commenced by attacking the Fifteenth Bank in connexion with the relations between it and some other banks, and the result was that being approached for the purpose of inducing him to suspend the farther publication of such articles, he demanded a sum of 1,500 yen, but was ultimately content to take 800, of which 150 went to the intervening barrister. Mr. Hasebe then turned his pen against the Teikoku Seimei Hoken-Kaisha, and his writings were of such an injurious nature that the Insurance Company communicated with him through a go-between. Hasebe asked a sum of a thousand yen as the price of silence, and the Company professed willingness to pay, but required that a responsible member of the *Choya's* staff should attend to receive the money. This condition seems to have alarmed the black-mailer. He did not put in an appearance, and legal proceedings were then instituted with the result above indicated.

In connexion with this we observe that the evil custom of crying the contents of newspapers is again commencing. This habit was formerly productive of serious abuse. The vendors of a sheet containing a libel on some individual, would repair to his dwelling, and begin to vociferate the objectionable story in the street opposite his house. The unfortunate householder generally hastened to buy up the vendor's stock of journals, as the most effective way of checking the nuisance. Presently another vendor would come along with two or three hundred additional copies, and so the black-mailing went on. The police finally checked this abuse by forbidding the sale of journals by criers, but apparently the thing is beginning again.

MR. ROMANOFF.

Mr. Romanoff arrived in Kobe on the 7th instant and was received by an official of the local office, by the Russian Consul and others. He visited the warehouses of the Mitsui Bussan Kaisha and the Kawasaki shipbuilding yard, and returned to his steamer in the evening. On the 8th he was to start for Kyoto and Osaka, returning to Kobe on the 10th and setting out at once for Port Arthur.

Mr. Romanoff has been saying some very complimentary things about the beauty of Japan's scenery, the charm of her climate, and the rapidity of her material progress. All that has become the fashion with tourists now-a-days, and no special importance attaches to it. But Mr. Romanoff has also made some political remarks. He ridicules the notion that the interests of Japan and Russia conflict in the East. The interests of a country centre upon its commercial and industrial development, and Russia and Japan meet there on common ground. When the Sôul-Fusan Railway is completed and brought into connexion with the Siberian system, the products of Japan will find their way direct to the trade centres of northern Asia where undoubtedly a considerable market offers. Thus Japan has only to welcome

the approach of Russian railways, and there is every reason for the two countries to be on the best of terms, for each can materially promote the other's interests. Mr. Romanoff apologised for the mistake recently made by the Vladivostok Authorities in applying the new port dues to Japanese vessels, and he added that whenever the Japanese saw any reason to complain of the treatment they received from Russian officials, there should be no sort of hesitation in preferring a statement of the grievance. Mr. Romanoff concluded by expressing his great regret that want of leisure did not allow him to proceed to Tokyo, where he had looked forward to meeting the statesmen of Japan.

Mr. Romanoff visited Osaka on the 9th and after luncheon at the Osaka Club, inspected the new harbour works, returning to Kobe the same evening, where he took ship for Port Arthur.

FINANCE.

Tokyo newspapers publish a statement attributed to the Minister of State for Finance, with regard to the arrangements that are to be made for next year's Budget, but in truth His Excellency's *exposé* does not convey particularly clear information. The main facts put forward by him are that a sum of 70 millions was required for next year's undertakings, and that out of that amount 9 millions could be obtained by carrying over unexpended appropriations of previous years, and 7 millions, approximately, by a loan from the Bank of Formosa. Thus 54 millions, had to be found, and as proposals to purchase bonds had been received from America, negotiations were opened. Finally, however, a satisfactory agreement could not be concluded and the Treasury had to adopt some other plan. It decided, therefore, to obtain 25½ millions from the Deposit Bureau, 14¼ millions from the Indemnity, and 14 millions by economies and by re-imbursements of money held over in the Departments. A total of 54½ millions is thus obtained, but our readers will probably agree with us that the details present some obscurity. So far as we can perceive, the 25½ millions obtained from the Deposit Bureau is made up of a loan from the Post Office Savings Bank of some 15 million yen, and an appropriation of 10 millions from the sum allotted to the sinking fund. But we are obliged to confess frankly that our explanation is conjectural. Not until the Budget is laid before the Diet will it be possible to speak with absolute certainty. In the meanwhile the public must rest content to know that the Treasury has found some more or less satisfactory means of dealing with the situation.

THE KING'S BIRTHDAY.

His Britannic Majesty's Minister and Lady MacDonald gave a garden party on the 9th instant to celebrate the King's Birthday. The weather was superb, and the extensive grounds of the Legation presented a charming aspect, especially the eastern lawn where a row of fine maples planted by the Minister last spring with special view to the Birthday fete, added their brilliant autumnal tints to the general gaiety of the scene. The guests numbered about three hundred. They included all the principal British residents of Yokohama and Tokyo, the members of the Corps Diplomatique, a number of British naval officers, and many Japanese Ministers of State and high digni-

tarries. A buffet for tea and coffee stood on the Western lawn, while on the Eastern a large marquee was erected for general refreshments, numerous tables being provided on the lawn for the accommodation of the guests. All these arrangements were excellent, so that there was happy freedom from the crushing and confusion too often witnessed at large garden parties in Tokyo. A British naval band played an agreeable selection of music, and the younger members of the party enjoyed an *al fresco* dance, an entirely novel feature of Birthday celebrations in Tokyo.

The anniversary of King Edward's birth was celebrated in Yokohama by most of the British business houses closing for the day and hanging out flags over their premises, and the men-of-war fired a salute at noon, while in the evening, as reported in another column, the local branch of the China Association held their annual dinner at the Oriental Hotel.

At Nagasaki the British residents dined together and had a dance; at Bikan a dinner was held, and at Kobe there was a dance on Friday night which lasted into Saturday morning.

A WITNESS.

Independent testimony with regard to affairs in South Africa is difficult to obtain, but an exception has to be noted in the case of Herr Ohlsson, Swedish Consul-General at the Cape, who being interviewed by the Gothenburg Journal of Inland and Maritime Commerce (*Gothenborg's Handels-och Sjöfarerts Tidning*) gave the following testimony as to the origin of the war, according to the *Spectator's* translation:—

"The cause that actually led to the out-break of the war was that the Europeans in the Transvaal could no longer endure the oppression of the Boers. In spite of the fact that it was the Outlanders who had brought the Transvaal finances into so flourishing a condition through the heavy taxes they had to pay, they were refused all voice in the determination of the policy of the State (the so-called Franchise question). The Boers considered themselves now fully equipped, and in alliance with the sister Republic believed that with the further support of their Dutch kinsmen in Cape Colony, which they regarded as certain in case of war, they could easily emancipate themselves altogether from the English power and repulse every attack. When the English saw that the Boers had armed in earnest they sent troops up to the front to protect their own Colonists in case of attack. The Boers became restless and demanded that the troops should be withdrawn; the English refused, and the Boers declared war." "Do you think that the war, then, could not have been avoided?" "Yes, I was fully convinced that if war had not begun then, before two years were out the Boers would have had so worked on the Cape Dutch by secret bribery that the English would have had to begin the war from Cape Town and Durban. The object of all the discontented Dutch was, once they had got rid of the English supremacy, to combine into a South African Federation on the model of the United States. I am personally acquainted with Krüger and Leyds, and know that this was the plan."

The same witness has something to say about the English treatment of the prisoners:—

"It is not true that the English treat Boer prisoners badly. The real state of the case is that the Boer prisoners have an extraordinary good time, better than they were ever accustomed to before. They get good food and warm clothes, and are better looked after and cared for than (to take an instance) English soldiers on a campaign. The only thing they are deprived of is their liberty. When they are sent after capture to the camps at Simon's Town and Cape Town they travel in covered railway carriages, and receive strong hot, nourishing food on the journey specially prepared for them,—hot tea, coffee, &c., at the stations. Contrast with this the case of the English soldier, who has to be content with open cattle trucks when he is sent to the front, and receives on the journey only his customary Service ration of cold meat. In the camps the prisoners have opportunity for all kinds of sports and pastimes such as football, tennis, cricket, etc. They are allowed to walk freely about inside the camps, which are pitched

on free, open, and healthy sites. As Consul-General of the United Kingdom at Cape Town, I was myself requested by the Swedish-Norwegian Foreign Minister to inquire into the state of things, and to supply our fellow-countrymen among the prisoners with food and clothing in case such help were needed. I found that all the prisoners were well satisfied with the way they were treated by the English; the only thing they were deprived of was their liberty. I know, furthermore, that the prisoners at St. Helena and Ceylon are well satisfied with their treatment. Several letters they have written on the subject to relations have been published in the Cape papers, and copied into English journals. Some of the prisoners are also allowed to leave the camps on parole in order to visit relations. And when the English Heir-Apparent lately stayed at Cape Town, he paid a visit to the camps at the request of the prisoners and received a regular ovation, the prisoners amongst other things presenting him with gifts made by themselves. Many prisoners earn pocket-money by manufacturing various articles."

KOREA.

News comes from Seoul that another outrage has been committed by Korean soldiers. The scene of the incident was Kaisong, and the victims were two Japanese subjects, engaged in guarding some ginseng plantations the property of Japanese. Korean soldiers broke into the enclosure and killed one of the Japanese guards, wounding another severely.

Mr. Pok, whose visit to Japan in connexion with the manoeuvres has evoked some comment, is said to have been appointed a Minister Plenipotentiary *en disponibilité*. One rumour says that his new office is ambassadorial, but an ambassador without an embassy is even less credible than the idea that a Minister of Foreign Affairs should be appointed a Minister Plenipotentiary without a Legation during his sojourn in a foreign country. Before Mr. Pok left Seoul for his expedition to Japan, there were hints in the air that his absence from the Korean capital might be taken advantage of to carry out some enterprises which were vaguely spoken of. The mystery is enhanced by this last incident.

It is suggested that the reason of Mr. Pok's removal from the position of Minister of Foreign Affairs is the stand he took with regard to the grain-veto question. His colleagues in the Cabinet were opposed to removing the veto, but Mr. Pok admitted the justice of Japan's remonstrances. Apparently, if that be true, he under-estimated the force of the opposition he had to encounter. Or, is another construction to be put on his action, namely, that he thought it better to absent himself from Seoul before the storm broke?

This event illustrates the foresight of Mr. Shimura, the *Nichi Nichi Shimbun's* Seoul correspondent. Writing on November 1st with reference to the abolition of the grain veto, the grant of a settlement at Masampo and the trial of soldiers who had insulted or assaulted Japanese subjects, he spoke with satisfaction of the decided recovery of Japanese influence in the peninsula, but said that Mr. Pok's visit to Japan might not be altogether a source of satisfaction. Members of the Cabinet in Korea are generally spoken of as "three-monthly ministers," that being the average duration of their tenure of office. But Pok had held his portfolio for a year and a half, and that fact alone sufficed to render his continuance in office insecure. His action about the grain veto, the correspondent went on to say, had provoked much opposition, and possibly his visit to Japan, instead of being undertaken for State purposes, was prompted by considerations of personal safety.

Intelligence from Korea announces a riot at Kyongchow in Kyongsando. The number of insurgents is put at from 300 to 400, and it is added that the affair appeared sufficiently formidable to demand the despatch of a body of troops from Seoul.

It is stated that the negotiations opened by the Russian Consul at Fusan for the purchase of a lot of land on the northern shore of the bay, have been transferred from the local officials to diplomatic hands in Seoul.

Two Japanese torpedo-boats have proceeded to Masampo, and have been followed by the cruiser *Kasagi*.

The latest interpretation of Major-General Pok's strange experience is that his journey to Japan for the purpose of viewing the manoeuvres was interpreted in Seoul, or represented by his enemies there, as part of a plot to ally himself with the exile Pok Yong-ho, and effect the complete overthrow of the Franco-Russian party. Alarmed at this prospect, the essentially pro-Russian Li Yong-ik, set himself to contrive Pok's downfall during the latter's absence, and succeeded so well that he obtained Pok's removal from the Cabinet to the list of ministers plenipotentiary *en disponibilité*, and also contrived the dismissal of the Minister of Agriculture, Kwon, who too has the reputation of being pro-Japanese. Mr. Kwon is to be succeeded by a Mr. Liu, reputed to be strongly pro-French, and Mr. Pok's portfolio is to go to Mr. Li, now Korea's Representative in St. Petersburg. We take these details from the *Chin Shimbun*, but we do not by any means vouch for their accuracy. No official intimation of Pok's removal from the post of Minister of Foreign Affairs has yet been received in Tokyo. Certain correspondents of Japanese journals constantly represent Seoul as a hot-bed of intrigue, the pro-Japanese party being supposed to be always plotting against, or plotted against by, the pro-Russian and pro-French parties. From a political point of view Seoul has long been a very farcical kind of place, and few people can persuade themselves to regard it seriously. But it is well to dismiss the idea that these intriguing politicians have the active support of the Powers whose names they drag through the dirt of family cabal and selfish ambition. They may call themselves "pro-Japanese," "pro-French," or "pro-Russian," but the plain truth is that they are "pro-Li," or "pro-Min," or "pro-Pak," or pro-something-else with which neither Russia, nor France nor Japan wants to have anything to do.

News from Korea says that the recent murder of a Japanese subject at the ginseng plantation in Kaisong was not the act of a Korean soldier, as originally reported, but the act of a robber. The culprit has been seized and sent under escort to Chemulpo where he appears to be undergoing examination at the Japanese Consulate, though how that arrangement is effected we can not tell.

Mr. J. H. Gubbins was to leave Seoul on the 9th instant, Mr. Jordan having arrived to resume charge of the British Legation in the Korean capital. It is understood to be Mr. Gubbins' programme to pay a visit to Japan and subsequently to proceed to England on leave.

POLITICAL NOTES.

The adherents of the *Seiyu-kai* in Kyoto, Osaka, Shiga, Wakayama and Nara have formed a branch association calling itself the *Kinki-kai*. Thus the *Kinki-kai* may be said to be a coalition of three prefectural and two urban branches of the big party. The new association held its first meeting at Nara on the 10th instant, and passed resolutions that the remaining abuses of clan government must be abolished and the reality of constitutional institution achieved; that the expenses of carrying on public works must not be taken from the proceeds of taxation; that the Party must not give its assent to any government undertakings unaccompanied by administrative and financial reform and so on. The second of these resolutions is evidently and frankly opposed to the policy of the present Cabinet. There is already an Eleven Branch Association of the *Seiyu-kai* in the Tokaido districts, and the *Kinki-kai* has decided to amalgamate with the *Tokai Jinsyu-kai* for the purpose of holding a general meeting in Tokyo on the 2nd of December. Evidently the branches mean to force their views upon the leaders of the Party. There is, in fact, no such thing as genuine party leadership in Japan. The tail always wags the dog.

It need scarcely be said that the resignation of Baron Kodama has set the tongue of rumour wagging. Nothing can be more consistent than the habit of Japanese political agitators. They invariably discover a reason for the resignation of a Minister. President whom they wish to drive out of office, and then they attribute the reason to the Minister himself, which, it must be confessed, is a much more artistic method of procedure than the common plan of constituting themselves critics. Their statement now is that Viscount Katsura, recognising the effects of his failure to sell bonds abroad, is determined to resign, especially as he sees the position of chief of the Head-Quarter Staff awaiting his acceptance. It is too transparent to be striking.

As the time for the Diet's assembly approaches, rumour busies itself more and more with the question of the *Seiyu-kai's* attitude toward the Cabinet. It is indisputable that the *Seiyu-kai* commands a majority in the Lower House, and that if its leaders decide to vote against the Government, the latter will find itself once more in the embarrassing position of being unable to pass the Budget. As a general rule the Cabinet has always in reserve a weapon of some potency, namely, the threat of dissolution. Members do not like dissolution. It means at the best that they have to incur considerable expense in appealing again to the constituencies, and that they run the risk of losing their seats, while they also lose, temporarily at all events, one half of the stipend paid to them each session. The method of paying the members is to hand to each a sum of a thousand *yen* two or three days after the opening of the session, and the remaining thousand at the close of the session. Thus, in case of dissolution, the second payment is deferred until the re-elected Diet meets some months subsequently. That, however, is not a serious question compared with the irksome necessity of having to go again to the polls, and it is the prospect of the latter eventuality that induces many members to shrink from carrying opposition to the point of defiance. But the restraint will be virtually inoperative in the approaching session inasmuch as a general election under the new law is in-

evitable next year. Recalcitrant members thus find themselves untrammelled. It would seem, further, that the leaders of the *Seiyu-kai*—if the statements made by their organ, the *Seiyu*, be credible—have determined to oppose the Cabinet on two grounds. The first relates to the restoration of the Capital Reserve Funds. Some 20 million *yen* have been taken from the Naval Capital Reserve of 30 millions, and have been expended on account of the Chinese campaign. It was for the purpose of restoring that amount that the *Seiyu-kai* last session voted an increase of taxation. The law indeed requires that whenever monies are taken from the Capital Funds, their restoration shall be effected with the least possible delay. In consequence, however, of its failure to sell bonds, as originally contemplated by the *post-bellum* programme, the Cabinet finds itself obliged to apply the proceeds of the increased taxes to public undertakings, and the leaders of the *Seiyu-kai* are understood to be opposed to that change of plan. It is not apparent that they have any other method to propose, for they do not openly identify themselves with postponement of the *post-bellum* undertakings, which seems to be the only alternative. They merely raise the objection that having voted for increased taxation with a clearly defined object, they decline to allow the proceeds of the taxes to be appropriated to other purposes.

The second point relates to augmenting official salaries. It is understood that the *Seiyu-kai* leaders insist on having some radical measure of financial reform by way of antecedent to such augmentation. They frankly admit the necessity of doing something for the greatly underpaid official, but they allege that if, in the face of that obvious necessity, they incurred, last session, the unpopularity of voting against an increase of emoluments, it was because they felt that financial reform must take precedence. They do not openly decline what they mean by financial reform. Their position is simply that they will not do, this session, for a Katsura Ministry what they refused to do, last session, for an Ito Cabinet.

Of course if the *Seiyu-kai* follows its leaders, next session will be stormy once more, and the public will see another appeal to the country. Some authorities allege, however, that the rank and file of the Party are not willing to be led to a resolute assault, and it must be admitted that the result of the recent meeting of the *Kinki-kai* seems to endorse that view, for the gunpowder resolutions originally proposed for the meeting's acceptance were reduced to very milk-and-water generalities. Still there can be no doubt that the political atmosphere is disturbed, and we therefore lay before our readers the principal heads of dissension.

VIEWS.

We certainly do not want for magnificent assurance and the delivery of vehement journalistic judgments in this settlement. We have just been told that *The Times* and the *Spectator* are "supremely disgusting as a chorus of so-called criticism raised by smug, self-satisfied critics who shriek in patriotic horror at the bare suggestion that Ladysmith was ever in danger of capitulation;" that the indignation of the British public at finding that the man sent to relieve Ladysmith was actually the one to suggest its surrender is "silly and sickening hubbub;"

that when *The Times* affects amazement that the surrender of Ladysmith could ever have been contemplated it is guilty of "nauseating hypocrisy;" that its "expression of idiotic astonishment" at General Buller's "amazing defects of judgment and sense of military discipline" show that "what the sapient thunderer does not know about military discipline would make a much bulkier volume than what it does;" that these "precious arm-chair experts are a horde of social nuisances;" that "Mr. Rhodes is either a fool or a liar," that "the Uitlanders did not care a button for the franchise;" that the Jameson raid "was originally hatched by British capitalists with German names, a Minister of the Crown and a Privy Councillor aiding and abetting;" that Rudyard Kipling might "mercifully be left to stew in his own juice;" that "his mind is essentially coarse and brutal;" that *The Times* "disgraced itself by publishing his letters from South Africa;" and that "his growing ineptitude has since been established by that veritable 'howler,' the 'Lesson,' also emboldened in the columns of *The Times*." For the contents of one leading article that string of verdicts is pretty tolerable. "Blind and naked ignorance delivering brawling judgments all day long on all things unabashed" was never better illustrated.

MR. SONE IN OSAKA.

Mr. Sone, Minister of State for Finance, speaking in Osaka, said, in effect, that the main feature of the Government's financial programme next year is to postpone the continuance of all works not imperatively necessary. The total amount to be set aside for works carried out by means of loans, under the original programme, is 23,600,000 *yen*, of which total it has been decided to omit 6 millions on account of railway construction. Thus 17,600,000 *yen* remain. Large economies are to be effected by reducing the superfluous administrative staff, but the proceeds of that reform will be required for increasing the salaries of judicial official and underpaid servants of Government. Among new works, His Excellency mentioned as especially desirable the steel-rolling mill at Kure, the establishment of rail connexion between land and water in Yokohama and Kobe, the extension of the system of medical colleges and of industrial and commercial schools. The law provides that railway works are to be carried out with the proceeds of bonds sold in the market, but the Treasury, having regard to the economical conditions of the time, desires to carry out such works as far as possible by means of economies effected in ordinary expenditures. Doubts, the Minister added, have been expressed with regard to the feasibility of this programme, but it has to be observed that in consequence of increased taxation there accrues to the Treasury next fiscal year an additional revenue of 21 million *yen*, and further that the Chinese Indemnity of 50 million *yen* is in sight, from which sum, after the amounts due as compensation to private persons are deducted, there will still remain 47½ millions to pass into the Treasury. Out of these monies 10 millions will be applied to the purposes of the sinking fund, so as to avoid any further tightening of the money market.

GERMAN NOTES.

The visit of the Tsar to Germany and France has not been altogether without untoward consequences. It has suggested to some Germans the inquiry whether Russia's friendship for France includes an anti-German purpose, and it has caused some French journals to express a certain measure of dissatisfaction because the Russian Sovereign's visit was not such a demonstratively friendly affair as they had hoped it would be. A section of the German press has been led to make bitter comment on these things. One paper is persuaded that "French hatred is prepared at any time to bring about a European conflagration so soon as the conviction prevails in Paris that France dare attack Germany," and it adds that "France is and remains the natural ally of every enemy of the German Empire." It would seem that the mischievous intemperance of the press is destined to undo all that has been accomplished by the tact of the Kaiser and the good sense of the French and German peoples, in the way of burying the hatchet. That same press is again devoting itself earnestly to the miserable task of sowing seeds of discord between England and Germany by speaking of "universal indignation at the brutalities perpetrated against the women and children of the Boers," though, as *The Times* justly remarked in a recent issue, it is impossible to imagine that the editors of pro-Boer journals in Germany are so deficient in intelligence as to believe these accusations. Unfortunately the British public can not fail to be more or less offended by such attacks, and there will thus be sown between the two peoples seeds of discord which may bear serious fruit in the future. At the same time, the attitude of the German press towards France's doings in the Mediterranean, as reported by telegraph, is more than unsympathetic, and thus it results that solely owing to the writings of intemperate journals, Germany is making enemies for herself in quarters where her really patriotic and far-seeing nationals desire only friendship.

Speaking of these patriotic and far-seeing units in the German population—and we do not doubt that they form a majority, however, noisy and vociferous may be the pro-Boer section of the press—the following letter, re-produced from *The Times* of September 24th, illustrates our remark:—

A German Field Officer on the active list who for obvious reasons desires his name to be withheld, requests us to publish a translation of a letter which he addresses, he tells us, to *The Times* rather than to the *Kreuzzeitung*, whose reiterated attacks upon the British army in South Africa have specially prompted him to intervene in this controversy, because it is clear that the *Kreuzzeitung* and other German papers of the same complexion do not want to be set right on such points, and, in a word, communications such as his find no admittance. On the other hand, he would rejoice if the readers of *The Times* were to see in his letter a proof that the utterances of the German Press with regard to the South African War do not by any means represent the undivided public opinion of the country.

The following is a translation of his letter:—

Sir,—The questions raised in the last few days by the *Kreuzzeitung* with regard to the British methods of warfare in South Africa, as compared with the Franco-German War of 1870-71, show such an overflow of heated and hysterical indignation that they read like an outbreak of fury on the part of papers which cannot endure the sight of the gradual overthrow of the Boers, whom they have hitherto extolled to the skies, for Heaven knows what reasons. They cannot forgive the English that all their arguments based on the initial weakness of the British Army and all their evil prophecies are being set at naught by the brilliant leadership and steadfastness which have enabled the British troops to overcome, in spite of all the physical difficulties of the field of operations, an enemy in possession of so many advantages and equipped

with all the resources of peasant "slimness." Vexation and disappointment can alone account for such statements as those to which the conservative and orthodox *Kreuzzeitung* commits itself—namely, that the British troops have been beaten time and again by a numerically inferior foe with no military training; that nearly every week British soldiers allow themselves to be captured; that guns, gunners, and gun-carriages bolt into the enemy's lines; that the mounted men can neither ride nor shoot; that the so-called British victories have, in reality, been the most miserable defeats; that the British troops surrender *en masse* in the open, &c.

It is the business of the English Press to deal with controversialists of this class. For my part, I wish only to take up the question raised in the following terms:—"Have German commanders ever arranged to be brought home and loaded with decorations before the end of the war?" To this I would answer that it seems to me exceedingly unwise to challenge by such a question a comparison between Lord Roberts and, let us say, Count von Waldersee—a comparison which as far as the honours conferred, could only be unfavourable to the German Field-Marshal.

These things, however, would leave me cold, as in the course of the last 23 months I have grown fairly hardened to this daily screaming. What specially induces me to request the publication of these lines is the charges which have again recently been brought against the British troops of inhuman measures against the non-combatant population.

The *Kreuzzeitung* asks:—

"Where were there in 1870-71 concentration camps for French women and children? Where were there any large areas of devastation? Where were the defenceless inhabitants, even the missionaries, seized wholesale and kept prisoners?"

I have no difficulty in answering these questions. My recollection of that period is still vivid, and I will therefore at once concede that we had no practical occasion for such measures in France, for the simple reason that they were not necessary. But if the guerilla warfare organized by the Franc-Tireurs had assumed larger dimensions, then assuredly the German Headquarters would have shrank from no methods of warfare; would have destroyed houses, farms, and every kind of property; would have forbidden all freedom of intercourse; would not have hesitated to inflict the severest forms of punishment, even the punishment of death, in order to ensure the safety of the German army and of its communications with its base, or had it been thought possible and expedient, in order to bring the war to a more rapid termination by the adoption of such measures. Warnings the French population certainly did not lack. They had every reason to abstain from such hazardous proceedings as interference with our communications, and they had an inkling of what they were to expect, in the event of the slightest disturbance, in the shape of proclamations like the following one, which I copy out of my note-book:—

"Notice is hereby given to the inhabitants that martial law is proclaimed, and that, therefore, any inhabitant found with a weapon in his hands will be shot.—Head-quarters of the 3rd German Army."

It will be seen from this proclamation that there was not much hesitation on our side. Finally, there is this great difference between the two wars, which practically renders any comparison futile. The Franco-German War was decided by battles, engagements, sieges, in such a way that we have always been able to reckon it an honour to have measured swords with so chivalrous a foe, whilst the English can hardly bring their enemy to a stand-up fight, have had few opportunities of discovering his chivalry, but, on the other hand, have had plentiful experiences of his bushranging propensities and his treachery, often amounting to actual crime.

Yours respectfully,

OBERST LIEUTENANT Z.D.

It appears to us that some comments made by *The Times* in its editorial columns on the same day reflect the feeling of educated Englishmen with much accuracy. *The Times* was writing shortly after news had been received of the Vlakfontein and Blood-River-Poort disasters, and before the almost immediately subsequent victories of the English had become known to the German press:—

A section of the German Press has hastened, as usual, to exult in the news of the British reverses. They would have shown more prudence had they not been quite so precipitate, but hatred such as the great majority of German newspapers have consistently exhibited towards us throughout this contest is not easy to restrain. The comments of these journals have revealed very clearly the real nature of German sympathy with the Boers. It consists of two elements, mixed in widely different proportions. Some Germans, who have

little knowledge of the events which forced the war upon us, really believe the great pro-Boer legend. They look upon the Boers as a small and primitive people, fighting for their national existence and for the Republican liberties to which many Germans are theoretically attached, against a grasping and aggressive State, anxious to despoil and oppress them. Germans of this class naturally feel the warmest admiration for the Boers and the deepest indignation against us, and both feelings are to the honour of their hearts, if not of their heads. But this class is only an insignificant fraction of the German pro-Boer party. The real strength of that party lies, not in the men who believe in the pro-Boer legend, but in the men who wilfully and deliberately fabricate and propagate it, well knowing it to be false. It is not generous regard for the weak, or love of freedom, or honest anger against wrong which animates them. Envy of England's splendid history, of her wealth, her commerce, her colonial and maritime greatness abroad and her success in uniting the amplest Parliamentary liberty with unbroken order at home, is the motive which leads them to gloat over her misfortunes, to grieve at her successes, to egg on her enemies, and to prophesy her downfall. The fact is patent to anybody who has paid attention to the tone of the German Press, great and small, since the outbreak of the war. But there are other channels, not accessible to the public, which demonstrate it even more conclusively than the boorish abuse, the clumsy calumnies, and the malignant invective showered upon us in the German newspapers of all shapes of opinion. The private letters from Germans which have reached us daily for the past two years afford convincing proof of the true import of German pro-Boer sentiment. The language of coarse and scurrilous invective in which most of them are couched, although often penned by men of apparently good position and education, discloses a hatred of this country which is really amazing, particularly in a people which has received many benefits from us in the past, at some of the most critical moments of its history. We deeply and honestly deplore the existence of this feeling, but we cannot ignore it with impunity. It is an "objective" fact, as the Germans themselves say, and a fact which we are bound to take into account in considering our international position and the steps we should adopt to uphold it.

The blind and unreasonable detestation of the English name, which is the true root of pro-Boer sentiment and pro-Boer agitation in Germany, is not, we are happy to say, universal amongst the German people though no rank and no condition are exempt from it. We have the pleasure of being able to publish to-day a translation of a letter we have received from a Lieutenant-Colonel on the active list in the German army, which he has been provoked to write by a recent outburst of "hatred and hysterical indignation" in the *Kreuzzeitung*, perhaps the most prominent organ of the military and aristocratic party in Prussia. Our correspondent explains that he sends his letter to us, and not to the journal in which the attacks on England, to which he replies, have appeared, because he is satisfied that, if he sent it to that journal, it would not be published. The papers that calumniate this country do not want to tell the truth, and they accordingly suppress, if we may credit this German officer, letters in which unpalatable truths are contained. Our correspondent collects a few samples of the silly falsehoods which, he alleges, the "Conservative and Orthodox" organ has been uttering against the army whose aid enabled Prussia to shake off the yoke of Napoleon. He declines to refute them, because, he says, after twenty-three months, he has "grown fairly hardened to this daily screaming," and he suggests that it is the business of the English Press to deal with such controversialists. On this point we cannot agree with him. The responsible English Press has been hardened to this screaming from the first. It has noted the fact as an indication of the abiding temper of modern Germany towards this country, and it will not allow that lesson to be lightly forgotten; but it has something better to do than to repeat untruths which it despises. On another subject our correspondent makes a valuable and welcome contribution to a discussion which has been carried on in this country as well as in Germany. He has no patience with the accusation that we employ "methods of barbarism" against the Boers. He tells the *Kreuzzeitung* and its fellows very plainly, that, if the French had resorted to the same tactics as the Boers, the Germans would not have hesitated to inflict the severest forms of punishment, even death, in order to ensure the safety of their own forces and of their lines of communication. He quotes an extract from his own note-book in proof of his assertion. He points out, finally, the broad distinction between this war and regular wars, in which the pro-Boers everywhere seek to evade. Most wars are decided by regular military operations between

regular armies. In South Africa we have to deal with an un-uniformed population, which we can hardly bring to a stand-up fight, but which habitually indulges in bush-ranging propensities and not infrequently in treachery "often amounting to actual crime."

It is stated that the German garrison in Shanghai will soon be withdrawn, as well as the soldiers guarding the German railroad beyond the boundary of Kiao-chow. This latter step is to be taken in deference to Governor Yuan Shih-kai's request, and in reliance on his assurance that the railroad will be adequately protected. As for Shanghai, it really does not appear that any need exists for a garrison there. The place is so easily accessible by water that marines can be landed at any moment, and, for the rest, the Shanghai volunteers constituted a very efficient force in the opinion of persons competent to judge.

Rumours have been circulated of a mutiny on board the German cruiser *Gazelle*. As usual it turns out that the story was greatly exaggerated. The event was not of sufficient importance to evoke a special report from the admiral commanding the squadron. At any rate, such incidents are almost inevitable. We have them in the British navy, and we can not expect them to be altogether absent from the German.

Much sensation has been caused among German socialists by the writings of one of their number, Herr Bernstein, whose criticisms are said to have had the effect of proving that socialism, if pushed on the lines indicated by Carl Marx and Herr Liebel, would become as tyrannical a suppression of freedom of thought and speech as that which is attempted by the most extreme system of reaction and autocracy. At the Lübeck Congress of Socialists Herr Bernstein's writings were condemned by 166 votes against 71 as "entirely one-sided," and the critic announced that he "would treat the resolution with the respect and attention which it merited." But it can not be supposed that he will change his views or modify his criticisms, which have already, it is said, made a deep impression on the younger school of German socialists, and which tend "to hasten the development of the Social Democratic Party into a party of parliamentary action and criticism in the interests of the working class."

NOTES ON CURRENT EVENTS.

The last of the four battle-ships ordered by the Japanese Government under the *post-bellum* programme, has been building at the yard of Messrs. Vickers, Maxim & Company since December 1898, and will probably commence her voyage to Japan at the close of this year or the beginning of next. Her displacement is 15,362 tons; her cost has been 9,845,466 *yen*, without the armament, which has cost 4,414,668 *yen*, the total being 14,260,134 *yen*; and she is believed to be the most powerful ship afloat. She is said to be the first vessel of her size constructed at Messrs. Vickers and Maxim's yard, and for that reason her eminent builders have devoted special care to the work.

It has been discovered by the Bank of Japan that forged paper money is in circulation, namely five-*yen* notes. The forgery is clever, but one easily recognised mistake has been made. In the right hand upper corner of the genuine note, the number *go* (five) is printed in Japanese character (*五*), and in the lower right-hand

corner, the number "5" in Roman numerals. The forgers have reversed the order, putting "5" in the upper corner and *五* in the lower. There are also some errors in the Japanese transcription, but the above indication is the best guide for foreign eyes.

A very interesting contest took place on the old race course at Uyeno last Saturday, for a prize given by Mr. Fukuzawa Ichitaro, editor of the *Fiji Shimpō*. The condition was that 76 rounds of the course should be made by some one, walking or running, within 12 hours. The first prize was 100 *yen*. Fifteen started at 4 a.m., namely 5 students, 2 clerks, 4 *jinrikisha* men and others. The essential condition of the race was not satisfied, the best record being that of a *jinrikisha* man named Ando who covered 65 miles 28 chains in the time. Probably the failure was due to the extremely unfavourable condition of the course owing to recent rain.

The *Official Gazette* contains details of the recently reported changes in the administrative organization of Formosa. The prefectures are abolished, their place being taken by *Chihochō* in 20 localities, these local administrations being under chief administrators, *Chihochō-cho*. In the Civil Government Department the offices will be a principal police bureau (*Kisatsu Honshō*), a bureau of general business (*Sannō Kyoku*), a bureau of Finance (*Zaimu Kyoku*), a bureau of communications (*Tsuishin Kyoku*), a bureau of industries (*Shokusan Kyoku*), and a bureau of engineering (*Doboku Kyoku*).

The salary that a member of the Diet is to receive in an approaching session is a rather dubious asset to hypothecate as security for a loan. Yet it is so hypothecated by many members, and the money-lenders seem willing enough to regard it as good security. The method pursued is to conclude the transaction of loan by the aid of a public notary, and then to convey a notice to the Chief Secretary of the House that such and such a member's salary is to be paid to such and such a creditor, not to the member himself. It is strange that the Secretary should pay any attention to such notices, but apparently he does. A certain Mr. Sakuma raised a sum of 800 *yen* on the strength of his coming salary, and the above steps were duly taken with regard to the prospective payment of the money. But Sakuma had already hypothecated the salary to another lender, and the latter proved smarter than the former, for he "got down to the pool first" and carried off the coin. The baffled usurer then instituted proceedings against Mr. Hayashida, Chief Secretary of the Lower House, and having been cast by the law courts, took an action against the Minister of State for Finance. The case has just been decided and the Court's judgment was that a member of the Diet has no right of possession in his salary until it is actually paid over to him, inasmuch as he may forfeit his title to receive it before the date of payment.

The *Official Gazette* announces the transfer of Mr. Kurino from the Japanese Legation in France to St. Petersburg, the duties of Japanese Representative in Norway and Sweden being combined with those of his new office.

A good idea of the magnitude of the insurance business carried on in Great Britain is furnished by the facts that the net premia

received by the various offices during 1900 aggregated 201½ millions sterling and the losses paid amounted to 121¼ millions. The Royal stands at the head of all the insurance companies. Its funds at the beginning of the present year, exclusive of capital, totalled 3½ millions sterling; its premia exceeded 2 millions and its surplus of fire fund and capital reached nearly 3 millions.

It is announced in the *Official Gazette* that in future any foreign students desirous of entering a school under the control of the Educational Department for the purpose of taking up any special course and not the general curriculum, must apply in the first place either to the Representative of Japan in their own country, or to the Representative of their country in Japan, or to the Foreign Office in Tokyo, and must subsequently apply to the President of the Imperial University or to the head of the school they wish to enter, accompanying their application with the written permission of the diplomatic official or Department above referred to. The recipient of the application will grant it, provided that the applicant appears to be duly qualified and provided that the school accommodation permits. It is further announced that it shall be within the competence of the school authorities in such cases to dispense with entrance-examination fees, entrance fees, and tuition fees. Evidently this discretion is granted for the purpose of encouraging Chinese and Korean students. Those who are already studying in the schools shall be considered as falling within the purview of these new regulations, the old *Gai-koku Itakusa kitei* being abolished.

In spite of the destruction of Count Okuma's Waseda residence by fire and in spite of the fact that the new edifice is now in course of construction with all the inevitable accompaniment of litter and confusion, Count Okuma managed to organise one of his delightful chrysanthemum parties on the 10th instant, under brilliant circumstances so far as the weather was concerned. The event has attracted special interest, because among the guests were some 50 members of the *Kenku-kai* of the House of Peers, and inasmuch as there has been much talk recently of a *rapprochement* between the Progressists and the Peers. Hence the composition of the chrysanthemum party sets the newsmongers talking.

The Sansciedo announces that it is prepared to sell copies of Chambers' English Dictionary for 1.60 *yen*. The book costs 10 *yen* at the place of its original publication, but the Sansciedo re-produces it by some novel process which renders this cheap sale possible. Presumably the dictionary does not enjoy the benefit of copyright. At any rate it would not find a large sale in Japan at 10 *yen*.

It is reported that the steamship *Yashima Maru* collided with the sailing ship *Shinyei Maru* on the 10th instant, off the Sanuki coast. Some thirty persons on board the *Shinyei Maru* are said to have been killed or wounded, 20 of them being drowned, another report says that the *Yashima Maru* sank. Nothing seems to be certain except that a disastrous collision took place.

It is said that Mr. Na Tung, who recently visited Japan as Envoy, has arranged for the despatch of 30 Manchurian officers to study for 3 years in Japan.

THE CHINA ASSOCIATION.

It is difficult to endorse the very comprehensive view taken by the Chairman of the Yokohama Branch of the China Association when he said that had the foreign community's memorial received the attention it deserved, it seemed more than probable that much of the irritation and friction that arose after the operation of the new treaties in connexion with the perpetual lease question, the registration of property, taxation generally, and especially the objectionable and much debated house tax, would have been avoided. After all, the sum and substance of the memorial was that the time for treaty revision was not ripe. The memorialists desired frankly that what they regarded as the evil hour should be postponed as long as possible, and in formulating that wish they had the whole community with them, for never did folks in any other part of the world at any period live such a happy life of freedom from official interference or the trouble of the tax-collector. But is it not claiming a little too much, does it not savour rather of the wisdom that succeeds the event to allege that unpleasant contingencies with respect to perpetual leases, the registration of land, the house tax, or taxation generally ever presented themselves to the memorialists or to any other foreigners in Yokohama? The perpetual lease question could not possibly have been dealt with more explicitly than it was in the revised treaties, nor could the delay that occurred in giving effect to that particular provision have been foreseen by any one. In the matter of registration, the Japanese Authorities seem to have adopted a mistaken course, nor can it be denied that the question did not receive from the revisers such consideration as its difficulties might have recommended. But, on the other hand, it can not be honestly claimed that such a point, or anything resembling it, presented itself to any member of this community in pre-revision days, or would have presented itself to anyone, however long the "evil hour" had been postponed. As for taxation generally, the foreign Powers could not and would not have asked for anything more than that their nationals should be placed on exactly the same footing as Japanese subjects. That is what they did ask for and that is what they obtained, and though it is decidedly disagreeable that folks who passed so many halcyon years without paying a *son* of taxes, should now be pretty heavily mulct, we must remember that most of us are better off in that respect than we should be at home, and that not one of us could claim with any show of fairness to be better off than the people among whom we live. There remains the house tax. That, too, was a problem which never presented itself to the minds of the memorialists alluded to by the Association's Chairman, and we must again say that it would scarcely have occurred to them how ever long the period granted for reflection.

The one argument, the only argument possessing any show of plausibility, that can be adduced by the opponents of the house tax is that houses were for many years treated apparently as part and parcel of the property for which foreign residents paid land rent. The answer—a conclusive answer, we think—is that during those years the Japanese Government had no power to collect any tax whatever from foreigners over and above the land tax which was fixed before so much as a solitary building stood in any of the foreign settlements. The Japanese authorities, conscious of their inability to enforce their rights under the extraterritorial system, left a great many things undone which they were entitled to do. But it is not fair to claim that they thus forfeited their rights. Without entering at length into these arguments, however, the point we desire to make is that to attribute to want of foresight on the part of the foreign negotiators any difficulties and friction that have occurred in putting the revised treaties into operation is to speak without due reflection. It must never be forgotten that the revised treaties were virtually before the public for five years before they went into operation, and that had the foreign community, during that long period of scrutiny, detected and exposed any omissions calculated to cause the troubles catalogued by the Chairman at the dinner on the 9th, official attention might have been effectively drawn to the fact. The British treaty was not a hard and fast document incapable of any alteration or improvement. All the other Powers concluded their treaties subsequently without the slightest haste, and indeed so deliberately that, at one time, the task appeared unlikely to be completed within the five years' period of probation. Any one of those Powers might have obtained the insertion of provisions relating to house tax, registration, perpetual leases or taxation in general, and, under the most-favoured-nation clause, British subjects would have enjoyed the benefit of such modifications. But throughout that long time not a word was heard from any of the treaty-port communities; not a voice was raised with reference, however remote, to any of these difficulties which, according to the China Association's Yokohama chairman, might have been avoided had the foreign residents been consulted. Truly it appears to us that there was ample time and abundant opportunity for the most deliberate of mortals to have marshalled and formulated his misgivings, had any apparent grounds for misgiving existed, and since the foreign communities failed to help themselves in those days, is it not a little hard to allege now that their wisdom was neglected, and is it not a little unfair to saddle officialdom with neglect or perfunctoriness which really lay at the door of the communities themselves?

Mr. George F. Wright, Solicitor-General for Ireland, has been appointed a member of the High Court of Judicature in succession to the late Justice Murphy. Mr. John Campbell has been appointed to succeed Mr. Wright.

VISCOUNT NAGAOKA AND MR. TANABE YANOSUKE ON THE SITUATION IN CHINA.

The earnestness and the thoroughly business-like methods followed by the Tō-a Dōbunkai (Eastern Asia One-Script Society), are most commendable. They are holding meetings in various parts of the country for the purpose of enabling the Japanese to understand and to utilize the situation of affairs in China. It is a pleasing feature of the movement that men of rank and position are willingly giving time and attention to studying the affairs of the neighbouring continent and to stirring up an interest in China and the Chinese throughout Japan. On October the 16th a meeting of the above-named Society was held in Sendai, at which speeches were delivered by Viscount Nagaoka and Mr. Tanabe Yanosuke. Viscount Nagaoka and Mr. Tanabe were both members of Prince Kōno's staff on the occasion of his recent visit to China, and so the information they had to give the meeting was founded on their own personal observations. They stated that they had met and conversed with many of the leading men in China, and had gathered from them particulars which had enabled them to form a tolerably accurate estimate of the situation. The following is the substance of the two Sendai speeches.

Viscount Nagaoka said:—Nothing is more certain than the existence of strong feeling in favour of the Japanese throughout the whole of China. The Chinese realise that we and they are of the same race and that to a large extent we have the same history. All hope of preserving the integrity of the country on conventional lines having gone, the Chinese are now looking to Japan to help them out of the mire into which they have fallen. In some cases Japanese military officers have been consulted as to the organisation of the army. Murata rifles are largely used in different parts of China. Wherever the mission went they found the same sentiments prevailing. This situation ought to be utilised by Japan to the utmost. Both nations would reap numerous benefits by the establishment in commerce, industry and especially educational matters of a closer intimacy between them. In order to prepare Japanese for taking a leading part in guiding the destinies of the Chinese people it was necessary that a certain number of young men should go through a special training. With the view of effecting this a school had been opened in Shanghai, which was of the nature of a Normal School. "The Society aimed at establishing many such schools as time went on. At present the Shanghai School was attended by Japanese students only, but arrangements would be made for receiving Chinese students as well. In commerce China has nothing to learn from Japan, but in industry this country is ahead and hence we are in a position to confer many benefits on our neighbours by teaching them how to make the best of the natural resources of the country. This was not my first visit to China, and so I am in a position to judge what progress has been made, and I must say I was very much struck with the change that has come over the nation. The people are no longer satisfied with the traditional way of doing things. The great improvements to be seen in the native part of Shanghai are only typical of what is going on in numerous other cities throughout the empire. Even in the matter of opium-smoking, though the old confirmed smoker can not be cured of the habit, the younger men are beginning to recognise that success in life demands abstinence from the pernicious habit." . . . China needs more general education. Knowledge is confined to a small clique and needs to be made the property of the masses. General enlightenment can only be effected by extending the educational system of the country to every small village and by making it thoroughly practical in character. The principal object of the Tō-a Dōbunkai is to work for the opening up of China to the whole world. Japan is exceptionally well situated for acting as the pioneer of Western civilization in China and it would be a cause for deep regret if they as a nation were simply to look on while Englishmen, Americans, and others were working for the reform of China. The rivalry between the Powers,

he trusted, would only be a friendly one, consisting of an attempt to outvie each other in advancing the permanent interests of the Chinese. If there were Powers that had sinister aims, he did not think they would be able to attain them in the face of the opposition they would encounter from the principal Powers concerned. Japan having adopted Western civilisation, should see to it that she is not left behind in the attempt to establish its principles throughout the length and breadth of China. There was nothing to prevent a large influx of Japanese into China. The climate is in most parts suitable and living is in many respects cheaper in China than in Japan.

Mr. Tanabe Yasonokosaid: The Toa Dobunkai is of opinion that China may be reformed, and that the reform has already commenced, and further, that the Japanese people have it in their power to do much to make it thoroughly effective. Those who aim at bringing about a great reform such as that contemplated in China should make up their minds as to what is the foundation of the evil they seek to remedy. It is not difficult to trace the origin of China's present helplessness and general corruption. It has its root in the educational system so long in vogue in that country, in the academic and thoroughly unsuitable character of the training received by the official class. The one object of an intellectual Chinaman is to obtain a literary degree and become an official; not on account of the benefit the position he fills will enable him to confer on his country, but solely for the honour and glory attached to office in the minds of those whose esteem he values most. As things are now in China the true object of education is entirely lost sight of; men study only to enable them to pass examinations in the classics; only to reach a thoroughly artificial and a practically useless standard of learning. The first thing then to be done in China is to substitute an entirely different standard of attainment to the one hitherto used; to demand in the candidates for official posts a knowledge of practical affairs and of the best methods of dealing with them. The Chinese are decidedly an intellectual people, but they have hitherto squandered fine mental powers in profitless study. Some little time ago the abolition of the present official examination system was considered most improbable, but now the situation is much more hopeful. It is difficult for people living in another country to realise how many influences there are making for reform in China. To begin at the source of all authority, the throne: there is no doubt that both the Emperor and the Empress-Dowager are convinced that China cannot be held together unless most radical reforms are effected within a reasonable time after their return to Peking. They have both learnt a lesson from the many calamities that have overtaken them. The Empress-Dowager is too shrewd a woman to repeat the errors that she or her counsellors made last year. The leading officials, that is the great Viceroy, are all in favour of reform. As things are now the Viceroys have far more power than such a central Government as exists, and for a very long time they will retain that power, and they are first and foremost among the advocates for radical reform. They have armies at their backs. At the present time the military power of China is almost entirely in the hands of the Viceroys and by a powerful coalition they could at any moment render successful opposition impossible. The few conservatives that remain in power can never stop the march of progress. The viceroys will have their way and China will be transformed. China's feelings towards this country have undergone many changes in the past. Before the war of six years ago, they certainly despised us. After the war for a time they naturally felt sore, but being a sensible and practical people, they asked themselves the question why were we beaten? And they replied that it was because the Japanese had been Occidentalised. And so they came to the conclusion that if they wished to become a powerful nation they must follow Western methods to a large extent. They are still more of that opinion now, and they feel that we can supply them with a suitable medium for obtaining what they so much need. They are beginning to see that Western civilisation which

has percolated through the Japanese filter will be a fluid more acceptable to the ordinary Chinese palate than the beverage taken as it leaves the fountain-head. An Occidentalised form of Occidental civilisation has special attractions for them. They do not forget that in religion, in customs and habits of life, and in many other respects we differ entirely from Europeans and Americans. To assimilate themselves to us is in every way an easier task to the Chinese than assimilating themselves to Europeans. We have said a great deal about the benefits China will derive by intimacy with us, but there is quite as much to be said on the other side. Our population is growing apace. We want new markets for our produce. We want new openings for our people. China is at our very doors and the situation there is not strange to us. Hence the country offers special advantages to us. Our aim in coming to this town is to impress these facts on you and to point out that the future of China is a subject second to none in this country. Whether China reforms or whether she remains as she is, if indeed this be possible, is a question of vital importance to Japan. Our development will in numerous ways be affected by what takes place on the neighbouring continent. The Toa Dobun Kai believes that by furnishing information on this subject it will stir up interest which will lead to practical effort. The Society is about to publish a full report of the result of their investigations in China, which will give in detail the proofs of the conclusions which Viscount Nagaoka and myself have reached in reference to the outlook in that country. It is quite impossible in a short speech to convey an adequate idea of a situation so complicated as exists in China to-day, but if we have said enough to draw your attention to the intimate relationship that exists between the two countries we are satisfied.

It is not a little remarkable that a nobleman like Viscount Nagaoka should take such a keen interest in national affairs as to travel about the country for the sole purpose of giving information on a subject that in his opinion is of vital moment to the nation. Viscount Nagaoka resided in England some six years, during part of which time he was studying law. He is a member of several well-known London Clubs, and has many friends in China among the English residents. He has gone into this Chinese affair with great eagerness. The advantage from the point of view of the Society in whose interests he is working of possessing such an advocate must be apparent to everyone. It is quite plain that a nobleman of Viscount Nagaoka's standing has no axe to grind. His labours are quite disinterested. There is much of this kind of thing in Japan at the present day. In a money-grubbing age it is refreshing to come across earnest, unselfish persons who are not working for a reward of any kind but who are prompted by a simple sense of obligation to do good.

THE CHINA ASSOCIATION.

ANNUAL DINNER.

The members of the Yokohama branch of the China Association and a number of invited guests met on Saturday evening, the anniversary of the birth of His Majesty King Edward, at the annual dinner, which was held in the Oriental Hotel. The banquet was laid in the dining-room of the establishment, the ordinary inmates being accommodated elsewhere. Two large British ensigns draped on the wall behind the Chairman and a few others of ornamental form and proportions disposed in the chandeliers constituted the sole adornment of the stately hall, and the menu card bore on the front page crossed representations of the national emblem. Mr. J. P. Mortenson, President of the Branch, was in the chair, being supported on the right by Vice-Admiral Sir Cyprian Bridge, K.C.M.B., and on the left by Mr. H. A. C. Bonar, British Consul; seats at the President's table being also occupied by Mr. J. Linsley, President of the American Asiatic Association, Capt. Wintz, R.N., Mr. T. S. Baker, Mr. R. G. F. Forster, Mr. J. W. Copmann, Mr. B. C. Howard, Capt. Carter, R.N., Mr. E. M. Janion, Dr. Doane, R.N., and Mr. A. G. Morey Weale. Among the other

subscribers (of whom, however, a number were unable to attend) and guests were:—Messrs. J. Dodds, Harrison Smith, R.N., E. F. Crowe, R. D. Robison, N. F. Smith, E. Rogers, J. D. Hutchison, P. de C. Morris, J. T. Griffin, W. G. McVicar, P. R. Scott, F. E. Wilkinson, J. Johnstone, H. J. Sharp, C. Thwaites, J. Walter, H. C. Litchfield, Dr. Wheeler, Messrs. C. J. Strome, F. J. Hail, J. H. Bathgate, Yeend Daer, F. W. Hill, V. F. Deacon, C. V. Sale, F. H. Ziegfeld, V. R. Bowden, G. G. Brady, F. O. Stuart, E. Coutts, H. A. F. Denny, F. H. Sutton, W. Campbell, A. G. Morey Weale, Lt. Hamilton, R.N., Messrs. A. R. Firth, C. Guinness, J. Mendelson, W. Humphreys, J. W. Crowe, E. Eliot Kilby, F. S. James, H. C. Pigott, A. H. Dare, F. H. Southern, W. N. C. Allen, H. W. Lee, E. C. Fox, and A. J. McClure.

The dinner was provided in capital style by Messrs. Muraour and Lewette, the tables being tastefully decorated, the viands excellent, and the wines of choice quality. Following was the Menu:—

HORS D'OEUVRE

ROTAGES

Crème de Volaille Princesse
Ox-Tail

RELIVE

Saumon à la Régence

ENTREES

Petits Feuilletés à la Montalais
Filet de Bœuf Duchesse Sauce Madère
Salami de Bœuf Sauce Canape
Mousse de Foie gras en Belle-Vue
Grandmère Kirsch
Asperges en Branches

ROTI

Faisans truffés
Salade

ENTREMENTS

Pudding Diplomate à l'abricot
Bombe Napolitaine

DESSERT

The band of H.M.S. *Goliath* was present and played a number of greatly appreciated selections.

THE TOASTS.

The toast list opened with the health of His Majesty the King, given from the Chair, which, after a few bars of the National Anthem, was drunk enthusiastically.

The Chairman next gave the toast of His Imperial Majesty the Emperor of Japan, which was most heartily pledged, the band rendering "Kimi-ga-yo."

THE CHINA ASSOCIATION.

The CHAIRMAN then said:—Gentlemen, I now rise to propose the toast of the China Association, and must confess that I approach it with some diffidence and considerable misgivings as to my ability to do it justice. I trust, however, to your good nature to pardon any shortcomings on my part. It was some 7 or 8 years ago—in 1894 I think—that the Yokohama Branch of the China Association was first formed. I should say Japan Branch, for in those days Kobe members threw in their lot with Yokohama, and it was not until 1898 that the Kobe Branch was started. Treat Revision was then the burning question of the day, and received much attention at the hands of the original Committee under the chairmanship of Mr. N. P. Kingdon. Many meetings were held to discuss the situation and eventually a vigorously worded memorial was drawn up and forwarded through the London Committee to the Foreign Office embodying the views of foreign residents and setting forth the disadvantages to which they were likely to be subjected under the proposed new order of things. Had this memorial received the attention it deserved, it seems more than probable that much of the irritation and friction that has arisen since the new Treaties came into force, in connection with the perpetual lease question, the registration of property, taxation generally, and especially the objectionable and much debated house tax, would have been avoided.—(Applause.) Unfortunately, however, the memorial was simply

pigeon-holed. Moreover the haste and secrecy with which negotiations were conducted without giving those most deeply and vitally interested an opportunity of expressing their views, and despite the strong representations of the citizen's committee sent home some years before, reflected little credit on the compilers of the new treaty, and caused lasting umbrage to all British residents in Japan.—(Hear, hear, and applause.) I have, however, no wish to pursue this subject further and have merely mentioned the Memorial to show that the Association was very much alive in those days and to explain why it was that all interest in its doings lapsed with the ratification of the new treaty. It was felt that our efforts had proved absolutely useless, disappointment resulted, followed by apathy, and for some years the condition of the Local Association became almost moribund. Some revival of interest took place on the occasion of the dinner to Lord Charles Bessford in January, 1899, but it was short-lived and was succeeded by another year or two of apathetic indifference. It remained for our energetic Hon. Secretary and Treasurer, Mr. E. Flint Kilby, to infuse new life into the dry bones of the Association this year.—(applause) — and whether it was the promise of a dinner on the King's birthday, I don't know, but the fact remains that from about 30 the membership quickly increased to nearly 70, and is still being added to. It may not be out of place to refer here for a moment to the parent Association in London, which was started, as many of you know, about 10 or 12 years ago by a few gentlemen prominently interested in China and the China Trade. From small beginnings it has grown to be a large and powerful organization, with Branches in Hongkong, Shanghai, Kobe and Yokohama, and numbering amongst its members many of the most able exponents and exploiters of British trade and British prestige in the Far East. It has wide-reaching influence at home as well as in the Far East, is in close touch with the Foreign Office, and it was only a few months back that I noticed a flattering allusion to it in the House of Commons, a member of the Government, as a source of useful and valuable information to which the British Government were always glad to refer on matters affecting the progress of trade or the welfare of British subjects in the Far East.—(Applause.) I think it behoves us therefore to support the parent body by every means in our power, and although it may not seem as if we were of any use under present conditions in Japan, the very fact of our existence is a source of strength to the London Committee, and as the future of Japan and Japan's trade is intimately bound up in the development and prosperity of China, the time may come when we may be able to render valuable assistance. I hope therefore that the interest of members will not be merely confined to attending the Annual Dinner, but that they will bring before the Committee here, any and every matter that seems to affect British Trade or British interests, with the confident assurance that it will meet with our best attention.—(Applause.) Gentlemen, I now give you the toast of prosperity to the China Association.

The toast was cordially drunk.

THE DIPLOMATIC AND CONSULAR SERVICES.

The CHAIRMAN next said:—Gentlemen, the next toast on my list is the Diplomatic and Consular Services. It is unfortunate, and the Committee greatly regret, that a previous engagement incident to the celebration of His Majesty's Birthday prevented Sir Claude MacDonald accepting their invitation. For the same reason the Members of the Legation Staff are unable to be present, so that the Diplomatic Service, much to my regret, is not represented on this occasion. I am glad to see, however, that there is a contingent from the Sister Service, and am especially pleased to have this opportunity of offering a word of welcome to the British Consul, my friend Mr. Bonar, on his return to Yokohama after a well earned holiday at home.—(Applause.) Mr. Bonar had already shown himself to be the right man in the right place, and a man keenly alive to the concerns of British residents, and I am sure we shall continue to find him taking the same interest in their well-being and well doing. It has become rather the fashion of late

to say that under Japanese jurisdiction there is no further need for Consuls, but I don't agree with this dictum at all, as there must still be plenty for them to do and many opportunities of making themselves useful to their countrymen. It must always be a satisfaction to Britishers to know that they have someone to appeal to in times of trouble or difficulty, feeling assured that they will meet with kindly sympathy and attention at the hands of their Consul, whether it be Mr. Bonar at Yokohama or whoever represents His Gracious Majesty at the other ports in Japan. In this connection I am greatly pleased to have my friend Mr. Forster from Nagasaki as our guest to-night.—(Applause.) I may say that I have seen Mr. Forster grow up in the Service from the date of his first arrival in Japan, and I know that he is now one of its brightest ornaments.—(Hear, hear, and applause.) To all Consular representatives present I offer a kindly welcome and ask you to join with me in drinking to their health, happiness, and prosperity. Gentlemen, I give you the toast of the Diplomatic and Consular Services, coupled with the name of Mr. Bonar.

The toast was cordially pledged.

Mr. HENRY BONAR replied. He said:—In the absence of a diplomatic representative the honour falls on me to reply to the toast which has just been proposed. Mr. Mollison has referred in the most friendly and flattering way to me, and I thank him cordially for his kind words. I hope you will believe me when I say that I have always tried to identify myself with your interests here and that I intend to do so in the future.—(Applause.) I have attempted to make your grievances my own and represented them in the best way that I possibly could. You know of course that the ultimate settlement of questions that arise here concerning the interests of British subjects often takes place in London, and the China Association is there for the particular purpose of communicating directly with the Government at home and I am quite sure it carries out its objects in that way successfully. The Chairman referred in his speech to the question of the house tax. I do not know whether it is any satisfaction to you, but you are in exactly the same position now that you were in two years ago. I hope you will continue in that position, but if unfortunately the point should be decided against you I trust you will not be called on to pay all the arrears.—(Laughter and applause.) I want to say that I am quite sure no grievance will be brought before your Minister or Consul, from Yokohama at any rate, which is not a legitimate grievance and that none but legitimate complaints will be brought to the notice of your officials. As to any question which may be decided against you, or apparently against the interests of British subjects here, I am quite sure, whatever the decision is, you will all meet the circumstances in a proper spirit and gracefully accept the inevitable.—(Laughter and applause.)

THE ROYAL NAVY.

The CHAIRMAN next said:—The pleasing duty now devolves on me of proposing the health of our Naval Guests, and in doing so I would like to assure Admiral Bridge and his officers how heartily glad we are to have them dining with us this evening. From my earliest recollections Yokohama residents have always had a warm place in their hearts for the Navy, and when I tell you that these recollections date back to 1867 you will admit that I do not speak without ample experience. It may interest Admiral Bridge and his officers to know that the first entertainment to the Navy at which I assisted was a dinner given to the Duke of Edinburgh and the veteran Admiral Keppel in 1869. I well remember the occasion and the tremendous excitement that was caused amongst the Scotchmen present, of whom there were not a few, when the Duke's pipers appeared towards the close of the dinner, and marched round the table playing the old tunes they all loved so well. It is interesting, too, to recall the type of British man-of-war that came out in those days and compare them with those of to-day, from the wooden paddle-wheel *Basilisk*, commanded by Captain, afterwards Admiral, Hewett, in 1867, to the *Ocean*—followed by, I think, the *Iron Duke*, *Audacious*,

Imperieuse, *Centurion*, until we find ourselves face to face with two of the latest type the *Glory* and *Goliath*. But that is getting away from my subject, which was to propose the health of Admiral Bridge and his officers. As I said before, we are heartily glad to see them here to-night, and can assure them that the oftener they come to see us, and the longer they stay, and the nearer to shore they come, the better we shall all be pleased.—(Loud applause.) Gentlemen, I give you the toast of our Naval Guests, Admiral Bridge and his officers, with musical honours.

The toast having been drunk with musical honours, Vice-Admiral Sir CYPRIAN BRIDGE rose to reply. He said:—Mr. President and gentlemen, the first duty that has to be discharged by the officer called upon to respond for the toast proposed in such generous terms by the President and accepted with such great cordiality by this company is to express on behalf of the other officers present and on his own behalf our grateful appreciation of the kind hospitality which has induced you to invite us to be present at this banquet. We are quite aware that the attention shown us is not intended for the individual or person but is meant to be a graceful compliment paid generally to the service to which we have the honour to belong.—(Hear, hear, and applause.) The President in his remarks just now alluded to the distance at which the ships at present at the Yokohama anchorage are from the shore. If we were not ourselves as sorry for it as we possibly could be your kindness would make us regret even more that the progress of naval architecture and the stationary character of terrestrial geography render it necessary for ships to lie further and further off. They get bigger and their draught increases while the water of the anchorages they visit gets no deeper. The result is unfortunately that from time to time we drag at each remove a lengthening chain, and so, between us and the hospitable community of Yokohama there is such a gulf fixed that we find an increasing difficulty in effecting the interchange of those social amenities which are always most welcome to us and by which we are so greatly the gainers at the hands of, perhaps, the most generous and hospitable community in the world, the foreign community of Yokohama. Circumstances of late have rendered it very difficult for men-of-war—not merely British men-of-war but for those of all nations—to visit the ports in Japan. You all know, because it is a matter of history now, how very much more than previously have naval interests been concentrated on the other side of the Japan Sea. At present, at all events, there appears to be a period—how long it will last I am unable to say, perhaps no one can tell—a period of comparative quiet; and if we are able to avail ourselves of that period of quiet by more frequent and more prolonged visits, as specified by the President, to the ports of Japan, I can assure you there will be no people more delighted than the officers of the British fleet on this station.—(Loud applause.) Just now the President mentioned the names of several of the ships which had been in these waters during the succession of years in which he had himself been a resident in Japan, and he spoke specially of Sir Harry Keppel. It may be of interest to him and to others who knew that veteran officer that on his 92nd birthday he dined with His Majesty the King, whose birthday we are celebrating to-night.—(loud applause)—and that he was at that great age still going strong.—(Renewed applause.) We look forward—of course it is the nature of man to live in hope—we look forward to revisiting this neighbourhood. I personally look forward to more than one visit during the next year or two. Once more I thank you not only for your kind hospitality this evening but also for the compliment conveyed to the British navy generally. There is something that always makes service abroad very pleasant, that alleviates—I think I may use the word—the separation from our friends at home, and that is the kind reception which we always get from our fellow countrymen and other foreigners who form part of the foreign communities in the various ports of China and Japan. It is one of the attractions of this very attractive country to find that we always go amongst people who at once make

us their friends. Not only on behalf of the officers present but on behalf of the whole service I beg to thank you for your very kind invitation, and to express with a sincerity which none of you will doubt our earnest desire that the China Association will flourish for many years to come.—(Loud applause.)

AMERICAN ASIATIC ASSOCIATION.

Mr. JAMES DODDS said:—It now becomes my pleasant duty to propose the next toast on the list, that of the American Asiatic Association of Japan, which I am pleased to see represented here this evening by so many good friends. The American Asiatic Association is, I believe, modelled much on the same lines as the China Association, having the same aims and objects, the chief of which are, as you know, the promotion and protection of the trade and commerce of our respective countries with Japan and the safe-guarding of our national interests generally.—(Applause.) Although each working independently of the other, their interests, under their constitution, must generally be identical and I am sure that when occasion arises the two institutions will be found ready to co-operate heartily one with the other and work hand-in-hand for mutual benefit and the common good. But there is another and a lighter side to be constitution, for I find it set forth in Section VI. of what may be called its Articles, that one of the objects is "to provide facilities for social intercourse between members of the Association and hold periodical assemblies of a social kind with a view to the promotion of friendly feeling amongst members of the Association." Although this reads somewhat exclusive and a little selfish, I am sure there is no desire on the part of the China Association to give the text its literal and limited interpretation. We should be taking our pleasures sadly did we seek always to confine them to the family circle. We require company to make these meetings interesting and really enjoyable and we shall always be pleased to see at our gatherings our friends as on this occasion, while there will be none whom we shall more cordially welcome than the members of our kindred Association in our endeavour to foster and cement the friendly relations that have always subsisted and, I hope, may ever be maintained between the American and British Communities of Yokohama. Gentlemen, with these few remarks I give you the toast of the American Asiatic Association of Japan, coupled with the name of the Chairman, Mr. Lindsley.—(Applause.)

The toast having been duly honoured,

Mr. JOHN LINDSLEY in reply said:—I have to thank you for the very kind way in which the toast of the American Asiatic Association was given and received. It was a very graceful thing on the part of this older association to invite representatives of ours, the younger sister, to take part in the festivities. We are not so young but that we can appreciate this kindness, and we are much younger than we look.—(Laughter and applause.) Our second birthday was very recent but we hope to be able in time to pull our side of the boat.—(Applause.) I think Mr. Dodds' very kind and excellent suggestion will have our earnest consideration and we shall hope to see the China Association, or representatives of it, whenever we have anything of this kind to celebrate. There is no doubt but that our Japanese friends wish to do the fair thing by the stranger within their gates; but in many instances their point of view is so diametrically opposed to ours that it takes no little persuasion to get them to come round and see the other side of the shield. We think, however, that with the able assistance of the China Association this may be not too difficult a task. To us born on the other side of the world civilization has always come from the East. India provided Phœnicia and Greece with her civilization; they passed it on to Spain and Rome, from Rome it went to Gaul and Britain, and finally crossed the Atlantic. We on the other side of the Pacific think it is proper for the Japanese to turn their eyes also to the East. They have as their emblem the rising sun, but in spite of that they have always looked towards the setting sun for their civilization and

inspiration; they have looked to China. Now in this utilitarian age we think that they should turn their face in our direction towards the sun which rises on the other side of the Pacific. It may be that the dream of Marquis Ito which is, I am told, that a new civilization may arise in this country compounded of the East and the West, and be the salvation of this country, will be realized. Time alone can show whether this is to come true or not. It has been said that no American ever makes a speech after dinner without telling a story but I will spare you that. I will just say that I feel like the man who was found fault with for not making a good speech and who said he had an excellent talent for speaking but unfortunately he had left it at home.—(Laughter and applause.)

BRITISH TRADE.

The next toast was "British Trade," in proposing which Mr. A. G. MORLEY WEALE said:—The honour has fallen to me of proposing a toast, which, both for its own sake and that of our guests to-night I could much have wished had been placed in more capable hands, for the reason that the modest brevity of its title alone can never fully express the immense importance it bears in relation to the welfare and prosperity of our beloved Empire, I refer, Gentlemen, to British Trade. Of late years, and more especially during the present one, much has been said, and still more written about the declining supremacy of Great Britain's commerce. Nor is this altogether without reason, because, putting aside, gentlemen, the question of undue pessimism for the moment and looking the position squarely in the face, it can hardly be disputed by even the most sanguine that changes of a very momentous and far-reaching character have combined to challenge Great Britain's position as the chief purveyor of the world since the days when we even dubbed "a nation of shopkeepers." It is but a short time back since public attention in England was roughly awakened to the determined bid German thrift and German industry were making for a larger share of trade. More recently still has come the keen rivalry of our American cousins, whose wonderful industrial progress is to-day very justly pointed out to us as a force that will have to be seriously reckoned with in the struggle for precedence that energy backed by the highest development of mechanical science must infallibly create for us. While these are the factors in the situation calculated to depress, however, there are others on the contra side from which we may legitimately draw some encouragement. That the need for renewed vigour and—since confession is good for the soul—reform of traditional methods in some degree should be so hotly advocated by the British press of to-day is in itself no small matter for congratulation. It at least indicates vitality! For the rest—even assuming it is fair to expect that the Mother country could maintain unchallenged for ever her enormous advantages of past years, I hope you may think with me, gentlemen, some reliance may be placed on that saving common-sense and dogged tenacity of purpose that we are proud to think is the heritage of every Anglo-Saxon. It has served us in good stead before and will doubtless do so for many years yet. To maintain therefore that British commerce is losing its supremacy in the sense that we are not taking the trouble to keep what is naturally our right, may I sincerely trust be deemed an exaggeration. Like other nations we have our ups and downs, but with the links of Empire drawn closer and closer since Great Britain first took up arms in South Africa, we are yet entitled to hope when peace is established the old country may furnish one more example of new trade centres acquired not only for her own advantage but that of the world as a whole.—(Loud applause.) Gentlemen, I will not detain you longer in connection with this toast. If I have failed to do it justice I will at least plead to having spared you statistics and ask you in their place to substitute charged glasses to the success of the British flag of commerce.—(Renewed applause.)

THE PRESS.

Mr. E. FLINT KILBY proposed the Press. He said:—In every city and every country the press takes a prominent part in all public affairs and I am sure that the Press of Yokohama do their best

to uphold the traditions of the profession all over the world.—(Hear, hear). In no country in the world has the press made such strides as in Japan during the last few years. When I first came to this land Japanese papers were almost unknown and now there is no town in the Empire but has its representative. The power of the press is recognised by everybody and by none more than by the Japanese Government, and though speaking as a commercial community we should have been glad if the Japanese Government had chosen to represent its side a journal edited by Japanese, we cannot but acknowledge the able manner in which their side has been represented. Although we could have wished that that representation had been put in Japanese hands we must at least give the Japanese Government credit for the desire to have their views set forth in the English language, and we must say that they are very ably represented. We have the advantage of seeing Japanese views represented through Japanese spectacles and though at times we should wish that these were not so highly tinted we can at least respect their desire. It is, I am sure, in the knowledge of all that the fact that the Japanese views being so ably represented brings out from papers which more generally represent this community the other side of various questions, and to give an instance I think you will agree with me that in the recent Kyoto Hotel affair had it not been for the manner in which that case was taken up by one of the Yokohama papers we should not have had that side of the question so fully set out as it was in papers in Yokohama and Kobe and been able to form our views on the question. Speaking for the China Association I have to thank the press of Yokohama and Japan generally for the able manner in which they treat questions which arise affecting this community and the foreign communities in Japan. There have been many burning questions ventilated in the press which not only interest the public here but spread their influence through the world. The financial situation of Japan is, as you know, one which affects the interests not only of the foreigners here but of the Japanese Government and people, and this has had the minutest representation in the foreign press of Yokohama and Kobe. The land question has also had the fullest attention and it is only by the press ventilating such questions that a proper opinion can be formed on the subject, not only by the foreign community of Japan but by those most closely interested, the Japanese Government and people, and by foreign nations. I propose the Gentlemen of the Press: may they long flourish and may they print the events of the day, giving both sides so that we and others may form a proper opinion upon them.—(Applause.)

The toast was coupled with the name of Mr. ROBERT HAY, of the *Japan Mail*, who briefly replied.

THE HONORARY SECRETARY.

At a later stage the CHAIRMAN said there was another toast not on the list which ought to be proposed, the health of Mr. E. Flint Kilby, Hon. Secretary and Treasurer of the local branch. I can assure you, he said, that I do not exaggerate when I say that Mr. Kilby is the head and front of the China Association in Yokohama. He was a member of the original Committee in, I think, January, 1894. He then went home and was for some years a member of the London Committee, and I know that he was an esteemed and able member of that Committee. He has returned to Yokohama and it is to him that we owe the revival of interest in the Association in Yokohama. He knows all about the Association—what to do and how to do it, and without him the Association would not be what it is.—(Applause.)

The toast was drunk with musical honours.

Mr. KILBY said:—I thank you most heartily for the kind way in which you have drunk my health. I can assure you, as you are no doubt aware from past experience of me in Yokohama, that in everything that concerns the welfare of the community, my efforts are at your service. One point I wish to bring out is that there is no one here, not even our esteemed Commander-in-Chief, who can say he has attended a dinner where the health of His Majesty the King was proposed on

the occasion of the King's birthday. For sixty-five years this toast had been in abeyance and I think we should bear in mind that this is the first occasion in Yokohama where this toast could be proposed on such a day. Also, we should, in thinking of that, remember the glorious reign that preceded the one now opened.

The band then played "God Save the King," during which all present rose to their feet and again drank the King's health.

The toast list being concluded at a late hour the company remained till midnight listening to songs by the Chairman, by Mr. Brady, and by Dr. Wheeler, after which the proceedings were brought to a close.

FOOTBALL.

A game of Rugby Football was played in Yokohama on Thursday, Nov. 9, between teams from the Y.C. and A.C. and H.M.S. *Glory*. The former were assisted in the forward line by two officers from the battleship. The game was not played in the centre of the ground and the field was considerably curtailed in consequence. The play was very "scrappy" throughout, the wet ground and the confined space preventing any real exposition of the game, which resulted in a win for H.M.S.

Glory by 5 points to 3. The *Glory* forwards were able to do as they pleased in the scrummage and in a ground of full size their backs would have put up a big score. As it was, Yokohama got twice over the line in addition to the try gained, and should have scored on each occasion. With Yokohama's full Rugby team and provided that the game be played on a field of proper dimensions a good game should result in future.

The "Association" football season was formally inaugurated in Yokohama on Saturday Nov. 9, amid the pleasantest of conditions, the weather for once this autumn being perfect—a deep blue sky flecked with the fleeciest of clouds above, an absolutely calm, still atmosphere below. It was in accordance with the fitness of things that the day being King Edward's birthday, a team from one of His Majesty's vessels should take part in the encounter and in the end prove the victors. The *Glory's* eleven, seemingly far from at home on the grass, put up a fine game, for though they won by only three goals to one, the score scarcely does justice to the excellent work of all concerned. The first half saw only one point scored, Bugler Moore making the goal. At change of ends Moore scored again: then Harry Kilby, by neat play shot a goal for Yokohama, and Lane, for the Navy, made the last goal in the match.

As was perhaps only to be expected in the first game of the season, the play of the home eleven was very faulty. The forwards were always getting out of place, and combined play was scarcely ever attempted during the first half. At change of ends the team pulled itself together a bit, the half backs began to feed the forward line with greater discrimination, and the play became more even. J. E. Moss, Le Marchand and Harry Kilby were all noticeable in this regard. An excellent move on the part of the Football captain is the placing of E. W. Kilby at full-back: in that position he greatly strengthens the defence and in the coming season we may expect to see him develop considerably. Teams:—H.M.S. *Glory*:—Morgan, Goal; Lieut. Sherbrooke Urquhart, backs; Wade, Watson, Matthews, half backs; Cottell, Moore, Lane, Pragnell, Dowson, forwards. Y. C. & A. C.:—E. Powys, Goal; E. W. Kilby, W. B. Mason, backs; W. J. White, E. G. Fradgley, M. Marshall, half backs; W. R. Le Marchand, H. W. Kilby, O. Strome, J. E. Moss, J. E. Drummond, forwards.

Mr. Broadbent of H.M.S. *Glory* was umpire.

The football players of Yokohama are starting the season under a full head of steam, for despite the rain, on Monday afternoon they brought off a match against a team from H.M.S. *Goliath* and beat the visitors by eight goals to nil. The

slippery ball and saturated grass were more than the sailor-men could tackle, but it must be acknowledged that the local players were in all the better shape for Saturday's practice. Firth, A. W. Read, and van Smith took the places of Marshall, J. E. Moss, and Le Marchand and did good service, while the play of W. S. Moss as centre forward was worthy of high praise. In the first half three goals were scored, by Read, White, and Moss; in the second half the goal-kickers were Firth, Smith, Moss, H. W. Kilby, and Fradgley—one goal each.

Teams:—Y.C. and A.C.—E. Powys, goal; E. W. Kilby and O. Strome, backs; A. R. Firth, E. G. Fradgley, and W. J. White, half-backs; J. F. Drummond, A. W. Read, W. S. Moss, H. W. Kilby, and E. van Smith, forwards. H.M.S. *Goliath*—Lamb, goal; Austin and Lord, backs; Williams, Fackrell, and Christie, half-backs; Mr. Williams, Reeds, Young, Stringer, and Curtis, forwards.

Mr. J. H. Bathgate was umpire.

A game of Rugby was played on Tuesday afternoon between the *Glory's* team and one from the *Goliath*. Play began very late, the men going into the field about 4 p.m. and the result was a tie, *Glory* scoring a goal in the first half and *Goliath* one in the second half.

Yokohama players have a lot to learn and re-learn ere they can successfully tackle the officers of His Majesty's Navy in the game of Rugby football. Several of them, it is true, are novices, while others have almost forgotten the rules and as a consequence are led into acts of indecision and indiscretion fatal to the chances of their side. Then again the forward line sadly lacks "beef," an important item in the Rugby game. Still for all that, the play on Thursday was very interesting and hinted at a promise of better things to come when practice shall have allied itself to knowledge, for there is no question as to the enthusiasm of all the players. With regard to the Naval visitors too much praise cannot be accorded their splendid combination, unselfish passing, and brilliant rushes. As will seen by a glance at the teams below, Mr. Tanaka was unable to get down from Tokyo, so his place at back was taken by Lieut. Pedrick, a right excellent substitute.

Play began at a quarter past three, and the Navy soon worked the ball down into their opponent's twenty-five. The three-quarters managed to clear the line, but the leather was returned, and within eight minutes of the start, Sartorius with a pretty run secured the first touch-down. The try was converted into a goal. On re-starting the Yokohama forwards pressed and had their passing been at all smart might have achieved something; but they always failed to mark their men and were too scattered at other times to effect anything of value. At half-past three the Naval visitors scored their second goal, and ten minutes later their third. So matters stood at half-time. On changing ends both teams warmed into it, and some individual bits of good play may be noted on the part of Moss, centre, Pollard, Heyward and Stuart: Crowe was also active. Once or twice it looked as if the home fifteen would get a touch-down, but ever and always the Navy cleared their lines in the nick of time and local hopes came fluttering to earth again. In the sequel of loose scrums and some very good passing-out the *Glory* secured a try, after a quarter of an hour's play; and then again just before the whistle blew they made a second, neither being converted. The game thus closed with a win for H.M.S. *Glory* by 21 points to nil.

Teams:—H.M.S. *Glory*—Capt. Molloy, back; Lieuts. Sherbrooke, Sartorius, Wilson and Mr. Smyth-Pigott, three-quarters; Mr. Fenn and Mr. Talbot, halves; Mr. Groves, Lieuts. Roc, Ireland, Kilvert, and Messrs. Innes, Turle, Dorman and Morris, forwards. Y. C. & A. C.—Lieut. Pedrick, back; J. F. Drummond, F. O. Stuart, E. W. Kilby, and E. B. Clarke, three-quarters; H. E. Hayward and J. E. Waddilove, halves; H. Goldman, H. R. Barnard, J. S. Cartwright, F. Pollard, W. S. Moss, K. F. Crawford, E. F. Crowe, and Dr. Gibson, forwards.

Lieut. Watson was referee; Lieut. Christian and Mr. B. Hyde-Pearson, linesmen. There was a fair attendance of spectators, and several ladies put in an appearance. The weather, though chilly, was perfect for the game, being absolutely windless, and the light good.

TOKYO UNIVERSITY SPORTS.

The athletic sports meeting of the students of the Tokyo Imperial University came off successfully on Saturday afternoon in the grounds of the institution in genial and bright Autumn weather. The sons of H.I.H. Prince Kuni honoured the occasion with their presence and the sports were witnessed by a large number of spectators, amongst whom were a score of foreign ladies and gentlemen, the faculty of the University and others. There were altogether 14 events, consisting of (1) 100 metres Race, (2) Throwing the Hammer, (3) Long Jump, (4) 200 metres Race, (5) Throwing the Cricket Ball, (6) High Jump, (7) Putting the Shot, (8) 400 metres Race, (9) Pole Jump, (10) Government Schools' Race, (11) 1,000 metres Race, (12) Graduates' and Special Members' Race, (13) Obstacles Race, and (14) Rope Pulling Race. The first race, in which some ten lads took part, was won by Mr. Takato; the second race was won by Mr. Takashima; the third race by Mr. Shōda; the fourth by Mr. Ume-gami, the fifth by Mr. Takato; the sixth by Mr. Nomura; the seventh by Mr. Matsubara; the eighth by Mr. Shoda; the ninth by Mr. Yawata; the 10th, in which the students of the First High School, the Tokyo Technical School, the Tokyo Foreign Language School and the Peers' School took part, was won by Mr. Fujii of the first mentioned school; the 11th by Mr. Hashimoto, and the 14th, which took place in an interval of the proceedings and was competed for between a large number of students of the University and of the First High School, was an interesting and exciting spectacle, resulting in victory for the latter institution.

We regret to state, however, that in the Obstacle Race one of the competitors broke his left arm while attempting to force his way through the obstacles and was carried at once to the hospital attached to the University for treatment.

DR. ELDRIDGE.

The Emperor has been pleased to bestow a third class Order upon Dr. Eldridge, in consideration of the distinguished services rendered by that gentleman to the cause of sanitation and medical science in Japan during many years. That the honour is well deserved will be the unanimous verdict of the foreign community.

FIRE.

Fire broke out at 1.30 a.m. on Nov. 9th in a bungalow of wood, tile-roofed, at No. 9 Yamate-cho Bluff, occupied by Mr. F. Parrott. The Bluff section of the Satumacho Fire Brigade and the Bluff Police Brigade were on the spot early but could not save the house. The cause of the fire is unknown.

CONCERT.

A concert was given on Friday evening in the vestibule of the Public Hall by Mdme. Tissot assisted by a number of amateurs. There was a small attendance, doubtless owing to the fact that somewhat scant notice had been given of the entertainment. Mdme. Tissot, who is a pianist of a high order and whose performances were enthusiastically applauded, had the support of Mdme. Rosnet, who gave several songs with much success, of Mr. Launay, an old Yokohama favourite, and of Mr. Rountledge, who played a piano solo, and also took part in a duet with Mdme. Tissot.

AUTUMN MEETING OF THE NIPPON RACE CLUB.

OFF DAY.

TUESDAY, THE 12TH NOVEMBER, 1901.

PATRONS:—H. I. H. Komatsu-no-Miya, H. I. H. Fushimi-no-Miya, H. I. H. Arisugawa-no-Miya.

PERMANENT COMMITTEE:—Sir Claude Maxwell MacDonald, K.C.B., K.C.M.G., President; Dr. Wheeler, Vice-President; Mr. R. D. Robison; Mr. Jas. Dodds; Mr. F. Strahler; Baron d'Anethan; Mr. V. Blad; Governor Sufu; Mr. S. Poklewski-Kozell; Mr. T. Thomas; Mr. G. Philip; Mr. S. Isaacs; Mr. W. F. Mitchell; Mr. A. J. Easton; Count von Wedel; Mr. L. Mottet; Mr. T. Rinoiye.

EXECUTIVE COMMITTEE:—Mr. A. J. Easton, Chairman; Mr. A. Bianchi; Mr. K. Mori; Mr. L. Mottet; Mr. Geo. Philip; Mr. M. Fors; Mr. T. Thomas.

Officers of the Day:—

CLERK OF THE COURSE:—A. J. Easton, Esq.

SECRETARY:—S. H. Somerton, Esq.

JUDGE:—A. Bianchi, Esq.

ASSIST. JUDGE:—S. Warming, Esq.

STARTER:—A. J. Easton, Esq.

TIME KEEPER:—F. J. Hall, Esq.

CLERK OF SCALES:—Dr. E. Wheeler.

HANDICAPERS:—T. Thomas, Esq. and Dr. E. Wheeler.

There was a very fair attendance at the Race-course on Tuesday afternoon on the occasion of the Off Day of the Autumn Meeting, and the six events set down on the programme afforded some excellent sport to spectators and backers. In most instances the favourites justified the trust placed in them by the public, but one event, the victory of Missouri in the fourth race, upset the calculations of most speculators. The few backers who favoured the horse, however, came in for a good thing, as the Pari Mutuel paid *yen* 65.50 on the winner. The fifth race, which resulted in a dead heat between Aberdeen and McMorse proved a very exciting event. After the programme had been finished a match was posted between Mr. May Shery's Faule Grete and Mr. Satsuma's Madge, but owing to some difference with regard to the distance to be run was called off. The details were as follow:—

1.—For Subscription Australian Horses of Autumn, 1901; Non-winners at the Autumn Meeting, 1901; weight for age; from the dip (about 7 furlongs). Entrance *yen* 5. Winner *yen* 100. Second horse *yen* 50.

Mr. Decimus' Merry Thought, 140lb. (Takahashi) 1
Mr. Russia's Volga, 143lb. (Horikoshi) 2
Mr. Elliott's Butterfly, 140lb. (Ichi) 3
Mr. May-Scherz's Slepner, 140lb. (Kobayashi) 0
Mr. Hugo's The Orator, 140lb. (Hayashi) 0
Mr. Tatsuta's Tsukuba, 140lb. (Goto) 0

After a poor start the field was all strung out but in the straight Merry Thought came away and won by a length from Volga, Butterfly a good third. Time 1.29½.

PARI MUTUEL, 5 *yen*—Volga 27, Slepner 9, The Orator 70, Tsukuba 7, Butterfly 100, Merry Thought 69; total *yen* 1309.50—Merry Thought, *yen* 19.

2.—"THE SUNRISE CUP." Presented; value *yen* 150; for China Ponies, non-winners at the Autumn Meeting, 1901; weight as per scale. Three-quarters of a mile, entrance *yen* 5. Second Pony to receive entrance fees.

Mr. Tytherleigh's Standard Rose, 150lb. (Mr. Easton) 1
Mr. May-Scherz's May-be, 141lb. (Kobayashi) 2
Mr. Russia's Mogol, 150lb. (Horikoshi) 3
Mr. Iris' Aranami, 147lb. (Rikizo) 0

May-be appeared to be first favourite, but Standard Rose and Mogol were also well backed. May-be took the lead with Standard Rose next, and Mogol third. On entering the Straight Standard Rose came to the front and won by two lengths, May-be second and Mogol third. Time 1.40½.

PARI MUTUEL, 5 *yen*—Mogol 107, May-be 103, Aranami 36, Standard Rose 101; total *yen* 1,591.50—Standard Rose, *yen* 15.50.

3.—"THE AVIS CUP." Presented; value *yen* 100; a handicap for all Australian horses; non-winners at the Autumn Meeting, 1901. Once Round. Entrance *yen* 5. Second horse *yen* 50.

Mr. Russia's The Count, 145lb. (Horikoshi) 1
Mr. Hugo's The Orb, 134lb. (Hakodate) 2
Mr. Warfolk's Blackberry, 130lb. (Kobayashi) 3
Mr. May-Scherz's Schwarzer Peter, 126lb. (Kato) 0

Schwarzer Peter got away with a lead of a length but The Count came to the front at the Shakespeares

with The Orb next. The finish was in the same order. The Count leaving the field behind and winning by half a dozen lengths from The Orb; Blackberry third. Time 1.58½.

PARI MUTUEL, 5 *yen*—The Count 255, Schwarzer Peter 24, Blackberry 37, The Orb 118; total, *yen* 1,953—The Count, *yen* 7.50.

4.—A HANDICAP for Australian Subscription horses of Autumn, 1901, non-winners at the Autumn Meeting, 1901. One and a quarter mile. Winner of Race No. 1 excluded. Entrance *yen* 5. Winner *yen* 100. Second horse *yen* 50.

Mr. States' Missouri, 130lb. (Tomioka) 1
Mr. Hugo's The Orbit, 134lb. (Hakodate) 2
Mr. Elliott's Butterfly, 138lb. (Ichi) 3
Mr. Russia's Amoor, 126lb. (Hayashi) 0
Mr. May-Scherz's Slepner, 130lb. (Kato) 0
Mr. Sphinx's Evele II, 138lb. (Miyagawa) 0

The Orbit and Slepner made the running with Amoor and Butterfly next in order passing the stand. At the Houses Missouri got to the front with Butterfly next. In the run home Missouri increased his lead and the Orbit ran into second place but was beaten by two lengths, Butterfly third. Time 2.34½.

PARI MUTUEL, 5 *yen*—Amoor, 133, Slepner 18, The Orbit 129, Missouri 34, Evele 45, Butterfly 135; total, 2223. Missouri paid *yen* 65.50.

5.—A HANDICAP for China Ponies; winners of more than one race at the Autumn Meeting, 1901, excluded. One Mile. Entrance *yen* 5. Winner *yen* 100. Second Pony *yen* 50.

Mr. Tytherleigh's, Aberdeen, 149lb. (Mr. Easton) 1
Mr. Tatsuta's Mr. Morse, 146lb. (Takahashi) 1
Mr. May-Scherz's May-be, 139lb. (Kobayashi) 3
Mr. Russia's Ourod, 143lb. (Horikoshi) 0
Mr. Russia's Mogol, 147lb. (Rikizo) 0
Mr. May-Scherz's Hucklebein, 138lb. (Kato) 0
Mr. Pond's Iroha, 150lb. (Nakazumi) 0
Mr. Starlight's Bucephalus, 133lb. (Ichi) 0
Mr. Elliott's Excelsior, 137lb. (Mr. Mottu) 0
† Dead Heat.

Aberdeen started favourite. Mogol and Ourod got away first, but McMorse soon worked into second place, and at the Trees Aberdeen came up and after a fine race in the distance with McMorse the two finished in a dead heat, May-be third. Time 2.15½.

PARI MUTUEL, 5 *yen*—Ourod 36, Mogol 19, May-be 9, Hucklebein 7, Iroha 37, Bucephalus 12, Aberdeen 207, McMorse 92, Excelsior 43; total, *yen* 2,310.—Aberdeen paid *yen* 5, McMorse *yen* 11.50.

6.—"THE RUSSIAN CUP," presented; value *yen* 300; for Country-Breds and Australian Subscription Horses; winners of one race at the Autumn Meeting, 1901, 7lb. extra, of two races excluded; weight for age; winner of Races No. 3 and 4 excluded. One and one eighth mile. Second horse *yen* 50.

Mr. May-Scherz's Faule Grete, 140lb. (Mr. Myth) 1
Mr. Satsuma, Madge, 147lb. (Hakodate) 2
Mr. Starlight's Bucephalus, 147lb. (Ichi) 3
Mr. Cherry's Brown Bess, 147lb. (Hayashi) 0
Mr. Tatsuta's Matsukaze, 140lb. (Goto) 0
Mr. Sphinx's Evele I, 144lb. (Sugura) 0
Mr. Sphinx's Fourree, 144lb. (Miyagawa) 0

Faule Grete started first favourite and Madge second. Mr. Sphinx declared best of his pair to win. After a fair start Madge made the running but yielded the lead to Faule Grete, who won cleverly by three lengths from Madge, Bucephalus third. Time 2.16¼.

PARI MUTUEL, 5 *yen*—Faule Grete 231, Bucephalus 20, Madge 177, Brown Bess 63, Matsukaze 13, Evele I 33, Fourree, 51; total, *yen* 2,655—Faule Grete, *yen* 11.50.

LAW CASES.

WEALE VERSUS AKASHI TOKUJIRO.

In the Yokohama Chihō Saibansho on Friday morning, before Judge Yasuda, the hearing was resumed of the case, adjourned from the 11th of October last, brought by Mr. Weale, of Messrs. Cornes & Co., No. 50, Yamashita-cho, Yokohama, against Mr. Akashi Tokujiro, of Yamanoshiku, Tokyo. Mr. H. Sato appeared for plaintiff but Mr. K. Takakura, counsel for defendant, was absent. Plaintiff asked that defendant should take delivery of fifteen cases of plush, valued at *yen* 4,025, imported by the former last year to the order of defendant, but the latter refused to comply with the request on the plea that the quality of the article imported differed from the sample.

Mr. J. E. Beale, Secretary of the Yokohama Foreign Chamber of Commerce, was called as witness, and in response to ques-

tions from the Bench stated, through Mr. Y. Izumi, interpreter engaged specially for the occasion, that it is customary in the former Settlement, Yokohama, that whenever a dispute arises between a seller and a buyer over a transaction the matter should be brought to the Chamber for arbitration, but that in case both parties or one of them should break contract and they can not agree to leave the matter in the hands of arbitrators the affair must then be carried to the law courts for decision. Owing to the non-appearance of counsel for defendant, the case was adjourned to the 18th inst. at 10 a.m.

MARTIN VERSUS RANGER.

Judgment was given in the Yokohama Chihō Saibansho on Monday afternoon, by Judge Yasuda, in the case of Mr. J. Martin of No. 239, Bluff, Yokohama, and Mr. C. K. M. Martin of No. 263, Bluff, against Mr. Ranger of No. 153 in the former Settlement. Defendant was ordered to pay plaintiffs *yen* 372.50, including *yen* 150 for hire of a steam-launch and *yen* 222.50 the cost of 40 tons of coal, together with five per cent. interest per annum from the 1st of March last year until the date of the conclusion of the case, the cost of proceedings being borne by defendant. Particulars of the affair appeared in the *Japan Mail* of the 7th inst.

FISCHER VERSUS WESTON.

In the Yokohama Chihō Saibansho on Monday morning, before Judge Yasuda, the first hearing took place of an action brought by Mr. A. E. Fischer of No. 88, Yamashita-cho, Yokohama, against Mr. A. Weston of No. 41. Mr. Furumura appeared for plaintiff and Mr. Tsuruda for defendant.

Plaintiff claimed from defendant *yen* 1,457, together with five per cent. interest per annum from the 1st of December, 1899, until the execution of judgment, for breach of contract.

Counsel for plaintiff stated that his client made a contract with defendant on the 27th of Oct., 1899, whereby the latter was ordered to forward a piano and other articles to Montreal, Canada, and to sell them there, being given up till the 25th of December, the same year. However, plaintiff received no reply whatever from defendant even after the expiration of the contract date, as to whether the goods were sold or not.

Counsel for defendant replied that in the contract there was no fixed date by which defendant should have sold the articles, though the defendant agreed to dispose of the goods in Canada.

The next hearing will take place on the 2nd of December at 10 a.m.

SCHRAMM & CO., VERSUS MITA KANKICHI.

In the Yokohama Chihō Saibansho on Monday, before Judge Kano, the hearing was resumed of the suit brought by Messrs. Paul Schramm & Co. against Mr. Mita Kankichi, claiming from the latter payment of *yen* 1,335.370 as the price of merchandise which the former firm imported in compliance with his order.

The hearing was adjourned.

ARAI HIKOTARO VERSUS J. W. HALL.

In the Yokohama Chihō Saibansho on the 9th inst. before Judge Kano, the hearing was resumed of the case by Mr. Arai Hikotaro, of No. 134, Yamashita-cho, against Mr. J. W. Hall, of No. 61. Mr. Wakabayashi, examined as a witness, stated that according to the request of plaintiff he called on defendant to have a house, which plaintiff had bought of defendant at auction, transferred, but discovered that the house had not been owned by defendant and, therefore, he could not obtain legal registration of its transfer.

Counsel for defendant argued that plaintiff must be aware that, as had been previously advertised in the *Japan Mail*, the house was to be vacated within ten days after its sale, and that since defendant had obtained a power of attorney from Mr. Hosoi, the owner of the house, there was no reason why the registration of its transfer could not be effected. The hearing was adjourned till the 30th inst. at 10 a.m.

PETERSEN VERSUS BOX.

In the Yokohama Chihō Saibansho on Thursday morning, before Judge Matsuda, the hearing was resumed of the suit brought by the Petersen Engineering Company, No. 113, Yamashitacho, Yokohama, against Mr. T. H. Box, No. 114. Mr. Harada appeared for plaintiffs and Mr. Sato for defendant. As already reported in these columns, plaintiffs claimed from defendant the evacuation of premises at No. 114 in the former Settlement, as plaintiffs wished to utilise the premises in their engineering business, and at the same time demanded payment of house-rent of yen 420 together with five per cent. interest per annum from November 1st last year until the execution of judgment, notice of evacuation having been given to defendant on the 31st of November last year. Defendant, who occupied the premises at the monthly rental of yen 70 for a period of two years, refused to comply with the plaintiffs' request. The proceedings were adjourned until the 14th of December at 10 a.m.

CONFISCATION OF A GERMAN TUGBOAT.

Judgment has been issued by the Kobe Chihō Saibansho in the case of Messrs. Nickel & Co.'s tugboat *Hamburg*, the master of which, Takeda Tokichi, was charged with a violation of the Law Regarding Vessels.

The facts appear to be that on May 17th last his employers ordered the master of the *Hamburg* to tow the British ship *Dunfriesshire* to Innoshima, Bingo, and on the following day he left Kobe with the ship in tow. Three days later when they arrived off Innoshima, a nephew of Mr. Nickels named Holstein, came on board and ordered accused to dock the vessel in the unopened port of Habu. Accused pointed out that what was proposed would be a violation of the law. Holstein, however, and a man named Petersen, who was the engineer of the vessel, insisted, and the ship was docked from the 21st to the 24th. It appeared that when taking the *Dunfriesshire* in tow the hawser fouled the steamer's screw but no injury was sustained by the latter. This incident was referred to in a notice which on May 25th the accused sent to the Itadaki Kaimusho intimating that in consequence of damage he had been compelled to dock.

The Court on these facts found that "the *Hamburg*, which was not sea-damaged, was taken to Habu, Innoshima, an unopened port without special permission from the Minister of Communications. This was a violation of Art. 3 of the Law Regarding Vessels and is liable to be punished as set forth in Art. 23 of the same law by a fine of over yen 200 and less than yen 2,000. A vessel, taken to an unopened port is also liable to be confiscated as set forth in the same article. Costs incurred in the case are to be borne by the accused as set forth in Art. 201 of the Code of Criminal Procedure. On these grounds the foregoing judgment is given against the accused."

The *Kobe Herald* understands that the authorities have not taken any steps with regard to the provisional attachment of the *Hamburg* and that Takeda entered appeal against the judgment on Nov. 4th.

LITERARY NOTES.

Mr. Arthur Reed Kopes, who began his literary career at Cambridge with a volume of poetry, sends the following poem to the *Zaifu*. It is entitled "Gifts":—

God and men have given me
Treasures manifold;
God has made me fair to see,
Men have brought me gold.
Better treasures, yea, the best,
They will give, I trust;
God shall bring a gift of rest,
Men a gift of dust.

The play on the subject of *Francesca da Rimini*, which Mr. Marion Crawford has written for Madame Sarah Bernhardt, was originally written in English. A rough French version, which the author read to Madame Bernhardt, was made by Mr. Crawford himself, but the actual version to

be played will be made by Monsieur Marcel Schwob. This version is merely to be an accurate translation, and does not raise M. Schwob into the position of a collaborator. Mr. Crawford has gathered the material for his play from the true story of *Francesca da Rimini*, and he believes that he has discovered the actual room in which Francesca was murdered.

Mr. Kipling's new story, *Kim*, which is as long, if not longer, than *Captains Courageous*, has been skillfully illustrated by Mr. Lockwood Kipling. The father of Kim, the hero, was an Irish soldier, but, Kim was brought up as a poor white among natives in Lahore. Loafing there as a street arab of wide experience, and already known as "Friend of all the world," he meets a lama from Tibet who is on a pilgrimage to the Buddhist River of Healing, where he hopes to be able to escape from the Wheel of Life. Kim accompanies him as *chela*. The account of the life by the Great Trunk Road, from the plains to the highest hills, gives Mr. Kipling the finest opportunity he has yet found to show shifting phases of Indian life, man and woman, priest and soldier, Hindu and Mohammedan, native and European.

Provost Macpherson, Kingussie, is contributing to *Saint Andrew* some interesting records of "Church Life in the Old Lordship of Badenoch." Of Mr. Duncan Macpherson, the minister of the Parish of Laggan (1747-57), several amusing incidents are related. Mr. Macpherson, in order to get to the church, had to cross the Spey on horseback, there being no bridges. Sunday was generally observed both as a holy day and a holiday. For hours before public worship began the young men of the parish met and played shinty until the arrival of the clergyman, who, *volens nolens*, was compelled to join the players, otherwise he was given clearly to understand that he would have to preach to empty benches. So, after a hail or two, shinty clubs were thrown aside, and a large congregation met to hear the new doctrine. The sermon was short but pithy. Immediately after services were over shinty was resumed, and carried on at intervals till darkness put an end to their amusements.

Prescott's great work, *The Conquest of Mexico*, has now been before the public for nearly sixty years. Its inclusion, in a three-volume edition, in the Bohn Libraries, is welcome, the more so because it is accompanied by an introduction written specially for the edition by Mr. George Parker Winship, who, in a few competent pages, points out the weaknesses in a work of vast success and surpassing interest. Written with labourious care and art, and following the successful *Ferdinand and Isabella*, the *Conquest* was a great success, and, as Mr. Winship says, it has remained the standard authority for one of the most fascinating episodes in American history. Prescott was not a "scientific" historian, of course; and, beyond this, he lacked personal knowledge of Spanish and Mexican character. Hence, although his documentary facts are nearly always right, his interpretations are sometimes less satisfactory. "He probably never saw an American Indian," says Mr. Winship, who concludes his strictures with the remark:—"Read as fiction, but as fiction very true to the facts, no one need ever regret the hours spent with Prescott's romance of Cortes, the conqueror of Mexico."

One of the notable successes of the autumn publishing season in London seems to be Lucas Malet's *History of Sir Richard Calmady*. Lucas Malet (Mrs. Harrison) is a daughter of the late Charles Kingsley and has inherited the literary traditions of her clever family. "C. K. S." the Editor of the *Sphere*, sees in her new book "the crowning literary effort of the writer." "None the less," he continues, "Lucas Malet's story, the story of a life rendered terribly tragic by a horrible malformation, amply justifies itself. Given a child born into the world under such calamitous conditions that he is a dwarf of a peculiarly repellent appearance, what might be his development were he heir to a baronetcy and £40,000 a year? This is the problem that Lucas Malet

has set herself to answer with great insight into life with great thoughtfulness, and always with the saving grace of poetry. It would seem that the 'spontaneous amputation' from which Sir Richard Calmady, suffered from his birth is not unknown in surgery. This is the affliction of the hero which makes him, with much physical beauty of face, with plenty of gifts of intellect and scholarship, so repellent to many, so endeared to his mother and one or two friends. As I have said, Lucas Malet has set herself to work to tell the life story of a dwarf. She has told it in a volume that is divided into six parts. The first treats of his birth and childhood; the second of the disillusion which comes to him when he realises in youth what his affliction means; the third of his earliest love episode; the fourth of yet another love episode; the fifth of his journey through what Carlyle has called the "mudlath" of early manhood; the sixth, pleasantly called "The New Heaven and the New Earth," that tells much that it is scarcely fair to anticipate for the reader. Each one of these sections is as long as an ordinary novel, but not one of them is too long, save only the last, when the narrative hangs fire to a considerable extent. All who want a very fine story that gives food for thought and reflection must read *The History of Sir Richard Calmady*."

A well-illustrated article by Mr. Robert Hilton in the *Caxton Magazine* for September gives many interesting particulars about the Oxford University Press. The first printer at Oxford was Theodoric Rood, a native of Cologne, who printed there in 1480 and continued till 1485. In the year 1667 the famous Dr. Fell, then Bishop of Oxford, presented to the University a complete type foundry, with all the apparatus and appliances necessary for a complete printing-office. More than £4,000 was raised and expended on type; and the renown of the Oxford Press for beauty and accuracy soon spread through England and the Continent. In the north wing of the present building about 300 persons, chiefly compositors and readers, are employed, and here are set up into type the numerous works in Greek, Oriental, and English languages known as the "Clarendon Press Books." This department is called the "Learned Press," and it can set up books in over 150 languages and dialects. Recently, one more language, Eskimo, has been added to the list, and an edition of "The Pilgrim's Progress" has been printed in it. In the Learned Press there is still being set a work in Peshito Syriac for the use of students, which has been in hand since 1863.

Mr. F. B. Sanborn, one of the few living Americans who possesses reminiscent knowledge of the old Cambridge set, has written a book on "The Personality of Thoreau," to be published by Charles E. Goodspeed, of Boston. We quote this anecdote from a "specimen page":—"When Emerson said to his young visitor that 'he was always looking out for new poets and orators, and was sure the new generation of young men would contain some,'—Thoreau quaintly said that 'he had found one in the Concord woods,—only it had feathers, and had never been to Harvard College; still it had a voice and an inclination,—and little more was needed.' 'Let us cage it,' said Emerson. 'That is the way the world always spoils its poets,' was Thoreau's characteristic reply."

In the paper by Mr. R. Lockhart-Jack on "Bridges in Western China," read before the Mechanical Section of the British Association, the Chinese, he said, had learned to use their materials with considerable skill, and a thorough investigation of their handicraft possibly would reveal whether they had developed a formula for their guidance or whether by long experience their bridge builders had learned to turn out good work by empirical methods. Investigation of the subject would certainly yield results of great interest when compared with mediæval and modern work in Europe.

Although the British public have begun to realise in a vague sort of way that Lord Curzon has proved a success in India, it will probably be a surprise to most to find from "An Onlooker's"

article in the October number of the *Fortnightly* how remarkable has been his administration up to the present. The writer of the article, who is clearly well informed, does not hesitate to place Lord Curzon, though his term of office is not yet half over, among the very greatest of the Viceroy's. He gives a most interesting account of Lord Curzon's boundless energy, his resourcefulness, and his prompt determination, qualities which have led him to act where others for years before him have been content to "take the matter into consideration."

Diplomacy and authorship have been associated with the career of Sir J. Rennell Rodd, who has just been appointed Secretary to the Embassy at Rome. His name came prominently before the public during the late Sir G. Portal's British mission to Uganda, when Sir Rennell was placed in charge of the British Agency at Zanzibar. In 1897 he was deputed as Special Envoy to the Emperor Menelik, and two years later he got his K.C.M.G. for his services at the Agency at Cairo. His "Ballads of the Fleet" is well-known, and it will be remembered that the late Empress Frederick commissioned him to write the memoir entitled, "Frederick, Emperor and Crown Prince."

It is well known that, despite the adage, Goethe was a hero to his valet. It is now known that Carlyle, who hailed him as his master, was a hero to his housemaid. This information is conveyed to us by Mr. Reginald Blunt in the October *Cornhill*. His paper consists of letters and facts communicated to him by Mrs. Broadfoot, of Thornhill, who recently visited Carlyle's house in Cheyne-row and explained her obvious familiarity with the rooms by stating that she was Mrs. Carlyle's housemaid there from July, 1865, till Mrs. Carlyle's death in 1866. Speaking of Carlyle, Mrs. Broadfoot says: "I could have lived with him all my days, and it always makes me angry when I read, as I sometimes do, that he was 'bad tempered' and 'gey ill to get on with.' He was the very reverse in my opinion. I never would have left him when I did, had I not been going to get married." The whole budget of Mrs. Broadfoot's testimony is a most interesting item in a particularly good *Cornhill*.

A story of Wordsworth which is quite worth quoting is told in a new book on the Lakes. It was the poet's habit to spout his poetry as he walked about the country. On one occasion Hartley Coleridge was out for a stroll, and he stopped by an old stone-breaker near the Rydal lake. "Well, John, what's the news?" he asked. "Why, nowt varry particular, only old Wudsworth's brocken looce ageean!" was the reply.

It was announced in London on October 21 that the publication of the *Anglo-Saxon Review*, edited by Mrs. George Cornwallis-West (Lady Randolph Churchill), would cease with the current issue. This quarterly *Review*, which Lady Randolph Churchill started, was intended exclusively for the aristocracy of England and for all book lovers of means. It was finely printed and richly bound, and the subscription price was a guinea a volume. It was royal octavo and each number was a volume of 230 pages. Its distinguishing feature was a different binding for each volume. Each of these bindings was copied from some work of a famous English or European binder, and Mr. Cyril Davenport, one of the experts on this subject, contributed a note on the binding to every number. The articles were chosen with much judgment and it could be said for them that they were fully as interesting as the articles in the average review. The illustrations were of distinguished Englishmen. It is evident by the failure of the enterprise that the work did not meet the support that was expected, or that the business management of the venture was poor. The value of the volumes will now advance, as collectors will be anxious to secure complete sets.

CHINA NEWS.

Lieut. R. E. Chilcott, R.N., is appointed to the command of H.M.S. *Woodlark*.

Mr. Reginald Tower, Secretary of H. M. Legation at Peking, has been appointed Minister to Siam.

H.M.S. *Dido* left Hongkong homeward-bound on Oct. 30th, cheered by all the British ships in the harbour.

Sir J. L. Mackay, the British Special Tariff Commissioner, will have two secretaries, Mr. C. Somers Cocks, of the Foreign Office, and Mr. Clark of the Board of Trade. After visiting Hongkong he will go to the more important treaty ports to learn their commercial conditions.

It was reported in Shanghai mandarin circles on Oct. 6th that Prince Chun had received a special telegram from the Empress Dowager, commanding him to proceed straight to Tientsin by sea, wait at Peking for the return movement of the Court towards the old capital, and then start for the Chihli borders by rail to meet their Majesties as they enter the frontier line of that province.

On the first day of the Shanghai Race meeting the Cash sweep (including the Whangpoo Stakes), came to \$13,580; Pari-mutuel, \$17,350; and Totalisator, \$16,335; on the second day the Cash sweep was \$27,305, the Pari-mutuel; \$35,450, and the Totalisator, \$33,935. On the third day the figures were: Pari-mutuel, \$57,864; Totalisator, \$50,625; Cash sweep \$52,630.

Sir Chi-chen Lo Feng-lu, K.V.O., has been promoted by special decree a Metropolitan Officer of the 3rd grade in reward for his services as Chinese Minister to Great Britain for the past three years. Soon after writing his memorial to thank the Emperor for the distinction conferred on him, Sir Chi-chen was suddenly attacked with paralysis and grave fears are entertained for his health.

Peking dispatches in Shanghai papers state that the Foreign Ministry recently received a dispatch from the Portuguese Governor of Macao tentatively asking for the cession of the district of Hsiang-shan, bordering Macao, in order to round up a "scientific" frontier for the Portuguese Concession. The excuse for this request is the cession of Kowloon and immediate vicinity by the Chinese Government to Great Britain.

It is stated that the decree organising the native courts of justice in Tongking submits the judgments rendered by these tribunals to a Commission of Appeal composed of three Councillors of the Indo-China Court of Appeal and two mandarins. Corporal punishment is suppressed. These modifications necessitate the creation of two new Councillors for the Court of Appeal, and a substitute for the Attorney-General.

The Grand Council of China is reported to be seriously considering the feasibility of printing National Government Bonds to take the place of silver currency throughout the Empire. The total value of these Government Bonds will amount to one thousand millions and the proceeds are to go towards paying the War Indemnity to the Foreign Powers. Another 450 million taels are to be used to forward reforms throughout the country and the remaining 100 millions for expenses incurred in manufacturing said Bonds.

On the morning of Oct. 4th at the Bureau of Foreign Affairs in Puhling Well Road, Prince Chun received the Consular Body in Shanghai, and the Customs foreign officials. Later on he proceeded to the German Consulate, in a closed carriage, drawn by horses with the familiar trappings of Imperial yellow, and escorted by a number of German military officers mounted on horseback. At the Consulate the Prince was entertained at tiffin by the Consul-General (Dr. Knappe), and the members of the Consulate Staff.

The reward for undertaking the "Perilous Journey" to Japan—for so the Mission of

Apology to that country was at first considered by the special Ambassador Na Tung and his friends—according to a Peking dispatch in the *N. C. Daily News*, has been a lucrative appointment for the ex-Boxer on his return to the Capital in the shape of the Senior Vice-Commissionership of Octroi at the Ch'ungwen-gate. This post, previous to the Boxer disturbances of last year, together with the Chief and Junior Vice-Commissionerships, were considered the three best posts in Peking in the gift of the Crown. The Chief Commissioners of Octroi is invariably a Prince whilst the Vice-Commissioners are generally members of the Imperial Clan or special favourites of the Ruler of the Empire. These posts are so lucrative that an incumbent is allowed to hold his post for one year only, after which he must retire in order to let others fill their pockets also. Na Tung's Vice-Commissionership will be worth to him a quarter of a million taels, perhaps more.

AMERICAN TOPICS.

Mrs. Patrick Campbell has signed a contract to appear in "The Second Mrs. Tanqueray" and other plays of her repertoire in a number of American cities this winter. The first performance will be given in New York soon after January 1st.

The Pan-American Exposition at Buffalo has been anything but a paying investment so far, and those in a position to know estimate that at the close of the season there will be a total deficit of from \$1,000,000 to \$1,500,000, which stockholders may be called upon to make good.

Pittsburg interests are said to be negotiating for the purchase of the entire surface traction system of St. Petersburg. It is said that a company will be formed under the Russian laws with a capital of 100,000,000 rubles—\$51,500,000. If the offer is accepted the lines will be extended and electric traction installed.

The Carnegie Steel Company announce that during September all records for the production of steel in one month were broken by their mills at Braddock and Homestead. During the month the Edward Thompson plant at Braddock turned out 74,000 tons of ingots in converting mills. In output of structural shapes, etc., all previous records were broken by 3,500 tons.

The Portland, Ore., *Commercial Review* estimates the wheat crop of Oregon, Washington and Idaho in 1901 at 53,290,000 bushels, from which must be deducted 17,000,000 bushels, viz., 6,000,000 bushels for home consumption, 3,000,000 bushels for seed for the 1902 crop and 8,000,000 bushels for the manufacture of flour, thus leaving 36,290,000 bushels of the total crop for export.

Lieutenant-General Miles, who was for many years an advocate of the Army canteen, has become convinced of the wisdom of abolishing it. This is said to be the result of observing the effects of its absence since the radical legislation on the subject by the last Congress. It is expected that Gen. Miles will include, in his forthcoming annual report to the Secretary of War, a strong indorsement of the abolition of the canteen.

Since the Seattle assay office was opened on July 15th, 1898, there has been received there gold of the commercial value of \$52,780,579.45. From the mines in the far north most of the yellow metal has come, though some of it was from Washington and British Columbia. And yet those who thoroughly know the conditions of the Klondike and of Alaska say that the surface of the great mineral district has just been scratched, and that there are mines there incomparably richer than any the world has ever known.

The Brooklyn Rapid Transit Company has paid during the year covered by its last annual report the enormous sum of \$971,867 in claims for personal injuries. The legal and claim department expenses swelled the amount to \$1,142,992, or nearly 10 per cent. of the gross receipts of the company. In this connection, however, the re-

port makes this astounding statement: "It is not too much to say that not 50 per cent. of the money which your company paid last year in damages through attorneys reached their clients."

At the regular weekly meeting of the Council of Apostles, held in the temple at Salt Lake on October 17th, Joseph F. Smith was chosen and set apart as president of the Church of Jesus Christ of Latter-Day Saints, in succession to the late Lorenzo Snow, with John R. Winder and Anthon H. Lund as his first and second councillors respectively. President Smith was also named trustee in trust for the church. He was likewise named as president of the Salt Lake Temple, with John R. Winder as his first assistant. Apostle Brigham Young was sustained and set apart as the president of the quorum of Twelve Apostles.

Captain Henry Glass, in command of the naval training station at Yerba Buena Island, has received notification from Washington of his promotion to Rear-Admiral. Captain Glass is one of the most popular officers of the Navy, and no naval officer has a wider circle of friends in San Francisco. He was in command of the cruiser *Charleston* when Guam was taken. At Manila he was very ill of fever for some weeks and was invalided home, soon afterward being appointed to command the naval training station. The large barracks there and all the improvements connected with the station have been made under his direction. He will remain in charge of the station as Rear-Admiral for the present.

Immediately after Mr. Roosevelt succeeded to the Presidency it was intimated in advices from Washington that the negotiations looking to the formulation of a new canal treaty had his hearty endorsement. It is now announced that a substantial agreement has been reached between Mr. Hay and Lord Pauncefote, and that the convention will be in shape to be signed in November. Judging from what has leaked out regarding the terms of the treaty, Mr. Hay has succeeded in framing an agreement which, while meeting the criticisms directed against the former treaty in the Senate, is satisfactory to Great Britain. The Clayton-Bulwer treaty, it appears, is to be abrogated, the neutrality of the water-way is to be confirmed and the right of the United States to protect its own interests by force in time of war is to be admitted. The precise terms in which this right is guaranteed to the United States have not been made public. They will certainly be looked for with great interest, remarks *Broadstreet*, for the task set for Secretary Hay was one of the most difficult in the records of our diplomacy.

A Wilmington telegram of Oct. 18th said:—

Mrs. Bessie H. Hetherington to-day served notice of a petition for divorce from her husband, Lieutenant James Hetherington, United States Navy, who is now stationed at Mare Island Navy Yard, California. She alleges desertion. While stationed in Yokohama in 1892, Lieutenant Hetherington shot and killed Mr. Gower Robinson, an Englishman, because of alleged attentions by Robinson to Mrs. Hetherington. Hetherington was acquitted by the consular court and with his wife at once returned to this country. Mrs. Hetherington has since resided here, and alleges that Hetherington deserted her three years ago.

On October 21 the President promoted Lieutenant Hetherington to the rank of Lieut-Commander in the United States Navy.

The indictments in the Havana post office fraud sent on Oct. 15th by the Fiscal to the Audiencia, implicated Estes G. Rathone, jointly with C. F. W. Neely and W. Reeves in defrauding the Government, his complicity being based on the contention that he permitted, and therefore consented to, and tacitly authorized the fraudulent transaction. The whole amount on all counts in the indictments is estimated at \$150,000. The Fiscal has recommended that each of the accused be fined this amount, and also that Rathone be sentenced to imprisonment for 25 years; Neely for 25 years and six months, and Reeves for 24 years and six months. The Fiscal has further recommended that Moyia and Mascero, stamp clerks, be sentenced to imprisonment for six months and one year respectively.

NEWS OF THE WEEK.

On and after Nov. 16th, dining cars will be attached to express trains running on the Tokaido line.

His Imperial Highness the Crown Prince, now staying at Hayama, will shortly make a pleasure trip to Shikoku and the neighbouring districts, where he will spend about two weeks.

A dispatch from Sapporo says that the store-houses attached to the Hokkaido Coal-mining and Railway Company were destroyed by fire on November 13th. The loss is estimated to be great.

The Emperor of Japan has conferred on Mr. E. A. Hewett, the new agent for the P. & O. S. N. Co. in Hongkong and late Chairman of the Shanghai Municipal Council, the Fourth Class Order of the Sacred Treasure.

With reference to the American Government's proposal for the increase of Customs duty at Manila, it is reported that the Japanese Foreign Office forwarded a protest to the Authorities in the Philippines on Nov. 7th.

The Toyo Kisen Kaisha recently passed a resolution for the construction of a big steamer of over 10,000 tons. Mr. S. Tomioka, an official of the company, will shortly set out for England in connection with the project.

A party of Japanese soldiers, consisting of some 52 officers and men, who have been ordered to proceed to Peking as the Japanese garrison there, left Shimabashi on Wednesday for Ujina, whence they will take steamer to China.

Mr. Sai-kin, the new Chinese Minister to Japan, is expected to start from Shanghai on the 16th in order to take up his new post. Mr. Li, the present Chinese Representative in Tokyo, will therefore return home towards the end of this month.

The amount of tea exported from Yokohama during October last totalled 1,919,555 *kin*, including 686,460 *kin* for Canada, 784,257 *kin* for New York, 337,546 *kin* for Chicago, 86,019 *kin* for San Francisco, and 31,283 *kin* to the Pacific coast.

There is a report that the military fund, amounting to yen 3,000, of the 32nd Regiment of Infantry (Yamagata), was stolen on the night of Nov. 10th. The officers and men of that Regiment proceeded to Sendai to attend a banquet given in connection with the manoeuvres and the thief took advantage of their absence. The thief is still at large.

Motokichi Kaneda, 18 years old, in the employ of Messrs. Bowden Brothers & Co., No. 164, Yokohama, was arrested by the Kagacho police a few days ago on a charge of theft and sent at once to the Yokohama Chiho Saibansho for trial. It appears that he stole on the 5th inst. a cheque for yen 50, and drew the money from a Chinese exchange at No. 136. He was still engaged at work when detected by the police.

News from Osaka states that Masuda & Co., a Japanese concern in that city, which had lately undertaken the production of Korean coins has obtained a farther order from the Korean Government for the coinage of subsidiary coins amounting to 1,000 boxes (each box contains some yen 250) and it is expected that the money ordered will be forwarded to Korea toward the end of this month. It may be added that the Japanese establishment above referred to has already shipped to Korea 6,000 boxes of coins.

The Budget of the Kanagawa Prefectural Office for the 35th fiscal year (1901-2) is, it is reported, put at yen 920,000 altogether, including ordinary expenditures, of which yen 330,000 are for urban districts and yen 590,000 for rural districts. These figures are said to show an increase of a little over yen 140,000 as against the previous fiscal year. It is understood that the in-

creased expenditure is to be applied to new schools and an increase in the police force.

Sir Thomas Jackson has received a telegram from London containing the intelligence that his son, Lieutenant Jackson, 1st King's Own (Royal Lancaster Regiment), A.D.C. to the late Colonel Benson, was quite safe, not even having been wounded in the violent Boer attack on Colonel Benson's column near Bethel.

The Nippon Yusen Kaisha's service to Vladivostok will close this year on the 12th of December, the steamer *Yamashiro Maru* being the last vessel to leave Kobe. The North China service will be stopped by the 11th of next month, the steamer *Risshin Maru* being the last to leave Kobe for Port Arthur. The steamer *Genkai Maru* will make one more visit to Taku, leaving Kobe on the 27th inst.

A shocking affair is reported from Nagoya. On the afternoon of the 11th inst. a man named Tamba Suyesaburo, 41 years old, of that city, suddenly entered the house of Ashida Shinzo and killed the wife of the latter, his two sons and one other with a sharp weapon, with which the murderer was armed. No sooner had he accomplished this crime than he ran out of the house and attacked a boy 11 years old, whom he soon despatched. Four other passers-by were also wounded more or less seriously. The offender then took to his heels and has not been arrested as yet. It is said that the would-be murderer had just been released from the Hokkaido Prison, where he was confined for 13 years.

At the biennial meeting of the Supreme Council of the Thirty-third degree of the Ancient and Accepted Scottish Rite of Free Masonry for the Southern Jurisdiction of the United States, the mother council of the world, held at Washington on October 21, the new Sovereign, Grand Commander, Illustrious Brother Richardson, handed down an important ruling which will have a serious effect outside the United States. He rules that a member of a foreign jurisdiction cannot become a member of the southern jurisdiction of the U.S. without severing his connection with the former. "If an applicant is a member of bodies in a foreign jurisdiction, he cannot be admitted into a body in ours until he renounces his allegiance to such foreign jurisdiction. A citizen of Great Britain or other foreign Government, may become a citizen of the United States, but he must first renounce foreign allegiance and swear allegiance to our own Government. A similar rule should apply in Masonry."

Intelligence from Moji is to the effect that the steamer *Yamashiro Maru* brings news from Vladivostok that some 57 Japanese fishermen have been arrested by the Russian Authorities on a charge of violating fishing rights in Saghalien, and that 13 have been found guilty in the law court at Vladivostok, where they were conveyed for trial. Mr. Fukuda, formerly an official in the Japanese Consulate at Vladivostok, who was one of the passengers on board the *Yamashiro Maru*, said that though the East China Railway is now finished traffic will not be actually opened until February next. With regard to the proposed enforcement of the new tonnage dues at Vladivostok on and after the 1st of January next, it has been ascertained that whereas the present rate of duty is yen .30 per ton the new rates will not be more than yen .20 per ton, and that in the case of regular steamers the imposition of the duty will not be repeated, the charge being made only once a year.

Sir Archibald Levin Smith, late Master of the Rolls, whose death occurred in Morayshire, Scotland, on October 21st, was educated privately and at Trinity College, Cambridge. He did not greatly distinguish himself in scholarship, but pulled a remarkably good oar, and was a member of the varsity eight three times against Oxford. He was called to the bar in 1866 at the Inner Temple, and rapidly acquired a very large practice. He was junior counsel to the Treasury from 1863 to 1865, and from 1879 to 1883, when he was

elevated to the bench. From then until 1892 he was Judge of the High Court, and in the latter year was made Lord Justice of Appeal. About a year ago he succeeded Lord Alverstone as Master of the Rolls, a position which his health later forced him to give up. He never mingled in politics at all and owed his advancement entirely to his judicial abilities. His abstinence from political matters caused him to be appointed one of the three Judges to sit on the Parnell special commission.

It appears that the auction which began on Tuesday morning will not terminate the eventful history of The Maples Hotel, 82, Bluff, Yokohama. The land, buildings and contents—in fact all the property as a going concern—were put up first by Mr. Jno. W. Hall quite a quarter of an hour after the advertised time, but elicited only one bid. The auctioneer had announced that there was a mortgage of yen 40,000 and intimated that it would be advisable to begin the bidding at or above that figure. Mr. C. D. Moss offered yen 40,000. No one seemed disposed to raise the bid and after a considerable pause Mr. Hall said the property as a going concern would be withdrawn, and the contents of the buildings sold as per catalogue. He then put up the land and buildings without the contents. For these no offer was forthcoming and he then stated that the land and buildings would be put up to auction at a later date of which notice would be given. The sale of the contents was then proceeded with. There was a large attendance of the public.

CORRESPONDENCE.

MR. MOTT AND THE SPIRITUAL AWAKENING AMONG JAPANESE STUDENTS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The departure of Mr. John R. Mott, Secretary of the World's Student Christian Federation, for China makes possible a summary of what he accomplished during the month he spent in Japan. He could hardly have come at a more opportune time, for he was enabled to take advantage of and to give fresh impetus to the wave of evangelization set in motion by the Forward Movement of the Church known as Taikyō Dendo.

Mr. Mott's success as a general in the field of religious work among students springs from thorough preparation after reconnoitering the situation and unquestioning reliance upon tested spiritual forces. Months before he left America, a league of tried friends throughout the world had begun to pray for him and his coming work in Japan, China and India. In Japan post, press and visitation by Association Secretaries were all employed in incessant preparation during several weeks. It is safe to say that hardly a Christian in the country or a student in the cities selected for special meetings was ignorant of Mr. Mott and his purpose in coming to Japan. Christian students were indefatigable in working up and helping at the meetings. When one considers the vastness and the distractions of a city like Tokyo, the efficiency of the arrangements perfected under the lead of the Imperial University Christian Association seems all the more remarkable.

Shortly after Mr. Mott's arrival, a National Conference of leaders in Christian work among students and other young men was convened in Tokyo, Oct. 3-6. Numbering only 140 delegates, it was as strong as it was select and representative. An analysis shows that it included presidents or deans of eleven Christian schools, 80 delegates from 35 Student and City Christian Associations, 25 missionaries from 16 missions, twelve prominent pastors and editors, Minister Buck, and Hon. K. Kataoka, president of the Lower House. Impartial observers felt that both the personnel and the programme had realized the ambition of its promoters to make it the most notable conference of its kind ever assembled in Japan. One result of the Conference was to win stauncher friends for Young Men's Christian Association and to call forth a general demand for wise extension of its work in order to reach the growing and largely neglected numbers of men in cities and schools. But it also formed the determination to press the evangelization of students so long as the present high tide of opportunity shall continue.

In Japan the goal of Mr. Mott's public work was to present the fact of Christ to students with such force as to lead many of them from passive knowing to active willing. He was fully aware that he could not have added even this one layer had not the foundation been laid by countless conspicuous hands. He had 18 evangelistic meetings in Sendai,

Tokyo, Kyoto, Osaka, Okayama, Kumamoto and Nagasaki, attended by 11,580 young men, of whom 1,464 became earnest inquirers. The student inquirers numbered over 1,000, and of these 140 were medical students, a hard class to touch.

Most of these inquirers, it "deciders," already knew considerable of Christianity, yet or would be misleading to speak of them all as converts. The step they took was for them as momentous as joining the Church ordinarily is for unbelievers in Western lands, but they will almost all require careful instruction before receiving baptism. Harm has been done by thoughtless classing as converts the 5,000 more or less earnest inquirers of the revival in Tokyo last Spring. In fact, only a small proportion of them will be baptized during this year. Mr. Mott's basis of decision was more strict and the following up will be more thorough, but even so it should not be inferred that all of the 1,464 are already upon the threshold of the Church.

Unusual precautions were taken to ensure serious and intelligent decisions. All the meetings where men were to be pressed to decision consisted of three sections: first, an address to awaken a sense of sin and of the need of power to conquer it; second, an address to those who had remained to learn more specifically of power through Christ. After this address Mr. Mott generally spoke as follows:—All of you who wish to declare your earnest desire and purpose to become disciples of Christ, that you may come to know him as your personal Saviour and Lord, will please raise your hand a moment." The full import of this declaration was invariably dwelt upon. Then workers passed cards for the names of those who had raised their hands. Third, came a meeting limited to those who had signed cards, to whom Mr. Mott gave sympathetic warning and counsel.

The difficulty and importance of conserving results were realized from the first. After the closing meeting in each city a Committee of Conservation was appointed to classify inquirers and assign them to responsible persons for visitation and instruction. This was a large task, for in several cities there were more than 200 to be cared for. Special Bible classes, lectures and socials have been arranged. In Kyoto Dr. Davis has been prevailed upon to devote all his time for some weeks to this work. Furthermore, a special fund has been sent by a generous friend to help conserve results and to create similar awakenings in centres not touched by Mr. Mott.

In addition to direct evangelistic work, Mr. Mott touched educational circles by delivering his address on "The Influence of Christianity among the Students of all Lands" in the halls of several Government High Schools. He is the first distinctively religious worker to be invited to speak inside the Tokyo Imperial University.

So much for the appreciable results of the visit and the latent forces it focussed upon the evangelization of students. But its indirect influence, who can forecast? Upon the evangelistic method, upon the educational world in creating confidence in Christianity, upon young men in presenting a noble objectlessness of ability consecrated to a religious calling, upon the whole world as an evidence of the power of spiritual forces when linked to painstaking preparation and concentration upon a well-defined purpose!

GALEN M. FISHER.

Tokyo, Nov., 11, 1901.

PIRACY IN JAPAN.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Referring to the paragraph in your paper of this date re "A Cheap Book," I beg to inform you that the book in question does enjoy all the privileges of copyright.

May I also be permitted to express my disgust that your journal should voluntarily give a gratuitous advertisement to a deliberate piracy. For the last decade the rising generation in Japan has been educated on "piracies." In all the Government schools pirated copies of school and textbooks are the order of the day, even the publishers imprint being forged. The copyright law under the new regime is very clear, and the day is not far distant when authors and publishers will assert their rights and protest against this wholesale theft of their brains and property.

Yours faithfully,

HARRY J. SHARP.

Yokohama, Nov. 13th, 1901.

[This is unjust. We have not "voluntarily given any gratuitous advertisement to a deliberate piracy." We mentioned as a piece of news a fact which appeared somewhat strange. If the *Sun* is violating the copyright law there are ample means of restraining it, and we quite agree with Mr. Sharp that it ought to be restrained. —E. J.]

AN INTERESTING RELIC.

Last year, when the allied armies pressed their way towards Peking, the servant of Mr. Edwin Kleine, of Amoy, attached to the German staff, looted a silver communion cup and plate. The pieces, which were of solid silver, bore the following inscription:—"Presented to the Mission of the A. B. C. F. M. at Canton by Dr. Robert Morrison 1832." Mr. Kleine, little knowing the historic value of the pieces, purchased them from his servant, and when the march of the Allies had been completed, brought them down to Amoy. After a time, Mr. Kleine fell sick, and both the doctors of the foreign community being unable to attend him, owing to sickness, Dr. J. A. Otte, of the American Dutch Reformed Church, was called in to attend to him. In the course of conversation with his patient about the nature of the disease, Dr. Otte mentioned how Dr. Morrison had described it and Mr. Kleine said—"I have a cup and plate that were presented to a Mission by Dr. Morrison. I brought it with me from Peking." Dr. Otte replied, "You must be mistaken for Dr. Morrison was not a missionary." Mr. Kleine then produced the pieces. The silver was tarnished and the name at first not discernible, but having polished the silver the inscription was found to be as printed. "Why," exclaimed Dr. Otte, "it was not Dr. Morrison, the eminent physician, but Dr. Morrison, the first missionary to China, that gave these sacred utensils to the first American Missionary Society in China. It is a valuable memento of a great man, whose gift showed the desire and purpose of his whole life, even the salvation of the Chinese. Mr. Kleine died after some time, but not before he presented the cup and plate to Dr. Otte, with the request that they be returned to the Church of the A.B.C.F.M. at Canton, or to the officers of the Board in Boston, if the former was unable to make use of them. In compliance with this request, Dr. Otte brought the relics to Hongkong, and handed them over to Rev. Dr. Hager, who promised that the conditions mentioned should be fulfilled. It is supposed that Dr. Morrison presented the cup and plate to Rev. E. C. Bridgman, for whom he was known to have a great regard and with whom he was intimately associated in the salvation of China. At that period, Dr. Bridgman was the only American Missionary in Canton, and not only instructed several Chinese in English, but also held English services for the English-speaking people of Canton, the seamen at Whampoa and the foreigners at Macao. Dr. Bridgman held communion services for foreign residents in Canton three or four times a year. How the cup and plate found their way to Peking is a mystery. The probability is that they were taken north by some of the Board's missionaries and afterwards stolen. When it was presented, there were no Chinese converts belonging to the Mission, but now there are more than 1000, who are reaping in joy to-day what was sowed in tears.—*China Mail*.

DEPARTURE OF THE CHINESE COURT.

A correspondent of the *N.C. Daily News*, writing from Hsian on Oct. 6th said:—

For quite two months the one absorbing topic of talk has been the departure of the Court. That event has focussed the efforts of the officials and suspended their ordinary business. The preparations have been so elaborate that it would have been impossible to complete them by the date first fixed for the return to Peking. The Dowager has always had the reputation for hoarding wealth. The tour to the Western capital has supplied an excellent opportunity for the accumulation of enormous resources. On the route from Taiyuan every place was compelled to contribute to the Imperial Purse. All articles of value—curios, bedding, curtains, drapings—were bagged for her use. The same absorption, repeated in Honan, will ensure considerable appropriations for Her Majesty's house. Some 3,000 carts have been commandeered for this Royal transport. The cost of a single night is roughly £1,000—a fairly large sum for the people of any given district to contribute. But as one remarked, there are many months and more pockets in the Royal Train.

Since the middle of September daily detachments of baggage carts and official retinues have left for the East—destination unknown. On the 5th of October

the members of the Cabinet, with staff and field telegraph, proceeded ahead as the vanguard of the troupe. The streets through which the Royal cortege had to pass were then floored with yellow earth and made gay with stripes of red silk suspended from the roofs across the streetway. Red lanterns were hung up at every door, and tables draped in red, with fruits, sweets, biscuits and incense, were placed along the pavements. The effect was striking and like all Asiatic displays, showy rather than pleasing.

At dawn to-day (the 6th) trumpeters sounded the call to get ready. Immediately the gates of the city were opened and carts, carriers, and couriers began to move. By 7.30 the streets were crowded with spectators. Good order was maintained, and a clear roadway left and kept open by the cavalry that lined the streets on either side. The different uniforms—yellow, red, blue—the variegated banners that fluttered in the breeze, the glittering swords and tridents, had a fine scenic effect as the bright sun began to shine on the throng. By 7.45 the advance cavalry passed. Then came the eunuchs in carts, followed by yellow-jacketed officers with flowing plumes and prancing ponies. Then the Royal sedans, used last year, were carried past each containing some important trophy. Next came the Royal Mounted Bodyguard, ordering the crowds to kneel, and instantly they flopped on to their knees. Soon the outriders, pullers, bearers of the first Yellow Dragoned Chair were in view. The Emperor was pulled by 20 and borne by 16 men, dressed in decorated silk gowns. His chair, like the other three of Imperial colour, was richly draped with embroidered satin and decorated with jade-jewels. His Majesty sat bolt upright, with features that were as fixed as a statue. He looked only straight ahead, as if unaware of the lines of his kneeling subjects, or more likely afraid he might not manifest the self-possession that is the essential mark of dignity and rank. He was looking well, and all assert much better than on his arrival last year.

His chair was followed by that of the "Old Buddha"—as the Dowager is familiarly called. She was dressed (or rather "drowned") in dragoned yellow satin. Her face is long and wan, with high cheek-bones, big mouth, and thick lips. Her eyes gleamed like fire. She was as awake and alert as the Emperor seemed inert and indifferent. Nothing escaped the sharpness of her vision. The beggars received tablets of silver and the curious glances of scorn. Everyone remarked how careworn she looked, and that she was quite ten years older since last year. Her personal baggage occupied the next few litters and relays of bearers.

In striking contrast with the weird countenance of the Dowager was the young face of the Empress. Her chair halted for a little, and as it was open there was time for a good view. She seemed rather embarrassed by the crowds and stole nervous, furtive glances on either side. She looks an innocent ordinary official's daughter, but the paint, powder, and gewgaws spoil a pretty face. She was followed by the chief concubines—men of muscle and evident will, but destitute of brains and character. After their baggage came the Heir Apparent, but he was invisible. Then the Royal Princes of the Blood, and finally the Minister of the Grand Council—Yung Lu. These men had the bearing of refinement so conspicuous by its absence in the others. Then next passed a train of carts with the innumerable attendants that are at once the glory and the disgrace of an Asiatic Court.

By 8 a.m. the South Gate was reached. It was necessary, according to the fengshui of the route that the South not the East Gate (which is the direct and near way) be the exit from the city, so a détour was made. At the gates the gentry presented yellow silk umbrellas, and the Dowager again indulged in scattering her silver sticks. The south-east corner of the city was rounded—a halt made in the Eastern Suburb to pray in a Taoist Temple for a propitious journey—a prayer in which the bitterest foe would willingly join without deceit.

The one important point in the procedure was the precedence given to or acquired by the Emperor. He came into the city under the heel of the imperious aunt. He went out to-day as the Head of the Empire. May he rule in undisputed authority and with wisdom this populous land.

THE EPISCOPAL CONFERENCE IN SAN FRANCISCO.

The Rev. William Carson Shaw, writing in the *San Francisco Chronicle*, thus summarises the work of the remarkable conference of the Protestant Episcopal Church which was held in that city during October:—

For fifteen days this wise and conservative body of churchmen has been gathered together in consideration of ways and means for the advancement of Christ's kingdom, and during these days, be it said

with pride, that not one act of indignity was shown. With a calm deliberation every subject was considered. As one recalls the scores of memorials and resolutions offered both in the House of Bishops and Deputies, every one of importance, it is hard to separate those from the others that are of vital interest and importance. But there were some questions, however, that have commanded an unusual public interest. Among them ought to be mentioned the fact that the house acquired a new president, Rev. Dr. Lindsay of Boston, who, although it was his first experience as president of the house, presided in a manner to give entire satisfaction to every member.

The principal amendments to the constitution of the church was a change in the title and name of the presiding Bishop. Heretofore the officer has been known as the presiding Bishop of the House of Bishops, but he is now known as the presiding Bishop of this church. The age limit of a priest before he could be ordained was reduced from 35 to 30 years. The two amendments to the constitution that provoked the most interest and discussion were those relating to the extension of the Episcopal oversight of congregations not yet prepared to accept the full service as provided by the prayer book. It is called the Huntington resolution, and is known as the "open door" policy. For years Dr. Huntington has fathered this movement, and in the closing hours of this convention saw in a slight measure his desires realized. While the original amendment was not adopted, still provision has been made for such spiritual oversight, with some strict limitations, which accord with the practice already established by individual Bishops.

The question relating to marriage and divorce, in which was sought to bring about the most extreme measures of legislation, was defeated. It was proposed to prohibit the remarriage of people divorced on any ground whatsoever. The canon law on this whole matter stands unchanged, and the law providing for the remarriage of the innocent party to a divorce, on the grounds of infidelity, remains unaltered. It was further sought to introduce a most stringent discipline in relation to divorced people and the sacraments of the church. This too, was happily defeated, and now stands as formerly as practically laid down in the rubrics of the office of holy communion.

The convention, however, recognizing that some steps should be taken to arrest the present resulting evils, appointed a committee to confer with other Christian bodies to bring about a more uniform practice of marriage. Should the efforts of this committee result successfully a great advance step will have been made and all the consideration that has been given the subject will not be lost.

The missionary work of the church took a great step forward in the creation of six new missionary jurisdictions, namely, the Philippine islands, Porto Rico, Hankow, Hawaii, Kansas and Cuba, and provided Bishops for them with the exception of Hawaii, Kansas and Cuba. It was further sought to create a missionary jurisdiction out of the diocese of Springfield, but the lay vote of the House of the Deputies defeated the proposal. That which appeared the most difficult of all the questions was most happily settled—the care and oversight of the see of Honolulu. An arrangement was made by which the present Bishop resigns on the 1st of April, 1902, and the diocese passes under the jurisdiction of the American church, a Bishop to be appointed after that date, or to remain under the direction of a Bishop until a missionary Bishop can be appointed.

A question that was expected to receive some attention by the convention was laid over until 1904. It was in relation to a change of name in the church. The advocates of this step, realizing that the time was not ripe for such a step, readily consented. Realizing that the whole matter is but a campaign of education, a committee was appointed, consisting of five Bishops, five priests and five laymen, with instructions to gather a census of opinion of the whole church and submit it at the next general convention for some action.

The proposed marginal readings were adopted, and the committee allowed to issue copies to every minister of the church, containing the proposed revisions on readings written on the margin.

The next place of meeting will be Boston, and the year 1904.

The nomination of Rev. Frederic William Keator of Dubuque, Ia., to the missionary diocese of Olympia, is very popular with the Western deputations as he is conceded to be one of the hardest workers in his section of the country. He is a native of Pennsylvania, having been born at Homestead, Wayne county, in 1855. At an early age he moved to Illinois with his parents, and after a common school education entered Yale University. Upon his graduation in 1880, he took a two years' course in the law college of that institution. After having practiced his profession for eight years in Chicago, he became interested in church work with the present Bishop of North Dakota, Right Rev. Samuel C. Edsall, D.D.

Through the instrumentality of the latter, he was induced to take a course in theology at the Western Seminary. Upon being ordained a priest in 1891, he assumed charge of the Church of the Atonement at Edgewater, Ill. On January 1st, 1896, he resigned to accept the rectorship of Grace Church at Freeport, whence he received a call to his present position, that of rector of St. John's Church of Dubuque, Ia.

While little is known on this (Pacific) Coast of Rev. Charles H. Brent, the nominee for the Bishopric of the missionary diocese of the Philippines, he is very well known in Boston, Mass. He is a native of Canada, about 35 years of age, but has spent almost his whole life in this country.

Rev. Dr. John S. Lindsay, president of the House of Deputies, said of him last night: "Rev. Charles H. Brent deserves commendation for his faithful services both as first assistant to Bishop Hall of Vermont, when that gentleman was in charge of St. John, the Evangelist, Church, and as Coadjutor to Rev. John Talbot of St. Stephen's Church in Boston. He is very intellectual, a hard student, a broad reader, and has great power for the dissemination of knowledge. As a preacher, he is rather clear than eloquent. He ranks among the liberal high churchmen. He is very devoted to his work, and full of the spirit of self-sacrifice. He is particularly interested in all questions of economics and sociology, and his sermons deal largely in a practical application of Christianity to the social relations of life. He is also a ready and effective writer, having contributed largely to church and other periodicals.

Rev. Dr. Charles Campbell Pierce, who was nominated for the missionary diocese of North Dakota, is well known all over the United States, especially in Army circles. He is a chaplain in the United States Army and was recently invalided home from Manila, where he had seen hard service. No man in the Army is more popular than Chaplain Pierce. He has always been a staunch fighter for the welfare of the soldiers, and his well-known stand in favour of the canteen was in that line.

He is a native of New Jersey. After spending several years at college he entered and completed the course at the Kansas Theological School. In 1882 he was appointed chaplain of the Ninth Cavalry, but resigned after two years. In 1888 he was made post chaplain, remaining in the service since that time.

Rev. James Addison Ingle has been in China since 1883, and, with the exception of a few months, has spent all his time in Hankow. He has built up a splendid parish, one of the strongest in China, and his influence has extended far up the Yang-tse valley, so that he is well equipped to undertake the work of the new episcopate. He was born in Frederick, Md., and is a graduate of the University of Virginia.

Rev. Dr. William Cabell Brown of Brazil, who has been elected to the diocese of Porto Rico, is considered to be most eminently fitted for the position. He has served for many years among the Spanish and Portuguese of Brazil, and has thoroughly acquired a knowledge and understanding of the language, character, traditions and customs of the people.

The nominee for Porto Rico is about 40 years of age, was born in Virginia and is a descendant of the famous Cabell family, which was one of the F. F. V.'s of Virginia. As a boy he graduated from the Episcopal High School, taking a course in law at the University of Virginia, and going to the University of the South at Suwanee, where he graduated from the theological course. Suwanee recently conferred the degree of doctor of divinity upon Dr. Brown for his work in translating the Book of Common Prayer into Brazilian. He has been in Brazil for ten years, and is at present in charge of the Church of Our Savior, Rio Grande do Sul.—*Chronicle*.

TELEGRAMS.

(REUTER'S SERVICE TO THE "JAPAN MAIL.")

DEATH OF LI HUNG-CHANG.

Shanghai, Nov. 8.
Li Hung-chang died at noon on the 7th instant.

ENGLAND IN THE MEDITERRANEAN.

Admiral Watson succeeds Lord Charles Beresford as second in command of the British Mediterranean Squadron; and Admiral Hammett replaces Admiral Watson as Superintendent of Malta Dockyard.

[NOTE.—Many residents in Japan will remember the gallant captain of H.M.S. *Leander* on this station in the early '90's. Born in 1846, Burgess Watson entered the Navy in September, 1860, and gradually rose

by good work till he obtained his Captaincy in December, 1885. On August 25, 1899 he became a Rear-Admiral. Of Admiral Hammet we read in the *Navy List*:—Served and was slightly wounded in the expedition to Tangtung, Poting, and Outricgpoi, near Swatow, in China, under Commodore Oliver Jones, in January, 1869, while Sub-Lieutenant of H.M.S. *Rodney*; recommended for Albert Medal for saving life, 26th February, 1874; Commander of *Minotaur* during Egyptian war, 1882 (Egyptian Medal Khedive's Bronze Star, Medjidie 3rd Class); Captain's Good Service Pension, 19th March, 1898. *Vide* Royal Humane Society's Medals.

FRANCE AND TURKEY.

It is telegraphed from Vienna that France has explained to the Powers that she does not aim at any conquest in her dispute with Turkey.

Later.

A circular issued by the French Government declares that there is no intention of permanently occupying Mitylene.

SOUTH AFRICA.

Lord Kitchener telegraphs under date of the 6th inst. that the Boer loss in the action with Benson's column was 44 killed and 100 wounded. The Boers took nothing except the guns.

SIR W. HARCOURT ON SOUTH AFRICA.

Shanghai, Nov. 9.

Sir William Vernon Harcourt, in a letter to the *Times*, indicts the Government's policy and conduct of the war, and declares that the banishment of Boers and the confiscation of their property are unconstitutional and mischievous.

A NEW PRINCE OF WALES.

Shanghai, Nov. 10.

The Duke of Cornwall has been created Prince of Wales and Earl of Chester.

THE FRENCH AT MITYLENE.

Great Britain does not intend to interfere in any way at Mitylene. She does not regard the French action with any disfavour.

SALISBURY ON THE WAR.

Shanghai, Nov. 11.

The Marquis of Salisbury, speaking at the Guildhall, said that it was a matter of congratulation that the peace of the world was so little disturbed, and that the cloud over the Mediterranean had passed away. The South-African war was the only really serious matter. He deprecated causeless pessimism with regard to that subject. It was not possible to say publicly all that was going on, but substantial progress was being made. Boer independence was incompatible with British security, and the country was resolved that this terrible war should not recur, and that danger must be removed from this corner of the empire.

FRANCE AND TURKEY.

Later.

The Sultan, having conceded all the French demands, resumes diplomatic relations and the French fleet leaves Mitylene.

ARTILLERY ACCIDENT.

Owing to the imperfect closing of a big gun on board the *Royal Sovereign* at practice, six artillerymen were killed and the Commander and thirteen bluejackets wounded.

SALISBURY'S SPEECH.

Shanghai, Nov. 12.

The newspapers are generally disappointed by Lord Salisbury's speech, since it contained no indication of greater vigour in hastening the end of the war, thus leaving unrelieved the feeling that the Government even now does not realise the nature of the task.

THE "ROYAL SOVEREIGN" ACCIDENT.

A later telegram says it is believed that the smouldering of the cartridge previously fired ignited the other cartridge when loading, as the explosion occurred before the breech was closed. The gun was a 6-inch piece. Captain Spurway (R.M.A.), and five men were killed, and nineteen were injured, including Commander Sir Robert K. Arbuthnot.

SOUTH AFRICAN NEWS.

Shanghai, Nov. 13.

All the reserve cavalry squadrons have been ordered to prepare drafts, as strong as possible, to reinforce the regiments in South Africa.

The casualty lists show that the total number of Benson's casualties was 86 killed and 216 wounded.

Since the 4th inst, 168 Boers have been killed or wounded and 149 taken prisoners.

General Lord Methuen is moving against Delarey and Kemp.

The Boers under De Wet have been recently collecting in the north-eastern districts of the Orange River Colony. British columns are moving thither to disperse them.

AUSTRALIAN CRICKET.

The South Australians have beaten MacLaren's English team by 234 runs.

DISASTROUS GALE IN BRITAIN.

Shanghai, Nov. 14.

A gale has swept over the whole of the British Isles, doing immense damage. Fourteen wrecks occurred and fifteen persons were drowned. The Calais packet steamer *Nord* sank the lightship off the Dover pier works. Her crew of sixteen were drowned. The *Nord* is ashore on the South Foreland.

SOUTH AFRICA.

Later.

The Boers under Maritz attacked Picquetberg but were repulsed, losing seven.

THE STORM.

The Dover lightship crew were saved. A revenue cutter has been wrecked near Leith. Twenty-three men were drowned.

MARQUIS ITO.

Marquis Ito has had an interview with M. Delcassé, French Minister for Foreign Affairs.

(RECEIVED AT THE LEGATION OF FRANCE.)

LI HUNG-CHANG.

Saigon, Nov. 8.

Li Hung-chang is dead. Prince Ching assumes the direction of affairs.

FRANCE AND TURKEY.

M. Bapst, French *Chargé d'Affaires* in Constantinople, has addressed to the Sublime Porte an imperative note, formulating new demands; notably the legal recognition of the schools and all the religious establishments placed under the protection of France.

Saigon, Nov. 9.

The Sublime Porte has made it known that it has decided to give satisfaction to the different demands of France. M. Delcassé has replied that the naval division will leave Mitylene when he has received communication of the Sultan's order ratifying the decision of the Porte.

Saigon, Nov. 10.

The French journals express their satisfaction at the settlement of the Franco-Turkish complication. Most of the papers require that the Porte should give substantial guarantees.

English, Russian, Austrian and Italian newspapers approve of the conduct of France.

An irade of the Sultan gives satisfaction to the first demands of France concerning the debts of various private persons and to all subsequent demands concerning the recognition of the legal existence of the schools, religious establishments. Consequently the French squadron will quit Mitylene and M. Constans will return presently to Constantinople.

(RECEIVED IN TOKYO.)

DEATH OF LI HUNG-CHANG.

Li Hung-chang died on the 7th instant at 10.30 a.m. It is expected that he will be succeeded by Wang Wen-shao, and that the latter's *remplacant* will be Governor Yuan Shih-kai.

[Wang Wen-shao is one of the conservative leaders.—Ed. J.M.]

The position of Vice-Minister of Foreign Affairs, vacant owing to the death of its recent occupant, is to be filled by Mr. Lü, now Chinese Representative in Berlin. Pending Lü's arrival in Peking, Mr. Na Tung will act as *locum tenens*.

CHINESE TARIFF.

The method of levying the new *ad valorem* duty is to add ten per cent. to the invoiced value of goods, and impose a duty of 5 per cent. on the total. Doubts having arisen, however, as to whether freight and insurance are to be included in the invoice value, the question has been propounded and answered in the affirmative. The Commissioner of Customs has stated that this method will be applied even at ports where no announcement has been made.

TROUBLE IN KOREA.

In connection with a project of uniting Song-jui and Kil-ju, in Hamyondo, the people of the locality became considerably excited, and Mr. Hayashi, fearing that injury might be done to the persons or property of Japanese subjects, urged the Korean Government to take prompt measures, but the project of combination having been abandoned, things resumed their normal condition.

THE TRANS-SIBERIAN RAILWAY.

The Russian *Official Gazette* of the 9th of November published a report from Mr. de Witte, Minister of Foreign Affairs, made to the Tsar, to the effect that on the anniversary of His Majesty's coronation, namely, November 3rd, the Trans-Asian Railway had been opened for traffic, from the Trans-Baikal station to Vladivostock and Port Arthur. The report also said that the prosecution of the enterprise had been attended with many difficulties, but that these had been successfully overcome, and temporary (?) traffic would be continued over the whole route from the date of its opening. The Port Arthur section of the road, however, was very roughly constructed, and it was anticipated that some two years would be required to get it into complete order.

(FROM THE "N.C. DAILY NEWS.")

SERIOUS FIRES AT TIENSIN.

Tientsin, Nov. 2.

The godowns of Messrs. Droste, Batouieff & Co. were totally destroyed by fire last night. By the united efforts of the military and civilians of all nationalities the fire was prevented from spreading to the premises of Messrs. Mackenzie & Co. The fire originated in cargo stored in the open compound, covered with matting.

Two small fires occurred also in other places last night.

Later.

The Welsh Fusiliers' barracks, adjoining Messrs. Droste's premises, were also totally destroyed, and two of the Fusiliers were burnt to death.

The fire originated in the barracks, not on Messrs. Droste's premises. If there had been a strong wind blowing, half Tientsin would have been destroyed.

A fire also occurred in the British barracks at Sinho (near Tangku), and considerable damage was done.

People here are recalling the fires that took place previous to last year's outbreak.

The damage done last night is estimated at Pts. 150,000 at least.

THE CHINESE COURT.

Yenshih, Nov. 5.

Their Majesties left Loyang this morning and arrived in this town at 5 o'clock this afternoon. The Court remains here over-night.

Before leaving Loyang this morning Imperial audience was granted to Chu Chi-yao, Taotai of the Tsangyang Intendency of Hupeh province.

Kunghsien, Nov. 5.

Their Majesties arrived here from Yenshihsien his afternoon at 2 o'clock and will remain here a whole day. [Note.—Kunghsien is five days' journey from K'ai-feng: the five stages being Fanshuihsien, Kunghsien, Chongchou, Chungmouhsien, and (the last stage) K'ai-feng, the capital of Honan province, starting on the 7th inst. (to-day) from Kunghsien, here, and if there are no extra stoppages en route, he Court should arrive at K'ai-feng on the 11th inst.—Translator.]

Tientsin, Nov. 7.

The Court is due at K'ai-feng on the 14th inst.

Tientsin, Nov. 7.

Orders have been given that the palace at Hsian not vacated by the Court is to be kept intact.

SIR ERNEST SATOW AT HONGKONG.

Hongkong, Nov. 5.

Sir Ernest Satow, British Minister to China, arrived in H.M.S. *Blenheim* this (Tuesday) afternoon. He was received with a guard of honour of the Welsh Fusiliers and the ship fired a salute. He is staying with the Governor, Sir Henry Blake.

Peking, November 7.

The Russian Minister has been urging Li Hung-chang to sign the Manchurian Convention, but unavailingly. Li's sickness being so serious that his recovery is quite hopeless. Yesterday he asked the Government to order Prince Ching to return at once to Peking, and himself telegraphed to Prince Ching to return at once, as he expected momentarily to breathe his last.

Tientsin, November 7.

Li's death recalls Prince Ching, who returns to Peking to-morrow.

(FROM "DER OSTASIATISCHE LLOYD.")
NEWS FROM EUROPE.

Berlin, Nov. 5.

In Germany the greatest indignation prevails about Mr. Chamberlain, who in a public speech compared the campaign in South Africa with those of other countries, also with that of Germany in 1870-71. The German Press exhorts England that certain persons should not use a language which must carry Germany into the channels of an Anti-British Policy.

Although the Sultan has yielded to their demands the French keep occupied the ports of the Island of Mytilene, until full security is given for the payment of all claims.

The Great Golden Medal for Art and Science has been conferred upon the famous Geographer Baron von Richthofen.

Berlin, Nov. 6.

The British Press is making advances in an extraordinary way to Russia. The papers are hinting that if Russia would comply with the wishes of Great Britain, England would not object to Russia taking Manchuria, and Japan Korea. In this case Great Britain would demand as a compensation the acknowledgment of her claims in the Yangtze Valley. The British propositions are very adversely criticised by the Russian and the German Press, who both are giving expression to the views held by the official circles of their respective countries.

Wurtemberg, whose postal administration is separated from that of the German Empire according to Article 52 of the Constitution, has resolved to adopt the postal stamps of the Empire.

The last detachments of German troops having arrived at home, H.M. the Emperor has issued an army-order through which he recognises in a most hearty way the achievements of the German Expeditionary Corps in China. The Norddeutsche Lloyd received an official communication in which the Government renders thanks to the Company for services during the China troubles.

Berlin, Nov. 7.

The Porte has sent a note to the French Embassy which is reported to contain a settlement with regard to the wharves and the redemption of the steamer *Adibazar*. No French troops have been landed at Mytilene. The German Press reviews the occurrences in Turkey very calm; the papers do not anticipate any international difficulties, but consider the action of France to be terminated with the naval demonstration at the ports of Mytilene.

It is now stated that the Porte has applied to the Russian Embassy at Constantinople for assistance in the French affair. The Russian Ambassador however, declined to interfere and strongly advised the Porte to settle at once all claims of France.

Brown Daitong. 4.80 to 5.00
Brown Canton. 5.00 to 7.00
White Java and Penang. 7.00 to 9.10
White Refined. 9.50 to 10.95

EXPORTS.

RAW SILK.

Another speculative movement in full size filatures for the American trade has hardened the market for those kinds. Re-reels are slightly lower, Kakedas a little firmer. No encouraging news comes from Europe and fine sizes remain more or less neglected.

QUOTATIONS.

Filatures—Extra, Fine. Y. 940 to 950

SPRING HUMOURS

Complete External and Internal Treatment

Consisting of CUTICURA SOAP, to
cleanse the skin of crusts and scales
and soften the thickened cuticle, CUTI-
CURA OINTMENT, to instantly allay
itching, irritation, and inflammation
and soothe and heal, and CUTICURA
RESOLVENT, to cool and cleanse the
blood. A SINGLE SET is often suffi-
cient to cure the most torturing dis-
figuring skin, scalp, and blood humours,
rashes, itchings, and irritations, with
loss of hair, when the best physicians,
and all other remedies fail.

Sold throughout the world. Aust. Depot: R. Towns & Co., Sydney.
N. S. W. So. African Depot: LEXSON LTD., Cape Town, Durban
and Port Elizabeth. POTTER, DRUGS AND CHEM. CO., Sole Props.,
London, U. S. A. "How to Cure Spring Humours," post free.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, NOVEMBER 23RD, 1901.

DEATHS.

At his late residence, No. 120-B, Bluff, Yokohama, at 8 o'clock, on Saturday morning, Nov. 16, STUART ELDRIDGE, M.D., aged 59 years.

At London on Sunday, 10th Nov., 1901, T. A. SINGLETON, of Yokohama, suddenly. (By cable).

At 13, Torii-zaka, Azabu, Tokyo, on Nov. 19th, MARY LYDIA, wife of Rev. G. M. Meacham, D.D. Funeral on Thursday at 2 p.m. from the Methodist Church, No. 8, Torii-zaka.

IN MEMORIAM.

On Monday, 25th Nov., at 9 o'clock a.m., at the Roman Catholic Church, No. 80, an in memoriam Mass will be celebrated, it being the anniversary of the death of Mons. E. KNAFF. Friends are invited.

SUMMARY OF NEWS.

MR. YOSHIWARA SHIKAJIRO, vice-president of the Kanagawa prefectural assembly, resigned on the 14th inst.

THE Tientsin correspondent of the *N.C. Daily News* telegraphed on Nov. 13—"It is snowing hard and freezing."

OFFICIAL investigations made on Nov. 15th put the total number of convicts in the Kajibashi

Prison at 4,493. The figures show an increase of 450 as against the total at the corresponding date last year.

THE International Oil Company in Echigo province commenced the sale of its oil on Nov. 16th. The delivery price at Naoyetsu is said to be *yen* 2.50 per case.

MR. KURINO, Japanese Minister to Russia, left Tokyo on Nov. 17th for his new post. On Friday, the Minister was received in audience by His Majesty the Emperor.

By the N.Y.K.'s steamer *Wakasa Maru* from Europe, there arrived at Kobe two dogs of German breed, which Dr. Baelz has ordered from Germany for the purpose of presenting to the Crown Prince.

A POLICE constable named Ishii Magotaro in the service of the Katata police-station, Shiga prefecture, murdered a gambler named Minami Kijiro in a restaurant at the same village on the night of the 12th inst.

A FIREMAN named Ito Heijiro formerly employed on the Toyo Kisen Kaisha steamer *Nippon Maru*, was arrested by the harbour police on the 16th inst. charged with stealing a private seal and issuing a forged document.

THE foreign trade at Yokohama is at present in a far from prosperous condition, especially on the import side. The trade returns for this port during the first half of November put the export of silk at *yen* 4,599,392 in value and that of *habutaye* at *yen* 1,398,093.

LAST Sunday morning, when an up-train from Kamakura was proceeding on the track near the Kenchoji temple, some boys who were playing near threw stones at the train, with the result that a passenger named Mitomi Fukumatsu was injured on the left ear. The Kamakura Police are now making inquiries into the matter.

FOLLOWING the example set by the *Jiji Shimpō*, under whose auspices a long distance race was recently held on the Shinobazu race-course, the faculty and students of the Keio-gijiku of Mita, Tokyo, will shortly carry out a long distance race from Tokyo to Yumoto, Hakone, the limit of time for the race being 12 hours.

A NAGASAKI message dated Nov. 14th says that owing to the opening of the East China Railway for traffic the Nagasaki agent of the steamship company to be run in connection with the railway is now making arrangements for the conveyance of passengers and cargo to and from Nagasaki.

ON Nov. 17th while the soldiers of the Third Regiment of Artillery belonging to the Third Army Division were engaged in gun practice at the foot of the Mount Fuji three men were accidentally wounded. They were soon conveyed to a hospital near by, but it is feared that one of them will succumb to his injuries.

THE Japanese Central Tea Guild, of Tokyo, are endeavouring to develop the tea trade between France and Japan. The Guild lately opened a branch in France, and it is now reported that they are about to send thither 80 boxes of black tea together with several thousand books of advertising matter which is said to be artistically illustrated.

SHORTLY before 8 a.m. on Sunday, a collision took place outside the Yokohama harbour between the steamer *No. 22 Kan-non Maru* and the steam-launch *No. 14 Kan-non Maru*, with the result that the latter was cut in two and sank immediately. No loss of life is reported. It appears that

the former vessel came from Moji, having on board a large quantity of coal, and that when near the light-ship she collided with the other vessel which was anchored there.

WITH a view to the encouragement of the sugar industry in Formosa, the Governor-General's Office is reported to have resolved to open a bureau called the Tomu-kyoku (Sugar Affairs Bureau) in Southern Formosa during the present fiscal year. As a first step, the Island Authorities have asked the Treasury for an appropriation of *yen* 60,000 in connection with the proposal.

SOME time ago, Mr. Sufu, Governor of Kanagawa Prefecture, laid before the Prefectural Council a proposal for the building of a House of Correction on an unoccupied piece of ground near Negishi Prison, its area being about 3,600 *tsubo*. Owing, however, to the difficulty of raising sufficient funds for such a project, the Council voted the other day a sum of *yen* 1,749 to be expended in levelling and preparing the ground, but arranged that the work of building should be postponed until the next fiscal year.

HONGKONG won the Interport Cricket match with the Straits Settlements by 129 runs. In tennis H. Hancock, for Hongkong, beat Green of Singapore by 3 sets to love. In the Lawn Tennis Doubles, Hancock and Grist, for Hongkong, beat Ramsay and White, for Shanghai, by three sets to two. Score: 6 to 4, 6 to 3, love to 6, 11 to 13, 6 to 3. The number of games was even. In the Cricket match, Straits v. Shanghai, the Straits made 105 runs first innings and 230 in the second; Shanghai made 192 in the first innings and thus has only 109 runs to make to win.

WITH a view to affording every convenience to visitors to Hakone the inhabitants of the latter district lately projected the making of a fine road between Miyanosita and Hakone-machi so as to enable carriages to mount the hills. Owing, however, to the impossibility of raising sufficient funds for such a project, the proposers applied recently to the Imperial Household for a grant-in-aid, while the Kanagawa Prefectural Council is said to have agreed to materially assist the undertaking by voting a sum of *yen* 15,000. The projected work is estimated to cost over *yen* 50,000.

THE Minorigawa Company, an establishment engaged in the manufacture of various kinds of machinery in Tokyo, received some days ago, an order from the Korean Government for the supply of a quantity of machinery which is intended to be installed in the Model Filature recently established in the Korean capital. The Siamese Government also has given an order to the company to make machinery to be employed in a filature in that country. It is further reported that the Tokyo establishment secured an order the other day from a filature in China for the delivery of 700 sets of machinery.

A COMPANY calling itself the Nihon Shusei Seizo Kabushiki Kaisha (Alcohol Company) has been organized by Messrs. Kamiya Dembei, Amenomiya Ayataro and others for the purpose of making alcohol on a large scale. Premises were recently opened in Asahigawa, Ishikari province, Hokkaido, and the capital is said to be *yen* 200,000. The machinery, ordered from Germany, has already been installed in the company's work-shops, while a German specialist in this line of business has arrived from Germany and is at present busily engaged in superintending the operations of the new concern. The company will commence the making of alcohol in January next. For material, the company will use potatoes produced in Hokkaido.

DOMESTIC POLITICS.

Monday, Nov. 18.

The best journalistic authorities of Tokyo maintain that the political horizon is much over-clouded. On the side of the *Seiyu-kai* the leaders may be said to have resolved to oppose the Cabinet on the grounds already detailed in these columns, namely, that the Naval Capital Fund must be restored out of the proceeds of increased taxation, not from any other source, and that there must not be any increase of official salaries pending financial reform. But the Party is not unanimous. There is a moderate section, whose members deprecate anything like extreme measures, and the difference of opinion between these men and their more violent colleagues is so acute that it threatens to create a split in the ranks of the Party. Meanwhile the Progressists are watching events closely. They are not prepared to support the Cabinet in the face of united opposition from the *Seiyu-kai*, because that would mean certain defeat and corresponding discredit. But should a section of the *Seiyu-kai* break away on moderate lines, the Progressists will join hands with it. Such is said to be the position, at present. Some weeks will be required, it is thought, to show distinctly what issue must be expected.

Wednesday, Nov. 20.

It is alleged that a special committee of the *Seiyu-kai* has completed its investigations and compiled its report. The contents have not yet been made public, but some of the Tokyo journals profess to have obtained knowledge of the most important particulars. The committee lays down the propositions that expenditures on account of State enterprises must not be defrayed out of ordinary revenue, and that the sum of 21 million *yen* which will accrue next year from the increased taxes, must be applied to the purposes originally contemplated, namely, 7 millions to defray the outlays on account of the Chili campaign, and 13 millions to restore the Naval Maintenance Fund.

These are radical objections from the Cabinet's point of view, for they strike at the basis of the Budget as it is understood to have been compiled. But it would be premature to discuss the question without more trustworthy information as to the contents of the committee's report. We may note, however, that the first of the two propositions attributed to the committee seems a reversal of the whole post-bellum programme, for the appropriation of surpluses of ordinary revenue to State enterprises was a fundamental feature of that programme. Speaking broadly, it seems rather pragmatical to insist that the revenue derived from one source shall be devoted to this particular object, and the revenue derived from another to that. But there is no difficulty in conjecturing the arguments upon which such a contention might be based.

Thursday, Nov. 21.

The columns of the Tokyo journals contain copious references to a programme said to have been mapped out by the *Seiyu-kai* with regard to finance. The items of the programme are given, and it is alleged that if the Cabinet endorses them, it will receive the support of the *Seiyu-kai*, whereas if it rejects them it must look to be opposed by that Party in the Diet. It is scarcely necessary to enter into further details as to this question. What has already appeared in our columns is sufficient to place our readers in possession of the general facts of the case, and as the committee of the *Seiyu-kai* have

prudently avoided publishing their programme, there is no possibility of knowing how much reliance may be placed on the statement of views attributed to them by the newspapers. What seems certain is that a strong section of the *Seiyu-kai* are disposed to assume an attitude hostile to the Cabinet on financial questions, though the bulk of the Party has not yet adhered to that procedure.

Friday, Nov. 22.

A former section of the Progressists calling themselves the *Sanshi Club* (Two or Three Club), who are, in fact, followers of Baron Kusumoto, formerly President of the Lower House and now a member of the House of Peers, have drawn up a manifesto which places them virtually on the same platform with the *Seiyu-kai* in matters of finance, and indicates that they intend to oppose the Cabinet in the approaching session of the Diet. The members of the Club—among whom are prominent Baron Kusumoto and Messrs. Kudo Kokan, Suzuki Shigeto and Ohigashi Gitsuo—go a little further than the *Seiyu-kai* in one respect: they claim that the Chinese Indemnity should be expended for the purpose of extending Japan's power in the East and developing her trade.

TRUE CONDITION OF JAPANESE FINANCES.

Amid the confusion of ideas that prevail with regard to Japanese finance, it is agreeable to read a clear statement like that made by Mr. Yamamoto, President of the Bank of Japan, in a speech recently delivered by him in Osaka. The Government, he explained, mapped out, in the year 1896, an extensive financial programme covering a period of ten years and providing for the execution of various enterprises, the cost of which was to be defrayed from three sources, the Indemnity, surpluses of revenue, and domestic loans. It was anticipated by the financiers of the time that as large sums of money would be scattered among the people in the form of payments made from the Indemnity on account of public works, there would be no difficulty in selling State bonds in the domestic market. Accordingly, such sales to the aggregate amount of 270 million *yen*, constituted a feature of the programme. But the Government's forecast failed to take into account the fact that the effect of the victorious war would be to rouse a spirit of enterprise among the people, and that the floating capital in their hands would be diverted to such enterprises instead of seeking investment in five-per-cent. securities. It was, in fact, found impossible to effect the contemplated sales of bonds, and the Government would have been obliged to suspend many of its undertakings had it not succeeded in selling forty million *yen* worth of bonds in London and in raising a foreign loan of 100 millions. Now, however, the funds thus obtained having been exhausted, the question had arisen, how to obtain further funds in lieu of the originally contemplated sales of bonds at home, or whether, failing any satisfactory way of obtaining such funds, the progress of the post-bellum works should not be postponed. Mr. Yamamoto understood that the Treasury's reason for seeking to sell 55 million *yen* worth of bonds in New York, was that 30 million were needed for the building of railways, the construction of telegraphs, and telephones, for Hokkaido enterprises and for the Iron Foundry, the remaining 25 millions being required for naval and military works. As matters now stood, the only

wise course seemed to be suspension of works which depended upon loans for their continuance. The people had contracted their enterprises in deference to the state of monetary resources, and it appeared that the Government had better adopt the same programme.

With reference to the Treasury's loans from the Bank of Japan, apprehensions were frequently expressed that the Bank's available funds being absorbed in that way, it would be unable to give accommodation to its customers in general. It was indeed true that the Treasury's borrowings from the Bank amounted at one time this year to as much as 30 million *yen*. Owing to the Treasury's recent issue of 10 million *yen* worth of Exchequer bills, that total had been reduced to some 19 millions. On the other hand, the Treasury had now to take up its previous issue of bills, and its requirements in connexion with that and with other matters would probably increase its indebtedness to the Bank by some 20 millions before the close of the year. Thus the Bank had to anticipate being applied to for accommodation on behalf of the public to the extent of about 20 million *yen* at the close of the year, so that it must anticipate an issue of about 30 millions over and above its legal limit by the month of January. That was not altogether satisfactory, but it had to be remembered that in March large sums would be repaid by the Treasury to the Bank, and by July the Treasury undertook to repay its total obligation. There was thus no reason to anticipate any disturbance of the money market. The fine rice crop, the gradual diminution of imports, the large export of silk—these were factors operating to render things easier, and he might confidently say that the difficult stage had now been passed, and that by adjusting the State's enterprises to its resources, all further embarrassment would be avoided.

This speech does not appear to have made a very favourable impression in Osaka. A telegram to the *Asahi* says that it was regarded as merely whitewashing the Government and offering a solace to the public.

DEATH OF MR. T. A. SINGLETON.

The death is reported by telegram from London of Mr. T. A. Singleton, one of the oldest residents in Japan. Mr. Singleton, who was born on July 7th, 1833, came to Japan thirty-three years ago from Australia, arriving in Yokohama harbour on March 3rd, 1869, on the barque *Yiddo*, of which he was part owner, and has since been almost continuously engaged in business in this country. The firm of Levy & Co., in which he was a partner, was converted some years ago into Singleton, Benda & Co., the interests of which in Japan were in charge of Mr. Singleton till his departure home last February on a year's holiday. The deceased gentleman had enjoyed fairly good health, and nothing in his letters conveyed any suggestion of the end which has come so suddenly. It was known, however, that his heart was not of the strongest, and doubtless his death has been due to a seizure in connection with that organ.

Mr. Singleton, who was married and leaves two children, was of a reserved disposition, but those who were admitted to friendly relations with him fully appreciated his fine personal qualities. He had been a prominent Freemason, having, we believe, passed the chair of the old Alpha Lodge.

THE NIPPON YUSEN KAISHA AND THE MALCONTENTS.

We reported in a recent issue that a small section of the Nippon Yusen Kaisha shareholders had advanced certain proposals for re-organization, and that they seemed inclined to press the matter somewhat importunately. They waited upon the President and laid their views before him. But Mr. Kondo very rightly requested them to put what they had to say in writing, so that their points might receive the mature consideration of the Directors. The shareholders acceded, and Tokyo journals now publish the document compiled by them, together with the reply of the directors.

The first suggestion of the shareholders was that instead of submitting settled accounts only at the end of each term, the Directors should lay before a general meeting a budget for the ensuing six months. To this the reply of the directors is that in a business such as that carried on by the company, the publication of a budget would involve exposing all the projects and purposes of the company to its rivals, and would thereby cause loss and inconveniences.

The second suggestion was that explicit regulations should be enacted for defining the powers of the Company's officials. To this the Directors reply that such regulations already exist; that they were compiled in 1893, and revised subsequently from time to time as the occasion required, and that there does not appear to be any defect or inadequacy.

The next proposal was that the number of auditors should be increased; that one half of the number should be re-elected every six months, and that the same persons should not be appointed twice. The Directors answer that the proper discharge of auditor's duties depended on the men and not on their number; that the shareholders already have power to change the auditors whenever they please, and that the Directors see no occasion either to increase the number or to provide for semi-annual re-election.

The fourth suggestion was that some definite standard should be adopted with regard to the granting of allowances, which the shareholders evidently regarded in the light of rewards. The Directors reply that allowances are of the nature, not of rewards, but rather of salary. Experience shows, however, that better results are obtained by preserving the distinction of "salaries" and "allowances." With regard to the allowances to officials of the Company, it is within the competence of the general body of shareholders to deal with them as they please at the regular meetings.

The fifth suggestion was that regulations should be enacted clearly defining the duties of the Company's officials. The Directors reply that the Company has been working for sixteen years and that no defects in the present system have become apparent, nor can they see that anything would be gained, though something might be lost, by attempting to set precise limits to the duties of the officials of such a large concern and by publishing regulations on the subject.

The sixth proposal was that rules should be framed with regard to the distribution of profits. To this the reply is that in the case of a business with ramifications so wide as those of maritime transport, great fluctuations must be anticipated and provision has to be made for such eventualities. Moreover, the Company owes much of its

prosperity to state assistance, and there devolves on it a corresponding responsibility to establish itself on a firm basis and to set aside ample sums, so that it may be in a position to meet the national demand for carrying facilities. Further, many of the shares of the Company are held by members of the aristocracy who include them among their entailed property, and by shareholders who regard them as a permanent investment yielding a regular annual income. It seems wisest, therefore, to carry large sums to the reserve for equalizing dividends as well as to the reserves generally, and to pay a regular dividend of 10 per cent. with special dividends when circumstances permit. It is within the competence of the shareholders at general meetings to change these arrangements if they think it advisable, and to impose any limits to the reserves.

The seventh and last proposal was that the number of shares held by Auditors and Directors should be increased. To this it is replied that such a course would merely limit the number of persons available for these important offices and would thus prove injurious rather than beneficial. Moreover, it does not appear that the present system has proved in any degree unsuitable.

It can scarcely be doubted that the sympathy of the public will be with the Directors of the Nippon Yusen Kaisha in this matter. By good management and careful financing the Company has succeeded in amassing reserves which place its business on a firm basis and enable it to make such additions and improvements to its fleet as are necessary to keep it abreast of the times. To foreign observers it appears that the Nippon Yusen Kaisha is one of the institutions of which modern Japan may feel pretty proud, and instead of presenting proposals which suggest want of confidence in the management and advocating the dissipation of capital funds accumulated for essential purposes, the shareholders should be congratulating themselves and the empire on the results already achieved. So far as we can see, all the above proposals are subsidiary to the suggestion that the distribution of profits should be regulated by a new system; in other words, that instead of augmenting the reserves, much larger dividends should be declared. That is a penny-wise pound-foolish policy against which the Directors should set their faces resolutely.

WEDDING IN YOKOHAMA.

The wedding of Miss James to Mr. W. J. F. Nelson, which took place in Christ Church, Yokohama, on the afternoon of the 13th instant, the Right Reverend Bishop Awdry officiating, was an event of special interest, for the young lady's parents are among the oldest and most respected residents of Yokohama, and she herself may be said to have grown up in this settlement, where her sunny presence and her many charms endeared her to a wide circle of friends. The gentleman who has been fortunate enough to carry off such a prize is a denizen of London, and while we congratulate him on the happiness he has secured for himself, we confess a feeling of selfish regret that Yokohama is to lose one of its sweetest children. It need scarcely be said that the wedding itself was brilliant. In the decorations of the Church and in many other details it was possible to recognise the æsthetic inspiration of Mr. F. S. James, whose love of art is proverbial. It is usual on these occasions to speak of the cos-

tumes of the bride and the bridesmaids, but such details always seem to us a questionable compliment, suggesting that the personality of the ladies is less notable than their raiment. The five maids were the Misses Lindsley, Dodds, Mollison, Blad and Morse, and whatever may have been the names of the stuffs composing their garments or the fashions followed in shaping and trimming them, it may safely be said that Christ Church never witnessed a prettier sight than they and the bride presented. Mr. MacClure acted as best man, Mr. Vincent officiated at the organ with his usual skill, and Mrs. J. Walter's fine voice rang out the strains of a wedding hymn, with which the hearts of all present harmonised in the hope that the feet of the newly married couple may always move to the music of happiness and good fortune. After the ceremony a reception was held in the beautiful residence of Mr. and Mrs. F. S. James on the Bluff, and the bride and bridegroom ultimately left for Tokyo amid an enthusiastic burst of good wishes.

WILL ADAMS' GRAVE.

We are glad to have the matter of Will Adams' grave revived by the letter which appears in another column, because it is desirable that the foreign public should know the facts of the case. Dr. Hocken wrote that the tomb is very much dilapidated. That was nothing new to many foreigners, who were quite aware that very soon after the renovation some years ago, the work of the renovators was partially undone by the removal of stones, etc., from the enclosure. Dr. Hocken said: "Surely appeal is needless to ensure the restoration of so interesting a memorial." We can assure Dr. Hocken that there is little likelihood of any appeal being responded to until those subscribing have some assurance that the work performed at their cost shall not be immediately destroyed.

The facts are that the grave is situated on an eminence above Yokosuka which affords an unrivalled view. Pic-nic parties from Yokosuka find the locality most attractive, and as in all such parties there are certain to be some mischievous persons (from whom also the ancient pilot's memory claims no special sentiment), it is not difficult to understand how the stones from the grave are found at the bottom of the hill. The point which should be put by some one—we could mention the name of one foreign resident who, we think, would be listened to, but we refrain from taking that liberty—to the Japanese authorities is this. If they will guarantee, and take steps for, the protection of the grave, money will certainly be collected for that purpose. Hundreds, even thousands, have already been spent; but if there is assurance of its being applied with effect more will be easily obtained. Can the authorities give and carry out such a guarantee? We doubt it. Then there comes the question: failing ability to give such an assurance, will the authorities permit the disinterment, and the removal to Yokohama for re-interment in the cemetery there, of Will Adams' remains? For that also, should the authorities give their consent, we can say with confidence that money will be forthcoming. If some foreign resident or residents will take the necessary steps in this matter they will incur the lasting gratitude of the foreign community in Japan.

CHINESE NEWS.

Saturday, Nov. 16.

It is now alleged that the Chinese Court intends to pass three weeks at Kaifong before resuming the journey to Peking. Does any one outside the Court itself know anything, we wonder, about what their Majesties really intend to do in this matter.

The *Asahi Shimbun* thinks that the four principal figures upon the stage of Chinese politics are now Wang Wen-shao, Yuan Shih-kai, Yung Lu and Prince Ching. At the same time it does not attach much immediate importance to Wang Wen-shao or Yuan. Their influence, it alleges, is comparatively insignificant. The real powers behind the Throne are Yung Lu and Prince Ching. Yung Lu, however, labours under the disadvantage of having antagonised the Foreign Ministers by the encouragement he gave, or is suspected of having given, to the Boxers. Under the circumstances his plan is to curry favour with Russia, in order to recover his position by the latter's aid. He will, in short, seek to step into the shoes of Li Hung-chang. Prince Ching, on the contrary, is in sympathy with the Yangtze Viceroys. Until one or the other of these politicians becomes indisputably supreme, the political firmament will be over-cast.

Monday, Nov. 18.

The Chinese Court has contributed a sum of five thousand taels to the funeral expenses of the late Marquis Li; has ordered that monuments be erected to his memory at his native place and at all places made remarkable by his deeds; that the Board of History shall undertake the compilation of his record, and that his title shall be perpetual in his family. From this it would appear that the great Viceroy is not to have a State funeral.

Major-General Yamane left Tientsin on the 15th instant for Japan. It may be assumed that all the Japanese troops except the fixed contingent will very soon be withdrawn from Chili.

We are glad to see that the *Asahi Shimbun* has the liberality to recognise that Li Hung-chang was not necessarily either unpatriotic or corrupt because he adopted the policy of *rapprochement* with Russia. If his choice of an ally justly laid him open to any such charges, then from a Russian point of view he would have been logically denounced in the same terms had he sought refuge under Great Britain's wing. Some publicists have the habit of regarding as either fools or knaves every person whose opinion differs from their own, but in matters of inter-state policy a little more circumspection is desirable.

Prince Ching is said to have left Kaifong on the 17th instant and to be due in Peking on the 27th. Wan Wen-shao, on the other hand, has deferred his departure from Kaifong to Peking.

It is stated that Mr. Chang Teh-i is to succeed Mr. Lo Feng-lo as Chinese Representative in London.

Mr. Tsai Kin, the new Chinese Representative in Tokyo, left Shanghai for Japan on the 16th instant—by the *Saikio Maru*.

The last assertion about the Imperial Court is that it will leave Kaifong for Peking on the 20th instant.

The rumour is repeated that China is selling to Russia the squadron of ships ordered by her in France. There are ten

vessels, namely, two cruisers of 4,300 tons and 24 knots speed; three cruisers of 2,910 tons and 19½ knots; one cruiser of 2,200 tons and 15 knots; one cruiser of 1,260 tons and 10 knots; one gun-boat of 700 tons and 12½ knots; one gun-boat of 587 tons and 10 knots, and one transport of 1,288 tons. These would be a formidable addition to any navy. The story is that on the occasion of M. Romanoff's recent visit to Vladivostok, he was strongly urged by the Governor of that place to complete the purchase, and he consented to use his influence on his return to St. Petersburg. The cost of the ships would be deducted from the amount of the Chinese Indemnity; or rather indemnity bonds would be handed over to the syndicate that undertook the building of the vessels and has not yet been paid for them.

Tuesday, Nov. 19.

Four of the Tokyo journals, the *Asahi Shimbun*, the *jinmin*, the *Nippon*, and the *Yomiuri*, allege that, on the 20th of August, the late Viceroy Li, appreciating that his life was drawing to a close, caused a letter to be indited to Yung Lu with regard to China's foreign policy. The epistle set out by saying that on the verge of the grave the writer deemed it his duty to submit to the Throne a statement of the only policy which, in his opinion, could be wisely followed by China. It was pure shortsightedness to oppose Russia's occupation of Manchuria. Russia in Manchuria meant that Japan would certainly seize Korea, and then the frontiers of the two empires being continuous and both being bent upon extending their power, war between them would inevitably follow. If Russia seemed to be getting the better in the struggle, China could lend her assistance to crush Japan, and Russia would recompense the favour by restoring Manchuria. If Japan appeared likely to be victorious, China would assist her, and Russia would be driven from Manchuria. Thus in either case the Middle Kingdom would come out "on top." With regard to the other Powers, England might assume a threatening attitude as to the Manchurian question, but she would not fight. Germany would observe neutrality and France would look on. The Yangtze Viceroys might object to this programme, but they had no broad grasp of foreign policies, and it would be advisable not to submit their views to the Throne.

This wonderful letter, a "secret document" of course, is gravely given to the world, the *Asahi* remarking, however, that it may have been fabricated by a crank. We should think so.

Wednesday, Nov. 20.

Prince Ching is reported to have left Kaifong for Peking on the 17th instant. It would seem that the story of Yung Lu's attempt to slander the Prince has not produced much effect.

Mr. Tsai Kin, the new Chinese Representative in Japan, reached Nagasaki on the 8th instant and after a brief stay there, resumed his journey to Kobe. He was accompanied by his secretary and some twenty members of his family, and the *Jiji Shimpō's* correspondent says that he had about a hundred tons of baggage. His Excellency is described as a man of about forty, vigorous and active, who speaks English imperfectly and French tolerably.

Thursday, Nov. 21.

A London telegram to the *Jiji Shimpō* says that, according to the leading Russian journal, Russian officials along the line of

the Manchurian railways have received permission—hitherto withheld—to summon their families, and that the reason assigned by the newspaper for such a step is that the future of Manchuria is now settled. We believe that the future of Manchuria is practically settled, but we are surprised that such an announcement should be journalisticly made in the Russian capital.

Friday, Nov. 22.

The telegraph says that Prince Ching has left Kai-fong with instructions to conclude the Manchurian Treaty, but that it is uncertain whether Russia's terms have been completely accepted. Considering that we do not know exactly what these terms are, it is useless to conjecture the nature of China's objections. But a conviction is gaining ground that this third project of a treaty came, not from Russia, but from Li Hung-chang. The late Viceroy thought it wiser and more advantageous that some definite pledges should be obtained from Russia than that she should be left in unquestioned possession. If that be so—and there are good reasons for thinking that it is so—much that seemed difficult to explain would become comprehensible. Thinking persons were puzzled to understand why Russia, being in the strong position of possessor, and having had that position strengthened by the refusal of the Chinese Government to entertain her previous proposals for an arrangement pointing to ultimate evacuation, should go out of her way to renew the question of a convention. Such procedure seemed factitious, and was justly compared by Japanese observers to the proverbially needless operation of poking the snake out of the brake. But if the proposal came from China's side, the affair assumes a different complexion. The late Viceroy appears to have thought the time opportune for approaching Russia with the view of securing a satisfactory agreement, and he was probably right in his estimate of opportunity. Everything goes to indicate that the views of the moderate party prevail in Russian councils at present, and that the permanent occupation of Manchuria is not seriously regarded in St. Petersburg. Probably the question of expense has much to do with Russia's reluctance to take over a vast territory whose administration would involve heavy expenditures. Of course no one doubts that Manchuria's resources could ultimately be developed so as to render it self-supporting, but great sums would have to be devoted to the process of development, and in the meanwhile the administrative outlays would have to be defrayed. From that standpoint it is probable that Russian statesmen are unwilling to saddle their country with a task of which they appreciate the magnitude. They are therefore in the mood to entertain reasonable proposals for evacuation, and the late Viceroy Li, obtaining cognisance of that fact, adopted measures to take advantage of it. It is very conceivable that the representations he was able to make before his death won the Throne to his opinions, and that Prince Ching has really been instructed to take up the question at the point where Li's demise interrupted it. Undoubtedly the rumoured terms of the proposed convention indicate a moderate mood on Russia's part, for though, on the hypothesis of Li's initiative, the conditions were not formulated by her, they must have received her general endorsement previously to being embodied in a draft. Under any circumstances Manchuria will remain under Russia's shadow. The disposal of its fate can be deferred without obscuring the fact that it was once in

Russian occupation. If she steps aside now in order to avoid heavy expenditures, and in order not to embroil herself with Japan, she will not have incurred any permanent disability.

It is stated that the command of all the Chinese troops in Chili has been given to the new Viceroy Yuan Shih-kai.

The operation of the new tariff is reported to be causing much embarrassment owing to want of uniformity in the manner of levying the rates at different places.

It is alleged that the two Yangtze Viceroys have addressed more than one joint memorial to the Court on the subject of reform. They recommend such things as the despatch of many Chinese to travel abroad, the adoption of foreign military tactics, the extension of armaments, the reform of agricultural administration, the promotion of industries, the enactment of mining, transport, commercial and civil regulations, the adoption of a silver currency, the imposition of a stamp tax, the organization of a good postal service, the establishment of an official monopoly of opium, the translation of foreign books and so on. These are the general headings of the recommendations, but each is accompanied by a lengthy explanation which the *Jiji Shimpō* is now translating. Thus far, the explanation of the first recommendation alone has been published—that is to say, the recommendation relating to foreign travel. The Viceroys say that the scene of travel should ultimately be Europe and America, but that in the meanwhile Japan will suffice, as she has equipped herself with the paraphernalia of foreign civilization and is now in a position to furnish excellent object lessons to Chinese students. They advise that the localities sending out travellers should defray the expenses, and that encouragement should be specially given to those who are able to pay for themselves. We observe that the new Chinese Minister to Japan, who reached Kobe on the 20th instant, was accompanied by 13 Chinese students, among them being sons of the Shanghai Taotai and of Viceroy Chang Chih-tung.

It is alleged by the *Asahi's* Peking correspondent that, at his third audience in Kai-fong, Prince Ching strongly urged on the Court the importance of restoring the people's confidence by publishing a definite statement of the date when Their Majesties would set out for Peking. The Empress Dowager showed some reluctance to name a day, but the Emperor pressed her to do so, and it was finally decided that the journey should be renewed on the 25th. On the other hand, it is alleged that the reason of the Court's delay is Wang Wen-shao's unwillingness to be associated with Prince Ching for the purposes of the Manchurian negotiation. Wang has requested that the matter be left entirely in Ching's hands, and the Court has hesitated to give its consent.

DR. BAELZ.

The faculty of the College of Medicine and the students have organized an entertainment in the Koishikawa Park on the 22nd instant, in honour of Dr. Baelz' having completed 25 years' service in Japan. We read also in Japanese papers that Dr. Baelz is to deliver an address on the subject of reform of female costume at the residence of Marquis Nabeshima.

KOREA.

A telegram from Sōul alleges that Mr. Pavlov was desired by his Government to return to St. Petersburg, but he applied for permission to remain in Sōul, a course which the Emperor of Korea is understood to have warmly advocated.

The riot at Kyong-chow seems to have been very easily quelled. Four or five villages took part in it, and several houses are said to have been burned. But when the troops appeared upon the scene they speedily effected the arrest of seven of the ringleaders, and the rest dispersed incontinently.

There is now another theory about Mr. Pok and his coming to Japan, namely, that he was sent by his Government expressly for the purpose of ascertaining Japan's intentions with regard to the question of an exchange between Manchuria and Korea. That question is said to have caused much uneasiness in Korea when it was first mooted, but confidence was restored when it became known that Japan had no idea of entertaining the project. Again, however, some talk in Tokyo journals made the Koreans nervous, and it was decided, first, that in order to placate Japan the anti-grain veto should be removed; and secondly, that Mr. Pok should be sent to Tokyo to ascertain the real lie of the land.

It need scarcely be said that all this is conjectural. Mr. Pok's coming to Japan is quite sufficiently curious to set the tongue of rumour wagging, but the newspaper reporters in Sōul are not likely to be accurately informed as to the reasons of the step. People in Tokyo appear to be persuaded that Pok has lost his portfolio, but so far as official intelligence is concerned, he has merely received an additional office. Being already a Major-General, and Privy Councillor and Minister of Foreign Affairs, he has now been appointed a Minister Plenipotentiary. The official methods of Korea are not to be judged by ordinary standards. It is quite within the range of possibilities that the Government in Sōul, desiring to combine diplomatic business with Mr. Pok's military mission, conceives that by making him a minister plenipotentiary, everything will be *en règle*, and he can lay aside his Cabinet rank while in Tokyo, becoming a Major-General for the purposes of the manoeuvres, a minister plenipotentiary during his sojourn in Tokyo, and a portfolio holder on his return to Sōul.

A fire occurred in the new palace in Sōul on the 16th instant, and one of the buildings was completely destroyed. The cause of the conflagration is said to have been a defective stove.

Advantage seems to have been taken of the fire at the palace in Sōul to steal a quantity of valuable things. This act of thieves supplementing the destruction caused by the flames resulted in very heavy loss. Considering the impecunious state of the Korean exchequer, there are many conjectures as to how the work of rebuilding will be accomplished.

The riots in Korea have been quelled, seven of the ringleaders having been captured, the remainder dispersed. Correspondents have not yet thought it worth while to describe the origin of the disturbance. They apparently regard insurrections in Korea as part of the day's work.

The *Yomiuri Shimbun* publishes a statement that the Russian Government has undertaken to construct a line of telegraphs in Korea without consulting the Sōul Authorities. We mention the rumour, though it appears quite incredible in such a form.

The Korean soldiers who have been behaving with violence towards Japanese subjects are now undergoing trial by court martial in the presence of the Japanese Consul. There are three distinct charges against them, and two have been disposed of by the imposition of fines. It is expected that the third also will be settled satisfactorily.

The future prospects of trade between Japan and Korea is most promising. According to a report sent by the Japanese Consul in Sōul under date of Nov. 7th, the principal imports from Japan to Korea consist of yarn and shirtings while exports from Korea are gold and hides. Below is a table showing the value of imports and exports during last year:—

IMPORTS.	
	yen.
Yarn	337,941
Shirtings	213,088
Cotton fabrics	20,048
Cigarettes	28,426
Beer	11,556
Matches	6,151
Porcelain	3,989
Soda	7,568
Medicine	11,993
EXPORTS.	
Gold bullion	\$15,943
Hides	28,385
Wax	3,500

MR. AND MRS. MONTAGUE KIRKWOOD:

Yokohama bade farewell on the 16th instant to Mr. and Mrs. Montague Kirkwood, who sailed for America by the San Francisco steamer. The early years of Mr. Kirkwood's sojourn in Japan were passed in Yokohama, where he practised as a barrister, his universally acknowledged talents securing the recognition they deserved. In the early eighties he accepted the post of legal adviser to the Japanese Government, and held it up to the date of his final departure, receiving many marks of appreciative esteem from those he served. During his residence in Tokyo, he and his charming wife kept open house at their beautiful place in Shinsakamachi, and their absence from the capital will be keenly felt by foreigners and Japanese alike. We cherish the hope that the load-stone attraction which Japan possesses for all that have resided there, will one day bring back Mr. and Mrs. Kirkwood to the wide circle of friends who now sorrowfully bid them goodbye.

THE SECOND COMING OF THE FRIARS.

The final result of the legislation with regard to religious communities in France seems to be now clearly calculable. Out of 16,468 religious establishments, a little more than one half—namely 2,001 male and 6,799 female communities—have submitted to the new law. The remainder have left France for various foreign refuges, the Paris Carmelites to Brussels; the bare-footed Carmelites to England and Belgium; the Benedictines to Luxemburg, and so on. It must strike the world as an unhappy incident that all these religious communities could not be suffered to remain quietly in France, worshipping and living as they have always lived and worshipped. But in such matters French legislators are the best judges.

THE LATE DR. E. STUART ELDRIDGE.

We announce with much regret the death of Dr. Stuart Eldridge, which took place at 8 o'clock on Saturday morning, at his residence on the Bluff, Yokohama. Dr. Eldridge, though a man of superb physique, had been no stranger to illness. Nearly twenty years ago he was the victim of acute stomach trouble from which, however, he completely recovered, aided doubtless by the change involved in a visit which he made to the United States about that time. Recently he had suffered greatly from an affection of the heart. He was the leading member of a deputation or commission which left Yokohama some months ago to establish a lodge of the Ancient and Accepted Scottish Rite, Southern Jurisdiction of the United States, in Shanghai, his high position of Grand Master of the Grand Consistory of the Empire in Japan, in which he succeeded Mr. O. Keil, calling for his presence on this mission. At Kobe he was struck down by the enemy which had so long threatened him, and his companions had to proceed to China and perform the necessary ceremonies without him. A slight recovery permitted of his removal north, but after a stay of some weeks in the country he was brought home to his residence 120-B, Bluff, where he has now passed away. Dr. Eldridge was attended by Dr. Baelz and Dr. Koch during the latter portion of his illness.

The deceased gentleman, a native of Philadelphia, Penn., U.S.A., was born on Jan. 2nd, 1843. He entered the army as a lad of seventeen in the 28th Wisconsin Volunteers in September, 1863, and served with his regiment till January, 1864, when he was appointed to the 64th Coloured Regiment and acted on General Thomas' staff as Adjutant-General till 1866. He was then ordered to Washington and appointed to the staff of General O. O. Howard. He served for a short time with General Grant, who was a warm personal friend, and on General Grant's visit to Japan and the Far East they renewed their old-time relations, the two spending one whole afternoon in talking over campaigning times. Dr. Eldridge was the first Librarian of the Agricultural Department and did a vast amount of work in getting it into shape. During his residence in Washington and while on General Howard's staff, the young officer took to the study of medicine and obtained his degree of M.D. from the old Georgetown faculty. He was immediately appointed Assistant Demonstrator of Anatomy in his college, which position he occupied till he resigned both it and the Librarianship of the Agricultural Department to come to Japan as Secretary to the Scientific Mission to Japan under General Horace Capron, who had been specially engaged by the Japanese Government. The party arrived in Yokohama on Aug. 23rd, 1871, in the Pacific Mail steamer *America*. His connection with the agricultural branch of this commission was soon severed, however, and he was appointed by the Japanese Authorities Surgeon-General of Hokkaido, under the now defunct Kaitakushi, being stationed at Hakodate. In 1875, at the expiration of his contract, he came to Yokohama and entered upon the practice of his profession, and since then, that is since October, 1875, a period of 27 years, with only one substantial stage of relaxation, he continued in active work. Dr. Eldridge was for some time Consul for Hawaii: he held various appointments, chiefly of a consultative character, under the Japanese Go-

vernment; and latterly he acted as United States Sanitary Inspector (being appointed Assistant Acting Surgeon on the U.S. M. H. S. in 1896) at this port. Dr. Eldridge was a man of remarkably fine presence, and old residents yet recall with pleasure the handsome picture which he and his young wife presented in the early days. The Doctor, as already said, had been a soldier, having served through the Civil War; he was a speaker of great natural power and sensibility, and more than once undertook the duty of delivering the oration at the Cemetery on Decoration Day, and his performance of the ceremony was always a source of keen pleasure to his auditors. In his capacity as member of the Loyal Legion of the U. S. he was frequently called on to participate in public functions. The deceased gentleman had three children, a boy, who died some fifteen years ago in the United States, where he was engaged in his studies, and two daughters, one of whom, the elder, is married to Mr. F. M. Tegner. With his widow and her daughters the deepest sympathy will be felt.

Dr. Eldridge was an authority on various medical and sanitary matters, as to which his views, when communicated to the public, as they were frequently, through the medium of the *Japan Mail*, were always welcome. Especially on cholera he wrote with a facile pen and in an easy and interesting style. He was a man of wide and varied reading, of intelligence and culture, and these combined with his fine personal attributes render his loss to the community a severe one.

Some years ago the deceased gentleman's services to the cause of medicine and to health matters generally in Japan, were recognized and rewarded by the Emperor conferring on him the Fourth Order of Merit, and the Third Order of Merit was presented to him a short time before his decease. To very many in this Settlement his death means the loss of a dear friend.

On Monday afternoon the mortal remains of Dr. E. Stuart Eldridge were consigned to their last resting place in the Yokohama Cemetery, attended by the ceremonies of the Masonic body, of which he was a prominent member. At 3.30 p.m. a service took place at the residence of the deceased on the Bluff, where the urn containing his ashes (the process of cremation, in accordance with his last wishes, having previously been performed), was laid surrounded with flowers. Indeed the floral tributes were so plentiful that space could hardly be found for them. A very large assemblage of foreign residents was present during the service, and the chief officials of the Prefecture also attended, some in uniform but most in plain clothing. A considerable number of ladies also witnessed the obsequies.

The service was conducted by Mr. J. T. Griffin, who acted as Master, Mr. A. R. G. Clark being Senior, and Mr. J. F. Lowder, Junior Warden, while the office of Chaplain was filled by Rev. W. S. Worden. This ceremony, which was most solemn and impressive, being brought to a close, the urn was borne out, and then, preceded by Messrs. Griffin, Clarke, Lowder, and Worden, was conveyed to the cemetery, Messrs. W. L. Merriman, B. C. Howard, V. Blad, L. H. Abel, J. Copmann, C. M. Gibbens, Jas. Walter, and H. J. Sharp being pall-bearers, while Mr. F. M. Tegner, son-in-law of the deceased, walked behind as chief mourner. The decorations worn by Dr. Eldridge during his lifetime were carried on a cushion by Dr. Rokkaku, an old and attached colleague of the deceased gentleman. At the grave a short service was performed, the same

officers participating, after which Mr. Griffin said:—

My friends:—We are met here to attend the obsequies of our fellow-resident, Stuart Eldridge, who was a prominent member of our community for many years.

A citizen of the United States: a native of the State of Pennsylvania: he went "West" into Wisconsin as a youth: served his Government in the field with valour and honour during the Civil War: took his diploma in Medicine and Surgery: and finally came to Japan in the summer of 1871. Here for a period of thirty years he served the U. S. Government, the Imperial Japanese Government, and local institutions with fidelity and zeal; with honour to himself and his family-name; and with benefit to his follow-men.

Twenty years ago (in 1881) he became a Freemason, and took intense interest in the cult. He was a firm and staunch believer in the Great Masonic Universal creed:—"the Fatherhood of God and the Brotherhood of Man." He practised continually the chief Masonic virtues of Faith, Hope, and Charity. Faith, in God the Father of All; Hope, in a glorious Immortality; and Charity, in its fullest sense, to all mankind. His zeal and enthusiasm in the cause of Masonry carried him far; and he rose from the simple Infrant of 1881 to the highest post in the Scottish Rite, being commissioned in 1899 as *Legate* for the Supreme Council of S. J. U. S. to act as its representative in the Empires of China and Japan. At the same time he was elected a member of the thirty-third, and last degree, of Ancient Scottish Freemasonry. He passes from our ken amid the universal grief and sorrow of his Masonic Brethren.

Of our departed friend's social life and character in our midst it is not necessary to speak at great length. Those who knew him best loved him best, and those who loved him best knew the wealth of love, sympathy and affection which filled his noble heart. He was not perfect: no man is. He had his faults: so have we all. He made mistakes: so do we all. But at this supreme moment all his errors are forgotten and forgiven—lost in the bright effulgence of his many virtues, which will never be effaced from our memory. We have known him as the devoted husband; the loving parent; the friend, trusty and true; the comrade, brave and chivalrous; the cultured scholar, and man of science; the skilful and beneficent physician, who went about doing good. We loved him. We would have kept him longer with us for our own selfish ends. Yet, bowing with lowly adoration to the Great Author of the Law of Love, we surrender him to the Master's call. God keep his memory green in our hearts until our summons comes to join him, and all who have preceded us in the journey "through the silent halls of Death" to a brighter and a better land. Enough!

"No further seek his merits to disclose,
Or draw his frailties from their dread abode—
There they alike in trembling hope repose—
The bosom of his Father and His God."

We do not forget the dear ones of his family who remain with us. Our hearts go out to them in loving sympathy in their bereavement. May our Heavenly Father have them, and us, in His holy keeping, both now and evermore.

It should be added that such excellent arrangements had been made by Superintendent Ikariyama and Inspector Okada that the very large procession moved to its destination with the utmost ease and that the services in the cemetery were not as was unfortunately too often the case in the past, interrupted in the slightest degree by noises from the adjacent road where, however, large crowds had gathered.

The *Fiji Shimpō* has an appreciative notice of the late Dr. Eldridge, whom our contemporary rightly calls one of the most eminent among the foreigners residing in Japan. An epitome of Dr. Eldridge's career is given, and the *Fiji* notes with satisfaction that the Emperor bestowed on him the Third Class Order of Merit before his demise.

THE KYOTO HOTEL AFFAIR.

The *Kobe Herald* has been asked to publish the following:—

With reference to the denial by Captain Brinkley of the charge that he expected a pecuniary recompense for certain negotiations which he offered to undertake, to secure a right of way for the proposed Kyoto Hotel, the Directors of the Oriental Hotel were informed through a channel, appearing to them incontestable, that it would be necessary to pay Capt. Brinkley *yen* 2,000, and Mr. Nakane *yen* 1,000, if the negotiations were successful. If there is any misunderstanding in the matter, the gentleman, who is uniformly exact and who approached Captain Brinkley, without, it may be said, the knowledge of the Directors, must have been under a most extraordinary misconception, as these commissions were included in the scheme which he ultimately submitted to the directors, and which they considered absolutely impracticable.

We should imagine that Captain Brinkley is in a better position than others to say what he "expected" or what he did not expect, but it is altogether reasonable that the Directors of the Hotel should explain the grounds of their misconception, and Captain Brinkley expresses his thanks to them for doing so. He can not but regret, however, that their statements are not more accurately formulated. They speak of "certain negotiations which he offered to undertake." That is radically incorrect. Captain Brinkley never offered to undertake any negotiations whatever. He was asked to lend assistance in lieu of a sick shareholder, who accompanied the request with a statement that the affair was causing him much anxiety and that he would gladly pay two thousand *yen* out of his own pocket if it could be arranged. This monetary proposal was emphatically put aside by Captain Brinkley, who naturally ridiculed the notion that to undertake a trifling duty on behalf of a friend incapacitated by illness should carry with it a pecuniary consideration. The maker of the offer insisted, however, and declared, now speaking in the name of the Directors, that it was desirable to place the matter on a business footing. Captain Brinkley still declined to entertain that part of the proposal, but expressed his entire willingness to do anything in his power, in the first place, to assist a sick friend, and, in the second, to resolve a dilemma which would certainly be injuriously misconstrued. All the steps subsequently taken by Captain Brinkley were, in his belief, entirely gratuitous, and the only explanation which now presents itself is that the maker of the original offer considered himself bound by it, in spite of Captain Brinkley's rejection of the idea, and, so considering, submitted a statement to the Directors in that sense. It would appear, according to the Directors' showing, that some two months elapsed between the time of the original offer and the time when they decided to act in their own behalf rather than to pay commissions. During that interval they were well aware—unless the "uniformly exact person who approached Captain Brinkley" was guilty of a direct misrepresentation—they were well aware that Captain Brinkley was doing everything in his power to assist their cause, and they must consequently have rested under the assumption that he was working without the smallest expectation of pecuniary reward; a perfectly correct assumption, but one which scarcely warrants them in attempting subsequently to discredit Captain Brinkley and to attribute his assistance to pecuniary motives when it was given frankly, and generously for disinterested reasons.

As to the Directors' allegation that Mr. Nakane was to receive a thousand *yen* "if the negotiations were successful," that, too,

is very inaccurate and very unfair to Mr. Nakane. There never was any offer to pay a sum of a thousand *yen* to Mr. Nakane. When the latter suggested that it might be possible to purchase land from the Miyoho-in for the construction of a road, the maker of the original offer intimated that if some Japanese agent would undertake to negotiate the purchase of land for such a purpose, a sum of a thousand *yen* would be paid for his good offices. Such a payment would have been perfectly legitimate, for it is not to be supposed that Japanese business men work for nothing. Ultimately the purchase of the Miyoho-in land having been found impossible, the offer contingent on its purchase fell through, as a matter of course.

We are unable to comprehend the Directors' reasons for introducing these questions. The cause assigned by them for abandoning their hotel scheme was that they had encountered anti-foreign opposition which convinced them of the ultimate futility of the project. Do they now mean to suggest that what really alarmed them was the prospect of paying commissions on account of an arrangement which they "considered absolutely impracticable"? They have gone out of their way to attribute mercenary motives to a man who for nearly two months worked loyally and disinterestedly to remove the difficulties from their path, and in attributing such motives to him they have merely obscured the real issue, which is whether or no they really encountered anti-foreign opposition. It seems only right to add a word here, since the matter has been carried to such lengths. Immediately after the publication of the Directors' report, Captain Brinkley brought the matter to the notice of the Finance Department, where he found that it had hitherto failed to attract any attention whatever. The officials of the Department took much trouble to investigate the facts, and showed themselves altogether helpful. The result of their investigations is now before the Directors, and there does not appear to be any reason why the misunderstanding—for such it seems to have been—should not be removed. We mention this partly to show that those whom the Directors suppose to have been working entirely for commissions have not been alienated by such mistaken suspicions, and further to show that although the assistance rendered by the officials of the Finance Department has been attributed by a *Kobe* journal to their uneasiness at the revelations made by the foreign local press, they were in truth quite unaware of such revelations when asked to take up the matter.

THE HOKKAIDO LOCAL ASSEMBLY.

The Hokkaido Local Assembly has signalized its first meeting by an acute discussion. When its members came together, they immediately divided into parties, the marine party and the land party. The former required that the tax on marine products be reduced by 50 per cent., its present amount, 40,000 *yen*, being thus lowered to 20,000 *yen*. At first the land party declined to make any concession whatever, and in order to show its strength, marshalled its members in opposition to the bill for establishing a middle school, which was consequently thrown out. Then a committee of conciliation having been appointed, the representatives of the land party offered to reduce the tax by 10 per cent. But the marine party insisted that the total must not exceed 35,000 *yen*, and a deadlock resulted. There is not much to divide the two sides if they have got within the distance of one thousand *yen* of each other.

THE CHINESE OFFICERS AT THE MANŒUVRES.

A letter published by the *Kokumin Shim-bun* declares that the behaviour of the Chinese officers at the recent manœuvres did not excite any admiration. They paid very little attention to the military part of the affair, and it was only when the question of eating and drinking came upon the tapis that they showed any really animated interest. Their haste to reach the places assigned to them at banquets and collations contrasted in a very marked manner with their leisurely behaviour where their military duties were concerned, and altogether our contemporary's correspondent seems to think that they will return to China with some additional knowledge of foreign viands, but without any material addition to their stock of military information.

It is certainly very regrettable that the Chinese officers have created such an impression, for being presumably picked men, their behaviour will be regarded as typical of their nationals. Perhaps they may plead in extenuation of their prandial alertness that they had previously attended the Birthday Ball in Tokyo. That is a display not calculated to create a very good impression of the manners and customs of the land of the Rising Sun, or to suggest a high code of social etiquette. The supper *marquee* is always an unedifying spectacle, and when one of the Chinese guests on the last occasion was seen carrying away a plate of viands, the only reflection of the onlookers was that it was better than pocketing them. We do not mean to imply that there is usually any pocketing of viands at such celebrations, but we do say that there is scrambling for them, and of the two things pocketing is not the less graceful.

The forty Chinese officers who came to witness the manœuvres were entertained at luncheon in the Army Club at Kudan by Field Marshal Marquis Oyama on the 20th instant. If it be true, as some papers have asserted, that these Chinese officers seemed to attach more importance to the business of eating and drinking at the manœuvres than to that of inspecting the military operations, they have certainly had plenty of congenial employment since they returned to Tokyo.

THE NEW CANAL TREATY.

The treaty said to have been concluded by Lord Pauncefote and Mr. Secretary Hay, is said to consist of three propositions in the main, namely:—

1. The United States shall be free to construct, operate, and control an isthmian canal, such canal to be open in time of peace to the ships of all nations upon equal terms.
2. In the event of war or disturbance the United States shall have the right to take such steps on the isthmus as it may deem proper and necessary for the protection of its national interests.
3. The Clayton-Bulwer treaty shall be superseded by the new convention—abrogated entirely.

American journals welcome this agreement. They say that the spirit of concession which has animated Great Britain will be appreciated by the people of the United States; that "although England has given up only what America would have taken any way, she has placed the latter under an obligation of no mean proportions," and that she has "given earnest of willingness to favour the United States as she would favour no other Power on earth to-day."

GERMAN NOTES.

A curious episode has occurred in Berlin. Some time ago, the municipality purchased certain tramway systems, anticipating that it would be easy to obtain the Emperor's permission to connect these systems by a line crossing the celebrated street Unter den Linden. In fact the Chief Burgomaster of the city had been expressly assured by the Prussian Minister of Communications that such permission could be had without difficulty. But the Emperor, for reasons which seem excellent, refused to grant it. A municipal council was held to consider the matter, and the following resolution was adopted:—

"The Assembly of Representatives of the City (Municipal Council) expresses its regret that by the refusal to approve the scheme for carrying the tramways across Unter den Linden in the line of the Neustädtische Kirch-strasse the interests of the means of communication in the city and the municipal finances suffer serious detriment; and that, although administration of the city, according to the statements of the civic authorities, was bound to assume that the Royal approval of the scheme was certain, this approval was not granted. The Assembly requests the magistrates to endeavour to obtain this approval by every suitable means."

The discussion at the meeting attracted much attention. As might have been anticipated, the Social Democrats made themselves very prominent. Their leader, Herr Singer, taunted the Chief Burgomaster with having been twice refused audience by the Emperor, and declared that the real meaning of the above resolution was that the Burgomaster must proceed to the castle and perform kowtow. Nothing could have been better than the temper and the moderation shown by the Burgomaster. He "found it very natural," he said, "that there should be great excitement in connexion with this subject," it being the duty of the assembly "to endeavour to maintain to the best of its ability the interests of the city of Berlin," but, at the same time, it was also their duty to proceed with the respect due to the head of the State, and to endeavour to live in peace and harmony with the King and Emperor. "It is true," he went on to say, "that in this case we can make no appeal to any court of administration. We cannot deny that in this question his Majesty the King is standing on ground that is entirely legal. Disagreeable and damaging to the interests of the city as the decision may be, it is unquestionably in accordance with the law. I do not understand the resolution to mean that we are to go as supplicants to the Castle, as Herr Singer ironically suggested, but rather that the magistrates are to seize every legitimate opportunity of again and again urging the good reasons which are in favour of our views. The resolution, I consider, expresses the hope that the power of facts and the necessities of traffic will, in future, obtain recognition, and that we may yet obtain what is at present denied us. The expression of this hope is all that is at present possible, and I therefore agree with the terms of the resolution." Even more interesting was another incident of the debate. The leader of the Social Democrats having charged the Burgomaster with having displayed a spirit of servility and Byzantinism towards the Emperor, and having been challenged to substantiate his statement, said that he referred to the occasion when the Emperor, in the Burgomaster's presence, made a speech to the Alexander Guards Regiment, and spoke of the "impudence and insubordination" of the Berliners, which, if necessary, the bayonets of the Guards would quell. The Burgomaster's reply to this taunt was as follows:—

"I was present as the guest of the officers of the regiment. So far as I heard the Emperor's words they were not quite so strong as the newspapers reported them to be. Besides, they were explicable from the psychological and human point of view for they were uttered on the first occasion on which the Emperor spoke in public after the attack upon him at Bremen, where he was wounded. Nevertheless, I must confess that the Imperial speech caused me deep pain, and I would have given anything if those words had been left unsaid. But what could I do? I could not leave the room. That would have been a piece of bad form on my part. I am not the Mayor of Reims" (a reference to the conduct of the Socialist French mayor on the occasion of the Tsar's recent visit to France).

The wise and just comment evoked from German newspapers by this incident is that the Ministers of the Crown are not discharging their duty satisfactorily when they allow the Sovereign to be drawn into the forefront of such disputes with his subjects.

Although public opinion in Germany has been unanimous in its expressions of disapproval with regard to the looting of the astronomical instruments, there seems to be much difficulty in undoing the error. Germany is understood to have expressed her willingness to restore the instruments to China, but the latter Power replied that they were quite useless to her and that she did not care to be troubled with them. Thus Germany was placed in the position of having the things thrown at her head somewhat contemptuously. Her plainest course would be, not to offer merely to give back the instruments, but to ask permission to replace them in their old position on the wall, restoring them at the same time to their original condition. But that would involve trouble and expense, to say nothing of other considerations from which the German Government may well shrink. It was an unfortunate error, the removal of these instruments, but the excitement caused in Germany by the affair constitutes an interesting illustration of the great change that has come over the civilized world with regard to some questions.

It is pleasant to see that some voices are raised in Germany against the curiously vehement chorus of attack to which Great Britain is subjected at the hands of the German press. The following letter appears in *The Times* of October 5th:—

Sir,—I beg to say that it was with unmitigated satisfaction that I took cognisance to-day of the letter of a German "Oberstleutnant, z.D." in your issue of September 24.

I am very glad that he categorically rebutted such unjustified and nonsensical charges against the British Army as sometimes are published in a section of the German Press, misled, I think, by a righteous sympathy for the weaker party. I bewail the fact that these people or papers seem to be fully unaware of the past, viz., that for centuries past the British troops have fought shoulder by shoulder with our Prussian regiments in the "Sieben jährigen Krieg" as well as in the "Freiheits-kriegen," and up to the present day in China. On the other hand the gallant valour of the British forces in the attacks under the command of Generals Buller and Lord Methuen could not and did not fail to arouse an echo in this country, and in the German army especially, no matter whether these attacks were successful or not. As to the charges of taking "inhuman measures" against the Boers—they are perfectly ridiculous, and I daresay the Oberstleutnant is quite right in his parallel with the Franco-German war. Those peaceable Orange Free State burghers living in their farms and delivering by thousands the oath of neutrality, when the British Army marched past in 1900, but taking up arms a few days later in the rear of the British—well, are they not "francitieurs"? I fail to see any difference; but I think, with regard to the people in question, it was all right and generous on the part of the British not to treat them as "francitieurs."

However, why did not the British demand from the first that all fighting burghers should wear a sign which should be recognizable? How is it possible in Cape Colony, for instance, to distinguish fighting from loyal burghers?

Is it not self-evident that under those quite different conditions of warfare also the measures taken

must necessarily differ from those employed in a European war? I am, Sir, yours sincerely,
Cologne, Sept. 28. RITTMEISTER a. D.

THE IRON FOUNDRY AT WAKAMATSU.

The opening ceremony of the new Iron Foundry at Wakamatsu took place on the 18th instant in the presence of some three thousand persons. His Imperial Highness Prince Fushimi declared the Foundry open, in a brief speech expressing satisfaction at the fact and trusting that the diligence of all concerned would contribute to secure a happy result. Mr. Hirata, Minister of State for Agriculture and Commerce, also spoke. He pointed out the necessity for a factory of the kind, in order that Japan might become self-sufficient, and might be secured against the risks incidental to drawing her supplies of an important staple from far distant countries. From an economical point of view, also, the enterprise was of much importance. The latest statistics showed that Japan spent some twenty million yen annually purchasing 260,000 tons of iron from foreign countries, whereas the establishment of the foundry would soon, it might be hoped, materially reduce that item of expenditure. Mr. Wada, the Chief Engineer, Baron Kaneko, Marquis Kuroda, in whose former fief Wakamatsu stands, a representative of the German Legation, the Governor of Fukuoka, the President of the Kyoto University and the President of the Fukuoka Prefectural Assembly, all delivered congratulatory addresses. Luncheon was served to the guests in tiffin-boxes, and there was subsequently a display of wrestling. Prince Fushimi and others made contributions to a fund for the assistance of the workmen at the Foundry.

[COMMUNICATED.]

Having received a card of invitation to the above ceremony, accompanied by thoughtful instructions how to get to the Works, where hotel accommodation would be found, what dress to wear &c., from the Minister of Agriculture and Commerce, Mr. Hirata Tosuke, and leaving Shimonoseki on the morning of the 18th inst. (Monday) the day of the opening, after a pleasant trip of 10 to 12 miles in a steam launch kindly provided by the Yasukawa Matsumoto Co., I arrived at the above works to assist at the opening. The programme sent with the invitation cards was as follows:—Visitors to take seats at 10.30. Imperial Prince to arrive at 11. Speech by the above Minister. Report of transactions by the Managing Director. Speeches by the visitors to be followed by a tiffin, and the Works to be open for inspection at 1.30. The weather was ideal with bright sunshine although somewhat chilly in the shade, which was very fortunate as on the following day it was blowing very hard which would quite have prevented visitors going by water. On arrival guests were ushered into a large landing shed decorated with the Imperial purple, where seats were provided for some 1,500 persons, and I was told about 2,000 invitations had been issued. Punctually at 11 o'clock Prince Fushimi arrived, attended by his Staff and the proceedings commenced. The speeches were doubtless interesting, but for their details I must refer your readers to the native Papers, where I expect a full report will be published as I noticed after the reading of each speech the MSS. were collected from the speaker, no doubt for publication. H.I.H. opened with a short address, and was followed by the Minister of Agriculture and Commerce. Mr. Wada, the Managing Direc-

tor, then gave us a quantity of statistics about the works, and Marquis Kuroda, followed, I presume, on behalf of the visitors. Mr. Baltzer, who, I understand, is Consulting Engineer to the Teishinsho, addressed the audience in German, followed by Mr. Kaneko Kentaro, a very clear speaker, and several others, and at about 11.40 the proceedings were over. Tiffin then followed, a cold collation served in a manner I have never seen before, but which I recommend on other similar occasions. Two neat *bento* boxes, together with bottles of wine and aerated water, were placed in front of each guest, thus doing away with the confusion of carrying waiters, and the difficulty of getting just what one wanted, and at a given signal each visitor opened his boxes and proceeded to investigate the contents. The foreigners, of whom there were only about thirty, were all seated at adjoining tables, and their tiffin, very thoughtfully on the part of our hosts, consisted of foreign food, very well cooked, little pots of salt and even butter being in the boxes. The chopsticks, however, not being adapted to mutton, beef, &c., were rather a drawback, but it would have been difficult to provide knives and forks for such a large number, and our hosts caused their guests' sincere gratitude in avoiding the scramble there must have been had the usual course of "boys" fetching or handing round everything been adopted. A word, too, as to the seating: the guests occupied only one side of each table, so that all were facing towards the Prince.

Amongst the Japanese guests one noticed Admiral Count Enomoto, Marquis Kuroda. Mr. Kaneko Kentaro, Mr. Takata (of Takata & Co., which firm has, I believe, attended to the shipping of all the machinery) and many other well known persons. The foreigners present were mostly from the Southern Ports, Yokohama and Tokyo sending only a small contingent, amongst them being Messrs. T. B. Glover, Brindley, Brent and H. J. Holm. The Consular Service was represented by Mr. Playfair, H.B.M. Consul at Shimonoseki, and the merchants there by Mr. N. B. Reid. The party from Nagasaki comprised Messrs. Alfred Glover, Jones and Shaw, and no doubt there was a contingent from Kobe, but I did not know any of them.

When tiffin was over the visitors proceeded to inspect the works, but this was done in rather a desultory fashion as there appeared to be no guides told off to show us round. However, we visited the different "shops" seeing pig iron cast, bars, plates, etc., rolled and steel made by both the Siemens-Martin and Cammell processes, some of the machinery being most ingenious, all of the latest pattern, steam, electric and hydraulic, almost all from Germany, although some from America, but I believe I am correct in stating that there is not a single machine of British make. It would require a person with more technical knowledge than I have to give anything like an adequate description of the machinery, etc., but I send herewith some pamphlets in English and Japanese which will give your readers all information about the construction if you will make the necessary extracts. As therein stated, some 19,200,000 *yen* appear to have been spent on the works, and this only apparently for making what is known as merchant's iron and steel, such as bars, plates, rails, &c., there being, as far as I could see, no appliances for making armour plates, guns, &c., and this I understood was one of the objects of the Government in starting the works so as to be independent of foreign countries in case of war. If so, it appears

likely that probably as much again will have to be spent to attain this object. As far as they go, the plan of the shops and buildings seems to have been well carried out, but it is difficult to see how such a large sum as the above could have been spent, and much more will have to be spent in dredging the approaches to the works so that vessels of any draught with ore, or with the finished material can get to and from the works. Already large sums have been sunk in that direction by the Wakamatsu Harbour Works, but as they will be considered as belonging to the town, they will not appear in the accounts of the iron and steel works, although really spent on their behalf. I see the works are to get most of their ore from the neighbourhood or near by, whilst some is to come from the region of Hankow.

With such an enormous expenditure in starting the works, it seems impossible to an outsider that they can ever be a commercial success, and if so, and if they don't assist the country to be more self-dependent in time of war, one wonders why they were constructed. What struck me in the working we saw was the large number of workmen, compared with what there would be on a similar job in a foreign country, meaning more wages and consequently (comparatively) higher cost of production. I predict in a few years the Government will turn over the works to some private company, who, without the large initial expenses of construction may be able to produce such articles as plates, bars, rails, &c., at a price to compete with the imported article, but prophesying is always a dangerous thing. I do not see it stated in the pamphlet, but I was told the works cover some 38,000 *tsubo*.

After the inspection was over, an exhibition of wrestlers was given, also a garden party to which invitations by the principal residents of Wakamatsu had been issued, and for which *geisha* from Kokura, Wakamatsu, Moji and Bakan had been engaged, all doing their best to get the visitors to take refreshment both liquid and solid. All the foreigners were invited up to Mr. Wada's house on the hill where, earlier, Prince Fushimi had been entertained, and they were again pressed to eat and drink, Mr. Wada's private secretary being indefatigable in looking to their comfort. Altogether it was a most successful day, and one heard on all sides expressions of gratitude for the kindness and hospitality of our hosts, and I hope I shall be allowed to use the columns of your paper to add thereto my thanks for the same.

Mr. Wada, engineer-in-chief of the new Iron Foundry at Wakamatsu, says that the foundry has cost 10,572,171 *yen*, and that a further sum of 3,046,923 *yen* has been expended on the purchase of mines. A supply of iron is to be obtained from China, Korea and four places in Japan, namely, Kameishi, Mimasaka, Buzen and Echigo.

KEROSENE IN THE TOKYO DISTRICT.

A novel application was submitted to the Tokyo City Council on the 18th inst. The chief applicant was Mr. Ishizuka Shuzo, with whom were seven others, and there was a second application from Mr. Yamaga Tokujiro and an other. The applicants sought permission to sink a kerosene well at Shitaya, in the Asakusa district of Tokyo, for which purpose they desired to make experimental borings in an area of 4,500 acres. The Council rejected the application as not being conducive to the welfare of the city, but the

incident has naturally attracted some attention, for Mr. Ishizuka Shuzo has long been connected with the kerosene enterprise in Echigo, and it is felt that he would not have associated himself with the application unless some valid grounds had existed to credit the presence of oil.

Another report of the existence of oil in the neighbourhood of Tokyo comes from Yatsuyama in Boshu, and is made by a mining expert, Mr. Yoshiwara. The statement is that since a severe shock of earthquake which visited the district in July last, a well hitherto in constant use became tainted with kerosene, and finally it was discovered that oil to the depth of about two feet was floating on the top of the water. Other wells in the vicinity are said to have been similarly affected, though in a less marked degree.

The same Mr. Yoshikawa has found a lump of coral at a depth of about 20 feet at a place called Kanaya in the neighbourhood of Tate-yama, and he is said to infer the existence of a coral reef in the district.

THE "SHIMBI DAIKWAN."

The 5th volume of the *Shimbi Daikwan* is the least attractive of all that have yet appeared. The editors do not seem to have had access to specimens of remarkable quality as those depicted in their previous issues. It is interesting to see some of the few genuine examples of Takashima Takakane's paintings, for posterity regards him as one of the greatest masters of the Fosa School. But his strength is not shown adequately in the scrolls of the Kasuga Miracles. The specimens of sculpture contained in the book are undoubtedly fine, but they have already been rendered familiar by *L'Histoire de l'Art du Japon*. Still among the thirty-nine illustrations contained in the volume, there are many that will be found worthy of close attention, and if the book suffers by comparison with its predecessors, it must not be forgotten that these reached a very exceptional standard of excellence.

THE BRIBERY CASE.

The Tokyo Court of Appeal on Thursday delivered judgment in the celebrated bribery case, where municipal officials are defendants. The judgment of the lower tribunal was set aside, not, however, in the sense of acquitting the appellants. They were one and all found guilty by the higher court, as they had been by the lower. But in some cases the penalties were reduced, in others increased. The heaviest sufferer is Hasegawa Shinzo, who is condemned to one year's imprisonment with hard labour, a fine of 40 *yen*, and repayment of the sum of 4,500 *yen* received by him illegally. The other nine sentences vary, the smallest being one month's imprisonment and a fine of 5 *yen*. An appeal to the Supreme Court was at once lodged, but there is little likelihood of its proving successful.

UNITED STATES WAR-SHIPS.

It is alleged that the United States Government is about to place another order for 21 gun-boats to be used at the Philippines, and that tenders have been invited from Hongkong, Shanghai and the Japanese yards. Some of the vessels are to be of iron and some of teak.

THE POET-DREAMER OF JAPAN.

It is difficult to define the irresistible charm which Mr. Lafcadio Hearn weaves over the imagination of his readers when discoursing of the vague, sub-conscious and highly etherealized spiritualities of Japanese psychology. He deals with the most mystical, intangible, elusive, inexplicable phenomena which dominate the hearts of men when striving to penetrate the veil that enshrouds the unsolvable yearnings of the human soul, and he does so in such a manner and with the magic of such a style as few writers among the moderns can claim to possess. Great are the riches and the possibilities of the kingdom to which he guides us. In Little, Brown and Co., of Boston, Mr. Hearn has found publishers who have put his books into a shape that is at once a delight to the eye and a satisfaction to the bibliophile. In the jargon of Bookseller's Row, they are *rimo*, decorated cloth, gilt top, illustrated. But this is a poor, bald description of one of the daintiest editions we have seen for a long time past. To lovers of the art-beautiful the books both outside and inside must appeal irresistibly, and we owe no apology to our readers when we advise them to step into Messrs. Kelly and Walsh's at Yokohama and secure the set, which are included in four volumes bearing the following titles:—"Shadowings;" "Exotics and Retrospectives;" "In Ghostly Japan;" and "A Japanese Miscellany." The last is Mr. Hearn's new book and it deals of course with topics which he has made peculiarly his own. We would fain quote from his pages but to do so would be like tearing lovely, fragile jewels from fairy-like settings, and we naturally shrink from the barbarity of the operation. The words of counsel that we use instead are that our readers should acquire the book, along with its fellows, with all possible speed, and so make, or renew, acquaintance with a writer of manifold gifts and graces.

CONSCRIPTS.

The *Fiji Shimpō* has an interesting article on the subject of the habit into which people have fallen of raising flags and making demonstrations in connexion with conscripts. When the lot falls on a youth and the time comes for his joining the colours, flags are hoisted and all his friends and acquaintance assemble to give him a send off, the result being that his family, upon whom devolves the duty of hospitably entertaining these well-wishers, has to spend a large sum. Our contemporary has calculated that in the case of 309 conscripts sent from Tokyo to join the First Division, no less than 1,103 flags were displayed; 17,461 persons assembled to wish them good speed; 4,752 *yen* was contributed to entertainments and 4,612 *yen* was spent by the families. In fine, a useless outlay of about ten thousand *yen* was incurred on account of three hundred conscripts.

MARQUIS ITO IN AMERICA.

The *Nichi Nichi Shimbun* has collected the terms applied by American newspapers to Marquis Ito. They are, "the Gladstone of Japan," "the Bismarck of Japan," "the Robert Peel of Japan," "the Moses of Japan," "the grand old man of Japan," "the father of new Japan," "the creator of new Japan," "one of the greatest of the great men of the world," "one of the makers

of Japan" and so on. Several Tokyo journals comment also upon the extraordinary warmth of the reception given to the Japanese statesman by the people of the United States.

NOTES ON CURRENT EVENTS.

Tokyo newspapers state that a trial of smokeless gunpowder manufactured in Japan was made on the 15th instant in the compound of the Naval Department at Tsukiji, and that excellent results were obtained—so excellent that the powder will be immediately served out to the various ships. This is a matter of very great importance to Japan, and we trust that the above intelligence is correct, but there have been so many similar rumours in the past which ultimately turned out to be baseless that implicit reliance can not be placed on this latest account.

The Nishinari Railway is still under constraint, but it is understood that the Sumitomo Bank will come to its assistance. The principal shareholders are said to have urged the President to resign, but he refused to do so, alleging that the difficulty had arisen solely from complications connected with land, and that neither he nor the directors were to blame in any way. Meanwhile it transpires that the Railway owes eighteen thousand *yen* to Messrs. Jardine, Matheson & Company also.

Field Marshal Marquis Yamagata is suffering from indisposition. He had a sudden access of fever a few days ago, and though recovery was rapid, his physicians, Drs. Hashimoto, Baelz and Hirai, are not satisfied with his condition, and have prescribed complete rest for some days.

His Excellency the Minister of State for Foreign Affairs is somewhat seriously indisposed. He is confined to bed with pleurisy and inflammation of the lungs.

The funeral of the late Princess Yamashina took place on the 17th instant, the interment being at Toshimagaoka, in the cemetery of Gokoku-ji. Solemn rites were performed on the 16th instant, and were attended by all the Imperial Princes and Princesses now in the capital.

A farewell banquet was given to Mr. Kurino by his friends, official and non-official, at the Imperial Hotel on the 15th instant. Viscount Matsudaira proposed Mr. Kurino's health. He said that the relations between Japan and Russia were growing more and more important day by day, and that duties of much moment devolved upon the Representative of this empire in the Russian capital. Mr. Kurino had been specially chosen for the mission, and it was hoped and believed that in his hands the relations of the two countries would be marked by smoothness and amity. Mr. Kurino, in reply, said that he fully appreciated the force of Viscount Matsudaira's remarks and the importance of the relations between the two empires. One was a mercantile and manufacturing country; the other an agricultural, and there was no reason why they should not occupy towards each other a mutually useful position, to the promotion of their material interests and of the cause of peace in the Orient. He could not pretend to be qualified for the post to which he had been appointed, but he would bring his best efforts to the discharge of his duties.

His Excellency the Minister of State for Finance and Mrs. Sone gave a garden party

at their official residence in Nagata-cho, Tokyo, on the 18th instant. There was a magnificent display of chrysanthemums in vases, pots, and in the form of cut blossoms, and as the weather was superb, the large assemblage of guests enjoyed themselves thoroughly.

Mr. and Mrs. Kurino left Tokyo by the 12 o'clock train on the 17th inst., a large number of friends assembling to bid them farewell.

We read in Tokyo journals that an action for assault has been brought against the Rev. Synder by a Japanese resident of Sendai whose child's head Mr. Synder is said to have struck with one of the bibles he was distributing in the streets of that city. If there be any truth in the story we presume that Mr. Schneider was exasperated beyond endurance by some of the urbanities which Japanese children frequently display towards foreigners without evoking any rebuke from the little ones' parents. The latter, indeed, are chiefly to blame.

The Nippon Yusen Kaisha's new steamer *Kumano Maru* has made an exceptionally quick voyage. She left England on the 4th of October, and calling at Genoa for the purpose of taking on board Baron Iwasaki and his party, reached Kobe on the morning of the 18th. She is one of the finest vessels in these waters, being 4,655 tons register, and having all the latest appliances and improvements for a passenger boat. The *Kumano* was ordered for the purpose of replacing the *Futami*, lost last year en route from Australia. She was built in Glasgow, and will take the place of the *Rosetta*, her sister ships upon the Australian line being the *Kasuga* and the *Yamato*, each of which, however, is a thousand tons smaller than the *Kumano*. The Directors of the Nippon Yusen Kaisha are to be congratulated upon the wise policy which leads them to convert even disasters into opportunities for improving their fleet.

Count Okuma entertained at his Waseda residence on the 17th instant the Chinese officers who attended the manoeuvres. The Count's chrysanthemums are said to be exceptionally fine this year, but of course it is impossible for him to extend his usual hospitality to the flower-loving public.

Miss Mary Gray Humphreys, writing in *Public Opinion*, gives the following appreciation of Baron Iwasaki, whose photograph, together with those of Marquis Ito, Count Inouye and Count Okuma she appends to her article:—

Among Japanese public men there is none who parallels Baron Iwasaki. He represents not only modern industrial Japan, but the kingdom of finance. He is Rothschild, Vanderbilt, and Rockefeller combined, with another side added that is found in none of these. He is now in the prime of life, a man of forty-five. For his services the government has made him a peer, and he is by virtue of this a member of the upper house. But he is no politician. His most conspicuous position is as the president of the Nippon Ginko, or Bank of Japan, which is to that country what the Bank of England and the Bank of France are to their respective countries. To it has been given the task of retiring the currency and placing the country on a gold basis. In this responsible position, while giving attention to his extensive private enterprises, Baron Iwasaki is the busiest and the most unobtrusive man in Japan.

It is justly remarked by Japanese journals that as the world grows older in civilization the tendency to engage in a war of tariffs is increasing rather than diminishing. Japan is seriously affected by this tendency. The new customs regulations in the Philippines will have the result of almost excluding her products from that quarter, and the recently

passed Australian tariff also hits her very hard. Rice, for example, which used to be duty free in Australia, will henceforth have to pay £9 a ton, and "Chinese beans," which cost only £10 a ton landed in the Commonwealth, will be penalized to the extent of £18. Then there is the German tariff which seems likely to become law in its entirety. It does not perceptibly touch Japan, but it illustrates the proclivity of the era, and side by side with it may be placed Australia's anti-Asiatic immigration bill, which is a veritable measure of international isolation. The twentieth century does not bring any access of that peace and goodwill which the world has some right to expect, considering the fine codes of morality that we all profess.

An officer of the army tells a representative of the *Asahi Shimbun* that things are not as well in the Army as they seem to be. What appears to the critic to be most faulty is that officers have begun to pay too much attention to dollars and cents. He considers such a spirit to be quite inconsistent with military efficiency. The cause is not far to seek. Officers live in a state of perpetual anxiety about the future of their families. Inquiry shows that, with exceptions so rare as to prove the rule, the families of the officers who lost their lives in the war of 1894-5 are in most straitened circumstances, some of them not even having means to send their children to school. This is a matter, the critic says, well deserving of public attention, for unless some remedy be applied, military service will become altogether unpopular, and the supply of officers can not be kept up. The Diet will be asked next session to vote an annual sum of six hundred thousand *yen* by way of sustenance fund for the wives and children of officers dying on service. The amount already appropriated for the purpose is six hundred thousand, and the present project is to double it.

A writer in the *Register* makes this allegation:—

The most fashionable type of the Japanese business man is represented by the directors of the majority of joint stock companies. That any such intention on their part as to faithfully promote the interest of the house they are connected with is conspicuous by its absence, is a fact too familiar to need explanation. Further, they are in no condition to carry on their business on its own merits. As an instance, it may be pointed out that among those institutions which are apparently prospering, there are many joint stock concerns whose actual assets are far below what the published balance-sheets show. Such companies only keep on their existence through misrepresentations made by the directors, and the so-called auditors (who, by the way, make it their business only to ask a few questions on the made-up balance-sheets, but do not audit accounts), combined with the ignorance of the majority of the shareholders.

We wonder how much truth there is in that assertion. It will be believed by many people. Such charges always find ready credence. But a state of dishonesty so wholesale must be established by evidence much more conclusive than the *ipse dixit* of a solitary critic before it is admitted by thoughtful persons. The article from which we make the extract reads to us very like the outpouring of a disappointed man's spleen; one of those not uncommon complaints of genius brilliant in its own eyes but unable to obtain recognition in the eyes of others.

It is noted by a Tokyo contemporary that since the present Minister of Home Affairs, Mr. Utsumi, assumed office six months ago, he has been proceeding with an iron hand against the depraved elements of Tokyo's population. No less than 125 persons have been brought under the operation of

the *Yokai-rei*, which means that they are virtually under police supervision. The following list of them is published:—

Contractors	16
Unemployed	73
Labourers	10
Go-between	3
Journalists	11
Inn-keepers	3
Merchants	1
Miscellaneous employments	1
Agriculturists	7

The fact that 11 journalists figure in this company excites much comment, but it may be assumed that they belong to the black-mailing fraternity who are becoming so common. If Mr. Utsumi has laid the axe to the root of this abuse, he deserves public gratitude.

There has been another recrudescence of trouble in Formosa. A party of 105 coolies engaged in transporting camphor on the 4th instant, were attacked by insurgents, and 20 of them were killed, 19 having their heads cut off. This would seem to have been the act of the head-hunters.

The gentlemen who consider that steps should be taken against the officers and men of the Fifth Division who are supposed to have profited by looting operations in China, are said to be agitating with the object of getting both Houses of the Diet to take up the question simultaneously next session. This interference seems to us to be somewhat factitious, but of course no definite opinion can be pronounced until the evidence adducible by the agitators is examined.

The Home Department issues a notification that all medical men desiring to obtain serum for the treatment of diphtheria are to apply at the Kessai Yaku-in—Professor Kitasato's establishment—in Tokyo. Applications from foreign countries will be entertained provided that the supply exceeds the immediate requirements of home consumption. The prices of the serum, according to quantity, range from 60 *sen* to 1.50 *yen*. Serum sent abroad will be charged at double these rates, but, on the other hand, will be despatched carriage free. Prices are to be paid in postage stamps. Druggists can obtain the serum at a discount of 20 per cent. but are forbidden to sell it at a higher price than that fixed by the Department.

Some unpleasant suspicions have been aroused in connexion with a loss of money from a military chest during the course of the recent manoeuvres. The paymaster of the 32nd Regiment was on his way to Sendai when the incident occurred. It appears that he was roused in the night, and that he pursued the thieves but was distanced by them after getting into the fields, where the empty chest was found on the following day. The chest, however, weighed some 33lbs., and doubts are suggested as to whether such a heavy load could have been successfully carried off by a man pursued closely. There is also a rumour that by some strange accident the guards usually posted over the chest happened to be absent on that particular night.

There is some excitement in journalistic circles in Tokyo with reference to violence resorted to by the police in arresting gamblers. The Asakusa police got into trouble recently, one of their number having kicked a gambler as he was attempting to escape. The kick proved fatal and the constable is now undergoing trial. A similar incident has occurred in the Kyobashi district. Some

twenty policemen raided a gambling den, and during the confusion that ensued, one of the gamblers received a blow from a bludgeon which ultimately caused death. These stories are published by newspapers proverbial for exaggeration, but it must be assumed that they have some foundation.

There is some talk of imposing a tax on gardens in Tokyo. The impost would not be direct: it would be levied upon houses to which gardens are attached. That would be an excellent device for destroying the beauties of the city. Already the house tax is very heavy, and it may be taken for granted that where there is a garden, there also is a house correspondingly large and therefore correspondingly liable to taxation. Paris, being in serious municipal straits for money, was recently disposed to tax gardens and parks, but the project was wisely abandoned, since its effect would have been to deprive the city of many of its charms.

The Tatler is the latest addition to the pictorial periodicals of England. It calls itself "an illustrated journal of society and the drama" and the numbers that have appeared thus far fully justify the title. The illustrations are very beautiful as to technique; the subjects are chosen with great judgment and the letterpress is light and sparkling. Such a publication ought to make a success, and it will, we think, be particularly in request in the East, for it brings persons living abroad into close touch with all the sunny sides of home life.

Reports from Aichi Prefecture seem to indicate that Governor Oki Moritaka's methods are too liberal for the people of that district. The Governor proposed that a sum of 2,796,353 *yen* should be expended in three years upon improvements connected with rivers, chiefly with the object of providing for the better drainage of insanitary matter. The amount appears to have alarmed the members of the prefectural assembly. They have rejected the Governor's proposal and there is said to be considerable excitement.

KOBE CRICKET AVERAGES.

The *Kobe Herald* prints, through the courtesy of Mr. H. F. Green, Honorary Secretary of the Kobe Cricket Club, the batting and bowling averages for the season just closed:—

BATTING AVERAGES (6 innings and over).

ORIENTAL HOTEL DESTROYED.

By a fire, which broke out about a quarter past one on Sunday morning in the premises of a Chinese tailor at No. 12, Bund, that place was destroyed and the fine three-storied Oriental Hotel, one of the ornaments of Yokohama, was reduced to ruins. It is difficult to ascertain or to say with certainty in which part of the Chinese store the flames originated but to those who were earliest on the spot, only a few minutes could have elapsed before the Oriental Hotel, separated from it by a narrow space, was also alight. An inmate of the Hotel declares that he heard the first alarm of fire when the conflagration started in the Chinese shop, that he then proceeded to put on his dress clothes which lay easiest to hand, that certain alarming sounds near his room caused him to dispense with his socks and to thrust his naked feet hastily into his shoes and that on opening his door he found the hallway impassable and had to retreat and descend to the ground by a water pipe. Whether the fire spread as rapidly as that story would seem to indicate may perhaps be questioned, but there is no doubt that the flames marched from house to house with almost incredible swiftness.

It is stated, we give the report with all reserve, that a few minutes before the alarm was given, a foreigner passing along the Bund noted that people were not all asleep in the premises adjacent to the Hotel; and it is also reported that another foreigner, who had been at the Smoking Concert in the Public Hall, wending his way home by the same thoroughfare, saw smoke issuing from the Chinese store and tried in vain for some time to beat up the occupants, but when the buildings got fairly alight little arousing was necessary. It took about a quarter of an hour to clean out the Chinese store from front to back and how the adjacent store of Yamabe, the photographer, with the wooden buildings on Messrs. Strome & Co.'s compound, escaped is a miracle to those who saw the way in which the strong northerly breeze blew the flames about. Long before the Chinese store was reduced to debris, however the walls of the Oriental Hotel, only one brick thick, were heated beyond power of resistance. The flames were lapping the eaves of the tall building and when, ten minutes after the first alarm people began to arrive on the scene it could be seen that the hotel was doomed. The inside woodwork began to smoulder; the flames ran up the roof and soon were pouring out of the upper bedrooms into the hallways.

There seems to have been no lack of water. The fire people were on the spot with most commendable promptitude. All available hydrants were requisitioned; water was drawn from the Catholic Church well and an engine stationed in the French hatoba provided a plentiful supply. But as soon as the hotel began to burn it was apparent that nothing could stop the conflagration and so the efforts of the firemen were largely directed towards saving adjoining property. The buildings opposite the hotel in Water Street were so protected and also the premises of Messrs. Mason & Co., the occupants of both of which places were actually moving at one time during the morning. A British naval detachment was landed, the aspect of the outbreak conveying the impression on board ship that half the Bund was on fire, but being thanked by the police and informed that his assistance was not required the officer in command drew off his men and returned on board.

The only fatality reported in connection with the affair—through various persons have been spoken of as missing—is the death of Aniano Naka, aged forty-seven years, the personal amah and servant of Mr. Muraoar. This faithful creature, aroused by the noise, proceeded to her master's room, awoke him and having seen him and guests in the vicinity on their way to safety went back on some errand and was caught. Her remains—or at any rate those of a woman, which it seems reasonable to suppose are hers—were found about noon on Sunday in the hallway near where the clock used to stand. Only the pelvic and

lower bones could be found and it would seem that a sudden descent of the upper part of the building had overtaken her and crushed her body to pieces.

Despite the fact that the flames started in another building the occupants of the hotel appear to have had small warning. The hasty and insistent ringing of the night-bell by the passer-by to whom we have alluded, and the loud alarms given by Mr. Muraoar and Staff-Paymaster Airey, when aroused, seem to have been the first signs of danger and there is general agreement among the guests that they only escaped narrowly. A foreign resident who reached the scene about ten minutes after the outbreak and who assisted in hauling the hose into the narrow alley between the Chinese store and the hotel, while as yet the latter was only alight about the eaves, tells how men in pyjamas and ladies in their night clothes came downstairs amid showers of molten lead from the upper part of the house. Some of the inmates were able to throw trunks out into the street but these were the exception. One commercial gentleman travelling for important houses at home lost everything, samples included, except such pieces of raiment as enabled him to go round on Sunday and order more clothes; others, amongst them four American tourists, Messrs. T. Fisher, J. W. Campbell, M. M. Langhorne and R. P. Greer, lost absolutely all they possessed; one lady escaped in only a night gown and a water-proof, and even these were burned by the molten lead from the ornamental sky-light which lighted the winter-garden. Valuable property belonging to Mr. L. Dewette, part-owner of the hotel, and stored in the upper part of the building, went to ashes with the rest.

The aspect of the flames when the Oriental Hotel got fairly alight was truly sensational. The strong northerly breeze rushing through the various apertures fanned the fire till it roared from room to room, and when at last the roof, or what remained of it, fell in the noise was deafening. How the conflagration did not spread is a miracle and must be taken to reflect high credit on Mr. Morgan and the Japanese Settlement Brigade men, for embers six inches long and all alive were falling on the Bluff during the morning.

It would be idle to attempt at this moment an estimate of the loss. The hotel was full insured, the losses of the insurance companies being probably about yen 250,000.

It may be mentioned that the Chinese connected with the building in which the fire started were examined by the police, but in the absence of incriminating evidence were released.

We understand that the insurance lines on the Oriental Hotel total yen 150,000, borne by about six companies, of which the Norwich Union (Messrs. Bavier's agency) carry yen 50,000; while other companies interested are the London Assurance; the Commercial Union, Manchester, and Atlas.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—As there seems to be some discrepancy in the various reports regarding Sunday morning's fire perhaps you would not mind publishing the following statement.

I was one of the Tulips, and after the show took supper with the other members of the troupe. Leaving the Public Hall a little before 1 o'clock I proceeded home by way of Water St. accompanied by two gentlemen whom I left respectively at the Club and No. 4.

I had no sooner left these gentlemen than I saw a very dense smoke arising, and I turned back expecting to find the Portuguese Consulate on fire; however, I discovered that the fire was in the rear of Ah Leng's store, and on proceeding, by way of the side street to the Bund, I saw that two policemen stationed at the hut by the French Hatoba were already bringing a reel and hose. At this moment, several females at the rear of Ah Leng's store were yelling and screaming. At this time the wind was blowing in the direction of Yamabe's store, but was very high, which accounts for the fact that this store escaped being burnt. The hotel, at the time, seemed so safe that I thought it quite unnecessary to call the inmates. Suddenly, however, the flames caught the upper sun blinds and then the eaves and spread with lightning rapidity from the front to the rear of the hotel. At this

moment the hotel momban seems to have been aroused and Mr. Muraoar came out followed by his clerk, who immediately rushed back and with the aid of the runner and the momban called the guests. I myself then entered the hotel to find a number of ladies and gentlemen already coming down the stairs. It was then that a lady, whose name I have since learnt, asked me to take her child, which I carried to the Grand Hotel accompanied by the mother whilst the husband remained behind trying to save some effects. I had the momban call Mr. Sandford and after seeing the lady and child accommodated with a room I again left for the scene of the fire and assisted Mr. Parrott to pull a hose into position at the rear of the hotel, which was no sooner done than the staircase and balconies collapsed. I then assisted 2 police officers to break open the dining room doors which were securely bolted on the inside; after this our assistance was of no use and we had to look out for ourselves and avoid the falling debris. The *Herald* says "Mr. Sandford, assistant manager of the Grand Hotel, lent valuable aid in the work of rescue." I should like the *Herald* to detail any assistance that Mr. Sandford rendered. The *Herald* further states, "Nor should the services of the Black Tulips be overlooked in this connection; several of these still wearing their burnt cork were tireless in their exertions." As a matter of fact I was the only Tulip present in all his war paint, other Tulips who had been home to change their dress viewing the scene from the top of the Boathouse.

At the time when I first went on the Bund there was not another person in sight with the exception of the two police officers and the customs officer on duty at the Hatoba.

If anybody deserves credit it is these two police officers; it was owing entirely to their exertions that there was not a serious loss of life. As a matter of fact the *Herald's* reporter was not on the scene till the following day.

Yours faithfully, GEO. W. LEWIS.
Yokohama, Nov. 19th, 1901.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Replying to Mr. G. W. Lewis' letter, in your paper of Wednesday, I would like to say that in connection with the recent conflagration at the Oriental Hotel I have never assumed to take upon myself any credit for "bravery" or "live saving."

I most heartily accord to Mr. Lewis full credit for his daring and "nerve" in rescuing men, women, children, and personal effects at the fire.

It is not my wish to appear in the foreground of newspaper notoriety on such occasions and I certainly admit that the assistance which I might have lent was in my eyes next to nothing.

However, if Mr. Lewis asserts that he went to the Grand Hotel and awakened me, there must be a slight discrepancy in his correspondence, as I was up and fully dressed upon his arrival.

I am, dear Sir, Very truly yours,
F. S. SANDFORD.
Yokohama, Nov. 20th, 1901.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In reference to Mr. Sandford's letter in today's issue, on referring to mine, which you published on the 20th instant, it will be readily seen that I lay no claim to having rescued men, women, children and personal effects, neither do I accuse Mr. Sandford of wishing "to appear in the foreground of newspaper notoriety," nor do I claim to have awakened Mr. Sandford. I said, "I had the momban call Mr. Sandford." My sole object was to refute certain statements that appeared in the *Herald* and to point out that the two policemen stationed at the box adjacent to the Oriental were deserving of commendation for their prompt action.

Doubtless, the impression Mr. Sandford wishes to convey is that he himself did not authorize or solicit the *Herald* to use his name in its report of the fire, I remain, Sir, yours faithfully,

GEO. W. LEWIS.
Yokohama, 21st Nov., 1901.

FIRES.

A telegram from Kushiyo announces that a conflagration broke out there at 2 a.m. on the 14th instant, and destroyed 300 houses. It is believed that there were some casualties to life.

It is stated that a fire which recently occurred in the Government's tobacco warehouses at Asakusa destroyed property to the total value of 280,000 yen.

An extensive fire occurred at Kouramachi, Akigori, Kochi Prefecture, on the evening of the Nov. 14th. Over one hundred houses were destroyed.

On the night of the 19th fire broke out in the compound of the Prison at Yokosuka with the result that two store-houses and one other building were reduced to ashes. Thanks to the efforts of the crews from war-ships in Yokosuka and of the police, the fire was under control before the flames could spread to the prison, in which a number of prisoners were confined.

Fire occurred in Miyazaki district, Miyazaki prefecture, Kyushu, on Nov. 19th resulting in the destruction of about one hundred houses.

M. ROMANOFF'S RECENT VISIT TO THE EAST.

The Moscow correspondent of *The Times* gives the following explanation of the recent visit of M. Romanoff to the East:—

Last year Russia closed her own ports in the Far East and imposed the same duties, on all but a few favoured goods, as she exacts over her European frontiers. Europe, with England for spokesman, insisted on the ports of Russia's new acquisitions in China on the Liao-tung Peninsula being kept open and free. The natural results followed this double cause. Trade first of all abandoned the chief Russian port of Nikolaievsk at the mouth of the great Amur River, and came down to Vladivostok, which sprang up into a city of importance almost in a night, when Russia's plans in the Far East began to take a definite shape. With the acquisition of Port Arthur and the subsequent advances in Manchuria, a further movement south is beginning to be discernible. The closing of the free ports has sent Russian trade in the great centres of Eastern Siberia down with a run, and enterprising business people are following the flag south into Manchuria. These are all natural movements and afford no ground for complaint; moreover, they are movements which take time to develop. But the grievance comes in over the confused state of the fiscal arrangements. The Amur territory is subject to the duties of European Russia; Manchuria is subject to the Chinese tariff, and legally a foreign country, though not actually; Dalny, with Port Arthur, is a free port, but belonging to Russia. Large quantities of dutiable goods, both Russia and foreign, are coming into the free ports of the Liao-tung Peninsula, and in increasing amount are finding in their way into the Amur territory over the river, which in its thousands of miles' length is practically unguarded fiscally, as, until a year ago, it was unguarded in the military sense. The merchants of Vladivostok, Khabarovsk, and Blagovestchensk are already loud in their complaints, and the Assistant Minister of Finance has gone to the Far East to investigate the state of affairs there. If the matter rested at the smuggling of dutiable articles it might be of less consequence, as, after all, the chief articles smuggled are not used in such quantities as to create a really serious state of affairs. But there is more behind. Russia pays a drawback on all manufactured cotton goods leaving the country for abroad amounting to about the value of the duty imposed on raw cotton entering the country. A similar allowance is made on exported spirits, and sugar exports likewise receive a bounty. As things stand now all these goods are going into Manchuria, and some of them are getting back into Russian territory north of the Amur River without the Russian Treasury's benefiting a stiver.

No country can put up with this state of things, and, unless Russia has fallen off from her old traditions, it is not hard to understand what a case she will be able to make out in a very short time for the necessity of closing the ports she has promised to keep open on the Pacific. Much might be done by closing the railway to the carriage of any such goods, but experience has shown that the regulations are never enforceable on a railway in distant parts of the Empire. The railway officials have the right to the use of wagons for the carriage of necessities of life, and they lend their names for a consideration to enterprising local traders, whereby both parties enrich themselves and only the State suffers. Moreover, with their advantages in cost price, such goods are independent of railways in a country where carriage is so cheap as in Manchuria now. Of course, the proper solution of the question would be that Russia should provide for the guardianship of the frontiers she legitimately holds. Practically, with the tools Russia has to work with even nearer home than far distant places like these, such a measure is absolutely impossible; indeed it is believed that the cost of maintenance of the few Customs officials established at Nikolaievsk and Vladivostok

is far from met by the proceeds, and to guard several thousand miles of river frontier with a sparse population is not a promising task with the best and most reliable of subordinates. Russia will certainly prefer to get up a case for the closing of the ports on the Liao-tung Peninsula. Her military and diplomatic arrangements are in working order already, and the pivot upon which these must be made to turn is gathering strength with every yard of the railway completed through Manchuria. By next spring, if not sooner, all things will be ready, and another Chinese question, or rather Russo-Chinese question, will be sprung upon the Powers of Europe.

If, as many persons hope, the completion of the Trans-Asian railway system is to bring Russia and Japan into such close commercial relations that they will forget their political differences, it would seem that Russia's fiscal policy will have to undergo modification. Trade is the best solvent of international prejudices. But it must be free trade. A wall of tariffs contributes to postpone the federation of the world.

YUAN AND WANG.

We take the following from the *North-China Daily News*:—

H.E. Yuan Shih-kai was a protégé of the great Chinese statesman who passed away quietly in his sleep on Thursday, and it is in accordance with his patron's dying memorial to the Throne that the protégé has been appointed to the highest provincial post in China, that of Viceroy of Chihli. The rise of Yuan Shih-kai has been phenomenally rapid, and he is now only in his 43rd year. He came into prominence first as Chinese Commissioner at Soul, before the war between China and Japan, and the British representatives in Korea have borne unanimous testimony to the ability and good sense which he displayed in that difficult position. In 1897, that is only four years ago, he was promoted from the rank of Taotai to that of Provincial Judge of Chihli. In 1898 he vacated this post and was made expectant Vice-President of a Board with the control of an army corps; and the story has been fully told in our columns of how he failed his Emperor at the critical moment just before the coup d'état, and by his action at that time made possible the anti-foreign plot of Yung Lu and his friends. He was rewarded with the Governorship of Shantung, on which he cut himself adrift from Yung Lu and the reactionaries, joined, and adhered faithfully to, the Yangtze Compact, kept order in his province during the dark days of last year, and has shown every courtesy to such foreigners as have come in contact with him at Chinanfu, where he was projecting and supervising the introduction of many salutary reforms. The appointment of Yuan Shih-kai, like that of Wang Wen-shao, the amiable and liberal, but very deaf, Grand Secretary, to replace Li as Pince Plenipotentiary, is decidedly a step in the right direction on the part of the Court; but there is a general impression among the Chinese that Yuan is inclined to be rather subservient to stronger men who are above him, and may be too anxious to keep on good terms with Yung Lu. He has done so well, however, in Shantung that we must hope for the best, and so far as the peace of Chihli is concerned, it is satisfactory to know that Yuan has by far the best drilled and disciplined army in China. That he is well trusted by the Court is shown by his being given the High Commissioner-ship of the Peiyang as well as the Viceroyalty. There is reason to fear that things in Shantung will not go as well when Yuan goes, for his successor, Chang Jen-chün, who was Treasurer of the province in 1898, is said to be a weak man, not at all competent to keep order in such a turbulent population as that of Shantung has been since the evil days of Yü Hsien.

THE BLACK TULIP SMOKER.

An excellent smoking concert was given in the Public Hall on Saturday evening by a company of gentlemen styling themselves the Black Tulip Minstrel Troupe. The proceeds were devoted to the Yokohama Cricket and Athletic Club's funds, and judging by the large audience that assembled the result should be very satisfactory from the Treasurer's point of view. The Black Tulips are really Messrs. L. E. McChesney, C. H. Thorn, C. Aslet, Bones; J. W. Thompson, G. G. Brady, F. W. Pettitt, Tambo. Chorus.—F. Pollard, O. D. Strome, E. W. Kilby, A. Nicolle, G. W. Lewis, B.

J. Jackson, H. B. Darnell, C. Thwaites, W. M. Squire, H. V. Summers, J. E. Moss, H. E. Hayward, S. H. Somerton, and P. Delf. Mr. C. J. Whitney was Interlocutor; Mr. A. Mason was at the piano, and Mr. Herbert Grimbale conducted. The first half introduced the following musical items (which were freely interspersed by local jokes and topical allusions)—"Ma Belle of Philippines," the company; "Coon, coon, coon," Mr. S. H. Somerton; "Dark-eyed Cavalier," Mr. Aslet; "Dear old Tennessee," quartett by Messrs. H. E. Hayward, F. Pollard, H. V. Summers, and B. J. Jackson; "My Hannah lady," Mr. C. H. Thorn; "Goo-Goo Eyes," Mr. Brady; and "Coloured 400," the company.

The second part began with an original sketch entitled "Virginia." We will not attempt to describe this skit on negro vagaries but content ourselves with printing the "bill of the play":—

Chunk..... A Ne'er-do-well Boy F. Pollard.
Rufus... A good natural Plantation Negro ... C. Aslet.
Rastus..... The Plantation
 " Buck " J. W. Thompson.
Parson Jackson... Spiritual adviser
 of the flock
Uncle Peter Old Negro Labourer F. W. Pettitt.
 (Virginia's Mother) a
Aunt Eliza { fat healthy Planta- } G. W. Lewis.
 tion Mammy
Lucinda... The Flirt of the Neighbourhood... C. H. Thorn.
Sambo... The Boss Coon of the Plantation... G. G. Brady.
Virginia..... { The Belle of the } L. E. McChes-
 Plantation ney.
Pickaninnies... Masters K. & J. Tresize, S. A. Vincent
 & W. Gray.
Farm hands, Wenches, etc.: Messrs. Darnell, Moss,
Thwaites, Strome, Jackson, Hayward, Nicolle, Kilby
 & Squire.

A quartett, "Ma Honey dat I lub so well," by Messrs. Pollard, Hayward, Summers and Jackson; a duet, "Miss Virginia," by Messrs. Brady and McChesney; and "Look out for de hoodoo-man," by Mr. C. H. Thorn and Masters Tresize, Vincent and Gray;—all these proved tuneful numbers and were loudly applauded. After another selection by the excellent string band of the U. S. flagship *Brooklyn*, one of the cleverest items in the evening's long list of diversions was put upon the boards, Messrs. C. J. Whitney and C. L. F. Duhan giving one of the famous Louis Fields and Joseph Weber's Dutch-American sketches. This was a rare piece of characterization in which both players shone, and we venture to predict a hearty reception for both artists when they next appear. Messrs. Delf and Aslet's banjo duet, the next number on the programme, was, as usual, re-demanded, but the request unfortunately could not be complied with. A Cake-walk by Messrs. Thompson and Thorn proved hugely diverting and led up to a Grand Ballet by the whole company: another excellent piece of drilling and dressing, while as for the *diva ballerina assoluta*, what words can describe her manifold graces of deportment and dexterity? Mr. Thorn surpassed himself entirely. Mr. Brady brought the performance to a close with a whimsical rendering of "Every race has a flag but the coon."

YOKOHAMA LITERARY SOCIETY.

A delightful time was spent by the members of the Yokohama Literary Society in Van Schaick Hall on Friday evening. The lecturer was Prof. T. J. Chapman, of Tokyo, who dealt with that most fascinating subject "Carbon Photography," illustrating his remarks with slides thrown upon a screen by the aid of the new stereoscopic and afterwards making some experiments with carbon printing. The audience frequently evinced its appreciation of the lecturer's efforts. The musical portion of the programme included a piano-forte solo, "Air du Ballet (*Chaminade*)," by Miss Mendelson; two Scotch songs, sung most delightfully by Miss Lloyd-Thomas, who received, by the way, a hearty welcome back to the concert platform; and a piano-forte solo by Mrs. Bathgate, who treated in a scholarly fashion a prelude of *Chopin's*.

FOOTBALL.

H.M.S. "GLORY" V. H.M.S. "GOLIATH."

King Edward's "boys in blue" had lovely weather to play the Navy League match in on Friday, and had it not been a mail-day they would doubtless have had a large crowd down to see their excellent performance. The Navy Football League was started on this station in October, 1900, and out of the original 43 entered teams 18 still remain in, with the *Argonauts* eleven at the top with 6 matches played and 6 wins. H.M.S. *Glory* is second on the list with 6 matches played, 5 won, and one drawn with H.M.S. *Terrible*.

The teams lined up punctually on Friday afternoon and from the start it was seen to be the *Glory's* game, their team being in the pink of condition and their combination well-nigh perfect. The *Goliath* played up well to them, however, and a fast game resulted. In the first half the *Glory* made 5 goals, and one that was disallowed by the Umpire, Mr. J. H. Rutledge, who filled that position by special request. On changing ends the competition became a little more even and O'Connor managed within the first quarter of an hour to score a goal for the *Goliath*. This was followed soon after by two more goals for the *Glory*, and as nothing more was made during the game, the *Glory's* Eleven finished the victors by seven goals to one. Bugler Moore again proved the best player on the field, but he was in good company with Lane, Hansford, Milford and Lieut. Sherbrooke. For the *Glory* the goal-kickers were, Hansford, 2; Milford, 3; Dowson, 1; and Moore, 1.

Teams—H.M.S. *Glory*—Morgan, goal; Lieut. Sherbrooke, and Wade, backs; Matthews, Lane (Capt.), and Watson, half-backs; Dowson, Hansford, Milford, Moore, and Cottam, forwards. H.M.S. *Goliath*—Lane, goal; Christie and Williams, backs; Anderson, Fackrell, and Curtis, half-backs; Mr. Williams, Young, Bailey, O'Connor, and Stringer, forwards.

H.M.S. "GLORY" VERSUS Y. C. AND A. C.

The football game on Saturday was a delightful surprise after the two previous exhibitions of Rugby given on the Yokohama cricket ground, the local fifteen putting up a fine exposition all round and giving the Navy all they knew to beat them. From first to last the game was fast and in the second half the passing of the Yokohama men was occasionally very brilliant. It was rather hard therefore that luck did not enable them to score a goal, for at times they completely outplayed the Naval visitors. W. S. Moss, the centre forward, put up a good game and was ably seconded by Van Smith, K. F. Crawford, E. F. Crowe and Cartwright among the forwards; while Dr. Gibson and H. R. Barnard distinguished themselves as three-quarter backs. The game ended in victory for the *Glory* by 5 points to 3.

Teams—H.M.S. *Glory*—Back—Capt. Molloy. Forwards—Lieuts. Attenborough, Innes, Wilson, Kilvert, R.M.A., Messrs. Morris, Turle, Calvert, Halves—Talbot and Fenn. Three-quarters—Lieuts. Sherbrooke, Sartorius, Messrs. Crowe and Pigott. Y.C. and A.C.—Back:—W. Goddard. ¾ Backs:—E. I. Dyer, Dr. Gibson, H. R. Barnard and K. Van Smith. ¼ Backs:—H. W. Kilby and R. Tanaka. Forwards:—K. F. Crawford, F. O. Stuart, E. W. Kilby, S. Moss, E. F. Crowe, J. S. Cartwright, W. J. White and J. E. Moss.

After the Rugby game was finished two Association teams took the field and played out the remainder of the daylight, but the interest of the crowd waned visibly, despite the good play of both teams, and very few remained to see the finish. The White eleven scored one goal to nothing by the Reds.

A game of Association football was played on Thursday between teams representing H.M.S. *Goliath* and the Y.C. and A.C. The play was very even but in the first half the local goal was mostly in danger and eventually the visitors scored two goals. In the second half play was mostly in the visitors' ground and one goal was kicked—by Pearson.

LITERARY NOTES.

The *Magazine of Art* for October contains an article by Mr. George Lynch on "An Art School Competition at Tokyo." Among the chief illustrations are reproductions of studies by Midzuno Toshikata.

The London Autumn publishing season of 1901 began with an array of over 400 new novels. Who reads this enormous mass of fiction? And how many of these novels are destined to live in the memory of their readers? The questions are interesting but unsolvable.

Mr. Jacob A. Riis, author of that powerful and suggestive book, *How the Other Half Lives*, is about to publish, through Messrs. Macmillan, *The Making of an American*. Mr. Riis is a Dane. Once a starving day-labourer, he is now one of the right kind of philanthropists in New York.

Mr. E. H. Parker, who has just accepted the Chair of Chinese at Owen's College, Manchester, is bringing out a new book entitled *John Chinaman*. Mr. Murray is the publisher, and the work consists of a series of anecdotes derived from the writer's own personal experience in China, and illustrating the character and customs of the Chinese in their social, political, religious, and commercial dealings among themselves and with other nationalities.

It is well-known that many men holding appointments in English Government offices devote a portion of their leisure to the writing, and also to the reviewing, of books. Nevertheless it was something of a surprise to a certain highly-placed and exclusive official to discover the other day that two of the reviews of an important book lately published by him were from the pens of the two juniors in his department. So says the *Academy*.

Mr. Rudyard Kipling's *Kim* is the book of the hour at home, despite the carping of some critics who can see no good in the man or his works. At the close of a two page review, a writer in one of London's foremost literary magazine says:—*Kim* is hardly a novel. It is a cinematograph of a people, telling also what they feel—what they have felt through time, and the effect of that immemorial feeling on those of today. Kim, the protagonist of the restless, quick-witted, eager present, and the Lama, the protagonist of the passionless past, full of replies, full of wisdom, represent Mr. Kipling's two sides, and it is his way in prose and verse to fuse those two sides together.

A publication which should command universal patronage is that of the Twentieth Century Citizens' Atlas, by George Newnes (Limited). The work is in 24 sixpenny parts, and the first number (just issued) is especially attractive. It includes a new "Commercial Chart of the Far East," showing recent changes in China, and trade routes in Eastern seas; a very complete map of Brazil, showing the latest explorations and railways; and a section map of the eastern counties of England, reduced from the new Ordnance Survey, and showing every village and hamlet in the country. The text deals with the progress of the world during the 19th century—its discovery, population, railways, shipping, trade, &c., illustrated with many diagrams. It is announced that commercial charts will be a special feature of this Atlas.

A controversy in the *Times* as to the origin and purpose of the Alfred jewel has received a further contribution from Sir George Birdwood. He contends that the traces of Oriental influence in the form and decoration of the jewel support Professor Earle's theory—that it was meant to be worn on a helmet. Sir George, in answer to Mr. Elworthy in his condemnation of a suggestion of Lady Huggins, asserts that pins for female wear are still made in the East of all sizes, up to six inches and eight inches, of the most beautiful forms, with every elaboration of art; and that, in the way of cheap trinketry, similar pins are often seen for sale in Regent-street and the Burlington-

arcade. Sir George winds up with a very interesting and scholarly history of the word "pin."

An interesting series of articles on "Jacobite Cornwall" has been commenced in the *Jacobite*, and in the first of these the writer refers to the loyalty of the Duchy during the Great Rebellion. To this day (it is said) King Charles I.'s letter of thanks to his trusty Cornish hangs upon the walls of the churches beside the Creed and the Ten Commandments; and it is encouraging to find that in many places it has been recently unearthed from lumber-rooms and replaced. Pre-eminent in the history of the loyal duchy at this troublous period is the history of the Granville family, which has been immortalised by the deeds of Sir Richard Granville, "the King's general in the West," and Sir Bevil Granville, the ideal cavalier, who fell at the Battle of Lansdowne, and whose followers registered a vow that they would kill a rebel for every hair of his beard.

The recent production of "Melnotte" at the Coronet Theatre, London, has suggested references to the various burlesques of "The Lady of Lyons." Two of these took the form of sequels to the tale as told by Bulwer. And of the two by far the better was Mr. Herman Merivale's "Lady of Lyons Married and Settled," brought out at the Gaiety in 1878, with Miss Farnen as Pauline, Mr. Edward Terry as Claude, and Mr. Royce as Deauseong. In this piece Mr. Merivale burlesqued Bulwer's inflated style rather than the play itself. He made Claude flirt with a laundry-maid called Babette, and address her thus:—"Come with me to my mother's lonely cot! I have preserved it ever in memory of mine early youth; and, believe me, that the prize of virtue never, beneath my father's honest roof, even villains dared to mar! Wilt come?" "I wilt!" says Babette. Babette is beloved by Gasper, who sings in her honour a happy parody on "Sally in Our Alley." Thus:

To catch a lover on the hip
There's none like fair Babet-te;
You'd love to kiss her rosy lip,
But ah! she'll never let 'ee
Yet shall she wash my Sunday suit
Tho' she my suit refuses,
For oh! she washes far the best
Of all the blanchissooses!

In 1878 Mr. Merivale's travesty, with its pointed prose dialogue and well-turned lyrics, was before its time; it would have far more chances of success to-day.

Miss Isabel Bird (Mrs. Bishop), whose travels in the countries of the Far East are known to all our readers, has lately extended her wanderings to North Africa. She has contributed to the *Monthly Review* some "Notes on Morocco" which will be read with much interest. Mrs. Bishop is an observer, not a politician, but at the outset of her article she indicates the international importance of her subject in a single sentence. "If any one suggests," she writes, "that France having been permitted to absorb this dying empire, would undoubtedly recruit her army from its splendid fighting material, and might menace our position in Egypt and our right of way in the Mediterranean—acquiring as she would one of the pillars of Hercules—the cry is raised of pessimist! and 'alarmist.' The awakening may come one day, and it will be a rude one." According to Mrs. Bishop's observations affairs in Morocco are going from bad to worse. The Sultan has lost his power, and in a great part of the country there is no government at all. There is a strong feeling among the khalifas against the French, and repentment against the Sultan because he tolerates their encroachments. Mrs. Bishop is of opinion that Morocco can never be reformed from within; any effective measures for amelioration "must be carried out by men brought up in other schools than those of Moorish tradition." Mrs. Bishop does not, in so many words, point out the obvious moral for Britons, though she in effect suggests it. Morocco cannot remain an independent Power, and it is the business of British statesmanship to take care that it does not fall under influences which may make it a danger to their position at Gibraltar and in the Mediterranean.

The *Memoirs and Letters of Sir James Paget*, by one of his sons, turns out to be a very charming piece of biographical writing, and rivals the *Huxley* biography of last year. What a strenuous life the man lead, and how long it was before he could say that his work was crowned with success. In the autobiographical memoir which is the basis of this biography, he wrote:—"If I had died before I was forty-seven I should have left my wife and children in extreme poverty. . . . If I had died or had become unfit for hard work before I was sixty, they would have been very poor." This is the statement of a great West End surgeon who rose to the height of his fame and to the proverbial £10,000 a year when most men are beginning to slacken in the struggle. Well born in the best sense, as he tells us, well nurtured and companioned in his home, early married, faithful to himself and to his profession, Sir James Paget rose by the sheer headway of his character, without pushing or advertisement, until in the fulness of time he became a spectacle of all that is dignified and highly trained in man. And as the evening shadows were closing round, we find him writing to his friend, Sir Henry Acland:—

I am, thank God, well, and may have been refreshed, in some measure, by my holiday. But I am growing very old, and as I watch the changes that old age brings, I constantly feel sure that they are such as one should be thankful for—including as they do the consciousness that the "time draweth near," and that, in the short time that may remain, there is very little claim or need for the work that almost wholly occupied one's earlier days; and that one's mind is wholly unfit for the study of such subjects as used to be one's delight and seemed to be one's duty; and that thus and by various other means one is being taught how best to use the time thus mercifully granted, and, as it were, divinely set apart and exactly fitted for its best use.

LAW CASES.

Legal proceedings have been instituted in Kyoto by the Russo-Chinese Bank against Mr. Hamaoka Kotetsu, formerly manager of the Kwansei Boyeki-Kaisha, which failed last spring, its failure attracting considerable attention in business circles. The Bank's case rests on the very simple fact that Mr. Hamaoka has failed to take up two bills, one for thirty thousand yen and one for eight thousand, drawn by him in his capacity of manager of the company.

SINGER VERSUS ENDO.

In the Yokohama Chihō Saibansho on Friday morning, before Judge Yasuda, was heard an appeal brought by the agents of the Singer Manufacturing Company, No. 56, Yokohama, against Miss Endo Fuji, of No. 160. Mr. Akizawa appeared for appellants and Mr. Ota for defendant.

As previously stated in these columns, the Yokohama agents of the Singer Machine Company rented to Mr. Eugene, of No. 129, Yamashita-cho, a sewing machine, which Miss Endo seized from Mr. Eugene on June 6th on the ground that the latter owed her money. Thereupon the Singer Company brought a suit against Miss Endo in the Yokohama Ku Saibansho for the recovery of the article. Judgment was given in favour of the defendant on the 4th of September this year. Plaintiffs not being satisfied with the verdict appealed to the Yokohama Chihō Saibansho and the case came up for hearing yesterday. After hearing arguments between counsel the Court announced that judgment would be given on Nov. 18th at 1 p.m.

WEALE VERSUS AKASHI.

Judgment was delivered in the Yokohama Chihō Saibansho on Monday morning, by Judge Yasuda, in the case of Mr. Weale, of Messrs. Cornes & Co., No. 50, Yamashitacho, Yokohama, v. Mr. Akashi Tokujiro, of Yamanoshiku, Tokyo. Defendant was ordered to pay plaintiff yen 4,022.10, together with 2 per cent. interest per annum from the 14th of September this year until the date of the execution of judgment. As already mentioned in the *Japan Mail* of Nov. 9th defendant refused

to take delivery of fifteen cases of plush, which plaintiff imported last year at the value above mentioned; the reason of the refusal being that the imported article differed from the sample.

RUSSO-CHINESE BANK VERSUS MAPLES HOTEL.

On Nov. 16th, the Yokohama Branch of the Russo-Chinese Bank lodged an application in the Yokohama Chihō Saibansho with regard to the Maples Hotel on the Bluff asking that the latter be declared bankrupt. A claim for the payment of yen 15,000 was made in connection therewith. Arguments in this action will be heard at the Court on Nov. 27th.

A few days ago, a clerk named Kurokawa Tomoe, in Messrs. Peyre Freres, No. 85, Yamashitacho, was arrested by the Kagachō Police on a charge of having stolen a bottle of whisky from the firm.

Yanagita Shingoro, formerly an employé of Messrs. Berick Bros., No. 75, Yamashitacho, Yokohama, was arrested by the Kagachō Police on Wednesday on a charge of theft. It appears that he appropriated a cheque for yen 160.48 which the firm received from Mr. Sugiyama of Kita-ku, Osaka, on Nov. 7th and that he drew the money from the First Bank's Yokohama branch on the 9th.

AMERICAN TOPICS.

Japanese newspapers report that the American Authorities at the Philippines have published the new tariff, and that it bears very heavily upon some articles of Japanese manufacture. The duty on fans, which has hitherto been 26 dollars per 100 kilos, will now be raised to \$150, and the duty on matches goes from \$14½ to \$40 per 100 kilo. The Japanese Consul is said to have protested against the latter figure, but his remonstrance proved unavailing. Indeed the military authorities had recommended much higher imposts, but the tariff committee proved more liberal.

The postal money orders sold in the United States during the past fiscal year reached a total of \$300,000,000 in round numbers, an increase of almost \$40,000,000 over 1900.

An immense photographic plate 8ft. long by 4ft. 8in. wide and 3½in. thick, is being made in St. Louis to take a picture from a balloon of St. Paul and Minneapolis, the "Twin Cities" of the United States.

There are indications that trade between Hawaii and Japan is steadily growing. The gradual increase in the number of Japanese emigrants to the Sandwich Islands is considered to be the chief factor in this development. Below is a table showing the imports and exports to and from Japan during the past ten years:—

	Exports. Yen.	Imports. Yen.
1891	66,482	26,361
1892	62,136	647
1893	167,522	3,689
1894	313,908	6,147
1895	393,680	2,163
1896	513,188	9,929
1897	524,179	1,414
1898	717,356	23,950
1899	1,351,949	5,622
1900	1,294,789	5,265

It may be added that the principal exports consist of *sake*, soy, salt fish, *kombu*, cotton fabrics, coal, matches, and umbrellas, while the imports are represented chiefly by coffee, sugar and printed matter.

Mr. Free, the United States Consul at Bombay, has had enterprise to forward, in a specially-made case with plate-glass top, twelve mango grafts of nine different varieties to a horticulturist at West Palm Beach, Indian River, Florida. He says: "Almost all the fruits of the Old World

are said to be improved by being transplanted in American soil. If the Bombay Alfons mango can be thus improved, we shall have found a delicious fruit." Any way, diffusion of the world's natural products is to be encouraged, and the Consul deserves to succeed.

Prominent among the exhibits at the Charleston exposition is one that deserves more than casual mention. It is that of tea culture. The only commercial tea grown in the Western Hemisphere is that produced at the Pinehurst Tea Gardens, a short distance from Charleston. This exhibit will be absolutely unique, and one of the most valuable features of the exposition, and will no doubt prove one of intense interest to visitors.

Senator Foraker will introduce a bill to pay Mrs. McKinley a year's salary \$50,000, on her late husband's account, following a precedent established in the cases of Presidents Lincoln and Garfield. It is also suggested that a pension of \$5,000 a year should be voted to Mrs. McKinley. It is estimated that an appropriation of more than \$100,000 will be asked from Congress for compensation of physicians and surgeons who treated President McKinley.

Cresceus, king of trotters, broke the world's mile record for a half-mile track at the Kansas City Driving Club's park, on Oct. 24th, going the distance in 2.09¼ and clipping one-quarter of a second off the best previous record of his own, made at Toledo two weeks before. He made the new record in his first trial. The time by quarters was—.32¼, 1.04¼, 1.36½, 2.09¼. The track was fast and the weather conditions were perfect. Fully 8,000 people witnessed the event.

In 1900 for the first time statistics of the agricultural interests of Alaska were gathered by the U.S. census bureau. The area of the twelve farms reported in Alaska in 1900 is 159 acres, of which 104 acres are devoted to the cultivation of vegetables and hay and the remainder is used for pasturage. The total farm products were valued at \$8,046. These farms are all south of the Kuskokwin river, in southern Alaska, and along the southern coast, including the Aleutian islands.

Since there has been so much talk of Roosevelt as "our young President" one of those men who delight in snubbing public opinion writes to the American papers to show that Roosevelt is a year older than the Emperor of Germany, twelve years older than the Czar of Russia, ten years older than the King of Italy, twenty-two years older than the Queen of the Netherlands and twenty-eight years older than the King of Spain. "In fact, about the only way we can make a youthful showing for our President is to compare him with the Pope."

According to the official report of imports made by the U.S. Customs at Manila for the period of one year from October, 1900, to 1st October, 1901, the following quantities of beer were imported into the Philippine Islands:—

	Barrels.	Cases.
A. B. C. Bohemian	34,084	1,040
Schlitz	17,377	—
Anheuser	6,853	—
Palst	6,624	—
Lemp's	6,384	—
Wiedemann's	4,853	—
Wieland's	510	—
Spanish	1,478	—
Miscellaneous	1,060	—
Total	79,223	1,040

A full-grown bull moose entangled and helpless in the meshes of a fish net is a somewhat unusual spectacle even in Maine, but, nevertheless, that is what has just been seen up at Sourdnaunk lake. The moose was finally liberated by three members of the United States fish commission, but not until the net had been practically ruined. The moose had evidently been walking through the woods with his head down, as is the custom of those animals at night, when he had encountered the net and his horns had become entangled

in the meshes. He then began to struggle, with the result that his hoofs, and, finally, his whole body, became enveloped.

Candidates for the purple at the Consistory which the Pope usually holds about Christmas time, according to the Rome correspondent of the *Pall Mall Gazette*, are arising everywhere, their numbers seeming to increase in proportion to the distance from Rome. The United States, or instance, besides the candidates of long standing, Archbishops Corrigan and Ireland, two opposite tendencies in the American Roman Catholic church, has on this occasion two additional aspirants for the red hat. There are only four vacancies in the college of cardinals, and the American prelates are thought to have few chances of selection, as the Pope is credited with a determination not to have more than one cardinal in the United States, fearing that the friction and antagonism would be difficult to harmonize and might be fatal to Catholicism in America.

The centennial celebration of the expedition of Lewis and Clark to the Columbia river country, resulting in the acquisition of Oregon territory, will be celebrated in Portland in 1905. The *Morning Oregonian*, of Portland, has issued a booklet giving sketches of the early exploration of the country and valuable information concerning its remarkable development within a hundred years. The territory acquired by Lewis and Clark now contains three of the large states of the Union and the finest stretch of seacoast on the northern Pacific coast. Portland in 1900 was the fifth port in the United States in the volume of exports of wheat and flour. It is also a great lumber-shipping point. The population in 1900 was 90,426. The city is the terminal point for several railroad lines. The official name of the centennial celebration will be "Where Rolls the Oregon; the Lewis and Clark Centennial; American Pacific Exposition and Oriental Fair."

Over one-fifth of the population of the United States attend some public school supported by the taxes of the State or municipality, while about one-fiftieth of the population attend private schools. The school population last year, including pupils in all schools, elementary, secondary and higher, public and private, numbered 17,020,710, an increase of 282,483 over the preceding year. Those enrolled in public institutions numbered 15,443,462. The inclusion of pupils in special institutions, such as reform schools, asylums, Indian schools, etc., would increase the total by about half a million. Perhaps the most notable feature in scholastic development during the last decade has been the great increase in the number of public high schools, which have more than doubled, numbering 6,005 in 1900, as compared with 2,526 in 1890. This increase has been distributed throughout the country. It is worthy of note, however, that the increase in the number of high-school pupils has more than kept pace with the increase in buildings, and is proportionally much greater than the increase in population, there being 12,588 pupils in attendance on schools beyond the elementary stage, as compared with 8,053 in 1890.

Mr. Alexander Winton, of Cleveland, with his big racer, smashed all automobile records from one to ten miles, inclusive, on Oct. 23rd, at the Grosse Pointe track, Detroit, Mich. He covered ten miles in 11.09 flat, and three times during the afternoon he clipped two-fifths of a second from the record made by Fournier at the Empire City track October 10th. This mark of 1.06 2-5, caught three different times by expert timers, is the fastest ever made on any track by any manner of vehicle. Winton took his machine out in the morning and did five miles, each better than 1.09, his best mark on Wednesday. At about 1 o'clock the conditions seemed favorable and he started for a ten-mile run. It was evident from the start that records would be shattered, for the explosions came with a regularity that showed the machine to be working finely. Every one of the records set by Fournier at New York were eclipsed, the Frenchman's 6.47 for six miles being lowered to

6.40 4-5. The fast clip was kept up to the end of the ten miles, the slowest mile being made in 1.07 3-5. In the afternoon, when the wind died down somewhat Winton was very confident that he could clip off still more, and he made a number of trials. In all, during the day he went twenty-four miles, each of which was made better than 1.09. He made one more mile during the afternoon in the record time of 1.06 2-5. After the fast ten-mile trial was made the timers and scorer made affidavits to its correctness.

* A rough estimate of the aggregate membership of the labour organizations in the United States on July, 1901, is as follows:

Unions affiliated with the American Federation of Labour	950,000
Customs-clothing makers	3,800
Lithographers	2,100
Bricklayers	39,600
Plasterers	7,000
Stonecutters	10,000
Box makers	5,500
Piano workers	7,700
Engineers, marine	6,000
Engineers, locomotive	37,000
Firemen, locomotive	39,000
Conductors, railway	25,800
Trainmen, railroad	46,000
Switchmen	15,000
Letter carriers	15,000
Knights of labour and unenumerated organizations, say	191,100
Total	1,400,000

Hard coal is a luxury except within a limited area. How strictly limited that area is may be seen from the comparative figures compiled by the Geological Survey. The three states of New York, Pennsylvania and New Jersey alone consume 65 per cent. of the total output of hard coal. In those states anthracite coal can be bought at a reasonable price, because the mines are not far away and the cost of transportation is comparatively small. Pennsylvania, which possesses the mines, itself uses one-quarter of all the hard coal consumed in the United States. As the distance from the mines increases there is a rapid rise in price and a corresponding reduction in the quantity consumed. Indiana uses only one-twentieth as much hard coal as Massachusetts. The Geological Survey's comparative prices lists for 1896 tell the story, according to the *Chicago Tribune*. "At Spokane in that year anthracite coal sold for from \$18 to \$20 a ton. Presumably the price is 10 per cent. higher now. In the chief cities of Montana the cost of anthracite ranged from \$14 to \$18 a ton. San Francisco was able to get it for \$12 to \$16 by way of Cape Horn. Throughout the interior of the country, away from the lakes, the price of hard coal increases rapidly according to the length of the railway haul. Kentucky can scarcely afford to use any hard coal, though Louisville is a little nearer the mines than Chicago. Cheap lake transportation hitherto has made it possible for Chicago to use large quantities of hard coal, but as the mines grow deeper and the prices mount higher this fuel is becoming more and more of a luxury even on the lakes."

NEWS OF THE WEEK.

Count Okuma will give a second chrysanthemum garden party in a few days.

King Edward has succeeded in buying back his former yacht, the *Britannia*.

On Thursday, Mr. Sufu, Governor of Kanagawa Prefecture, dined on the British flagship *Glory*.

The German flag-ship *Fürst Bismarck* has entered the Mitsubishi Dock at Nagasaki for repairs.

The Sanyo Railway Company is reported to call on its shareholders for a payment of yen 10 against new shares amounting to yen 100,000.

Owing to a diminution in the quantity of cargo from Europe to the Far East freight rates have been lowered of late. For instance, the freight on

German sugar between Hamburg and Yokohama is said to have fallen yen 15 per 100 *kin*.

Australia is considering the adoption of a decimal coinage.

A Nagasaki message says that the new Chinese Minister to Japan was expected to arrive at that port on Nov. 18 from China.

It is reported from Bakan under date Nov. 19th that owing to rough weather some 10 fishing boats have been wrecked in Moji Straits.

The Directors of Reuter's Telegram Company have declared an interim dividend at the rate of five per cent. per annum for the first half of 1901.

Now that work on the East China Railway has been completed postal trains are reported to have been started between Vladivostok and Port Arthur via Halbin, on Nov. 14th.

A dispatch from Tainan, Formosa, dated Nov. 20th says that owing to the poor crop of rice and other cereals in southern Formosa there are indications of rioting in those districts.

A donation of yen 1,000 has been made to the citizens in Kojimachi ward, Tokyo, by the family of H.L.H. Prince Yamashina in memory of the Princess who died about a week ago.

It is reported from Osaka that negotiations are now in progress between the Kyushu and the Karatsu Railway Company for amalgamation. The matter will be definitely settled by Dec. 19th.

Brigadier-General J. Smith is expected to succeed General Hughes in the command of the U.S. troops on the island of Samar. The U. S. Navy is doing some brisk work there.

The freight on German sugar between Hamburg and Yokohama had fallen 15 *sen* per 100 *kin* of late. It is further reported that freight on iron between those places has also been lowered from five to four shillings per ton.

On Nov. 15th the Metropolitan Police Office issued a notification to the effect that foot and mouth disease having broken out in Hyogo Prefecture the importation into Tokyo of cattle, pigs and sheep from that prefecture, is prohibited.

The Mitsubishi Shipbuilding Yard of Nagasaki is now engaged in the construction of a steamer which will be solely used in salvaging ships. Her dimensions are: length 186 feet, breadth 29 feet, draught 16 feet, gross tonnage 710 tons, and horse power 520.

On Nov. 30th, officers and men connected with the Yokosuka Admiralty will observe a ceremony for the repose of the spirits of those who died in the collision between the British steamer *Ravenna* and the Japanese war-vessel *Chishima* off Iyo province ten years ago.

The election of a member of the House of Peers representing the highest tax-payers of Kanagawa prefecture will take place in the Yokohama City Office on Nov. 22nd at 9 a.m., owing to the resignation of Mr. Hiranuma Senzo. Mr. Ishii Toranosuke will probably be elected.

The U.S. military authorities are fortifying Manila with Gatling guns. They deny that they apprehend any trouble in the city, but they evidently mean to be prepared. Gatlings have been placed on the ramparts of Fort Santiago so as to command the river-mouth.

The U.S. gunboat *Florida*, which has been making ready at Manila for service along the coast and rivers of Samar, left on the 29th ult. The *Florida*, which was formerly a quarter-master's steamer, has been converted into a formidable boat, and is sure to be useful in Samar.

General Miguel Malvar has issued another proclamation, via Hongkong, according to the Manila press. He styles himself Captain-General of the Philippines, has reorganised his forces, and threatens death to all peace-envoys. The new

organisation divides the Filipino army into five divisions, one each for North, South, and Central Luzon, Visayas, and Mindanao.

A pretty severe and prolonged earthquake shock was felt in Yokohama on Thursday morning beginning at 8.33 o'clock. The oscillation, which seemed to be about north and south, lasted a full minute. The shock, was experienced in Tokyo at the same time.

The presents which Prince Chun took to Germany, he has presented to the Berlin Industrial Art Museum. Before leaving Berlin Prince Chun presented gilt medals to some students of the High School for having played lawn tennis, cricket, and other games with him in the garden of the Foreign Office.

The N. Y. K.'s steamer *Teshio Maru* (1,107 tons) ran aground off Rubetsu, in the Chishima group, on the night of Nov. 19th. She is reported, however, to have been floated subsequently. It may be added that the steamer left Hakodate for Shana on the same day under command of Captain E. Nomura.

The *Empress of Japan*, which arrived from Vancouver late on Tuesday afternoon, did not enter the harbour at Yokohama, merely anchoring at the quarantine station long enough to discharge her mails and passengers into the *Spindrift*, and then turning round she continued her journey south.

The Railway Authorities are reported to be thinking of adopting water-power electricity on the Usui Pass, where the Abt system is now employed, in order to further supplement the transportation power on that section. The Kiritsumi river near by is now being surveyed in connection with this plan.

In consequence of the poor crop of tobacco this year, the total quantity purchased by the Tobacco Monopoly Bureau at the end of October is said to be not more than 1,960,000 *kwamme* and it is therefore feared that the crop raised throughout the country will not come up to 8,200,000 *kwamme*, the estimate of the authorities.

Owing to St. Andrew's Ball falling on the same day as the regular fortnightly meeting of the Yokohama Literary Society, the Committee of the latter have arranged for a meeting to be held in Van Schaick Hall on Friday, Nov. 22nd, when papers dealing with various aspects of College life in the United States will be read, and if possible representative college songs will be sung.

Fresh details of the recent typhoon in the Philippines show that the sudden rising of the Cagayan River caused immense loss of life and damage to property in the provinces of Cagayan, Isabela, and Nueva Vizcaya, Luzon. Hundreds of people are missing, and many bodies were washed out to sea. The injury done to the tobacco-districts will cause a rise in the price of that commodity.

The vernacular press of the Punjab stated about the beginning of last month that Pundit Raj Narain, Editor of the *Patiala Akhbar*, and four Mahomedan gentlemen, were proceeding to Japan with a view to study at the Tokio University. They have formed themselves into a Society, and named it after His Highness the Nizam. Rupees three thousand have been collected by the society, and it is hoped further collections will be made.

A few days ago, a ball measuring 20 centimetres in diameter, was discovered under the floor of a go-down of the house occupied by Mr. Hayashi Tomojiro at No. 18, Mamiana-machi, Azabu, Tokyo. The matter was reported to the police and on making close examination it was found that the object was a shell. As the result of inquiries subsequently made by the police, it is supposed that as the house of Mr. Hayashi was once occupied by a naval officer after the termination of the late China War the dangerous object might have been preserved by him as a Chinese trophy. It is further reported that the

naval officer is dead and that in consequence the police are searching for the whereabouts of his widow—presumably to hand over the shell to her.

Since the Sugar Consumption Tax went into operation on the 1st of October this year no substantial proceeds from this source have been realized by the Authorities. The taxes collected by the Yokohama Tax Collector's Office up to Nov. 19th are reported to be no more than *yen* 239, of which over *yen* 156 were received last October and *yen* 82.32 during 19 days of the present month.

The twelfth series of debentures issued by the Industrial Bank of Japan to the amount of one million *yen* have been over-subscribed. Applications received by the Head Office and its agencies throughout the country by the final day for subscription represented the sum of *yen* 1,735,000, showing an excess of some *yen* 700,000. It is reported that the subscriptions from Korea and Formosa were numerous.

NOTES FROM HOME PAPERS.

The many friends of Lady Victoria Lambton deeply sympathise with her in the loss of a third son in South Africa in less than three years. Her share in the sufferings caused by the war has indeed been a very large one.

The announcement of the engagement of the Duke of Hamilton and Brandon to Miss Nina Poore, one of England's beauties, has caused widespread interest. The Duke of Hamilton and Brandon is premier peer of Scotland, and Hereditary Keeper of Holyrood Palace. A few years ago he was a poor lieutenant in the Navy, but succeeded to the titles and estates in 1895.

Lord Edmond Fitzmaurice, who unveiled at St. Ives, in the course of October, a statue of Oliver Cromwell, can trace his descent to a period nearly five hundred years anterior to the time of the Protector. The barony of Kerry, of which his brother, the present Marquis of Lansdowne is the twenty-sixth representative, was created in 1181, and the fourth baron, who flourished in 1325, had rather a unique experience. Having a dispute with one Dermot Oge MacCarthy, he killed that chief on the Bench before the very eyes of the Judge of Assize at Tralee. For this he was duly tried and attainted by Parliament, but although he escaped the extreme penalty, his lands were seized, but subsequently restored to his successor.

The scale of allowances for outfit and travelling expenses for official personages has lately been revised. The Governor-General of Australia receives £2,000, while the minor Australian Governors get £800. The Ambassador at Paris is given £4,000, and next comes the Viceroy of India with £3,500. The Ambassador at Constantinople is allowed £2,700, while the Ambassadors at Vienna, Berlin, and St. Petersburg get £2,500 each. The Ambassadors to Washington and Madrid and the Ministers to China, Persia, and Japan get £2,000 each. The High Commissioner in South Africa is limited to £500, and the Governor-General of Canada gets only £400, while the Governors of Hongkong and Singapore get £800 each.—*Truth*.

Who is the oldest verger in the United Kingdom? The honour is claimed on behalf of Mr. Henry Wilton, the verger of Shoreditch Church. He was a boy when he came to London in 1834 from Frome, in Somersetshire, and his journey by coach was in those days considered no mean feat. For some years he stayed with Mrs. Francis, who then acted as sextoness at Shoreditch Church. She died in 1849, and Mr. Wilton was nominated as her successor, and in an exciting election he won easily. For over fifty years Mr. Wilton rang the curfew bell, and has probably attended more weddings and christenings than any other man now living. Once during a service he saw a bullock calmly walking up the aisle of the church. Mr. Wilton is nothing if not practical, so he literally took the bull by the horns and backed it out of the building. Although now eighty-three

years of age, he is still able to perform his duties. He is the grandfather of "Baby" Wilton, the child actress.

Mr. T. E. Fuller, M.L.A., who is to succeed Sir David Tennant as Agent-General for Cape Colony in London, is the son of a Baptist minister, and a native of West Drayton, in Buckinghamshire. It was by an accident that he emigrated to Capetown, for after being educated for the ministry at Bristol College, his wife fell ill in 1864, and was ordered to a more congenial climate. Three years later she died at Capetown. Mr. Fuller, who is now in his seventieth year, has for long enjoyed the reputation of being the finest and most fluent speaker in the Cape House of Assembly. For several years he was the editor of the *Cape Argus*, and he has also been the general manager of the Union Steamship Company in South Africa.

Though the King of Denmark is the oldest Sovereign in Europe, his sister, the Duchess Frederick of Anhalt-Bernburg, is the oldest of all Royal personages. She kept her ninetieth birthday in the second week of October. She was married at the age of twenty-three, and shortly afterwards the Duke became hopelessly insane, and the Duchess ruled as Regent with great wisdom till his death in 1863. Since then she has lived in great retirement, mainly at Ballenstedt. She is very rich, and is devoted to her Danish nieces, the Queen of England being her special favourite, who never fails to visit her when in Denmark. The Duchess gives very large sums to charities.

The British military authorities are seriously considering the advisability of making use of dogs on active service in connexion with the performance of ambulance work. With this end in view they have just called upon Major Hautville Richardson to furnish an exhaustive report on the result of some experiments with dogs that were recently carried out under his direction in Forfarshire. The occasion in question was that of a sham fight between the Angus Rifles and the Forfar Artillery, when a number of dogs trained by Major Richardson were employed to carry medical comforts to men told off to act as casualties. The dogs are said to have acquitted themselves of their duties in a thoroughly satisfactory manner.

The list of successful candidates for the Home, Indian, and Colonial Civil Service, which has just been published, presents at least one very striking feature. For the first time since the new system was adopted of holding the same examination for all three services, Cambridge has done better than Oxford, winning twenty-five places, as against twenty. The list contains in all fifty-six names, and it will therefore be seen that no less than 82 per cent. of the men have been at one or other of the famous Universities—a large proportion. Though Cambridge has done best as regards quantity, Oxford has beaten her in quality, as she has gained the first, second, and fifth places, while the highest Cambridge men are respectively sixth, seventh, and eighth on the list.

In the discussion which followed the recent Congress on Tuberculosis, it has been pointed out that it would be a serious public danger if, pending the scientific settlement as to the correctness or otherwise of Dr. Koch's theory that tuberculosis cannot be transmitted from animals to man, any relaxation were permitted in the public health regulations for dealing with milk and meat. Some correspondents further pointed out that the milk-boiling question is not one of safeguarding against tuberculosis alone; but that, even if Dr. Koch's theory were established, the boiling of milk would still be necessary as a protection against other diseases, such as diphtheria and scarlet fever, the conveyance of which by milk is undisputed. The Local Government Board has now issued a circular of warning to local authorities and medical officers of health on this very point. The circular points out that a Royal Commission has been instituted to inquire into the matter, and impresses upon all local officials the importance of continuing all measures hitherto in force for dealing with animal food suspected of tuberculosis.

FOREIGN PARCELS POST.

NEW REGULATIONS.

Ordinance No. 51 of the Communications Department, which was published on Nov. 13th in the *Official Gazette*, promulgated new Foreign Parcels Post Regulations as follows:—

Art. 1.—Parcel post matter transmitted by special arrangement between Japan and foreign countries shall be dealt with at all Imperial Post Offices, except in offices as to which it has been previously announced that the business will not be transacted.

Art. 2.—In addition to those articles the transmission of which by parcel post is forbidden by treaties, agreements, rules of operation and detailed rules concluded between Japan and foreign countries, the following substances shall not be transmitted by the service:

1. Substances which postal laws and regulations do not regard as parcel post matter.

2. Substances the exportation or importation of which is prohibited by laws and regulations relating to the Customs.

3. Substances the transmission of which by parcel post has been specially prohibited.

Art. 3.—Fees for foreign parcel post matter shall be specially notified.

Fees for foreign parcel post matter shall be paid in advance in postage stamp; but this provision shall not apply to cases of transmission to an address different from the original address.

Art. 4.—Fees coming under any of the following clauses may be returned to the payer in the shape of postage stamps, when such restoration is claimed by him:—

1. Superfluous fees either imposed in error by the post office or agency concerned or paid in error by the payer.

2. Special service fees paid in error should it appear that the post office or agency concerned has neglected to transmit the matter by special service.

Art. 5.—Claims for the return of fees as specified in the foregoing article must be made at the post office or agency to which the fees were originally paid. The limit of time for making this claim is six months.

Art. 6.—All foreign parcel post matter must bear where the address appears, the words "German Parcel" written distinctly and legibly, if the parcel is to be transmitted by the direct German service, and "via France" in case it is to be transmitted through the French service.

Art. 7.—Persons wishing to send a foreign parcel shall obtain from a post office or agency a customs form by which to give notice of the substances contained in the parcel and, in case if should it be required a form of bill of lading. In the form the specified items must be entered and the specified rates of fees should be affixed, in case of a German parcel, on the bill of lading, and on the parcel when the service is that of any other country. The sender shall receive a receipt from the post office or agency in exchange for the parcel.

Art. 8.—When the arrival of a foreign parcel at its destination has to be certified the receiver must sign a certificate to that effect besides the delivery note.

Art. 9.—When a foreign parcel comes under the customs tariff rules, such parcel shall be kept at the post office or agency, which shall send a notice of arrival and a certificate of delivery and, when necessary a certificate of receipt to the receiver. The receiver shall return to the post office or agency within 30 days from the date notified the notice with stamps corresponding to the tariff and also the delivery note and certificate of receipt, the receiver signing his name on the same. The parcel shall be handed over at the post office or agency in exchange for these documents.

Any person wishing to protest against the Customs decision as to the amount of duty imposed shall send notice to that effect direct to the Customs Office concerned, and at the same time a report setting forth in detail the procedure taken shall be sent to the post office or agency concerned. When the protest has been settled or when an appeal made to the Minister of Finance has been settled, the documents pertaining thereto shall be sent to the post office or agency.

Art. 10.—In case the contents of a foreign parcel coming under the foregoing article are entitled to be exempted from duty according to the Tariff Regulations or other laws and regulations, and in case the receiver wishes to obtain this exemption, a notice to that effect shall at once be sent to the Customs Office, and a report sent at the same time to the post office or agency. When notice of exemption has been obtained from the Customs Office, the relative documents shall be sent by the receiver of the parcel to the post office or agency.

Art. 11.—The limit of time for keeping in trust a foreign parcel coming under Art. 9 shall extend, for a case coming under clause 2 of the said article, till the settlement of the protest or decision of the appeal,

and till notice of exemption is received for a case coming under Art. 10.

Art. 12.—Should a letter of inquiry be sent by the post office or agency to the sender about the treatment of a foreign parcel that cannot be delivered the sender shall, within 30 days from the date mentioned in the letter, inform the post office or agency whether he wishes its return or destruction.

Art. 13.—When the receiver of a foreign parcel has removed his abode from one place to another in the empire he may request the transmission of the parcel to his new residence without payment of extra fees.

Art. 14.—In case of failure to deliver a foreign parcel the sender may, without fee, request the post office or agency concerned to issue a certificate certifying the non-delivery of the parcel or, on presenting the receipt obtained on the occasion of sending the parcel for transmission, may request the post office or agency to institute inquiries into the matter.

The requests mentioned in the foregoing clause must be made within one year from the date of the sending of the parcel for transmission, to a post office or agency.

Art. 15.—When a complaint is made on the occasion of the delivery or return of a foreign parcel, alleging that the parcel is in a damaged condition, the parcel must be opened within seven days from the presentation of the complaint, in the presence of the complaining party, in order to ascertain the existence or non-existence of the damage.

When in any case coming under the preceding clause the complaining party is the receiver and fails to be present on the occasion of the examination the parcel shall be treated as one that cannot be delivered. In case the complaining party is a sender the parcel shall be treated according to Art. 14 of the Postal Service Law and as one that cannot be restored to the sender.

Art. 16.—In case compensation for damage is claimed for a parcel coming under a treaty containing indemnification provisions or sent under an indemnification agreement, a letter claiming indemnification shall be presented to the post office or agency to which the parcel in question had originally been sent in case the claimant is the sender, and to the post office or agency of delivery in case the claimant is the receiver, such letter to specify the name of the service, number of the parcel, address of the sender and receiver, date of sending, the nature of the contents, quantity, value, amount of the claim, and the amount of the fees paid when refunding of the fees is also claimed.

Art. 17.—The Department of Communications shall decide whether or not compensation shall be granted, as also the amount thereof.

Art. 18.—When investigations as to a claim for indemnification have been concluded or when the claimant has withdrawn the claim, the parcel shall be at once delivered to the claimant, provided that the parcel is in the jurisdiction of Japan.

Art. 19.—The provisions of Arts. 4, 7, 11, 12, 70, 71, 75, 76 and 77 of the Imperial Postal Regulations shall be applied correspondingly to the foreign parcel post service.

SUPPLEMENTARY RULES.

Art. 20.—The present regulations shall be enforced from the 1st January, 1902.

The parcel post agreement concluded between Japan and the Dominion of Canada (1890), between Japan and Germany (1894), between Japan and England (1896), and between Japan and France (1898) shall be annulled.

CORRESPONDENCE.

INDEPENDENCE AND SELF-SUPPORT.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I am sure every Missionary in Japan feels greatly indebted to you for the Summary of the Religious Press which you publish monthly. It gives us an idea of what is being said and thought in the religious sphere of Japan. In the summary of Nov. 9th there were some statements from the *Tokyo Maishu Shinshi* about the independence of native churches and the pay of pastors that are so palpably contrary to facts that the statements seem really too childish and silly to come from such a serious journal. One statement is this: "Until the disbursement of church funds is entirely in the hands of Japanese, pastors and evangelists will never be properly paid." Now one reading this, not knowing the facts, would get the idea that Japanese Christians are not allowed to control the funds that they themselves collect unless the church is entirely independent. Now as far as my observation and experience go missionaries not only do not pretend or want to control Japanese funds but they often give Japanese part control of some of their own funds coming from abroad, too much control often for their own good. One gets the idea from the *Maishu Shinshi* that the Japanese churches are struggling to get out from under the control of the

missionaries so that they can manage their own funds and pay their pastors and evangelists bigger salaries. This is really laughable. The fact is that one of the greatest worries and trials that a missionary has in Japan is to keep the native weak churches out of his pocket-book. If he has weak churches on his hands he is continually urging them to contribute more, to pay their own rents, their pastor's salary, his travel and other expenses. Nothing pleases the missionary better than when a church decides to give more from its own purse and take less from his, thus becoming self-supporting and independent. So long as the missionary pays a large part of the pastor's salary and other expenses of the church's work he is going to have some say in the management of that church. Ah! there's the rub! Independence carries with it self-support. There are churches that would be delighted if they could get hold of the bank drafts that come out from America and England, and if they could do this they would very soon declare themselves independent. A Japanese body of Christian workers has been known to seriously discuss the feasibility of carrying out such a plan. We are worrying, and planning, and praying day after day trying to get all the organized churches to pay their pastors and evangelists more and better salaries, and when they are willing to pay enough for their pastors to live on, we will declare them independent with rejoicing. We want self-support to come first; they want independence and a purse string that is long enough to reach abroad, too. That is the sum and substance of the whole difference between us.

Yours truly,

A MISSIONARY.

WILL ADAMS' GRAVE.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I have just seen the letter written by Dr. Hocken which appeared in your issue of November 5th calling attention to the condition of Will Adams' grave. As one of the subscribers to the project, started some years ago, to renovate and conserve the place I sincerely hope it will not be allowed to go to ruin. Has interest in the spot died out in Yokohama?

Yours, etc.,

W. A.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Dr. Riess in his article entitled "History of the English Factory at Hirado," in Vol. XXVI. of the Japan Asiatic Society's Transactions, reaches the conclusion that Will Adams died at Hirado. Unless some proof can be given to the contrary the probabilities are in favour of his having been also buried there. It is true that according to Dr. Riess it was not till 1621 that "a burial place 26 yards square was allowed to the English" at Hirado, and that Adams died in March of the same year, presumably at Hirado, and others of the English Factory had died in the previous six years. If there were already one or two graves of Englishmen in the vicinity of the Factory, the presumption that Will Adams also was buried there is slightly strengthened.

In any case before the suggestion put forward in your issue of to-day of removing his remains to the Yokohama Cemetery be seriously considered, it would be well for further search to be made among Japanese or other archives with a view to determining whether "Will Adams' Grave" at Hemi really contains the dust (or ashes) of the English Pilot.

Yours faithfully,

A. F. KING.

November 20th, 1901.

THE SENDAI INCIDENT.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I have just noticed, in your issue of this morning, a reference to an action for assault brought by a Japanese resident of Sendai, against the Rev. Dr. Schneider. Knowing the people concerned I feel that in justice to Dr. Schneider, immediate correction should be made. The person against whom the action has been brought is not the Rev. Dr. Schneider but the Rev. S. S. Snyder, of the American Bible House. Thanking you for permitting me to make this correction.

I am, sir, yours truly,

J. G. CLEVELAND.

JAPAN AND THE AUSTRALIAN TARIFF.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In your issue of 20th inst., under the heading "Tariffs," you state that rice used to be duty free in Australia.

This is hardly correct, as for many years past rice has paid duty in all the Australian colonies with the exception of Western Australia.

This duty varied considerably, being 9s. 4d. per cwt. in Queensland, 6s. per cental in Victoria, and 3s.

per cwt. in the other colonies for cleaned rice; brown rice being admitted on a lower basis.

The new tariff will, in all probability, not affect the Japan export to any great extent, but will lead to a change in the character of the rice exported, brown taking the place of polished or clean rice.

It may be of interest to mention in this connection, that owing to the high tariff in Queensland, considerable attention has been given to rice cultivation in that State, and the new Federal Tariff will doubtless give this industry a considerable impetus.

Whether rice can be successfully cultivated by white labour remains, however, to be seen.

Yours, AUSTRIAN.
Yokohama, Nov. 21st, 1901.

"MOBILE" COLUMNS.

The *Spectator* is greatly dissatisfied with the conduct of operations in South Africa. Writing on Oct. 5th our contemporary said:—

What we believe to be wanted in South Africa is more brains, more grasp of the military situation, more intelligence, and more mobility, and not more men. We cannot believe that a general with a really comprehensive mind would not have been able to use the quarter of a million men under his orders so as to beat down the Boer resistance. We do not wish to write anything harsh as regards General Kitchener, and we realise that in certain particulars in the profession of arms he is unrivalled. He is a great army organiser and a great driver of the military machine; he can produce the material of war in men and things with superb success; but we greatly doubt whether he has the kind of mind that enables him to use his material to the best advantage when he has to think in blocks of ten thousand squares miles, and when his chessboard is half a continent. To put it specifically, we believe Lord Kitchener would be an almost perfect Commander-in-Chief at home, but we doubt whether he has the qualities that will ensure success when he is commanding in so vast a theatre of war as that in South Africa. There we need those qualities of imagination, of instinctive decision, of geographical eyesight—in a word, the higher political strategy—which belonged to Napoleon and belong to Lord Roberts. The lightning calculators tell us that they are not conscious of the multiplications and divisions which must go on in their brains, but that the answers seem to rush into their minds ready-made. The great generals solve their strategic possibilities of a continent as an ordinary man can grasp those of a hillside. As long as Lord Roberts was in South Africa one felt that he had a comprehensive grasp of the whole geographical and military situation, and that nothing aimless and purposeless would ever be done. When Lord Roberts left South Africa we were told by the military quidnuncs that it was high time he should be gone, that he was not the man for the job, that he was too old and too amiable and without sufficient energy, and that what was wanted was a stern, hard man, who would take an iron grasp of the situation and hold all South Africa in the hollow of his hand. Now we do not deny for a moment that Lord Kitchener has done excellent work, and that he has shown great energy; but can it be said that he has shown a really comprehensive grasp of the situation as a whole and of its strategic possibilities? On the contrary, it seems to us that he has never had such a hold, and has simply trusted to hard hammer-strokes to beat down the Boers. We do not say that this is not a possible way of doing the job, and if you have only a hammer-man you must use him and his methods, as the Americans were obliged to do in the case of General Grant; but we do assert that it is not the best way, and we do not believe it would have been Lord Roberts's way. At any rate, from the moment Lord Roberts left South Africa we seemed to lose our strategic grasp of the country, and this though Lord Kitchener has been absolutely unfettered in the exercise of his authority, has had the whole military and civil services at his disposal, and has been supplied from home with everything he asked for without stint or complaint. He has been nearly a year at his task, and it is hardly an exaggeration to say that he has accomplished nothing except by means of the process of attrition. True, he has done a very great deal by this means—we do not deny it for a moment—and has brought the war much nearer a close, but his successes have been due solely to hard pounding, a strategy which is a form of statesmanship, which helped General Lee so greatly, and belongs, as we believe, to Lord Roberts, has not given Kitchener a single success.

Strangely enough, too, Lord Kitchener, strong man as he is, has not even been able to insist upon real mobility in his columns. The despatch published this week shows that our so-called mobile columns have been trekking with every sort of impedimenta. We hear of furniture, kitchen ranges, pianos, and

harmoniums being dragged about by the men who are supposed to be "riding down" De Wet. And here we may remark that it would have been very much more to the point if Lord Kitchener, instead of giving the caricaturists so good a peg for their work, as he did by publishing his General Order, had sent home one or two highly placed officers for permitting such things in their columns. If Lord Kitchener had discharged the Brigadier of every column which had been made immobile by carrying any of the impedimenta just mentioned, he would have done an immense deal for the mobility of his armies. Every one from general to private would have realised that the Commander-in-Chief meant business, and did not intend that mobility should be regarded as a sort of natural quality belonging to the Boers and not to be hoped for in their opponents. There would have been nothing unfair in doing this without warning, for no general could possibly say that he thought a kitchen range the kind of thing which is generally taken when a brigade moves "light."

We are not so foolish as to think that we have a right to say how the functions of the Secretary of State for War ought to be exercised, nor do we claim to have any exact knowledge of the military situation in South Africa. [That is never revealed in the telegrams, possibly because no one either there or here has any general and comprehensive idea of the real state of things.] We shall, therefore, refrain from urging directly and specially on the Government the conclusions which arise from what we have just written. This, however, need not prevent us stating them hypothetically. If we had the power to take action, as has the Secretary of State for War, and if we were able to know that the facts are what they seem, we should appeal to Lord Roberts—and no appeal to Lord Roberts made on the ground of patriotism ever has or ever can fail—to go back to South Africa for six months in order to establish our South African strategy on a sound basis. At the same time, Lord Kitchener should either return to England to take up the post of Acting Commander-in-Chief pending Lord Roberts's return, or else should act under him once again in South Africa as Chief of the Staff. Whether this course of action would be agreeable to all the persons concerned we neither know nor care. The only question we should care to ask is whether it would be for the good of the country. The matter is too serious for personal feelings to enter into it even in the slightest degree. And in reality no stigma would be placed on Lord Kitchener. It having been founded that he did not prove the most suitable tool for the purpose required, another would be employed. That Lord Roberts would be able to give us a better and more efficient system of strategy, and that things would change with his appearance on the scene, as they changed in January, 1900, we do not doubt. If Lord Roberts went out to finish the war he would, we believe, finish it, and finish it by making the best possible use of the material in hand.

ENGLAND AND RUSSIA IN THE FAR EAST.

Mr. A. R. Colquhoun has written for the *Monthly Review* a valuable article on "Manchuria in Transformation." The extent to which the great northern province of China has been Russified already is little appreciated in this country. Russia has now, says Mr. Colquhoun, over 200,000 men quartered in Transbaikalia, Amuria, the Premnisk province, and Manchuria.

These figures were given me by Russian staff officers, and merely as details, not in any boastful spirit. Some slight idea of the nature of the Russian occupation of Manchuria may be gained from the fact that at Khabarovsk, when I passed through two months ago, there were no fewer than 29 generals. The town, only a small village four years ago, is spreading rapidly, but the population, about 15,000, is almost entirely governmental and mainly military. The whole place simply bristled with uniforms, the officers were quartered in every house, and were sleeping in every corner of the military club, some six or seven in the billiard room.

After pointing out the expenditure of money at Port Arthur, and the predominance claimed by Russia at Newchwang, Mr. Colquhoun observes that "the collection of maritime revenues is to be carried on by Russo-Chinese officials—men lent from the Chinese Imperial Customs and trained by Sir Robert Hart, who will, nevertheless, wear Russian uniforms." The writer wishes that the English people would grasp the situation which has been created in North-eastern Asia, and, like the Germans, reap some commercial benefit from Russian enterprise. But of this there is little sign.

"Two years ago, in travelling across Siberia, I met one or two Englishmen. On this occasion I have not met with, or heard of, one. There are only two English firms to be met with in the 4,000 miles between Vladivostok and European Russia. The English tongue is hardly known. At the same time there are

400 Germans in Vladivostok, the principal firms throughout Siberia hail from the Fatherland, and German is the foreign language of commerce, just as French is that of society."

In an article on a kindred subject—"India's Interest in China"—contributed to the *Fortnightly* by Mr. D. C. Boulger, the writer points out that Russia's claims in Manchuria, in the Convention for the present withdrawn, embraced Chinese Turkestan and Kashgaria. "High Russian authorities have been publicly declaring that the annexation of Kuldja and Kashgaria is inevitable, while the intrigues that have been set on foot with quasi-Lamas of Tibet are a further indication of Russia's policy in the direction of India."

HORSE AUCTION.

The following prices were realised at the sale of race ponies and others held by Mr. John W. Hall on Wednesday:—

	YEN.
Ourod, Bay, China.....	80
Mogol, Grey, China.....	55
Volga, Brown, Australian Mare.....	150
Amoor, Bay, Australian Mare.....	300
The Count, Bay, Australian Gelding (Bought in).....	440
Aberdeen, Black, China.....	500
Standard Rose, Skewbald, China.....	60
Excelsior, Black, China.....	65
Butterfly, Bay, Australian Mare.....	570
Hawfinch, Bay, Australian Gelding (Bought in).....	1,600
An Australian Gelding, No. 24 of last Subscription Batch.....	120
Popinjay, Grey, China.....	35
The Crown, Black, Australian Gelding.....	1,500
The Coronet, Chestnut, Australian Mare (Bought in).....	1,100
Sunrise, Brown, China (Bought in).....	525
The Orb, Bay, Australian Gelding.....	200
The Orbit, Bay, Australian Mare.....	310

TELEGRAMS.

(REUTER'S SERVICE TO THE "JAPAN MAIL.")

DISASTROUS GALE IN BRITAIN.

Shanghai, Nov. 14.

A gale has swept over the whole of the British Isles, doing immense damage. Fourteen wrecks occurred and fifteen persons

were drowned. The Calais packet steamer *Nord* sank the lightship off the Dover pier works. Her crew of sixteen were drowned. The *Nord* is ashore on the South Foreland.

SOUTH AFRICA.

Later.
The Boers under Maritz attacked Picquetberg but were repulsed, losing seven.

THE STORM.

The Dover lightship crew were saved. A revenue cutter has been wrecked near Leith. Twenty-three men were drowned.

MARQUIS ITO.

Marquis Ito has had an interview with M. Delcassé, French Minister for Foreign Affairs.

THE QUEEN OF HOLLAND.

Shanghai, Nov. 15.

An eminent doctor of obstetrics has been summoned to attend Queen Wilhelmina of Holland. The German papers announce that she was prematurely confined on Nov. 10th.

MR. BRODRICK ON THE WAR.

Mr. Brodrick, speaking at the City Carlton Club, said the war had been protracted in consequence of the undue leniency shown to the rebels and by the pro-Boer sympathy in England. Fresh troops are being sent to replace the tired forces. Besides 2,000 mounted troops, two battalions of infantry will be sent from home and India will provide four battalions and two cavalry regiments.

CONVOY CAPTURED.

A force of Boers under Maritz attacked a convoy at Bovenham in Cape Colony. A stout resistance was offered but after sustaining 14 casualties the convoy was captured.

QUEEN WILHELMINA.

Later.
The premature confinement of Queen Wilhelmina is confirmed.

NEW MILITIA BATTALIONS.

Army Orders notify the embodiment of additional militia battalions of the Warwickshire and Liverpool Regiments.

AMERICAN RAILWAY TRUST.

A gigantic American trust has been incorporated to control the bulk of the trans-continental railways over a length of 47,000 miles, the capital of the trust being £80,000,000.

TEA DUTY IN AUSTRALIA.

Shanghai, Nov. 16.

The composite duty on tea in Australia has been abolished in favour of a fixed duty of three-pence per lb. on tea in bulk and four-pence per lb. on tea in packets.

THE GERMAN TARIFF.

It is reported from Berlin that the Federal Council has passed the tariff almost unamended.

SOUTH AFRICA.

Further Boer raids are reported from the south-east and north-east of Cape Colony. There is a growing feeling of resentment against the Afrikander Bond.

The rearguard of Colonel Byng's column was attacked by 400 Boers who were, it is believed, under the leadership of De Wet. The enemy were repulsed and left eight dead behind: the British casualties were seven.

FRESH TROOPS.

Shanghai, Nov. 17.

Altogether twenty militia battalions are being asked to volunteer for the front.

THE IMPRISONED MISSIONARY.

Every effort to procure the release of the

American Missionary, Miss Stone (who is held captive by Bulgarian or Turkish brigands) has failed.

THE LATE GALE.

Shanghai, Nov. 18.

There were 61 wrecks and 177 persons drowned during the gale which swept over the British Isles last week.

SOUTH AFRICA.

All that are eligible of the following regiments have been ordered to hold themselves in readiness to sail for the Cape on the 15th December, *viz.*, the Loyal Irish Fusiliers, the Cheshire Regiment, the Welsh Borderers, the West Surrey Regiment, the South Lancashire Regiment, and the Durham Light Infantry.

THE GERMAN TARIFF.

The telegram of Saturday referring to the German tariff should read that the Berlin Imperial Council have passed the Tariff Bill almost unamended.

TREASON TRIALS.

Shanghai, Nov. 19.

The treason trials have concluded at Mafeking. Five death sentences have been passed and twelve more Boer leaders have been banished from South Africa.

THE ISTHMIAN CANAL TREATY.

Later.

Lord Pauncefoot, British Ambassador at Washington, and Colonel Hay, Secretary of State in the U.S. Government, have signed a new Canal treaty.

MARQUIS ITO.

President Loubet has entertained Marquis Ito at luncheon.

REINFORCEMENTS FOR SOUTH AFRICA.

The 21st Lancers have been ordered to the Cape. A large number of remounts will be sent off at the end of December. Each man will have a spare horse in addition to his pack animals.

Pompoms and galloping Maxims figure largely in the reinforcements.

THE NICARAGUA CANAL.

Shanghai, Nov. 20.

The new treaty between the United States and Great Britain regarding the Isthmian Canal does not discriminate in favour of the United States. The shipping of all nations is to share alike. Great Britain leaves the United States sole guarantor of the neutrality of the Canal.

BRITISH REINFORCEMENTS.

Besides the Regulars, it is expected that a dozen Militia battalions will be selected from those volunteering for further active service.

BRITISH PARLIAMENT.

Parliament will probably assemble on the 16th January, owing to the necessity for making further financial provision for the war.

THE 21ST LANCERS.

Only a draft of the 21st Lancers is going out to the Cape.

A LIBERAL STATESMAN'S PESSIMISM.

Shanghai, Nov. 21.

Sir Henry Campbell-Bannerman, speaking at Plymouth, said that he despaired of the peril facing the country in South Africa being overcome so long as Mr. Chamberlain, Secretary of State for the Colonies, and Lord Milner, High Commissioner for South Africa, retained their present offices.

PARLIAMENT.

The reassembling of Parliament is definitely fixed for the 16th January.

SOUTH AMERICAN POLITICS.

U.S. BLUEJACKETS LANDED AT COLON.

The Columbian insurgents have captured Colon. One hundred American bluejackets have been landed to guard the railway station.

SOUTH AFRICA.

Lord Kitchener reports that the Scouts have killed 6 Boers and captured 54, including two Field Cornets.

(RECEIVED AT THE LEGATION OF FRANCE.)

LABOUR LAWS.

Saigon, Nov. 16.

In spite of the observations of the Minister of Finance, the Chamber of Deputies adopted, by 338 votes, a proposition limiting to 10 hours in every 24 the work of mechanicians and employes of railways, and according a pension to them after 20 years' service.

MADAGASCAR.

Saigon, Nov. 18.

The recent military operations undertaken in Madagascar have resulted in the submission of the southern region, hitherto unsubdued.

(RECEIVED FROM TOKYO.)

THE EAST-CHINA RAILWAY.

The Chief Engineer of the East-China Railway reported to the Governor of Harbin on the 4th of November that the rails were laid and the line finished to a point 303 miles westward of Vladivostok, but as the above report related to the laying of rails only and not to other details of construction, a considerable interval must still elapse before the line is in full working order and able to carry passengers and goods.

PRINCE CHING.

Prince Ching arrived at Kai-fong on the 11th of November and was received by the Court in audience on the following day. The 20th of November being the Empress Dowager's birth-day, it is not probable that the Court will resume its journey to Peking before that date. It is expected that the 22nd of December will be the date of the Court's arrival in Peking, and that the edict ordering the departure from Kai-fong will be issued on the 25th instant.

THE YANGTSZE.

A French war-vessel arrived in Chungking on the 13th of November for the first time.

(SPECIAL TO "JAPAN MAIL.")

THE U.S. TRANSPORT "HANCOCK" ASHORE.

Kobe, 15 Nov., 1901.

The U.S. transport *Hancock* has gone ashore at the western entrance of Shimono-seki straits.

[NOTE.—The transport *Hancock* was formerly the *Arizona* of the Guion Line. She is a four-masted screw steamer of 5,305 tons gross tonnage, and was built in 1879 by Messrs. Elder and Co. of Glasgow. She was purchased by the United States Government for transport purposes at the beginning of the war with Spain, and has been out to the Far East with troops to and from the Philippines several voyages. On the present occasion she left Manila for Kobe, to take over the time-expired troops, homeward bound, landed there from the transport *Warren*, which was stranded in the same neighbourhood a week or so since, and will have to be docked at Nagasaki or elsewhere for repairs.]

THE "HANCOCK."

Kobe, Nov. 16.

The U.S. transport *Hancock* got off at eleven o'clock this morning. It is reported that she has sustained no damage.

THE U.S. "HANCOCK."

Kobe, Nov. 18.

The U.S. Army transport *Hancock* arrived here last night.

Kobe, Nov. 18, 2:55 p.m.

The U.S. transports *Hancock* and *Warren* are leaving here at four o'clock.

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

In the *Kyōiku Kōhō* appears a very long report of an address delivered by Mr. Tokutomi Michirō, the editor of the *Kokumin Shinbun*, before the Imperial Education Society on the necessity of teachers' studying the spirit of the age and adapting their instruction to what is actually most needed. We have only space to give the general line of argument taken by Mr. Tokutomi. The age in which we live, says Mr. Tokutomi, is one of tremendous competition and hence all the most forward countries are adapting their systems of education to the peculiar requirements of the times. But in Japan our specialists content themselves with giving instruction on their own subjects and do not take into consideration the use to which the knowledge acquired can be put by their pupils, nor they realise how superfluous are certain parts of their teaching. Mr. Tokutomi then proceeds to give details on the great strides that have been made in recent years by countries like Russia and America, and says that if Japan continues to rely principally on her armaments she will be regarded as a nation of *sōshi* and will excite enmity everywhere. The Japanese people are apt to run to extremes in everything, continues Mr. Tokutomi. If the need of more nationalism be urged, they are ready to walk though the streets of Paris in *haori* and *hakama*. If cosmopolitanism be the fashion of the hour, there are some who would urge that even husbands and wives should only converse in English. If the merits of the Bushidō be set forth, in order to enhance them, it is represented that the nation is on the brink of ruin owing to its moral deficiencies. If the necessity of economy is preached there is a danger of our becoming money-worshippers. The loyalty of a Masashige is exaggerated into the fanaticism of a band of assassins such as that led by Oishi Yoshio. If there is one thing more than another that needs to be impressed upon their pupils by teachers, it is the call for moderation and temperance in all things. . . . Speaking honestly, it is true to say that most of our specialists are mere teaching machines, and quite out of date. You hear an army man say "I am a military man and know nothing about anything outside my profession" as though it were a credit to him to be ignorant of general affairs. The business man begs to be excused from thinking about anything but his business (*soroban no hoka gomen komuru*). The scholar thinks that he has nothing to do with questions of trade and industry and that such things are beneath him. To each class of specialists the general condition of society, state interests and the spirit of the age are matters of no concern whatever. The education imported by us is far too academic and too abstract. What our students need to be acquainted with is how to apply knowledge. Even language is too frequently learnt not for the sake of the use to which it is to be put in the practical world, but for the sake only of enabling students to read and understand books. . . . The faculty of common sense is decidedly lacking among us and this accounts for our so often running to extremes. Eccentricity is very rife among us. . . . Take our system of laws at the present day. It is in every respect superior to what we were accustomed to in the pre-Meiji era, yet how many people are there that appreciate these laws? By most people the gift of such codes as we now possess is regarded as *arigata-meiwaku*, useless kindness. They speak of them as needlessly precise and troublesome, not realising that in order to be of any value law must be minute. Since most of the existing laws originated in the application of common sense to the affairs of life, if we were

endowed with this faculty it would be quite easy for us to appreciate the point of view embodied in each law. Our teachers of law deal too much in logic-chopping and fail to make clear the great common sense principles that lie at the foundation of all our laws. Now take a principle like that of public interests. What a multitude of laws are framed in order to preserve these, and how very important they are to the nation! Yet we find people constantly complaining that the conduct of individuals is too circumscribed and that they should have more freedom of action. This shows want of common sense enough to see that where individual interests are constantly in conflict with each other, the only way of preserving order and peace is to allow what are called public interests to supersede all private interests whatever. But the trouble is that the majority of people and often even the Government do not perceive what is conducive to public interests. To quote a case in point, a short time ago solely with the object of furthering public interests, we took the trouble to prepare and send to each prefecture and city a report of the rice, wheat, and silk markets. From Kyōto the report was returned with the observation that the reports of individuals on such matters were not of sufficient importance to warrant the city office in acting on them. . . . As a people we are lacking in activity and hence it follows that five or six people are employed to do the work that in the West would be accomplished by a single individual. The general result of our education is to manufacture talkers, but not doers, and hence it is that as a nation we are not expanding as we ought. Empires are built up by the exertions of active-minded and active-bodied individuals. Without these no Government can accomplish anything. . . . Another thing that should be impressed on our youth is a sense of responsibility. We have not yet got rid of the notion so encouraged by feudal rule that the destinies of the empire are only the concern of the Government and that ordinary people need not trouble themselves about the nation's future. The *Times* observed a short time ago that one of the reasons why foreign capital did not come to Japan is the fact that business men were not able to rely on her commercial probity. This is true and one of the causes of the state of things is the fact that when we were governed by warriors our traders were regarded as so many insects to be trodden under foot. They grew to feel that it made no difference how such insignificant creatures as they acted. The credit of the country was maintained independently of them. But the age has changed and now we find that in our competition with other countries the character of our traders is a matter of vital importance. To suit a new age a new class of people is needed and the work of manufacturing this class must be undertaken by teachers as a body. If every specialist shuts himself up in his own little world and devotes himself exclusively to retailing secondhand knowledge of a technical kind and lets the outside world hag as it will the creation of a new class of people suited to the exigencies of a twentieth century will be impossible. It is only by every educator realising what is the great want of the age and trying to do his part in meeting it that the state can be furnished with the means of maintaining its position as one of the leading Powers.

The *Chūō Kōron* in an article entitled *Shimban no jikwan* (時觀) asserts positively, that there is a marked change in newspaper writing in Japan and that for the better. Extreme views expressed in violent language no longer find room among the majority of intelligent readers, says the *Chūō Kōron*. Even ordinary citizens are mentioned in a more respectful way than they used to be a few years ago. Not so very long ago the 3rd page of a great many papers was filled with matters relating to the sexes that are not now considered fit for publication. Even police reports and the like are now so written that they may prove a preventive of crime. That seemingly incorrigible paper, the *Yorodzu Chōhō*, has of late quite altered and we find a column with the title 理想園 *Risōdan*, which looks as though this journal were aspiring to rise to a higher level. In

a recent article entitled *Nampha Kishano honryō* the methods of conducting journals followed by those who in the past have controlled the *Yorodzu Chōhō* are condemned and the settling up of a higher standard is advocated. The easy-going compliant writers of the past have pandered to every species of vitiated taste. They have been read in preference to the writings of the strong-minded, independent organs. But public taste is reaching a higher level. One pleasing feature of modern journalism is the way in which the leading papers institute and endeavour to render effective certain reform schemes. For example, the *Mainichi Shinbun* has long been engaged in a crusade against licensed prostitution. The *Yomiuri Shinbun* has written much on the need of public virtue, that is, a fuller realisation of what is due to the public. The *Yorodzu Chōhō* has been trying to create an alliance of thought. The *Hōchi Shinbun* has organised a friendly society for servants and employes generally. The *Fiji Shimpō* has collected funds for enabling poor Tōkyō children to take excursions into the country. The *Yorodzu* is warmly advocating the abolition of those tips known as *chadai*.

* * *

Dr. Masujima Rokuichirō's magazine, the *Shunji*, is full of life and spirit. Controversy of all kinds is its chief delight. It attacks the Government. It assails certain private individuals of whose actions it disapproves. It shows up the weaknesses and disfigurements of the age. The *Shunji*'s axe spares no tree that to its wielders seems to cumber the ground. Its earnestness, practicality, single-mindedness, and public-spirit-edness can not but excite the admiration of readers even though they do not accept the premises on which many of its assertions rest. In a copy that lies before us there is an article entitled, "Cut down all the cherry trees." It is contended that it is high time that a stop was put to the practice of planting cherry trees by the hundred on ground that could be put to better use. The Japanese have gone mad on the subject of cherry-blossom. If the space occupied by every cherry tree were used to grow pines or *Keyaki* (*zelkova occuminata*) the country would be greatly enriched thereby. The blossom-viewing about which so much fuss is made is an occupation for women of leisure, but is not a diversion in which an aspiring nation can indulge in this busy age. Rather than moon about among cherry-blossoms let our people take to yachting and to other manly sports and let those who have money cross the seas and see what is going on in foreign countries. Putting up villas in Oiso or Kamakura and spending all the spare time they have in such places is a fashion which is all too common among leading men. It is a proof of the extreme insularism of our better classes. It is not thus that the country is to be opened up. Men who have money to do this have money to go abroad. There are still many that think that opening the country consists solely in allowing foreigners to enter it and does not include the exit of our people to foreign lands. *Hana ni yoi; sake ni oboru, Zenkoku no sakura-hana wo kiritakuse.* "To be intoxicated with blossom-viewing and addicted to sake-drinking are the weaknesses of Japanese. So away with all the cherry-blossoms."

Another article in the same magazine compares the corruption of the Meiji Government with that of the Tokugawa rule in the following manner:—Who overthrew the Tokugawa Government? It overthrew itself; its corruption killed it. The Meiji Government had only to give it a small push and it fell. But is not the present Government just as corrupt as the Tokugawa Government. Is it not a fact that officials league themselves with merchants for the sake of making money. Is not bribery common? Are these not many high-ranked men who are overcome by evil desires? Are there no military men who are laying by money in order to carry out schemes of their own later on (*kane wo tamete shōrai no hakarigoto wo nasu gunjin nakika?*) Is it not a fact that the various members of the Government are vying with each other for personal prestige? Are there no doctors and professors that pervert learning and make it serve the purpose of their personal ambition? It is not neces-

sary to advance proofs of these things. They are to be found in the columns of the daily papers. The present Government professes great loyalty to the Emperor and patriotism. They make great use of the words *kinno* (勤王), *aikoku*, but their actions show that their professions are insincere. Can such a Government maintain its position for any length of time?

Another article asks whether Japan will succeed in making further progress: *Nihon wa kongo nawa yoku shimpō shi uru ya inaya?* The writer expresses the following opinions. That Japan has made marvellous progress in the past thirty years seems to be the general opinion, but the question which it is now pertinent to ask is, will this progress be continued? Can the leading statesmen of the present day be compared to the men who inaugurated the Meiji era. Then, as to the progress which it is alleged has been made, it is not so thorough as is so often supposed. The civilization that has been introduced from the West is by no means the most advanced. Even on its material side what we have adopted is in many cases by no means the best that is to be had. Look at our railways. They are altogether behind the age. With a broad gauge line and proper rolling-stock a distance of 60 or 70 miles an hour can be cleared, but we are satisfied with 20 miles an hour? In the matter of dress and many other things, we are very much in the same position as the rustic who goes to the capital to find that he is altogether behind the fashion of the age. In many things we are content to use what foreigners have cast off. Our adoption of western ways has not been guided by a minute knowledge of the actual existing state of things in foreign countries. If the hare sleeps the tortoise may overtake him in time. But suppose the hare never goes to sleep, where will the tortoise be then? There is no sleeping in the West. It is all go-ahead. Regarded from their starting-points both the tortoise and the hare have progressed, but the rate of progress in the case of each is very different and the further they go the greater is the distance that separates them. Is there not a danger of our occupying the position of a wakeful tortoise to a wakeful hare?

* * *

The following books have all appeared within the last few months, or are announced to appear shortly, *Bunmei Jidaino Dōtoku* (The Morality of an age of Civilization). By Dr. Tomizu Hiroto. The *Nippon-jin* reviews this work as follows:—The question which Dr. Tomizu treats in this volume is, does general knowledge always advance and morality stand still? Some Western writers have advocated this theory, but it is hard for any one at all acquainted with history to endorse any such opinion. The moral ideas of the most advanced of modern peoples are undoubtedly an improvement on those held by society generally in ancient times or in uncivilised countries even now. There are certain moral ideas that are the product of the age in which we live. Such for instance as the notions that lead to strikes, that make for combinations and union of strength on all sides. The morality of an age of civilization may be defined as morality that exalts the virtue of humanity, and that determines what are a man's private and public duties. There has been a great deal said about public virtue of late, but it is by no means clear what many writers on this subject mean to convey and the distinction between our duties as private individuals and our duties as citizens is by no means clearly drawn. We can recommend Dr. Tomizu's book as a clear exposition of the standard of morality now followed by the most advanced countries. Extreme egoism he condemns as contrary to the spirit of the age. One of the most interesting moral questions of the day according to Dr. Tomizu is: What are the moral rights of capitalists and workmen and how best can their relations to each other be placed on a satisfactory basis? The *Dainihon Bijutsuzō* (圖譜), by Dr. Kosugi, of the School of Fine Arts, and Mr. Yokoi Tokifuyu, of the High Commercial School. This work for which the subscription price is only 4 yen fifty sen is apparently to be superbly got up. The illustrations will make four volumes and

their explanation will fill another 4 volumes. The pictures will be done in gold on the fine paper known as *hōshō* and will be tastefully coloured. Pictures of the art objects that have been so long shut up in the Nara Hōryūji and in the Shōsōin and other places will now be made public for the first time. It is said that the pictures of these rare objects will be very minutely drawn and highly coloured. The industrious authors of the *Dainihon Bijutsuzō* have endeavoured to make their collection as exhaustive as possible and for this purpose have ransacked the whole country, not only searching for objects of vertu in all the temples, but applying also to private families. By means of this work the weaving, dyeing, embroidery work, porcelain manufacture, lacquering, the making of various temple utensils in the Fujiwara, Kamakura, Muromachi (Ashikaga), Momoyama and Tokugawa ages may be studied. As an aid to the study of history the book should prove to be of great value. The work is to be issued by Mr. Yoshikawa Hanshichi, Minamidemmacho, Kyōbashi, Tokyo, to whom would-be subscribers should apply.

The *Keisai Zasshi* office undertakes the publication of very bulky works. The *國史大系 Kokushi taikō* referred to in a former summary has already appeared. A continuation of that work is now announced under the title of *Zoku Kokushi taikō*. This history for which subscriptions are solicited is to cover no less than 15,500 pages. It is to be commenced this month and the first volume will appear in February next, to be followed by one volume per month till May, 1903, when the work will be complete. It will deal in a most minute manner with the historical periods prior to the days of the 10th Tokugawa Shōgun. It may be mentioned here that Mr. Nakaye Tokusuke's *Ichinen-yū-han* has already reached the tenth edition. The *Zoku Ichinen-yū-han*, a later work, covers 370 pages and sells at 38 sen per copy. Both works were published by the Hakubun-kan.

* * *

The *Kōshitsu no hanpei* (藩屏) (The Fence around the Throne) is the fullest account of the Japanese nobility that has yet appeared. It covers 1410 pages and sells at 4 yen 50 sen. It was compiled by the Kanda Chōgakkō Yūkai (友會). It gives a minute account of the family and personal history of all noblemen, together with short lives of their retainers.

The *Rokoku to Kyōkoku* (Russia and Far East) a copy of which has been forwarded to us has evidently been written by a military man. It was published by the Heirin-Kan, a house that issues military works exclusively, and the author hides his identity under the *nom de plume* "Kessan." It covers 154 pages and sells at 30 sen per copy. Prince Konoe and Viscount Miura evidently approve of the views expressed in the work or they would not have allowed their names to appear in connection with it. There is at the beginning of the book what are called *daiji* by the former and a preface by the latter. This work, treating as it does one of the great political questions of the day and representing as it may be assumed to do the opinions of a certain section of Japan's numerous wire-pullers, deserves a somewhat full notice at our hands. Under the headings of the author we epitomize his views.

I. GENERAL CONSIDERATIONS.—While Japan was closing her shell and shutting herself off from all intercourse with the outside world Russia was extending her borders eastward. In the Tokugawa days no notice whatever of Russia's encroachments was taken. And the Meiji Governments have pursued the same negative policy. But it is quite plain that the present situation of affairs is such that the *laissez faire* policy if followed is bound to land us in serious difficulties. On the plea that being an island state the affairs of the neighbouring continent do not concern her, Japan can no longer afford to look on with indifference while a great power like Russia is thrusting her claws into Chinese flesh. Our population

* This paper derived its name from the fact of its being used for letters of instruction issued by order of the Kamakura Shōguns.—(WRITER OF SUMMARY.)

lation is increasing at such a rate that these islands no longer suffice for the support of our people and if we must branch out to other lands, China offers us more inducements than any other country. So we must see to it that China is left free to open its doors to us. The least we must accept in the way of settlement is the turning of Korea into a buffer state between Russia and Japan. To this Russia will object. How then should we act?

II. RUSSIA'S METHOD OF AGGRESSION.—Russia tames what she intends to seize. She first appears as the protector of a country and then when events are favourable she asserts her supremacy. In all things she is diplomatic and seldom acts prematurely in anything. Russia is undoubtedly a great Power and as such is worthy of Japan's steel. She is an enemy that we should neither doubt, envy nor hate, but rather respect and be proud of. Let our dealings with her be all open and above-board. Let us have no secret diplomatic bargains. If we think she ought to be rebuked, let us rebuke her. If there are things that she does to which we cannot agree let us say so like men dealing with men. And if, unfortunately, it should happen that we have to go to war with her, let us be thankful that we have such an enemy to fight. It is said that the country is near ruin that has no foreign foes. If a country is strong it is bound to excite the enmity of other states. It is my fervent prayer that Russia may ever remain strong. How it is that Russia is obliged to adopt the policy of aggression? She wants to procure a good exit to the sea. Her doings in Turkey and in the Far East are not the result of brute courage in her soldiers and their thirst for conquest, but the carrying out of a well-considered and carefully planned policy. In order to attain her object, the thorough establishment of her rule over alien states, she first sends religious teachers to the country on which she has designs. As soon as she makes converts and these converts are persecuted, she sends troops to punish the persecutors and often keeps the force there in readiness for future emergencies. She waits for the outbreak of civil war or for the commencement of a rebellion and offers her services to one side or the other, with the result that the side which she espouses wins. She then utilizes her position for assuming undivided control over the affairs of the unfortunate country so situated.

Heading III. We omit as not closely connected with the subject.

IV. THE DEVELOPMENT OF VLADIVOSTOCK.—Vladivostock has its advantages and disadvantages. The water in the harbour is deep and the anchorage good and the ships are protected from violent winds. For war purposes the place is decidedly advantageous in some respect; the entrance to the port is narrow and the ships inside are not capable of being seen from the sea and could not be attacked from the ocean. In blockading the port two separate fleets would be required, one on each side of the island that is situated at its entrance. But over against this we have to set the fact that for four months in the year the port is ice-bound, when the ships get covered with barnacles and weeds. Then during May, June, July the coast is wrapped in thick fog. Then, the port being situated at the end of a peninsula, it would be possible for an enemy that had succeeded in effecting a landing to cut off its communication with the mainland. Even when the Siberian Railway is open to Vladivostock it will be at least 20 years before it will be possible to send a large number of troops to the Far East by this route. No Power would dream of despatching a large army to such a distance from headquarters without establishing a very reliable line of communication. The object of the Siberian railway is primarily the development of Siberia, and its use for military purposes is a very secondary consideration. But after all the important thing to bear in mind is that even supposing that Vladivostock were a much better place than it is, unless Russia's position as a sea-power were pre-eminent she could make little use of it beyond using it as a refuge and a hiding place for her men-of-war when threatened by a superior naval power. So that the whole of the question between Japan and

Russia resolves itself into a question of naval supremacy. If it comes to a life and death struggle between the two countries it will be on the ocean that the contest will be decided. This fact we commend to the consideration of statesmen.

V. THE SEIZURE OF MANCHURIA.—It is impossible for us to forget that as a country we have a great grievance against Russia. She worked up an alliance to drive us out of Liaotung on the plea that our presence there endangered the peace of the Far East, and then subsequently she herself appropriated what we had abandoned. Can Japan submit to such treatment. Do not the wrongs we have received make us one with China in regard to Russian aggression?

VI. THE PORT ARTHUR SCHEME.—Vladivostok having insurmountable difficulties connected with it, as show, above Russia has to fall back on Port Arthur. But for a country whose whole fleet is no larger than that of Russia to have naval bases as far removed from each other as her Baltic and Black Sea ports from Port Arthur and Vladivostok is a source of weakness. A fleet scattered here and there is apt to fall into the hands of a naval power that can concentrate her forces at short notice. With England to be reckoned with, is it likely that Russia will ever be able to carry out any ambitious naval schemes in the Far East? This spring it was reported that Russia intended to increase her Far Eastern fleet to 61 vessels. But this was an idle threat that she has not the power to make real. Russia does not possess a fleet sufficiently large to allow of her sending a large number of vessels to the East. Then she has no docking facilities nor stores in this part of the world to warrant such a step. It is part of Russia's policy to keep on friendly terms with as many Powers as possible. But England is a Power that she cannot well get over, and Japan can never be other than offensive to her. In the West England, and in the East Japan, is supreme on the ocean and as long as this is so Russia can carry out no great aggressive scheme. She possesses Port Arthur, but it is very much of a white elephant to her.* It is one of the most difficult places to defend imaginable. The part of the harbour where the water is deep enough for big vessels is very limited, and the ships are exposed to attack from the ocean. The entrance to the harbour is so narrow that a single vessel sunk there would obstruct the passage. The land available for buildings or fortifications of any kind is very limited and the defences are all visible from the land side and would prove very difficult to hold against a powerful land force. Then the place is cut off from communication with important towns like Fuchow and Kaiwing. Moreover, in addition to all this, there is that ugly object, Wei-hai-wei quite near that may be likened to the wen that spoils the look of the eye.

VII. THE QUESTION CONNECTED WITH THE SOUTHERN COAST OF KOREA.—Neither Vladivostok nor Port Arthur satisfies Russia as a naval basis and the distance between the two places is a serious drawback. Hence it is that she has eyes in the coast of Korea as a spot that would afford a good connecting link between the two above-named posts. In a naval war with Russia, Japan could attack Port Arthur and Vladivostok separately. Russia would find it as hard to get through the Tsushima Straits as French ships would through the Straits of Gibraltar. If in such a war Japan were defeated she could retire to Saseho or to Takeshiki and prepare for renewing the conflict. But Russia would possess no such advantage. Hence it is that the question of her forming a station at Masampo, Chinhaï, Koje island has been raised and it is not at all probable that Russia will allow this matter to rest as it is now. On the other hand if Japan allows Russia to establish herself in Southern Korea, Japan's possession of the Sôul-Fusan railway will

be of little use to her. Hence the question of Russian encroachment in Korea is one of vital moment to this country. As long as Korea exists Russia is bound to try her best to obtain a footing in that country, as on this largely depends her position as a naval power in the Far East. If Russia is allowed to attain her object in this particular she will be in a position to defy us in a way she cannot afford to do now. If at any moment she should inaugurate measures for the accomplishment of this purpose what should be our attitude as a nation? This is a question which demands serious consideration. The book breathes a tone of earnestness throughout and is both lucid and unreserved. It will doubtless attract much attention.

The *Gunjin Nichiyô no tanoshimi* (Sunday pleasure for Soldiers) is a happily conceived and well written work published by the Heirin-kan. The material used is culled from ancient history and consists of stories of the brave deeds and the self-sacrifice of warriors in by gone days. The aim of the work is to keep ever before the eyes of soldiers a high ideal of duty.

The *Kôsen* (交戦) *Hanron*, price 60 sen, issued by the same publishing house, composed by Mr. Shimomoto Seimin, is a general work on the art of war which aims at presenting in a clear manner the opinions of the best European and American writers on military tactics, strategy and the comparative value of various weapons.

* * *

A new magazine of a very promising type that bears marks of strong support at its back has just made its appearance. It is called the *Kyôiku-kai* (The World of Education). In size and get up it approaches very near to the *Tûjyô* standard. The first number covers 165 pages and contains many illustrations. In its opening pages it asserts that all the existing magazines that treat of education are run by partisans and consequently are not altogether liable. Before all things this new publication promises to deal impartially with all questions. In the first number Dr. Inoue Tetsujirô writes on "The Past and the Future of Education" and draws a very interesting comparison between the tendency of thought in the West and the East. Dr. Inoue observes that the Greek philosophy is the basis of all our progress in the past. It was that that gave birth to our science and that constituted the foundation of our best political institutions. Greek development was essentially intellectual and hence in all branches of knowledge where acuteness of mind is a *sine qua non* of progress the West has always been far ahead of the East. Oriental education is strong on the moral side, but very weak on the intellectual side. Socrates and Confucius may be said to represent two distinct types of teaching. Though Socrates discovered much of morality he was before all things a great thinker and a leader of thought. Confucius never attempted to solve intellectual problems. He simply taught morality, and among his 3,000 odd disciples there is hardly a man who could be called great intellectually. Japan and Korea followed in the wake of China in former days, but of late Japan realising the defects in the Oriental system of education has imported wholesale from Europe and America and is now in danger of overdoing the development of intellect and forgetting the value of a high moral standard. Here Dr. Inoue enunciates his well-known views on the necessity of making education wholly subservient to the permanent and highest interests. He has much to say that we have no space to reproduce here. We must postpone the notice of other articles in the *Kyôiku-kai* to next month.

BULLER'S FAMOUS SPEECH.

As some of our readers may not have had an opportunity of perusing the full text of the now famous speech delivered by General Buller at the Queen's Westminsters' luncheon on the 10th October, we reproduce it below:—

Sir Redvers Buller, who was cordially received, after acknowledging the hearty reception of the toast, said:—Sir Howard, with regard to your reference to this detachment of your regiment, they served in

South Africa with, what I know they will not complain of my saying, bad luck. They were caught for probably the most disagreeable and the least pleasant of all soldiers' duty—work on the line of communications. At the same time, there is no work more important; there is no work that calls more thoroughly, more exhaustively I may say, for the discharge of the higher duties of a soldier, that makes a greater tax on discipline, or that tries the moral character of the individual man more fully and more heavily. So far as I know—and I think I fairly know—they performed their duties most admirably—(cheers). While I am speaking to soldiers, and to good soldiers, I want to send out a message to those of their comrades who remain behind in Natal, who are at this moment bearing as much the brunt of the end of this war as any other troops are. What I want to say is this, that I do not think through this war the Army has been given fairplay. Men have to do this, or that, or the other. The opportunity comes, the question to be decided is presented to them and a decision has to be arrived at all in one moment. This action may be successful, or it may not be successful; but so long as they do their best, in my opinion, you ought to, and we all ought to, and, as a rule, the British public does, support the man who does his best (cheers). It is not everybody that does so, and especially, I think, is the want of that duty noticeable in some, at any rate, of the newspapers of this country (cheers). During the whole of this war, from the very beginning of it, some of the leading newspapers of this country, and especially those of this Metropolis, have, apart from where they had especial things they were obliged to put in, devoted more space to finding fault with their countrymen than to praising them (hear, hear). I tell you, ladies and gentlemen, that the result of that has been, in my humble belief, to a great extent, one of the causes of the continuance of this war (hear, hear). There are lots of gallant Englishmen. Scotchmen, and Irishmen who will risk their lives for their country at anybody's bidding, but when it comes to risking their lives and to knowing that if they are not successful it is not only their lives, but their fair fame, their character, and their conduct that will be assailed by a certain number of writers in the Press, and that their belongings will be struck at by them in an unfair and an improper way, then, I think, you ask almost more than human endurance can carry out (cheers). I am here, talking to members of the Natal Army, and in that Army we had a gallant fellow, as gallant a fellow as, I believe, has ever been in any Army. We used to call him by two names. We sometimes called him "Good little Gough," and sometimes "Gallant little Gough," but I do not think we ever put any other adjective to it. That little man has commanded Mounted Infantry in the field now for two whole years, and I question if there has ever been a week in which he has not been in great personal danger, and I doubt if there are many days for two years on which he has not been under fire. He was out the other day in a very difficult country. He saw some of the enemy, and he chased them, as he would, because it was the proper thing to do, and they led him into an ambush, and he lost a large number of his men. Without any reference to his two years' previous history—and there are many of us who can instance several occasions on which he has done singularly good service—some newspapers said:—"This is another instance of the extraordinary manner in which officers throw their men away by neglect of ordinary Military precautions." That is the sort of criticism made upon his conduct. Now, I do not think it is fair. I know that particular place well. Two-and-twenty years ago I was in charge of Mounted Infantry, and had the duty of protecting convoys through that very country. The first time I went through it—I believe it was the identical road—I said to my General, "I am not going through that place again without 500 if I have got a convoy to protect." He said, "We will go and see it tomorrow at daylight." We went, and he said, "You are quite right; I will put a fort here." And during the months I was at Kambula that fort eased my mind a great deal. We called it in those days Boulter's Spruit. It is now called Scheepers' Nek. It is a most difficult place, and I do not care who the cavalry leader is, unless he has got a very large force with him, he could not possibly safeguard a convoy through that country in a fair attack. Well, Gough got caught when he was chasing the Boers. What ought he to have done except chase the Boer at the end of the war? We have got to finish this war, and the only advantage we have is the advantage of numbers. For every man we knock one chalk off. For every man we have killed we have two Volunteers to put in his place (cheers). That is our chance. We are fighting against every possible disadvantage in this sort of fighting. We do not shoot natives if we see them walking round our camp, and if we do not shoot them they take back information to our adversaries. We cannot talk the language—the two languages, in fact—that we ought to know. As you see by the police reports

* The expression in the original is a "tiger's cat." This simile usually bears a different meaning, being applied to something very valuable. Here perhaps a "dangerous possession" would be the best rendering of the original, but white elephant is near enough.—(WRITER OF SUMMARY).

yesterday, wherever we are we have traitors in our midst. How can an Army be expected to get through a difficulty of that sort unless it is fairly and properly, and decently supported? In my opinion every single man who risks men and loses men now, so long as he kills one Boer, ought to be praised by the Press and not abused. It is not fair, it is not decent, and it is not calculated to finish the war (cheers). I have received hundreds of letters all in this strain asking me if I can do something to help to remove the funk they are in of being found fault with if they lose a man. We cannot finish this war without losing men. Guerilla warfare requires fighting, and, consequently, sacrifice. There are men out there, gallant men, good Englishmen, Irishmen, and Scotchmen, who will fight, if you will let them; but if, when they have fought and done their best, you find fault with them, they become discouraged (hear, hear). The father of that lad, a gallant officer himself, a man who has gained the Victoria Cross, writes to the papers, and says, "Don't abuse my son till you know the truth." And what do some of the papers do? They put in his letter, it is true, but they also put in a footnote calling attention to the paragraph objected to, and thus spread the scandal. I ask you gentlemen of the Press to take that message to the Press, and I ask you all to write out to your comrades in Natal, and say that it is not really the wish of the people of England to have this sort of thing put in papers (cheers). So much for Natal. I have been attacked myself. I do not care what they say about me (laughter). A comrade wrote me the other day. He said, "I know you do not care about it, but your Army does, and they are furious." I want to say a few words about myself (cheers). I know that there is a correspondent of the *Times* here, and I want to send a message to that journal. I came home in November last, and took over the Aldershot command on January 10. In February I got a letter from a man. I admit he was not a respectable man. I had never seen him in my life. I had heard of him, and knew about him, and he wrote to me to the effect that I had let him out of prison. If it was done it was done in my name. He particularly wished to see me, and asked whether I would give him an appointment in London. The man was what I should call an international detective, or possibly, a spy. He is an old man, and he has been at it all his life. I did not want to give him an appointment, I was afraid of being put in a hole; but I wrote asking him to meet me at Aldershot. He came down and told me a lot of interesting stories about the Secret Service of the Transvaal, and how stupid we were, and how we allowed ourselves to be deceived, and how he got his information through. I then said, "Well, I am really rather busy and very much interested in your stories, but perhaps you have come down to tell me something else." He said, "I have," and continued, "Well, the other day you published a paper about Artillery, didn't you?" I said, "Yes, I did." "And you were told to withdraw it," I said, "Yes, I was?" He said, "You have got money to live upon. Give up the Aldershot command"—(laughter). I said, "Thank you very much, but I do not know that I need." I said "Why." He said "I will tell you: you have got enemies, not exactly enemies, but men who mean to get you out of the way, and they will do so. You had better get out quietly and happily." I said "I do not know what you think. I am a fighting man, and what you have told me will make me much more likely to stay." "Well," he said, "as I stand before you, I came to tell you this as a favour." Of course, I did not ask him for names. As he was going away I said "Of course, if it is necessary for me to use this information I shall do so," and he said "You can't." So I tell the story to-day. It is a curious thing that a fortnight ago a few of the London papers brought out on the same day articles against me. It might have been an accident. Probably it was. However, it was a coincidence. They were all on the same day, and they all attacked me in the same manner. But whether they attacked the Government through me, or me through the Government, with the idea of kicking me out and putting somebody else in, I do not know. I read only one of the attacks, and that was the one in the *Times*; but I believe there were others in the *Morning Post*, the *Spectator*, the *Statist*, the *St. James Gazette*, and others. However, I will deal with the one in the *Times*. I was attacked. It was said I was unfit to be commanding the first Army Corps at Aldershot. I should not have cared sixpence for that attack. The only reason I have cared for it is this, that a good many people wrote and said, "You should answer." I said I did not care to. A friend wrote to me and said, "If you don't mind I shall send a letter to the *Spectator*." By the same post another man sent me a later issue of the *Spectator*, in which I saw that an officer who had served under me had kindly written a letter that I did not ask him to write. So far as I know, I do not know the man, but he wrote a letter in which he complained of the *Spectator* judging me without any real evidence before them. At the end of his letter he made a reference that was simply

repeating a conversation that is common among a class perhaps not so highly educated as we are here. The *Spectator* published it, but the Editor tagged on to it a tag, that I considered a vulgar tag, a stupid tag, and a tag I thought showing a want of education. He claimed the right to base experience on a single incident. At school they taught me not to argue from the particular to the general, and he really tried to turn this poor honest friend of mine, who was not, perhaps, a skilled debater, into ridicule. But the Editor said one thing for which I thank him—he accused me of reckless courage. Reckless courage is a quality I should like to possess, but, unfortunately, I have never been gifted with it all my life. If ever I displayed reckless courage in my life, I assert, and possibly some day I may prove, that I displayed reckless courage in having in my pocket the very telegram that he talked about, in which I was ordered to do something which would have involved the loss of 2000 or 3000 men. I withdrew the men because I thought they could not get through, and I would not lose a man unless I thought I could get something for it (cheers). I am only making this speech because I find that I cannot hold back my own friends, and if there is to be a row, and if there is to be discredit, I would far rather get it myself than any other man should get it for me. That is why I have opened my mouth. The *Times* has attacked me by way of a letter from "A Reformer," who may be, for all I know, a penny-a-liner or the greatest man in the world; at any rate he is an anonymous scribe. The *Times* says I am not fitted to be in command of the first Army Corps, and I assert that there is nobody at this time in England junior to me who is as fit as I am (cheers). I challenge the *Times* to say who is the man they have in their eye more fit than I am. I challenged the *Times* a good many years ago, at a time when they were discussing the best rifle, to say which was the rifle that was better than what was then called the Lee-Metford. They were writing at the time several articles describing a rotten Government, a stupid Government, the ridiculous War Office which had adopted the worst rifle in the world. At the end of their articles they showed the cloven hoof by saying the Godsall rifle was better, and abusing me for standing up for the Lee-Metford. Well, the Metford has been in the hands of over 200,000 British troops for two years, and every man is satisfied and confident with it, whereas the Godsall rifle of the *Times*, so far as I know, has never been heard of since. I do not believe one has ever been made (laughter). They have attacked me, and they say that I wrote a telegram in which they say I ordered Sir George White to give up Ladysmith, and destroy his stores, and so forth. They say that I wrote a great many telegrams, and I certainly wrote one telegram which admits partially of that description. I wrote and received a great many telegrams to which I cannot refer, because an officer who is an officer in a large Army, if he is of high rank, is merely a partner in a large concern. I should be the last man to stand forward and say, "I am not guilty of this; I only did it because some one else did that, and because some one else did something." We must stand or fall together. The war is still going on; we are all fighting for the country, and so far as I can I would strengthen then the hand of every man now in the Army and now in authority. God forbid that I should try and defend myself at the expense of anyone. But with regard to this particular telegram I stand absolutely alone. It is I, and no one else, and, therefore, I have not the least objection to tell you the story, especially as I am going to end up with a challenge to the *Times*. I attacked Colenso on the 15th December. I was unsuccessful. It was a very trying day. I was at work thirty-six hours and in the saddle fourteen hours. It was the hottest day of the whole year, and I had rank bad luck. I still believe and hope to show that, if I had not had bad luck, I had enough men to get in. But that is another story. I attacked Colenso and failed, and having failed, I had to consider, not myself, but the people in front of me—the garrison of Ladysmith. As far as I knew then, my appreciation of the situation was this. There was a very good man holding Ladysmith. I am not ashamed to mention the report I made to the War Office of my opinion about him the very day he was shut up. I said I did not know him well, but I had met him once or twice, and that, as far as I knew him and had seen him, I did not know that there was another man in the British Army I would sooner have selected to hold a beleaguered garrison (cheers). I knew that horse sickness was almost certain to come—very heavily and strongly in the Tugela Valley. I knew that enteric fever was epidemic, and almost continuously becoming epidemic, in the Tugela Valley at that time of the year, and knew, or thought I knew, that the Boers were putting dead horses in the water which the garrison of Ladysmith were obliged to drink. I was in great fear that whatever other misfortune happened to that garrison, they would have immense trouble with their sick and great suffering with those of

their garrison who were sick. The whole of the Staff were shut up in Ladysmith. I thought I knew that I had official information in writing that the garrison could not be fed beyond the end of the year. I was wrong, I have found out since. At that time I thought that and believed it. It was then the 15th December—the end of the year was 15 days off. The message I had to send to Sir George White was that I had made the attack and that I had failed, and that I could not possibly make another attempt for a month, and then I was certain I could only do it by slow fighting and not by rushing. That was the message I had to send, and had to ask him certain questions. I wrote a telegram out and looked at it two or three times, and said:—"It is a mean thing to send a telegram like that. He is a gallant fellow. He will sit still to the end." I was in command; whatever responsibility there was was mine, and I thought, "Ought I not to give him some help, some assistance, and some lead, and something which if it came to the last absolute moment, would have enabled him to say, 'Well, after all, I have Sir Redvers Buller's, as my commander, opinion in favour of this.'"

Therefore, I spatchcocked into the middle of the telegram a sentence in which I suggested that it would be necessary to abandon—to surrender—the garrison; what he should do when he surrendered, and how he should do it. I put it between one question he had to answer, and followed it with another question. I did not like to suggest to a man I believed to be a brave man and a good soldier—I did not like to suggest that he should do it, or that, or the other, but I stuck that into the thing simply because if he ever had to give up, it might be some sort of cover to a man whom I thought in much greater difficulty than I was myself. That was the telegram. Now I challenge the *Times* fairly to put forward their scribe "Reformer," to bring him down into the ring. Let us know who he is, by what right he writes, what his name is, and what authority he has. Let him publish this telegram. I know where it is, I believe. It is in the hands of the editor of a magazine who, some years ago, made himself remarkable—notorious—not, I should think, popular—by raking over the garbage of a fifty year-old story, and dishing it up hot, and insulting an old and valuable public servant. That is where it is. It must have been stolen, because it was a cypher telegram addressed to Sir George White, and perfectly secret. I challenge them to produce it, and say how they got it; and when they do that I will publish the certified copy of the telegram I sent, and the public shall judge me. I am quite ready to be judged (cheers). Let it be understood that I make that challenge as a whole. Please be careful about this, Mr. *Times* reporter: I say "the whole thing," because that is a part. They are not going to draw me by saying that I have got a thing and then not produce it. They are to publish the telegram if they have got it, and say how they got it; and I will then put my official telegram down. It hurts no one else but me (laughter). I make this statement to save my friends. I have not been drawn as regards myself, but I want to keep my own people out of the newspapers.

LATEST COMMERCIAL.

IMPORTS.

As usual during harvest time the market has been very quiet but may live up in a week or two. Nothing doing in yarns; fancy cottons and woollens are not in demand; but something has been done in white shirtings. Stocks of grey shirtings were pretty well cleared out by the end of last month, and fresh business is not expected till next month.

COTTON PIECE GOODS.

	PER PICE.
Grey Shirting—8½ lb, 38½ yds, 39 inches	2.35 to 3.50
Grey Shirting—9 lb, 31½ yds, 45 inches	28.0 to 3.80
Indigo Shirtings—24 yards, 14 inches	2.50 to 3.35
Prints—Assorted, 24 yards, 30 inches	3.00 to 5.00
Cotton—Italians and Satteens, Black, 32 inches	0.20 to 0.30

WOOLLENS.

	PER YARD.
Flannels	Y. 0.35 to 0.50
Italian Cloth, 32 inches	0.30 to 0.45
Mousseline de Laine—Crape, 24 yards, 30 inches	0.16 to 0.33

	PER PICE.
Cloths—Pilots, 54 @ 56 inches	0.50 to 0.95
Cloths—Presidents, 51 @ 65 inches	0.90 to 1.00
Cloths—Union, 54 @ 56 inches	0.60 to 1.00

	PER YARD.
Blankets—Scarlet and Green, 3 to 5 lb per lb	0.60 to 0.66

	PER PICE.
Velvets—Black, 35 yards, 22 inches	9.50 to 12.00
Victoria Lawns, 12 yards, 42-3 inches	0.90 to 1.80
Turkey Reds—2.8 to 3.0 lb 24-25 yards, 30 inches	1.90 to 2.25
Turkey Reds—3.8 to 5 lb, 24-25 yards, 32 inches	2.50 to 3.50

COTTON YARN.

BAD COMPLEXIONS

Dry Thin and Falling Hair and Red Rough Hands Prevented by CUTICURA SOAP.

MILLIONS use CUTICURA SOAP exclusively for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, in the form of baths for annoying irritations, inflammations, and chafings, or too free or offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative antiseptic purposes which readily suggest themselves to women, and especially to mothers, and for all the purposes of the toilet, bath, and nursery. No amount of persuasion can induce those who have once used it to use any other, especially for preserving and purifying the skin, scalp, and hair of infants and children. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the best skin and complexion soap, the best toilet and best baby soap in the world.

Complete External and Internal Treatment for Every Humour. Consisting of CUTICURA SOAP to cleanse the skin and scalp of crusts and scales and soften the thickened cuticle, CUTICURA Ointment, to instantly allay itching and irritation, and soothe and heal, and CUTICURA RESOLVENT, to cool and cleanse the blood. Sold throughout the world. Australian Depot: R. TOWNS & Co., Sydney, N. S. W. So. African Depot: LEKSON LTD., Cape Town. "How to have Beautiful Skin, Hair, and Hands," free. FOTTER CO., Boston, U. S. A., Sole Props., CUTICURA REMEDIES.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, NOVEMBER 30TH, 1901.

SUMMARY OF NEWS.

A PARTY of Japanese soldiers consisting of 87 officers and men left Yokohama for Shanghai on Nov. 21st by the steamer *Hakui Maru*.

ON Nov. 24th the boiler of a locomotive exploded at Shimada station on the Sanyo railway. Fortunately no one was injured.

THE promoters of the Yokohama Railway Company are busily engaged in pushing their business. Recently Mr. Kurihara Ryoichi was added to the list of promoters.

ON the night of Nov. 25th the towns of

Namerigawa, Miyabashi and Fushika in Toyama prefecture, were visited by tidal waves, which inflicted some damage.

HAVING been replaced by Mr. Jordan recently, Mr. Gubbins, British *Chargé d'Affaires* to Korea, arrived at Kobe on Nov. 21st from Korea on his way home.

ON Tuesday it was gazetted that the drawing of the lottery for the redemption of Tokyo City loan bonds to the extent of yen 200,000 would be carried out on Dec. 16th.

ON Nov. 21st, a collision took place at Kaga Station on the Nippon Railway between a passenger train and a goods train, with the result that one passenger sustained injuries.

AMONG the cargo brought by the N. Y. K. steamer *Kanagawa Maru* to Nagasaki on Nov. 24th were 550 tons of iron material from Europe to the order of the Mitsu Bishi firm.

THE death is announced of Mr. Nakamigawa Tarochi, son and heir of the late Nakamigawa Hikojiro, adviser of the Mitsui family. The funeral will take place on Nov. 24th at 1 p.m.

OWING to the death of Mr. Taku, a Chamberlain to the Crown Prince, a few days ago, their Majesties the Emperor and the Empress granted a sum of yen 300 on Thursday to the bereaved family.

By the joint efforts of the Okura Company and the Sakura-gumi, an establishment for the making of shoes and boots will shortly be started in Tokyo. The new company is backed by a capital of yen 200,000.

ON the 20th while a number of fishing boats were engaged in fishing off Tagono-ura they were suddenly caught in a gale. With the exception of a few, the boats were driven out to sea and have not been heard of since.

THE Requiem Mass for the repose of the soul of the late M. Etienne Knaff, celebrated at the Roman Catholic Church, Yokohama, on Monday morning was largely attended. The celebration was very beautiful in all its details.

A COLLISION took place at Saga station on the Kyushu Railway between a goods train and a locomotive on Nov. 21st with the result that a conductor sustained injuries. Several goods carriages were smashed.

A MILITARY lieutenant named Taneda Kumakichi is reported to have committed suicide by jumping from the steamer *Higo Maru* on the night of Nov. 16th while the vessel was on her way from Muroran to Hakodate. The officer was a native of Kochi Prefecture.

THE Governor of Hiroshima prefecture and the Mayor of Hiroshima are reported to have received a notice from the French Republic to the effect that President Loubet will shortly present them with decorations in connection with the Boxer trouble.

AN explosion of fire-damp took place at the Honsho coal mine in Tagawa district, Fukuoka prefecture, on Nov. 26th with the result that two miners were badly wounded and two others slightly injured. The disaster had its origin in a defective lamp.

THE Osaka Chamber of Commerce has reported to the Department of Agriculture and Commerce that the making of glass in Japan has so far developed that the engagement of foreign experts is unnecessary. This statement was evoked by a communication from the Belgian Government to

the Authorities in Tokyo suggesting the engagement of Belgian experts, which was referred to the Chamber of Commerce.

AT the Prefectural Council held at Takamatsu on Nov. 21st, a resolution was passed to the effect that a subsidy of yen 27,634 should be asked from the Treasury as a supplementary fund for carrying on the work of constructing a port at Takamatsu.

NOTICE is given that during the construction of a beacon light, on Sengai Rock, south-east of Nasakejima, Province of Suwo, a red light, 15 feet above water has been exhibited on a wooden scaffold. Should the light go out by accident there may be some delay before relighting it.

NEW and improved letter boxes, painted red, have recently been placed at various important business centres in Tokyo. The new boxes are reported to have proved a success from every point of view. Messrs. Tawara and Nakamura are the inventors.

THE drivers in charge of the Odawara Electric Railway went on strike on Nov. 24th and traffic on the line was stopped for a time. However, the strikers having been promptly replaced by others of the company's staff, business was resumed in the course of the day.

THE Yokohama Harbour Office will be removed in the near future to the foreshore to the north-east of the present building, where reclamation work is now going on. The offices of the Water Police near by will be removed to the site now occupied by the Harbour Office.

SOME time ago we stated that an application has been made by several transportation companies to the Yokohama Silk Merchants' Guild for an advance in the cartage fees in this port. It is now reported that the application having been accepted an increase of two *rin* per case has been effected.

IT is reported from Nagano, Shinshu, that Mr. Uchida, Japanese Consul in New York, who recently returned home, arrived at Uyeda on Nov. 26th for the purpose of inspecting and encouraging the silk industry in Shinshu. During his stay the Consul will deliver speeches at various places with a view to further developing trade between America and Japan.

A SERIES of regulations relating to emigration companies was recently issued by the Foreign Office. According to these rules, the amount of security to be deposited before an emigration company is organized is increased from yen 10,000 to yen 30,000 and it is stated that whenever emigrants are shipped abroad a payment of yen 10 per emigrant must be made by these companies.

THE celebration of the "Shinshō-sai" was duly observed at the Imperial Palace on Nov. 23rd in the presence of a large number of dignitaries, including Princes of the Blood, Ministers of State and others. Holders of ranks and of decorations also presented themselves at the Palace the same morning in honour of the occasion. The day was observed as a holiday in Yokohama and the foreign banks were closed.

AN application for permission to lay an electric railway in Osaka has been made to the Communications Department by Mr. Yagi of Tokyo and others interested in the undertaking. According to the idea of the promoters it will be laid from Umeda station to Higo bridge, whence the system will be changed into an elevated railway in connection with Minatomachi station on the Osaka railway on one side and the Nankai railway on the other.

DOMESTIC POLITICS.

Saturday, Nov. 23.

The air continues to be full of rumours about political complications. They are very interesting, doubtless, and very exciting to these engaged in them, but the general public has grown quite weary of the whole kaleidoscope. It is enough to know that the principal political party, having made up its mind to assume an attitude of opposition to the Cabinet, has chosen finance as a bone of contention, and is determined to insist that the proceeds of taxation must not be applied to State enterprises, and that the money accruing from the increased imposts fixed by the Diet last session must be employed for restoring the Capital Funds and for paying the expenses of the Chili campaign and for no other purpose. To casual observers it seems a natural and proper course that since the Capital Funds were taken—or, to speak more correctly, since 20 millions was taken from the Naval Fund—to meet the outlays in China, and since the Government further contracted a debt on that account, the Fund ought to be restored and the debt paid out of the indemnity exacted from China. But if the *Seiyun-kai* determine to adhere to the letter of the law, they can certainly insist that the 21 millions which will accrue next year from increased taxation, must be applied solely to the purposes for which they were voted. It is at all events satisfactory to know that there is a definite and intelligible issue, and that personal influences are not to have complete control of the situation.

Meanwhile the non-parliamentary members of the *Seiyun-kai* are beginning to be busy. They are to have a grand meeting on the 27th or the 28th instant, and by way of preparation they are said to be discussing the propriety of bringing strong pressure to bear upon the moderate section of the Party's Committee-men—the section who hold that frequent changes of Cabinet are injurious to the country's reputation; that questions ought to be decided on their merits not from party points of view, and that Marquis Ito's injunction ought to be obeyed. These outside gentlemen are said to be quite uninfluenced by such considerations. They want a thoroughly unequivocal attack upon the Ministry, and they mean to marshal the forces of the Party under a standard of "no compromise."

The Imperialists step into the breach like a forlorn hope, and at the head of their small following—some 13 in all—announce that, as they declared themselves in agreement with the Cabinet's programme when the present Ministry came into power, they have no new statement to make now. They stand, in short, where they always stood. But their power of influencing the issue is small.

The *Nichi Nichi Shinbun* calculates that owing to 13 changes in the membership of the Lower House since last session, the strength of the parties there when the Diet meets, will be, *Seiyun-kai* 158; Progressists 69; Imperialists 13; the Two or Three Club (Baron Kusumoto's following) 31; and unaffiliated 29.

Monday, Nov. 25.

The *Seiyun-kai*'s northern sections held a general meeting (*Tohoku daikai*) at Sendai on the 23rd instant and passed a number of resolutions, in which we can not discern any evidence of the hostility to the Cabinet which is supposed to animate the Party at present.

Mr. Hara Kei was in the chair, and Mr. Hara is supposed to be a leader of the anti-Ministerial movement. Yet the resolutions were couched in the vague terms which always indicate indecision. There were the stereotyped declarations as to administrative and financial reform, and there were motions relating to education; but there was not a single word to indicate that the budget mapped out by the Cabinet is to be a target of assault, or that the *Seiyun-kai* as a body objects to the Ministry's manner of dealing with the funds at its disposal. In short, the inference suggested by the resolutions is that the Party has changed its attitude.

There are two explanations of this sudden access of serenity. One is that although the principal members of the Party's General Committee are in favour of attacking the Cabinet, the Party as a whole does not endorse that policy, and there being no longer a Hoshi Toru to kindle into flame the smouldering embers of pugnacity, nor a Marquis Ito to lead the Party to certain victory, the recent ebullition of hostile energy has been replaced by a mood of mild reflection. The other and much more probable theory is that the wand of Count Inouye has been stretched over the troubled waters. Count Inouye was specially requested by Marquis Ito to administer an anodyne whenever any occasion arose during the latter's absence, and he has now fulfilled the behest with his usual ability. But those advancing this latter explanation add that Count Inouye does not feel altogether confident about the situation, and that he has telegraphed recommending Marquis Ito to abbreviate his sojourn in Europe as much as possible.

Wednesday, Nov. 27.

The Doshi Club held a general meeting in Fukushima on the 25th instant. This Club consists chiefly of the Two or Three Club, to which some allusion was recently made in our columns. It is under the leadership of Messrs. Kudo Kokan, Oishi Masami, Kono Hironaka, Okuma Hidemaro, and Shiba Shiro. From the resolutions passed at the Fukushima meeting it appears that the association occupies a middle place between the Progressists and the *Seiyun-kai*, sharing the views of each party within certain limits. As usual its platform is vague, one of the few really emphatic planks being that the old rate of the land tax must be restored as speedily as possible; a proposition which we regard with the utmost disapproval, being persuaded that the land tax is eminently a burden which might be increased with advantage. The Doshi Club has not strength to give currency to its opinions, but it may come to exercise considerable power should the general elections next year lessen the marked inequality now existing between the Progressists and the *Seiyun-kai*. In that event the balance will be in the hands of the Doshi Club.

At the meeting of the Preparatory Committee of the Tokyo Branch of the Progressists it was decided that a general meeting of the Party should be held in Tokyo on the 5th of December. There was much discussion, opinions differing greatly as to the wisest policy for the Party to pursue at this juncture. Only one resolution obtained a majority vote, namely, that while endeavouring as much as possible to restrict the dimensions of State enterprises carried on with borrowed money, the Cabinet was nevertheless justified in using surplus revenue for the purposes of such enterprises. That is directly opposed to the view said to be taken by the leaders of the *Seiyun-kai*.

The Kyoto branch of the *Seiyun-kai* held a meeting in that city on the 23rd instant, Baron Kaneko being present. The usual resolutions in favour of administrative and financial reform and official improvement were passed, and the meeting further voted that surplus revenue must not be applied to defray the cost of State enterprises.

It must be evident to our readers that the bone of contention in the approaching session of the Diet will be the manner of dealing with the proceeds of increased taxation; in other words, with the surplus revenue. The increased taxes were voted expressly to defray expenditures connected with the Chili campaign and to restore the sums taken from the Capital Funds. But the Cabinet now proposes to devote the Chinese Indemnity to that purpose, and to use the proceeds of taxation for State enterprises. The thing is just as broad as it is long. From one point of view it would be equally rational to require that a man should discharge his obligations with coins specially selected from the stock in his pocket. But if the *Seiyun-kai* leaders have definite views as to the manner of dealing with the Chinese Indemnity, the question assumes a different aspect. Supposing, however, that the increased taxes are to be applied strictly to the avowed purposes of their imposition, and that the Indemnity is to be otherwise used, then the inevitable result will be that no funds being available for State enterprises, these must be suspended.

Thursday, Nov. 28.

Mr. Ozaki Yukio, who is nothing if not thorough, made a vehement speech at the meeting of the *Seiyun-kai* in Sendai. It is unnecessary to follow his remarks in detail. The gist of them was that he regards the Katsura Cabinet as a clan ministry and therefore incapable of carrying out effective reforms; that he disapproves of its financial policy; that he does not believe in the possibility of converting the Chinese Indemnity bonds into money; that he considers the standard of his Party is being trampled in the dust, and that to fight appears to him an inevitable necessity. The mantle of Mr. Hoshi Toru has fallen upon Mr. Ozaki Yukio. Yet the two men were once bitterest opponents. Is it not a strange turn of the wheel of fortune that Mr. Ozaki should now be leading the Party which formerly obeyed every wave of Mr. Hoshi's baton?

Friday, Nov. 29.

On the 27th instant at 3 p.m. an important meeting took place in the Imperial Hotel, Tokyo, for the purpose of amalgamating the *Keizai Kenkyu-kai* (Economic Investigation Society) and the *Tokyo Shokō Sōdan-kai* (Tokyo Economical and Industrial Consultative Society) into the *Tokyo Shokō Keizai Kenkyukai* (Tokyo Commercial and Industrial Economic Investigation Society). Baron Shibusawa was appointed President of the new Association, Mr. Okura Kihachiro, Vice-President, and to Mr. Inouye Kakugoro was entrusted the duty of drawing up a report. After the measures of organization had been completed, a *conversazione* was held, and was attended by the Minister President of State, by the Minister of State for Finance, by the Minister of State for Justice, by the Minister of State for Education, and by the President of the House of Representatives.

Viscount Katsura delivered a short address, the gist of which was that being a soldier he did not profess to know much about politics, but that he had learned the value of unity and discipline from serving in the army, and

that he desired to urge upon his hearers the importance of those qualities.

The Minister of State for Finance also spoke of the benefits of union, above all in affairs of commerce and industry. He cited the case of America as showing what splendid results could be obtained by adhering to the principle of combination and cooperation.

Mr. Kioura, Minister of State for Justice, made some interesting remarks. He did not deny that there were miscarriages of justice at present, but he claimed that however excellent the Commercial Code might be, fuller acquaintance with its provisions was essential on the part of those administering it, and therefore the public must have some patience. The most skilful actor in the world could not be expected to perform in a new role entirely without mistakes. Fortunately Japan possesses a Court of Cassation presided over by experts whose judgments serve to unify the procedure of minor tribunals. Meanwhile the Government was closely watching the operation of the laws and would not fail to effect any amendments indicated by experience. It had been found that the Law of Bankruptcy was defective in one respect, and a bill for its correction would be introduced next session.

The point alluded to by Mr. Kioura in the case of the Bankruptcy Law is that failure to take up a bill involves bankruptcy (*hasan*) in the case of a merchant or manufacturer, but only liquidation (*kashi bunsan*) in the case of a person not engaged in trade. To the former the provisions of the criminal law are applicable in the event of any fraudulent procedure, and the debtor has to give up the whole of his property; whereas questions relating to *kashi bunsan* are decided by a civil tribunal—manifest fraud excepted, of course—and the insolvent person has many opportunities of making away with his property. It appears that of late a custom has sprung up of drawing bills in the course of business and then abandoning the pursuit of trade or industry before the bill falls due, so that failure to meet it exposes the debtor to *kashi bunsan* only.

With regard to the Minister's plea for a longer time in order that the judiciary may acquire fuller experience of the Codes, Mr. Kioura doubtless referred to a matter which is causing much dissatisfaction in business circles, namely, the decision of the law courts that unless a bill payable in Tokyo carries the word "Tokyo," it is not a legal instrument. Thus, although the place of payment were indicated as such and such a number in such and such a street of the Azabu district, or the Nippon-bashi district, the document would not be valid unless the word "Tokyo" were added. When that ruling was given by a minor tribunal, there was a great outcry among the merchants and manufacturers of Tokyo. But the Supreme Court has now confirmed the judgment. Nevertheless, business men are not content, and Baron Shibusawa has strongly condemned the decision, declaring that the courts sacrifice the spirit of the law on the altar of the letter. It seems to us, however, that the courts could not decide otherwise. Accuracy of description and designation is surely essential in such matters, and a business man can scarcely complain of being obliged to add the word "Tokyo" when his transactions are in that city.

There is a report that the Osaka Shosen Kaisha has opened negotiations with a London bank for the introduction of foreign funds which will be utilized for the carrying on of the expansive programme of that shipping enterprise.

CHINESE NEWS.

Saturday, Nov. 23.

The palm must be given to the return of the Chinese Court as a basis of conflicting rumours. From week to week, almost from day to day, some different story has been told to the public. Yesterday, we were confidently informed that owing to Prince Ching's representations, their Majesties had decided to set out from Kai-fong on the 25th. To-day, the telegraph says that they have decided to defer their departure until the receipt of reports from Ching and Wang Wen-shao.

Mr. Tsai, the new Chinese Minister to Japan, was interviewed just before sailing from Kobe for Yokohama on the 21st instant. He said that the Court would certainly leave Kai-fong on the 20th of the 11th month, new reckoning, but that the Empress Dowager, whose age renders it dangerous to expose her to great cold, will not be able to set out before next spring. Mr. Tsai ridicules the report that the Court will make only a brief sojourn in the capital and will then remove permanently to some other place.

Mr. Tsai is further represented as alleging that Yung Lu is the only man who can succeed Li Hung-chang.

Japanese newspapers state that some public-spirited men in Anhui have decided to establish an agricultural school there and that they have sent a representative to visit Viscount Nagaoka in Japan, for the purpose of consulting with him as to obtaining teachers in this country and making other arrangements for opening the school.

The Chinese officers who attended the manoeuvres gave a dinner to their Japanese friends at the Imperial Hotel on the 29th instant, and Mr. Pok, the Korean Minister of Foreign Affairs, Major-General, Member of Privy Council and Minister Plenipotentiary, is to give a dinner in all his capacities on the 24th instant.

Monday, Nov. 25.

The latest about the Chinese Court is that it will leave Kai-fong on the 30th of November and reach Peking on the 20th of December.

Prince Ching is expected to get back to Peking on the 29th instant, when the Manchurian negotiations will be re-opened.

Yung Lu is now beginning to be the target of much unfavourable criticism. He is said to have hitherto been playing a waiting game, seeing how the wind would blow, and to have no thought of country or nation comparable with his solicitude for Yung Lu. He it was that urged the Court to remain permanently at Kai-fong, and he it was that attempted to impeach Prince Ching. He is more pro-Russian than ever Li Hung-chang was, and he has strong selfish reasons to be so; for whereas Li honestly regarded Russia as the best bulwark China could have against foreign aggression, Yung Lu regards Russia as the best bulwark Yung Lu can have against the resentment which his conduct has aroused in the breasts of the representatives of other States. With Yung in power, all the officials incriminated on account of the Boxer trouble may rest easy on their pillows, for he is "a fox of the same hole."

That is all very striking, but in the meanwhile where will Prince Ching and Viceroy Yuan come in? Ching has been entrusted with the duty of effecting a settlement of the

Manchurian problem, and since Russia at present is in a decidedly placable mood, there is reason to hope that the settlement may take a character calculated to restore a feeling of security to the East. Viceroy Yuan has been entrusted with the command-in-chief of all the troops in Chili, and he will be a very serious person to reckon with. It does not appear that Yung Lu, even supposing him to be such a very evilly disposed person as his enemies allege, will have a walk over.

It appears that the recently circulated report of the death of the Viceroy of the Two Kwang was incorrect. The *Asahi Shimbun* has a telegram that the Viceroy is steadily recovering from his illness.

Thursday, Nov. 28.

There is a rumour published that Russia has decided to modify the terms of the Manchurian agreement so as to facilitate its conclusion. That is very likely, we imagine. The peace party has the upper hand in Russia at present, and these questions are sure to receive moderate, perhaps even liberal, treatment. If it be true, as there is good reason to think, that the latest proposals for an agreement came from the Chinese side, then we may conclude that Chinese statesmen appreciate the advantage of availing themselves of Russia's present mood. The fact that Russia's susceptibilities, as well as her rights, have to be considered is too often lost sight of by publicists discussing the Manchurian question. Undoubtedly were England in Russia's place, Englishmen would consider that their country had a good title to speak authoritatively about Manchuria's immediate future. We must concede a similar title to Russia, and Japan also may be expected to recognise that Great Powers have to be tenderly treated.

It is rumoured that a telegram from Kai-fong to Viceroy Yuan speaks of the Court's probably setting out on the 2nd of December, and intimates that the Empress Dowager will proceed with the Emperor. Indeed, if the Empress Dowager remained at Kai-fong while the Emperor goes to Peking, a very strange situation would be created.

Friday, Nov. 29.

A telegram to the *Asahi Shimbun* says that the British Representative in Peking, Sir Ernest Satow, informed Prince Ching on the eve of the latter's departure for Kai-fong, that His Majesty's Government did not desire to see Yung Lu return to Peking. Prince Ching replied that such a question would give much trouble, but that as he personally was of the same opinion as Sir Ernest Satow, he would memorialize the Throne in that sense. Should the Throne agree, doubtless Yung Lu would be appointed to a provincial post before the Court left Kai-fong.

Another telegram to the same journal says that the Peking Authorities have been informed that the Court will set out from Kai-fong on the 3rd of December.

The Japanese Committee for converting the *ad-valorem* duties of the Chinese tariff into specific duties consists of Mr. H. W. Denison, Mr. Kurachi, Mr. Yamaoka and Mr. Nishiyama. Mr. Kurachi acts for both the Foreign Department and the Finance Department; Mr. Yamaoka belongs to the Finance Department, and Mr. Nishiyama is chief of the Yokohama Customs. Mr. Nishiyama is sick, however, so that the Committee consists really of three persons only.

There having been much talk about the new Chinese tariff and the manner of levying it, we reproduce the following from *The Times*:—

We have received from the Secretary of the China League copies of the following correspondence which has passed between that body and the Foreign Office on the subject of *ad valorem* duties on imports into China, and of a memorandum on the same subject which has been communicated to the China League by Mr. A. Michie:—

"To the Most Hon. the Marquis of Lansdowne, K.G., H.M. Secretary of State for Foreign Affairs. 23rd September, 1901."

"My Lord,—The Board of Trade announces that it has been notified by the Foreign Office that the new China import duties will be levied *ad valorem* pending their conversion so far as feasible into specific rates, which is to be effected with the least possible delay."

"In connexion with this conversion the China League begs to urge upon his Majesty's Government in the interests of British traders the very pressing necessity for proceeding with the work of conversion as rapidly as possible."

"It is not necessary to point out to your lordship that any *ad valorem* tariff is especially open to objection by reason of the opportunities it affords for smuggling."

"The China League is convinced that British traders in China, whilst enjoying equal opportunities and a fair field, have no reason to fear the competition of any other national, but in the competition engendered by the scope which any *ad valorem* tariff affords for false declaration it is to be feared the British trader would not be able to hold his own."

"Such practices are not unknown under the existing tariff, with its multitude of unenumerated articles paying *ad valorem* duties, and it is notorious that for some time past a trade has been carried on in some of these unenumerated goods, by the baser sort of trader the profits on which are mainly, if not entirely, derived from false invoices and false declarations. In staple articles of import the British trader has hitherto been protected from this kind of competition by the specific duties; the change to *ad valorem* rates withdraws that protection and places the honest trader at a distinct disadvantage."

"It is computed that there are some 1,200 articles for which average values have to be fixed on which to base specific duties; it is, therefore, greatly to the interest of all connected with the China trade that the work of fixing average values should be begun at once in order that the specific tariff may come into force as soon as possible after the 5th November next."

I have the honour to be, &c.,

A. R. BURKILL, Hon. Secretary, China League.

To the Secretary to the China League.

Foreign Office, Sept. 30th, 1901.

Sir,—I am directed by the Marquis of Lansdowne to acknowledge the receipt of your letter of the 23rd inst., and to say that steps are being taken by his Majesty's Government with a view to obtaining a speedy conversion to specific rates of the 5 per cent. *ad valorem* duties, which will shortly be levied on imports into China."

I am, Sir, &c.,

FRANCIS BERTIE.

Memorandum communicated to the China League by Mr. A. Michie:—

"The unfortunate necessity for the Chinese Customs levying the general import dues upon an *ad valorem* tariff is so prejudicial to honest trade that the utmost exertion ought to be made to establish a scale of specific duties at the earliest possible moment."

It is obvious that under a system where importers declare their own values, and pay accordingly, there is great room for irregularities, and a decided temptation for one merchant or one group of merchants to endeavour to secure advantages over rivals. In such a competition the advantage would rarely fall to the British trader, not because he is more scrupulous than his neighbour—a point which need not be argued—but for reasons connected with British Consular administration."

"Under the existing tariff there is a small number of unclassified commodities on which duty has been levied *ad valorem*. It is assumed that as regards these few articles the Customs staff has by long experience acquired expert knowledge and that undervaluations would not be allowed to pass. Nevertheless, it is certain that even in these few and familiar articles frauds on the Revenue are systematically practised by the less reputable class of traders to the detriment of their honest neighbours. But if the Customs staff is unable wholly to prevent deception on the small scale, it is obviously incompetent to deal with the 1,200 or 1,300 articles composing the import trade of China. And to suppose that advantage will not be taken of the imperfect knowledge of the official examiners to enter many kinds of merchandise much below their value would be to assume that one of the most constant propensities of human nature were for the occasion to be suspended."

"The profit of the merchant depends less on the cost of his goods or on such fixed charges as freight, duty, and insurance, in regard to which he stands on an equality with his neighbours, than it does upon the advantage which he may gain over them on those charges in which he is able to establish an inequality in his own favour. When such an important item as import duty becomes a variable quantity, it is certain that merchants will go to great extremes in the competition for minimizing their individual payments. Fifty years ago smuggling was a lucrative occupation in China; fortunes were realized from that source alone. During that period the British traders suffered severely through the greater audacity of competitors based on the laxity of their Consular authorities, who were themselves engaged in trade. The Maritime Customs was created to put an end to these inequalities, and, loyally backed by Consuls and Ministers, it has succeeded. It is a point, however, not to be ignored that the events of last year have probably given rise to some new ideas tending to modify this loyalty of the foreign Powers. China having outlawed herself is apt to be treated with somewhat less deference than heretofore. The authority of the Customs may, therefore, never again receive the international support it has hitherto done. We have seen Italy, for example, taking forcible possession of the headquarters of the institution in Peking, compelling the head of the Customs to seek shelter and carry on his business where he can. This lawless proceeding, acquiesced in by all the Powers, does not augur well for the future authority of the Customs officers in dealing with foreign traders. Moreover, some of the Powers have recently shown themselves by no means averse to their nationals improving their pecuniary position unfairly at the expense of China. The making up of the indemnity claims offers some evidence of this. The claims of the residents of certain nationalities have been unduly inflated with the connivance of their respective Governments, while the British claims, perhaps also the American, have been rigidly restricted to actual and direct losses which have had to be proved up to the hilt. A similar inequality of treatment under the new Customs rules, a similar disposition of certain Governments to back up their nationals unjustly in their possible disputes with the Chinese officials, and a continuance of the resolution of the British Government to hold its own subjects in check would tend in no very lengthened period to transfer the bulk of the Chinese trade from British to foreign hands."

"These are some of the dangers which may be apprehended from the attempt to work an *ad valorem* tariff in China, and they constitute the most urgent reason why the period of its operation should be shortened by every possible means."

THE NEW CHINESE MINISTER.

The *Asahi Shimbun*, in welcoming the new Chinese Representative to Tokyo, suggests that as his influence in matters of international politics will not be large, great questions being decided now-a-days by direct communication between the Governments concerned, he should recognise that the main feature of his duty is to promote good relations between the peoples of the two empires. To that end, instead of shutting himself up in his Legation and saving money for his family, he should move about freely, mix widely with the Japanese, and entertain and be entertained by them. That counsel seems to embody not merely advice to the incomer but a reflection on the outgoing, and indeed it must be confessed that few of the Legations in Tokyo show less proclivity for social relations than the Chinese Legation."

Mr. Tsai is described by our contemporary as a native of Kiang-si, and as being reputed to be one of the wealthiest of Chinese officials. He is implicitly trusted by Yung Lu. His last office was that of Shanghai Taotai, and he served formerly in the Chinese Legations in London and Madrid."

Among various remarks made by Mr. Tsai to a representative of the *Asahi Shimbun*, one is reported to have been that Manchuria being the place where the tombs of the present Chinese dynasty stand, it will not be surrendered to Russia under any circumstances, and that, if necessary, China will seek the assistance of Japan and England to prevent even so

much as a square inch of the sacred soil from falling into the hands of a foreign country."

THE CHINESE INDEMNITY.
